IJMA a river Russia, which rises in a desolate tract in the N. E. of gov Volynia flows N. E. enters gov Arhangelsk and passing the towns of Varnos henga, and Dibov joints a bank Petchora near the town of R. k. k. j. a after a course of about 290 m. Its chief affluent, which it receives on the l. is the Lefia

IJSEL (DE) two rivers Ho land — 1 (Latin Isala or Sella French Yssel) A river which rises in Westphalia flows N W and, after crossing the Dutch frontier in prov Gelderland receives the Aals a stream also of Westphalia origin. The IJssel now named the Oude or Old IJssel flows thence, still N W past Deventer to Doornburg where it receives the New IJssel which is an offshoot of the Rhine f. risen by a canal out by Dronse. From Doornburg the river flows in a winding course, N by W across Gelderland passing Zutphen and Deventer forms the part of the boundary between that prov and Overijssel which it subsequently enters and passes Kampen, below which it falls into the Zuider Zee its principal affluents are the Bokstel which it receives at Zutphen the Schepstede at Deventer and the Gifst, above Kampen — 2 (Hollandsche or Gerwische IJssel) An offshoot of the Leek which it leaves in prov Utrecht, opposite Vianen flows, in a circuitous W and S W course, past IJsselstein Montfoort Oudewater and Gouda; and enters the Maas at IJsselmonde, above Rotterdam

IJSELMONDE (IJssel Mouth) — 1 A district, Holland prov S. Holland composed of an island formed by the lower arms of the Waal and the Maas between Dordrecht and Rotterdam — 2 A tn Holland prov S. Holland, dist. of same name a bank Maas, opposite the mouth of the IJssel composed of two closely-built streets with a Calvinistic church and a school. Pop. 1281

IJSELMUIDE a vil Holland prov Overijssel, 1 m W Kampen, with a church and school. Inhabitants engaged in agriculture, and in raising pot-herbs. Pop. 620

IJSELSTADT a tn Holland prov of and 8 m. S W Utrecht, on the IJssel. It is a neat place, is called surrounded by ditches, and traversed by a canal called the Haven has a townhouse, a pretty large building with a tower, a market-place, two churches and a synagogue several schools, and some charitable institutions. Inhabitants chiefly agricultural but there are three copper-smiths shops, and a rope-walk. Pop. 2349

IJJIGTINEK, or GINGINEK, a fortified in Siberia, gov of and 590 m. E N E. Okhotsk, at the head of a gulf of its own name, an arm of the Gulf of Pajmak, and the mouth of the Gyugs lat. 63° 8' N lon. 156° 22' E. It has a church and some trade in peltry. P 600

IJZENDIJKE, a tn Holland prov Zeeland 10 m. E Sluis. It was formerly fortified, but its walls are now ruinous. It has a townhouse in the market place a barracks, two churches and a school. The inhabitants are chiefly agricultural but there are also corn mills, and some brewing and brick making are carried on. Pop. 3068

IK two rivers, Russia, gov Orenburg. The one rises in a mountainous district, lat. 23° 30' N and proceeding N N W and passing the town of Musselinsk joins a bank Kama, after a course of about 220 m. The other flows S. S. W and joins a bank Sekmara, about 5 m. E. N. Ikonak, after a course of about 90 m

IKER-ARAL a lake, Chinese empire Mongolia, Kal has territory near the E. frontier of Koonara, between lat. 47 and 48° N and intersected by the meridian of 80° E. Length 40 m. average breadth 40 m. It receives several considerable streams, but has no known outlet

IKEN par Eng Suffolk 2597 ac Pop. 81

IKERVAR, a market in Hungary Thither Danube co, Eisenburg near a bank Raab a fertile district, occasionally inundated by the river 73 m. S. S. F. Vienna. It has a church and two elegant castles, with extensive park and fine gardens belonging to Count Batthyany. Pop. 1000

IKLODA a vil Hungary Russia co of and 23 m. S. F. Temesvar on the Blegans, with two churches, and has a trade in cattle. Pop. 178

IKORÉTA, a river Russia which rises in the N. of gov Voronezh flows S. and joins a bank Don about 80 m. below the junction of the Bonna, after a course of about 80 m.

IKROA or IKROPA a river Madagascar formed by the junction of several lake streams which have their rise in the prov Antsah, S. F. the towns of Antsaharo where it flows N N W and falls into Romi about 6 m. N W coast Madagascar being known during the latter part of its course by the name of the Bombote. It is navigable to Maro-tse about 25 m. from the sea. Entire length about 2.0 m

ILA or HAYILA two rivers in the Archipelago Maluccas — 1 In the Amboma entering the sea on the S W coast of Hiteo — 2 In the Mooroo. It rises from a lake in the interior flows N. a falls into the sea about midway between E and W ends of the island

ILALLY a vil W Asia, dist. of and 50 m. N W Kliva, to the E. of the great Turcoman desert. It consists of about 100 houses, contains a castle of 10 m. klan and is inhabited by Persians and Uzbeks.

ILAM par Eng Stafford 2938 ac Pop. 273.

ILANMORE — 1 An inlet Scotland Ilber las 4 m. N Coll about 1 m. in circumference — 2 A small inlet Clwyd bay Ireland co Mayo, about 4 m. N W W coast

ILANIKOVA and ILANIKOVICH two lakes Boi land Hebrides, S. E. Orkney

ILANZ (Hansisch Glean) a tn Switzerland, co Grisons a bank Vorder Rhoden at the confluence of the Yelac. It has dilapidated walls and is poor but the country around is fertile. Pop. 508

ILAY ILAY or ILAY a seaport in Peru 60 m. S. S. W Arequipa, of which it is the port lat. 16° 38' S lon. 72° 48' W. The town is situated on the W side of a gradually declining hill sloping towards the seaport, and is said to contain 1500 inhabitants, chiefly employed by the merchants of Arequipa. The houses are mostly constructed of planks and are arranged into two or three streets, the whole having a most miserable appearance. The port is formed chiefly by a few straggling islets, is capable of containing 30 or 25 sail and is much frequented by British merchant vessels. The principal exports are wool bark, and spices in exchange for which British merchandise is principally received. Near

Ilay the land is in several places covered with a whitish powder or dust, which the many natives throw in hollow or shaltered places and is drifted about like snow. It is not certainly known how or whence this substance has come, but it is pretty generally believed to be of volcanic production. In 1846 there entered the port 67 vessels 18 784 tons value of cargoes, £274 723 and there cleared out 71 vessels, 10,453 tons

value of cargoes, £382,564. Of these, entered 87 British vessels, of 11,678 tons; value of cargoes, £201,418. Cleared out, 59 British vessels, of 15,346 tons; value of cargoes, £282,611.

ILBOVO a vil Serbia, dir. of about 30 m N N E. Ogulini on a slope of the mountains of Duragica. It is poorly built, has narrow streets, a parish and a minor church a primary school and a trade in wine. Pop. 1100

ILCHESTER a tn. and par England, co. Somerset. The town 31 m. S. by W Bristol, is pleasantly situated on the level, here crossed by a substantial stone bridge. It consists of two regular streets, composed of small cottages, chiefly of brick and roofed with slate and tile. It has two established churches, one of which has an octagonal tower 50 ft. high, two Dissenting chapels, two schools, an almshouse, and a county hall. Flax-spinning and glove-making are carried on here to a considerable extent. Dehester was a Roman station, and a considerable town of the ancient Belgae. Mrs. F. Lambeth Egan was a native of the parish and Roger Bacon was born at the Priory in the year 1214. Dehester gives the title of earl to the family of Fox. Area of par 653 ac. Pop. 589. —(Local Correspondent.)

ILDOFOSNO a vil Spain, Old Cast. le, prov. of and 4 m. S.E. Segovia on the W slope of the mountains of Carpatinas, surrounded by portions of the Cordillera of Guadarrama. It is walled, has four gates in wall built, and contains many handsome houses, arranged in well-fermed streets, a handsome parish church and an extensive royal manufactory of velvets, but is chiefly noted for its palace of La Granja, a vast structure in the French style and taste, not of much merit architecturally but sumptuously furnished adorned with stucco and numerous other sculptures and paintings, and surrounded by beautiful gardens, formed at an immense expense, in a naturally wild and sterile district 2840 ft. above the sea. The court resides in this palace during part of the summer. Pop. 111

ILDFERTON par Eng. Northumberland 9670 m. P. 641
ILE-DE-FRANCE —1 Isl Indian Ocean See MADAGASCAR —2 Prov France. See ILE-DE-FRANCE.

ILEK a river Siberia, which rises in gov Irkutsk in lat. 55° N., flows N. W. past the town of Ilumsk and after a course of about 200 m. joins r. bank Angara.

ILEKKEH (Koussou, or Koussou) a tn. Kania, gov. of and 65 m. W S. S. Goussou at the confluence of the Doh with the Lualaba. It is the seat of a criminal court, contains a school of music, a school for mutual instruction, and an hospital and has very extensive salt mines. In the vicinity are two lakes, one of which is warm and salt, and the other acid. Pop. 2000

ILFIRD GREAT a vil and ward of Barking par England co. Essex. The village is situated 7 m. E.N.E. London on the Redoubt here crossed by a bridge, and on the Eastern Counties Railway of which it is a station contains Baptist and Wesleyan meeting-houses, an hospital founded by Henry II. and houses of correction for the 15. division of the county. Pop. 374

ILFORD (LITTLE) par Eng Essex 43 ac. P. 187
ILFRACOMBE a seaport, market tn. and par England, co. Devon. The town on the Bristol Channel, 41 m. N W Exeter lat. 51° 12' 45" N. lon. 4° 7' W (N.) consists of one main street, about 1 m. in length, extending along the sea-shore, often very steep, and inconveniently narrow comprising a number of good houses. At the S.W. end of the town stands the church, a large building and there are, besides, two Dissenting places of worship and several schools. The houses are safe and commodious, being elevated and protected by formidable rocky heights, and may be entered with perfect safety by vessels of 500 tons. It is much resorted to particularly in the winter season, by ships passing up and down the channel from Ireland. It is provided with an excellent pier 650 ft. in length stretching across the mouth of the harbour and, on an eminence overlooking it, is a light, 100 ft. above high water visible at a distance of 15 m. A considerable counting trade is carried on here. Oats are the chief article of export. There is also a pretty extensive herring fishery. Ilfracombe is resorted to for sea-bathing. It was a considerable seaport in a very early period having been mentioned as ship and 82 m. west to the fleet destined for the expedition to Cadiz in 1546. Steamers run daily to and

from Bristol, and at longer intervals to other places on the coast. Market on Saturdays. Pop. (1841) 2866; (1857) 3884. Area of par 5583 ac. Pop. 8517

ILGELDI a vil W Asia, khuras of 46 m. N N W Khiva. It is surrounded by a good wall and has several beautiful gardens in its vicinity though the soil is generally sandy. It is inhabited by Uzbeks.

ILHA-GRANDE, Isl Brazil. See GRANZA
ILHAVO a tn. and par Portugal prov. Douro, S.W. of Aveiro, on the Atlantic inhabited chiefly by fishermen. Pop. 6319

ILHEOS, four small isls. Brazil, close to the coast of prov. Bahia formerly called the Capitania of Jerro de Figueiredo-Correa, and now composing one of the comarcas of Bahia. The largest of these is covered with trees, but the others are steep barren rocks.

ILIL or GULUJA (Chinamen, Hoo-yuan-tching) a city Chinese empire, Soongaria, cap. dist. of same name r. bank Li river lat. 43° 46' N. lon. 83° 30' E. It is isolated by a stone wall and contains barracks, forts, granaries, and public offices for the use of Government and is a place of banishment for Chinese criminals. Outside the town are the barracks for the troops. It survives on a considerable trade with China, through the cities in prov. Kansu and also with other towns. Pop. 75,000.—The district is one of the three into which Soongaria is divided.—The river, rising about lat. 42° N. lon. 81° E. in the mountains of Tsai-shan loo, flows N.E., and then turns N.W. passing the city of Ilil, and falling into Lake Tungs or Balkash-Nor on the frontiers of Siberia, after a course of above 800 m.

ILIM a river Siberia, which rises near lat. 55° N. in the S.W. of circle Kamsk, gov Irkutsk flows easterly N N W passing the town of Ilumsk, and joins r. bank Angara, after a course of about 300 m.

ILIMSK, a tn Siberia, gov. and 800 m. N Irkutsk, on the Ilim surrounded by wooden walls, and has three wooden churches some general trade and a trade in fur. Pop. 511

ILINCA or ILINCA a mountain Ecuador in the Andes, dep. of, and 23 m. S.W. Quito lat. 0° 43' S. lon. 79° W. It has three peaks, and rises 17,330 ft. above the sea.

ILISEH or ILIKER a tn. Asiatic Turkey pass of and 50 m. N N E. Diarbekir on the route thence to Erzerum lat. 38° 20' N. lon. 40° 30' W. The greater portion of the inhabitants are employed in the weaving of cotton cloths with silk. The river Greece which rises near the village Aket, flows W S W passing immediately S of the walls of Athens, and after a course of only 12 m. falls into the Gulf of Egina, not far from the mouth of the Cephissus. Its proximity to Athens, and the frequent mention of it by Greek writers, have given it great classical celebrity though in itself it is very insignificant.

ILYATS the name by which the Persians designate the whole of these tribes who submit by their flocks, and also that portion which is employed in the pearl fishery. The Ilyats maintain connection with the old Persian stock and preserve their peculiar habits and customs. Their communities usually consist of 20 or 30 families. They make carpets and tents and have nearly all their wealth in themselves. They dress more modestly than any other Persians, a man rich in cattle often appearing in a coat that will scarcely hold together.

ILKESTON a market tn. and par England, co. Derby The town, 5 m. E.N.E. Derby a station on the Erewash Valley Railway is situated on a lofty hill and consists of one long, irregular street, from which several others diverge at right angles houses moderately well built of brick plentifully supplied with water well lighted with gas, and rapidly increasing in population. The church is a fine ancient edifice, having been partly built in the time of Stephen, with a lofty tower erected in 1737 and there are several Dissenting chapels, a mixed British and two national schools together with a mechanics institution and library. The principal manufactures carried on here are those of hosiery in all its branches, together with silk edgings, lace silk millinery, and a very superior silk fabric which is afterwards dressed in York shire, and made into gloves in London. A considerable number of the inhabitants are also employed in spinning wool and ironing. Weekly markets on Thursday for fairs. The Erewash and Withbrook usually intersect the town. Area of par, 3290 ac. Pop. 6123. —(Local Correspondent.)

ILKLEY *a vil and par* England, co York *The Village*, 31 m. W by S York, is beautifully situated *r* bank *W* Harle and is much resorted to by summer visitors. It has an ancient church, Wesleyan chapel and a free school. Many Roman coins, and other interesting relics have been discovered in the vicinity. Area of par 6885 ac. *P* 1302

ILL two rivers, Europe affluents of the Rhine —1 *A* river Austria, in Vorarlberg. It rises in the glacier of Samthal on the frontier of the Grisons, flows N W through the valleys of Ochsau and Montafon, receiving in its course, on the l., the Gemser, Gergallen, Gampadell, Balli, Alvier, Gampersbach and Samina, and on the r. the Silber Klotter and Wälder and falls into the Rhine on its r. bank, on the frontier of St. Gallen, 14 m. S. Lake Constance. Total course about 50 m. —2 [*Latin Alps*] *A* river France, which rises near Altkirch, dep. Haut-Rhin runs N N E passing Colmar enters dep. Bas Rhin shortly after passing Schœlstat, communicates with the canal of Brébeuf and Montreuil enters the town of Strasbourg and, shortly after leaving it, joins the Rhine. It becomes navigable at Colmar about 67 m above its mouth. whole course about 140 m. chief affluents the Lauch, Fesselt, Gersau and Andlin.

ILLI ABASCO *lake*, Central America. See CONTEMPERRE

ILLANA *a* in Spain New Castile, prov Guadalajara. In a narrow gorge, surrounded by lofty mountains, 40 m. E. S. E. Madrid. It contains a parish church, courthouse with prison, primary school and hospital and has manufactures of leather and of tissues of hemp wool and flax and a trade in corn, oil, wine, wood and charcoal. Pop. 1467

ILLANGA *a vil* Hungary Banat 42 m. S W *temeswar* with two Greek non-union parish churches. Near it is an extensive bog, where large quantities of turf are annually cut. Pop. 3116

ILLANOV or **ILLANA BAY** *a large bay* S W coast, of Mindanao, having a Benham Point on the E. E. and the Strait of Basilan on the N W making the width of the entrance about 105 m. its length inland being nearly the same. On the E. side of the bay is the town of Mindanao, about 2 m up the Simov. About 5 m further to the N is Pollock Cove, a good harbour where fresh water may be procured, but the inhabitants here, and those of the adjacent coast, mostly live by piracy, are a treacherous race, and must be carefully watched.

ILLARY *an vil* Scotland, Hielierick, co Inverness W of North Uist. It is 8 m long by 1½ m broad and yields tolerable crops of barley and pasture for cattle. Pop. 43

ILLASI *a vil* Austrian Italy prov of 9 m. E. N. E. Verona; the seat of a court of justice. It has a parish and an auxiliary church and four mills. Pop. 1550

ILLAVA or **ILLAM** *a market* in Hungary Hither Danube, co. of and 15 m. N. E. Tranechin in a fertile district, 1 bank Waag here crossed by a stone bridge. It contains a large square, adorned with a fountain, a handsome parish church with apse-tower, a castle and the remains of a monastery now converted into a cloth factory. Pop. 1353

ILLAWARRA *a fertile and beautiful dist.* New S. Wales, co. Camden about 50 m. from Sydney. It extends in a N and S. direction for a space of 18 m. along the sea-coast, and comprises about 150 000 ac. There is a fine lake of the same name in the district.

ILLE —1 *A* in France, dep. Pyrénées-Orientales 14 m. W. Perpignan, *r* bank Tet. It is surrounded by a wall, furnished with towers, is well built, and contains three churches and an hospital. It has manufactures of linen for household purposes, rope-works, tanneries, and silk mills and carries on a considerable trade in grain, fruit which is excellent, flax, hemp, and cattle. The olive is cultivated to some extent in the vicinity and the peach is grown here as much esteemed throughout Languedoc. Pop. 2998 —2 *A* small river France, which rises in Lake Bonlieu, in the N. of dep. Ile-et-Vilaine flows S. and joins *r* bank Vilaine at Rennes, after a course of about 30 m. It is an important feeder of the Ille and Rance canal, which lies close to it almost during its whole course.

ILLE-ET-VILAINNE, *a dep.* France bounded N by the English Channel and dep. Manche, E. by Mayenne S by

Loire-Inférieure, and W by Morbihan and Côtes-du-Nord lat. 47° 37' to 48° 42' N lon. 1° 5' to 2° 18' W. It is of a compact, and, but for a projecting point in the S. W. and another in the W. would be nearly of a square form greatest length N to S 75 m. greatest breadth, 66 m. area 5583 sq. m. The coast-line is of very limited extent, and, except towards the E. where it is low and sheltered is fringing with rocks and lined with rocky islands. It, however, contains two tolerable harbours, that of St. Malo, and another in the Bay of Cancale. The surface is very much broken by low hills, which, without attaining great height, rise a little N of the centre and form a watershed dividing the department into two basins the smaller of which, on the N., belongs to the English Channel and is drained chiefly by the Rance and the Cosnesse and the other to the basin of the Atlantic which receives its waters by the Vilaine and its tributaries Ille, Meu, Saire, &c. These two basins are connected by the canal of Ille-et-Rance. There are numerous lakes or rather large stagnant pools, within the department and extensive tracts of which of the Dol is the largest occupy a considerable portion of its surface. The principal geological formation is granite, overlain by primitive schists. The climate is not subject to great variations of temperature extreme heat and cold being equally rare but the air is much overcharged with moisture, and both rains and mists are very frequent. The soil of the department is generally of inferior quality and the agriculture, owing partly to the excessive subdivision of the land into small patches is very imperfect. Little more than one half of the surface is arable and nearly one-sixth of it is absolutely waste. The corn raised is, rather above the consumption and consists chiefly of wheat, madder, rye, oats, and buckwheat. After these the most important crops are hemp and flax. Tobacco also is cultivated to some extent particularly near St. Malo. The apple and pear are generally diffused over the department and from their produce some of the best cider and Perry of France are made. Among domestic animals, the horses and sheep are generally very inferior, horned cattle especially cows are of a better description and considerable attention is paid to the dairy. Much of the cheese made resembles Gruyère, and finds a ready sale. Poultry as well as game, large and small, abound and both the sea-coasts the rivers and lakes, furnish abundant supplies of fish. The oysters of Cancale are particularly esteemed. The minerals are of little consequence. They include small quantities of iron, copper, and lead none of which are worked. The granite quarries are of considerable value, and a quartz, used in making glass is very common. The principal manufactures are leather, sailcloth, sailing, and coarse linen, hats, sewing thread cordage and ship-biscuits and the trade, in addition to the above article, includes corn, butter, cheese, chestnuts, honey, cypresses, and salt pork. For administrative purposes, the department is divided into six arrondissements—Rennes, the capital St. Malo, Fougères, Redon, Montfort, Vitré, subdivided into 43 cantons, and 847 communes. Pop. (1849) 56 950

ILLER (*see, Rhenus*) *a river* Germany which rises in Austria, in the N. W. of the Tyrol, near Bead, flows N. W. through a wild valley to the town of Kampten, then N. W. forming part of the boundary between the kingdoms of Bavaria and Württemberg and forming numerous channels and islands, and after a course of about 100 m. none of which is navigable, joins *r* bank Danube, 2 m above Ulm. Of its numerous affluents, the Aarach, which it receives on the left, is the largest.

ILLERITZEN *a market* in Bavaria, circle Swabia, cap. bail of same name, *r* bank Iller here crossed by a bridge 89 m. W. S. W. Augsburg with two castles, a chapel and an hospital *a* trade in corn and cattle, and two annual fairs. Pop. 1146. Area of bail, 46 sq. m. Pop. 10,531

ILLI ESCAS, *a m. Spain*, New Castile, prov. of and 17 m. N. N. E. Toledo cap. dist. of same name in an extensive plain, on the road from Madrid to Toledo. It is an ancient place of some celebrity and still possesses remains of its former grandeur among others, several Gothic and two Moorish arches and a large and handsome Gothic structure, with a grand facade and some fine paintings. The modern town consists of about 500 houses, substantially built, and arranged in two squares and several unimproved streets and has a magnificent Gothic church, dedicated to the assumption of the Virgin, with

a majestic square tower of Moorish architecture, surrounded by another polygonal tower and terminated by a spire a richly decorated hermitage, with an lounge, whose alleged retrospects powers attract numerous pilgrims, a townhouse, with a colon-

nade in front two primary schools and a hospital several oil mills, and a much-frequented annual fair which lasts three days. Pop. 1898.

ILLIERS, a France dep Eure-et-Loir 1 bank Loire 15 m. S.W. Chartres, remarkable for the remains of an old castle. It has manufactures of cloth blankets, harness, cow and glove leather and a trade in cattle, sheep, and wool. Pop. 2252.

ILLIMANI a lofty mountain Bol. in Andes. E. Cordillera, one of the most magnificent portions of the Andes, of which it is the culminating point about 25 m. E.S.E. La Paz, from which its appearance is singularly majestic and imposing. It has four principal peaks the most N. of which is in lat. 16° 3' 56" S. lon. 67° 43' 39" W. Three of the loftiest summits are of the following elevations respectively E. peak 21 145 ft above sea level middle peak 21 094 ft. and N. peak 21 060. The snowy part of the E. Cordillera begins with the gigantic mass of the Illimani, and proceeds in a continuous line of snow-clad peaks to the group of Vilcanota, where it unites with the Cordillera of the coast. Though its summit is covered with perpetual snow the latter does not descend below 16,500 ft.

ILLINCZE, a vil Austria, Schlesien, 29 m W.S.W. Pterwardein, on the Roonst. It contains a Greek unannounced parish, and another old church in ruins. Pop. 1174.

ILLINGEN several small places Germany particularly—1 A vil Rheinl. Prussia, gov. Trier, circle Ochtelberg with a K. Catholic parish church and a chapel; a colliery glass-work, a trade in cattle, and 3 annual fairs. Pop. 548.—2 A vil Württemberg, circle Nuech. bail. Maulbronn, with a parish church. Pop. 1400.

ILLINGTON, par Eng. Norfolk; 1298 ac. Pop. 111.

ILLINOIS, a river U. States, formed by the union of the Kankakee and Des Plaines, in the N.E. part of the State of Illinois, to which it gives its name. It flows thence S.W. and S., diagonally through the State, and falls into the

Mississippi about 70 m N.W. its junction with the Mississippi lat. 38° 58' N. lon. 90° 30' W.—after a course of 400 m., principal tributaries, the Fox and Vermilion. It is 1900 ft. wide at its mouth, and is navigable to the entrance of the Vermilion above which it is obstructed by rapids. A canal has lately been dug from La Salle, ascending the river with Chicago, on Lake Michigan—a distance of about 106 m.

ILLINOIS, one of the Western U. States, bounded N. by Wisconsin; E. by Lake Michigan and Indiana, N.E. by Kentucky from which it is separated by the Ohio and W. by the Mississippi separating it from Missouri and Iowa between lat. 37° and 42° 30' N. lon. 87° 17' and 91° 38' W. Length, 350 m. breadth, 180 m. area, 56 405 sq. m., or 35 459,300 ac. The surface is somewhat hilly near the Ohio, and undulating towards the W. and a range of bluffs runs for a considerable distance along the margin of the Mississippi sometimes rising abruptly from the water's edge, generally a few miles from it; but with these slight exceptions, the whole state is one continuous plain, with a gentle inclination towards the S.W. It has a greater proportion of arable land than any other State of the Union. The soil may be divided into alluvium of inexhaustible fertility some of it having produced Indian corn uninterruptedly and without manure for nearly a century dry prairie rising from 80 to 100 feet above the alluvial soil and almost entirely drained for although less fertile it is also less subject to inundations wet prairie land, covered with coarse grass; and timber land, some portions of which are amazingly fertile. The only part of the State thickly wooded is the extreme E. portion everywhere else the prairie predominates. The principal rivers are the Illinois, which traverses the State diagonally N.E. to S.W., Rock Kaskaskia, and Wabash. About 200 m. above the mouth of the Illinois is a beautiful sheet of water called Lake Peoria, 30 m. long and two broad. Vegetable productions—Indian corn wheat, oats, buckwheat, potatoes, turnips, cotton hemp, flax tobacco, mastic, &c. For trees—oak walnut ash elm, sugar maple locust, hackberry, buckeye, sycamore, and white pine. The common domestic animals are abundant, and immense numbers of swine are reared on the most of the forests. Lead is found in immense quantities

and indeed the lead mines of this State are believed to be the richest in the world the metal is found chiefly near the Wisconsin frontier Galena being the centre of the mining district. Coal abounds in the bluffs and several valuable salt springs are found in the E. and S. the rocks mostly are junctions gypsum and sandstone. The climate, although somewhat humid, is generally healthy except in the neighbourhood of marshy ground, average annual temperature 50° to 53° Fah. but winter especially in the N. is remarkably cold. The commerce and manufactures of this State are as yet very inconsiderable, except in the article of lead. Illinois is divided into 99 counties, and has a number of small towns—Springfield being the seat of government, and Chicago on Lake Michigan the principal commercial depot. The legislature consists of 60 senators and 130 representatives. It constituted a separate territory in 1809, and admitted as a State into the Union in 1818. Pop. (1845) 648 482 of whom 531 were slaves, (1850) 855 384.

ILLKIRCH, or ELLENBURG a vil France dep. Bas-Rhin, 3 m S. Strasbourg; 7 bank Rh. with manufactures of flax and pack shearing, steel, oil from seeds, and tobacco. P. 2969.

ILLMIRE, or ILLMIR, par Eng. Bucks; 674 ac. P. 63.

ILLMITY (also and Fels) or Urvan and Osnar Urvan, two contiguous vil. Hungary Thither Danube, co. of, and 22 m. W.S.W. Wieselburg on Lake Neusiedler. They contain a K. Catholic parish church, and have manufactures of soap. Much soda also is obtained here. Pop. 1306.

ILLMAU UVRAN and UVRAN, two nearly contiguous vil. Switzerland can. of, and 9 m N.E. Zurich; 7 bank Kempe, with a parish church, pretty situated on a hill. It has two cotton-spinning mills, and spinning silk and weaving cotton are carried on. Pop. 2766.

ILLOGAN par Eng. Cornwall; 8817 ac. Pop. 9266.

ILLOK, or ULLAR, a market in Austria, Schlesien, co. Byrrnia, cap. dist. of same name, agreeably situated 7 bank Danube, over which there is here a ferry to Planken, on the

opposite side of the river 34 m. W. Peterwardein. It contains a church, *Fluor*, a castle, and large cavalry barracks. On a height above the town are three fortifications supposed by some to be of Roman origin and in an adjoining wood are the remains of a temple of Diana. Pop. 6350.

ILLORA, a to Spain, Andalusia, prov. of, and 23 m. N. W. Granada, cap. dist. of same name at the S. E. extremity of the Sierra de Parandina on a height crowned by a Moorish castle in ruins. It is very irregularly built, consisting of a great number of streets and lanes, some level and others sloping generally well paved and lined by houses of two stories. The public square is tolerably large, and is adorned with an elegant and spacious fountain. The principal buildings are two parish churches one of them erected immediately after the expulsion of the Moors a large and elegant structure surmounted by a lofty tower an old monastery townhouse hospital and two primary schools. The manufactures consist of woollen and linen stuffs, and there are numerous oil and flour mills. Trade in corn oil vegetables, and fruit. P. 6859.

ILLORAI or **LOREAL**, a vil., bal. Sardinia, div. and 42 m. S. E. Sassari most beautifully situated within the valley of the Gossone. The ruins scattered around show that it must at one time have been a place of some consequence, but it now consists of about 260 houses huddled together without any order. It contains a church almost devoid of ornament and a primary school and has some trade in dairy produce, particularly cheese which is much esteemed. Pop. 1000.

ILLOVA a river Austria, which rises in the S. slope of the Rade or Rila Mountains, on the confines of Croatia and Slavonia flows directly S. S. W. forming the boundary between these two countries and joins the bank Save by several gullies, a little below the confluence of the Lonya after a course of about 50 m.

ILI UEGA a to Spain Aragón prov. of and 35 m. S. W. Saragossa, on a flat near 1 bank Azanda. It contains six squares, a parish church a palace in which are the remains of the mid pope Laine, who was born in it. a town house, prison and primary school, and has manufactures of common woollen cloth an oil and flour mill, a weekly market, and an annual fair. Pop. 1350.

ILI UXT or **ILLOZER** a market in Russia gov. Cour land, E. S. E. Mtsn, with a fine castle, two churches, and a monastery. Pop. 900.

ILLYE-FALVA or **ERIKENOVSK** (Latin, *Illye*) a market in Austria, Transylvania, Haromszek Stuhl r. bank Aluta, 13 m. N. E. Kronstadt, with a townhouse and three churches. Pop. 1417.

ILLYRIA (KINGDOM OF) [German *Illyrisch-Königreich*, French *Royaume d'Illyrie*] a territory or kingdom forming the S. W. portion of the Austrian dominions, and bounded N. by Salzburg and Styria, E. by Syria and Croatia; S. the Adriatic and W. Venice and the Tyrol area, 6242 sq. m. It was formed in 1815. It is composed of the ancient duchies of Carniola and Carinthia the margraviate of Istria, the duchies of Gorizia and Gradiska, and the town and territory of Trieste—the last three incorporated in 1840 prior to which they composed the *Illyrian* or coast lands. It is very irregular in shape, and terminates sharply in the S. in a triangular peninsula. The surface is very mountainous. In the N. a branch of the *Alps*, commencing at the Gross-Glockner stretches E. forming the boundary between Illyria on the S. and Salzburg and Styria on the N. Another branch forming the *Carnic* or *Julian Alps*, stretches across the kingdom in a S. W. direction. From these principal branches numerous ramifications proceed. In regard to drainage the surface is divided into two great basins—that of the Danube, on the N., the far larger of the two and that of the Adriatic, on the S. The former basin receives its waters chiefly by the Drave, which, entering the kingdom below *Lana* traverses it from W. to E. and partly also by the Sava, which rises within and forms part of the boundary between it and Styria. The basin of the Adriatic receives its waters by a great number of small streams, of which the most important is the *Isonzo*. But though the streams are small, the bays into which they discharge themselves are of great magnitude and form excellent roadsteads. Of these it is sufficient to mention that of Trieste which contains by far the largest seaport in the Austrian dominion. The climate varies much according to locality. In the N., and among the

mountains, it is bleak and cold but in the S. particularly in the valley of the *Isonzo* is warm and pleasant. One of the greatest scourges of the country is the *haze*, which often blows from the N. E. and N. W. with the flow of a tempest and commits great ravages. In harvest the *arceuth* becomes equally tempestuous, and is not infrequently accompanied with deluges of rain. Notwithstanding the unfavourable nature of the surface, a very considerable proportion of it is under the plough and being industriously cultivated yields good crops especially of rye and oats, but more sparingly of wheat. *Flax* also is extensively cultivated. A considerable extent of ground is in vineyards, but the produce is not remarkable either for quantity or quality; a large portion of it is converted into brandy. The pastures are very extensive and rear great numbers of horses, cattle, and sheep. Boars and wolves are not uncommon in the forests, which cover a large extent of surface, and form one of the chief sources of revenue, especially when their extensive use in the smelting and refining of minerals is considered. Among these minerals the first place belongs to quicksilver which is no other part of Europe, with exception of Almaden in Spain is found in such abundance as here in the mines of *Idria*. The other minerals of some value are gold and silver still obtained in small quantities iron, alum, zinc sulphur coal and salt. Besides the manufactures connected with these minerals, woollen silk and cotton *tissues* are extensively made. The trade is important, but was long greatly impeded by the imperfect means of transit a railway however now leads nearly through the centre of the kingdom from Vienna to Trieste. For administrative purposes, Illyria is divided into the governments of Laybach and Trieste. The former subdivided into *Carniola* (*Kärnten*) and *Carniola* (*Krain*) contains the five circles of Laybach, Adelsberg, Neustadt, Villach and Klagenfurt the latter contains the three circles of Trieste, Gorz, and Istria. Pop. (1846) 1,934,947 of whom about three-fourths are Slavens one-sixth Germans, and one-twentieth Italians and the large majority R. Catholics.

II M a river Germany which rises on the N. E. slope of the Thuringerwald, has *Ilmenau* as an isolated part of Saxony flows directly N. E. through Schwarzburg-Sonderhausen Schwarzburg-Rudolstadt and Saxe-Weimar passing the towns of Ilmenau, Elm, Kramichfeld, and Weimar and after a course of about 60 m. joins the bank Saal on the frontiers of Prussian Saxony. It is much used for navigation.

ILM or **STADT** flew a to Germany principally Schwarzburg-Rudolstadt cap. of same name. 1 bank Ilm, 21 m. S. E. Gotha. It is well built has a court of justice an old monastery which has been converted into a castle manufactures of coarse woollens and a trade in cattle. Pop. 2000.

ILMHAN N. — 1 [formerly *Mosul*] Lake Russia, gov. of and near W. borders of No. ogood. It is nearly in the form of an equilateral triangle, at whose N. angle stands Novogorod. Its greatest length is about 33 m. its breadth 28 m. It receives numerous streams and discharges itself by the Volk into Lake Ladoga. Its navigation is rendered dangerous by sudden gusts of wind. — 2 A lake, frontiers of gov. Caucasus and Don Cossacks called also Lake Manduk (which see).

ILMHAN N. — 1 A to Saxony-Weimar principality of, and 16 m. S. W. Weimar cap. hall of same name, at the N. foot of the Thuringian Forest, about 1500 ft. above the sea. Though an old town, it is well built and has a court of justice a mining directory and other public offices two churches, a townhouse and cornhouse manufactures of porcelain, dulle woollen cloth and ribbons two iron mills and five annual fairs. A battle was fought here, in 1708 by the Swedes against the Saxons and Russians. Pop. 2364. Area of soil 17 sq. m. Pop. 6000. — 2 A river Hanover which rises in a marsh 7 m. S. W. Bodenstedt, flows E. to that town then directly N. N. W. past Elber and Lüneburg and joins the bank Elbe, 16 m. above Hamburg after a course of about 70 m. Its chief affluent is the Neisse.

ILMINGTON par Eng. Warwick 4000 ac. P. 988. **ILMINSTER**, a market in, and par England, co. Somerset. The town 14 m. E. by R. Bridgewater on an *admiralty* consists of one principal street, lying E. to W. with several smaller ones intersecting it at right angles; all of them well paved, and kept remarkably clean. It is well supplied with water the houses in general well built, and having a neat and comfortable appearance. It has a fine cruciform church

in the decorated English style with an elegant tower several dissenting places of worship a well-endowed grammar and a free school, and a secondary for young ladies. The manufacture of towels and broad-cloth was formerly carried on here to a great extent but only one woollen factory is now in operation. Many of the houses are employed in glove-making but agriculture is the chief occupation. Weekly market on Wednesday. Area of pop 4050 ac. Pop 839.
—Local Correspondent.

ILOCOG (North and South) two provs Philippines. W side of I. Luzon, extending from the N extremity of that I. S. to the point of Managapan lat. 16° 46' N their united length being about 130 m. breadth about 35 m. Both provinces are mountainous the more N. especially so, but still rich and fertile plains intervene, yielding indigo, corn, sugar, coffee, cacao, coconuts, and all the ordinary fruits and trees of tropical climate. In the mountains, buffaloes, stags, wild boars, oxen, and wild horses, are numerous. At one time, 20,000 looms were in active operation in Ilocos, and although that number is now very much diminished still all sorts of cotton stuffs, bleached and unbleached, are made and dyed. The two provinces are divided into 87 pueblos or communities, 25 of which belong to the S. and 12 to the N. province. Ugan is the cap. of the former and Laong of the latter. Pop. 358,733 of which 209,403 in the S. and 149,330 in the N. province.—(Malab. Philippines)

ILOILO a prov. Philippines, S.E. part of I. Panay, and like the latter, overlooking the Visayan Sea. It is the largest of the three provinces into which the I. of Panay is divided, and it is also the most populous the richest, and most industrious. Although mountains generally and thickly wooded, it contains some beautiful, fertile, and well-cultivated plains yielding rice, cotton, mangle, cacao, coconuts, and tobacco of excellent quality. In the mountains gold is found. Turtle-fishing is also carried on extensively. The houses manufacture fine cotton fabrics and stuffs of exquisite beauty composed of the fibre of the plant-apple leaf. Iloilo is divided into 30 m. blocs, of which Iloilo the cap. is the largest a trifling place with a pop. of 3570. Pop. prov. 2,08,700.—(Malab. Philippines)

ILONCA or **ILUSTRA** a vil Hungary Hither Transcarpathia, at the foot of a mountain 6 m. from Nyireadi a. with a church, manufactures of nails, and a flour mill. Iron is mined in the vicinity. Pop. 1000.

ILOYLA, a river Russia, which rises in the W. of gov. Samara flows S.W. enters gov. Don Cosackia, and joins I. bank Don, after a course of about 200 m. It flows, for a considerable distance, parallel to the Volga and so near it, when opposite to the town of Kamishin, that a canal between it and that town was projected and actually commenced by Peter the Great. The result would have been to give a navigable communication between the basins of the Volga and the Don. The importance of the object caused the project to be revived by Catherine II.; but the impracticable nature of the ground, and the difference of nearly 200 ft. between the levels of the basins, led to its ultimate abandonment.

ILOVINEKALIA, a Russia, gov. Don Cosackia 45 m. N.W. Tamirisk, a river Russia, a little above its junction with the Don.

ILFENDAM a vil Holland, prov. N. Holland, 6 m. N. by E. Amsterdam, on the N. Holland Canal, with two churches and a school. Inhabitants chiefly engaged in cattle rearing and dairy farming. Pop. 518.

ILSTEBERG a vil Prussian Saxony gov. of and 47 m. S.W. Silesburg, at the mouth of the beautiful valley of the Ilse. It contains two churches, an old and a new castle, and has iron, copper and tin works a paper mill, and other mill works, and vapour baths. Pop. 2113.

ILSELI a vil Württemberg, circle Recker hall, Bogen a. with a parish church and a mill. Pop. 3000.

ILSINGTON par Eng. Devon 7569 ac. Pop. 1214.

ILSLEY (Eure) a small market tn. and par England Northshire. The town pleasantly situated in the midst of extensive sheep downs 8 m. N. by E. Newbury has extensive sheep market and fairs. Area of par 3979 ac. Pop. 750.

ILSON par Wales, Glamorgan, 2679 ac. Pop. 256.

ILTYN par Eng. Somerset 1719 ac. Pop. 596.

ILVESHIM a vil Baden circle Lower Rhine, bail. Lohrburg, with a parish church, and a castle. Pop. 1001.

ILE, a river Bavaria, which rises on the S.W. frontier of Bohemia, in Mount Raxal Schliersee chain, and, proceeding S. joins I. bank Danube, at Passau, after having received several small tributaries on both banks. Direct course, exclusive of windings, 8, by E. 25 m.

ILEA a small river Russian Poland, which rises in w.-w. direction from E. past the town of its name, and after a course of about 40 m., joins I. bank Vistula.

IMABA a tn. Japan, I. Nippon, prov. Simosa, E. from Jedo.

IMALAGUAN a small I. Philippines, in the Mindoro Sea lat. (S. extremity) 10° 48' N.; lon. 121° 15' E. (n.).

IMAM DOGA, a tn. Anatolia Turkey, pop. of and 90 m. N.N.W. Bagdad, I. bank Tigris; lat. 34° 34' N. lon. 43° 40' E.

IMANDRA a lake, Russian Lapland gov. Archangel dist. of, and 80 m. S. Kola length N. to S. about 60 m.; average breadth, not above 5 m. It is from the greater part of the year, but when open, is navigable. A canal connects it with the White Sea.

IMATACA a river Venezuela, which rises in prov. Caracas, in a mountain not far from the coast, and near the town of its name joins r. bank Orinoco, about 60 m. above its mouth, and after a course of about 5 m. Its channel is narrow but deep.

IMBER, par Eng. White, 3698 ac. Pop. 440.

IMBERAGO a vil and par Italy Lombardy prov. Como, dist. of and 8 m. S. Berio on a rugged precipice overlooking the course of the river. It contains a parish church and the remains of an old castle, to which a fine park is attached. Pop. 1500.

IMBRO or **IMBRO**, an I. European Turkey prov. Rhodæ, in the N. part of the Greek Archipelago W. from the entrance to the Dardanelles lat. (W. point) 40° 10' 30" N. lon. 25° 49' E. (e). It is 18 m. long E. to W. 8 m. broad, and terminates W. in Point Anafica, and E. in that of Rhæ. It is mountainous rising in its highest part to the height of 1950 ft. well wooded and intersected with rich fertile valleys, producing wine, all cotton and wool. It has only two towns or villages—the and Castro. Pop. 4000 mostly Greeks.

IMERETHI or **IMERETIA** a prov. Russia on the S. of the Caucasus now included in Kutais, the most W. of the three Russian Trans-Caucasian governments; greatest length N. to S. 90 m. greatest breadth, about 75 m. The surface has a general slope W. to the Black Sea but is mostly very uneven and rugged being traversed by ramifications of the Caucasus. The only streams are the Rion and its tributaries. The climate is excellent, and the soil generally fertile. All the higher mountain-slopes are covered with magnificent forests many of the lower valleys afford luxuriant pasture and in the lower grounds notwithstanding the violence and unskillful management of the inhabitants, heavy crops of wheat, barley, maize, tobacco, hemp, and madder are raised. Fruit trees grow spontaneously and chestnuts, walnuts, apricots, cherries, &c. are found in abundance in every quarter. The vine also is said to grow spontaneously and is often found entwining itself with the trees of the forest. Domestic animals are not numerous, but man is very abundant. Considerable attention is paid to the rearing of bees and silkworms. There are no manufactures deserving of the name and the trade, almost wholly in the hands of Armenians, Greeks, and Jews, consists chiefly in exports of the raw produce of the country—particularly wine, corn, silk, wax, oil, wool and fruit and imports of woollen, linen and silk goods, copper and iron ware, cutlery, salt, and colonial produce. The trade in slaves—made for the army and families for the harems of the Turks—was once the most important of all but has been put down by the Russians. Imerethi, in the 14th century formed part of the kingdom of Georgia. It afterwards became independent, and was governed by its own sovereigns one of whom in 1604, voluntarily made it over to Russia. Pop. about 81,000.—(Rus. Karte von den Kaukasus Gebirgen, nach Schlegelmann.)

IMIEK (Sr.) (German, St. Ismer) a vil and par Switzerland, can. of and 25 m. N.W. Lucerne, in the valley of same name, watered by the Sihl. It is an old, but well-built place; contains a church and a well-endowed hospital and has manufactures of linen, lace, cloths and watches, and articles in metal. Pop. 2685.

IMMENHAUSEN is in Hesse-Cassel, Niederhessen, near 1. bank Hols-Kapen, 7 m. N. W. W. Canal. It is walled has a parish church, townhouse, and school. Pop. 1658.

IMMENTADJ, a m. Ravaria, circle Swabia, esp. dist. of same name, 75 m. S. W. Munich with a church, castle, Capuchin monastery hospital, and orphan asylum. Manufactures of nails and iron-ware, and a trade in linen and outsize. Close to the town is the old ruinous castle of Rothenschild. Pop. 1800. Area of dist., 84 sq. m. Pop. 1240.

IMMINGHAM, par. Hants, Hampshire, 2719 m. P. 243. **IMOL**, or **Imola**, a m. Hungary, Thaurer Deaulo, co. of and 10 m. N. by R. Comorn, near the confluence of the Zistva with the Neutra. It contains a R. Catholic church and belongs to the Archbishop of Gran but almost all the inhabitants are Protestants. Pop. 1879.

IMOLA [anc. *Forum Cornelii*], a fortified m. kingd. of Italy, cap. dist. and a bishop's see, legion of, and 28 m. W. by S. Ravenna, on an island in the Sestione, in the midst of a fertile plain covered with vineyards. It is surrounded by walls, defended by towers and overlooked by an old castle has a cathedral, and several other churches several convents, five of which are for nuns a college public library hospital and theatre. It formerly also possessed a literary academy of some celebrity—the *Accademia di Indietro*. The town has some manufactures of cream-of-tartar and woolen hosiery and it is the centre likewise of a pretty extensive vine-trade. Imola was founded by the Lombards in the ruins of *Forum Cornelii*, destroyed by Jugurth and it afterwards became the subject of frequent contention. It was successively held by the different chiefs who ruled in central Italy and was annexed to the Papal States by Julius II. Pop. 8000.

IMOSCHI is in Austria, Dalmatia 73 m. E. by S. Sebenico lat. 48° 30' N. lon. 17° 15' E. about 1878 ft. above sea-level. The houses are of stone, well built, and roofed with stone tiles but are badly finished within and are in consequence, necessarily cold and uncomfortable in winter to the rigorous of which the elevated position of the town adds considerably. The floors consist of single planks, with abundant space between each to admit a stream of wind from below windows which, the doors and windows are numerous and fire-places or stoves unknown. To add to the cold and wintry look of the place, the houses are all white-washed. There is a market every Wednesday and Saturday which is frequented by Turks who bring for sale horses, grain, butter, cheese, cattle, goats, sheep and pigs taking in exchange wine, bread and various manufactures. 1 op. about 860—(*Wolkstein's Dalmatia and Montenegro*).

IMI AL, TOOMAL, or MUPHER, a river India beyond the Ganges one of the largest in Coasa. It rises N. of Munroepore flows S. enters Burmah, shortly after which it turns E. N. E. and falls into the Khyen-dwen, about 120 m. N. W. Ava. Total course, about 200 m.

IMPERADOR (VILLA DA) is in Brazil prov. Pernambuco, with a parish church and some trade in provisions, sugar and cotton.

IMPERATIZ (VILLA DA) is in Brazil prov. Ceara, on the Serra Umbria, W. of Fortaleza. It has a court of justice and a parish church. Inhabitants chiefly employed in cultivating cotton and raising cattle.

IMPHRICK, par. Irel. Cork 4112 m. Pop. 886.

IMPINGTON par. Eng. Cambridge 1900 m. P. 278.

IMRE (Bazzy) several places, Hungary particularly—
1 A vil. Thibaur Thaur, co. Bihar on the Beretty, 8 m. from Szekesfehervar. It has a Protestant parish church. Pop. 1363.
2 A vil. Thibaur Thaur, co. Havia, in a somewhat sandy but not infertile district, 18 m. from Kartagaz Uj-Ballas. It has a Protestant parish church and a castle. Pop. 1895.

IMREGH, a vil. Hungary Thibaur Thaur, co. Zemplin on the Bodrog, 6 m. from Vajta, with a Protestant church a castle, and Franciscan monastery and some trade in corn and wine. From the number of colts, urse, and other remains, found in the vicinity it is supposed to have been originally occupied by a Roman colony. Pop. 804.

IMST or **Taser (Ime, Umstet)** is in Austria, Tyrol, cap. circle Upper Imstal 30 m. W. Innsbruck. It is situated at a great height, in a wild and mountainous country and has a parish church a Capuchin convent, and some manufactures of cotton. At one time, the most important trade

was in canopy birds which were reared here in great numbers, and carried to the remotest corners of Europe; to St. Petersburg and Constantinople, and even across the Hallsport, and into Egypt. The trade still continues, but is very much diminished. To the N. W. of Imst is the Mutzkopf, about 8470 ft. high. Pop. 2600.

INABA [Chinese *Yi-fan*] a coast prov. Japan, in W. part of Iki Nighon. It is mountainous, but fertile produces abundance of silk, and is divided into seven districts.
INAGHESHILL IRL. A VTD the most W. of the Tribes Da Cunha group Atlantic lat. 87° 18' S. lon. 12° 53' W. (n.) forming an oblong square, 16 m. long by 12 m. broad with a rugged surface and a light sandy soil. It is nearly overgrown with stunted trees, heath, brushwood and reeds.

INAGR par. Irel. Clare 19 588 m. P. 9005.

INAGUA, or **HABAGUA** (GMAZ and LOTTIE) two of the Bahama Is. The former is the most S. and one of the largest of the group. lat. (N. H. point) 21° 21' N. lon. 78° 1° W. (n.). It comprises 576 sq. m. and contains an extensive salt pond. In 1847 it had not been surveyed, and a few acres only had been granted to it. It is valuable for the salt it produces and for its pasturage the interior being chiefly prairie land. It had in 1847 only 173 inhabitants. Little Inagua lies 10 m. N. from the larger island lat. (N. point) 21° 35' N. lon. 78° W. (n.).

INCA is in Spain, al Majorca, on a low hill at the foot of a mountain-chain 16 m. N. E. Palma. It consists chiefly of a wide and straight street, which extends over the whole length of the town, and is spread out by several minor streets. It contains a square, of considerable dimensions, but irregular figure four churches, so placed as to make the form of a cross, one of them surmounted by a massive square tower a townhouse, grammar and primary schools and has manufactures of linen louti or soap, and brandy numerous wind mills and two annual fairs, one of which lasts three weeks. P. 4603.

INCE par. Eng. Cheshire 8245 m. P. 423.

INCH is in Celtic word, signifying silvered plain, and with qualifying affixes, the names of parishes and towns in Scotland and Ireland—

1 Three par. Scotland—1 Wigton 10 m. by 4½ m. I 1122—2 (Inchmarnock) Renfrew 3½ m. by 2 m. P. 649—3 (Inchture) Perth 12 m. sq. P. 745.

II Numerous par. Ireland—1 Wexford and Wicklow 6808 m. P. 1515—2 Wexford 1589 m. 1 408—3 Cork 3821 m. 1 1410—4 Tipperary 4889 m. P. 418—5 Donegal 3098 m. P. 769—6 Linn 6404 m. 1 1909—7 (Inchiquin) Clare 17 488 m. P. 2164—8 (Inchiquin) Cork 46 415 m. P. 4584—9 (Inchiquin) Cork 1476 m. 1 401—10 (Inch St. Laurence) Limerick 2208 m. Pop. 611.

III An Isl. Ireland co. Donegal Lough Swilly 3½ m. N. W. Londonderry. It has a varied surface, rising at Inch Top to 787 ft. area, 2089 a. a small church, a Presbyterian meeting-house and a R. Catholic chapel. On the N. side is Down Fort. Pop. about 1000.

IV Numerous Isl. Scotland—1 Four Isl. Firth of Forth (Inchkeith) 2 m. S. Aberdeen. It is about 1 m. long partly arable abounds in rabbits, and is noted for its oysters, which are produced in great quantities. Alexander I. founded a monastery here in 1123, the ruins of which still remain (Inchkeith) about mid-channel immediately E. Queensferry (Inchkeith) 3½ m. V Leith having near the centre a light-house with bright revolving light, 235 ft. above the sea; lat. 56° 3' N. lon. 2° 5' W. (Inchkeith) near E. of Inchkeith some of the shores are occupied by excellent oyster-beds. An Isl. Firth of Clyde (Inch-Marnock) 1½ m. off S. W. side Isl. Bute, 5 m. m circumference about a fourth part is arable land, the rest is moor and pasture. It is anciently belonged to the monastery of Sadell, to which it was given by Rodericus de Kintyre, probably about the year 1220. The ruins of a small chapel or oratory which was dedicated to St. Marnock, are still to be seen here—3 Numerous Isl., co. Dumfries and Galloway in Loch Lomond, chiefly towards its S. extremity of which the most noted are (Inch-Oak) [Island of Old Woman] on Skirling, about 1 m. long, high, and well wooded; yields wheat and oats of tolerable quality. It was formerly the site of a manory (Inch-Marnock) the largest and most S. of the Isl., 2½ m. from the efflux of the Leven, 3 m. long by 1 m. broad, and chiefly

used as a deer-park. (Jook-Tsuen-shan) (Jook's Island), nearly 1 m. long by 3 fms. broad, of a beautiful pyramidal form, mostly covered with wood —4, (Jook-shoo-oo or Joon) an island in the S. E. of the Jook-shoo basin and the German Ocean. Area, 34 sq. m. Pop. 119.—5, (Jook-Kenneth) an island, on Argyle, at the entrance of Jook-shoo-Kan, off the W. coast of Mull 12 m. W. by S. Arus. It contains some ecclesiastical remains.

INCINO, a vil. and par. Austria Italy prov. Como, dist. of and about 8 m. from Erba, in a plain at the foot of a mountain. From the ancient remains existing in it, it appears to have once been a place of much more importance than at present. It has two churches, one of them very ancient, and a silk mill. Pop. 1853.

INDIA (Latin, *Indiæ*) a m. Sardinian Island, div. of and 14 m. S.W. Alexandria, in a plain, r. bank Belto. It was once walled, but all the fortifications have disappeared. It now consists of three distinct villages, communicating by bridges over the stream. Has three churches, one of which is a handsome structure, three palaces, and several other commodious public and private edifices and a trade in wine. Pop. 2335.

INDALS-Els a river Sweden, which rises among the mountains on the E. borders of Norway about lat 64° N. flows S.E. expanding into several lakes, and forming lofty cascades, and falls, by a wide embouchure into the gulf of Bothnia, 20 m. S.W. Hermonad. After its last cascade, as Ede which is above 200 ft. high, it becomes navigable. Its chief affluents are, on the r. the river which discharges lake Sturgeon and, on the l. the Åman. Its course is about 70 m.

INDEN a vil. Prussia, prov. Aix-la-Chapelle, circle Jülich, with a R. Catholic parish church a chapel, and many features of linen weavers cloth, and flax, and several bleachfields. Pop. 968.

INDENTED HEAD a promontory of S.E. Australia, Victoria, forming the S. side of Geelong harbour lat. (N.W. point) 38° 12' E. lon. 144° 40' E. It is about 15 m. long, and 5 m. to 10 m. broad area about 100,000 ac. The E. portion is low and flat, soil light, sandy and well-cultured with great thimble wood, with the honeyuckle, oak, gum, and eucalyptus. The land then swells and alternates with beautiful hill and dale. On these hills the soil is of fine quality and the grass more luxuriant, than on the plain.

INDERAB a m. Tartary See ASERBAIDJAN.

INDERABIA an isl. Persian Gulf, S.W. coast Laristan, from which it is distant about 7 m. lat. 28° 41' N. lon. 55° 59' E. (a.) It is low and level and is about 5½ m. or 4 m. long E. and W. with a grove of date trees near its centre.

INDIA-BEYOND-THE-GANGES, BURMAH, SIKIM, or INDOPURNA a region of S. Asia, consisting of the most E. of its three great peninsulas, and extending exclusive of the Malay peninsula, between lat. 1° 20' and 28° N. and lon. 90° and 109° E. bounded N. by the E. Himalaya, separating it from Bhotan and Tibet, also by the Chinese provinces of Yunnan and Quanzhou, W. by Hindoostan, from which it is properly separated by the river Brahmaputra, also by the Bay of Bengal and Indian Ocean E. by the China Sea and S. by the Gulf of Siam, and Straits of Malacca. Length, N. to S. at least 2000 m.; greatest breadth, E. to W. about 1800 m. Four great peninsular mountain chains traverse this region N. to S., bounding the great basins of the Irrawadi, Salween, Mekong, and Tonquin rivers, respectively composing the central portions of the dominions of Burmah, Siam, the E. Laos, and Cambodia and Tonquin, in the empire of Annam which last comprises the E. quarter of this peninsula. Besides the above-mentioned states, India-beyond-the-Ganges includes Assam, Jyntah, Cachar, the districts of Sylhet, Tipurah, and Aitchung, Assam and the Tenasserim provinces, all which belong to the British presidency of Bengal—(see INDIA, BURMAH)—and the semi-independent states, Cooch, or Mymensingh. The whole region abounds with rich valleys, and yields many of the most valuable, and some unique mineral, vegetable, and animal products. Except on the W. frontiers—included in Bengal—the inhabitants are of races quite different from those located in Hindoostan or India-within-the-Ganges, and they resemble much more those inhabiting China and the great table-land of E. Asia. Their architecture, customs, and religion—which has in Buddhism, in various and somewhat blended forms—are also analogous to those prevalent through-

out the rest of E. Asia, and, excepting Burmah, Cooch, and the British territories above, the Indians of all the states of this peninsula acknowledge themselves more or less tributary to the Chinese empire. See ARAK, BURMAH, LAOS, SIAM, &c.

INDIA (Burmese) an extensive empire, consisting of most part of the great central peninsula of Southern Asia—(see HINDOOSTAN) together with Ceylon various districts of the Bengal Presidency the Tenasserim Provinces, and adjacent islands in India-beyond-the-Ganges and Singapore, Penang, Malacca, and Province Wellesley—collectively called the Straits Settlements—in ex-territory to the Malay peninsula, Ceylon, however, as a colony belonging to the British Crown and unconnected with any of the Indian Presidencies and, exclusive of it and the detached territories enumerated above, British India extends between lat. 8° 8' and 34° N. and lon. 68° 58' and 97° E. bounded N. by the Himalaya which separates it from Tibet and the territories of the Maharajah Gholab Sing also by the States of Nepal and Bhotan; N.W. by the Indus, and the mountain chains to Cape Horn which separate the territory watered by that river from Afghanistan and Beloochistan W. and S.W. by the Indian Ocean which, with the Gulf of Manner and the Bay of Bengal, bounds it also on the E. and, on its E. frontier it extends in Upper Assam as far as E. Tibet, and is elsewhere separated by mountain ranges from the Burmese dominions. The wide region circumscribed by these limits, stretching through 28° of lat. and more than 30° of lon. is nearly 2000 m. in length N. to S. and 1800 m. in its greatest breadth, E. to W. It comprises numerous states besides the territory directly subject to the British rule; but these states are all more or less tributary and, since the annexation of the Punjab in 1839—if we except Nepal, Bhotan, and some comparatively insignificant Portuguese and French settlements—the whole of India, from its most N. frontier to Cape Comorin may be considered as substantially British dominion.

The physical geography of India, and the manners, customs, religions, &c. of its various races of inhabitants, have been already simply treated in our article on HINDOOSTAN and under the several articles BURMAH, BOMBEY, and MALACCA, PUNJAB, PERSIA, SIKIM, HAZARPOOTANA, DECALAN, MY SORE, and the names of its other divisions, provinces, and states will be found mentioned the peculiarities characteristic of each. The area and population of British India and its subsidiary states—exclusive of territories under the Bengal Presidency in the peninsula E. of the Ganges and Brahmaputra—are shown in a table in next page.

The above dependant states have all relinquished political relations with each other and with any but the paramount British state, to which they are bound by alliances of various kinds. Some have treaties, offensive and defensive, and the right to claim protection, external and internal from the British Indian Government which has a right on its part, to interfere in their internal affairs others have similar right to claim protection and the aid of troops from the British Government, which has, however, no right to interfere in their internal affairs while others are mostly tributaries, agreeing to subordinate co-operation to the British Government their sovereigns, however being sovereign rulers in their own dominions.

Government.—By an Act of Parliament passed in 1833rd which subtracted materially from the privileges previously possessed by the East India Company the government of British India was vested in that company as trustees for the Crown, subordinate to the Board of Control established by Mr Pitt's India Bill in 1784. The Supreme Government, which has generally its seat in Bengal, consists of the Governor-General and a Council of five members, one of whom is the Commander-in-Chief, two are members elected from amongst the civil servants of the company, one from amongst their military officers, and one member is chosen who does not belong to the service of the company but is generally selected for his acquaintances with British law. The Governor-General is nominated by the Court of Directors, his appointment being subject to the approval of the sovereign salary £34,000. The Governor-General has the power to declare war conclude peace, and make treaties of commerce and alliance. In conjunction with his Council, he makes laws and regulations for the force throughout the whole of the territories of British India, and amongst all the

servants of the Company within the dominions of the native princes, and he may sometimes, of his own authority and in opposition to all the members of his council; but, in such cases, he must fully record his reasons for so doing and all

his orders are subject to revision by the Court of Directors and Board of Control. The other members of the Supreme Council, except the Commander-in-Chief are appointed by the Court of Directors, and must have resided in India for ten

years salary £8 600. The fifth member of the Council has not the privilege of voting with the rest, except on making laws and regulations for British India. The Supreme Council is also the Council for the Presidency of Bengal. The Presidencies of Madras and Bombay have each their Governor and Council of these members similarly appointed. The Governor of Agra received a salary of £13 000 annually. The Presidency of Agra remained distinct from that of Bengal for a short period only under the title of the North-Western Provinces; that territory has been again united to the Bengal Presidency and is administered by a Lieutenant-Governor.

The Board of Control, as originally founded, consisted of six members but the chief authority exercised is vested in the President, who is a Cabinet Minister, and, under another

name, Secretary of State for India. The Court of Directors of the East India Company which nominates the Governors and Members of Council of the different Presidencies, and retains most of the patronage throughout British India, is elected by a certain number amongst the holders of the capital stock of the company which consists of 25,000 000 shares, in different proportions, amongst 8500 individuals. Proprietors of £1000 stock have each one vote, of £2000 two votes, of £5000 three votes, and of £10 000 or upwards four votes in the election of Directors, and of committees to form by laws, and for the control of pensions beyond a certain amount, and the bestowal of rewards. Persons holding less than £1000 stock have no vote, although they may take a part in the disbursements of the court. The court consists of twenty

four Directors, who must be born or naturalized subjects of Great Britain, and possessed of at least £2000 stock. Six members of the court retire annually from the directorate, but are re-eligible after the lapse of 12 months. Each member of the court has a salary of £200 per annum (the chairman £500). For despatch of business the court is divided into three committees respectively undertaking the finance and home, the political and military and the revenue and judicial departments. There is a secret committee, composed of the chairman, deputy-chairman, and another member who decides concerning political proceedings to be undertaken by the company. From this court proceed, on all ordinary occasions, instructions relative to the management of our Indian empire, but a draft of every despatch sent thither must be first submitted to the approval of the Board of Control and the court is bound to lay annually before Parliament an account of its revenue and expenditure for the preceding year.

Justices.—In each of the capital cities of the presidencies of Bengal, Madras, and Bombay is a superior civil and criminal court, over which neither the Court of Directors nor the Board of Control have any authority the judges in them being appointed directly by the sovereign. Within these cities, English law is held to be equally binding upon the European and the native inhabitants but beyond their haunts Europeans only are subject to British jurisprudence. The high courts at the three also named presidencies are termed *Sudder Dewannees* and *Peshawar Adalats*, or superior civil and criminal courts, and they consist of a chief and three puisne judges, in addition to whom in the courts at Calcutta, native Hindoo and Mahomedan judges sit on the bench. In the *Sudder courts*, suits for property to the amount of £5 000 may originate, and from their decisions appeal lies only to the sovereign in council, and then only when the property in dispute amounts to £10 000 or upwards.

Other courts are those of commissioners of circuit the judges of which hold sessions of civil delivery at least twice a year at the allah and city stations—allah courts both European and native are established throughout British India, in each district or collectorate, as well as in the cities and towns. The European allah courts consist of a judge, a magistrate, and a registrar in conjunction with native assessors in it is many original suits to the value of £2000 and they decide appeals from the decisions of the native allah courts and those of the *registars, sadder-amans, and munsifs* (native Hindoo and Mahomedan arbitrators). In the allahs are also courts composed of native judges alone, who may try causes to the value of 1000 rupees, or to that of 5000 rupees on the recommendation of a European judge. In each village and community are native police-courts, the head officer of which receives criminal charges, and holds inquests and in the h W provinces are established *panchayats* or native juries of five persons, who arbitrate in minor causes. In all the superior courts, trial by jury takes place in criminal cases, and natives are eligible both as petty and grand jurors. The proceedings in the superior courts are conducted in English but in provincial courts always in the vernacular languages. Copies of all laws and regulations are preserved for inspection in the courts of justice, and are translated and sold to the community at a low price. At Calcutta the court of requests, once the scene of much venality and oppression on the part of native officers has been superseded by the establishment there (1859) of a small-cause court, on the plan of the county courts in England and it is reported that similar courts will be established in the capitals of the other presidencies. Except at those capitals, the Mahomedan laws (the severity of which has been mitigated under the British rule) are commonly administered to the Mahomedan, and the Hindoo laws to the Hindoo population but it is at the option of the judge to dispense with these in particular cases, and to substitute the regulations of the government of India. In the year 1850 there was extended to the whole of British India, an important ordinance—passed under the administration of Lord W. Bentinck and which, since his rule, has been current in the Hindoo presidency. The severity a Hindu on his conversion to Christianity having become impure in the highest degree in the opinion of his previous co-religionists was held to have forfeited all his previous rights in property and inheritance, as well as other civil privileges. By the act referred to, all these pains and penalties which had before

been attached to the relinquishment of Hindooism were annulled, and no native of India new forbids, by change of creed, any property or privileges to which he would, but for that change, have been entitled. —(*Collected Documents*, 1861.) By an act of the Indian Government, passed in 1845, slavery in India was abolished. The Mirda sacrifices of the hill tribes of Orissa were suppressed in 1845; other superstitious ceremonies elsewhere have shared the same fate; *Suttee* or widow-burning and *Thugges* or religious murder have been put down and for the most part, *Dacoity* or gang robbery.

Education.—Many efforts have long been made by the Indian Government to extend a knowledge of European branches of learning amongst the natives of India, particularly in the Bengal and Agra presidencies. A few years ago six superior colleges existed in the Bengal presidency under the superintendence of the council of education established at Calcutta the last of which colleges was founded at Patna. Within the Bengal presidency there were, by the last accounts, 51 district and other schools, including one for the Bhagulpore hill-tribes and a number of pupils in these, a few years since, amounted to 8703 of whom 6140 were Hindoos, and 1891 Mahomedans. The total expense of these schools amounted to 916 854 rupees (£95 000) and in 1845 arrangements had been made for the establishment of 100 additional schools. The schools in the Bombay presidency are also under a board of education consisting of three European members, one Parsee, and one Mahomedan and in this presidency some years since there were 120 schools, attended by 560 pupils. At Madras is an institution termed a university but for a long period fewer attempts were made to extend education in that than in the other presidencies. It is gratifying to observe that, in many instances, the long-standing prejudices of the Hindoos against certain branches of learning have been signally overcome; and that, for instance in medical studies at Calcutta and elsewhere, Hindoo students have made distinguished progress. Religious distinctions also although they have in India, as elsewhere, long widely separated the different sections of the population appear to have become divested of much of the bigotry which originally characterized them. A striking instance of this is to be found in the fact that in the Mahomedan colleges at Bombay both Christians and Hindoos are admitted, and the latter constitute the greater number of the students. Of the professors of this college also, eleven are Parsees and three of the rival Shah sect. At Amritsar in the Punjab a public seminary has lately been endowed by the Government with £500 annually and in a portion of the Lahore territories, with a population of 2 470 000 are 1835 native public schools, in which 11,500 boys receive instruction. Female education is generally discouraged by the Hindoos in the Sikh territories however at the city of Lahore are 16 schools, at which female children are instructed and in all the three presidencies are flourishing female schools, under the superintendence of the missionaries of various denominations of Christians who, as well as the Indian Government, are diligently and successfully employed in conveying secular instruction to the natives the tuition received in such schools being superior to that obtained in the Government schools—unhappily as in the latter religious instruction is absolutely prohibited while in the missionary schools it professedly forms the prominent feature. The press in India is free and, for the most part, it exhibits a tendency to liberal views. In 1848, there were published in Calcutta five newspapers in the Persian or Hindoo languages, and nine in Bengali besides numerous editions of Hindoo and Mahomedan works. At Delhi many scientific works, and translations of English historical works were published, and printing was actively going on at Bareilly. The translations of the learned societies and reviews at Calcutta and Bombay are periodicals of high merit; and English newspapers are published in the capitals of all the presidencies (seven at Calcutta) and at Delhi, and Lahore.

Literary works published in India are protected by a copyright act, passed in 1847 and similar to that in force in Great Britain. —(*Compendium to the Royal Annals. Sec. and Acts of the Government of India.*)

The Ecclesiastical Establishment in India is under the superintendence of the Bishops of Calcutta, Madras, and Bombay who are appointed by the sovereign the first named having a revenue of £4000 and the others £8000 per annum each,

which sums are paid by the E. India Company. There is also an endowment in each diocese. Chaplains at the different stations are appointed by the court of directors, subject to the approval of the Archbishop of Canterbury or the Bishop of London. An allowance is made by the company to a certain number of the E. Catholic clergymen, and clergymen of the Scotch Established church. Other Christian sects support their own ministers in India. The church establishments of the Syrian Christians inhabiting the Malabar coast, and the native E. Catholic Christians, are unconnected with the paramount state.

Land Revenue.—The land tax is the principal source of the Indian revenue. Throughout the greater portion of the presidencies of Bengal namely in the provinces of Bengal, Bihar, Benares and Orissa (excepting Cuttack) and in some parts of the Madras presidency—as in the N. Circars, and parts of Salem and other central districts—the land is assessed under the *zemindari* or perpetual settlement. In most parts of the Madras presidency in portions of that of Bombay and in Cuttack, it is under the *ryotwari* settlement and in the Bombay and Agra presidencies with few exceptions, the rent is raised upon the *village system*—a political arrangement. When the E. India Company succeeded to the territories in Bengal, she previously held by the Mogul sovereigns they found the revenue collected by officers named *Zemindars*, *Talookdars*, &c. whom after a great deal of controversy the Indian Government of Lord Cornwallis constituted the proprietors of the soil. With them a perpetual settlement was made—the tax of the Government being fixed for ever at an amount calculated upon *half the annual produce of the soil* for a certain term of years previously. This was the nominal amount of the tax, but in practice the sums levied were much below that amount, being frequently but one-fourth, and in some localities, one-sixth of the produce. As the *Zemindars* appropriated the surplus of the half, in addition to being entitled to retain one-tenth of the amount levied as a remuneration for collecting the tax. The *ryotwari system* introduced by Sir Thomas Munro into the territories of Madras involves a levy on each cultivated field separately and the contract exists between the government and the cultivator without the intervention of the *Zemindar* or middleman. The *village system*, under which most part of the presidency of Bombay and all of that of Agra, has been assumed has prevailed from time immemorial throughout India, and is an institution peculiarly consonant with the habits and usages of the people. The villages are so many petty republics each having its own separate organization and functionaries who may thus be enumerated—the *Potdar* or head of the village and local judge, the recorder, tax-gatherer, land-measurer, conductor of water, watchman, smith, coach maker, potter, barber, watchman, astrologer, poet, and schoolmaster. These officers are chosen annually by the inhabitants of the village and each has a share in the produce of the soil. The arrangement for the payment of the land tax is here made by the Government with the *potdar* or head man of the village. The lands aggregately are assessed at a certain amount, and if any members of the village community are unable to pay their share of the assessment the responsibility rests with the community—the other members of which make up the deficiency by mutual arrangement. We learn from a valuable report on revenue statistics by Lieutenant-Colonel Bylke that the land-tax in the Agra presidency where the village system is in force is collected with facility the amount annually raised there exceeds £4,000,000 sterling—the cost of collection being about 62 per cent. The maximum rate in that presidency is about 56 p. per acre the minimum 1s. 6d. and the average 3s. 7½d. on lands producing crops worth 200 rupees (£20) per acre. In four collectorates of the Deccan also, where the land tax is levied on the villages, the rate is no more than from 1s. 6d. to 3s. 3d. per acre. It was stated in 1847 that the increase of revenue in the N. W. provinces in 40 years had amounted to £1,800,000 sterling or 7½ per cent. and Colonel Bylke expresses his assent to the statement that this increase of revenue has been attended with improvement in the condition of the rural population. (—*Journal of the Statistical Soc. vol. x. p. 347*.) In the Agra presidency the amount of assessment has been settled with the villages for a period of 30 years, and in the Deccan and Mahratta country for 20 years. In Bengal the permanency of the rent has so much fostered agriculture and

extended cultivation that the *Zemindars* in all parts are said to enjoy a revenue at least equal to and in many places a great deal more than the Government tax—the expense, however, of the *ryots* or cultivators.

Grains, Fruits, and Commodities.—The vegetable products of this wide empire have been already enumerated under the article HINDOOSTAN. Amongst the cereals cultivated during the wet season are millets, *jowara* (*Holcus sorghum*), *bajra* (*Holcus spicatus*) and other kinds of millets maize which is not popularly used as a bread-corn but cooked as a dhal as a green vegetable and rice, in localities favourable for its culture. The grains cultivated during the dry season from October to June are bearded wheats, barley of several kinds, and various pulses. Contrary to generally-received notions in this country neither rice nor wheat form the chief nutriment of the natives of India, the former is raised only on alluvial soils, and is often twice as dear as wheat, which succeeds it, as a grain for exportation in the upper part of the valley of the Ganges and on the table-lands the bulk of the food of from 70 to 80 millions of the population consists of grains the names of which are scarcely known in Europe. Rice is principally produced in the vast plains of Bengal on those of Tanjore, S. Arcot, &c. in the Madras presidency in the Cochin and lower parts of the territories of the latter commonly around the banks of rivers near their mouths, where the climate is hottest, and the annual inundation most extensive. In the delta of the Ganges, rice yields two crops annually in August and December. In the year 1841–42 the total export of rice and other grain was valued at £844,804 of which the export to the United Kingdom amounted in value to £199,688. In 1849 the imports into Great Britain of rice from India amounted to 87,510 cwts. By far the greater proportion of the rice imported into Europe is produced in India. It is raised extensively from Deccan to Delhi, there it is reported to be upwards of 470 Indigo factories in the Bengal and Agra presidencies which are conducted by English capitalists, and the value of the annual produce is calculated at from £2,000,000 to £3,000,000 sterling. The culture extends over upwards of 1,000,000 a. in the Gangetic region and it is stated that where it prevails the rural population are uniformly in the best circumstances. It is also raised extensively in Candahar in the British presidency and in other parts of British India. In 1841, India to the value of £2,397,168 was exported from Bengal, the total export from India being valued at £2,730,560 and in 1849 7,983 cwts were imported into Great Britain and Ireland. The trade in opium is a Government monopoly the article is raised in the British territories only in Baluch and Bournes, and under very strict limitations but, in the free territories, and other parts of the provinces of Malwa in Central India, it is also grown and is purchased or sold on commission by the British Government for exportation to China, the Indian Archipelago and other parts of S. E. Asia. In 1833 the export consisted of 9084 chests of Patna and Benares opium from Calcutta, and 11,713 chests of Malwa opium from the Bombay presidency the whole valued at £3,151,486. In 1839–40 the revenue derived from the sale of opium had decreased to £784,367 but, in 1843–44, it had again risen to £2,251,017 and in 1849 the sale of opium raised in the British territory real sold to the Bengal Government the sum of £9,015,000 exclusive of the receipts from the sale of Malwa opium and opium passed in Bombay amounting to £898,093. Cotton is a most important staple of Indian produce. All the plants yielding it thrive more or less in different portions of the territory especially the *Gossypium herbaceum*, which is supposed to be indigenous in India. It is raised chiefly in peninsular India, especially in the uplands of the S. and W., in which latter quarter are the principal ports of shipment, Barrooch, Kattywar and other districts in Gujarat, and Dary in the Bombay presidency. Considerable in the Madras presidency and the table-land of Mysore, are the portions of India most famous for their cotton crops. The indigenous cotton succeeds only on what is called the black cotton soil which is estimated to extend over about 800,000 sq. m. of country but in addition there is a red cotton soil formed of the debris of siliceous rocks, extending over from 200,000 to 800,000 sq. m. on which alone the cotton of America succeeds, and for the culture of which it is well adapted. The streams at the river mouths in Bengal has been found, on

analysis, apparently well suited for the growth of the sea-land cotton of the United States, but little cotton is raised in the Bengal presidency, its production being chiefly limited to the regions not producing the other great staples—jute, sugar, silk, and opium. The consumption of cotton in India has been very vaguely and variously estimated at from 3,500,000 to 3,000,000,000 lbs. per annum. It is certainly used to an enormous extent nearly every article of clothing or woven or padded furniture, for which wool, linen, &c. are employed in other countries, being in India made of that material. The Indian cotton is naturally of good quality, it takes dye well and readily, and its fibres swell in bleaching but being raised generally by cultivators with little capital and being badly cleaned, and liable to dirt and injury from defective modes of conveyance, it can seldom compete in price with other cottons brought to the British markets. In 1840-41 however some experimental farms, under the superintendence of American planters, were established in the chief cotton districts the cleaning of cotton by American machinery was also introduced, and some cotton, equal to any from America, has been imported at Liverpool. In 1841 250,000 bales of cotton were exported from India. In 1845-46, of the total exports, there were 143,359 bales, valued at £1,831,721 and chiefly sent to China and the United Kingdom, 129,629 $\frac{1}{2}$ bales were shipped from Bombay. In 1849, the imports of cotton-wool from British India into Great Britain amounted to 70,836,515 lbs. being considerably more than double the quantity received from Brazil, and somewhat more than one-tenth of the entire quantity imported and retained for consumption in the United Kingdom. In 1850 the total import amounted to 118,635,380 lbs. of which 113,408,140 lbs. were from the Bombay, 5,511,450 lbs. from the Madras, and 96,780 lbs. from the Bengal presidency. —(Pari Report, May 1851 &c.)

For a long period the E. India sugar was greatly inferior to the sugar of the W. Indies and a heavy obstacle to its introduction into the British markets existed in the shape of discriminatory duties, unfavourable to the E. Indian produce. But, since these have been removed the export of sugar from India has rapidly extended, and the manufacture of the article has of late years improved so much, as to make it bear a very favourable contrast for purity as well as for superior quality with the sugar from other quarters. In 1833 the whole import of sugar from India into the United Kingdom amounted to only 111,721 cwt. but it thenceforward steadily increased, and, in 1843, amounted to 1,360,417 cwt. or somewhat more than half as much as that received from the W. Indies. In the same year the imports into Great Britain and Ireland from India comprised 19,253 cwt. of molasses, and 908,576 gallons of rum. In 1849, the import into the United Kingdom of sugar from British India and the Russian Islands, amounted to 1,550,000 cwt. In 1850 of 1,575,815 lbs. similarly imported. 1,144,450 lbs. were from the Bengal presidency. The coffee imported in the same year from British India amounted to 3,843,357 lbs., of which 3,333,000 lbs. were from the presidency of Bombay. Pepper is an important product of the Malabar coast, and the import into the United Kingdom from British India, in 1849 amounted to 3,918,611 lbs. Silk is produced chiefly in Bengal and in Assam the silk of which latter provinces is of the first quality and is yielded by several different worms. The mulberry thrives so freely in India that its culture might be extended greatly beyond its present extent. The import of the raw silk from India into Great Britain, in 1849 is set down at 1,904,327 lbs., or nearly as much as that sent by China. In addition to which upwards of 500,000 pieces of India silk manufactures were in the same year received in the United Kingdom. Silk is a Government monopoly and the source of a considerable revenue it is made in large quantities in Cutch. The quantity disposed of at the Government sales, in 1844-45, was 4,644,646 bazar mounds, or 8,405,398 cwt. and in the year 1846-49, the Indian Government realised 23,409,567 from the sale of this article, considerably more than half of which was derived from the Bengal presidency. Kivu and nitrate of soda effluence on the soil, over large tracts in Bahr and in other parts of the country and, in 1849 260,746 cwt. of saltpetre were imported from British India into Great Britain, being rather more than half the total supply to the United Kingdom. In Assam, a considerable

extent of the yellow soil which characterizes some of the sea districts in China, has been found to exist, and the two plants *Sesbania* there grow abundantly as also in the province K. K. in the Himalayas. Tobacco of superior quality hankumber from the Malabar coast and Tenasserim provinces; cardamoms, coco-nuts, chick and pearl shells, chiefly from the B. J. drugs, dyer, gum-lac, lacwood, saffron, safflower, turmeric, ginger, sugar, and hides, bonza ivory, casah, and other species are amongst the great variety of articles of the Indian export trade. Diamonds are found in Burmah and in the Deccan. Copper is plentiful in the Himalayas, but at present the ore is all but useless from deficient means of transport. Gold silver lead, mercury, antimony and other metals, are found in different districts; they do not appear however as essential sources of commercial wealth. India is not a country naturally adapted for sheep-farming, and the wool of the native breeds is coarse and dark-coloured. The better sheep are met with on the uplands of Mysore, Combarator and the Deccan, also at Ceylon in Rajpootana and of late years attention has been paid to their improvement, by crossing the breeds and with so much success that the export of wool to Great Britain had increased from 371 lbs. in 1839 to 3,975,865 lbs. in 1845 and in 1849 is amounted to 4,189,853 lbs. Mulholland is

A TABLE OF THE AGGREGATE VALUE OF THE MERCHANDISE EXPORTED AND IMPORTED FROM AND THROUGH THE PORTS OF BOMBAY, CALCUTTA, AND BOMBAY IN 1842-3.

Presidencies.	Exports to the Year 1842-3.	Imports to the Year 1842-3.
Bombay (Calcutta)	£ 8,850,954	£ 4,132,812
Madras	£ 1,130,180	£ 884,578
Bombay	£ 1,154,575	£ 3,820,018
Total value	14,071,819	8,796,908

A TABLE OF THE VALUE OF THE EXPORTS AND IMPORTS OF BRITISH INDIA, & FROM DIFFERENT COUNTRIES, IN THE YEAR 1848-9.

Countries.	Export to Great Britain, 1848-9.	Imports from Great Britain, 1848-9.
Great Britain	£ 5,568,265	£ 5,568,265
Portugal	£ 1,000,000	£ 1,000,000
1. States	141,180	73,074
Arabian and Persian Gulf.	811,858	410,846
C. Ind.	6,108,578	636,180

Java	10,941	44
Maldiva Islands	6,990	16,148
Manilla	1,817	1,817
Cape of Good Hope	9,596	1,801
R. America	1,781	16,781
Mauritius	100,133	14,375
Coast of Africa	39,001	49,591
Madagascar	8,817	8,848
S. India	2,817	2,709
Humburg	5,998	1,723
Bombay	5,998	1,723
Other countries, and between different parts of India.	1,015,771	1,019,584
Total.	14,071,819	8,796,908

In 1849 the total exports from the United Kingdom to British India, including Ceylon &c. amounted to £6,503,274. The annual gross amount of the imports to and exports from India, in the years 1844-5 and 1847-8, is given below—

Date.	Exports.	Imports.
1844-5	£ 10,500,271	£ 10,796,145
1845-6	£ 17,029,478	£ 9,087,478
1846-7	£ 16,452,450	£ 8,811,267
1847-8	£ 15,865,840	£ 8,400,700

In April, 1854, the exclusive right of the E. India Company to trade with China, &c. ceased and European ships may now proceed by sea to any part of British India without a license, though some restrictions still exist to their liberty to enter the territories of the Company by land. Foreign ships may enter at any of the ports, but they are not privileged to convey freight from one port to another.

The principal weights measures &c. in use in India are the aser (1 lb. 13 oz. 14 dwt.) the mound (74 lb. 10 oz. nearly Imperial measure) the old beaser mound is equivalent to 63 lbs 2 oz. The beas or maul is a land measure of 1800 sq. yards. The Company's rupee of 16 annas is valued at 2s. sterling; 16 Company's rupees make a gold mohur. A kas is a hundred thousand, and a crore 10 millions.

Manufactures.—The silk fabrics of India are inferior to those of China; but, in 1842-43, there were exported from Bengal to Great Britain to the amount of 24,02,894 rupees (£240,290) constituting about two-thirds of their entire export. By far the most important manufactures, as regards the extent to which they are produced by the natives of India, are cotton piece-goods, the best of which are made along the Coromandel coast. They are next chiefly to Arabia Perma, Paga Pasing and the Indian Archipelago but their manufacture has sustained a progressive diminution within the last 25 years. In 1816-17, nearly all India was supplied with home-manufactured cotton goods, and the same were exported to the United Kingdom to the value of £1 659 438. In 1842-43 the export from India to Great Britain reached only the value of £40 387 the native cotton goods both as to home and foreign supply having by that period become in a great measure supplanted by British cotton manufactures. In 1847 the British plain printed and coloured cotton fabrics cleared to Calcutta alone from the ports of London Liverpool and the Clyde, amounted in the aggregate to 112 816 787 yards, valued at £1 899 476 besides cotton twist 11 198,889 lbs. worth £286,808. In 1849 the cotton goods exported from Great Britain to India amounted in value to £3,01,891. Diapers and other cotton fabrics are however still produced at Dacca, once noted for its muslins; chintzes and a variety of other woven goods, at Calcutta and Burdwan. The silks of Amritsar Lahore, Multan and other towns in the Punjab, and of Moorshedabad, in Bengal are of old celebrity. The shawls made from the west of the Tibet goat by the Hindoo population of Cashmere, the leather, skins, paper and lacquered wares of the same region; the arms made at Lahore similar goods pottery turbans, Tatia silks &c. fabricated in Sindh the muslins of Cozocola, woollen carpets of Ellore cottons of Tumervally and gold chains and jewellery of Tri chlopony in the Madras territories, deserve especial mention. Ship-building has declined at Calcutta, but it has lately risen to high importance at Rangoon. At Bombay are docks for the construction of vessels of the first class and the Indian mercantile navy contains numerous ships of acknowledged excellence. (For further notices of manufactures, see HIS BOOKS.)

Roads and Communications.—The inland trade of India is greatly impeded by the want of internal communication. The grand trunk road from Calcutta to Benares and Delhi, on the latter portion of which the bridges over the rivers have only been recently made; a good road from Patna to Allahabad; Bombay to Ahmednagar; others from Bombay to Ahmednagar into Candlish through the Coonah barrow, on the Malabar coast, and for a part of the way and to Jubbulpore in Central India one from Mirzapoor on the Ganges to Jubbulpore and Nagpore and one from Masulipatam to Hyderabad, constituted the only lines of route, worthy of special notice as having been constructed before 1850 when several good and extensive roads were made in the Punjab between Lahore, Patankota, and Multan, &c. and one was begun between Lahore and Peshawar. Excepting the foregoing all of which have been formed slowly within the last century few public ways exist that are better than mere tracks, along which mules can be drawn or oxen driven. Pack-bullocks of small size, carrying a load of about 240 lbs. are used for the conveyance of many kinds of goods or mules for the same purpose, toward the W frontiers and in the Himalaya, goats and sheep. Elsewhere, most of the merchandise is conveyed on the backs of *briffin* or a caste of Hindoos whose business is that of carriers. The impediment to prosperity on account of the absence of roads, will be made strikingly apparent by the fact that, in 1824 while grain in Candlish was plentiful enough to be sold at from 8s to 9s a quarter in Arrangabad not 100 m. distant, it was 84s. and at Poona, perhaps 150 m. further from 84s. to 70s. a quarter and yet, for the want of routes on which to convey it, no attempt could be made to equalize the price of corn in these localities. It is stated that

during the ten years from 1838 to 1848 the sum of £1 440 400 was spent by the E. India Company in the formation of roads, buildings bridges, tanks and canals in India, exclusive of repairs. The railways projected or in progress in all the three presidencies, when completed, will remove many of the difficulties as to roads complained of and tend greatly to the development of the great natural riches of India.

One of the most magnificent and the most useful of the works ever undertaken by the British Government in India, is the Ganges canal, now in progress of execution in the Doab between the Ganges and Jumna. It commences at Hurdwar and is to extend for a distance of 180 m. to near Anghar, where it will diverge into two channels, one 170 m. in length running to the Ganges at Cawnpore and the other 168 m. in length, to the Jumna, near Humeerpoor 40 m. W by A. Futehpore. Branches, with an aggregate extent of 260 m. will proceed to Farielgaur and Aul the total length being 765 m. This canal, which will be navigable throughout, is intended also to irrigate tract of 8400 sq. m. and it is estimated that the increase of land revenue in the country through which it is carried will be £350 000 per annum and, in addition, that about £160 000 will be annually derived from it by the sale of water. Very extensive masonry works are requisite for the Ganges canal. A considerable portion of the undertaking is already completed and of somewhat more than £1 500 000 which it is estimated will be the total cost, £284 000 had been spent on its construction at the close of 1850. A large canal estimated to cost half a million sterling has been commenced in the Punjab. Both the Ganges and the Indus are now navigated by steam-vessels the former river by strong and very buoyant iron boats.

Armed Force.—The following Table exhibits the strength of the military forces in British India in 1845—

	Bengal & Agra	Madras	Bombay
Company's Troops			
European officers	1 6 8	1 028	181
European non commissioned and ran and file	5,309	5,064	9,223
	6,96	4,797	9,404
Native Troops			
Cavalry	4,728	3,809	1,450
Foot-guard	433		
Artillery	4 383	1,618	829
Engineers, &c.	1,289	703	274
Wall & Infantry	53,411	55,773	28,591
Khal-i-Gharib regiment	999		
Irregular Cavalry	4 954		9 473
Local Infantry	15,891	Irregular Infantry	4,578
Be. & Madras Legions	5,008	Seeds Gun Corps	1,463
Military Police	17 144		
Total of Co's Troops	128,894	61 728	41,008

The total forces of the E. India Company amounted therefore to 13 715 European and 235 684 native troops, in all 249 399 officers, and rank and file. In addition there were in 1845 953 officers, and 97 149 rank and file belonging to her Majesty's service. In the Punjab there were maintained in 1850 four local regiments of infantry and one corps of cavalry raised in that territory besides a large police force. The Punjab military force consists, besides border corps, of five corps of infantry five of cavalry and three batteries of artillery. In the Punjab cavalry Rikhs predominate in the Infantry Mahomedans. In the rest of the territory of British India, more than half of the native army consists of Hindoos in Bengal they compose 88 per cent. of the Sepoy troops, and are mostly of the higher castes. In the Bombay army six eighths are Hindoos, but chiefly Sudras, or of the lower castes in the Madras territories, the Mahomedans are more numerous amongst the armed force than elsewhere in the cavalry there are from six to seven in proportion to one Hindoo, and in the infantry about two to three or four Hindoos.

The Indian navy consisted in 1848 of 89 steam vessels, of an aggregate of 5044 horse-power and burden of 18,560 tons; of which 11 aggregate 1000 horse-power 4405 tons burden belonged to Bengal; one of 160 horse-power and 411 tons burden, belonged to Madras and 27 of 3684 horse-power and a total of 18 844 tons burden, were attached to the presidency of Bombay, which was also the station of 14 sailing vessels, aggregate burden, 2826 tons.

Revenue.—The land revenue is collected, in the first instance, by the village collectors, who are appointed from them it is sent to the provincial native treasurers, who are bound in heavy securities to the Government, and act directly under the European collector of the district or collectorate. In addition to the land tax, the receipts are derived from the sales of opium salt, and tobacco and, in the Bombay territories, opium passes, and dock dues must, stamp and excise duties post-office collection, mace and alackary or mace and other licences, marine and pilotage receipts, subsidies and tribute from the protected states, &c. The Indian revenue has for some years presented a deficiency as compared with the expenditure, in consequence of expensive wars. The following is

A TABLE OF THE REVENUE AND CHARGES OF THE SEVERAL TERRITORIES OF BRITISH INDIA in the Year 1845-6, the Columns including those INCREASED IN ENGLAND —

Presidencies.	Total Revenue, 1845-6	Total Charges, 1845-6
Bengal.	On Rs. 1,235	On Rs. 1,235
Assam.	4,39,84,150	1,01,44,470
Madras.	3,21,17,100	2,43,82,913
Bombay.	3,66,09, 34	3,15,08,216
	9,44,76,084	1,80,00,887
	or £18,37,350	or £18,00,887
Charges in England.		£101,408
Total.	£18,37,350	£19,02,295

The total public debt of the E. India Company amounted, in 1849 to £44,204,080 and the annual interest to £2,101,379.

History.—Following in the wake of the Portuguese and the Dutch, who had already established commercial settlements in India the English, at the end of the sixteenth century determined to advance into the E. seas and accordingly in 1600 during the reign of Elizabeth in England, and of Akbar on the royal throne of Hindustan a company was formed for this purpose in London, which in the next year was enlarged to 215 shareholders headed by George Earl of Cumberland. This association, the nucleus of the present E. India Company had at the origin, a capital of £70,000 its affairs were under the direction of a committee of 17 directors the number of whom was afterwards increased to 24. In the face of numerous obstacles thrown in their way by the Portuguese, the ships of the Company traded at Surat and there places on the W coast of India and with such success that after eight merchant squadrons having been sent to India in the space of twelve years the company had derived an average profit of not less than 17 per cent. on their capital. In 1612 a joint-stock capital of £229,000 was subscribed by the Company who early in the succeeding year obtained leave from the Mogul emperor to erect factories at Surat, Ahmedabad, Cambay and Gogo. Violent hostilities with the Portuguese and the Dutch subsequently took place, but without much regarding the commercial prospects of the English who, about 1625, established factories at Masulipatam and Aracanag, near Nellore and in 1634 were allowed by the emperor Shah-Jehan to trade at Piprey in Bengal which fixes that date as the period when their ships were first permitted to enter the Ganges. In 1639 our countrymen secured from a local rajah the cession of a strip of land, about 5 m. in length, on the Coromandel coast, where Madras now stands, and where Fort St. George was forthwith erected thus, accordingly being the first territorial acquisition of the British on the Indian mainland.

In 1645 through the influence of Mr Broughton, a surgeon who had successfully exerted his professional skill on some members of the imperial family at Agra, permission was secured to erect factories at Malabar and Hooghly in Bengal to which, as well as to the English establishments at Surat, valuable privileges were, at his instigation granted. In 1664 the island of Bombay was ceded by Portugal to Charles II of England as a part of the dowry of his queen in 1683 this island was made over in perpetuity to the Company which was now considerably augmented by the addition to it of other acquisitions, and in 1687 Bombay became the capital of the British settlements in the E. Indies and by this time been established in various parts of Bengal, Malabar and

India and an expedition was even sent out ostensibly for the purpose of redressing certain injuries but destined in reality for a service of no less magnitude than that of laying war against the powerful emperor Aurangzeb and the subadar of Bengal. In 1689 as Mr Hill observes, it was laid down as a determinate object of policy (by the Company) that independence was to be established in India, and dominion acquired. At that date they wrote to their agents the increase of our revenue is the subject of our care as much as our trade. In 1700 the Company had obtained, from the subadar of Bengal the grant of a small sanad or the Hooghly comprising the towns of Calcutta, Govindpur and Chittanagore but it was not until 1713 that Mr Hamilton, an English surgeon who had successfully operated on the emperor Ferokhsereh—trading in the steps of Mr Broughton—procured from the emperor the confirmation of the grant, and thus established in the possession of his countrymen the locality whence extended the dominion forming the third and principal of the three great presidencies into which, until our day British India has remained divided.

The French had already begun possessed of settlements on the Coromandel coast, and territory in the Carnatic, and on the breaking out of the war between them and the English in 1745 India was made a theatre for their hostilities. In these, several native powers soon became involved but, after various success on the part of the belligerents, the French by 1763 were completely worsted by the superior resources and strength of their antagonists. From the period of the war declared against the French in 1756, the ascendancy of the English in India proceeded with rapid strides. The battle of Plassey in 1757 in which a few forces under Clive routed a Mogul army of 18,000 cavalry and 50,000 infantry opened Bengal to the British the district of the twenty four pergunnahs was acquired in the same year and Burdwan, Midnapur and Chittagong in 1760. In 1765 the collection of the revenues of Berar Bahar and Orissa was yielded by the emperor to the Company the Carnatic was acquired in the following year and the subsidiary of Mysore in 1765. In the last named year a war broke out between the British and Hyder Ali who had seated himself on the throne of Mysore and it was continued by his successor Tipoo, with short intervals, down to the death of the latter and the capture of Seringapatam in 1799 since that period nearly all the territory comprising the sovereignty of Tipoo, except the tableland of Mysore, has passed under the direct rule of the E. India Company and been annexed to the presidency of Madras.

The events which determined the progress of British ascendancy in India were now transferred from the E. and B. to the central and W parts of the same region. The war with the Marhatta powers—Battara, Berr, Sonda, Holkar &c.—occupied the early years of the present century and was ably conducted under the administration of the Marquis Wellesley as governor-general. Amongst the remarkable occurrences during this period were the battles of Assaye and Argaum, which distinguished the early military career of the Duke of Wellington and evinced the genius of that great commander the victories of Delhi, Lajpore, Deeg and Fatehgarh gained by Lord Lake and the transference of the Mogul emperor from the throne in which he had been held by the Marhattas, to the protection of the British. Amongst the expeditions made by the latter during this interval were Gwalior &c. from Oude, and the lower Doab, between the Ganges and Jumna, in 1801 other districts in Bundelkand in 1802 Cutch district and the upper Doab, with other portions of the Delhi territory in 1803; and in 1805, districts of Gujerat, previously belonging to the Guj-cowar.

A war soon afterwards ensued against the Pindarres, a host of roving and predatory warriors, who, during the disquiet which they caused formed alliances with several of the Marhatta powers also in a war against the Gorkhas of Nepal, who had made irruptions into the N. British provinces. The forces of Malhar reserved a severe defeat for the troops under Sir F. Hildes, at Mahidpur in 1817 but the Pindarres were could not be said to have ended until the fall of Asseerghur before the British arms in 1819. Bhutpur which had on former occasions resisted five successive attacks by our troops, was finally taken by assault in January 1836 since which epoch few military operations of much magnitude have

taken place in India E. of the plains of the Satlej and Indus. During the period thus indicated the accessions to the British territory comprised Mukom, taken from Nepal in 1815 the Sangur districts, Darwar, Ahmedabad, &c. acquired in 1817; Candahar, Ajmer, Poonah, the Cocones the S. Malabar country and some districts on the Korbudda in 1818 and several others incorporated into the Bombay presidency in 1820 and 1822.

The extension of the British away west took place chiefly in the peninsula of India beyond the Ganges. In 1824, on consequence of aggressions on our E. frontier war was declared against the Burmese, who after several defeats in the centre of their territories in 1826 ceded to the British Assam, Arakan, and the Tenasserim provinces—then added to the Bengal presidency. Rangoon and Malacca became by purchase British possessions in 1824-5. Coorg in S. India and Loodmah, with adjacent districts on the South were acquired in 1824. Kurnool in 1826, and Jolun in 1841.

Political intrigues in central Asia, having a tendency to produce dangerous hostility with our Indian dominions, caused the interference of the British in the affairs of Afghanistan and to that country a formidable army was sent from India in 1839 by means of which the deposed sovereign was replaced on the throne of Cabool. In 1841 these treacherous slaughters of British officers and troops took place at Cabool and elsewhere, which interrupted the most alarming check that the British power had ever experienced in the E., but in 1842 another army was sent beyond the Indus which speedily restored there the prestige belonging to the British name. In consequence of events which we can afford space to detail, a British force entered Seindia in 1843 and after Sir C. Napier's victory over the Amers at Masees, that country submitted and it has since formed an integral part of British India.

In the same year disagreements between the present and some of the reigning family at Gwalior in the centre of Hindostan precipitated hostilities in that quarter which speedily terminated in the triumph of the British arms at the battles of Maharajpore and Purnaur and although these events were not followed by any direct territorial acquisition on our part a number of districts were afterwards segregated for the maintenance of a British force in Seindia's dominion. Finally the British had to combat the most formidable enemy they had ever yet encountered on Indian soil. Towards the end of 1845, an unprovoked invasion of the Sikhs across the Satlej into the territories protected by the Company compelled all disposable forces in India to move to the N. W. and at the end of that year and beginning of the next the Sikhs were successively defeated in the actions of Moodkee, Ferozshah Atwal and Sobroon. In 1846, war was resumed by the Sikhs and Afghans united and the scene of hostilities removed to the neighbourhood of Multan but after the battles of Chillianwalla and Gujraet—the last a most decisive action, fought February 21 1849—this combination was wholly broken up and the Punjab was annexed to the British dominions. Seindia, formerly the territory of the Malabar Peshwa, was added to the Bombay presidency in 1849 and Sambhalpore a Gujwara rajahship of 8000 sq. m. has more recently lapsed to the British, from want of heirs to the last rajah. The chief events of a political nature which have still more lately occurred in India, are disturbances in the territory of the Ahoms, which, probably at no very distant period, will be absorbed into the wide-extended sovereignty immediately under British authority since the war commenced with Burmah in the early part of the present year (1850).

Solved are the dates of the accession in office of the various governors-general of India since the battle of Plassey in 1757.

MDLII. Hist. of British India. Tyrnopol's Bengal and Agra Gazetteer 1841, &c., M'Gregor's Report on British India.

1848 Stocqueler's Handbook for India. Board of Trade Report, 1849. Papers on Imports and Exports, 1849. Reports on Sugar and Coffee Planting and on the Growth of Cotton in India. Report of the Indian Law Commissioners, 1847. Report on Industry in India, 1849. E. India Revenue Report, 1848-49. Acts of the Government of India. Colonial Review, 1850-51.

INDIAN ARCHIPELAGO, EASTERN OR MALAY ARCHIPELAGO, the greatest group of islands on the globe whether considered with respect to their number or extent situated to the S. E. of Asia, and washed W. by the Indian and E. by the Pacific Ocean. From the N. W. extremity of Sumatra—lat. S. 84 N. lon. 95 20' E. to the Aru Islands lat. S. 6 lon. 134 30' E.—a chain of islands about thirty in number separated in general only by very narrow straits extends through nearly 45° of longitude, or about 2600 m. The greater part of this chain lies between the 7th and 8th parallels of S. lat. but, at one point—Rott's island, adjoining Timor—it touches the 11th parallel. This is the S. boundary of the Archipelago. Its E. limit has less completeness and linear precision. At a short distance N. and E. from the Aru Islands, lies the great island of Papua or New Guinea, the W. peninsula of which is by some considered as belonging to the Indian Archipelago. From 300 m. to 500 m. N. W. are the Moluccas or Spice Islands in the widest sense and N. by W. from these again are the Philippines Islands; the largest of which group, Luzon, reaches the 17th parallel of N. lat. Thus the Aru I. pelago has an extreme length of 45° and a breadth of 38°. With exception of the Philippines which still belong to Spain the islands of Penang Singapore Labuan, and the settlement of Sarawak, on the W. coast of Borneo which belong to Great Britain and the N. and N. W. portion of the island of Borneo the Sooloo and some other islands under native potentates the whole of this archipelago is, either really or nominally under the sway of Holland this last part is in frequently named the Dutch East Indies. The Archipelago has an extreme length of 45° and a breadth of 38°. With exception of the Philippines which still belong to Spain the islands of Penang Singapore Labuan, and the settlement of Sarawak, on the W. coast of Borneo which belong to Great Britain and the N. and N. W. portion of the island of Borneo the Sooloo and some other islands under native potentates the whole of this archipelago is, either really or nominally under the sway of Holland this last part is in frequently named the Dutch East Indies.

Chief islands.—Within the limits here pointed out, lie some of the largest and finest islands in the world as Borneo Sumatra above 1000 m. in length Java Celebes Luzon, &c. Some include in the Aru pelago not only New Guinea, or at least its E. W. peninsula but also the peninsula of Malacca. The fertile and cultivated islands of less size on the coasts of Sumatra and Java or extending E. to the Spice Islands in clumby are as follows—Nias Mantawa, Foggy Billiton, Rote, Madoa, Bali, Lombok, Sumbawa, Comodo, Sunda, wood Island Flores or Mangarai Timor Ceram Boeroo Gilolo Mindanao, Ialawan Negros, Samar Mindoro Panay Leyte and Zebu. The small islands may be truly called innumerable, for there are numerous groups throughout the Archipelago, consisting each of hundreds of islands; many of them celebrated by the natives for their beauty and fertility which have never been surveyed and are even madly avoided by European navigators who dread not only the hidden danger of coral banks and shoals but also the practical habits of those who dwell upon them.

Geological Consideration.—The islands which in close array form the S. line of the Archipelago, are all mountainous, and the chief summits are volcanic. Many of them, indeed are still active volcanoes. It would appear then as if the very long and narrow ridge of land had been raised from the ocean by the agency of subterranean fires. The line of volcanic action may be traced on the W. side, through Sumatra to Chittagong, in the Bay of Bengal. On the E. side it reaches the meridian of 120° E. nearly under which are the little volcanic islands of Nila and Yoro, in the sea of Banda. It then inclines N. W. The little islands lying on the W. of Gilolo are all volcanic. Ternate was laid waste in 1840 by volcanic eruption and earthquakes. Thence the volcanic line may be traced through the Philippines and Japan to Kamoteika.

Enclosed Seas.—The islands are arranged in chains or in groups, leaving a number of open spaces or seas often difficult of access but the navigation of which is favoured by constant winds and a general exemption from tempests. These seas, within the Archipelago, are, chiefly the China sea, between Borneo and the Malay peninsula the Java sea between Java and Borneo the sea of Celebes, between this island Borneo Mindanao and the Sooloo Archipelago. N. W. of it is a last-named barrier, between Borneo, the middle islands of the

Philippine group, and Palawan, in the Soolowee. S. of Celebes is the archipelago of Flores, and further E. the Banda Sea, S. of the Moluccas. The straits of Macassar between Borneo and Celebes, the Molucca passage, Pitt's passage, and the Gilolo passage, may be added to the list of narrow seas. The last-named passage and Dampier's Strait, by the coast of New Guinea, are the principal entrances to the Indian Archipelago from the E. while the straits of Malacca and of Runda give access from the W. and the straits of Lombok, Alas, Umbak, and from the S.

Climate.—The whole Archipelago lies within the tropics, and indeed, for the most part, close to the equator which passes through the middle of Sumatra and of Borneo, over Celebes and Gilolo. If New Guinea be included in the Archipelago, the latter will then present to view the most widely extended, from W. to E. of all the equatorial regions of the earth. The general equality of climate throughout is attended with a certain uniformity of production and similarity of manners in the people. But close examination detects wide differences in the natural constitution and climate of the islands, and, as civilization has advanced upon them from the W., and has reached greater maturity in that quarter, there are still ample grounds for distinguishing the whole into groups. This whole oceanic and equatorial region is excepted from the general law of the trade winds, which, on the N. and S. sides of the line respectively blow constantly from the N.E. and S.E. Within the Indian Archipelago and thence W. to the coast of Africa, the monsoons—that is, season winds—prevail blowing alternately from the S.E. and N.W. But the monsoons being so exceptional a general law very much from place to place though locally regular and constant, and E. of Celebes or of the meridian of 124° the monsoons are reversed or the rains fall during the dry season of the W. islands and far less copiously than in the latter. This circumstance, with the absence of the rich soil formed by the disintegration of volcanic rocks, makes a broad distinction between the E. and W. islands in respect of fertility. The N. Philippine islands alone fall within the region of hurricanes and tempestuous winds. But the general law of smooth seas and constant breezes, which prevails farther E. is not strictly invariable. The Moluccas have not yet quite recovered from the ravages done by the hurricanes of 1776 and of 1816.

Crops.—The 31 islands of the Archipelago, founded on natural characters, production, and population, are as follows:—The first division embraces the Malayan peninsula, Sumatra, Java, Bali, Lombok, and about two-thirds of the W. part of Borneo to the meridian of 116°. So far there is a general uniformity of animal and vegetable productions: the soil is extremely fertile: rice is the general food of the people, who have made a considerable advance in the arts and habits of civil life. The second division, comprehending Celebes, Sumbawa, and E. Borneo, up to lat. 3° N. is, in soil, food, and civilisation, inferior to the first. Rice is here no longer abundant, and sugar only supplies its place. The third division extends from lon. 124° to 136° E., and between lat. 10° S. and 2° N. Here the monsoons or seasons are altered, and nature takes a new aspect. The rich vegetation of the W. islands is seen only on the sea-shore, the hills are comparatively bare and arid. But this is the region in which alone the clove and nutmeg attain perfection. Yet the soil is not fertile, rice is rare and the staple food is the dryum in sugar. The inhabitants of the division are much inferior to those farther W. and have never acquired the use of letters. The fourth is less distinctly marked out than the preceding. It lies between the parallels of 4° and 10° N. from lon. 116° to 138° E., embracing the N. angle of Borneo the Soolowee Islands and Mindanao. The inhabitants are superior to those of the third division. Rice is their chief food, but sugar also is much used. The clove and nutmeg are here indigenous, but inferior in quality to those growing farther W. The fifth division is that of the Philippine islands, from lat. 10° to 18° N. Here humid climate and volcanic soil render rice and with few exceptions fertility. Rice again becomes abundant. Sugar and tobacco are produced, but the pepper of the first division the fine species of the third, and some of the fruits of the islands near the equator are wanting.

Vegetation.—The vegetable productions of so wide and so fertile a region can, within our limits, be adverted to only in the most summary manner. In the woods of Sumatra and

Java, most of the trees exceed 100 ft. in height. But the density of the vegetation is still far less extensive than the vigour of individual plants. In the struggle for room and air plants of different kinds become piled one over the other. Teak, mango, fig, ramin, sandal ebony and other great trees are mingled with palms of endless variety and gigantic forms while climbing plants, frequently cæces, interwoven from tree to tree, bind the whole together and render the forest utterly impenetrable. The tendency to climb characterizes the vegetation of the Archipelago. Stems a foot or more in diameter and belonging to species which elsewhere grow without support, here twist themselves round the giants of the forest. Several of the climbing cæces also take root, like the mosses, so often as they touch the ground with their boughs. The raffia, the largest flower known, being nearly 3 ft. in diameter is a parasitic production, peculiar to these rank forests. The inexhaustible supply of great timber afforded by these woods is to the natives of far less importance than the coco-nut, the bamboo and numerous slender palms which adorn the coasts.

Cultivated Produce.—The chief object of cultivation in the Archipelago is rice, of which there are crops in the year are obtained in lands perfectly suited for that culture. Rains though more prolific, holds there the same relation to rice which barley bears to wheat among us. The green crops sown after the rice harvest are varieties of pulses, one of which called *Acokong* or green pulse, deserves mention, being cultivated by the Chinese colonists for the manufacture of soy. Yams and batatas are also reared in some places, but the manioc, which grows wild is neglected owing to the abundance of food obtainable with little trouble. In general the objects of cultivation—rice, manioc, &c.—are each known by one name throughout the Archipelago while the indigenous and wild productions change their names with the localities. The coco-nut is among the cultivated plants. It is grown chiefly for the sake of its oil but the finest edible oil is obtained from the nut of the lendar: a handsome tree, which flourishes within the same limits as the sago. Castor-oil is the lamp oil of the Archipelago. The sago palm (*Cycas*) is one of the humblest of the palm tribe rarely exceeding 20 ft. in height, but it attains a diameter of nearly 2 ft. Before the tree has attained its full growth and the fruit has formed the stem consists of a hard shell about 3 in. thick, containing an enormous mass of soft medullary matter which when macerated in water yields the farinaceous deposit called sago. As the fruit ripens, the internal pulp or medullary matter disappears. This palm chooses marshy situations. It seems to be co-extensive with the clove and nutmeg but is most perfect in the island of Ceram. The sago-palm is of all alimentary productions that which yields food in the greatest abundance. The gumiut, another short and thick palm, peculiar to this region, also yields a medullary matter like sago but it is more valued for its toddy palm-wine or sap, of which it will sometimes give off three quarts a day for two years. All the sugar used by the indigenous population is made from the mashed juncos of the gumiut, which furnishes also a very valuable material 1 lb black horse-hair convertible into excellent cordage. The small tubular *typha* found enveloped in the black filaments serve for pens to the natives who can write, but the majority convert them into arrows for the blow pipe. The areca-nut, betel pepper and gambier or catechu are all peculiar to the Archipelago and supply important articles of trade, required by the materialistic habits of the native population. Europeans set a higher value on the fine species which are confined within very narrow limits. The clove was originally found only on the five Molucca islands chiefly on Macassar, whence it was carried to Ambacca, to which spot its cultivation is now restricted by the Dutch. The nutmeg has wider limits, being found in Ceylon-China, New Guinea, and even in New Holland. The minor aromatic productions of the Archipelago are very numerous.

Zoology.—The animal kingdom in this vast region, varies exceedingly according to locality and features requiring remark, it is the reader must be referred to the special articles on the individual islands. Mammalia are numerous in the W. islands, but few in the E. the types, in the former such as the elephant in Sumatra, the tiger there and in Java, &c., being allied to those of the neighbouring continent of Asia; and in the latter connected more with those of Australia, especially in the possession of marsupials. Birds of the most brilliant

plumage, are numerous everywhere the swallow (*Hirundo asiatica*) builds her edifice nests in the caves and rocks along the coast of almost all the islands, and that remarkable gull-like species the magpie, some thought peculiar to Australia, is found in E. part of the Archipelago. Serpents, dangerous from their strength or from their venomous bite, as well as those that are harmless, abound in the jungle, and sea-serpents of many kinds swarm in the schools, and other seas. The sea insect inhabits some of these islands all of them swarms with stinging pests, that almost render life insupportable, or at all events, add to the exertions of the utmost vigilance, and the greatest ingenuity to avoid or repel their attacks, and the white ant accounts the most fearful ravages on buildings and furniture of every description. The gavel or Ganges crocodile finds a congenial home in the streams of Sumatra, Java, and the other larger islands the dugong (*Halocore Dugong*) a gregarious, herbivorous cetacean frequents the shallows on the coasts (trapping *Holothuria*) is taken in large quantities among the coral reefs and islets and fish, and shell-fish are innumerable.

Inhabitants.—In the absence of a geological knowledge of the extensive region the particulars of its mineral treasures, the gold and diamonds of Sumatra and Borneo the tin of Baitika, the coal and anatomy of Borneo &c. cannot be made to assume any other than a local character and may therefore be here omitted. They suggest however one general observation, that neither gold nor diamonds, nor fine spices, give any impulse to impetuous civilization. These precious commodities abound most in the most barbarous countries of the Archipelago while arts and social improvement emanate from the grain-growing countries, as from the seats of systematic industry. In the Indian Archipelago there are two aboriginal races, a brown or fair complexioned of Malay extraction and a black, Papuan or negro race. The brown race are about 4 in. below the average European stature. They are robust and somewhat clumsy particularly in the lower limbs the face is square, with hollow cheeks and projecting jaws large mouth, small nose, small black eyes and thick hair. Their complexion does not seem to be affected by climate or balneum. The Battaks of Sumatra and the wretched Dyaks of Borneo who are among the lowest live under the equator the Javanese who dwell in the most insular regions are among the darkest. The Papuan or dark-coloured natives are dwarf negroes they rarely attain the height of 5 ft. and have feeble frames the skin is of a sooty black not polished like that of the vigorous African the chin projects so as to form no part of the face the lips are very prominent, the look wild and malignant. These blacks probably once occupied the whole Archipelago but the increase of the brown race has thinned their ranks in the W islands, where they are still however found in the mountains and fastnesses, hunted by the others like wild beasts. They increase in numbers towards the E. and are the sole possessors of New Guinea. Wherever found, they seem to be in the lowest stage of civilization.

Maritime Habits.—In the Indian Archipelago there are no dry pastures, no grasses no open glades. Pastoral life, the ordinary beginning of industry and society is therefore out of the question. But the natives confined by impenetrable forests to the sea-shore, are easily tempted to become navigators by the tranquillity of the waters, by the facility of building boats where wood is so various and plentiful and by the abundance of fish. An unusually large proportion of the whole population has maritime habits. Nor is this all their chief towns are, in many instances built over the water the bamboo houses being constructed on stakes every house with its boat fastened to the door. In towns of this description, as Borneo, Banjarmasin, &c. the inhabitants may be said to live wholly on the water. The facility for construction of this sort, derived from the palm forests and the bamboo, gives rise to another singular and characteristic usage of this brown race. They often shelter an entire village under a single roof, or in other words, even the least civilized tribes of the Dyaks think nothing of constructing a house on piles, 10 or 20 ft. above the ground, large enough to lodge 500 people. The roof, covered with large palm leaves, is proof against the heaviest rain. The side-walls and floors are made of flattened bamboo, covered with matting and, night as the edifice may appear it is for the wants of the people and for the climate, wonderfully perfect. Having advanced thus far it is not

wonderful that the same people should have become skilful boat-builders, and their prahs, often of 60 tons burden, are excellent specimens of naval architecture. Nowhere else in the world is the inconvenience so strongly felt of a numerous population of illiterate men and the prahs is so common and animal a character in the Archipelago as the robber in the Syrian desert.

Peacemaker Exporter.—The exports from the Indian Archipelago are very numerous but it will be here sufficient to mention the products peculiar to that region. Europe takes cloves, mace, and nutmegs, cayenne [*capsicum*], all black pepper camphor and galls [*galla* (petal or gum) percha. China buys at a high price, the edible swallows nests, and the trepang (*Holothuria*) or sea slug. These duties for the table are wholly monopolized by China and the quantities bought, and price paid for them, show the luxury prevailing in that country. Fleets of prahs are fitted out every year in Celebes for the trepang fishery on the coast of New Holland. But mercantile enterprise of this sort is confined to the principal means to others the accumulation of wealth would be a dangerous experiment. The only forms of government known to the brown or Malay population are an elective confederation as in Celebes or an unlimited despotism as in Java—(Crawford's *Hist. of the East Archip.* 1820. Records van Eyningen, *Handboek, des—Geographisch Nieuws of the Dutch E. Indian Colonies—Moniteur des Indes Néerlandes Journal of the Indian Archipelago Singapore).*

INDIAN KEY a small id U States Florida, "5 m S W Cape Florida, much resorted to by its abds from the for its healthy and agreeable climate

INDIAN OCEAN that part of the general ocean which lies S of Africa and Asia, and is bounded E. and W. by the Pacific and Atlantic Oceans, and S. by the Antarctic circle. More particularly its boundaries are the Antarctic circle on the S an imaginary line drawn from Cape Agulhas the most S point of Africa, to the Antarctic circle, separating it from the S Atlantic, on the W the E coast of Africa the coast of Arabia, Baluchistan, Hindoostan or India the W coast of Burmah Lower Sumatra the Malay peninsula the W and S. coasts of the islands Sumatra Java, Australia and the Diemen a line, drawn from the most S point of which last continent to the Antarctic circle, separating it from the S. Pacific on the E; thus extending from about lat. 55° N in the Gulf of Arabia, a little beyond the tropic of Cancer to the Antarctic circle and from lon. 19° 50' 30" E to 146° 38' E its extent, from N to S, somewhat exceeds 5500 m and its breadth varies from 6000 m between the Cape of Good Hope and South Cape in Van Diemen's Land to 4000 m between the coast of Arabia and that of Malacca and Sumatra. It is usually divided also into two parts—the N or Equatorial Ocean extending S as far as the tropic of Cancer, and the S or Austral section stretching S, of that limit to the Antarctic circle. Its N shores are rendered singularly irregular by the projection of three vast peninsulas—Arabia Hindoostan, and India-beyond-the-Ganges—which are respectively separated by the Persian Gulf, Arabian Sea, and Bay of Bengal besides which may be mentioned, as other leading features on its land-boundary the Mozambique Channel Red Sea, Gulf of Cutch and Cambay which form the peninsulas of Gujarat the Gulf of Maccassar and Palk's Straits, Straits of Malacca, Sunda Strait, Lombok Flores, and Ombay the sea of Thaur and Bani's Strait. It comprises also the following islands—Madagascar and Ceylon Socotra, the Laccadive and Maldivé islands, in the Arabian Sea the Andaman and Nicobar islands, in the Bay of Bengal together with the Comoro islands, Mauritius Bourbon Kangaroo Land and numerous other smaller islands. The following leading rivers, likewise, are tributary to this great ocean basin—the Nile, Euphrates and Tigris, the Indus Narbada, Krishna, Godavari, Ganges, Brahmaputra, Aracan Irrawady Salween and Suvarneya; the last four of which are in India-beyond-the-Ganges.

In the S. part of this ocean the equatorial current, connecting the Pacific and Atlantic, flows from E. to W. at a rate varying with the seasons but N of Madagascar where its breadth greatly diminishes, it runs from 45 m to 60 m, in 24 hours. A S.W. current also flows along the African coast, towards the Mozambique Channel, its mean velocity ranging between 18 m and 26 m a day but attaining more than double that rate near Delagoa Bay and Cape Corrientes.

It finally joins the Cape current near Cape Padron. In the Bay of Bengal the currents depend wholly on the monsoons; a N current flowing pretty rapidly along the Coromandel coast during the N.W. monsoon from February to May and then weakly till the middle of October. Between Cochin and the Nicobar islands, and onward to the Straits of Malacca, it often flows to the S.W. while in the N part of the bay it runs N in March, and often N in April when a general N.E. movement occurs over its entire surface, and continues till October. On the S.W. coast of Australia, the current divides near Cape Leeuwin, in lat. 34° 32' S. into two streams, one of which flows N., and the other E. with an average speed of about 20 m. each day thus embracing the whole coast of Australia.

Winds, Monsoons, &c.—The S.E. trade-wind, which prevails between the 10th and 23rd parallels of S. latitude, blows with much force, and pretty constantly from April to October after which date its N limits are considerably contracted. S. of these are the constant N.W. winds, which prevail almost in the same latitudes as in the Atlantic and Pacific Oceans. The monsoons are found principally in the N part of this ocean, over a tract extending from the southeast of Asia to about lat. 8° S. and from the Mozambique Channel, on the W., to the shores of Australia and the Sea of China, on the E. They blow uniformly in the same direction for six months, changing about the equinoxes. N. of the equator the N.E. monsoon prevails from October to April the N.W. from April to October, while, S. of that limit, the N.W. monsoon blows while the N.E. is blowing on the N. side and the S.E. prevails during the time of the S.W. monsoon N. of the equator. During the hot season, likewise when the S.E. trade-wind recedes S. the N.W. monsoon occupies the space between the equator and the 12th S. parallel. The *Advances* of this ocean usually range between lat. 9° to 35° S., extending from Madagascar to the island of Timor. It is usually come from the N.E. near Java, and travel S.W. and E. returning again E. In the Bay of Bengal streams travel from E. N.E. to W. N.W. The season for them, S. of the equator is from December to April, but at other times they are rare, and almost unknown. Their rate of travelling varies from 10 m. to 36 m. per hour the celebrated Rodriguez hurricane (April 1842), was computed to blow with a velocity of about 200 m. a day extending over 600 m. at a time, and accompanied by incessant and exceedingly heavy rains. The maximum heat, of the water in the Indian Ocean occurs in the Arabian Sea, in lat. 9° 33' N. and lon. 56° 28' E. where it reaches 87° 40' Fah.—*Johnson's Physical Atlas*

INDIA or WESTERN TERRITORY a tract of country W. of the settled portions of the U. States of N. America, allotted, by the U. States Government, for the residence of the Indian tribes that have been removed chiefly from the R.W. states of the Union. It is bounded N. by the Arkansas and S. Kansas rivers, E. by Missouri and Arkansas, S. by Red River which divides it from Texas, and W. by a desert lat. 33° 30' to 39° 18' N. lon. 94° 15' to 100° 37' W. area of habitable portion, about 130,000 sq. m. This territory, for about 100 m. in its E. side, is in general fertile and capable of yielding all the productions of the U. States under the same latitude and the prairie grounds, of which the greater portion consists produce abundance of grass for the feeding of cattle. In the N. parts the winters are cold but the climate is generally healthy. The tribes among which this territory has been apportioned, are all more or less in advance of the wild Indians of the prairies and several of them especially the Chickasaws, have made very considerable progress in the arts of civilized life. The total number of Indians transferred, or to be transferred to this territory, is estimated at 243,000.

INDIANA one of the Western U. States bounded N. by Michigan lake and state, E. by Ohio, E. and S. by the Ohio river separating it from Kentucky and W. by Illinois between lat. 37° 45' and 41° 46' N. lon. 84° 45' and 89° W. Mean length, 360 m.; mean breadth 140 m.; area, 36,000 sq. m. It belongs wholly to the basin of the Ohio excepting a narrow strip on the shores of Lake Michigan, backed by lofty bare and hills, and is almost one continued plain with an inclination S.W. A range however, of low hills, considerably 500 ft. above the level of the Ohio, lies parallel to that river from the mouth of the great Miami to the Elise river, sometimes

approaching close to it, and sometimes reaching 2 m. or 3 m. from it. These hills are followed by an extensive heavily-wooded plain. The state is well watered by several streams, of which the Wabash, flowing circuitously N.E. to S.W. dividing the state into two unequal parts, a N. and a S. and, in the latter part of its course, forming the frontier line towards Illinois, is the most important. It has several affluents, and in part of its course separates into two forks, an E. and a W. It is navigable for steam boats to La Fayette 300 m. and its principal affluent, the White river is navigable to Indianapolis, the capital of the state, and situated near the centre. A canal from La Fayette E.N.E. unites the Wabash with Lake Erie, at Toledo in Ohio, and S.W. with the river Ohio at Evansville. All the principal streams, except the Ohio, are bordered by strips of bottom or prairie land from 3 m. to 8 m. broad, but, at a distance from the rivers, the surface of the country is broken, and the soil light. N. of the Wabash the ground is for the most part level prairie-land interspersed with lakes, woodlands, and swamps—these parts near the Wabash being remarkably fertile. Except in the neighbourhood of swamps, the climate is agreeable and healthful. Oak, ash, hickory, hickory, walnut, cherry, maple, elm, sassafras, hickory, honey locust, cotton wood, sycamore, and mulberry form the natural growth of timber wheat, rye, Indian corn, oats, buckwheat, barley and potatoes, yield an abundant return, and cattle, swine, and dairy produce are plentiful. At Vevay on the Ohio, are the best vineyards in the U. States they are planted with indigenous vines, and are under the management of Swiss settlers. Though the mineral products have not yet been worked to any extent iron, copper, coal and salt are found and in a cave near Corydon nitre gypsum and Epsom salts—the last in lumps from 1 lb. to 2 lbs. weight. Woollens and cottons are made to some extent there are several iron furnaces and forges, paper and tanning mills and manufacture of tobacco, hats, leather soap, &c. but still neither the manufactures nor the commerce and trade of the state are of great account. The Baptists are the most numerous religious body in the state next to them is Presbyterians and Methodists besides which there are some Episcopals, R. Catholics Friends, &c. Education is provided for by 4 colleges, 54 academies, and 1291 common and primary schools still in 1841 there were 83,100 whites above twenty years of age who could neither read nor write. The state is divided into 91 counties, and besides Indianapolis, the cap. from which several railways diverge, some of them connecting with the Kentucky line, has New Albany the largest town in Indiana, and several smaller towns, as La Fayette, Madison, Evansville, Terre-Haute &c. The executive government is in the hands of a governor and lieutenant governor elected by the people for three years. The legislative power is vested in senators and representatives chosen by the males above twenty-one years of age one-third of the former and the whole of the latter being elected annually. The senators cannot be fewer than three, and never more than a half the number of the representatives who, again can never number less than 35, nor more than 109. Indiana was admitted into the Union in 1816. Pop. (1840) 685,566 (1850) 990,258.

INDIANA also U. States Pennsylvania 125 m. W. N. W. Harrisburg with a courthouse, a jail four churches, and two schools a brewery and a pottery. Pop. 674

INDIANAPOLIS a town U. States, cap. Indiana, near the centre of the state, 1 Black White River here crossed by a bridge, and navigable for steamers. It has a state-house, a fine building, after the model of the Parthenon at Athens several Baptist and other churches a female academy seem very a school and a saw mill. Pop. (1850) 8034

INDLE, a vil. Austria, Bohemia, 60 myriads, about 4 m. from Budaka with a Greek parish church. Pop. 9130

INDIES (Dutch East) a name given to the Dutch possessions in the Indian Archipelago (which see)

INDIES (East) a general collective name applied to Hindoostan, India-beyond-the-Ganges, and the Indian Archipelago.

INDIES (West) ANTILLES, or COLONNIALES ANTILLANAS (Latin, Antilles, Carriacoua French, Antilles occidentales French des Antilles Spanish, Antillas German, Antillen West Indies; Dutch, West-Indien, Antillen an extensive system of islands in the W. Atlantic, stretching from the N.W. of Cape

Florida in N. America, to the Gulf of Paria, on the N. coast of S. America, comprised between lat. 10° and 17° 30' N; and lon. 59° W and the coast of Central America, and forming the N. and E. boundary of the Caribbean Sea. The most of them are comprised in three distinct groups, called respectively the *Lesser Antilles* or *Caribbean Islands*, the *Greater Antilles*, and the *Bahama* or *Lucay Islands*. The islands that compose the first-named division form the most southerly of these groups; they are disposed in the form of a crescent, with the convex side facing the E., and are divided into the *Windward* or *S. Caribbean Islands* and the *Leeward*, or *N. Caribbean Islands* the latter terminating with the *Virgin Islands*. The *Greater Antilles* comprise the four largest and finest islands

in the Archipelago—*Porto Rico*, *Hayti* or *San Domingo*, *Jamaica*, and *Cuba*, with the small islands along their coasts. The *Bahama Islands* form the most N. portion of the system, of which they are also the most numerous, but the least valuable and interesting. Besides the three great groups named, there are several small islands situated along the coast of S. and of Central America. The surface of all the archipelago does not exceed 95,000 sq. m. and of this area the *Greater Antilles* occupy nearly 83,000 sq. m. In the following table is given a list of the principal islands, arranged in the groups to which they respectively belong: the area and population are also shown, and the power under whose sway they are held.—

GREATER ANTILLES.			
Area in sq. m. Population.			
Daymanbrack		300	British.
Cayman (Little)			
Cayman (Great)			
Cuba	43 000	1 440 000	Spanish.
Hayti	97 000	900 000	Independent.
Jamaica	4 266	441 000	British.
Pico (old do)	600	300	Spanish.
Porto Rico	8 750	588 100	Do.
LESSER ANTILLES.			
Windward Islands, or South Caribbean Islands —			
Barbados	166	128 700	
Grenada	158	23 000	Br. West.
Grenadines		2 000	
Martinique	380	135 017	French.
St. Lucia	370	37 000	
St. Vincent	181	31 700	British.
Trinidad	2 460	84 438	
Tobago	97	15 410	
Leeward Islands, or North Caribbean Islands —			
Anguilla	35	2 131	
Antigua	166	87 125	British.
Barbados	166	87 125	
Bermudown (St.)	5	15 000	Dutch.
Christopher (St.)	103	94 500	British.
St. Kitts		34 500	Dutch.
Orut (St.)	110	35 000	Dutch.
Nevis (St.)		1 000	Br. West.
Demanda	10	1 300	French.
Dominica	91	23 650	British.
Guadeloupe	254	120 200	French.
Saba		1 000	Dutch.
Mario Galesia	60	12 700	French.
Mart (St.)	80	6 000	French & Dutch.
Monterey	47	7 945	British.
Nevis	38	9 038	British.
Salute (Lew.)	8	1,111	French.
LEeward ANTILLES.—Continued.			
Popula. Islands.			
Area in sq. m. Population.			
Leeward Islands or North Caribbean Islands —			
Anguilla			British.
Bleque or Vieque	10	311	Spanish.
Osleira	41	800	Spanish.
John (St.)	41	12 000	Danish.
Thomas (St.)	41	6,000	British.
Turkey	10		
Virgin Gorda			
BAHAMA ISLANDS.			
Abaco (Great and Little)			
Andros			
Bahama (Great)			
Crooked Islands			
Flamingo			
Freeport (Great and Little)			
Inagua do do			
Key or Cayo (Great)			
Long Island			
Marianna			
New Providence			
Providence			
Salvador (St.)			
Watling's Island			
S. AMERICAN COAST.			
Bonaire or Boon Ayra	8 250	Dutch.	
Coahuila			Venezuela.
Cangua or Cangua			Dutch.
Curaçao	10 144	Dutch.	
Maricao	1 000	Venezuela.	
Orinoco or Aruba	3 164	Dutch.	
Tortuga			Venezuela.
GENERAL AFRICAN COAST.			
Ambergie Island			
Bonono or Gambia			
Tarrafat			British.
Ullula			
Rasban	4 000		

Besides the islands above named, there are a vast number of barren rocky islets scattered over the surface of the archipelago, which it is equally impossible as necessary to enumerate the *Bahama* group alone amounting altogether to 500 in number and the *Virgin Islands* to at least 50 more than those given in the table.

The *Antilles* are generally considered to be the remains of a mountain range, which, at some remote period, united the continents of N. and S. America. Some of the *Lesser Antilles* are flat, but the general character of the *W. Indian Islands* is bold, with a single mountain or group of mountains in the centre, which slopes to the sea all round, more precipitously on the E. side which is exposed to the force of the Atlantic current. Volcanic action is confined in this archipelago to the smaller islands, which, forming a line in a meridional direction, extend from 12° to 18° N commencing with *Grenada* and ending with *St. Eustatius*. Most of the intervening islands, which rise to great elevations, possess craters recently extinct, which have vomited ashes and lava within historical periods, while those that are low are composed of either calcareous or coral rocks. The most considerable eruptions in modern times have been those of *St. Vincent*; but more remotely *St. Domingo* and *Jamaica* have been the scenes of some of the most tremendous earthquakes on record. Hurricanes of great violence are of frequent occurrence in the region of the *W. Indies*, it being the focus of the most desolating on record. These hurricanes commence near the *Leeward Islands*, travel to the *W. N. W.* and then round the shores or across the Gulf of Mexico, and following the Gulf stream, are lost in the Atlantic, between the *Bermudas* and *Halifax*. The duration of the hurricanes on the *W. India* region, ranges from June to October and

the average extent is from lat. 10° to 50° N and lon. 50° to 100° W. Navigation within the *Antilles*, from *W. to E.* is attended with great difficulty on account of the opposition of the passage-winds and the currents. From this cause, a voyage from *W. to E.* requires almost as many weeks as days in an opposite direction. The climate in the *Antilles* is extremely hot, but the length of the night, the sea-breeze, and in many of them the elevation of the land, tend to modify the sun's influence. Spring may be said to commence in April when a bright and beautiful verdure, with a rapid and luxuriant vegetation makes its appearance, and during May gentle showers fall almost daily.

The rich and varied productions of these islands give them an important place in the commercial world. The principal of these are sugar and coffee, both introduced by man. The first *W. India* sugar was produced in the island of *Hayti*, where, in 1518, the Spaniards had numerous sugar-presses in operation, thence the manufacture subsequently spread to the other islands. Coffee found its way to the *W. Indies* from *Ceylon* and *Ile de Bourbon*, about the middle or towards the latter end of the 16th century. The other more important productions are molasses rum, pimento, tobacco, cotton, logwood, indigo, cochineal mahogany, lignumvitae various dyewoods, eugenia, and an immense variety of tropical fruits. At the time of their discovery the *S. Islands* of the Archipelago were inhabited by a fierce and warlike race, called *Caribs*, the more N. by a gentler men, the *Arawakans*. Both with exception of a few hundreds in *Trinidad*, are now extinct.

INDIGHIRKA, or KAPADAKIA KODJIA, a river Siberia, which rises in the N. side of the mountains of Obdorsk; lat. 61° N lon. 142° E; pursues a very circuitous course N. N. W. to Kaskarek where it makes a remarkable bend,

nearly in the form of a semicircle than N. E. and falls into the Arctic Ocean. In several months, after a course of about 900 m. Its principal affluents are, on their the Ukhon, Mera, and Moma, and on the S., the Arga, Kara, Schenack, and Urdina. Its course is through level, and generally frozen plains. The chief inhabitants on its banks are Loshakirs and Kerkals.

INDJE KARABU, a river European Turkey Macedonia, formed by the rivers Boshkiana and Yanotso, which, having their sources in the mountain range that separates Macedonia from Albania, unite about lat. $40^{\circ} 40' N$ lon. $22^{\circ} 5' E$. From that point the Indje Karabou flows E. and N. E. to the Gulf of Salonika, which it enters, opposite Cape Pannos; lat. $40^{\circ} 30' N$ lon. $22^{\circ} 35' E$. It has several affluents. Comes from the junction of the head streams, about 50 m.

INDJEH (GARA) the most N point of Ada Minor on the Black Sea lat. $45^{\circ} 8' N$ lon. $24^{\circ} 58' E$ (a).

INDORE, or **INDOOR** (HOLLAR) a maharajahship or native state, Hindoostan, protected by the British and consisting mainly of a territory partly comprised in the table-land of Malwa, and partly in the valley of the Nerbudda, surrounded S. and W. by the territories of the British presidency and N. and E. by those of Schindia, and the petty rajas of Dhar and Dewara. In addition, it includes the detached town and district of Mohilpoor and some other small districts enclosed by British dominions the whole being between lat. $21^{\circ} 30'$ and $24^{\circ} N$ lon. $74^{\circ} 50'$ and $77^{\circ} E$, and forming the remnant of the sovereignty of the Marhatta dynasty of Holkar. Estimated area, 4345 sq. m. The Vindhyan mountains, here rising to only 500 or 600 ft. above the adjacent table-land, traverse the S. part of the main territory and the Saptapora range bound it on the S. between them are the districts watered by the Nerbudda, which flows through them E. to W. Much of the country is well wooded, and over some fertile plains are scattered small villages, generally enclosed by ruined walls. Opium is one of the principal products but, by treaty with the British in 1826, its culture is limited to 5000 Raras maunds annually of which all except about 1000 maunds retained for home-consumption, are delivered to the British authorities for exportation at Bombay. After Indore, the capital, the chief towns are Bilow and Mohilpoor, the places of British garrisons. Akhyr and N. and S. parts of the Nerbudda and the ruined city of Mandon. The enormous caves and sculptures of Bang are on the W. frontier. Amongst the inhabitants of this part of India are numerous Bheels. The dominion of Holkar was at one period much more extended than at present but the chief having, in 1804, besieged Delhi, ravaged the Doab and Rohilkand, and set himself in open hostility against the British, his troops received a severe defeat from those of Lord Lake, at Dong near Agra. The decisive battle of Mohilpoor in 1817 annihilated the power of Holkar and, by the treaty of Mandon, most year he ceded to the British all his territories S. of the Saptapora hills and resigned his rule N. of Bundi together with his claims to tribute from the Rajpoot princes. In 1844 on the failure of the direct line, a successor to the maharajahship was appointed solely by nomination of the Bengal government. Pop. 850,000.—(Purk. Papers, &c.)

INDORE, a in Hindoostan, cap. above state, in a fine undulating plain, 32 m S. Oogen; lat. $22^{\circ} 45' N$ lon. $75^{\circ} 40' E$. It is of no great size, is traversed by a rivulet, has been nearly rebuilt since 1820 on very unequal ground, and has crooked streets, some of tolerable width, and paved with granite; houses mostly of two stories, built of mud or lime-burned bricks, and covered with thick tiles fastened upon bamboo rafters. It has some mosques, new pagodas of a mixed form, constructed of brick and a new granite palace; but its best edifice is the British residency which is one of the hand-somest in Hindoostan.—(Angelement. Voyage dans l'Inde.)

INDRAGIRI, or **ANDRAGIRI** the largest river in this island of Sumatra, rises about 2000 ft. above sea-level in the lake of Bangkara, afterwards situated in the mountains within 25 m. of the W. coast of the island. It flows in a winding course, nearly due E. first under the name of Kerantan, and then under that of Indragiri, carries the name of its own name, and falls into the sea, m. lat. $0^{\circ} 35' S$, opposite the islands of Langa and Siatap by three mouths, the most E. of which receives the name of the river Toakko. It receives numerous tributaries, and is navigable for the boats of the country far inland. Total course, upwards of 300 m.

INDRAGIRI, or **ANDRAGIRI** a native state, lat. Sumatra, B.E. coast, between the rivers Sumatra and Toakko, which enter the sea respectively in lat. $0^{\circ} 30' N$ and $1^{\circ} S$, bounded E. by the sea, and W. by some other native states. It is traversed in its whole extent, W. to E. by the river Indragiri, which forms the commercial road of the country and is in general flat, especially towards the coast. It is fertile, but the indolence of the inhabitants prevents them from cultivating more than a little rice to suit their own wants. The ground, as usual in such countries, is cultivated by the peasants, who are required to be the best-looking in the Archipelago. Gold and elephant teeth are found, and a good trade used to be carried on with Singapore. Indragiri is governed by a sultan, but is under the supremacy of the Dutch.

INDRAMAJJO, a town, lat. Java, prov. Cheribon, 104 m. E. by S. Batavia, cap. dist. of its own name. It lies near the sea, has a good haven, protected by the shady island Boon, rises a small fort, and carries on a considerable trade. It lay formerly at the mouth of the river Tijanack or Indragiri but the deposits brought down by the streams have accumulated so rapidly that in 1838 it was 8 m. and it may now be reckoned 12 m. from the sea. Indramajo or Indramaya point, N. W. from the town is in lat. $6^{\circ} 12' S$ lon. $108^{\circ} 18' E$ (a).

INDRAPOORA, a former state, with cap. of same name, lat. Sumatra, W. coast now included in the Dutch territories. It lies in about lat. $2^{\circ} S$ and yields pepper ivory cotton &c. —The towns on a small river of same name start the coast, in lat. $2^{\circ} 7' S$ lon. $101^{\circ} E$ has a fort and good safe anchorage, though no bay. About 45 m. N. E. the river is the volume of same name. Indrapoor or Indrapour point or cape is in lat. $2^{\circ} 10' S$ lon. $100^{\circ} 48' E$ (a).

INDRE, a v. l. France, dep. Loire-Inférieure, 3 m. W. Nantes. In the vicinity are extensive works belonging to the Government, at which a great number of steam-engines and canons are made. Pop. 2896.

INDRE (Latin, Andria) a river France, which rises in dep. Creuse, near the frontiers of dep. Indre to which it gives its name, and entering this dep. traverses it E. to N. W. passing Chateauroux, Issoudun, and Châtillon. It then enters department Indre-et-Loire, and still preserves N. W. passing Loches, and joins 1 bank Loire 19 m. N. W. Tours whole course, about 140 m. Of these, about 45 m., commencing at Loches are navigable chief affluents, the Igneray and Indre on the S. and the Vauzou on the N. bank.

INDRE, a dep. France, bounded N. by dep. Loire-et-Cher E. (Cher S. Creuse and Haute-Vienne) and W. Vienne and Indre-et-Loire lat. $46^{\circ} 22'$ to $47^{\circ} 15' N$ lon. $0^{\circ} 55'$ to $1^{\circ} E$ greatest length, N. to S. 64 m. greatest breadth, 6 m. area, 2785 sq. m. It is generally flat, though a few low hills in the S. W. relieve the general monotonous appearance, and furnish some picturesque scenery. The geological formation is primitive, the rocks being generally composed of granite and schist. The whole department belongs to the basin of the Loire, which receives its waters by the Indre, which gives the department its name, the Creuse, and the Cher. A branch of the Canal du Centre, follows the course of the last-named river and traverses part of the department.

Climate, mild and temperate, but somewhat variable. The soil is generally of a sandy and gravelly texture, rather light but generally not ill adapted for the growth of cereals. Nearly two-thirds of the whole surface is arable, and one-eighth in permanent meadows and pastures. About one-twelfth is under wood, and one-fifth waste. The corn sown leaves a considerable surplus for exportation. The other important crops are hemp and flax. A considerable quantity of land is occupied by vineyards the produce from which, amounting to about 63 000 pipes, does not bear a high name. Only one-half is exported as wine or brandy. Among domestic animals, sheep appear to be the favourite stock, and are reared with considerable care and skill. Poultry, particularly turkeys and geese, are numerous, but there is not much game. The minerals include iron, which is worked to some extent, bituminous stone, and several varieties of marble. The principal manufactures are fine woollen cloth, iron, which is smelted in several blast furnaces, and externally manufactured, particularly into scythes; linen, hosiery, candles, paper, earthenware, and porcelain. The trade is in corn, wine, wool, woollen, wood, iron, cattle, and sheep. For administrative purposes,

the département is divided into four arrondissements—Châtoureaux, the capital; Le Blanc Mesnil, and La Châtre—subdivided into 23 cantons, and 247 communes. Pop. 248,377.

INDRE-et-Loire, a dep. France, bounded N by Sape, Saône, and Loire-et-Cher E. Loire-et-Cher and Indre B. Vienne and W. Maine-et-Loire. Lat. 46° 45' to 47° 45' N. lon. 0° 5' to 18° E. It is of a compact and somewhat circular form; greatest length, N to S, 65 m., greatest breadth, 60 m.; area, 3362 sq. m. The surface is finely diversified by hills and slopes, valleys and plains. These last, both in the S. and N. are of considerable extent, and in the latter direction, have sometimes an arid and almost desolate appearance. The whole département belongs to the basin of the Loire, and, as its name implies, is traversed both by it and its tributary Indre. Two others still more important tributaries, the Vienne, and the Creuse, water it in the E. In addition to these the only important river is the Cher. They are all navigable within the département, and furnish it with almost unlimited means of water communication. In different quarters and particularly in the N W there are several small lakes and considerable swamps. The arable land occupies rather more than one half, and permanent meadows and pastures rather more than one-fifth of the whole surface. About one-eighth is under wood, one-eighth in vineyards, and one-tenth waste. The climate is regarded as one of the finest in France, being in general remarkably mild, and alike free from the extremes of heat and cold. In respect of soil and fertility the département consists of two distinct portions. The larger of these, situated on both sides of the Loire, and marked by low hills of tuffaceous chalk, consists partly of a mol alluvium, and partly of a somewhat light but deep and fertile vegetable loam. Beyond this basin, which has been called the Garden of France, the soil is generally of a thin and very indifferent description, not well adapted for the plough, but suitable for the growth of the vine, and occupied both by it and some considerable tracts of forest and heath. Agriculture long in a backward state, failed to meet the home consumption of grain but in recent times has made considerable progress, and now furnishes a surplus for exportation. Hemp and flax are also extensively cultivated and in particular spots figs, quinces, mulberries and similar plants are grown on a large scale. Fruit, various kinds of melons and pumpkins are very abundant. The latter, when dried, are known by the name of Tours prunes, and are largely exported. Walnuts and almonds are also gathered in vast quantities, and crushed for oil. The large extent of surface occupied by the vine, makes its produce of great importance. Many of the wines have a good name. The only metal of any importance is iron which is worked to some extent and there are many valuable sulphate quarries. Clay both for ordinary purposes and the finer kinds of pottery is abundant. The manufactures are not of much importance, but include woollen and silk goods, iron and gunpowder. The principal exports are agricultural. For administrative purposes, the département is divided into three arrondissements—Tours, the capital; Chinon, and Loches—subdivided into 24 cantons, and 281 communes. Pop. 312,400.

INDUNO a vil and com Italy Lombardy prov Como, near 1 bank Olona, once defended by a strong castle, of which there are only now a few remains. It has a church, and near it is a deep gorge, a remarkable fountain. Pop. 1801.

INDUS [Sanskrit, *Sindhu*, Pagan, *Asi-Sind*] one of the great rivers of Asia, which traverses the W part of Tibet, and the country of the central table-land of the Asiatic continent forming the N W boundary of Hindoostan, and finally interesting Souda throughout, to its mouth in the Indian Ocean. It rises in Tibet, on the N side of the lofty mountain Kailas, celebrated in Hindu mythology about lat. 31° 30' N; lon. 80° 30' E, near the source of the Sutlej and the Brahmaputra, not far distant from those of the Ganges, Yamuna, and at an estimated elevation of 18,000 ft. above the sea. Under the name of *Sinik-kha-bab*, it flows at first N W, alternately through lofty barren plains or deep mountain-gorges, and past Leh, Iskarto, and other towns, as far as lat. 35° 54' N; lon. 74° 30' E; where, after a course of about 870 m., it emerges from the table-land of the Himalayas, and its direction is abruptly changed to S W. Its principal affluents in its first part of its course, are the

river of Gariopo, Zanakar, and Dera, from the S. and the Shy-yok, Shyghur and river of Ghilgit, from the N. At Lik-shit, about 800 m. from its source, it has been found 50 yards wide, and at its confluence with the Shy-yok, near Leh 80 yards. At this junction the height of its bed is estimated at 10,000 ft. above the sea, and it thenceforth receives the name of *Abas-Bud*, or *Indus-proper*. From Mapkon (Shigatzen), where the Indus leaves the mountain down to Mittan, Kora near lat. 29° N long 70° 30' E it forms the W boundary of the Punjab passes Derbad, Attock, Kala-Bagh, Dera Ismael Khan Bakkur Katheroo Lala, and Dera-Ghazee-Khan and opposite Attock it receives, from the W the river of Cabool, its principal tributary except the Punjab, or united stream of the five rivers (*Panjab*) the *Sutlej* (anc. *Hyasudra*) *Besa* (*Hippasus*) *Ravee* (*Hidrostes*) *Chenab* (*Asopis*) and the *Jhelum*, *Jalrum* or *Bat* in (*Hippasus*) which stream joins it from the E. near Mittan-Kote At Derbad the Indus has been found, in August, when at its greatest height 100 yds. across. It thence flows, in a broad and divided channel, through a plain, to Attock, where it is about 1000 ft. above the sea, and is crossed by two bridges of boats respectively 800 ft. and 548 ft. in length. A few miles above this, the navigation of the Indus from the ocean terminates although the Cabool river is navigable for 40 m. from the junction. The distance from Attock to the sea, by the course of the river is estimated at 942 m. during which it first rolls impetuously between high steep-cliffs, in one place contracted to 250 ft. in width, with a depth of 180 ft. and a current of 10 m. an hour its bed there being between precipitous banks from 70 ft. to 700 ft. in height. Near Kala-Bagh however the Indus enters a plain and expands to about 500 yds. in width with an average depth of 80 ft. For the next 250 m. to Mittan-Kote, it flows mostly S. and occupies little numerous arms, including long islands of luxuriant pasturage and during its inundation, which lasts throughout the summer half of the year these, with a vast expanse of level country on its E. side, are covered with an immense sheet of water extending as far as the night can reach. The main channel in this part of its course varies greatly in width, but at Katheroo, lat. 31° 38' N it has been found 1000 yds. across, with a depth of 12 ft. in addition to which the inundation from the annual melting of snow in the mountains, gives an average of 84 ft. of water. Many small islands are cut from its E. bank, in the S part of the Punjab, below Multan and Dera-Ghazee-Khan. Below the influx of the Punjab, near Mittan-Kote the general direction of the Indus is S.W., to the middle of Souda, and, in its fullest season, it sometimes extends for 20 m. on the W and 10 m. or 12 m. on the E. side. In its lowest state being 2000 yds. or nearly 12 m. across. Throughout Souda the river has a very tortuous, but generally S. course and the towns of Bakkur, Koro, Bakkur, Larkhana, Solwan, and Hyderabad are on its banks; and those of Tatta, Gerra, Kutchka, Bandu-Vikhar, Meerpoor, Shikarpoor, Luchpat-Bundir &c. on various branches of its delta, or at its mouth. The country immediately bordering it in Souda, as well as in the middle part of its course is of the most fertile description, but much of it is still covered with thickets of tamarisk bushes and saline shrubs. Near Hyderabad, about lat. 25° 50' N the delta of the Indus may be said to commence though as high as Koro, lat. 27° 30' N the E. Narra, a large branch, 400 m. in length, leaves the main stream and diverges into the Indian desert discharging, during the inundations, a large volume of water into the Koro or most E. mouth of the Indus between Souda and Cutch. The W Narra which comes off a few miles below the former branch, after a course of 200 m. rejoins the main stream of the Indus at Solwan. The Fulahee a branch which inundates the site of Hyderabad leaves the Indus on its E. side, and after assuming the name of the Gomtee, joins, by one of its arms the E. Narra, near a large lake which was created by an earthquake in 1819. From Solwan to the efflux of the Fulahee, a distance of 80 m. the bed of the Indus is depressed below the adjacent lands to the depth of 16 ft. or 18 ft. Here inundations rarely occur and irrigation is effected by raising the water with the Persian wheel. The delta of the Indus between Hyderabad and the ocean, Kutchka and Luchpat-Bundir occupies a region 180 m. in length and breadth. The principal mouths from E to W are termed the Koro, Sol, Kather, Kookswarte, Kodywarre.

Kajmura, Michel, Jon, Pincenara, and Pites. The Koro mouth is properly an arm of the sea, and which, at 20 m. from it, is 7 m. wide and 20 ft. in depth. The Bar 2 m. wide, and with a depth of from 4 to 6 fathoms within its bar in contact with the Phynara branch; which, in consequence of a dam, is mostly ruined for navigation. The main stream of the Indus in the delta, much diminished in size, is termed the Sate, and enters the sea by the Kachavara and Kachavara mouths. The former is 1100 yds. in width, with a channel of 9 ft. in depth at low water. The Huzara estuary was, until lately the most important of all but it was rendered useless by a spontaneous change in the channel of the river soon after the disembarkation of the British troops there, in 1838. The Pincenara is, like all the rest, intricate, from sandbanks; it is, however said to have 15 ft. of water at low tide, and boats of 80 tons burden can ascend it for above 30 m. The Pites 500 yds in width has 9 ft. of water at low and 18 ft. at high spring tides, and is navigable to about the same extent as the foregoing. The total length of the Indus is estimated at 1850 m.; its descent from its source to Attock (700 m.) 34 ft. per m., from Attock to Kala-Bagh 30 m., from Kala-Bagh to Mitun-Kote 8 m., and from Mitun-Kote to the sea 6 m. The tide runs in the Indus nearly up to Tutah, a distance of 70 m. and at springs rises 9 ft. The annual quantity of water discharged by this river has been computed at upwards of 150,000,000 tons, which, in the summer especially contains a vast quantity of solid matter, causing its waters below the mountains to be highly turbid in all the latter half of its course, and its channels and branches, from abundant deposits, to be continually shifting. Vessels drawing more than 7 ft. water cannot generally enter any of its mouths above Belkhar no vessels of 6 ft. draft navigate it, and the traffic on its waters is conducted by means of heavy flat-bottomed boats. The banks of the Indus are deficient in almost every requisite for the construction of shipping yet, with all its disqualifications, it is still the main route for the conveyance of merchandise between India and Central Asia, Baluch, Bokhar, Afghanistan, and Persia. During the independence of the Amirs of Beluch, they levied such heavy and oppressive exactions on the trade of the Indus within their territories, that the Afghans and inhabitants of Central Asia supplied themselves with European goods chiefly by way of Russia but the conquest of Beluch by the British has already in a great measure restored the European trade with the same countries to the channel, by way of India, which had previously followed.—(Wood Rep. on the Indus in *Four of Asiat. Soc. of Bengal* Part. Rep. 1833; *Survey of India*, &c.)

INBOLI (formerly) a resort to Asiatic Turkey past Anatolia, 78 m. W. Rhodope on the Black Sea, and on the estuary of a small river to which it gives its name. It contains four mosques, a bazaar and public baths and has manufactures of cables for the Turkish government and exports copper building timber and manufactures of the country. The roadstead is indifferent. Pop. 3000

INES (KAWA) an Is. Mexican, Gulf of California. lat. 29° 34' N. long. 115° 30' W. Length, 30 m. breadth 10 m.

INFINICIONA, a small Is. Brazil, near Moss-Games 25 m. W. Villa Rica. It is well built, has a parish church, and in a deep narrow valley near it, is a gold mine, which is not worked. Inhabitants mostly agricultural labourers or miners. Pop. of dist. 4500

INGATESTONE, a tn. and par. England, co. Essex. The town, 5 m. S.W. Chelmsford a station on the E. Counties Railway has a church, Independent and R. Catholic chapels, National and British schools, and a large annual cattle fair. Area of par. 2675 ac. Pop. 800

INKERMAN (adv. Dorus) a tn Russia, gov Taurida

about 33 m. S.W. Sumbawep. It occupies a strong position on a lofty hill and was long a rich and flourishing place, but is now almost a ruin. It is surrounded by marshes, and is unhealthy in the extreme. The mountain on which it stands

contains numerous caves, supposed to have been hewn out by monks for residence during the middle ages. Several of them are remarkably curious. At a short distance is a church similarly hewn out of the rock.

lary between Austria and Bavaria, passes the towns of Braunau and Soharndorf and joins a bank drained at Passau, after a course of nearly 370 m. At its mouth, its bed is 750 ft. wide, while that of the Danube is only 492 ft. It begins to be navigable at Hall, but its channel is much unimproved, and the difficulties of navigating it are increased by the sudden and extensive floods to which it is subject. Its principal affluents are, on the r. the Ill, Ais, and Saale, and on the l. the Arden, Murelth, and Roth. It is well supplied with fish.

INN (German, *Isar* or *Jenowitz*) a circle, Upper Austria, which takes its name from the Inn, whose flows along part of its W frontier separating it from Bavaria, and receives the greater part of its drainage; area, 2060 geo. sq. m. It is very mountainous particularly in the S.E. but is well wooded and contains several fertile valleys. Iron is extensively mined and manufactured into armaments. Pop. 145,000.

INNERKIP a maritime vil. bor of barony and par Scotland, co Renfrew The village beautifully situated on E shore Firth of Clyde, 5 m S W Greenock, is inhabited chiefly by fishermen, and much frequented duri g summer for sea-bathing. Pop. 431 Area of par 2540 ac. Pop 3018.

INSALAH, or AIN SALAH (Fountain of the Saints) a town country in the Algerian Sahara, esp. dist. Tidi-kelt lat. 33° 11' N. lon. 1° 52' W.; unvalleyed, and containing from 500 to 600 houses. It carries on a considerable trade.

INSARA, or INARA, a town Russia, gov. of and 58 m. N. W. Penza, esp. dist. of same name, 1. bank Volga, at its junction with the Insars very poorly built, but with five churches, a furnace for smelting iron ore found in great abundance on the banks of the river, some iron casting and a trade in leather. Pop. 3600. Dist. 118,000.—The *Insars* rises near the centre of gov. Penza, flows N. past the town of Saransk, to the frontiers of gov. Nizhny-Novgorod, where it joins the bank Volga after a course of about 80 m.

INVERGORDON a vil. Scotland, on Ross, advantageously situated on the N. shore of the Cromarty Firth, about midway between Dingwall and Tain. It has an excellent harbour regular communication by steamers, with London and other places; and exports annually large quantities of grain, and a considerable number of cattle and sheep to London and Leith. Pop. about 1000.

INVERGOWRIE a vil. Scotland, on Forfar 3 m. W. Dundee. It has extensive flour and fax-spinning mills, a quarry of excellent building-stones and a safe and commodious harbour for small craft.

INVERKEILLOR, par Scot. Forfar 7 m. by 4½ m.

Pop. (1851) 1871.

INVERKEITHING a royal and parish bar seaport, and par. Scotland, co. Fife. The town is finely situated on an eminence overlooking the bay of the same name, 3 m. N. W. Edinburgh, consists of a main street, and several diverging lanes and has an Established church, a Dissenting meeting-house, a schoolhouse, a townhouse, and a grain market. The harbour at spring-tides admits vessels of 200 tons. Coals are exported and bark, timber and bones for manure, occasionally brought in exchange. Near Inverkeithing is a large distillery a brewery two foundries a tannery, a ship-building yard and a brick work. Inverkeithing is a royal borough of very ancient date. It has a charter from William the Lion, confirming another still older. It unites with Brechin 3 m. sending a member to the House of Commons. Area of par 4½ m. by 8 m. Pop. 10,499.

INVERKEITHING par Scot. Berwick 5 m. by 4 m. P. 835.

INVERKEITHING a town Scotland. See Inverkeithing.

INVERKESS a co. Scotland, and one of the largest in that kingdom stretching diagonally across the island from sea to sea, and including on the W. the island of Rhye, several smaller islands, and all the outer Hebrides, with exception of the N. part of Lewis. It is bounded S. by counties Argyll and Perth, N. county Ross E. Berwick and Aberdeen and W. the Atlantic. Length, N.E. to S.W. about 85 m. breadth 55 m. Area 4600 sq. m. or 244,000 ac. of which 500,000 are under cultivation. The county is divided into two nearly equal parts by Glenmore or the Great Glen of Albany, which intersects it N.E. to S.W. or from the town of Inverness to Fort William, and through which passes the Caledonian Canal formed by uniting a series of considerable lakes which stretch along the bottom of the valley. The S.W. shores of the county are indented with numerous arms of the sea, called Lochs, but on the N.E. the only indentation is the Beaulieu Firth, which in part, separates it from county Ross. The surface, generally is extremely mountainous but is equally distinguished for its beautiful and extensive glens or straths, which contain nearly all the fertile and arable portions of the county the remainder consisting of heath and pasture. The most extensive mountain range is the Monadhliath (granite mountains) or Monadhliath Mountains, which extends from the foot of Lochaber in the S.W. part of the county N.E. for 80 m. until it terminates in the vicinity of Cairn. This great ridge is in some parts 20 m. broad, and has elevations of 3000 ft. above sea-level. The Benlister range, in the S.W. part of the county N.W. Loch Eribol, is equally lofty with the former and far more picturesque in appearance, presenting some of the finest mountain scenery that can well be conceived. There are, besides these more remarkable ranges, many smaller systems most of them distinguished by magnificent scenery and various isolated peaks of great height, the most conspicuous of which is Ben Nevis, 4770 ft. high, reckoned the highest mountain in Great Britain.

The geological structure of the greater part of the county is of primary rocks, consisting chiefly of gneiss and mica-schist, with granite, porphyry and trap rocks. Limestone is found

in several districts, and in some approaches to the nature of the heath. The lower division of the country bordering the Moray Firth and extending along the margin of Loch Ness, is composed of old red sandstone. Remarkable islands of the sea have taken place on the N shores of the economy particularly at Fort George. Some veins of lead and silver have been discovered, and also iron ore in small quantities. The principal rivers are the Spey, Ness, and Beaulieu on all of which there are valuable salmon fisheries. The lakes are numerous, some of them of considerable size, and many of them surrounded by scenery of the most picturesque description. The largest is Loch Ness among the others of note are Loch Arkaig, Lochy, Laggan, and the greater part of Loch Eribri, the remainder being in the county of Perth. The forests of this county are of great extent, and were anciently still greater; they consist chiefly of oak, fir, birch, ash, mountain ash, holly, alder, hazel, and the Scotch poplar with extensive plantations of larch, spruce, silver fir, beech, and plane. In these forests, and the neighbouring mountains, the red and roe deer roam in safety. The climate is various, often wet and stormy on the W coast, severe in the interior and comparatively mild and dry on the Moray Firth. The arable and productive land lies chiefly on the sea-coast, and on the banks of the lakes and rivers, particularly along the innermost part of the Moray Firth, and along the Pipy. The main crop is oats, but good wheat is grown in the vicinity of the Moray Firth. The situation of the farmers of this county is now chiefly directed to the rearing of black cattle and sheep, particularly the latter. The cattle are mostly of the Fife or Kyles breed and the sheep of the Cheviot and Linton.

The Caledonian Canal already alluded to, opened October 1822 connects the E. and W. seas, extending from Loch Eil on the W coast, to the Moray Firth on the E.; 60½ m in length, about 2½ m. deep, which was cut the remainder is formed by the lakes Lochbroom, Ness, Gairn, and Lochy and by the cuttings. The whole number of locks on the canal is 26, all calculated for the passage of a 32 gun frigate.

Gaelic is the prevailing language, and in some places the only language spoken or understood. Principal town Inverness. Inverness-shire contains 36 parishes, and sends one member to the House of Commons registered electors (1861) 930. Pop. (1861) 96,500.

INVERNESS, a royal port and main bar support to, and par. Scotland. The town esp. of above co., and of the N Highlands, is one of the most beautifully situated towns in Scotland. It stands partly on a plain and partly on a gentle acclivity on both sides of the Ness, the larger and better portion being on the E. bank, about a mile above its confluence with the Moray Firth and at the N. end of the Caledonian Canal, 115 m N W Edinburgh lat. 57° 28' 36" N. lon. 4° 13' 30" W (N). It consists of five principal streets, straight, and well kept, and a number of smaller streets and lanes is abundantly supplied with water and well lighted with gas; houses generally well built, chiefly of stone. The principal public buildings, exclusive of the churches, are, the county buildings, a fine castellated structure, jail exchange, with the townhouse, an infirmary dispensary Assembly or Northern Meeting room, and Bath institution, most of them beautiful edifices. There are also a very handsome bank and hotel. It has three Established, three Free, and two U. Presbyterian churches, with Congregational, Episcopal, Wesleyan and R. Catholic chapels &c. numerous schools, many of them of a superior description. A hospital the most important are the Royal Academy founded by the Government fund, amounting now to £20,000. Ball's, and the Free church institutions. It likewise possesses a mechanics' institute, a public reading room, reading club, debating society and a thriving farmers' society. About 2 m. W from the town is a small woollen manufactory on the banks of the river especially famed for tartan. The other branches of industry include a silk cloth manufactory two shipbuilding yards, two rope-works, two saw-works, two iron foundries, a bone-bone-draw and three breweries but none of them extensive. The harbour lies on the E. bank of the river about 1 m. from its mouth, close to the end of the town. It is small, but safe, and can be approached at full tide only. The channel of the river however, has been lately deepened, and other improvements in connection with its navigation are in progress. The port has a small

coasting and foreign trade, conducted through the Moray Firth and Caledonian Canal. Imports—general merchandise, coals, pig-iron, hemp and seeds, wines, spirits, hams, fish, boots, shoes, linen, woollen drapery, hardware, shoes and glass ware, &c. Exports—grain potatoes, wool, woollen cloth, silk-cloth, ropes, cast-iron, dairy produce, leather, oak bark, whisky &c. and last Inverness trades with Forres, Nairn, and Fortrose in sending a member to the House of Commons. Pop. par. (1851) 12,792. Length of par. 14 m. breadth 3½ m. Pop. 16,496.

INVERNAID, a hamlet, Scotland, co. of, and 20 m. W W Strirling. It shows Loch Lomond with the ruins of a fort, erected early in last century; a mill and an inn. The streamlet Invernald forms a beautiful cascade, where it falls into Loch Lomond.

INVERJURY or INVERJURY, a vil. and com. Italy Lombardy prov. of, and 17 m W by N Milan with a parish and an auxiliary church and a much-frequented annual fair. P. 1761.

INVERJURY or INVERJURY, a royal, par., main bar and par. Scotland, co. Aberdeen. The town 14 m N W Aberdeen, in small and struggling has an Established, and a Free church, Episcopal chapel and Methodist and Independent dist. chapels, several schools, and a savings-bank. It carries on a considerable trade by the Aberdeenshire Canal, in grain, coals, linen, home drapery, bridle, iron timber &c. Near this town, Robert de Bruce gained his decisive victory over the Cambrays. Inverjury gives the title to Baron to the Earl of Kintore. It unites with Elgin, Peterhead, &c. in sending a member to the House of Commons. Area of par. 5100 ac. Pop. 2649.

INVESTIGATORS' GROUP, a cluster of six islands off W coast Australia, the principal of which is Flinders' Island. The others are called Weddige, Port Gallant, Ward and Saunders' Islands, about lat. 33° 48' S.

INVESTIGATORS' STRAIT, between York Peninsula and Kangaroo Island, S. Australia. It is the narrowest part of the Gulf of St. Vincent and is about 25 m. in width.

INVORIO, two nearly contiguous vils and com. Italy Piedmont, div. Novara, in a beautiful and finely undulated plain, about 8 m. from Aros.—1. (Inverio Inferiore, or Maggior) It contains a parish church, and an old square tower and has a trade in corn, nuts, and other fruits. Inhabitants chiefly agriculturists, but many of them emigrate for employ ment. Pop. 2335.—2. (Inverio Superiore, or Minor) with a parish church, and on the crest of an isolated hill hard by a country of beautiful architecture, in only partial surrounded by an inscription in Gothic characters. Pop. 543.

INZAGU (Lazio Antico) a vil. and com. Italy Lombardy prov. Milan about 4 m. W by N Gergonzola, surrounded by fine villas. It has two churches, and a trade in excellent wine the produce of the district. Pop. 5108.

INZEP, a river Russia, gov. Orenburg. It rises in the Ural mountains flows first E. then W., and joins a bank Belais, about 50 m. S. E. Ufa, after a course of nearly 160 m.

INZERSDORF, a vil. Lower Austria, on the Liesingbach, 4 m. S. Vienna, on the railway of Grätz, with a handsome new church two castles manufactures of printed calicoes, rosoglio, and vinegar several clockworks, and a trade in dairy produce. Pop. 1360.

INZLINGEN, a vil. Baden, circle Upper Rhine, built on a hill with a parish church, a chapel, and two mills. Pop. 1016.

IONA, anc. I Colm-Ill or I Colm-Ill, the Isle of Colm in a retreat or cell] on an island, one of the inner Hebrides, on Argyle separated from the S.W. extremity of Mull by the sound of Iona, 12 m wide and about 72 m S.W. Staffa; lat. 56° 22' N.; lon. 6° 25' W. Iona is about 8 m. long, by 1½ m. broad area, 3000 ac., of which 800 ac. are under cultivation, the remainder being hill pasture moorland and rock. On the W side the coast is for the most part rocky but on the E. it is more level. The surface is low rising into numerous irregular elevations which seldom exceed 100 ft. the highest is about 400 ft. In some places the soil is fertile, yielding good crops of barley and potatoes; oats also are partially raised, but the rearing of black cattle, and fishing form the chief occupations of the inhabitants. Facing the sound is the small village of Iona, consisting of a row of

about 40 detached cottages abutting the shore, with an English church. Near it is also a Free church, a most little structure picturesque situated on a rock. This little island derives its interest and celebrity wholly from its ancient ruins, the remains of religious establishments of uncertain date but popularly attributed to Columba, who took up his residence here towards the middle of the 6th century. They are all however of a much more recent date than the time of that venerated saint, whose structures were of very slight materials. The principal ruins are those of the cathedral church of St. Mary of a sumptuous five chapels and of a build

length of the transept is 70 ft. and that of the body of the church E. to W. 155 ft. The great window in the E. gable of this church has been very elegant. In the interior are several interesting sculptured tombstones, one of which, dated 1300, is that of Abbot M. Kinnon, the oldest in the cathedral.

IONIAN ISLANDS a series of islands in the Ionian Sea, off the coast of Albania, and the W and S shores of Greece, the most S. Cergo, and its dependent islets being off the S. extremity of the Morea. They form a republic under the protectorate of Great Britain, having the title, United States of the Ionian Islands. The principal islands,

seven in number are, reckoning from N to S Corfu Paxo Santa Maura, Ithaca, Cephalonia, Zante, and Cergo. To each of these larger islands, a number of smaller scattered along their respective coasts, are attached and included in their several local jurisdictions. They lie between lat 35° 45' and 38° 55' N lon 18° 35' and 25° 15' E. Area of the whole, 109 sq. m. or 678.81 sq. of which 934 694 ac. are cultivated. All these islands, both large and small b long to the same great calcareous formation which prevails over Greece. They are extremely mountainous so much so, that they do not contain a sufficient quantity of arable land to produce the corn required by the population and were it not for the vine, olive, and currant, especially the last, which some of them produce in great abundance they could support but a small number of inhaliants. The climate generally resembles that of the neighbouring continent, except that the sea renders it more uniformly temperate and humid. Snow often falls in the winter and lies on the mountain tops but rarely on the plains. Sudden and furious squalls are frequent and the srocco or hot

THE CATHEDRAL AND ST. ORAN'S CHAPEL, IONA. Rail in the distance.

ing called the Bishop's House. St. Oran's chapel as it is called is supposed to be the most ancient. It is very small, being only 60 ft. by 30 ft. Attached to it is a burying-ground in which most of the families of distinction in the Highlands had, at one time, places of sepulture. Numerous kings of Scotland, Ireland, and Norway are likewise said to have found their last resting-place in the island. Next to this edifice, in point of antiquity may be reckoned the nursery which may

S wind occurs at certain periods. The staple exports from these islands are oil, currants, various sorts of wool and salt. They possess few manufactures properly so termed, yet their contributions to the Great Exhibition in 1851 evince the existence of a remarkable degree of skill and correct taste. These contributions consisted principally of articles belonging to the classes of textile and ornamental manufactures. The specimens of embroidery were extremely rich and beautiful and the filigree work of singular delicacy. A large silver brooch of surpassing elegance in design and execution was among the contributions of the Ionians. The trade of this island is carried on principally in British vessels. Imports, in 1849, £236 259 exports, £218 248. By the constitution of 1818, the government, which has its seat at Corfu consists of a Lord High Commissioner the representative of Great Britain a senate or executive, composed of a president, and five members and a parliament or legislative assembly of 40 members 19 of whom are clerics from the various islands. The parliament meets annually and lasts for five years but may be dissolved at any time by the Lord High Commissioner. The armed force consists of about 3000 British troops, and four regiments of native militia. The established religion is that of the Eastern Greek church to which four-fifths of the population belong. Each island has its own bishop, but at the head of the whole is an exarch or primate both of whom are consecrated by the patriarch of Constantinople. The public revenue, in 1849 was £115 420 the expenditure, £124 918. The Ionian Islands, so called from lying in that part of the Mediterranean recently known as the Mare Jonium or Ionian Sea, often figure in the ancient history of Greece, but only singly not collectively. Early in the 16th century they passed into the hands of the Venetians, who governed them by a protonotary and made Italian the official language. In 1797 the French became masters and laboured with assiduity and considerable success in spreading their democratic principles. In 1800 Russia and Turkey having, by their combined forces, expelled the French, while retaining a protectorate, left the inhabitants to make an attempt at self-government. Anarchy and confusion were the result and in 1806, Russia, by a secret article in the Treaty of Tilsit, ceded the islands to France. In 1808-10, all the islands were overrun by the British troops except Corfu which also surrendered in 1814 and the possession of the British was finally fixed and regulated by the Treaty of Paris, in 1816. The people are of the same race as those of the

MONUMENTAL TOMBSTONES AT IONA

L. Abbot M. Kinnon; R. Mother of St. Columba. From sketches by H. D. Graham.

probably be referred to a period beyond the twelfth century. The most extensive ruin is that of the church St. Mary which is cruciform, surrounded at the intersection of the nave and the transept by a square tower of above 70 ft. in height. The

adjacent continent and the Ionian partake in the physical configuration of the Greeks. Pop. (1844) 218,737

IONIAN SEA [see *Mare Jonicum*] the portion of the Mediterranean communicating with the Gulf of Venice by the Strait of Otranto, and having Greece and part of European Turkey on the E. Sicily and the most S. part of Italy on the W. Its breadth at the widest part, or between Cape Passaro in Sicily and Cape Matapan on the Morea, is about 400 m. Its more remarkable indentations, on the W. side, are the Gulf of Taranto and Squillace, in Italy; on the E. the Aris, Patras, Arondia, and Corone the latter three in Greece, the first between Greece and European Turkey. The Ionian Sea contains all the Ionian Islands excepting Corfu which lies between Crete and the S. E. extremity of the Morea.

IOWA one of the central U. States, cap. same name, bounded, N. by the Minnesota territory, E. by Wisconsin and Illinois, from which it is separated by the Mississippi R. by Missouri, and W. by the unsettled country from which it is separated by the river Missouri; between lat. 40° 35' and 42° 30' N. lon. 90° 30' and 96° 50' W. length, 250 m. breadth 190 m. area, 47,400 sq. m. Excepting the portion on the banks of the Missouri, the state slopes S. E. its extreme, E. of lon. 92°, the principal of which are the Missouri, Skunk, Cedar with its affluents the Iowa and the Wabash—pennons flowing diagonally to the Mississippi. W. of the 92d meridian, the streams all flow to the Missouri. The surface is undulating nearly three-fourths of it consisting of luxuriant prairie, wholly destitute of trees the only strips of forest being found near the rivers. The weather is variable and sometimes severe but the climate is healthy. Water continues from December to March the summer heat is tempered by frequent showers. The soil is in general good consisting of a deep black mould intermingled in the prairie with sand, red clay and gravel. Principal crops—Indian corn wheat, rye, oats, buck-wheat hemp flax, potatoes and hay. Pumpkins melons, and all the ordinary fruits and vegetables, thrive well. Crab-apples, wild plums straw berries, and grapes, are indigenous and abundant. The E. portion of Iowa is rich in minerals. Lead is wrought to some extent and zinc and iron are found. Limestone and some beautiful marble are abundant.

The settlement of Iowa commenced in 1832, when the first purchase of land from the Indians took place in the territorial government was instituted in 1838 and it was admitted into the Union in 1846. The government is vested in a governor and general assembly elected by male citizens of 21 years the former for four years, the representatives for two and the senators for four years. It is divided into 51 counties. Pop. (1840) 42,111 (1850) 192,247

IOWA a city U. States cap. Iowa 1 bank river of same name lat. 41° 50' N. lon. 92° 5' W. It is handsomely laid out contains a church and a Dutch capital. P. (1850) 3300

IPA, a river Russia, which rises in gov. Minsk, flows N. E. W. past Kovno, and after a course of about 70 m., joins 1. bank Pripiet, 10 m. above Minsk

IPHOFEN a town Bavaria, Middle Franconia with three churches, a burgher hospital, three mills, and a trade in corn and wine. Pop. 3069.

IPING par Eng. Sumner 1925 ac. Pop. 438

IPOJUCA a vil. and par Brazil, prov. Pernambuco, 1 bank river of same name, and about 5 m. from the Atlantic; with a church, a Franciscan convent, and some trade in cotton and other produce of the district. Pop. 200.—The river rises in the Serra-do-Carvão-Yellum, prov. Pernambuco, flows E. for about 200 m. through a country thinly peopled, and falls into the Atlantic, S. of Cape St. Augustine, in lat. 8° 35' S. Slopes can proceed up the river for about 6 m.

IPOLYAGH or **SARY** a market to. Hungary cap. so. lands, at the confluence of the Krapina with the Ipoly have

crossed by a stone bridge, 40 m. N. Pesth. It has several mills and annual fair. Pop. 1650.—The river Ipoly rises in Mount Fietrova, co. Hegrovd W. of Tiszacon, flows very directly S. W. and S. past Balassa-Gyarmath and Ipolyagh, and joins 1. bank Danube below Giron, after a course of nearly 50 m.

IPPLI-PEN par Eng. Devon; 4675 ac. Pop. 1021

IPPOLITTE, par Eng. Hertford 2970 ac. P. 985

IPS, or **Yase** [see *Asia Zencle*] a tr. 60 Lower Austria, on the Danube, at the confluence of the Ips 60 m. W. Vienna. It is well built has three suburbs, a parish church, and town-houses, both old a large infirmary burgher hospital and old castle a brewery and manufacture of liquors. Pop. 1962.—The river about 6 m. W. N. W. Maria Zell, flows W. and N. E. passing Waidhofen, and joining 1. bank Danube after a course of 70 m.

IPSAMBOOL, EMANKHOOK, ANUNAMUT, or ANUNAKET, Nubia, 1. bank Nile, 60 m. S. W. Derr; lat. 23° 25' N. lon. 31° 40' E. remarkable for containing two of the most perfect and magnificent specimens of Egyptian rock-cut temples existing. Their fronts have been fashioned out of two distinct lines or walls of sandstone, and their interiors excavated in the solid rock. They are of different dimensions the one having a front of 90 ft. the other of 150 ft. The smaller stands 20 ft. above the present level of the Nile, and is as perfect as when first completed the larger, 100 ft. The heads of the latter smoothed perpendicularly in the face of the rock overcrowning the Nile, is 130 ft. in length and about

FAC. OF THE GREAT TEMPLE, IPSAMBOOL.—From Burdett's Nile and

60 ft. in height, surrounded with a moulding and adorned with a cornice and frieze. Attached to this facade are several stupendous colossal statues of Ramses II. They are represented as seated on thrones including which, their total height may be between 60 ft. and 70 ft. Of these gigantic statues there were originally four but the third from the N., having been shattered by a rocky avalanche descending from the mountain above, has now a large portion of his head in his lap. In the interior besides numerous smaller chambers, is a vast hall adjoined on either side with an imposing range of massive square pillars, each with a gigantic statue, 17 ft. in height, attached to it in front. This magnificent excavated temple extends towards from the entrance 200 ft. The heads of the smaller temple, which was dedicated to Hathor or Athor is adorned with several statues in prominent relief and the interior is divided into a hall of six square pillars, a transverse corridor with a small chamber at each extremity and an apse.—(Wilkinson's Modern Egypt.)

IPDEN, par Eng. Oxford; 1874 ac. Pop. 629

IPSERA, or **PIARA** [see *Poyra*] an isl. Turkey in the Archipelago, 7 m. N. W. Zelo; length, 8 E. to S. W. 4 m.;

breath, nearly 5 m.; mostly bare rocks, with an occasional covering of this vegetable earth. By careful culture it is made to produce some wine, fruit, and cotton. The only town on it bears the same name, and is situated on the S. on a small bay which forms a good harbour.

IPSWHEIM a market in Bavaria, circle Middle Franconia 18 m. N. Anspach, on bank Aisch, with two churches, gymnasium, and a trade in wool, corn, and fruit. Near it is the castle of Hoheneck. Pop. 808

IPSWITZ, or **IPSWITZ**, a market in Lower Austria, on the Danube, about 24 m. from Amstetten, with a parish church and extensive manufactures of cutlery and ironware. P. 1307

IPSWITZ, par. Eng. Warwick 2514 ac. Pop. 1049

IPSWITZ, par. Eng. Suffolk 6490 ac. Pop. 1292

IPSWICH a port of entry U. States, Massachusetts, intersected by the navigable river of same name, 2 m. from its mouth, and 25 m. N. by R. Boston. It has a considerable jail four churches, and several schools and a number of vessels engaged in coasting and fishing. Pop. 3000

IPSWICH a par. and municipal bor. and river-port, England, cap. of Suffolk, on the Orwell here crossed by two bridges, 66 m. N. E. London, and a station on the Eastern Union Railway. It is pleasantly situated on a gentle declivity sloping to the river, has generally narrow and irregular well-paved streets, lighted with gas, but inadequately supplied with water, houses neat and substantial many of them very old, and covered with curiously-carved images. There are a townhall a handsome hall of commerce in which are offices for the Customs and Inland Revenue department, corn exchange, a commodious barn, hospital, convenient market-place, jail, and county courts, an assembly room and a small theatre. There are also thirteen churches, several places of worship for Dissenters, a R. Catholic chapel, and Jews synagogues several well-endowed charity schools and numerous other charitable foundations. It possesses an infant school, a school for qualifying girls to be useful servants, a philosophical society, a mechanics institution with a good library, a literary institution a museum and a well-selected public library. The manufactures of the town comprise tobacco, twill, agricultural implements, for which it is noted and artificial stone. There are ten two extensive iron foundries, three ale and porter breweries, soap-boiling establishments and a good deal of ship building. The shipping trade of the port is considerable. The principal exports are grain and local manufactures the chief import coal which is distributed through the N. and W. parts of the county by the Eastern Union Railway and the Canal. But there is also a pretty extensive general foreign trade particularly in the importation of timber from Norway—Ipwich being a landing port for foreign timber and in Russia and oak. Vessels drawing 15 ft. water can float in the wet dock, which covers 32 ac. The number of vessels registered at the port in 1850 was 192 of which 50 were under 60 tons total tonnage, 14,835 and four steamers 177 tons. The same year the number of vessels that entered was 1535 ton 190,730; cleared, 919 tons 54,505 of which the great majority were coasters. According to Camden Ipswich was originally called *Hyppeswice* from the neighbourhood river *Gypen* or *Gyping*. It was destroyed by the Danes, but was subsequently restored by King John. It has sent two members to the House of Commons since the 23d of Edward I. Registered vessels (1851) 1781. Pop. (1851) 83,914

IPU-GRADE, a tn. Brazil, prov. Ceara, 260 m. S. W. Fortaleza with a church and a considerable trade in cattle with Pernambuco. Pop. dist. 8000

IPUGA, a vil. and par. Brazil prov. of 70 m. E. N. P. Rio-de-Janeiro with a church and a considerable trade in timber situated down the Rio-Jofa. Pop. 8000

IPUT a river Russia, which rises in the S. E. of gov. Mohilev flows E. and then S. W. traversing part of gov. Smolensk and Courgelov re-enters gov. Mohilev and joining 1 bank 30 m. a little above Novo-Belitsa, after a course of about 350 m. Its banks are covered with forests, which furnish fine ship timber

IQUEQUE, a seaport tn. and isl. Peru, dep. Arequipa, prov. Tarapaca. The island lies close upon the coast, lat. (south) 20° 12' 30" S. lon. 78° 14' 45" W. (2) has been considerably reduced in height, in consequence of the immense quantity of guano taken from it. The narrow opposite the

island 40 m. W. Tarapaca, on a plain of sand, at the foot of a wall of rock, 2000 ft. high has a most gloomy and miserable appearance and is destitute both of water and firewood. Near it are valuable sulphate works, the produce of which is exported to England and France, and two rich silver mines were at one time wrought. Pop. 1000

IRAJA, a vil. and par. Brazil prov. of 212 m. S. E. de-Janeiro near a river of its own name with a church, several chapels a number of good houses, and a considerable trade in sugar and rum. Pop. 5000

IRAK AJEMI (anc. *Media Magna*) a large central prov. Persia, surrounded by Fars Khomassan Manderan, Gilan Ascherjan, Ardabil and Luristan and extending (according to Colonel Chesney in *Engh. Exped.*) from prov. Fars, lat. 31° 25' N. to the Elburz range, lat. 36° N. 210 m. and from the borders of Luristan, lon. 45° 20' E. to those of Khomassan, lon. 55° 20' E. or 235 m. Although not equal to some of the other provinces in fertility and cultivation it contains fine valleys and rich plains with excellent pasturage, and considerable tracts of cultivated land. The valleys are of indefinite length but seldom exceed 10 m. or 15 m. in width. When well watered, as many of them are, they produce ample crops of rice, wheat, sesamum, and other grains; with fruits opium tobacco cotton, saffron, and silk. The great superiority of trade is Ipsahan the former capital of Persia besides which, it contains Teheran, the modern capital of the country. Kashan Hamadan, &c.

IRAK ARABI (anc. *Babylonia*) a dist. Asiatic Turkey, past Baghdad being the S. part of Mesopotamia. It is that portion of the patriarchate between the rivers Euphrates and Tigris, and the S. E. of Baghdad. It includes the ruins of Babylon, Seleucia, &c.

IRAN the extensive name for Persia (which see.)

IRAWADI a river Asia. See *IRAWADI*.

IRBIT a tn. Russia gov. of 270 m. E. Perm, on the banks of the Irbit, at the confluence of the Irbit. It is very poorly built has two churches, and a noted annual fair which lasts from 15th February to 15th March, and is attended not only by Russian and Siberian merchants but by Greeks Persians, Armenians, Tartars, and persons belonging to numerous tribes. P. (1851) 3181. — The country is covered in the W. by ramifications of the Ural mountains but suddenly flattens down, and in the E. forms extensive plains producing corn and rearing cattle. Copper and iron are worked in the higher districts and maintain several blast furnaces. Pop. 94,000

IRBY two par. R. Lincoln — 1 (see the *Morale*) 1090 ac. P. 208 — 2 (upper *Hammer*) 1811 ac. P. 363

IRCHESLEY, par. Eng. Northampton 1990 ac. P. 980

IRFIX a decayed market tn. and par. England co. Cumberland 15½ m. S. W. Carlisle. Area 5523 ac. P. 505

IRECH two tns. Austria — 1 A market in Hungary, Thither Danube, co. Tolna, 70 m. S. S. W. Pesth; with two churches, a castle, the ruins of an old monastery a valuable breeding stud, and a trade in wine. P. 2526 — 2 Or (*Uregh*) a market tn. Bolognina, co. Symma, 11 m. S. E. Peterwaradin; with a church and a trade in wine, extensively produced in the district. Pop. about 6000

IRELAND (*Ere*, *Ere*, Latin *Hibernia*) the more W. and less important of the two principal islands, of which the United Kingdom of Great Britain and Ireland is composed, between lat. 51° 25' and 60° 25' N. and lon. 6° 20' and 10° 20' W. separated from Great Britain on the E. by the Irish Sea, which near its centre, attains a width of 180 m. but narrows between Holyhead and Howth Heath to 60 m. and between the Mull of Kintyre in Scotland, and the opposite coast at Fairhead to about 13 m. and surrounded on all other sides by the N. Atlantic Ocean. Its shape, much more compact than that of Great Britain, has been compared to a rhomboid, with two of its opposite sides nearly due N. and S. and the other two slanting between W. S. W. and E. N. E. Measured diagonally the greatest length from Minn Head, in the S. W. to Furryhead, in the N. E. is 300 m.; and the greatest breadth, from Carrigrohane Point, in the S. E. to Bantry Head in the N. W. is 213 m. measured on a meridian, and on a parallel of latitude the greatest length and breadth respectively, are only 230 m. and 189 m.; the central breadth, nearly between the bays of Dublin and Galway is 110 m. area, 53,513 sq. m. or 30,808,271 ac.

There are no great natural divisions of the surface, but the principal division, for administrative purposes, is into the four provinces of Leinster, Ulster, Munster, and Connaught, comprehending 32 counties. Those, with their area, populations, and other statistics, are given in the following Table:—

AREA, POPULATION &c., of IRELAND.

Provinces and Counties.	Area in sq. m.	Population 1850.	Population 1861.	Population, 1891.			Houses, 1891.			Chief Towns.

General Features.—The coast, forming a line of about 750 m. in, is, in general, very bold and rugged. The most continuous portion is the E. where are the only remarkable indentations—the Loughs of Belfast and Strangford, and the Bays of Dundrum, Dundalk, and Dublin. In all other directions, but more especially in the N. W., and S. W. the indentations follow each other in almost unintermitted succession and frequently cut so deep into the land as to give it a very broken and rugged appearance. Commencing in the N. and proceeding W. we trace in succession Lough Foyle and Bally the Bays of Donegal, Killalee, Clew and Galway, Sligo, Slieve Donard, the Bays of Dingle, Bantry and Dromedary and the harbours of Cork, Dungannon and Waterford. In point of extent, depth of water and shelter many of these furnish natural havens, which cannot be surpassed. The rocky shores, which line the most of these bays, are fringed by the abrupt summits of mountain ridges, which, instead of stretching in continuous chains across the interior rise rather in vast isolated masses, at a short distance from the coast, and usually subside rapidly as they recede from it. Indeed, almost the only island range worthy of the name is that of the Devil's Bit, and the Slieve Donard mountains, which stretch in an irregular curve of about 20 m. from S.W. to N.E. through the N.E. of Munster and W. of Leinster and in the Kesh range the height of 2965 ft. Most of the other masses attain their greatest elevation towards the exterior of the island, and these give the interior the form of a vast plain, gridded all round by lofty mountain barriers. The most important of these which present themselves, is proceeding as before from the N. westward, are the mountains of Donegal culminating point, Eglar, 2463 ft.—Sligo; culminating point, Trillick, 2113 ft.—Maye culminating point, Moyish, 2469 ft.—and Malin, 2728 ft.—Galway; culminating point, Twelve Pins, 2795 ft.—Kerry; culminating point, Brandon, 2120 ft., and Carrig, 2728 ft.—the highest of all Ireland, 8404 ft.—Waterford; culminating point, Mota, 2626 ft.—Sligo; culminating point, Lougha, 2609 ft.—Dublin; culminating

point, Kippure, 2173 ft.—Down culminating point, Eglar, 2463 ft.—and Antrim the mountains of which are less remarkable for their height than the magnitude with which they terminate in the Giant's Causeway. Though the barrier thus formed presents numerous openings and the plain enclosed by it is by no means a mountainous flat it is not difficult to understand how a stricken so formed is ill-adapted for giving a free course to the water which collects upon it, and accordingly contains extensive tracts of bog.

Rivers and Lakes.—Few countries, of the same extent, are so liberally supplied with rivers. They are not only numerous, but are equally distributed over the surface, so as to leave no district without sufficient means of water communication and are, in general, admirably adapted for navigation, winding along in deep and gentle currents, and not often much encumbered by rocks or other obstructions. The Shannon, the largest river of Ireland, if not of the United Kingdom, is navigable to its source, in Lough Allen, forming a navigable channel of 214 m. continued through the very heart of the country and though, of these, 144 m. are occasionally obstructed by shallows, over which only vessels of small burden can float, the remaining 70 m., commencing at the town of Lisnakeel, are safely navigated by vessels of 400 tons. The other rivers of most importance are the Brandon, Lee, and Blackwater almost confined within the limits of the county of Cork; the Suir and the Barrow, which, by the union of their streams, form the broad estuary of Waterford harbour the Slaney which, at its mouth, expands into the large lagoon of Wexford haven; the Liffey which, from having the capital on its banks, is possessed of much more commercial importance than its mere magnitude could give it; the Boyne, the largest river which discharges itself on the E. coast; and the Bann and the Foyle, which have their mouths at no great distance from each other on the N. coast. Besides the loughs or lagoons in immediate connection with the sea, to which numerous have already been named, Ireland possesses a vast number of inland lakes, which, in some parts,

lie so near each other as to form a continued series, easily available for purposes of navigation. Lough Neagh, a vast quadrangular expanse, 17 m. long, by 10 m. broad, is chiefly in Antrim, though it also borders the counties of Down, Armagh, Tyrone, and Londonderry. It is not only the largest lake of the United Kingdom, but ranks high among the secondary lakes of Europe. Its beauty however bears no proportion to its magnitude. Its shores are low and marshy, only two small and uninteresting islands are seen upon its bosom, and the surrounding scenery possesses no attractions. The only remarkable thing connected with it is the petrifying property of its waters. The other more important lakes are Lough Erne which when its basin is full stretches in one continuous sheet of water for nearly 80 m. but at other times becomes divided, near its centre into an upper and a lower lake—each, particularly the latter studded with numerous islands, many of them inhabited, and several of them so well wooded, as to form a rich and interesting scenery. Lough Corrib, about 24 m. long, and at the broadest, 14 m. wide, and connected with it by a subterranean channel. Lough Mask both so commodiously situated as to admit of an easy junction with each other and with the sea, at the town of Galway. Longue Allen, Eke and Derg—the first, as already observed forming the proper commencement, and the other two wide expansions of the Shannon and Lough Corrib and Cullin in the county of Mayo. Besides these whose magnitude is their chief claim to notice, many others, of much smaller dimensions, are distributed over the island, and often compensate for their limited extent by the beauty and magnificence of their scenery. In this respect, the lakes of Killarney are pre-eminent, and attract visitors from all parts of Europe.

Climate.—The characterisation of the climate of Ireland is brightness and humidity. Its winter though long is seldom accompanied with prolonged frosts, while the average heat of its summer falls considerably short of that of England. This comparative equality of temperature, is evidently the result of its insular position. The humidity is, in like manner the effect of the vast expanse of ocean which bounds it on the W., and the prevalence of W. winds, which, charged with accumulated vapours, on first reaching the Irish coast, precipitate them in deluges of rain or dense fogs. Hence, even in the midst of summer the air is seldom clear, and in autumn, especially of moisture borne to the island, which is a constant source of harvest. Much of the corn is only preserved by being kiln-dried. One great advantage, however is, that the verdure of the pastures is peculiarly rich and preserves its luxuriance to a late period of the year.

Geology.—Owing partly to the immense extent of deep bog which covers the surface of Ireland and conceals the mineral deposits from the view its geology is imperfectly known. Its peculiar features however consist in the vast masses of primary and metamorphic rocks which form its mountains, and the secondary formations spread over its interior. Basaltic rocks are almost entirely confined to the N.E. where they cover nearly the whole county of Antrim, and often form colomades, of which the Glenties Causeway is a celebrated specimen. Granite has its largest development in the S.E. where it forms the great mass of the mountains of Wicklow and stretches, in a broad belt, from N. E. to S. W. through the counties of Wicklow and Carlow. It is also more sparingly developed in the W. along the shores of Galway Bay. In the N., in the county of Donegal, where it appears in three patches, the largest on the N.W. coast; in a small patch on the N.E. coast of Antrim, where it forms the well known promontory of Fair Head, and in the S. where it occupies two considerable tracts, one wholly in Down, and the other of a very irregular shape, partly in Down and partly in Armagh and comprehensively presumed along both sides of Carrlingford Bay. Of the primitive stratified rocks the most largely developed are chlorite and mica-schist, which, with greywacke, limestone, hornblende and other accompanying strata, cover the greater part of the N. of Ireland, stretching without interruption over the greater part of the counties of Londonderry, Tyrone and Donegal. The same strata form a long narrow belt in the county of Sligo, and spread out into great breadth on the coast of Mayo. They also occupy considerable tracts on the coasts both of Galway and Kerry but appear to be altogether wanting in the interior and on the E. and W. coasts; with the exception of a patch in the N.E., overlying the granite which

terminates in Fair Head. Next in the order of superposition is the Silurian system, the lower rocks of which form no inconsiderable portion of the whole island, covering almost the whole of counties Carman and Monaghan, large parts of the S.W. of counties Kerry and Cork, the far greater part of Wexford and numerous isolated spots, both on the coasts and in the interior. The old red sandstone, the formation next in order, has its largest continuous development in the county of Cork, but class in the surface as numerous isolated spots, forming tracts of considerable extent in Waterford, Kilkenny, Tipperary, Clare, Galway, Mayo, and Tyrone. The rocks next in the series belong to the carboniferous system, at the bottom of which lies the mountain limestone, the most largely developed of all the rocks of Ireland. Its chief seat is in the centre of the island where it forms a broad mass, stretching continuously from the E. to within a short distance of the W. coast from Louth and Dublin, through E. Meath, W. Meath, Kildare, King's County, Queen's County, Longford, Roscommon, Mayo, and Galway. Still further S. though its continuity is broken by the occasional interposition of the old red sandstone, it is seen in Kilkenny, Tipperary, Clare, Kerry and Limerick bordering the greater part of the Irish coast fields. These with the exception of a small field in the W. extending between Clew Bay and Killary Harbour in county Mayo, and small patches chiefly in counties Carman and Monaghan, are all situated considerably to the S. of the centre of the island. The succession of the strata is nearly the same as in England but the quality of the coal is generally of a very inferior description. One of the most valuable fields is that of Kilkenny where the coal is found in seven workable beds in the form of anthracite, and, in the best seams, so free from adulteration, that it contains from 94 to 96 per cent. of pure carbon. The largest field is in the S.W. where it occurs upon an extensive tract in the counties of Clare, Limerick, Kerry and Cork. It is worked to a considerable extent particularly on the N. bank of the Blackwater but the greater part of the output is culm or druse not well adapted for domestic use, and chiefly employed for melting and the burning of lime. The strata higher in the geological series than the coal, are very partially developed in Ireland. Tracts of marl and new red sandstone occur in Tyrone and Armagh and at the S. shore of Lough Neagh, and off the narrow belts enclosing parts of the county of Antrim. On the E. coast of the latter county strata still more recent appear and beds of lias, green sand, and chalk are exposed on the cliffs above the shore. The occasional appearance of the same strata inland, in the bottom of the valleys, leaves no doubt that they occupy a large extent of space, though the immense masses of basalt which overlie them, in some places to the depth of more than 500 ft. conceal them from the view. The nature of the coal of Ireland has already been referred to, and as the other minerals are not of so much importance as to require a separate consideration, it may be sufficient here to mention that the mountain limestone, which in England contains so many valuable mines of lead, appears to be here much less liberally supplied with that metal than the iron, which unquestionably exists in abundance in the coal measures, has not yet justified the attempts which have been made to work and smelt it, and that the output of copper which in 1856 exceeded £550,000 in value, had scarcely half that value in 1849. It should be remembered however that the minerals of Ireland have as yet been very imperfectly explored; and the probability that important discoveries still remain to be made, is strongly confirmed by the fact that the new red sand stone of Ireland, in which the existence of beds of salt had hitherto been rather suspected than known, has recently been found to contain them in such abundance as to promise great profitable supplies, rivaling those for which the same formation in England has so long been famous.

Agriculture.—We have already seen how favourable the climate of Ireland is to vegetation. Its mild temperature, and humid atmosphere, enable several delicate plants which usually in the same latitude can only be cultivated in sheltered gardens, to flourish here with vigor in the open air and not unfrequently forest trees continue to retain their foliage after they have lost it in the warmer parts of England. So far then as nature is concerned, no summary ought to be richer in forest resources than Ireland; and it would seem that, in early times, large tracts of magnificent timber were spread

over its surface, but the greatest waste and mismanagement have prevailed, true but almost disappeared everywhere except from the parts of the country and what ought to have been among the best is perhaps the worst wasted country in central Europe. The circumstances certainly advantage resulting from it is, that large tracts, which might have been otherwise occupied, now give employment to the plough or the spade and serve to swell the great amount of agricultural produce. Notwithstanding the great extent of her dismal moorland wastes, few countries have, in proportion to their area, raised more human food on an average of years, than Ireland. This is owing partly to the fertility of the soil, and partly to the mode of agriculture. After deducting moorland and moorland there remains a vast extent of arable surface covered with a deep friable loam of remarkable richness. Seldom so light as to degenerate into sand, or so heavy as to contain an undue mixture of stubborn and impervious clay, the soils of Ireland possess that happy medium texture which at once facilitates the operations of husbandry and insures it an abundant return. In addition to the vegetable mould, which forms one of their most important ingredients, they contain, generally either of the decomposed trap, or widely spread over the V of Ulster or of calcareous matters, derived from the limestones which prevail in almost every other quarter. Thus in point of staple they cannot be surpassed and justify the eulogium of Arber Young when he says they will fit the largest bullock, and at the same time do equally well for sheep for tillage, for turnips for wheat, for beans and, in a word for every crop and circumstance of profitable husbandry. In ascribing the vast amount of human food which Ireland has been accustomed to produce, partly to the mode of agriculture, it is not meant that there is anything in that mode to recommend it as a model. On the contrary there is perhaps no country in Europe where agriculture, so wide of it as a system, has made less progress. The holdings, originally too small to be occupied by farmers of capital and enterprise, have been allowed to become almost infinitesimally subdivided, until they have been reduced to the smallest parcels on the produce of which a family could manage to exist. The only question of importance with such owners is how to raise the largest quantity of human food for immediate use, and so it is easy to see that no crop of the temperate zone can compete with the potato that root became the great staple, and in many parts of the country nearly supplanted every other. And so long as it would grow it may almost seem to have justified the preference given to it, by furnishing food to so many millions, and at the same time allowing those whose holdings continued to retain the size of farms, to cultivate them on a regular rotation and even raise large quantities of produce for exportation. The fearful calamities which were the immediate result of the failure of the potato, began to be gradually compensated by the revolution in agriculture which it promises to produce. The holdings which had been frittered away will resume more than their original dimensions and, though the actual amount of human food raised may not be increased it will embrace all the ordinary cereals and auxiliary crops, instead of being confined to one favoured species, will be raised more skillfully and of course with greater profit. From the midlands of the winter and the humidity almost always prevalent, the rearing and feeding of cattle and sheep must necessarily form one of the most profitable branches of Irish husbandry. It has already attracted great attention, and is said to be making rapid progress. Of the other branches which have been more recently introduced, it may be sufficient to mention tobacco, beet, for the manufacture of sugar and flax. That the first two can be successfully grown has been proved, but that they can be grown to profit, in the face of tropical competition, is more than problematical; the best is far more hopeful, and the rapid extension of its culture (£8,514 ac. in 1849, £1,640 ac. in 1850; and 128,619 ac. in 1851) viewed in connection with that of the manufacture of which it furnishes the material, has already done much, and promises to do more for the prosperity of the country.

Manufactures and Trade.—The linen manufacture early took root in Ireland, and still continues to be its most important source of wealth in every article, except linen and woollen cloth, complete successfully with all other countries. In 1826, when the cotton trade ceased to give returns, the

export of linen from Ireland to Great Britain amounted to 83,687 678 yards and to foreign ports, 2,653,667 yards in all, 55,118,565 yards. A great increase has since taken place and, though the total amount can only be guessed at, it may be safely estimated at not less than 70 millions of yards. For a long time, all the yarn used was handspun, but the six-fifths which have been erected are so large and numerous, as not only to supply the home demand, but to spin large quantities of yarn for export. The principal seat of the linen manufacture is the province of Ulster and more especially the town of Belfast and the surrounding districts. Repeated attempts have been made to establish the cotton manufacture in Ireland, but the success hitherto has been very limited. It is admitted, however, that some of the finest specimens of calico prints in the London market are Irish. The woollen manufacture appears at the outset to have outstripped that of linen. It had at least made such progress as to alarm the woollen manufacturers of England who, in a spirit of petty jealousy, petitioned the English parliament for its discouragement, and what is still more astonishing succeeded. The Irish were prohibited from sending their woollens abroad and could not even send them into England without paying an oppressive duty. Had the manufacture been aided to the country it might have surmounted all this absurdity and injustice, and, at all events, when these ceased to operate would have revived. In regard to this manufacture, however England possesses facilities which seem to make competition almost hopeless and the woollens of Ireland continue to be of very secondary importance. A few broad-cloths are made in the county of Down and of Cork, Banalls in Wicklow and Blackrock in Kilkenny. The silk manufacture introduced into Dublin by French refugees, never took deep root, but has lingered on, and still employs a number of looms, chiefly on tabacots or Irish poplins. In 1850 the total number of mills in Ireland was 91 of which 11 were cotton 11 wool and 69 linen, employing an aggregate of 24,725 persons. An important source of female employment has, of late years, sprung up in the N. of Ireland, in the working of patterns on twines with the needle. About 800,000 persons are engaged in this branch of manufacture, working chiefly for Belfast and Glasgow houses, and the gross value of the goods made annually is estimated at £1,400,000.

The trade of Ireland is not at all proportioned to her natural capabilities, and to the admirable facilities afforded by the excellent harbours situated on her coasts. The most important article is raw produce the greater part of which finds its market in Great Britain. It consists chiefly of grain and four live stock, salt and fresh meat, eggs, butter &c. Manufactured articles, particularly linen rank next in importance but as the bulk of such articles is very small in comparison of their value, the trade, or at least the shipping connected with them, holds only a secondary place. The trade with foreign countries is also inconsiderable; unless we include in it as we perhaps ought to do the extraordinary demand for shipping which has recently arisen to transport the thousands and tens of thousands of voluntary exiles hastening to other lands in search of the employment and prosperity which by some strange fatality they have failed to obtain at home. The place which emigration holds merely as a branch of Irish trade, is strikingly manifested by the fact, that more than half of the whole correspondence which passes between the post-offices of America and the United Kingdom is connected with it. The principal imports are colonial produce, woollen and cotton goods cotton, wool, coals, and salt. Of the shipping employed in this trade only a mere fraction is Irish. The whole exports from Ireland to foreign parts in 1864 was in value £167,781 and the imports, £6,686,484. In the same year the number of vessels cleared from the colonies and foreign parts was 1679 (457,479 tons) and cleared, 856 (134,707 tons) entered, 25,289 (5,227,184 tons) cleared coastwise with cargoes, 13,205 (3,697,265 tons).

Means of Communication.—The excellent navigable channels furnished by the rivers of Ireland have already been referred to. In several of them however when the water was low the navigation became seriously impeded by rocky shoals. In removing them, or making artificial cuts for the purpose of avoiding them, vast sums have been expended. Improvements of equal importance have been made by the construction of canals. On them, chiefly the two millions

starting provided by Parliament for public works in Ireland, have been expended. The expenditure has not in all cases been judiciously made but, by means of the Grand and Royal Canals, a valuable communication has been given across the very centre of the island, between the coast of Limerick and the Shannon while a branch which opens into the Barrow continues the communication without interruption, to the E. coast. Similar benefits have been conferred on the province of Ulster by the Henry Canal which connects Lough Neagh with the Bay of Carrington and the Belfast Canal connecting the same lough with the Bay of Belfast, and the Ulster Canal recently completed, between Lough Neagh and Borne. This last canal though only 46 m. long, renders available a continuous navigation of 180 m., intersecting the country from E. to W. and passing through populous and fertile districts which, from the want of proper roads were previously obliged to convey their produce to market on the backs of horses. The railway system as compared with England has not yet received much development in Ireland. Numerous Acts have been obtained, which if carried into effect would give a network of railways traversing the country in all directions. The length actually completed in 1865 was above 1800 m. and 280 m. were then in course of construction.

Government, People, &c.—Ireland by the Act of Union became an integral part of the United Kingdom and shares in its legislation by means of representative Peers—26 temporal and four spiritual—in the House of Lords, and 105 representatives in the House of Commons. In the Lord Lieutenant, who represents the Sovereign, and holds his court in the castle of Dublin he possesses the insignia of an independent kingdom in a higher degree than Scotland but has far less of the reality being perfectly identified with England in respect both of law and of religious establishments. The condition of the latter is very anomalous. Its adherents form only a small fraction of the population, not much exceeding the Presbyterians (750 000 in number and falling very far short of that of the R. Catholics who though much fewer in proportion than they were when the union of 1841 was taken and rapidly decreasing, in consequence of emigration still form a very preponderating majority. The R. Catholics of Ireland are not like those of some countries on the continent, where a religious profession is regarded as a mere form and is not allowed to interfere with the common business of life. Believing their priests to possess all the powers to which they lay claim, they yield them implicit obedience and blindly obey their mandates. The priests thus possess a tremendous power capable of being wielded either for good or evil. The influence of the R. Catholic priesthood has, however, in some districts at least been of late years weakened in a very remarkable manner. Wrought upon in the first instance, by the superior attention and kindness of Protestant clergymen, missionaries and catechists during the famine resulting from the potato rot in 1846-7 and the awful visitation of cholera and fever which followed in its wake large bodies of the agricultural classes in the W. of Ireland have renounced Popery and embraced Protestantism. Much greater numbers than formerly are now under Protestant tuition and the Queen's colleges, recently instituted are well attended by R. Catholic students. Still secret associations are numerous, at whose instigation the lives of those who are presumed to have infringed upon certain rights claimed by portions of the agricultural classes are remorselessly sacrificed. Justice on such criminals can scarcely be executed from the difficulty experienced in procuring jurors that will convict, even upon palpable evidence. This state of matters contrasts sadly with the natural good qualities of the Irish. Though both indolent and feckle, they are warm-hearted, hospitable, generous, brave, and intemperate. Where their natural feelings have not been poisoned, deeds, even of heroic virtue, are as common among them, as among any people in the world and in the contest for fame what race can boast of having produced a nobler band of military heroes, statesmen orators, and poets? Great changes are now in progress not unaccompanied with the calamities which, in recent years have fallen upon Ireland from natural causes. Famine and disease have committed fearful havoc there, and the extensive emigration which has for years been going on, and still (1859) continues at an increased rate, bid fair to remove that hitherto most fruitful cause of misery and disturbance, over-population. Owing chiefly to

these causes, the 8,000 000 of souls which were returned by the census of 1841, and ought, by natural increase, to have amounted to 9 000 000 have dwindled away to 6 600 000. Small holdings will now be merged into farms of sufficient extent to attract capital and encourage enterprise and the minute subdivisions from which so much misery and crime have resulted will it is to be hoped gradually disappear. This important improvement has been greatly promoted by the Act for the Sale of Encumbered Estates. Property is now passing from the hands of the old possessors, who those of men who will turn its capabilities to better account and while equally determined to maintain its rights will, it is hoped prove less neglectful of its duties.

History.—The early accounts of Ireland do not cease to be fabulous till the 5th century when Christianity is supposed to have been introduced by St. Patrick, a native of Scotland. A school founded by him or his immediate successors at Armagh, sent out many eminent teachers, and became celebrated over Europe. At this time and for long after the island was shared by a number of petty sovereigns, who were almost always at war. In 1171 it was invaded by Henry II. of England, who conquered part of it, and received the nominal submission of almost all the chiefs, though they continued generally to exercise their former sovereign powers. The wars of the English, at home and in France, and their attempts upon the sovereignty of Scotland had long withdrawn their attention from Ireland but in 1495 the ascendancy of England was formally established and the Irish Parliament was prohibited both from meeting without license from the English crown, and even from discussing any bill without its sanction. This arrangement was loudly arraigned and a spirit of insubordination generally prevailed, but did not break out into open rebellion till the reign of Elizabeth. While the English and Scotch settlers had generally embraced the Reformation the native Irish continued their bigoted attachment to Rome. Spain took advantage of the storm, and sent O'Donnell a chief of great valour and extensive possessions into exile by securing him the support of a Spanish armament. He was completely defeated and ultimately obliged to save himself by flight to the continent. The tranquillity thus established, continued almost unbroken during the reign of James I. and the early part of that of Charles I. but on the breaking out of the civil war which terminated in the expulsion of the Stuarts the Irish espoused the royal cause, partly as a means of ultimately effecting their own independence, and on the prosecution of it were guilty of fearful atrocities. They were met in a similar spirit by Cromwell who beat down all opposition, spared no cruelty in order to effect his purposes and confiscated nearly four-fifths of the whole landed property bestowing it on his followers and adherents. English supremacy was now for the first time established in every part of the country and no attempt was made to dislodge it till 1688, when the futile attempt of James II. to retrieve his fortunes, was crushed by William III. at the battle of the Boyne. The only other events in Irish history which have since occurred and deserve notice, are the Union, enacted in 1709 and R. Catholic emancipation in 1829.—[Porter's *Progress of the Nation* *Thom's Irish Annals* *Montgomery's Ireland before and after the Union* *M. Cullough's Dramatic Papers* *Parl. Papers* &c.]

IRELAND (New) an Isl. S. Pacific, forming the N. E. side of St. George's Channel between lat. 5° 30' and 5° 22' S., lon. 150° 30' and 150° 50' E. It is about 200 m. long W. to E. E. by about 12 m. The highest peaks are the hills to a height of 1600 ft. to 2000 ft. and are clothed from base to summit with the most luxuriant forest. The indentations of the coast appear to offer several very snug bays and harbours. The lower tracts are well cultivated, produce sugar-cane, bananas coconuts, yams bamboos, and numerous other plants and trees. The inhabitants belong to the Australian negroes, and are remarkable for their excessive jealousy and the scrupulous cleanliness of their villages. Their canoes are neatly formed, but are generally lamp. Fancy words and twisted sentences—the latter of very negative quality—are as far as known the only articles of commercial value which the island produces.

IRELAND'S EYE, a rocky island, Irish Ben, 1 m. N. North harbour. It is about 1½ m. in diameter, rises to a considerable height, is composed chiefly of quartz rocks, and

presents a remarkable appearance from the coast. It contains the ruins of an abbey, has a martello tower and light-house.

TREN a river Russia, which flows into the Kama-Ussuri, gov. Tura. Flows generally N. W. and joins the bank Sibir, after a course of about 160 m.

IRETON River, par Eng Derby; 2290 m. Pop. 785. IRETHIZ, or Uro-Issura, a river Turkistan, Kirghiz-Shepe. It flows in Lake Chalkar lat. 51° 20' N lon 61° 25' E, runs S. and S. E. joins the Kara-Targhat and falls into Lake Akhsal or Akhsal [white water]. Total course about 800 m., through a sandy country interspersed with saline lakes.

IRGHEIZ, two rivers, Russia. — 1 (Jolof), is formed by the junction of the Kuznetsk and Kamaluk, in the N. E. of gov. Saratov. Flows very curiously W. S. W., and joins the bank Volga, opposite the town of Volgsk, after a course of nearly 130 m. — 2 (Malo) runs in the same gov. N. of the Botochigra, and flowing nearly parallel to it, joins the bank Volga, between the towns of Kvalinsk and Volgsk.

IRISH SEA, the sea, between Great Britain and Ireland N. of St. George's Channel, and S. of the N. Channel, 130 m N. E. and about 60 m. E. to W. It contains the lake of Anglesley and Man, and on its coasts are Larn, Moorehead, Duncraig, Cullinstown, and Dublin bays—the Solway Firth and the entrance of the Ribbles and Dee, &c.

IRKUT a river Siberia, gov Irkutsk, which issues from the foot of the mountains of Sayansk, near the frontiers of China. Flows first E., then N. E. and joins the bank Angara, at the town of Irkutsk, after a course of about 220 m.

IRKUTSK, a gov Siberia, between lat. 49° 40' and 52° 45' N and lon. 96° and 131° E, bounded N. and N. E. by gov Yakutsk, from which it is separated by the Lena and Vitim E. and S. China and W. by Yakutsk. length, E. to W., about 1100 m. breadth about 1000 m. area, 350,000 sq m. This vast surface is divided between three river-basins—the Amoor the smallest of the three, which drains the E. portion and carries its waters to the sea of Okhotsk; the Lena, in the N., which it drains in a great measure directly and by its tributary Vitim and the Yenisei, in the centre and W. receiving its waters through the Angara, supplied by numerous small streams, but more especially by Lake Baikal, which lies wholly within the government. The last two basins belong to the Arctic Ocean, and are separated from that of the Amoor by the mountains of Dourina, a ramification of the lofty Stan-norov and Jablonovsk ranges. The greater part of the government having a N. exposure, the climate is more severe than usual under the same latitude, and in winter mercury often freezes. The summer is of short duration though very warm; the air generally clear and serene. A great part of the surface is occupied by forests, which furnish excellent timber and abound with all kinds of game. The pastures maintain great numbers of cattle and sheep. The principal cultivated crops are rye and barley; hemp and flax also succeed well. There is not much fruit. Many indications of volcanic agency are discoverable, particularly in the N. of the government, and earthquakes are not unfrequent. In the plain along the Angara, below the town of Irkutsk, a fine-grained sandstone, of the carboniferous system, prevails and strata of pure coal 9 ft. thick, have been found in it. The mountains are generally granite. The minerals are very valuable and include gold, found chiefly in the lateral valleys which run from the central ridge of the Jablonovsk, silver lead, zinc, and iron. The principal mines are situated in the E. of the government, and are wrought, in the direction of the stock over an extent of 160 m. In working the tin, splendid cells of rock crystals, with green, yellow and blue amethysts, and with topazes, are found. Salt is found in great abundance in lakes and brackish springs, but is not turned to much account. Manufactures exist to a very limited extent, and consist chiefly of soap, leather and cloth. A considerable trade is carried on with China, through Khabarovsk and in fact, through Irkutsk, form the principal articles of export. A considerable proportion of the Russian inhabitants are descendants of exiles from the W.; but as the cause of exile was as frequently of a political as of a merely criminal nature, the morals are much purer than usual in penal settlements. The natives in greatest number are the Tungus, Mongols, and Buriats. The religion of the Greek church is generally professed, but many

continue addicted to the practices of Shamanism. For administrative purposes, the government is divided into six districts or circles, of which Irkutsk is the capital. P. 507,500.

IRKUTSK, a town, Siberia, gov of same name, in a plain 1287 ft. above the sea, on the right bank of the confluence of the Irkut and the Ushakovsk lat. 52° 13' 18" N; lon. 104° 36' 34" E (L.). It is divided into two parts by the Angara, which is here about 1000 ft. wide, surrounded by a wall and ditch, and well built, consisting of wooden houses, which are all neatly planked, and painted yellow or light grey; the streets, though not paved, have wooden paths for foot-passengers, and are kept in good order. One of the chief ornaments of the town is a noble quadrangular parade, one side of which is occupied by the residence of the governor and other public offices; and most of the houses have kitchen-gardens behind them. The principal buildings include a great number of churches, one of them a cathedral; two convents, a handsome exchange, built of stone, and surrounded by stately poplars and pines an admirably with dockyards on the Angara. The offices of the American company which would be considered sumptuous and ornamental in any town of Europe, a school of medicine, a grammar school, and several other schools, a public library of 6000 volumes, a mineralogical cabinet, two hospitals, a workhouse and houses of correction, and a large and well-arranged prison. The Gostinov Dvor or Bazaar supplied with articles of Chinese and European manufacture and in its vicinity are the markets, supplied with fish, flesh, meal, with its motley crowd of Buriats, Russian women, &c. The manufactures consist of woollen and linen cloth, hats, leather (saddlery and Morocco) soap, and glass. There are also several distilleries. The trade is in hay, tea and other articles imported from China, and more especially in fur for which the American Company have here large warehouses. Irkutsk is the seat of an archbishop and, being the residence of a governor is regarded as the capital of E. Siberia. The society of the upper class is quite European in its character but many persons belonging to it have the misfortune or stigma of being exiles. The inhabitants generally appear to be very comfortable. P. (1858) 14,454.

IRKINGLAND par Eng Norfolk. P. (1858) 714. Pop. 18.

IRKHAM par Eng Lincoln 6590 m. Pop. 849.

IRKHAM a village Holland prov Friesland 9 m S. Leeuwarden, on the canal leading thence to the Zuider Zee. It has a Calvinistic, a Baptist, and a R. Catholic church, and a school. Pop. (agriculturalists and cattle-rearers) 925.

IRON ACRES par Eng Gloucester 2227 m. P. 1265.

IROQUOIS, or SIX NATIONS, the name given by the French to the Indian confederacy of the Mohawks, Oneidas, Onondagas, Cayugas, and Senecas, afterwards joined by the Susquehanna, on the latter being driven from their hunting grounds in N. Carolina. This once formidable confederacy is now nearly extinguished but the remains of it are still scattered through the state of New York, subdued in spirit and debased by the use of intoxicating liquors.

IREPEN a river Russia, which rises in gov Kiev flows first E. then N. and joins the bank Dnieper 20 m. above the town of Kiev after a course of 100 m.

IRRAWADDI ISAWADDI or IRRAWADDY one of the great rivers of Asia, traversing the Burmese empire in its entire length. By some authorities it is held to be continuous with the Dmangro or great river of Tibet (though this is generally considered to be identical with the upper Brahmaputra) by others it is stated to rise near lat. 28° N lon 97° 30' E, contiguous to the E. extremity of Assam and the sources of the Lohit, one of the tributaries of the Brahmaputra, and in the absence of more complete information, we may assume that its origin is in E. Tibet, somewhere in the neighborhood of the above locality. It has generally a S. course, being deflected W. however both near Shamo and at Ava; and its total length has been estimated at 1200 m. At 50 m. below its supposed source, it has been found 80 yds in breadth at the dry season. Below this Kanton near the border of the Chinese province Yunnan, Amarapura, Ava, and Bhamo (which have successively been the capitals of Burmah), Yaddo, Pagan or Pagan-Maw, Patheingyi, Monywa, Prome, and, on branches of its delta, Bhamo, and Khatgong, are the chief places along its banks. At Yametho, about 90 m. below Ava, it receives its principal tributary the Kham-Suay or Kham-Suay river, from the N. Its other large affluents are

mostly from the E. At Yaden, above Ava, it suddenly contracts from a narrow greater width to less than 200 yds. across but from this point downwards to its delta it has generally a breadth of from 1 to 2 m. and during its foundation, from June to September, it is often 3 m. across the delta region, during the same period being like that of the Ganges, a vast watery expanse. Even so high as the delta of the Bhamo river, it has at that time a breadth of 1 m. About 140 m. from the Indian Ocean, which it enters by numerous mouths, the delta of the Irrawadi commences a wide interlacement of branches occupying the greater part of the kingdom of Pegu, and on the W and E arms of which the towns of Basala and Kanpoo are respectively situated. The current of the Irrawadi is commonly gentle—even in its upper part being no more than at the rate of 2 m. an hour—except during the foundations, when it flows so rapidly that no sailing vessels could navigate it but for the assistance of the S. W. monsoon. It is navigable from the sea upwards as far as Ava in all seasons, by vessels of 300 tons burden, and during the rains the same vessels may proceed as far as the mouth of the Mogoke river about 200 m. further up the stream. Canoes can reach with some difficulty as far as the delta of the river of Bhamo. Like the Nile, the Irrawadi is the main artery of the country through which it flows the principal population of the Burmese dominions being established along its banks. It is navigated by boats having a canoe-shape and a covered deck, manned by from 15 to 60 men, and impelled by various-shaped sails and by setting-poles.

IRRLICH, a vil Rhénish Prussia, gov. Coblenz, near Newwid, at the confluence of the Wied with the Rhine. It has a R. Catholic parish church. Pop. 1216.

IRRA, a vil Hungary, Magyar Danube, co. Pesth, 9 m. from Orszeg, with two churches. Pop. 1870.

IRTHING, a river England, rising in the hills which separate Northumberland from Cumberland and after a S. course of 26 m. during several of which it forms the boundary of the two counties falling into the Eden, near Newby.

IRTHINGTON, par Eng. Cumberland, 6050 ac. Pop. 1001.

IRTHLINGBOROUGH, par England Northampton.

8790 ac. Pop. 1577.

IRTIKH, a river Asia, which rises in the S. W. side of the Altai mountains, in the Chinese dominions near lat. 41° N. and lon. 98° E. flows first W. W. and by its extensive forks like Zalesan, leaving from the N. side of the lake it flows N. to the S. E. frontiers of Siberia, gov. Omsk, which it enters, and flows N. W. nearly parallel to its E. frontier part the towns of Ust Kamenogorsk, Semipalatinsk, and Omsk. A little beyond the last town it enters gov. Tobolsk, bends round in a N. direction, till it reaches Tara, whence it flows N. W. to the town of Tobolsk. Here it makes a sudden turn N. passes the towns of Denilansk and Denishkova, and finally joins 1 bank Obi, a little below Samara. Its whole course has been roughly estimated at about 1800 m. Its principal affluents are, on the r. the Ona Tara, Shakh Tan, and Demanka and on the l. the Turuk, Ocha, Ishim, Vagel Tobol and Kouda or Muma. A great part of its course is through low plains and steppes, and its navigation is rendered dangerous by shifting sands. It abounds with fish particularly sturgeons.

IRTON, par Eng. Cumberland 5370 ac. Pop. 572.

IRUBALA, a vil Spain Andalusia, prov. and 40 m. E. N. E. Jaen, poorly built, with narrow streets, an old castle on a height overlooking the town, a parish church, townhouse, prison and primary school, numerous oil and flour mills, and some trade in oil, corn, fruit, and cattle. Pop. 1140.

IRUN, a vil Spain prov. Guipuzcoa, near l. bank B. descoe, and the first town after passing the French frontier 11 m. E. R. Sebastian. It is built in the form of an amphitheatre but very irregularly has a fine church, courthouses, with an elegant hospital and an hospital, and manufactures of soap, leather and earthenware, brick and tile works, numerous mills, and a trade in wool and cattle. Iron existed in the time of the Romans. Its position has often exposed it to the ravages of war. Pop. 2599.

IRUPANA, a vil Bolivia, dep. La Paz, cap. prov. Yungas with a large and handsome church, many well-built houses, and presenting altogether an appearance of comfort and competency on the part of the inhabitants. In its vicinity are extensive gardens of fine orange-trees.

Vol. 2

IRVINE, a royal and paid bor. seaport, and market to Scotland, co. Ayr on a rising ground r. bank Irvine, an affluent of the Firth of Clyde, about $\frac{1}{2}$ m. from the estuary formed by its junction with the Garnock, 24 m. S. W. Glasgow on the railway to Ayr. It consists of one broad and spacious street, communicating with a suburb, on the l. bank of the Irvine, by a handsome stone bridge; houses in general well built and commodious. The town is lighted with gas, and well supplied with water. It has a handsome parish church, a chapel of ease, two Free and two U. Presbyterian churches and a Baptist chapel, the Irvine Academy—a large and elegant edifice—and several other schools, a handsome news-room, and a subscription library. Hand-sewing and the weaving of book-binding, muscets and checks, employ a majority of the working population. Ship-building, rope-making, tanning and leather-dressing are carried on to some extent. There are also manufactures of anchors and cables, a magnesia manufactory and several fine mills. The chief exports are coal, carpeting, tanned leather, rye-grass seed, tree plants, &c. principal imports—timber, grain, and butter. It unites with Ayr &c. in returning a member to the House of Commons. Area of par 4 m. by 2 m. Pop. 8719. P. bor. 7654.

IRVINESTOWN, a vil Ireland co. Fermanagh, about 95 m. N. W. Dublin with a parish church, two Methodist meeting-houses, a school, and a dispensary. Pop. 1008.

IRVILL, a river England co. Lancaster rising near Bacup, and after a circuitous S. course of 40 m. past Bury becomes navigable at Manchester and falls into the Mersey at Flixton, chief affluent the Moselock and Lirk.

IRA, two rivers, Russia.—1. Rises in gov. Pskov flows N. W. and joins the Mikhra 9 m. below Tiroch course about 70 m.—2. Issues from a small lake, gov. Viatka flows N. into gov. Fekov and joins the Volga; course about 65 m.

ISABA, a vil Spain, N. rivers prov. and 38 m. N. E. Pasa pelusa with a parish church, townhouse, prison, and school, manufactures of common woollens and combs a mill and two flour mills, and a trade in timber wool, cheese, and salt. P. 981.

ISABAL, or **ISABAL**.—1. A vil Central America, Guatemala, B. shore of lake Dulce lat. 15° 24' 30" N. lon. 89° 5' 53" W. consisting of a courthouses a few respectable dwellings, and about 40 huts.—2. A vil in 1st Old Providence, an insignificant place, though once important and populous.

ISABEL, (SANTA), a vil Brazil prov. Mato Grosso, on the Paraguayan one of the head streams of the Paraguay. It is the cap. of its district, consists of about 5000 scattered mud and straw huts, and is the centre of a trade in diamonds to a market there, every Saturday and Sunday the diamond seekers bring the produce of the week.—(Cottelma.)

ISABELLA, (CARA) a headland, Bothele Felix lat. 69° 28' N. lon. 98° 61' W.

ISABELLA, LA.—1. An isl. W. coast Mexico lat. 21° 45' N. lon. 106° W. frequented by sealers only. It is moderate height, and nearly barren. The beach is lined with rocks, and neither wood nor water are to be obtained.—2. A port, N. coast Isl. Hayti, 180 m. N. E. Port-Republicain where, in 1493 Columbus formed the first European settlement in the New World.

ISAC, a river France, formed by several small streams, above Blau in dep. Loire Inférieure flows W. past Hilaire and Germonet, and joins 1 bank Vieux, opposite to Bours course about 45 m. It is navigable for about 9 m. and feeds the canal which unites the Loire and Vilain.

ISAKTCHI, a vil European Turkey prov. Bulgaria, r. bank Danube, 26 m. S. E. Galatz, with a castle, several mosques, baths and some trade.

ISALCO, or **YALCO**, a vil Central America, state of and 40 m. W. by R. San Salvador. Near it is a volcano of same name. Pop. 4000.

ISAMAI, in Yacatan. See ISAMAL.

ISANOLZON, one of the straits uniting Behring's Sea and the Arctic Ocean. It separates the island of Oumsk in the Aleutian Archipelago, from the S. W. extremity of the peninsula of Alaska, in Russian America, lat. 55° N. and about 24 m. long by 9 m. broad.

ISAR, a river Germany which rises in the Tyrol, about 6 m. N. E. Innsbruck, enters Bavaria, flows N. W. past Munch to Freising where it turns abruptly E. N. E., passes the towns of Landshut and Landau, and joins r. bank Main, a little below Deggendorf. course about 190 m. Its principal

163

affluents are right, the Dorfan and Scept and, left, the
Leishach and Aunmer. The current is extremely rapid, but is
much used for floating timber.

ISAURA or **ISAONA**, an ancient in Asiatic Turkey 44 m. S. by Konya, 37° 10' N. long, 33° 30' E. built on the highest point of a high range of hills, and surrounded by a high wall, with lofty battlements, beautifully constructed, and of a very peculiar style of architecture. The buildings within the walls are all in the same style, consisting of alternate courses of very thick and very thin blocks of marble. Amongst them is a handsome triumphal arch with a Greek inscription. Outside the walls are many tombs, some of which are excavated in the rock.

ISPAETA a in Anatolia (Turkey) poph. Attolia, 64 m.
N. Adalia, picturesquely situated at the foot of a steep and
lofty chain of wooded mountains. It is half-enclosed amidst
orchards and gardens, and is better built than most other
towns in this part of the country

ISCHAN a vil Central Asia, khusat of, and 24 m E. Khiva, on the canal of Esharschori with two weekly markets inhabitants. Sarts and Uzbeks.

ISCHEL, or **Isert**, a market tn. and watering-place Upper Austria, east of and on both sides of the river Traun 50 m. S.W. Linz. It has a handsome parish church a small castle, an hospital and vapour and mud baths, the materials for which are derived from a salt-mine about 3 m. S.E. of the town, which has been worked to a large extent by adits leading into the heart of the mountain. Pop. 1930

18. S. L. H. (Paris). 1. top 12.5
in the Mediterranean, in the mountains of 17 W. Naples in E. (Point 40° 43' 54" N. km 18 57 45° E. (E. 1) is of alluvial slope, 7 to 10 m and 4 m. broad area, 26 m. x 1 m. Near its centre in Mount San Nicola or Epomone, an extinct volcano, of irregular conical shape rising about 2600 m. from which the surface gradually slopes in all directions towards the sea. The volcanic orogen of the whole island indeed, is clearly indicated by the shape of its mountains, the fumaroles and the steam in the mountain-sides, the deep ravines across the plains the lava heaped upon lava, tracts covered with tuff and lapilli, gray ashes and sulphur as well as by the smokes, steam and hot mineral waters that gush out from every crevice. The surface is fit for cultivation, it exhibits the highest degree of fertility, the vine, the olive, the fig, the almond, the orange, the lemon, the pomegranate vineyard, producing an excellent white wine, plantations of olive, orchards, and gardens abounding with oranges, citrons, melons, and other fruits of E. Europe. Fields of Indian corn and cotton, groves of the chestnut and Jex as well as hedges of alons, myrtles, and other sweet-smelling shrubs variegates the surface, and clothe the slopes with which the island abounds. Sulphur and other useful minerals are abundant, and are exported in considerable quantities. The manufactures of straw hats, leather and earthenware are carried on to some extent and the beautiful porcel and mottled lavers are turned and made into various ornaments, for exportation to the islands of the Aegean and the coast of Asia Minor. The principal towns are Iolida the capital, and Formia. Besides which, eight villages are scattered up and down the island. P. 24.000.

ISCHIA, a tn Naples, rap. above isl on its E. side facing the bay of Naples. It stands in a pretty little bay opposite to the islet of Vivara, and is overlooked by a picturesquely placed old castle, has white houses, and is the residence of a bishop. The inhabitants are partly fishermen partly vine-growers. Pop. 8600.

ISCHIM a *tu*. Siberia, gov. of, and 160 m. S. E. Tobolsk, cap. circle, and on a river of same name with church. Pop. (1847) 2067.—The *circle*, in the S. of the gov., consists of extensive steppes, has numerous small lakes and rears great numbers of cattle. Pop. 128,000.

ISCHITELLA a market tn. Naples, prov. Capitanata
86 m. N.E. Foggia, on a lofty hill with a church and convent
pop. 8000.

ISFLÖR) a bay Denmark, in the N of mt. Seeland
It penetrates about 20 m. inland, forming two inlets

...one of which opens S.E. and another W. The latter

by for the larger bay, near the Island Oute a breadth of about 9 m. but, E and W of it, divides into a number of small arms; the Edmunderford on the N W., Lammedford on the W. Holbekford on the S. W. and Asgerford on the S. This W principal branch has a depth of 4 to 6 fathoms and contains several good havens. The E. branch forms the long, narrow and shallow fiord of Roskilde.

ISRELL, per Eng Cumberland; \$760 ac. P 556.

ISRELL, per Eng Cumberland; \$760 ac. P 556.

ISLEBURG a vil. Prussia, gov of and 7 m. N N.E. Coblenz, with a church, and a saw oil and other mills. Near it are the ruins of the old castle of Isenbourg. Pop. 535.

ISEK, a river Austria, which rises in the N of Bohemia.

ISEL, a river Austria, which rises in the N of Bohemia, in the S side of the Riesengebirge, flows SSW past the towns of Mühlschlag and Burslau, and, after a course of nearly 60 m joins r bank Elbe, above Brandels. Fine chalcocites are found among its pebbles.

ISERE, a river of Europe, rises in the Sarclanian dominions, in the W side of the Jura. It crosses Savoy in an irregular W course, passing St Maurice and L'Hopital, enters France by dep. Isere, to which it gives its name, and which it crosses in an irregular WSW course, passing Grenoble after which, traversing the N part of dep. Drome, it joins bank Rhone 5 m above Valence. Its chief affluents are, in Savoy the Arly and Aye and, in France, the Ouse, Drac, and Bourne. Whole course, about 190 m, of which nearly 88, beginning at the Sarclanian frontier are navigable but very subject to inundations. In general its channel is narrow but its water is deep.

in the SE. The climate is a steppe, dominated N and W by the Rhone, which separates it from the former direction from the Alps, and in the latter from the Alps Rhone and Lake S. by the Dept. Drome and Haute-Alpes, and E. and N. by Savoy itself. 44° 44' to 45° 52' N. 6° 10' to 6° 20' E. Its coastline is formed by a remarkable succession of waving curves, the greatest length N.W. to the S.E. 97 km. central breadth, 40 km. area, 3195 sq. km. The surface is generally mountainous, and more especially in the S.E. where it is covered by ramifications of the Alps. At least 30 well-defined mountains are 1700 m. high. The culminating point, Le Grand Pelvane, is 1958 m. high. Between the mountain-ranges are numerous gorges and deep valleys, of more or less width, but there are no proper plains, except in the N. and near the centre, where there is the Lake de St. André, and of Billve near the latter. The climate is great, part of the year is under the influence of the Mediterranean, and the heat of the Rhone, which drains the Grand part of it directly. The only other important river is the Isère, which traverses it unceasingly in a W. S.W. direction, and is augmented within it by numerous small tributaries. Notwithstanding the mountainous nature of the surface, of which part is beyond the limits of vegetation and much is unfit for anything but pasture considerably more than one-third of the whole is arable, and a considerable portion is in vineyards. About one-fifth is under wood. The soil, wherever available, is generally of great fertility and the corn raised more than meets the home consumption. All the cereals and leguminous crops together with maize and potatoes are abundant. Medicinal plants are extensively grown and fruit of various sorts is excellent in quality and in quantity also accumulated. The produce of the vineyards amounts to about 94 388 pipes, of which one-half is exported as wine of the Rhone, the other half is for the French market. The olive is raised to a great extent, especially in the hot and beautiful valleys of Gressivaud in the vicinity of Grenoble, and large quantities of the finest oil are obtained. The minerals are of considerable importance, including a little gold and silver

once worked in mines, now abandoned lead, copper and iron. A coal field is worked to some extent; and there are some valuable quarries of marble, slate, granite and porphyry. The manufactures are mill-dress, coarse woollens, ordinary and table linen, gloves, tanned leather, cotton goods and chemical products. The two mines employ a number of blast furnaces and the iron is extensively manufactured, and used as castings. There are also numerous paper mills, and cotton mills. The trade is chiefly in corn, wine, liquors, turpentine, wool hemp cheese, nut-oil, metals skins leather silk &c. For administrative purposes the department is divided into four arrondissements—Granoble, the capital. St. Marcelle La Tour-de-Pin, and Vienne subdivided into 45 cantons and 522 communes. Pop. 569,492.

ISERLOHN a to Rhodis Prussia, gov and 15 m. W. Aachen esp circle of same name, on the Rhenish. It is walled; has four gates several public offices, five churches and chapels, a courthouse Latin school poorhouse, and orphan hospital and manufactures of various articles of velvet in brass, bronze, and iron, cutlery woollen and silk goods, ribbons, and leather bookbinds, also and from furnaces rolling, paper and other mills. Near it is an iron works, commensurate of the Zollverein of Germany from Napoleon's domination. P. 10,752. Area of circle, 95 sq. m. P. 35,889.

ISERNIA [Latin, *Aterno*] a to Naples prov. Benevento, esp. dist. of same name, on a spur of the Apennines 23 m. W. Campobasso. It is one of the most ancient towns in the kingdom. The site of a bishop has a court of justice a fine cathedral. In a great measure destroyed by the earthquake of 1805 many remains of antiquity particularly a splendid aqueduct, and which led across a hill and supplies several fountains and public works. The chief manufactures are blotting-paper and hydraulic machinery. Pop. 4,554. dist. 91,920.

ISERTKILLY par Irrel Galway 1894 sq. P. 129. **ISERTKILLYPRAA** par Irrel Tipperary 1420 sq. P. 533. **ISHT** a river Amazon Russia, which issues from a small lake in gov Perm E side the Ural mountains about 2 m. W. Ekaterinburg flows S. e. past the towns of Dolmatov and Shadrinsk then turns N. E. enters gov Tobolsk, and joins I bank Tobol after a course of about 280 m. Principal affluents are the Sura, Tura, and Irtys.

ISHTI D par East Sussex 1862 sq. P. 508.

ISHAM par Eng. Northampton 1160 sq. P. 291.

ISHIM, a river Asiatic Russia, which rises in a mountainous district, near the centre of gov Omsk lat. 51° N. lon. 74° E. flows first W. then circuitously N. N. E. into gov Tobolsk passes the town of Izhim and joins I bank Irtysh after a direct course N. W. of 480 m. and an indirect course of at least 800 m. generally through extensive and almost sterile steppes. Some Russian villages are situated in the lower part of it, but the upper is occupied chiefly by Kirghis. Its principal affluents are, on the r. the Kalaton Aghezar and Aghe-Berik and on the l. the Nura and Tereken.

ISHMAEL (St. two para Wales)—I Carnarvon 8061 sq. Pop. 968—2 Pembroke 4167 sq. Pop. 528.

ISHNY a report to. France dep. Calvados, 85 m. W. N. W. Océan near the mouth of the Vire and Lower Aure with a court of commerce and custom-house. Its port admits vessels of 100 tons to 120 tons. Its staple is salt-butter of which 100,000 tons, yielding 260,000 are exported annually. It has also a trade in dried clover-seed beans, yellow wax, goose tallow and down feathers catkins, sheep and wool. P. 1698.

ISILLI, a to Val Scellina, div of 85 m. N. by W. Cagliari esp prov. of same name, at the S. extremity of the elevated plate of Sardinia, about 1500 ft. above the sea houses generally built of stone streets irregular but mostly spacious. It has a principal and some minor churches, two schools manufactures of woollen table and bed covers, and various linen articles and a trade in some cattle dairy produce, chestnuts, figs, and other fruits. Pop. 1196. The river *Yiron* m. for the most part, covered by the mountains of Barbagia. In several quarters, however are plains of considerable extent, and remarkable fertility. The streams are numerous but individually of little importance. The minerals include lignite, steatite, white clay used in whitewashing the houses and galeolony, and fine rock-crystals. Grains beans and flax, are the most extensively grown. A considerable space is occupied by vineyards, which, in the warmer spots

yield a wine of excellent quality. For administrative purposes the province is divided into seven districts, subdivided into 51 communes. The judicial divisions is into 3 *profezioni*, which has its seat at Isili, the capital, and comprehends also many *comuni*. Area, 566 sq. m. P. 46,866.

ISIRI, a river, England. See *Thames*.

ISJUM a to Russia. See *India*.

ISKARDO or **ISKARDON**—1. A name given to Buld—*(Iskard)* and—2. (Or *Bauzt*) a to Central Asia, esp. Buld, on a rock in the valley and on I bank Upper India, have 150 yds. wide, 8300 ft. above the sea lat. 35° 10' N. lon. 76° 27' E.; consisting of a collection of 150 straggling houses, overlooked by a large irregular fortress, built on a high precipitous granite rock, 7100 ft. above the sea.

ISKELIB [commonly pronounced, *Iskelep*] a to Asiatic Turkey pash. Anatolia, 108 m. N. E. Angora lat. 40° 40' N. lon. 34° 55' E. houses of two stories, with tiled roofs. It has several mosques and an old, irregular dilapidated castle or hill fort, perched upon a singularly bold and naked limestone rock. Hard by are several sepulchral caverns, two of which are ornamented with sculptures. Pop. 9000.

ISKENDERHOUN a to Syria. See *Alexandria*.

ISKER a river European Turkey Bulgaria, having its sources in the mountain range which form the S. and W. boundaries of that province. It flows in a general N. direction but with many wide deviations, and falls into the Danube 22 m. W. Nicopol. Entire course about 140 m.

ISKIL [anc. *Tattine*] a to Asiatic Turkey pash. Karamania, near the S. W. extremity of the Salt Lake, Touz Ghuel 83 m. N. E. Konia lat. 38° 27' N. lon. 35° 51' E. It consists of about 400 houses.

ISLA a river Scotland rising in the mountains at the head of Glenisla, Forfarshire and after a course chiefly S., of about 40 m. falling into the Tay nearly opposite Kinlavin Perthshire. It is famed for its trout and salmon.

ISLA COSTIDA [formerly *Real Isla de la Figueira*] a vil Spain Andalusia, prov. and 18 m. W. Huelva, near the mouth of the L. branch of the Guadiana. It has a small square, tolerably regular and well-cleaned streets a parish church, and four schools a productive sardine fishery a small harbor, and some trade in sardines, figs and casks. Pop. 1864.

ISLAMABAD a to Cashmere and its importance to the capital, and 25 m. S. E. Srinagar r. back Jialum or Behat, at the foot of some steep heights lat. 33° 43' N. lon. 75° 10' E. It consisted a few years ago, of from 6000 to 8000 houses and is built in a style exactly similar to that of Sarnagar but it has no edifice of much importance and is filthy and crowded with mendicants and unemployed artisans. Its environs are agreeable, and watered by a profusion of springs and here is a spacious reservoir swarming with fish, which are held sacred by the Brahmans. About 860 shawl looms make common shawls for export to Hindoostan produce estimated at £200 monthly some manufactures of printed cottons, and of carpets, in imitation of those of Persia, are also carried on for exportation to the Punjab and the rest of India. Around it are numerous gardens and plantations, in which large quantities of tobacco are raised.—*Jaqueson, Voyages dans l'Inde, &c.*

ISLAMABAD or **CHITTAGONG** a to British India, pres. Bengal esp. dist. Chittagong on the Chittagong river 5 m. from its mouth, in the Bay of Bengal 823 m. E. Calcutta lat. 23° 30' N. lon. 91° 50' 36' E. (l.). The streets are kept in good order and the houses abundantly supplied with foreign and domestic produce of every description. It is the seat of a court of justice, and a place of great commercial activity. Ship-building and the manufacture of a sort of canvas from cotton, are both carried on to a considerable extent. About 800 vessels of from 40 to 100 tons belong to the port and it is also resorted to by many vessels from other places, including boats from the Maldiva Islands, which bring tortoise-shells, corals, and coco-nuts, in exchange for rice and small manufactures. The principal exports are rice and salt. Pop. 15,000.

ISLAMNAGUR, or **ISLAMNAGUR**, a to Hindoostan, on the Betwah, a tributary of the Jumna, dominions, and 5 m. N. Bhopali lat. 23° 24' N. lon. 77° 30' E. By its situation it is one of the strongest military posts in Hindoostan, standing surrounded on three sides by rivers and on the fourth by a moat.

ISLANDPOOR, several places, Hindoostan particularly—
1 A to. Ajmer 105 m W.S.W. Delhi lat. 28° 5' N lon. 75° 40' E.—2 A to. pond, prov. and 20 m W by S. Bahar on an affluent of the Ganges.—Other places of the same name are of little importance.

ISLAND, *Isle* Cork 2617 sq. Pop. 818
ISLANDBRIDGE, a vil. Ireland, co. Dublin, r. bank of the river Liffey, crossed by a fine bridge, of one elliptical arch, 2 m. W. Dublin castle. It has many respectable buildings, and art. they barracks, with an hospital. Pop. 617

ISLANDHEADY par. Ireland Mayo; 28704 ac. P. 4699
ISLANDKANE par. Ireland Waterford 4538 ac. P. 1188

ISLANDMAGILL par. Ireland Antrim; 703 ac. P. 12704

ISLAND (RAY or), a large bay, British America, formed by the Gulf of St. Lawrence on the E. coast of Newfoundland N. St. George's Bay lat. 49° 20' N lon. 56° 15' W. It is about 18 m. N. to S., and about as much E. to W. It receives on the S.E. the Hamlet and empties a great number of small streams. See also **RAY OF ISLAND**.

ISLANDSEIRE, a detached portion of co. Durham England, between co. Northumberland and Newcastle and including Holy Island Area, 23,771 ac. Pop. 3796.

ISLAY an isl. Scotland, co. Argyll, W. coast, one of the larger of the inner Hebrides, immediately S.W. of Jura, from which it is separated by a narrow channel, called the 4000 of Islay and 11 m. W. the peninsula of Kintyre. It is 25 m. long by 17 m. broad area, 154,000 ac. Rhinos. at its extreme S.W. point, is lat. 56° 40' N lon. 6° 33' W. It has somewhat the form of an untorted heart—the head and being largely excavated by the arm of the sea called Lochindaun 12 m. long by 6 m. broad but with this exception and those of Loch Grannat, on the N.W. coast and London a Bay on the S.E. the sea-line is not marked by any very deep indentations, although small bays are sufficiently numerous. Many parts of the coast are bold and rocky and some portions are lined with high perpendicular cliffs. The island is generally hilly particularly in the N and E, although it nowhere presents any great elevations the highest summit not exceeding 1400 ft. to 1800 ft. above sea-level. There is, however, a very considerable extent of level ground for the most part fertile and well cultivated. The island is chiefly composed of clay slate, chlorite slate, and some more clay, quartz, various shales of Gault and lower lias, and also greywacke and limestone the latter is but in small quantity and underpinned between laminae of slate-rocks. Lead, iron and copper ore, manganese and cobalt, occur but none of them are wrought. The climate is mild but humid. Agriculture has greatly improved of late years, and abundant crops of wheat, barley, oats, pease, flax, and potatoes, are raised. Cattle and horses, both of which are considered to be of a superior description, great attention being paid to their improvement, are bred in large numbers but whisky is the staple production, 350,000 gallons being distilled annually and exported chiefly to Glasgow. The other exports are cattle, oats, and linseed. The coast is abounded with fish of various kinds. Islay was anciently the principal residence of the Lords of the Isles whose pomp and power is attested by numerous ruins of castles, forts, and chapels. Pop. 15,161

ISLAY a seaport, Peru. See **ISLAY**

ISLAY, two par. England, co. Somerset—1 (Abbot's) 1035 ac. Pop. 437—2 (Glover's) 1248 ac. Pop. 860

ISLE (Latin, Insula), a river France, which rises in the S.W. of dep. Haute-Vienne, flows S.W. across dep. Dordogne, enters dep. Gironde, and joins r. bank Dordogne at Libourne; total course about 160 m. Perigord, 90 m. from its mouth and where it begins to be navigable, is the chief town on its banks. It receives the Haute-Vienne and the Dronne.

ISLE (I) A in France, dep. Vendee, 12 m. E. Avignon, in the centre of an island formed by the windings of the Forgue. It has a fine church, and manufactures of linen, hats, worsted and silk, thread, and tanned hides. Pop. 4797
ISLE-ET-OTTE, an isl. Lower Canada, 2 m. from N. shore of the St. Lawrence 57 m. N.E. Quebec, about 15 m. in circumference, extremely fertile and well cultivated.

ISLE D'ALAN (L) A in France, dep. and r. bank Tarn 19 m. N.W. Albi. It consists principally of one long street, traversed by the high road to Albi, and a spacious square, adorned with a handsome fountain. Pop. 1790.

ISLE-DE-FRANCE, an anc. prov. France, now included in depts. Oise-Saine, Seine-et-Oise, Seine-et-Marne, and Aisne. Paris was its capital. It was bounded, N. by Picardy E. Champagne, E. the Oise, and S. the Marne and Normandy.

ISLE DEU (L) an isl. France, dep. and about 14 m. W. the coast of Vendée. It consists of a large mass of granite, covered with a vegetable mould which, though of some depth near the shore, gradually thins away in the ascent, till nothing but the bare rock appears. About one-half of the whole surface is under cultivation which is conducted by the women alone; all the men being sailors or fishermen. The island is defended by a fort and several batteries and the harbour called Port Breton, on the E. side, admits vessels of 150 to 200 tons, and is much used for refuge. Area, about 6 sq. m. Pop. 744, 1848 44, 8492.

ISLE-DE-JOUE an anc. France, dep. Gers, 25 m. E. Auch r. bank Save. It was formerly a place of strength, is clean well and regularly built, has a good public square, handsome church, convenient market-places, manufactures of leather and brick and tile works. Pop. 1969

ISLE OF FRANCE Indian Ocean. See **MAURITIUS**.

ISLE OF PINKS. See **PINKS**.

ISLE OF RHODE, a group of eight islets U. States, New Hampshire and Maine in the Atlantic, 13 m. S.E. Portsmouth chiefly inhabited by fishermen.

ISLE OF WIGHT See **WIGHT (ISLE OF)**.

ISLE ROYAL, an isl. British America, Lake Superior intersected by lat. 48° N. Length 35 m. breadth 10 m.

ISLEHAM par. Eng. Cambridge 5211 ac. P. 1238.

ISLEWORTH a vil. and par. England, co. Middlesex, delightfully situated 1 bank Thames. The village consists of one principal street, well lighted with gas houses in general well built; has a neat church several dissenting chapels, and several charitable institutions, including various schools and almshouses. Area of par. 8129 ac. P. 7007

ISLINGTON a vil. and par. England, co. Middlesex, border Finsbury. The village, formerly called Isledon, forms now one of the N. suburbs of London. It contains many fine ranges of houses and pleasant villas, is well paved lighted with gas, and amply supplied with water. It has a literary and scientific society a college for independent ministers, a Church of England missionary institution and numerous schools and charities. The trade of the place principally consists in supplying the wants of the inhabitants, a few manufacturers afford employment to a part of the population. Area of par. 3127 ac. Pop. 65,472

ISLIP two par. England—1 Northampton 1870 ac. Pop. 594—2 Oxford 1960 ac. Pop. 744.

ISLUGA, a tn. or vil. and volcano, in S. Peru, prov. Tarma, about lat. 18° 12' S. lon. 68° 50' W. The town the largest in this part of the Cordillera is 13,000 to 14,000 ft. above sea-level.—The volcano is about 4 m. N.W. the town, is estimated at from 17,000 to 18,000 ft. high it is not of very recent form. In winter when visited by Bolívar, it was thickly covered with snow even to its base. During summer, sulphur is collected about the craters. Loud rumbling noises are heard in its vicinity and earthquakes are often experienced.—(See *Rev. Gen. Soc.*)

ISMAIL, a tn. Russia, prov. Bessarabia, 1 bank of arm of the Danube called Killa, a little above its mouth 120 m. S.W. Odessa. It is strongly fortified and, being near the Turkish frontier forms an important military station. It contains a magnificent palace, a Greek and Armenian church, and a cloister. The harbour is good but its commerce is very limited. It was long in possession of the Turks. The Russians, under Suwarow took it by assault in 1790, gave it up to pillage, and made it a heap of ashes. It has never recovered. Pop. (1842) 24,348.

ISMID or **ISMIR** [anc. *Nicozema*] a seaport in Asiatic Turkey 50 m. S.E. Constantinople, on the acclivity of a hill rising from an inlet of the Sea of Marmara, called the Gulf of Ismid [anc. *Nicozema*]. lat. 40° 45' 30" N lon. 30° 2' E. It contains about 1000 houses; 900 of which belong to Greeks, and the remainder to Turks. The trade of the town is still considerable.

ISNALLIOZ, or **ISNALLIOZ**, a tn. Spain, Andalusia, prov. of, and 16 m. N.E. Granada, on the top of a hill. It consists of indifferent houses, huddled together without any order; and has two squares, an ancient but handsome park

church, elementary school, the ruins of an old castle, flour mill, and a trade in agricultural produce. Pop. 3775.

IBNIK [English *Nice* Latin, *Nicea*] a to. Asiae Turcae 65 m. S.E. Constantinople, at the E extremity of lake of same name. It is now a miserable village of 180 houses, though once the capital of Bithynia. It was the seat of two celebrated Councils, in 325 and 787.—The **LAKES** (see *Acconus*) is about 20 m long E. to W. by 6 m. broad.

IBOLA [Latin, *Albona*] a market to. Dlyria, Istria, on a rocky eminence above the S.E. shore of the gulf of, and 10 m. S.W. Trieste with a parish church, an elementary school, sulphur springs, with a bathing establishment, which is much frequented and a trade in wine. Pop. 3480

IBOLA several places, Italy Piedmont, particularly—1 [Latin, *Isola delatensis*] A vil and com. div Alessandria, 7 m S Asi with a parish church, a communal school the remains of an old castle finely situated on a height, and a trade in corn wine, and cattle. Pop. 1800—2 [Isola del Canotto] div of, and about 18 m from Genoa in a plain near the Riviera. It has an ancient parish church, of unpretending appearance several palaces and the remains of an old castle, a considerable trade in grain fruit, bark for tanning and charcoal and two celebrated annual fairs Pop. 3100—3, [Isola di St. Antonio] A vil and com. div Novara, near I lake del Cairo, with a parish church, a primary school and a trade in grain cattle silk, and wool Pop. 1161

IBOLA, two places, France dep Alpes Maritimes—1 [Latin, *Isula, Nicomensis*] 31 m. N by W Nice, r bank. Times with a parish church communal school, and a trade in wool and dairy produce. In the vicinity there are several remains of iron not worked but apparently of excellent quality Pop. 1125—2 [Isola Bianca] about 12 m from St. Remo, with four churches the remains of an old feudal castle, a sulphurous spring and a trade in oil Pop. 818

IBOI A [Belle, Madre, and Superiori] See BORNOW MEAN LAKES.

IBOLA two toas. Naples—1 A walled to. prov Calabria Ultra lit. dist. of, and 8 m. S. Cotrona, at the foot of Mount Stella. Pop. 1991—2 A to and com. prov Terrad Lavoura 5 m S.S.W. Sora, 1 bank Liri which divides a little above the town and forms an island Pop. 4000

IBOLA DUT-GHELLO an isl. and to. Tusany in the Mediterranean, prov Grosseto, 18 m W.S.W. Orbetello The island—lat 42 19' N lon. 10° 56' E (n.) area, 8 sq m.—is of irregular form rocky and contains several quarries of excellent granite the working of which employs a large proportion of its population.—The **ROVER**, situated on a sort of promontory on the S. side of the island is tolerably well built, has a church, hospital and municipal offices Trade

exports of granite wine, and fish imports of grain agricultural implements &c. Pop. 1889.

IBOLA DELLA SCALA a to. and par. American Italy gov Venetia, deleg. of, and 11 m. S. Verona, on the Tivertio. It is well built, has a handsome Gothic church, and a castle, and carries on a good general trade. Pop. 3400.

IBOLA DOVARENE, a vil. and com. Italy Lombardy dist. of, and 4 m N.W. Cuneo, r bank Ohio. It contains a parish church and chapel, and has manufatures of hats, and a trade in corn and flax Pop. 2195

IBOLA GRACIA or **LIBRA**, an isl. Austria in the Adriatic, off the coast of Dalmatia circle of, and about 12 m S.W. Zara. It forms a long irregular belt, stretching S.E. to N.W. 24 m with a breadth nowhere exceeding 8 m and diminishing near its centre to 1 m. A mountain-ridge runs along its whole length and generally fertile, producing chiefly olives, grapes, and figs. Fish abound along the shores, and there are several salt springs but good fresh water is scarce. It contains 13 villages the principal of which Sala, has a tolerable harbour sheltered by some rocks. P. 13 000.

IBONZO or **LOBOZO** [Latin *Somus*, a river Dlyria, which rises in the Julian Alps, on the confines of Carnuthia has a winding S course passes Sagra, St. Lucia, Goriola, and Gradiska, and falls into the gulf of Trieste, at Porto Tinsaro, where it forms several lagoons. Total course, direct distance, about 45 m including windings it cannot be less than 70 m

IBORLELLA a vil. and com. Italy Lombardy prov Brescia, dist. of, and 8 m. S. E. Leno on a canal in a plain between the Melia and Chiese. It has a parish and an auxiliary church and a trade in corn wine, and silk. Pop. 1333

IBAPAHAN **IBAPAH** or **IBAPAH** [anc. *Apollonia*] a large city formerly the metropolis of Persia, prov Irak Ajeon on the Zendarood, 310 m S. Teheran lat. 29 39' 34" N, and lon 51 44 46" E (n.) in the midst of an extensive plain, watered by a broad river. It is surrounded by groves and orchards and was formerly surrounded by a mud wall 94 m in circuit, which was entirely destroyed by the Afghans The streets are for the most part narrow dirty and extremely dull There are extensive remains of magnificent palaces, large private houses spacious caravanserais, and handsome bazars most of which however are in a state of melancholy decay houses, bazars, mosques, palaces, whole streets are to be seen in total abandonment; and one may ride for miles without meeting any living creature except perhaps a solitary jackal peeping over a wall or a fox running to his hole. The N and E. portions of the city are, however less deserted than the S. and W. Three handsome bridges communicate with the suburbs, Julia and Abbasabad that of Julia is especially remarkable It has 88 arches and

JULFA BELIDGE, IBAPAHAN—From Persia. Voyage en Perse

on either side, instead of a parapet, a gallery extends from end to end, composed of 70 arcades, between which is the pathway Here and there the arcades are open, admitting to a second gallery which opens out on the river along the whole length of the bridge. On either side of the river is a spacious park, called the *Cheker-Bagh* or *Four Gardens*, a superb avenue 8000 paces long, and 70 paces in breadth,

planted with double rows of the lofty aliburns, and flanked by several picturesque gardens and private palaces. The chief square of Iapahan is the *Maidan Shah*, which was formerly surrounded by bany shops, and regarded as one of its greatest ornaments. It is about 2600 ft. long and 700 ft. broad. Of the seven palaces in Iapahan, that of the *Cheker-Shah* or *Palace of Forty Pillars*, built by Abbas the Great, is the finest.

It stands in a very large square, which is intersected by various canals, and especially planned with chestnut trees. The entire front is open to the garden the roof being sustained by a double range of columns, ascending 40 ft. in height and each shooting up from the arched backs of four lions, of whose marble shafts the columns rising from these extraordinary bases being covered with arabesque patterns, and the ceiling is decorated in a similar style. In the time of Chardin Isfahan comprised 163 mosques and 49 colleges, most of which are still standing though more or less in decay. Of these, by far the largest and most magnificent is the Masjid Shah situated in the Maidan Shah. The entrance to it is by a lofty portico flanked on each side by a tall minaret, crowned by an open gallery at the top the body of the edifice is terminated by a vast dome, accounted one of the best specimens of Persian architecture, the whole building being constructed of massive blocks of stone, covered with tiles richly incised, and bearing both inside and out the usual inscriptions of remembrance from the Koran. On the Chahar-Bagh is the mosque of Sultan Hussein, its dome and minarets blending beautifully

MOSES OF SULTAN HUSSEIN ISPAHAN
From Persia, Voyage en Perse.

with lofty trees, and now converted into a medressa or college. It is entered by a vast doorway magnificently ornamented with arabesque and in the middle of the porch is a large porphyry vase filled with water and having copper drinking-vessels attached, for the use of the thirsty. But the most remarkable of the colleges is that known by the name of the Medressa Jeddah. It is entered by a lofty portico embellished with pillars fantastically twisted leading through a pair of immense folding gates, of solid brass, richly ornamented with pure silver these open into a vestibule with a domed roof, which connects into the spacious court of the college, planted with flowers, and overshadowed by lofty trees.

The bazars alone still show some signs of activity. They are crowded by apothecaries or covered with slight materials of light and are being admitted by the top through an ascent of more than 2 m along the different galleries. As usual, these bazars are allotted, in separate divisions, to objects of foreign or home commerce carpenters, saddlers, shoemakers, such in their own compartment; with a large space for the products of Europe and India, cottons, silks, velvets, glass pottery &c. The suburb of Julla, already referred to, situated S of the Zandabad, was originally founded for some Armenians

when Shah Abbas transplanted thither from Julla-on-the-Araxes, and endowed with numerous commercial privileges; their quarter once contained 13 churches, and some of the best private houses in the city but at present the whole of this suburb and that of Abbas-Ahad also, is little better than a mass of ruins. The inhabitants however have by no means lost their manufacturing industry. All kinds of woven fabrics, from the most expensive velvet and satin, to the coarsest nankeen and calico, are manufactured; besides which many hands are employed in making gold and silver trinkets, paper and paper-boxes ornamented book-covers guns and pistols sword-blades glass and earthenware. All these articles are sent by merchants in every direction throughout Asia and notwithstanding the decayed state, Isfahan still enjoys a high commercial and manufacturing reputation. Under the aid of the Daghad, Isfahan became the capital of the province of Irak being situated in the centre of the empire and surrounded by the most fertile territories, it soon became a place of great population wealth and trade. In 1587 it was taken by Timur Beg, and the numerous were given up to indiscriminate massacre, and 70,000 are said to have perished. Shah Abbas made it the seat of his empire, and spared no cost in embellishing it with the most splendid edifices. In 1722 it was taken by the Afghans but, in 1729 it was retaken by Nadir Shah, since which it has not been a royal residence. Pop. formerly estimated at 1,100,000. Chardin, in 1696 stated it at 600,000 Morier stated it in 1806, from Persian authorities at 400,000 but, in his second journey at 60,000 Colonel Chesney states it at about 150,000.

ISFANYMEZO or SPANOFOLA, a vil Hungary thither Thelm, co Gémor on the Rologh 14 m from Ruma from bath, with manufactures of axes and a considerable trade in flax and hemp. Pop 850.

ISPIAGLEE, a large vil. Belocachatan, 65 m N.E. Kélet, in the Bolan Pass. Pop. 3000.

ISSAY an isl Scotland, in Loch Follart, W coast Skye, 12 m W by N Helzort, about 3 m. round; soil fertile.

ISSEI BURG a tn Rhemsh Prussia, gov of and 44 m N N W Düsseldorf on the old Isaal, with three churches, and manufactures of earthenware, a ball foundry and blast-furnace. Pop. 958.

ISSELRÖRET a vil Rhemsh Prussia, gov Minden, circle Bielefeld, with a church and a trade in fine hand-span yarn. Pop. 1170.

ISSELS (St) par Wales, Pembroke 5830 ac. T 1784

ISSEY (St) par Eng Cornwall 4886 ac. 1 op. 794

ISSNY a tn Württemberg circle Danube, 48 m S Ulm

It is walled, has a castle, a school two hospitals, glass works and manufactures of needles and thimbles. It was once an imperial free town. Pop 2146.

ISSOIRE [anc. *Isodorus Avernorum*; a tn France dep. Puy-de-Dôme, 19 m S S E Clermont. It consists in general of well-built houses, and clean, regular streets has a court of first resort, a communal college, an ancient church, in the romanesque style and manufactures of hatters and other articles in copper numerous oil-mills, and a considerable trade in cattle and oat-oil. The mineral springs of Lains are in the vicinity. Pop 5462.

ISSOUDUN [anc. *Issodunum*] a tn France dep. Indre on the Theola, here crossed by three bridges, 17 m N E Châteauneuf. Part of it having been burned in 1851 and rebuilt, has wide and regular streets, lined with handsome houses and well supplied with water; but the other parts, especially those named Châteauneuf and Bas-Châteauneuf, have narrow tortuous, dirty streets. It likewise possesses a court of first resort a chamber of commerce and manufactures four churches an elegant town-hall hospital, barracks, communal college, prison, formerly a belfry and town-gate and theatre with well-formed walks outside the town manufactures of woollen cloths, cottons, lace, hosiery and leather and a trade in wool, wine, corn, and cattle. The Tour Blanche, an erection of the 13th century is an interesting architectural relic. Pop. 16,184.

ISSUM a tn Rhemsh Prussia, gov Düsseldorf, 24 m S.S.E. Cleves, with two churches manufactures of all stuffs velvet, ribbons, and earthenware, and dye-works. Pop. 914.

ISSY, a vil France, dep. Seine, beautifully situated on a rising ground which slopes gently down to the Seine, 3 m S.W. Paris. It has a number of fine villas, a secondary castle

classical school, manufactures of whiting, chemical products, linen, and brick and tile works. In the seminary Fenelon, when suspected of heresy was interrogated by a conclave of bishops, called the Concubine of Italy. Cardinal Fleury died here in 1745. Pop. 2037.

ISTALIF is an Afghanistan, prov. of, and 22 m. N W Cabool; lat. 34° 46' N. lon. 68° 56' E. on an elevated plain at the base of the Hindu-Koosh, and embosomed in groves, gardens, and orchards. Its streets rise and above another on the acclivity of a steep hill but the houses are mean, small, and inconvenient. The inhabitants are chiefly engaged in manufactures, especially of cotton fabrics, and dyeing. The town was stormed and partly destroyed by the British September 1842 before which the pop. was diminished to 15,000.

ISTAMBULI, or **ISTANBUL**. See **CONSTANTINOPLE**.
ISTAN, a to Spain Andalusia, prov. of, and 29 m. S W Malaga, of Moorish construction with a church, courthouse, prison, and school, an oil and several flour mills, and a trade in corn. Near it are ruins of quicksilver P. 1221.

ISTENMEZO a vil. Hungary Thither Thales on Hayes, 26 m. from Erics, with two churches. Pop. 1275.

ISTHMIUS [*Græc. Isthos*], a Sep. New Granada coliving provs. Panama and Yaguas, consisting of left of the isthmus which unites S. and Central America. It has a very hot climate and fertile soil but the greater part of its surface is still covered with dense forests. A chain of rugged and barren mountains traverses its whole length and it is intersected by several rivers, of which the Chagres is the most noted. Area, 25,000 sq. m. Pop. about 100,000.

ITRIB or **ITRY** [*anc. Idris*], a to European Turkey 58 m. S W Ghislandia. It is surrounded by an ancient wall has several mosques, baths, and a large caravanserai, and a suburb called Yen-Kau, inhabited by Greeks. To the W on a hill are the remains of an ancient castle, erected by the early kings of Bulgaria. Pop. 8000.

ISTRES a to France, dep. Bouches du Rhone, 24 m. W Aix on a hill side on lake Olivier. It is surrounded by decayed ramparts, and is overlooked by the ruins of an old castle. Its streets are narrow but the suburbs are spacious, with regularly-built houses. In the dried bed of the lagoon of Bassum, near Istres, extensive works have been established for the manufacture of soda and chemical products. Pop. 3008.

ISTRIA [*German. Istrien*], a peninsula, Austria, on the S. of the kingdom of Illyria forming a circle in gov. Trieste. It terminates nearly in a point in the S. and is there washed as well as on the E. and W. by the Adriatic. The surface is mountainous, particularly in the N. where it is traversed by ramifications of the Julian Alps. Its only river of any consequence is the Isonzo. The soil is generally thin and gravelly and the grain produced fails far short of the expectation, but the forests which are extensive, yield excellent timber and both the vine, olive, and mulberry are successfully cultivated, and with their products, the chief sources of wealth. Area, 1874 sq. m. Pop. 212,000.

ISTVAN (*Saxony*) two places, Hungary.—1. A vil. Thither Danube on Pesth near Buda. It belongs to the archbishop of Kolocse, and is inhabited by Raites. Pop. 2839.—2. A vil. Thither Thalia, 30. Tura, 8 m. from Becskere, with a R. Catholic parish church. Pop. 1068.

ISTVANDI a market in Hungary Thither Danube, on Tura, 16 m. W by S. Pfefferkorn with a Protestant church, and a trade in cattle and wine. Pop. 1149.

ISTVANY (*Saxony*), a vil. Hungary Thither Thalia, on Horned, in a plain, 4 m. from Meßkau and with a R. Catholic church, and a trade in corn. Pop. 2224.

ISUATE, a to Spain Andalusia, prov. of, and 12 m. E. N. E. Malaga, irregularly built, with steep and unpaved streets. It has a church, courthouse, endowed school, an oil mill, and a trade in fine mineral waters. Pop. 614.

ISZEP, or **ISZOR** a vil. Hungary Thither Danube, on Harna, near an arm of the Danube, 5 m. from Harnag-Székely, with a R. Catholic church and a trade in corn, cattle, and fish. Pop. 1809.

ISZTOMER, a market in Hungary Thither Danube, on of and 8 m. from Buda, on a steep and rugged but well wooded declivity with a parish church. P. 1830.

ITABAIANA, or **ITABAIANA**, a to Brazil, prov. of, and 50 m. W N. W. Paraíba del Rio near the mouth of same. It has a parish church and a school of mutual instruction.

tion. In the district are several small, but very fertile houses, which are much esteemed in the neighboring provinces. Pop. of dist. 2000.—The **SERRA ITABAIANA** is the loftiest and most extensive in the province, and is supposed to contain mines of gold, though they have never been worked.

ITABIRA a to Brazil prov. Minas-Geraes, 1 bank Yellias or Galaculh 30 m. W N. W. Ouro Preto. It has a parish and three auxiliary churches, and mines of gold, which are still partially worked. Pop. 4000.

ITABIRA DE MATÁ DENTRO, a to Brazil prov. Minas-Geraes, near the mountains of Itabira and Itabira 88 m. N. E. Ouro Preto with a parish church, manufactures of muskets and various iron utensils, and a trade in cattle. Mines, producing gold of the finest quality were long worked here, but have been exhausted. Pop. of dist. 8000.

ITABORARI a to Brazil prov. of, and 36 m. N. E. Rio-de-Janeiro, containing one of the most elegant churches in the province. It has a trade in sugar and coffee.

ITACOI UMI several mountains, Brazil, particularly.—1. A mountain, prov. Minas-Geraes, forming the culminating point of the cordillera of Mant quera height estimated at about 4000 ft.—2. A mountain in the N. of prov. Maranhão on the E. corner of the bay of Cumã, lat. 2° 5' S. It forms a good landmark, being visible at sea, in clear weather at the distance of more than 30 m.

ITAGUAHI a to Brazil prov. of, and 40 m. W Rio-de-Janeiro between a river of its own name and the *serra* de Santa Cruz. It has a parish church and communicates with the river by a canal. Pop. of dist. agricultural, 4000.

ITAIPE a vil. Brazil prov. of, and 13 m. S. E. Rio-de-Janeiro, on the sea-coast with a parish church, a convent, and a trade in sugar coffee and other produce of the district. To the N. and W. are the large lakes of Itaipu and Furtados which are much fished by the Indians, who carry the produce in small canoes coastwise, to the capital. Pop. of dist. 2000.

ITALY [*Latin and Italian Italia* French *Italie* German *Italien*] a extensive and celebrated country in the S. of Europe subdivided into a number of independent kingdoms, ducal and dependencies, but distinctly marked out as one great whole, both by natural boundaries and a common language. It consists partly of islands and partly of mainland. The principal islands are Sicily with its Lepari and Egades groups, Elbe, Sardinia, and hence, also, though politically dismembered Corsica. In the same way Malta and Gozo claim to be ranked as Italian islands. In regard to the boundaries of the mainland no question can arise as to the peninsular portion of it washed by the Mediterranean on the W. and S. and by the Adriatic on the E. The remaining portion of the mainland is not so easily defined. For a small portion of the S. W. we have the Var flowing between France and the Savoyard provinces, Nice, but for the greater part of the province, though wholly included in Italy there is no natural boundary. On quitting it, however we come to the principal chain of the Alps, which proceeding N. first between Piedmont and France and then between Piedmont and Savoy gives the W. boundary. The same chain, continuing E. gives an admirable N. boundary, and is thus distinctly traced on Switzerland, cutting off from it the whole canton of Valais, a considerable part of Valais, and a smaller portion of the Grisons. The rest of the N. boundary continued E. from where the Rhetian Alps commence follows a somewhat indefinite line between the Tyrol and Austrian Italy till the Carnic Alps are reached. The E. boundary is the worst defined of all. Some geographers make the Carnic Alps the boundary and, following them to their termination near the Gulf of Quarnaro give to Italy the government of Trieste and the peninsula of Istria, but a boundary which though not better defined, has the advantage of being more generally recognized is obtained by tracing the Isonzo upwards, from its mouth in the Gulf of Trieste to its source in the Carnic Alps at the point where that range begins to turn southwards. The whole of Italy as thus marked out, is situated between lat. 37° and 47° N. and lon. 6° 21' and 15° 40' E. Its greatest length measured nearly through the centre of the peninsula, in a N. W. direction, is about 580 m. the breadth in the N. where widest, is 211 m. but diminishes to much in proceeding S., that, in the centre of the peninsula, it is only 150 m.; and at its narrowest point, does not exceed 15 m. The name,

area, population, &c. of the political divisions of this great territory are exhibited in the following Table:—

	Area, sq. m.	Population	Capital City
Apennine Italy (or Lombardo-Venetian) along coast	16,985	(1896) 4,928,028	Milan.
Kingdom of Sicilian (exclusive Sicily)	54,930	(1896) 4,538,974	Torino.
Kingdom of Naples (including Sicily)	62,151	(1896) 6,432,818	Naples.
Papal States	17,470	(1896) 2,308,113	Rome.
Grand Duchy of Tuscany (including Lunigiana)	9,177	(1896) 1,561,761	Florence.
Duchy of Parma	2,368	(1896) 404,737	Parma.
Moldavia	5,065	188,426	Moldavia.
Republic of San Marino	31	7,000	San Marino.
Principality of Monaco	13	8,000	Monaco.
Total	116,826	22,968,146	

As the above divisions are separately described under their particular heads, the remainder of this article will be confined to the leading features of Italy considered as a whole.

Physical Features.—The general configuration of Italy as has often been observed, bears a remarkable resemblance to a boot the widest part of which in the N forms the mouth the central portion forms the leg, and the S. portion the foot. No exact is the resemblance that even the spur of the boot has its representative in the projection occupied chiefly by Mount Angelo, while the heel is seen in the peninsula which is unopposed between the Adriatic and the Gulf of Taranto. The length of the coast has been roughly estimated at about 3000 m. It is not much broken. The whole shore of the Adriatic presents a comparatively smooth and continuous line, interrupted only by the spur already referred to which, by its S. side, contributes to form the Gulf of Manfredonia. The largest gulf of all is that of Taranto, in the S. The W. coast, though much more indented than the E. is more remarkable for the number and occasionally for the beauty of its bays, than for the magnitude. Commencing at the S. extremity and proceeding N. the most important which present themselves, in succession, are those of St. Eufemia, Polignano, Salerno, Naples, Gaeta, and Genoa. The S. shore is generally flat and uninteresting; presenting, particularly along the N. part, a long series of sandy islands and lagoons, which retard the progress of the rivers, dam up their mouths, and depriving them of a proper outlet, occasion the formation of pestiferous marshes. On the W. coast, the same thing is occasionally seen, but occurs on a large scale only in the Papal States, where the Pontine marshes, notwithstanding the proved probability of draining them, are permitted to spread their poisonous malarial, and even more extensive tracts, of great natural fertility into almost uninhabitable deserts. But, with this very prominent exception the W. coast is considerably elevated, the ramifications of the mountains often stretching down and terminating in lofty cliffs, with a magnificent background of alpine heights. Few countries are boast of possessing scenery of this description equal to that which is exhibited by the Gulf of Genoa and Naples.

The interior of Italy is fairly diversified. The loftiest mountains of the Alps stand on its frontiers, and shelter it from the rigours of the N. giving it a climate which though not free from the disadvantages of an oppressive summer heat in the lower valleys and plains, is nevertheless for the general mildness of its temperature, and the brightness of its sky in immediate connection with the branch of the Maritime Alps in the chain of the Apennines, which first proceeding E. till the Adriatic is approached, turn S. and traverse the peninsula centrally through its whole length, to the Straits of Messina while numerous branches are thrown off laterally and form an endless succession either of lofty hills clothed with forests or gentler slopes, covered with olives and vines. In the spaces between the mountains and hills the valleys, remarkable either for their wild romantic beauty or the fertility of their soil in the N., enclosed between the ranges of the Alps and Apennines, is a plain of vast extent, stretching from the W. frontiers of Piedmont, across Lombardy, to the shores of the Adriatic. This plain, though not the largest, is unquestionably the most fertile in Europe, and is capable of furnishing subsistence to a larger population than any other

portion of the Continent of the same size. Other plains, not of equal fertility but still more attractive by their beauty, occur in various parts of the Italian peninsula, in the duchies of Parma and Tuscany, the Papal States, and the kingdom of Naples. The general fertility of Italy is intimately connected with its geological structure. Except in the ranges of the Alps, in the N. and the terminating branches of the Apennines, in the S. granite and the primitive schists, which generally form soils of little natural fertility are not of frequent occurrence, and occupy a very limited extent of surface. On the other hand, volcanic formations, as might be expected in a country where volcanic agency is still active, occupy an considerable tracts, particularly on the W. coasts of Naples and of the Papal States, where, by their decomposing lavas, soils of almost inexhaustible fertility have been formed. The sedimentary rocks of the Italian continent, with exception of the primary schists already referred to, are comparatively recent. At the bottom of the series is the Jura limestone, which is largely developed in the Apennines. The main body of it, commencing on the E. frontiers of Tuscany, is continued in a broad zone, through the Papal States, &c. S. into the kingdom of Naples, where, after a partial interruption it reappears in the N. W. chiefly in prov. Principato-Città, and partly in that of Basilicata, and in the S. E., in prov. Bari. It also occupies a considerable space on the N. side of the Gulf of Gaeta, and on the W. slope of Mount Gargano. It is likewise the prevailing rock in the N. of Lombardy where it stretches E. from the E. shore of Lake Maggiore to the kingdom of Milan. Above the Jura limestone, and occupying almost an equal extent of surface, is chalk, with its accompanying rocks. The main body of it stretches E. along the Gulf of Genoa, and N. into the duchy of Parma, across the duchy of Modena, continues E., through Tuscany and the Papal States, forms a long narrow belt along the E. side of the main body of the Jura limestone, and though partially interrupted finally reaches the extremity of the peninsula, where, in Cape St. Maria di Leuca, its white cliffs form the E. entrance of the Gulf of Taranto. In the N. of Naples, a large tract, of a somewhat oval form, has completely enclosed by the Jura limestone. The next strata in the ascending series, belong to the tertiary formations, and consist of sandstone, travertine, and marl. This formation occupies a considerable portion of Tuscany and of the central part of Piedmont between Turin and Alexandria, but receives its chief development on the E. coast; where, without attaining much width it stretches without interruption from the neighbourhood of Rimini to the N. W. extremity of the spur. Here the main body spreading out, is continued S. S. E. and forms the greater part of the shore of the Gulf of Taranto. Another branch, still skirting the E. coast reaches its extremity in the Gulf of Tarentum. Above all the strata now mentioned, and not only of much more recent origin, but still in course of gradual accumulation, are tenuous Eocene and alluvial deposits. Of these, partial tracts are found both on the coast of Tuscany and the Papal States, particularly the Pontine marshes but they are insignificant in comparison with the space which they occupy in the luxuriant plains of Lombardy not only forming extensive flats along the N. shores of the Adriatic, from the Gulf of Trieste to the Gulf of Venice, but filling it a greater part of the delta of the Po. The river now mentioned is the only one of magnitude of which Italy can boast. It has the advantage of pursuing its course between the Alps and the Apennines, and deriving its supplies from both of these. Another river of some importance, which has its mouth at no great distance from the former and is partly fed in the same way is the Ebro or Adige. In the S. part of Italy the peninsula of which it consists is not only narrow in itself, but is divided by the central chain of the Apennines, into two watersheds, each of which has no room for the storage of large rivers. If the streams descend directly from the mountains to the shore, their course is necessarily so short, as to give the character of more torrents, often rising suddenly in their beds, and again as suddenly retiring within them. It sometimes happens, however that the mountains, in running, form parallel ridges, and thus give rise to long tidal valleys, by pursuing which the course of the rivers is greatly lengthened, and their volume of course augmented. In this way the Indus peninsula, notwithstanding its narrowness, has obtained the Argo, Tiber, and Volturno. Nume-

reef lakes are scattered over the surface. Many of them independent of their natural basins, derive much advantage from interest from algal and bacterial life. The most important are lakes Maggiore, Ooma, and Guarda.

Products Natural and Industrial.—Reference has already been made to the excellence of the climate, and the general fertility of the soil. Were the advantages thus liberally bestowed by nature, duly appreciated and seconded by country in Europe would surpass Italy in the number and value of its products. Though much of the surface is occupied by mountain lakes, there are few even of the loftiest of those in the interior on which the finest timber will not attain maturity. The oak flourishes at the height of 5600 ft. and the walnut and chestnut at that of 5500 ft. At lower elevations, the hills and sunny slopes become clothed with vineyards and oliveyards while the mulberry growing with devoted luxuriance, furnishes the means of obtaining almost unlimited supplies of the finest silk. Fruits too in endless variety and of the most exquisite quality are abundant in every quarter, and in some spots, even the sugar-cane and cotton plant have proved not incapable of yielding profitable returns. Among the properly agricultural crops, not only are all the ordinary cereals included, but maize and rice are successfully cultivated on an extensive scale. Meadows and pastures also, more especially in the plain of the Po, where, from the frequency of inundation, other crops are insecure here from almost time immemorial, have been employed in feeding vast herds of cows, from whose milk a cheese, possessed of peculiar excellence, which the dairies of other countries have not yet succeeded in imitating is made, and forms an important article of export to every quarter of Europe. It must be admitted, however that the natural advantages of the country are not turned to full account and that as a general rule, all the operations of husbandry are performed in a slovenly manner by the most imperfect implements and according to an antiquated routine which in other countries, has long been exploded. In regard to what are usually called industrial products it is impossible to express a more favourable opinion. Manufacturers are generally in a very languishing condition and except in a very few leading ports, commercial activity and enterprise are scarcely known.

People.—The great majority of the inhabitants of Italy are descendants of the ancient conquerors of the world and speak a dialect bearing a closer resemblance to the Latin than as it is found in any other modern tongue. This common language and the recollection of the illustrious deeds of their ancestors form the great bond of union among the Italians, and foster those feelings of self-complacency in which they are so apt to indulge, when contrasting themselves with the inhabitants of other countries. Unquestionably they were, at one period, irresistible in arms and even in more modern times, when their military greatness had passed away the revival of letters commenced with them and they long continued to furnish the first names in literature, science, and art. It is impossible, therefore, to imagine, that their race labours under any essential defects, in regard either to physical or mental qualities. Degeneracy however to a lamentable extent, has certainly taken place and the heroic virtues which distinguished the ancient Romans, are not characteristic of the modern Italian. A superficial polish too often supplies the place of more substantial qualities and the magnanimity which in ancient times would have either passed over a fault or rewarded it openly frequently finds a miserable substitute in the vindictive spirit which scruples not to avenge its revenge by the hand of a hired assassin. The degeneracy into which notwithstanding splendid individual exceptions, the national character of the Italians has fallen, is partly accounted for by its political circumstances. Instead of being united under one constitutional head, it has been parcelled out among a number of potentates, all of them more or less inclined to despotic principles. The tyrannical proceedings to which such principles naturally lead, have retarded the diffusion of the extreme principles of an opposite description. It accordingly took a prominent part in the revolutions that have agitated Europe since 1485; but, with exception of Sardinia, has apparently derived no advantage from all the blood that was spilt in them.

ITAMARACA, a small Brazil, prov Pernambuco, separated from the mainland by a deep but narrow channel, which was

long known by the name of the river of Santa Cruz; length N to S. 12 m. greatest breadth about 8 m. It is very fertile, and raises considerable quantities of cotton and sugarcane for exportation. It has also distilleries of rum and extensive saw-works. Its principal town is Condeado d'Itamaraca, facing the mainland; and in the N. extremity is the harbour of Ocucaia, at the mouth of the strait, defended by a fort. Pop. 8000.

ITAMARANDIBA a river Brazil, prov Minas-Geraes which rises in the N. slope of the Serra das Encantadas flows N and joins the bank Aracama; 24 m. W Minas-Novas. It abounds with fish and when first discovered, a great number of minerals were found in its bed.

ITANHAEN a town Brazil, prov and 80 m. S.E. W Rio-Paulo on a small stream of same name, once a place of considerable importance but now much decayed—its trade being confined to some timber and a little sundries flour. Pop. 1300.

ITAPACOROYA, a bay and headland, Brazil, prov Santa Catharina; lat. 36° 47' 18 S.; lon 48° 21' W. The bay affords good shelter to vessels from the S and S.W. winds and to the N of the headland, are two small islands, where good water may be procured.

ITAPARICA an old Brazil, in the S of All-Sainte Bay, prov and 28 m. W Bahia length N to S. 24 m. greatest breadth, 5 m. The E. side of the island, opposite to the town of Bahia, is lined by great numbers of handsome houses the W. shore is covered with marine plants, and the interior abounds in cocoa-trees, whose fruit, which is of an uncommonly large size, forms an important article of trade. The island is divided into two parishes, each of which has a church. In addition to these, it contains three other churches a Latin and a primary school and has manufactures of ropes and furniture for the whale-factory.

ITAI-MARCA, a town Brazil, prov Poyrito-Santa 80 m. S.E. W Victoria, on bank of a river consisting of about 50 detached cottages, in a fertile district. Pop. dist. 2000.

ITAPETTINGA a town Brazil, prov of and 120 m. W Rio-Paulo, in a fertile valley. The houses, built of mud are very indifferent. Near it great numbers of cattle are reared, which are exported to Rio-de-Janeiro. Pop. dist. 6000.

ITAPUBA a town Brazil, prov of, and 180 m. W Rio-Paulo near the Verde. It suffers much from incursions by the wild Indians and the whole district, in consequence, remains thinly peopled and almost uncultivated. The only trade is in cattle. Pop. dist. 2300.

ITAPICU a river Brazil, which rises in the W slope of the Serra-Santa-Catharina, on the W frontiers of the prov of that name flows E. and falls into the sea between point Itapacora and the mouth of the Aracari after a course of 90 m. It is navigable by small vessels and has several settlements, navigable by canoe.

ITAI-CURU two rivers, Brazil.—1 A river prov Bahia, which rises in the mountains of Jacobina flows N.E. and S.E.E. passing through wild mountain tracts and falls into the Atlantic, after a course of about 350 m. about 90 m. N.E. Bahia. It is much obstructed by cataraacts and, notwithstanding its large volume of water formed by the accession of numerous affluent extensive shoals, near its mouth limit the depth to 6 or 7 ft. Its navigation is almost confined to canoes.—2 (Itapicuru-Grande) A river which rises in the S. of prov Maranhão, flows first N.W. in a course nearly parallel to that of the Farnalima, then N.W. and falls by a wide embouchure, into the bay of São-João, in the Atlantic Ocean, 90 m. E. Maranhão. Total course, about 600 m. Its principal affluent is the Alperanca which joins it on the left after receiving which it becomes navigable, but with a winding channel, a rapid current, and numerous cataraacts. Its navigation is prosecuted with partial interruptions, partly in sailing vessels and partly in canoes, for about 400 m.

ITAPICURU two towns Brazil, prov of, and 110 m. N.N.E. Bahia, cap. on either side the Itapicuru.—1 (Itapicuru-de-Cima) near the bank of the river; an ancient place with a parish church, a primary school and a limited trade in cattle. It is in a very barren district, scarcely furnishing the provisions necessary for the inhabitants.—2 (Itapicuru-Grande) A town on the bank of the river; with a parish church, and some trade in cotton and cattle. (See also BOMBO).

ITAPUA, a town Paraguay on bank Paraná, 180 m. S.E. Assencion

ITAQUEIRA, a mountain range, Brazil in the S.E. of prov. Mato-Grosso. It is of considerable width and stretches for a great distance along the right bank of the Paraná. It gives rise to two rivers one of same name, which flows N., and June 1 bank, Equi, an affluent of the São-Lorenço; and another called the Verde, which flows S. to the Paraná.

ITACA (French, *Les-Isles*) a lake, U. States, W. territory 170 m. W. Lake Superior; of irregular form, and from 7 to 8 m. in extent reported to be the source of the Mississippi. Estimated to be about 1800 ft. above sea-level.

ITATA or **ITATARA** a river Chili rising in the W. slope of the Andes, and after a W. course of about 150 m. falling into the Pacific, near lat. 39° S. 56 m. N. by E. Consumption. **ITATY** a tn. La Plata, state Corrientes-et-Misiones, about 27 m. N. E. Corrientes, on bank Paraná. It has uniform, but dirty and decayed streets, a large square, with an old church. It lies in a very fertile district but still the inhabitants are in the greatest misery.

ITCHAPOO, a tn. Hindoostan, presid. Madras, dist. of, and 30 m. S. W. Ganjam, 1 bank Bompoo near the Bay of Bengal lat. 19° 4' N. lon. 84° 32' E. It stands surrounded by mango plantations, is large and straggling and has a bad, a ruined fort.

ITCIEN or **ANZE**, a river England, co. Hants, rising near Arleford, and, after a circuitous course W. S. W. of 72 m. falling into the sea at Itchenbury 1 m. E. Southampton. It is navigable to the city of Winchester.

ITCHENOM (Wazir) par Eng. Sussex 792 ac. P. 254.

ITCHIN two pars. Eng. Hants—1 (*Abbas*) 2100 ac. P. 256.—2 (*Sole with Abbasdon*) 2921 ac. P. 348.

ITCHINGFIELD par Eng. Sussex 2450 ac. P. 371.

ITCHINGSWELL, or **EXCHINGSWELL**, par Eng. Hants 2319 ac. P. 49.

ITCHINGTON (two pars. Eng. Warwick)—1 (*Shallop*) 3026 ac. P. 549.—2 (*Long*) 4510 ac. P. 1216.

ITINEZ, a river Brazil. See **GUAROEZ**.

ITIRI-CARROU, a tn. ul. Sardina, prov. Sassari. It is a large built-up place, has several churches, a monastery, primary school, and the extensive ruins of an old abbey, manufactures of woollen and linen cloth; and a trade in corn, flour, milk, and cheese. Pop. 4446.

ITIRI-FUNALUM or **ITIRIEND** a tn. Sardina, div. Sassari, prov. Sassari, and on the edge of the extensive plain of that name with two churches, the remains of an old castle, a terrace situated on an almost inaccessible height and a trade in grain, cheese, and hides. Pop. 1840.

ITHACA a tn., U. States, New York, 140 m. S. W. Albany chiefly on a plain. It is regularly laid out, with streets crossing each other at right angles; has a courthouse, jail and several churches, a flourishing academy and a lyceum. The extensive water-power which it commands is employed for manufacturing purposes. It has a considerable trade with Pennsylvania, receiving from and can in exchange for plaster salt, lime, flour &c. Pop. 5550.

ITHACA or **THAKA** one of the Ionian Islands, between Cephalonia and the W. coast Greece lat. (N. point) 38° 30' N. lon. 20° 29' E. (a.) It is about 12 m. long, and 2½ m. broad, excepting towards the middle, where it is nearly divided in two by the Gulf of Molo. Its appearance is remarkably barren and rugged, there being scarcely 200 yds. of level ground anywhere, while the soil is generally stony and stony. The limestone rock, of which the island is chiefly composed, rises at intervals into abrupt and lofty eminences, the highest of which are the mountains Stophanos and Neritos the former occupying the S. division of the island, the latter the N. Its scenery is bold and striking, presenting numerous promontories and bays, intersecting with narrow valleys opening to the sea, richly wooded with olive, orange or almond trees, or covered with vineyards. The chief productions are cereals, corn, and olives; also almonds and oranges, wine and honey all of which are much esteemed; but the inhabitants derive the principal part of their subsistence from the sea, being either sailors or fishermen. The climate is extremely healthy. The principal port and town is Bathi or Vathi (see **VATHI**). Ithaca derives all its interest from its ancient historical associations, being supposed the Ithaca of Homer the birth-place and paternal kingdom of Ulysses. The population of Ithaca, including the islands which form its dependencies is estimated at 10,000.

ITINTINI a river Venezuela, flowing S. discharging of the Casiquiare, from which it issues, about 45 m. after the latter leaves the Orinoco. It enters the Rio Negro about 40 m. N. W. the junction of the Casiquiare.

ITON or **ITON** a river France, which rises in E. of dep. Oran, flows N. E. into dep. Bure past Errux, 9 m. N. N. E. of which it joins the Rave. It throws off a branch, which proceeds S. and joins the Arve at Varamin. Near Villod, S. of Evieux, the main stream is lost in an almy, but reappears about 8 m. onwards, near the village of Vieux Combes. Total course about 80 m. nowhere properly navigable, but it is used for flotation.

ITRADO a tn. Spain, Ardeleja, prov. and 80 m. from Granada. It is irregularly built, well supplied with water and has a parish church, townhouse, primary school, and a trade in wine and fruit. Pop. 1903.

ITREI a tn. Naples, prov. Terra-di-Lavara, dist. of, and 7 m. N. Gallia, on the ancient Appian way defended by a strong old castle, and having two parish churches and three convents. Pop. 4600.

ITSHILA or **ADAMA**, a path. Asiatic Turkey extending along the S. coast, from the E. shore of the Gulf of Adala to the Bay of Iskenderon, and bounded N. by the range of mountains which form the S. boundary of Karamania. It is watered by numerous streams; the principal of which are the Ohink, Syhon, Jyphon and Terna. It is subdivided into the sanjaks of Itshil Adana Niz, Tarsus and Alynz. Pop. 360 000.

ITTRER, two places Hungary.—1 (*Uttie Magyar* or *Rebes*) a vil. Thibet Thems, co. Torontal, on the Bega Canal 8 m. from Nagy-Betzkör, with a handsome church. Pop. 1446.—2, (*Uttie-Rede*) a vil. near the former. Both are in a fertile and well-cultivated district. Pop. 2517.

ITTER (NEKE) a vil. Holland, prov. Limburg, 9 m. S. W. Roermond, with a R. Catholic church, and a considerable annual cattle fair. Pop. 700.

ITTINGHAM, par Eng. Norfolk 1442 ac. P. 529.

ITTLINGEN a vil. Baden circle Middle Rhine basin Koppeln, on the Kleben with a church, a saw and two other mills. Pop. 1381.

ITUPO par Eng. Monmouth 1798 ac. Pop. 200.

ITU a tn. Brazil prov. of 50 m. W. São-Paulo. It is surrounded by lofty hills, which makes the climate cold in winter and very hot in summer. The principal streets are paved and the greater part of the houses are of mud or earth with a framework of wood, each provided with its garden. It has a courthouse, four churches, infirmary two convents, and a Latin and two primary schools. A considerable trade is carried on in mules and horses imported into the district and in cattle reared within it. The soil is fertile, and the sugar-cane is extensively cultivated. Pop. 10 000.

ITUCAMBIRA, a river Brazil, formed by two streams which rise in the Serra do Santo-Antônio, W. of the town of Formosa, prov. Minas-Geraes, and make a junction after several windings towards the N. The united stream, under the name of Itucambira, immediately becomes navigable for canoes; and, proceeding through the progress in a N. E. direction, is successively augmented by the Peder, Batuma, and Santo Antonio, till it becomes a majestic river and finally joins the Jequitinhonha, after a course of about 120 m. Gold is washed from its sands.

ITUNAMA or **TUKAMA** a river Brazil, formed by the sac. prov. of Minas, now included in that of Mato-Grosso, flows N. N. W. between the Bauré and the Ubaí, and about 16 m. below the confluence of the latter joins I. bank Guapore, in lat. 12° 30' S. Its principal affluent is the Machado. Its whole course is not well known but is navigable for about 90 m.

ITUNEA, a dist. Palestine, the limits of which are not precisely defined, but which may be described as lying between Lake Tiberias and Damascus, with unincorporated limits to the N. W. and S. E. a plain country about 20 m. long, N. to S., and 24 m. E. to W. and containing only 20 inhabited villages.

ITURUP or **STAVES ISLAND**, the largest and most important of the Kurile Islands, N. Pacific, belonging to Japan; lat. (S. point) 44° 39' N. lon. 146° 54' E.; separated from Kamohar on the S., by the strait of St. Anthony; and from Urey, on the N., by Voz's Strait. It is 140 m. long, by

about 20 m average breadth of volcanic origin and contains a volcano, but whether active or not has not been ascertained. It is one of the most fertile of the group. Agriculture was introduced into it by the Japanese, but the natives live chiefly on the chase, and of their fisheries.

ITZEHOE, a durbly of Holstein in a beautiful valley enclosed by wooded hills, a bank 54 ft which is here navigable, 32 m. N W Hamburg. It consists of an old and a new town, connected by a long bridge; has a parish church, with several interesting monuments a chapel, built in 1340, and now attached to St. George's Hospital, the largest of the eight benevolent institutions which the town possesses. An old convent, and a statehouse, for the provincial assemblies of Holstein manufactures of candles, cards, tobacco, and tobacco-pipes earthenware soap, hats, leather shoemaking and vinegar a sugar-refinery tile-works, building-yard numerous distilleries, and a considerable transit trade. It is the oldest town in the duchy. A steam-boat plies weekly between it and Hamburg. Pop. 6000

IUGAN (Bolzano) a river Asiatic Russia, which rises in gov Tobolsk, lat. 58° E, and 75° E, flows N W and joins I bank 600 m S W Surgut course about 220 m.

IVARI or **IVARI** a river Brazil, which rises in the plains of Gueparava, in the S of prov São-Paulo, flows N W, and joins I bank Parana, at the point where the provs Mato-Grosso and São-Paulo meet Paraguay. Its whole course is about 800 m the far greater part of which notwithstanding some interruptions from cataracts, is navigable. Its principal settlements are the Tamo, Bom Sucesso Capibari and Tamo.

IVARI-SUMI, an isl. Japan, in the Sea of Japan, 21 m from W coast Nippon. It is 15 m long by 5 m broad.

IVAN-GONDO a tn. Russia, gov of and 82 m S E Caspian r bank Oster with a considerable trade in hemp and buckwheat. Pop. 1200

IVAN (Saxony) several places, Hungary:—1 A. H. Thüher Danube, co. and about 4 m. from Raab, with a church and a trade in corn. Pop. 1786.—2 (Szent-Georgs-fenn) a vil. Hither Danube, co. Bacs, 8 m from Als. Kőr with a church. Pop. (Bistony) 1740.—3 (Szent-Georgs-fenn) a vil. Hither Danube, co. Bacs, between Bacs and Molekut, with a church, and a trade in corn, wine and cattle. Pop. 525.—4 (Szent-Georgs-fenn) a vil. Hungary Hither Danube co. Bacs, 4 m from Kombar with a R. Catholic church. Pop. 2846.

IVANDA, a vil. Hungary Thüher Thüher, co. Turontal about 10 m. from Temevar with three churches. P 1240

IVANICH two places, Austria Croatia (Pesther) a tn in an isl. formed by the Lupa, 18 m E S E. Agrin, a place of some strength with manufactures of earthenware. Pop. 780.—2 (Kisler) a tn. about 8 m N. B. Ivarich-Pesther, with a church, and a Franciscan monastery P 450

IVANOVO a tn. Russia, gov of and 55 m N N E Vladimir near r bank Uvol well built, with spacious streets, four churches, and manufactures of linen and printed goods chemical works, and iron and copper foundries. Pop. (1849) 5482

IVANY a market in Hungary Thüher Danube, co. and 28 m S E Odenburg with a parish church. Pop. 1449

IVANY-SERT a vil. Hungary Hither Danube, co. Lip-tan, about 5 m from Odenburg, with a church thermal springs, glass-works, and mines, from which gold and silver are obtained. Pop. 1174.

IVE (the) par Eng Cornwall 5780 ac Pop. 1012.

IVEL two rivers, England:—1 Co. Bedford, falling into the Ouse, at Tempsford, after a N E course of about 20 m. It is navigable for barges to Tempsford.—2 (called also the Ivel) Co. Somerset falling into the Parret at Langport, after a N W course of 37 m. It is navigable to Ilchester.

IVER, par Eng Bucks 6149 ac. Pop. 1896.

IVERUSE par Irel Limerick 3765 ac. Pop. 1151

IVRES (the) two tns. England:—1 A pari bor., seaport tn. and par Cornwall. The town on W shore of bay of same name, 18 m W W Falmouth—lat. (seaport) 50° 12' 48" N, lon 5° 39' 30" W.—course of several streets which, although narrow and uneven, are tolerably straight and well kept. It is plentifully supplied with water lighted with gas and is increasing. It has a handsome and spacious church of the time of Henry V. with an elegant tower 90 ft. high; several dissenting places of worship several schools, and some charitable institutions. Boat-building, ship-repairing, cut, rope, and seine making, are all carried on here to a

considerable extent; but the principal business of the place is the pickard fishery, which is extensively prosecuted, as many as 80,000 hoppers being sometimes taken in a single net. The pickards are principally exported to the Italian markets. Many of the inhabitants are also employed in the neighbouring mines. An excellent pier defended by a battery was erected here in 1770 but the approach to it is greatly obstructed by the accumulation of sand caused by the N W winds. About 100 vessels are engaged in the sailing and foreign trade of the port. The borough returns a member to the House of Commons registered electors (1851), 595. Area of par. 1876 ac. Pop. 5595.—(Local Correspondent).—2 A market tn. and par. Huntingdon. The town 5 m. E by 5 Huntingdon on a slope 1 bank Ouse, here crossed by a substantial stone bridge of six arches, has wide and well kept principal streets; but the lower part of the town is liable to be inundated by the river. It is well supplied with water is lighted with gas, and has a light handsome church with a lofty spire six dissenting places of worship, national British and other schools and several churches. There are no manufactures, and there is very little trade except in agricultural produce and cattle. The markets for cattle and sheep are among the largest in the kingdom. Area of par. 2330 ac. Pop. 2572.—(Local Correspondent).

IVICA, Isl. Spain. See IVIZA.

IVINGHOE a market tn. and par. England, co. of and 20 m. S E Buckingham. The town on the side of a chalk hill consists of two principal streets, well supplied with water has an ancient church with a tower and spire two dissenting chapels and manufactures of straw plait. Area of par. 5850 ac. Pop. 2024.

IVINHEIMA a river S. America which rises in the serras Amambay on the confines of Paraguay and the Brazilian prov of Mato-Grosso, flows E S E and, after a course of about 160 m joins r bank Parana, between the confluences of the Parana and the Ivaí.

IVIZA, IVIZA or IVIZA (anc. *Euboea*) an isl. and its cap. Spain, in the Mediterranean forming the most easterly point W of the three principal islands the Balears, between lat. 38° 50' and 39° 7' N and lon. 1° 15' and 1° 40' E greatest length, N E to S W 25 m greatest breadth, 13 m its coasts are lined by numerous small islands, and much indented into bays, of which the largest are those of San Antonio, on the N W and of Ivica, on the S E. The interior is lofty and finely diversified by wooded hills and fertile valleys climate mild in winter and in summer kept comparatively cool by sea-breezes. The soil is somewhat stony but very productive, and is particularly adapted for the olive which, accordingly is the chief object of culture, though grain also is exported. Both game and fish abound. The oil of mineral product is salt. The inhabitants are of middle stature spare made, and of a yellow almost jaundiced colour very agile, but indolent and ignorant in the extreme. They make good sailors. Love their island and have often displayed much courage in defending it. Their language, like that of all the Balears, and of Valencia and Gallura, is a corruption of the old Lomman. Iviza received its first name of Euboea or Euboea from its earliest possessors the Carthaginians. From them it passed to the Romans, then to the Moors, and at last, in 1294, to the Spaniards, with whom it has since remained, except for a short period after 1708, when it was taken possession of by the British. Pop. 19,447.—The town stands on a height above the S shore. It is fortified in the form of an irregular bastion and is entered by two gates, but is well built, the streets being very steep. It is the see of a bishop, contains two churches, one of them a cathedral, two hospitals, a theatre an almshouse, a prison arsenal defended by a fort and has a good harbour at which a trade is carried on chiefly in wine, oil, and soap. Pop. 5031

IVONGO div Madagascar (which see.)

IVORY COAST part of the Guinea coast, W Africa, between Cape Palmas and the Annies river or between lon 8° 20' and 8° 40' W inhabited by a number of small negro tribes living in a state of independence, excepting those subject to the Ashantis.

IVREA a div kingdom of Italy Piedmont, including provs Ivrea and Aosta, bounded N by Switzerland, E by Verelli S. Turin and W Savoy, area, about 1778 sq. It is situated on the slopes of the Graian and Pennine Alps,

and has a surface beautifully diversified with wooded hills, sloping vineyards, verdant pastures, and fertile plains. The principal stream is the Dora Balnea, which intersects the div. W to E, and receives the Chiusella. The soil is generally fertile, and produces much corn, rye, and millet. The vine also is extensively cultivated, but the wine is inferior and a most part of it is converted into brandy. Fruit is very abundant; silk-worms are extensively reared, and the pastures feed great numbers of cattle, sheep, goats, horses and swine. Series are very numerous, almost every family keeping one or more. Several varieties of iron are found; this metal is worked to some extent, and supplies a number of furnaces. Some good marble is quarried and considerable quantities of limestone burnt, and there are several seams of pottery earth and fire-clay. The chief manufactures are woollen cloth, paper, leather goods, agricultural implements, metal instruments, and various articles in brass and iron. For administrative purposes it is divided into thirteen mandamientos. Ivrea is the capital. Pop. (1848) 248,783.

IVREA (Latin, *Favaria*) is in Italy. Feuchmont, cap. above div. 53 m. N. N. E. Turin, picturesque situated partly on an irregular slope, and partly in a plain, 1. bank Dora Balnea. It is walled and otherwise fortified but not strongly. It has two suburbs, one on the opposite side of the river and communicating with the town by a bridge. The town is irregularly and on the whole poorly built, but has a cathedral in the Gothic style, supposed to occupy the site of a temple of Apollo, and to have been founded about the middle of the 5th century. Five parish churches, several of them of great interest for their antiquity; the townhouse, courthouse, bishop's palace, the palace of Ferrero, the episcopal seminary with a good library, the provincial college, finely situated, and surrounded with a large garden; public schools, in which philosophy, theology and Latin, as well as the first rudiments of education are taught; a theatre, public baths, and a hospital. The manufactures consist chiefly of woollen cloth, cotton leather, candles, articles of wood and brass, carriages, shoes, varnishes, &c. and there are several cotton and silk mills, dye-works, and tile-works. Ivrea is also the centre of considerable trade with the inhabitants of the surrounding districts, particularly those of the valleys of Aosta, Bracon, Lomana, and Courmayeur. Pop. 8475.

IVRY-SUR-SEINE, a tn. France, dep. Seine, agreeably situated on a gentle eminence above 1. bank Seine, 3 m. S. S. E. Paris. It has a parish church, finely situated on a height overlooking the town, the remains of an old castle, and manufactures of glass, gelatine, chemical products, varnished leather, stained paper, and printers' ink, and extensive wine-cellars hewn out of the rock. At La Garenne, in the vicinity are extensive glass-works, employing about 240 persons. Pop. 5880.

IVY BRIDGE, a vil. England, co. Devon, in four different parishes, on the Erme, here crossed by a bridge partially covered with ivy 10 m. E. by N. Plymouth. It has paper manufactures, and is much resorted to on account of its mild temperature and the beauty of the surrounding scenery. Pop. 264.

IWAIDE, par. Eng. Kent. 8762 ac. Pop. 171.

IWANOWNO a tn. Russia. See IVANOV.

IWERNE-MINISTRE, par. Eng. Dorset. 2949 ac. P. 703.

IWERNE-COURTNEY or FURZON par. Eng. Dorset.

1963 ac. Pop. 688.

IWUY a tn. France, dep. Nord, 5 1/2 m. N. E. Cambrai, with manufactures of caps, hosiery, common cutlery nails, and a considerable trade in fine flax. Pop. 8774.

IXELLES (Flemish, *Elzeu*) a vil. and com. Belgium, prov. S. Brabant, in a beautiful valley 8 m. S. E. Brussels, with a great number of the villas and country seats, no hospital for elderly children, and manufactures of linen, distilleries, breweries, and stone quarries. Pop. 1476.

IKWORTH, a tn and par. England co. Suffolk. The tower N. E. Dury St. Edmund's, has an elegant church, with lofty tower a national school supported by subscription and endowed Sunday-schools for boys and girls. Area of par. 2248 ac. Pop. 1199.

IXA a vil. Hungary Thither Toluca, about 95 m. from Salgucho on the Nagy-Ag with a church. Pop. 1240.

IXALCO a volcano, Central America, in San Salvador 10 m. N. by W. Sonsonate.

IXAMAL, a city Yucatan, 45 m. E. Merida, with a church a convent, which is a spacious colonnaded building, founded in 1553 and many remarkable mounds. The fair of Ixamal is the greatest in Yucatan.

IXELI a vil. and com. Belgium, prov. Luxembourg, on the Semois, 21 m. W. Arlon. It has dye-works, several distilleries, a tannery, a saw of oil and other mills. P. 1788.

IZIUM a tn. Russia, gov. of 70 m. S. E. Khar'k'ov cap. 1 bank Donets, surrounded by a fence and earthen rampart. It is tolerably well built, has four churches, and a trade in corn, cattle, and sheep. Pop. (1842) 7828.

IZMEN or IZERNY a vil. Hungary Thither Danube, co. Toluca, about 10 m. from Szekes with a church numerous mills for graining rye, wheat, and malt, and a trade in tobacco, largely grown in the vicinity. Pop. 1103.

IZMID in Turkey. See IZMIR.

IZNAJAR (Latin, *Aspiz*) a tn. Spain, Andalucia, prov. of and 33 m. S. E. Cordova, on a height near the Gull. It is indifferently built, has steep, irregular streets, a massive church a courthouse, prison, primary school old castle, and manufactures of coarse linen and hempen staves, white soap, tiles, several distilleries, oil and flour mills, and a little trade in oil and wheat. Pop. 9808.

IZNATUBAF (anc. *Assopus*) a tn. Spain Andalucia, prov. of and 40 m. N. E. Jaen, picturesque situated on a lofty and commanding height. It consists of the town proper surrounded by ancient walls, flanked with towers and entered by nine gates and of a large suburb and is indifferently built the houses though substantial being generally old, and the streets narrow and ill paved. It has a large and handsome church, of the Tuscan order with a lofty tower some good paintings, and rich decorations commodious courthouses, a Latin and primary school a ruined castle manufactures of soap, brick and tile works, a flour and several oil mills, and an annual fair. Pop. 2191.

IZSA, a vil. Hungary Thither Danube co. of and 6 m. from Komorn, near the Danube, by which it is often inundated. It has a R. Catholic church. In 1852 an earthquake threw down the two churches which then existed and the greater part of the dwelling-houses. Pop. 965.

IZSAK, a vil. Hungary Thither Danube, co. of and 40 m. from Pesth with two churches and a synagogue. Pop. 5069.

IZSIF MASHAN, or URMEN-SZOROG a vil. Hungary, Thither Toluca, co. Szegedin 8 m. from Vajda, with a church and a trade in agricultural produce. Pop. 1646.

IZTACCHIHUATLI, a volcano, Mexico dep. of and 30 m. W. N. W. La Puebla 15,705 ft. high.

LEZANO or LEANO, a vil. Italy Lombardy prov. Lodi, a-fra, 4 m. E. Cremona with a parish and an auxiliary church. Pop. 1200.

SUPPLEMENT

70

THE IMPERIAL GAZETTEER

ABA

ABA, a tn Central Africa, kingdom of Bornou a place of some importance, surrounded by a wall in good repair and entered by three gates. The interior is adorned by large trees and the huts remarkable for their high conical roof have a very cheerful appearance. The military spirit being strong among the inhabitants industry and agriculture seemed to be much neglected.

ABA, a tn Austrian empire Hungary co. and 11 m. S. Stahlevesburg in an excellent agricultural district, with 3154 inhabitants most of whom are Protestants, and engaged in weaving.

ABBEOKUTA **ABBEKUTA** or **ABEKUTA** (Understone) [add.] a tn W Africa, Yoruba, cap Egbe land 1 bank Ogun river 81 m. (by river) N N W Lagos, lat. 7° 8' N lon. 3° 30' E. The town was founded by a remnant of the Egbas on the bank Ogun—whence its name—about 1826 under their chief Shosho, who in 1838 invited Europeans to settle in it. Between 1842-6 Christian missionaries established themselves there, and in 1861 there were representatives of the Church of England the Wesleyans and two sections of American Baptists. The situation of the town is both striking and beautiful. There is a gorgeous growth around. Hill, water forest and homestead—the constituents of beauty in a landscape—all are present.

The principal peculiarity is the fantastic breaking of the undulating plain by masses of gray granite between twenty and thirty in number sometimes rising 2-3 to 500 ft. above the lower levels, towering above the patches of dark trees and large brown villages or rather towns, composing Abbeokuta, which separate them. There is a long dromon nearly bisecting the town from N to S, lying like a turtle's back between the scattered lines of habitations which in some places are so close packed as cells in a honey-comb, in others are broken by bush. A line of denser and more regular trees marks the course of the river and the rolling ground broken by dwarf oaks, in the distance subsides into a mysteriously hazy horizon. —(Durban). The defence—a mud wall c. 6 ft. high without embankment and a ditch a few feet broad, choked with bushes—have a circumference of 17 or 18 m. and extend over the bank of the Ogun to the northward there are three lakes. The town itself is about 4 m. by 3 m. Besides the smaller gateways through the wall leading to farms there are five larger ones at which outdoor dances are collected—three to the N and two to the S, each provided with a hollow beaten for the dancers. The principal quarter or village is Ake, and contains the king's palace, the church and dwellings of the Church Missionary Society and a printing-office which issues a weekly news paper edited by the missionaries partly in Egbe and partly in English and printed by natives. Adjacent is the district occupied by the Christian natives. Of the town generally the streets are narrow and irregular the wider ones being occupied as markets the houses, built of tamped mud and covered with tall thatched roofs, are in form a hollow square, with courts within courts the rooms numbering from ten to twenty, the various subdivisions of the polygamous families.

Abbeokuta has been several times invaded by the inveterate enemy of its people, the king of Dahomey. In 1861 the king Ghele marched upon it, but small-pox broke out before his fall.

ABLITAS

in his army and carried off 11 is said 8000 of them. In 1864 he again attacked the town, but was repulsed and disastrously routed by the Egbas. 11e Abbeokutas have likewise had a long struggle with Ibadan, a Yoruba town about 50 m. N E. of them.

The inhabitants are generally industrious and supply themselves to various occupations; the chief trades besides agriculture being those of the blacksmith, the carpenter the weaver the dyer and the potter. The presence of the missionaries and Christian converts has exerted a manifest influence upon the habits and character of the general population, who are better clothed and better conducted by far than the Dahomans and other Yoruba tribes though they are still far from a state of civilisation. By a treaty of 1862 renewed with additional stringency in 1861 the king and chiefs pledged themselves as to the suppression of the slave trade and of human sacrifices. Pop 100 000 to 150 000 —(Dunlop, &c.)

ABD EL-KURI or **ABD-AL-KURIA** [add.] a tn E Africa, belonging to the Sokotra group, in the Indian Ocean, 50 m. N E Cape Gardafui. It is about 20 m. long from N to E and from 3 to 4 m. broad, and consists on its S. side, of a limestone plateau upwards of 1200 ft. high, from which several peaks rise and attain the still greater height of 1600 ft. above the sea. The coast forms an almost unbroken line, but the S. coast is indented by bays and creeks, some of which give good anchorage. The soil is generally of a sandy stony character scarcely affording sufficient fodder for a few herds of goats. The inhabitants not above 100 subsist chiefly on fish, which abound on the coast. About 16 m. N of Abd-el Kuri are two other small islands which are visited by the Somali and Arabs of the mainland for the gumme found upon them.

ABENGIBRE a vil Spain prov and 17 m. from Albacete on a height. It is poorly built in a few irregular unpaved and dirty streets. It is famous for its olives and potatoes, and has manufactures of *alpargatas* shoes, and a mill stone quarry. Pop 882.

ABERTURA a vil Spain prov and about 28 m. E. Ceceles, on the slope of a hill commanding a pleasing view. It consists of 200 houses, irregularly grouped and mostly of a single story and has an ancient and somewhat decayed parish church a townhouse, a primary school and an insane and unhealthy prison. Pop 1068.

ABILA or **ABILA** a townman W Africa, dist. of Ake or Ashen, belonging to the Bachelu range, which attains a height of nearly 5000 feet. It is one of the most picturesque objects in the country.

ABITSCHEE a vil Africa, dist. Kororé, 1. bank Chadda or Benue lat. 7° 50' N lon. 8° 50' E near two large islands, one of which is named Clarendon and the other Washington. It is a large place, inhabited chiefly by Kororé and Igbin people, and has a considerable trade. —(Journ. Roy. Geog. Soc. vol. xxv p. 116.)

ABULTAS, a tn Spain, prov Navarra, esp. co. of same name on a plain at the foot of a height washed by the Gualles about 50 m. S. Pamplona. It is an ancient place, which under the name of Obiltas, possessed a strong castle, and made some figure in the early Spanish wars. Pop. 1228.

ABOMELY or **ABOMEY** (town within the province) [Ind.] a to W Africa, on kingdom Dahomey 83 m N. [Ind.] It is approached from Kankab by a wide and good road, through a beautiful and fertile district, lined with villages and groups of thatched buildings. The town is without walls, but surrounded with a moat grown over with the thorny acacia and other dense bushes, which form a good defense. Around the northern part the moat runs from E to W in doubt with an interval of a mile, which is filled with bush and grass. The outer circle is about 5 m. and the number of gates is eight. The *Abomey* is a mud screen of 5 steps or courses 15 to 18 ft. high and 100 yds. long pierced with two wedge-shaped gaps as entrances, one for the king the other for the public, and closed with hurdle-gates. Within the entrance are the ruins of a fort with a number of useless guns. Abomey is the residence of the king who has his principal palace here, the other being at Kankab, 7 m S. The town is made up of several groups of houses thickest in the W and S.W. the palaces and houses of the chiefs being enclosed in compounds, overgrown with trees and bush. On the W side is a suburb which is much superior to the rest of the town in cleanliness and pleasantness. There are four large and several smaller markets. The place suffers from scarcity of water. At Abomey are held the customs or annual sacrifices of human beings, the object of which is to furnish the late deceased king with a continual supply of officials and attendants in the realm of the dead. Upon the death of a king his successor celebrates the grand customs, when the victims are estimated to amount to 500 at the annual sacrifices the number is said to be about 50 chiefly criminals and prisoners of war reserved for the purpose. But frequent executions take place throughout the year and thus the loss of life is estimated at not less than 500 annually and 1000 in the year of the grand customs. The victims are executed in various ways—shooting, beheading, beating with clubs, and are often mutilated, the bodies being attached in various positions to scaffolds erected for the purpose.—(Barrow's *Dahomey* etc.)

ABONA a vil Canarian Islands, at Tenerife in a valley at the foot of a mountain called *Mesa de Escalona*. In the dist. of Orona. It is built chiefly of uncoated stone and has a parish church and a fertile soil which suffers however from want of water. The chief products are wheat, barley, banila, figs, and cochineal. At its small harbour a good deal of paving tile and brown stone is shipped. Pop. 1516.

ABWO a mountain India, Rajpootana, in the territory and to the S. of the town of *Berach*. It is connected with

temples, forming one magnificent edifice in the form of a cross, and declared by Tod to be, beyond controversy, the most superb of all the temples of India. They are all of white marble which, as it does not exist in the locality must have been brought from a considerable distance and one of them, the *Vishnu Sah*, is said to have occupied fourteen years in its construction and to have cost eight hundred millions sterling. Externally it is perfectly plain, but within nothing can exceed the magnificence and richness of the decorations. The mountain appears to be composed chiefly of granite. Part of it is now used as a mart, for which it is well adapted by its pure air, moderate temperature, and beautiful scenery.

ABRA a prov and river Philippine Isles.—1 The prov *Abra* or *Centro del Abra*, near the centre of the isl. of Luzon, lies between lat. 16° 6' and 17° 30' N and is bounded N by *Ilocos-norte*, E. *Cagayan* and *Nueva Vizcaya*, S *Pangasinan* and *W Ilocos-sur*. It is rugged and mountainous throughout, and covered for the most part with dense forests, which yield strong and durable timber. Some of its valleys are fertile, and metallic ore, gypsum and coal are said to exist among its mountains. The principal wild animals are the buffalo, hog deer and common fowl. The total pop. subject to Spanish rule is about 29,000 but many wild tribes occupy the mountain recesses. *Abra*, which previously formed part of *Ilocos-sur* was created into a separate prov. in 1846.—2 *Abra* the river which gives its name to the prov. has its source in the highest part of the Cordillera of Caraballoa, and after dividing into several branches in *Ilocos-sur* reaches the W coast. It is navigated by the light boats of the natives and is much used for irrigation.—(Crawford's *Descriptive Dictionary of Indian Islands*)

ABRAMAM a tn India, presid. Madras dist. and 40 m S.E. Madras, below the bank of a lake of same name. It consists of two long and well formed but narrow streets, with mean houses, occupied chiefly by *Mussulmans* and a trade of Hindoo merchants and *castes*, whose trade in grain, cotton and cloths is considerable. In consequence of the ample supply of water obtained from the lake the fields in the neighbourhood yield two crops annually. About the lake itself the only thing remarkable is its embankment, which is formed of stones so large that antiquarians are puzzled to understand by what means they were originally placed, and so strong that no breach has ever been made in it nor even any repairs required.

ABRINDADAB a vil Persia, prov and 17 m W N W Yezd. It has a small square fort enclosed by a double wall.

ABRUAD the cap of Nejd in Arabia.

See **RIAM**

ABRUCENA a tn Spain Andalusia, prov and about 25 m N Almeria, and 100 m ENE Gibraltar, picturesquely situated on the summit of a hill. It has a magnificent parish church rebuilt in 1828 the former one having been burned down several times; and a pop. of 1859 chiefly engaged in agriculture and grazing.

ABUEKA a river Russian empire, Manchouria, which, rising in a mountain range flows W and joins the *Ussuri* on its right bank, lat. 47° N. Jan 1856 E. Though it has a course of several hundred miles it is so shallow at its mouth that it can be forded.

ABU GHER, a tn Central Africa, latitudinal 20 m N N W Masena. It consists of two groups of huts separated by a hollow in which a very important weekly market is held for the sale of sheep and cattle, sorghum, cotton tobes, cowries, and bees for field labour. The Fulbe or Felleh having founded the place, still form a large part of the inhabitants.

ACAGUAPA a river Central America, tributary of the Lempa, and the last of any consequence which joins that river before it falls into the Pacific on the E coast of San Salvador. It rises in the volcano of San Vicente, and has a course of about 30 m.

ABON, VIELLA BAY, JAIN TEMPLE.—Sugam's Hindoo architecture.

the Aravalli range, and rising from a base about 45 m. in circuit, terminates in numerous peaks, the loftiest of which *Garu Nikri*, is nearly 5000 feet above the sea. It is much visited on pilgrimages, especially by the Jains who have at Dilwara, about the middle of the summit, a group of four

On the N. side of the hill is a natural chasm filled with water and to be several hundred feet deep. The ascent to the fort is by difficult footpaths and then by steps cut in the rock, which are further protected by a succession of strong

The surrounding district, though fertile, is merely and unhealthily

AFKA a vil Palestine about lat. 34° 10' N., lon 35° 50' E. situated on the W Lebanon range, in a large and verdant amphitheatre in the S.E. branch of the hanks of the Akura, where the Mahr Thashim (see Adon) has its source. In its vicinity a fine fertile basin furth in cascades from a cavern and directly in front of these are the shapeless ruins of a large temple of Venus.

AFRICA [add] Great additions have been made within a recent date (and especially within the last fifteen or twenty years) to our knowledge of the African continent. Our information respecting that vast region is still indeed for the most part, devoid alike of the fulness and precision which belong to the geography of other lands, and will probably long remain so—at least in so far as the greatly larger portion of its surface is concerned. The conditions of its physical geography equally with the social position of its native races, account for this undesirable distinction. The mysterious interior of the African continent has however been penetrated at numerous points and the comparison of any good recent map of

this portion of the world with one of older date renders obvious at a glance the results accomplished by explorers of the present generation. It shows, at the same time, how much, notwithstanding the achievements of modern travel yet remains open to the labours of future explorers.

It is difficult, within the limits of a brief sketch to convey a clear idea of the widely divergent results and directions of modern African travel still mark its geographical and other results. Perhaps the purpose of the general reader will be best served by concentrating attention upon those features in the physical geography of Africa which recent explorations have tended most to illustrate and the inquiries undertaken in connection with which have proved the means of bringing under notice a vast body of facts concerning the general structure of that continent. The great rivers of Africa by means of which the interior is chiefly accessible to European enterprise, supply the connecting links between the efforts of individual explorers and three amongst them have served in especial measure, to guide the course of modern discovery. These three are—the Nile, the Niger and the Zambesi to the regions respectively watered by which, or in immediate contact with their areas of drainage the footstep of the most distinguished among African travellers of the present generation have been directed.

1 The Nile, first amongst African rivers, has constituted a problem in African geography and one of which the solution is even yet far from accomplished. Bruce, the Abyssinian traveller of the last century had visited (1770) the sources of the Blue Nile, or Bahr el Asrak an achievement in which, however he had been anticipated a century and a half previously by a Portuguese traveller. The source of the White Nile, or Bahr el Abiad—unquestionably the greatly longer though in other regards the less important, arm of the river—remained an object of inquiry. Amongst the many efforts directed to the elucidation of that mysterious spot those undertaken at the instance of the pasha of Egypt in 1889 and again in 1891 take a foremost place. In the former of those years, the Egyptian expedition ascended the river to a point stated as within 8 3/4 of the equator. This was subsequently removed by M. d'Arnaud who accompanied, as surveyor the expedition of 1891, to lat. 6° 35' N. while d'Arnaud himself claimed to have advanced no further than within 4 22 of the equator. Some doubt, however attaches to the verity of the observations made upon both these occasions. Meanwhile, missionary labours and commercial enterprise combined to extend the range of inquiry in this region. The Roman Catholic missionaries established at Gondokoro (lat. 4° 50') in 1858-9 claimed to have examined the river up to lat. 8° N., and some of the merchants of various European countries, engaged in the ivory trade, had

gateways. The m. is neat and regularly built but subject to malaria. It contains about 5000 inhabitants.—2 A territory of which the foregoing is the cap. with an area of 340 sq m and containing upwards of 500 villages and about 45 000 people.

ADONCHOLON a mountain range of the Trans-Bahak, Sibema stretching in a N.E. direction between the rivers Kalka and Argus. Though the southern slopes are bare, the summits are partially and the northern slopes densely clad with birch.

ADRIAN a tn U States, Michigan cap co. Lenoire, on a tributary of the Raisin and on the Erie and Kalamazoo railway 70 m S.S.W. Detroit. It possesses several fine public edifices, and abundance of water-power. Pop. 4000.

ADSANETA DELAAYDA a tn, Spain, Old Castile, prov and 32 m S.S.W. Valencia, about 90 m N.W. Madrid in an elevated valley with a large and substantial parish church, a boys and a girls school, both well endowed, and municipal buildings. It is said to have been founded by the Caracens. Pop. 1204.

ADSANETA DEL MAESTRE, a tn, Spain Valencia prov and 30 m N.W. Castellon de la Plana, and about 185 m E.B.E. Madrid, a bank Moncion. It is well built in regular streets and a spacious square, and has manufactures of linen, hempstee, and shoes, and several oil-mills. Pop. 1324.

AEMGUN a river Aulike Russia, Amoorland, which, formed by several streams from the Kizang mountains in Manchouria, flows eastward, and joins 1 bank Amoor not far from its mouth. Near its banks live the Samagrin, a Tungus tribe, together with the Nagidol or Nialdol, and four other tribes; in its valley good sables are obtained.

AENG —1 A river Aracan, British India, rising in centre of Yoomadung mountains; lat. 20° 2' N. lon. 94° 15' E. and flowing S. 60 m. into Combarura Bay.—2 A vil Aracan, 1 bank river and 45 m from its mouth. Formerly a place of considerable size and trade lately with not more than 150 houses, it derives its present importance from being the starting-point of the great route over the Yoomadung mountains to Ava. At spring-tides the river is navigable up to the village.

AFADE, a tn. Central Africa, prov Kokofo, near E frontiers of Bornou, and 30 m. from S. shore of Lake Chad. It is a walled town of considerable extent, but in a very ruinous condition.

AFREVILLE, a vil N. Africa, Algeria, prov and 60 m S.W. Algiers, at the foot of Mount Zekher in the valley and near the banks of the Chouf. It is proved by inscriptions to have been the site of a Roman town. Its present inhabitants amounting to 1376, are almost all Arabs.

PART OF ADONCHOLON—Foster's History of the Bushes.

established depths lying as far or nearly as far to the southward. Beyond the third parallel of N lat. however the maps exhibited a blank.

Dr. Bohn, whose travels in Abyssinia, along the course of the Blue Nile, had procured for him in 1844, the gold medal of the Royal Geographical Society of London was among the first to suggest the eastern coast of Africa, within a few degrees of the equator as the locality whence exploration might be most advantageously directed towards the adjacent unknown interior with a view to the determination of the limit of the Nile basin and of ultimately reaching the sources of the Nile itself. Several courses continued to direct attention towards that region. The Church Missionary Society established in 1844 a mission in the neighbourhood of Mombasa (lat. $4^{\circ} S$). The missionaries were brought into contact with the numerous Arab traders frequenting Mombasa and other ports on that line of coast, and received from them accounts of a great lake situated at some distance in the interior. In the course of various journeys made in 1847 and the two succeeding years Mr. Robinson and Dr. Krapf, the missionaries obtained acquaintance with an extensive tract of country lying between the parallels of 8° and $5^{\circ} S$, and extending inland to a direct distance of perhaps two hundred miles from the Indian Ocean. They saw for the first time the mountain Kilimanjaro, the summit of which appeared to be covered with snow, whose altitude was estimated at not less than 20 000 feet above the sea. Other and perhaps loftier mountains, were recognised as occurring within the same region particularly one to which the name of Kenia is given lying to the northward of Kilimanjaro though its precise bearing thence has been very variously stated. The asserted existence of snow-capped mountains in such near proximity to the equator awakened much interest, and was warmly questioned by critical geographers. It has, however, been confirmed by the testimony of subsequent observers and particularly by that of the Baron von Decken (1880-1) a man of Hanover who starting from Mombasa and proceeding thence southward along the coast to Wanza, struck from the last-named place into the interior and traversed the Ugongo and Karama ranges the latter 4000 feet high reached the loftier region to which Kilimanjaro belongs. The Baron made two ascents of Kilimanjaro and upon one of these occasions reached the height of 18 900 feet. At the height of 11 000 feet snow mixed with rain appears to have fallen during the night, but disappeared with the morning sun excepting above an elevation estimated at about 17 000 feet. The triangulations of Baron von Decken give for the main peak of Kilimanjaro an altitude of 20 085 feet.

The intelligence gained by the missionaries respecting great lakes, or lakes, in the interior of E. Africa awakened keen interest among the cultivators of geographical science and confirmed the conclusions already as early as 1855 drawn by Mr. Cooley from Portuguese and Mahometan sources. Captain Burton an officer of the Indian army and already familiar with African travel from the experience of a journey in 1854-5 to the kingdom of Harar lying inland from the upper extremity of the Gulf of Aden submitted to the Royal Geographical Society a project for exploring up the lake regions of interior Africa to the S . of the equator. The project happily met with the approval of that learned body and, with the sanction of the British government who made a pecuniary grant for its purpose the proposed journey was undertaken Captain Burton being accompanied in it by Captain Speke, a fellow-officer of the Indian army and his companion at Berbera, on the coast of the Somali country in 1854.

Zanzibar, off the coast of E. Africa, was the point of departure for the expedition of Burton and Speke who started from Kafia, on the coast opposite to Zanzibar at the end of June, 1857. Captain Burton determined to penetrate, by a direct W route, through the country of Unyamwezi. The first 200 m. of the journey lay through successive plains and valleys fertile, and for the most part under cultivation. Various mountain ridges were then crossed the more westwardly of which, the mountains of Unguru, reach 5700 feet in elevation. These mountains formed the highest ground seen by the expedition. To these succeeded high plains arid and comparatively sterile, but improving in character as the

plateau region of Unyamwezi was reached, by a course bearing to the NW . From Kaseh, the capital of Unyamwezi, a further W route led to Liji, on the shores of the large lake of Tanganyika, the waters of which were first seen in Feb. 1858. Respecting the lunar extent of the lake, however, nothing was precisely determined, its S . portion being wholly unvisited. At Unyamwezi (within the highlands of Unyamwezi and the tract within which Kaseh is situated) Captain Burton, in the course of the return journey to the coast was disabled by sickness. During the enforced detention at that point of the leader of the expedition, Captain Speke made a detached journey to the northward, and, after travelling about 300 miles made the discovery of another supposed, great lake, called by the natives Nyanza—a generic name for water whether lake, river or pond, in this part of Africa. Speke reached the S . extremity of this lake. The expedition again reached the coast on their return early in the year 1859 after nearly twenty months passed in a interior.

The journey of Burton and Speke in 1857-9 led to the later expedition of Speke and Grant in 1861-3. Immediately on his discovery of the Nyanza lake, a body of sweet water found within a few degrees S . of the equator and at an elevation of between 8000 and 4000 feet above the sea Captain Speke formed the conclusion that it would prove the head water of the Nile. With the countenance of the Geographical Society of London Speke had no difficulty in the equipment of a new expedition for the purpose of solving a problem to which all geographers were warmly interested. In the second journey he is companion was Captain Grant, another officer of the Bengal army. Speke and Grant left England in 1860 and proceeding by way of the Cape of Good Hope, reached Zanzibar in the latter half of that year. Thence (October 1860) they started for the interior pursuing the route taken by the prior expedition as far as Unyamwezi. Many untoward occurrences delayed the expedition during the earlier stages of its progress. From Kaseh (in Unyamwezi) which the travellers were unable to leave until September 1861 a new route was taken to the NW when passing through the districts of Luvua and Karama (the latter a highland region, and crossing the Kitanjale river led to Maschondé (lat. $50^{\circ} S$) in the upper portion of the Uganda country. It was from this place that the first view of the Nyanza was obtained on this journey. Upwards of a hundred and sixty miles (direct measure) intervened between Maschondé and the point where Captain Speke had reached the Nyanza on the preceding journey—a distance however which may be regarded as trifling in respect of a body of water to which its discoverer (chiefly upon hearsay information) assigns proportions considerably exceeding those of Lake Superior. The further course thence was round the NW and part of the N coast of the Nyanza (or Victoria Nyanza, as Captain Speke prefers to call it) through a country composed of low sandstone hills streaked by small streams—the effect of almost constant rains—and grown over with gigantic grass excepting where the latter is supplanted by cultivation. The same aspect, but with increased beauty continued N . of the equator, about the same above which Speke carries the course-line of the lake on that side. Two rivers, the Mweranga and the Lualaba of moderate dimensions, and both flowing to the N were crossed and farther to the E . the Nile itself, described as issuing from the lake by a passage over rocks of igneous character with a descent of 12 feet immediately below forming what the explorer designates the Ripon Falls. At this point, the coast-line of the lake was abandoned and the stream of the river followed down to the Karama Falls (lat. $2^{\circ} 30' N$) its course lying at first through sandstone hills, amongst which it rushes with torrent-like force, and afterwards passing over long flats where it has rather the aspect of a lake than a river. Owing to native wars which forbade the continuance of the track along the course of the stream immediately below the Karama Falls, the river was here abandoned for a time; Speke continuing his route to the NW again came upon it in the Madi country (lat. $4^{\circ} 40' N$) where it still bore the unmistakable character of the Nile along flats, long rapids. From the point now reached, the Nile descended within the part left untraced by the junction of what Speke calls from

native report, the little Luta Naled lake) flows N., receiving a little below a considerable affluence, the Ama river on its right bank continuing though with numerous windings, the same general course. At Gondokoro (lat. 4° 50' N.) where the expedition on foot Mr. Baker an Englishman, the travellers were upon known ground and their further course thence, by Khartoum, through Nubia and Egypt to the Mediterranean, was presented no novelty. They had reached Gondokoro in February 1863 about twenty-eight months after the date of their setting out from the coast opposite to Zanzibar.

Captain Speke was detained five months at Uganda, while waiting for his companion, who had been left behind from illness at Karagwe. Mr. Petherick who had been detached from England with well-appointed means to ascend the Nile valley in order to aid in the accomplishment of the main purpose of the expedition did not arrive at Gondokoro until after Speke and Grant had also reached that point upon their downward course, and accomplished nothing in the way of geographical discovery. A partial examination of the Bahr el Ghazal, a W. affluent of the Nile, joining the main river about lat. 9° 10' N. is due to the enterprise of that gentleman on a previous occasion. Results of some interest in reference to the same locality have emanated from the enterprise of a party of Dutch ladies—Madame Tinné and her daughter—who accompanied by Dr. Haug in a German ascent undertook the examination of the Bahr el Ghazal basin, without, however, accomplishing their ultimate intention of reaching the mountainous region in which its waters appear to originate.

The results of Captain Speke's expedition though of high value to geography cannot be regarded as final in their nature even in so far as the outlet of the Nile, from its alleged reservoir the Victoria Nyanza, is concerned, while they admittedly leave to the solution of future explorers many questions connected with the real source of the Nile, the extent and character of its Upper Nile basin, the heights of the Nyanza basin, and the nature of the ground by which it is bordered to the E. Indeed the existence of the Nyanza as a single lake is not absolutely determined. Speke touched at only three points in his two journeys, and those at long intervals, and there is nothing to identify the waters seen at these several times as forming one expanse; on the contrary the natives informed him of a road to the coast, which must have crossed the very centre of the alleged Nyanza. Again between the point at which Captain Speke left the river which he traced downward below its issue from the lake and that at which he reported its waters, there intervenes a distance of above 100 miles in a direct line, and of nearly double that measure by the winding course which his map gives to the supposititious channel of the river itself. Anything less satisfactory than Captain Speke's geographical details when critically examined, it would be difficult to conceive. The whole E. and most of the W. and N. sides, of the Nyanza basin remain moreover wholly unexplored. Even allowing the claim of that body of water to be regarded as the reservoir or head-water of the Nile the most distant source of supply to the Egyptian river has yet to be determined by examination of such affluents as may be found to contribute to the Nyanza basin. Whether any of these derive their supply from the high lands to which Kilimanjaro, Kenya, and others of the snow-capped summits above referred to, belong (and which Dr. Baker and others seek to identify with Ptolemy's Mountains of the Moon) constitutes one of the points to be settled by future travellers.

The picture of social life which Captain Speke's pen places before the reader is in the last degree unattractive. The native kingdoms which adjoin the Nyanza on its W. and N.W. side exhibit a population sunk in a condition of almost hopeless barbarism and present an aspect of things which appears altogether to negative the idea of any advantage, commercial or otherwise, to be realized from intercourse with these lands.

2. Further to the southward, the course of recent African discovery has been chiefly in connection with the valley of the river Zambesi and its affluents to its extensive basin.

* Mr. Stanley in his interesting and critical essay, *Cleopatra's Pool and the Nile*, endeavours to show that the Mountains of the Moon do not belong to the genuine text of Ptolemy but are an Arab interpolation.

The results realized in this direction are mainly due to the energy of Dr. Livingstone, whose functions as a missionary led him to intercourse with the Bechuanas and other natives dwelling to the northward of the Cape Colony and beyond the banks of the Orange river. Dr. Livingstone's journeys in the more distant interior were preceded by his visit in 1849 in company with Messrs. Orellana and Murray to the banks of the lake of Ngami, a region known only by report, and to reach which the Kalahari desert had to be traversed. Two years later the enterprising missionary arrived, several degrees farther north (lat. 17° 50' S.) on the banks of a considerable river flowing to the eastward, and which he at once concluded to be identical with the Zambesi. From Bechuanaland, on the Lesembya (as the river is there called) Livingstone performed a most arduous journey in the general direction of N.W., by way of the Lecha valley and across the elevated region which divides the waters of the E. and W. seas, to the Portuguese settlement of Loanda, on the Atlantic coast, which he reached early in 1854. After a brief stay in that city he retraced his steps to the eastward, and in the course of that and the succeeding year accomplished the still more arduous feat of crossing the entire breadth of S. Africa, arriving early in 1856 at the Portuguese settlement of Telo on the Lower Zambesi whence he reached Quillimane on the shore of the Indian Ocean. In the course of that prolonged exploration, Livingstone visited the magnificent falls of the Lesembya, to which he gave the appellation of the Victoria Falls lat. 18° S.; lon. 25° 50' E.

The discoveries of Livingstone excited the warmest interest on the part of his countrymen, and, indeed throughout the civilized world. The fact (first demonstrated by him) of the existence of a net-work of waters in the interior plains of S. Africa, which find a way to the oceans on either side through openings in the bordering high grounds, gave a solution to the previously unsettled problem presented by the existence of that continent; while the conditions of climate and nature produce throughout great part of the regions which he traversed were such as to encourage sanguine hopes of future commercial intercourse with those distant regions, with attendant advantage to its native races. Here as elsewhere in that unhappy continent, the slave-trade is the chief agent of debasement and extends its influences from the coast regions far into the interior. Whichever La mapstone penetrated beyond the authority of the Portuguese, to whom the seaboard on either side of the continent belongs and beyond the influences of the slave-trade, he found a docile and well-intentioned native population obviously capable of improvement. But the ardent temperament of the courageous voyager had led him as his own later experiences have too painfully shown to draw too highly-coloured a picture of interior S. Africa, and the promise of a navigable river affording easy access to the heart of the continent is altogether belied in the mass of the Zambesi and its affluent streams.

Dr. Livingstone visited England in 1856 after sixteen years passed in S. Africa. In the spring of 1858 he returned to the scene of his labours probed with scars for the ascent of the Zambesi, with a view to the adoption of measures calculated for the suppression of the slave-trade, and the substitution for it, on the part of the native population, of cotton-culture and other legitimate branches of industry, fortified by the sanction of the British government, by which he was invested with a consular mission to the Portuguese settlements on the coast of E. Africa. His most sanguine promoters allow the Zambesi expedition to have proved a failure, in so far as its higher aims are concerned and Dr. Livingstone, after six years of brave, though hopeless, struggle against the difficulties by which he has been surrounded, has since revisited England. Most of his companions had already abandoned the promised field of enterprise and directed their labours to other channels. The steamer with which Livingstone had been furnished proved altogether unsuited for attempting the powerful current of the Zambesi, which (like all the other streams of the African continent) exhibits striking changes with opposite seasons of the year, the periodical rise of water being in one part as much as 30 ft. Results of considerable geographical importance have, however, been accomplished. The Zambesi was ascended to 60 m. above

Told, at which point the Kabraba rapids offer a formidable impediment to further progress above the rapids its course was traced with few intervals, up to the Victoria Falls, and the identity of the Zambezi with the Zambezi river placed beyond doubt.

Dr Livingstone's own labours however were principally directed to the valley of the river Shire—a considerable affluent of the Lower Zambesi, on the E. bank of the latter. The Shire was found navigable from the point of junction with the Zambezi up to the cataract of Manuvra—a distance of about 150 m.—at which point commences a series of falls extending through 58 miles. Above these cataracts the river again becomes navigable to its outlet from the fresh-water lake of Nyassa, or Nyanza, in lat. 14. 25 S. A narrow isthmus, in one part only 6 m. across, divides the Shire valley and the S. extremity of the Nyassa lake from another lake of large dimensions called Shirwa, which latter has no outlet, and the waters of which are bitter though drinkable. The valley of the Shire was found to be bounded by well-defined terraces on either side, Mount Zomba rising above the level of the E. plateau to 4000 ft. or double that altitude above the sea. Livingstone launched on the waters of the Nyassa lake a boat sailed above the cataracts for the purpose, and explored its W. coast line to a distance of 200 m. Nothing was ascertained respecting the limits of the lake to the northward.

The discovery of the two large lakes above-mentioned with the examination of the Shire valley constitutes the chief gains to geography due to the Zambesi expedition. The lower course of the Murrumbidgee in which enters the sea beside Cape Delgado (lat. 10° 25' S.) was also examined in person by Livingstone, and enough ascertained to negative its supposed connection with the Nyassa lake.

3 The countries watered by the river Niger have during nearly three-quarters of a century offered an inviting field for African travel and exploration, in spite of the attendant difficulties and dangers due to unhealthiness of climate and barbarous and lawless of local life. The African Association formed in London in 1778 directed its early efforts to these regions. In the case of the river Niger the problem which long presented itself was the route of that offered by the Nile; the great object to be attained consisting in the tracing the stream to its final outlet. To this object during a long series of years the travels of Mungo Park, Clapperton the Lander, and others were powerfully devoted.

At length, however, the problem of the outlet of the great river was solved by Richard Lander and his brother John, who jointly leaving the coast of Guinea in the early part of 1830 and reaching Bornu, traced the course of the Niger thence downward to the sea, following the channel known as the Benue river the principal one amongst the many branches belonging to its extensive delta.

The successful enterprise of the Landers prepared the way for later attempts at developing the commercial resources of W. Africa. Leard and Oldfield, in 1835, ascended the river with a view to this object, accompanied by Captain William Allen. He executed a survey of it from the sea up to some distance above the point where it is joined on the E. bank by the great stream then known as the Chadde, but since more correctly called the Benue, and examining also the latter for some miles above the junction. In subsequent years repeated ascents of the Lower Niger have been made by Bennett and others, and the stream known as the Old Calabar which enters the sea to the E. of the Niger delta, has been similarly explored by means of steam navigation, which alone enables the unhealthy belt of mangrove swamp immediately adjoining the coast-line to be traversed with the speed requisite to insure safety. The Niger expedition of 1841 fitted out by the British government for philanthropic purposes, with a view to the suppression of the slave-trade on its banks proved an utter failure, and was attended by terrible sacrifices of life. But the feasibility of navigating the Lower Niger and Benue rivers without serious danger to life, has been fully demonstrated by Dr Baikie, who in 1854 took the steamer *Fleed* up the main stream to the point of junction with the Benue, and ascended the latter river to a distance of more than 800 m. above the point of junction or 250 m. above the farthest point reached by Allen and Oldfield in 1835 returning to the sea without the loss of a single life. Dr Baikie's

successful conduct of this enterprise induced the British government to equip a renewed expedition, directed with a view to the forming a station alike for commercial purposes and as a centre of missionary operations, at some point within the basin of the Lower Niger and Benue. In command of this expedition Dr Baikie left England in 1857 and was engaged during the seven succeeding years in various investigations within the region adverted to, some of his later journeys in the interior having been extended to the kingdom of Kano and the high grounds dividing the basin of the Niger from that of Lake Chad. The geographical results of this expedition, which have hitherto been but partially given to the public, are its only important fruits and have been purchased (like so many of the discoveries made in the African continent) with the life of its conductor who died on his return to England in 1864.

The voyage of the *Fleed* was in some measure supplementary to the purposes of an important expedition for the exploration of Central Africa by overland journey through the desert conducted at the expense of the British government. This was the undertaking originated by Mr Richardson an English traveller with whom were associated Drs Barth and Overweg. At the close of 1849 the three started together from Tripoli to proceed southward through the desert. Want of harmony however soon led to their separation on different routes though it was arranged that the town of Kouka, the capital of Bornu, should form a point of common rendezvous. Richardson died shortly after from fever Barth and Overweg rejoined one another at Kouka whence the latter devoted some time to an examination of the Chad basin, including a hurried and imperfect navigation of the lake itself in a boat which had been carried across the desert for the purpose. Overweg, like so many other African explorers, paid with life the penalty of his enterprise, dying in the following year (1853). The sole conduct of the enterprise during its remaining portion devolved on Dr Barth. After some time spent in Agades, engaged in the study of the mixed nations that dwell on the borders of the desert he again repaired to Bornu and thence accompanied a native embassy southward to Adamaua—a tract of country hitherto unvisited by Europeans, and lying within little more than eight degrees of the equator. On his way Barth crossed the Benue river immediately below its junction with the Fara—another considerable stream, flowing like the Benue itself from the southward. The confluence of the Fara and Benue is ascertained to be within 50 m. or 60 m. of the farthest point reached by the officers of the *Fleed*, in the ascent of the so-called Chadde (properly Benue) river and the identity of the Benue with the great eastern affluent of the Niger is fully established. The Benue is said to be navigable a long way farther up and to lead into populous regions as yet unvisited. By ascending into the country southward of Lake Chad to the source of which he created the two branches of the Shary river Barth defined the limits of the Benue basin to the eastward, and established its complete separation and consequently that of the Niger from the waters of that inland lake.

Barth subsequently directed his footsteps to the westward reaching Sokoto he advanced thence to the banks of the Niger and crossing that river proceeded in a north westerly route, until he again came upon the stream above Timbuctoo, in which city (hitherto unvisited on the part of Europeans, except by Major Laing in 1826) and two years later by René Caillié a Frenchman) he made a stay of seven months. Our prior knowledge of Timbuctoo had been vague and imperfect in the extreme. Laing had been murdered in the desert shortly after leaving that place, and Caillié's account of it was altogether wanting in precision. During his prolonged residence there Dr Barth obtained a large amount of valuable information bearing on the geography and history of Central Africa, and strikingly corroboratory of the views which had been enunciated by Mr Ooleley several years before, in the volume entitled *The Geography of the Arabs* (London, 1842). After tracing the river downward from Timbuctoo to the point at which he had previously crossed it on his upward journey and thence repairing Bornu, Barth subsequently returned to Europe, bringing with him the valuable fruits of six years of adventure, often pursued under circumstances of privation, hardship, and peril.

While Dr. Barth was engaged on his journey to Timbuctoo the expedition, of which he had now become the sole commander, received a reinforcement in the person of his countryman Dr. Eduard Vogel, who in the summer of 1853 set out from Tripoli, on his way to Konka, the starting-point for his future operations. From Konka, Vogel made in the course of 1854 and the following year several extensive journeys to the S. S.W. and W.—visiting in company with a six-hunting expedition of the sheikhs of Bornu, the Mesopotamian country to the S. of Lake Chad and the mountainous tract of Mandara, in the same general direction. To the S.W. he penetrated to Jakuba (lat. 10° N.) and thence reached the banks of the Benue, at the point where the English expedition under Baikie had terminated the navigation of that stream. Returning to Konka at the end of 1855, Vogel's great remaining object was to penetrate eastward through the unexplored country of Waday to the lands falling within the basin of the Nile. He proceeded on this adventurous enterprise by way of the S. shore of the Chad and the basin of Lake Fitte, and succeeded in reaching Wana, the capital of Waday. At that place in February 1856 he was unfortunately put to death by order of his sultan. The subsequent murder of Barth's attendant involved the loss of his papers, with the detailed record of his later proceedings and observations—a matter of more than ordinary regret, since Vogel was known as an accomplished astronomer and botanist.

The space intervening on the map between the E. shore of the Chad and the W. borders of the Upper Nile basin, comprehending the barometrical W. side and its adjacent lands, indicates the present great desideratum in the geography of the N. half of the African continent. Southward of the Niger and Chad basins, a still larger and more open to the efforts of future explorers. The basin of the great river Congo which enters the Atlantic in lat. 2° 10' S., is almost entirely a *terra incognita*, and the native kingdoms which enter one between the Portuguese possessions on the W. coast, to the S. of the equator and the Tanganyika of Burton and Speke are only known from the reports of Arab traders. The expedition commanded by Captain Teuley in 1816 was directed to the mouth of the Congo under the impression that it might prove to be the outlet of the Niger then unexplored. Teuley's expedition, his ships only a short way up the river but extended to a farther distance (280 miles on the whole) by means of boats, and partly by land-marches. All the leading members of this unfortunate expedition, including the commander, fell victims to the terrible fever of the African coast. Notwithstanding this fatal experience, however, Captain Bodingfield proposed (1864) a fresh expedition to the Congo, with a view to exploration of the high lands adjoining its upper course. No difficulty appears to attend the navigation of the river for 100 miles upwards. Formidable rapids in its course, through which the stream is narrowed between high rocks on either side, form an impediment to further progress, except by boats above the rapids, the Congo again expands into a noble stream.

The researches pursued by M. du Chaillu during a period of four years (1858-9) within the tract of country extending two degrees on either side of the equator, and adjoining the mouth of the Gaboon river upon the W. side of the African continent, excited deep interest in Europe in connection chiefly with the great anthropoid ape, the gorilla, of the habits and characteristics of which that traveller professed to give the first authentic account. The field of M. du Chaillu's adventures includes the lower channels of several considerable rivers, of which the Ogoué appears to be the most important. M. du Chaillu claims to have penetrated in the centre of his various journeys to a distance of above 200 miles inland; but his geographical details are confessedly imperfect. He has since (1863) left England for the scene of his former labours, with a view of following the line of the equator until he meets some of the rivers falling into the Nile, which he supposes to exist W. of the country visited by Burton and Speke. On

the same side of Africa, a few degrees farther northward Captain Burton has (1861-63) increased his many prior claims to the gratitude of all who take an interest in African geography, by a careful examination of some of the smaller rivers that enter the Right of Benue, and also by an ascent of the lofty Cameroonian Mountain, a volcano not yet wholly extinct, which he identifies with the Thon Oohuma of Hammo's Periplus. The highest point of the mountain according to Captain Burton reaches upwards of 13,000 feet above the sea. The elevated regions of the Cameroons exhibit every morning, even during the hot season, a covering of hoar-frost, and are well suited for the purposes of a sanatorium.

It is perhaps in reference to the physical conformation of the northern half of Africa that the gain due to modern travel is most conspicuous. Instead of the high plateau-lands which it was long supposed to constitute, the interior appears to exhibit a series of watered plains, but moderately elevated above the sea and bordered on either land by ranges of higher ground, through openings between which the waters of the interior reach the ocean upon either side. The numerous lake-basins already ascertained to exist within the eastern interior to the S. of the equator constitute indeed one of the most strikingly important features of modern geography and one that stands most in contrast with the popular conceptions of a region generally associated with the intensest conditions of heat and aridity. Much however is yet wanting to give anything approaching completeness to our knowledge of the African continent and to warrant anything beyond a merely general view of its structure, such as is here expressed.

AGA, one of two mountain chains, Arabia, which stretch N.E. and are separated from each other by the valley of Jabel Shammur. Both are composed of granite, have an estimated height of 1000 ft. above the adjoining plain, and embrace a circuit probably not exceeding three days' journey. They are covered with brushwood, and intersected by flat valleys and plains. The less and more eastern range is called Salma. The Aga which is much more extensive commences in the vicinity of Medina, and continues to stretch N.E. till it becomes linked with the chain of Alharaz, so as to form the natural boundary of Naga on the N.W. side.

AGADES (ald.), a N.W. Africa, cap. kingdom of Air or Aghem, 840 m. N. by W. Kano; lat. 13° 10' N. It stands upon the edge of a table land at an absolute height of about 2500 ft., and is enclosed within a circuit of about 81 m. The

AGADES.—Burton's Travels in Africa.

most conspicuous public building is the chief mosque, surrounded by a wall of singular construction rising from the platform or terrace formed by the roof to the height of about 50 ft. The hollow interior is lighted by seven openings on each side. Being built entirely of clay, it has been strengthened by building the walls together with thirteen layers of boards of the doum-palm, which form as many separate stories. The other mosques said to have been once so lofty and still ten in number are unimpaired of special notice. There are also six schools scattered over the place.

in which a little reading and writing is taught to about 800 boys. The sugar trade of Agudon has been diverted into other channels, and speculation in grain is now the principal business—grain itself forming the chief medium of exchange. It is in an advanced state of dilapidation and decay and the population cannot be estimated at more than 7500.—(Barb.)

AGANGUERO a tn. Mexico, state Morelos, about 20 m. W. N. W. Mexcala. It stands in a mountainous and well-wooded district, at the height of 8000 ft. above the sea, and was once famous for its mines. Pop. 3000.

AGHON a tn. Yucatan, W. Africa about 20 m. E. Ibadan, about lat. 7° 55' N; lon. 4° 3' E. It is surrounded by a wall which incloses, in addition to the houses a large extent of uncultivated ground.

AGHOMBY see AGHOMBY

AGHORO a tn. West Central Africa, about 20 m. S. of the Kware; lat. 8° 30' N; lon. 8° 45' E. The houses occupy a considerable height, and look at a distance like large stones on the top of a bare hill.

AGHDA a tn. Persia, subject to the governor of Nain, about 100 m. S. E. E. Isfahan. It lies about 2 m. N. of the mountains which bound the plain of Nain on the S and though now a very ruinous and mean-looking place with about 800 poor families, indolent, by the adjacent ruins, that it was once of more importance. Its prosperity has been destroyed by the frequent invasions of Baluch and Bakhtiari plunderers. The productions of the district are wheat barley cotton excellent pomegranates, figs, grapes &c.

AGNO GRANDE a river Philippine Isles Luzon. It rises in the loftiest valley of the cordillera of Camballo, in prov. Agno, pursues a tortuous course through a mountainous country and falls into the deep gulf of Lingayen, on the W coast. Its banks are clothed with useful timber bamboo, and rattan, which are conveyed directly to the Spanish dock yards. Many of the natives find employment during several months of the year in washing the alluvium for gold with the aid of the heavy rams of a trellis called the *popo*, which acts as a precipitate.—(Crawford's *Descript. Dict.*)

AGUST a vil. Spain Valencia, prov. and about 12 m. W. Alicante, and about 210 m. S. E. Madrid, partly on a plain and partly on a hill crowned by an ancient strong castle. It consists of several streets and two squares one of them adorned with a fountain. The trade is chiefly in cereals-beans and almonds. It is of Arab origin. Pop. 1500.

AGRA (ind.), a city India cap. prov. same name, r. bank Jumna and S. Indian railway 905 m. (by rail) N. W. Calcutta, and 278 m. (by rail) N. W. Allahabad about 60 ft. above sea-level. There are a printing office, bank, handsome church two places of worship for Mohammedans and one for Baptists, and an orphan institution. Being the seat of the subordinate government of the North-West Provinces Agra has the necessary revenue and judicial establishments similar to those at Calcutta. Adjacent to the city on the W is the official residence of the lieutenant-governor and the government offices are on the N. W. The climate is considered healthy from November to March, but the three succeeding hot months, and the rainy season from the end of June to September, are very prejudicial to health. The markets are well supplied with whatever is required by Europeans. Cotton is sent down the Jumna in boats from Agra, being the produce of the surrounding districts. Salt, also, is an important article of commerce passing through from Rajasthan. The fort stands on the bank of the Jumna in a fortified and unhealthy position. During the great mutiny the Europeans retreated to it, and defended themselves with great gallantry till they were relieved. Pop. 75,000.—(Thornes.)

AGHRA, a tn. Spain, Valencia, prov. and 12 m. N. Alcala, and about 185 m. S. E. Madrid, on a mountain slope in a valley of same name. It has an uneven site, which makes the streets irregular, magnificent fountains and arches in its squares, and in winter serves on a trade in snow which is conveyed for sale to San Felipe and other places. Pop. 1644.

AGUA AZUL, a remarkable tributary of Lake Yucatan or Yucatan, Honduras Central America. It is near the centre of its catchment shore, and is described as an immense spring of clear blue water 70 ft. across, from which a stream flows into the lake equal in size to any of its outlets. In the month of April, however, Agua Azul, as well as all the other streams, become dry.

See also AGUA

AGUANO a vil. S. America, Ecuador 1 bank Napo, with gold washings in its vicinity. It has some trade in rock-salt, brought from the banks of the Amazon.

AGUARICO a river S. America, Ecuador which rises in the cordillera of Pimampiro not far from the frontiers of Granada, flows easterly about 150 m. for about 240 m., and joins the Napo on its l. bank. In its course it forms a number of lakes. It traverses the country of the Eschibolita Indians, and is much frequented by other Indian tribes. Gold is said to abound near its sources.

AGUARON a tn. Spain, Aragon, prov. and 25 m. from Saragossa, on a mountain of same name. It is irregularly and poorly built. The trade is in wine. Pop. 1125.

AGUAS, the initial name of numerous places in Spain, especially—1 *Agua-Dulce* a vil. Andalusia, prov. and 54 m. S. E. Seville, in a plain on the Gilema, with numerous flow-ells, driven by water the copiousness and an abundance of which has given the place its name. Pop. 888.—2 *Agua*, or *Agua de Baños*, a vil. Valencia, prov. and about 6 m. from Alicante, at the foot of a lofty mountain. Its chief attraction is derived from the mineral springs of Baños in the vicinity. The inhabitants, 1250, are chiefly employed in weaving linen and digging culms from some valuable mines of that substance.—3 *Agua-Bonita*, a vil. and par. Galicia, prov. and about 8 m. from Orense on a lofty hill, with a large and beautiful church which once belonged to the Templars. Pop. 622.

AGUAS CALIENTES, a state Mexico, formed out of portions of Zacatecas is bounded N. by Zacatecas and San Luis de Potosí E. Zacatecas and Guanajuato, and S. and W. Jalisco; area about 2500 sq. m.; pop. (1856) 85 389. The surface is partly level, consisting of a plateau of 5000 ft. of mean height, and partly mountainous being traversed particularly in the N. by branches of the Sierra Madre. The climate is in general mild and healthy and the soil is throughout very fertile, producing corn and yields of excellent quality. In it is W. where the heat is great many tropical fruits thrive well. The mineral wealth is unimportant, though some mines of silver and other metals are worked in several localities.

AGUDO a tn. Spain New Castle, prov. and 50 m. W. S. W. Ciudad Real and about 145 m. S. W. Madrid in a large and beautiful valley at the foot of a mountain range. The houses though only of one story are built in regular streets and two squares. Pop. 1340.

AGULLA, a volcano San Salvador Central America one of a group which forms almost an entire hilly volcanic territory from which arise the elevated peaks of the different fiery craters overlooking the shores of the Pacific.

AGULLANA, a vil. Spain, Catalonia prov. and 20 m. N. Gerona, on the S. slope of the Pyrenees. It is well built and has a massive and very old parish church. Cork is the principal article of trade. Pop. 1084.

AGULLENT a tn. Spain, Valencia, prov. and about 88 m. Valencia, at the foot of the mountain range of same name. It is of pleasing appearance, and well built in regular streets. Pop. 107.

AGUR or *Aroura*, a tn. India, in an isolated portion of Beludias Dominions (Gwalior) on an open and elevated plain in the vicinity of a large and beautiful tank lat. 23° 41' N. lon. 76° 2' E. It stands at the height of 1595 ft. above the sea is surrounded by a stone rampart, and is further defended by a well built fort. Pop. about 20 000.

AGUTAYA, a small isl. of the Philippines, belonging to the Cayas group in the sea of Mindoro. Though only 6 m. long by 3 m. broad, and so rocky as to admit only of patches of cultivation, it contains above 2000 inhabitants who subsist chiefly by fishing trapping for the Chinese market, and rearing cattle, which they exchange in Manila and the fertile Isle of Panay for rice and other necessaries.

AHIGAL, a tn. Spain, Extremadura, prov. and about 45 m. Coacra, and about 146 m. W. S. W. Madrid, on a wide plain, r. bank Alagon. It consists of houses grouped in irregular but tolerably spacious streets, and its chief trade is in corn, wool, and fruit. Pop. 1870.

AHMEDABAD a colonialist India, great Bombay extending 148 m. N. to S., and 69 m. broad, bounded by the Godavari's Dominions, dist. Kaira, and Gulf Cambay and Kachiyar with an area of 4356 sq. m. and pop. of 8.

204,323. It is traversed by the river Sabarmati, and is very low and level, and consequently much affected by the rains, the climate, too, is very hot and sultry. The inhabitants are generally more prosperous than those in other parts of the Deccan, and are much benefited by the passage of the Bombay and Baroda railway through the district, and by a smaller line between the town and port of Dabhoi for the conveyance of cotton, the growth of which has been introduced and carried on extensively in this and the neighbouring districts. Good roads are much wanted, but the loose and sandy nature of the soil and the absence of suitable material, make the construction of them very difficult.

AHMEDABAD [add.] a tn. India. provd. Bombay esp. dist. same name, 1 bank Sabarmati 270 m N Bombay. It was founded in 1412 by Ahmed Shah, on the site of Yasmul, and was converted by him into a great capital adorned with splendid edifices, among which is the great mosque, which stands in the middle of the city. It has two lofty well-proportioned minarets, highly decorated, and

coarse cloth and silk, the latter chiefly wrought in the town of Yech.

AHMEDNUGGUR [add.] three places, India.—1. A tn. provd. and 123 m N. Bombay, esp. dist. or sub-division of same name, near the source of the Gomti, a tributary of the Betnash, surrounded with a wall of no great height, but possessing the additional defence of an innermost and impenetrable prickly-pear hedge. Within the town are a Protestant church, four government schools, one of them English, and the others vernacular and a commodious dargah, or travellers' lodge, capable of accommodating 150 persons. Ahmednuggur was founded by Ahmed Nizam Shah in 1494, and, after passing through various hands, was treacherously sold to the Peshwa in 1759 by the Delhi officer then commanding. In 1803, the Duke of Wellington then General Wellesley compelled its surrender after a siege of only two days. Having returned to the Peshwa, it passed with his other possessions under British rule in 1817 and it said to be gradually recovering its prosperity. Pop. about 80,000.

—2. A tn. North-West Province, dist. and 40 m. S E Allahgur containing 6740 inhabitants.—3. A tn. Gujarat, esp. dist. of same name, 90 m. N N W Baroda. It stands on an extensive plain, watered by the Hast Mithun in partly inclosed by the remains of a fine old stone wall, possesses a fort in a very ruinous condition and contains 5000 inhabitants.

AHUACHARAM a town Central America, state and 45 m. W N W San Salvador dep. Sonsonate, beautifully situated in the centre of the magnificent valley or mountain slope and near a lake of same name; lat 14° N lon. 89° 40' W. Though once a flourishing place it has no building deserving of notice. The pop. about 8000 one-half Indians, are chiefly employed in the cultivation of coffee, the opiate and the tobacco, from the latter of which about 250 tons of brown sugar are annually produced. In the environs about 3 m. to the E., are numerous hot sulphur springs, rising from the spurs of the volcanoes Lajunta and Apaxaca.

AIDINSCHIK, a tn. Turkey in Asia, Anatolia, near Athens connecting pen. islands of Cyclades with mainland 72 m. S W Constantinople. It stands 600 ft.

above the sea, consists of about 600 houses, ranged in narrow dirty streets, and, though not very ancient contains many columns and beautiful Corinthian pillars which appear to have been brought to it from Cyrena. It figures much in the early history of the Omani, as the point from which they started to make their conquests in Europe.

AIGUNT or **AGALLIN OOLA** a naval arsenal of the Chinese, Manchuria, situated 4 m. N W below the junction of the Keys, in a district abounding with villages and cultivated fields. It was once a place of importance, and though now containing only one distill and a few small cottages symmetrically arranged still serves the whole Chinese Amoor fleet as a harbour and headquarters. Its supplies of timber are forested down in rifts from the well-wooded country through which the Kama River flows.

AILLONES a tn. Spain, Extramadura, prov. and 58 m. S E Badajoz. It consists of houses of two stories, of which only a few are commodious and well built, and has a beautiful fountain. The chief trade is in corn and wool P 1798.

AILUTAKI or **WYLLONGAT** an isl. S. Pacific, Harvey group; lat. 18° 28' S. lon. 159° 24' W. It is about 9 m. long, and rising to the height of 800 ft. has a hilly and fertile surface. Around it is a barrier reef, which the S. side extends nearly 7 m. from the beach, but has an opening forming a good and practicable entrance for small vessels. The inhabitants, about 5000, profess Christianity.—[Bight on Central Pacific, Sydney 1867.]

AINA, a tn. Spain, Murcia, prov. and 24 m. S W Albarracén, and about 140 m. S. S. E. Madrid, on the Muria between two almost insuperable heights. The houses are arranged in a long and narrow street and a spacious square.

AHMEDABAD, THE SHAKING MINARETS.—Synthetic View in Western India.

having flights of steps and a gallery at the top. The domes rest on aqueduct columns, and the apses are embellished with elegant mosaic fretwork, and the portico has a beautiful marble pavement. Under the Moguls it lost some of its splendour and is described by Fariahi, in the beginning of the seventeenth century as having streets sufficiently wide to admit of six carriages abreast, and as on the whole the handsomest city in Hindostan and perhaps in the world. In its present decayed state it is a large and populous place, with 150,000 inhabitants, and inclosed by a strong and lofty wall, flanked with numerous towers, and entered by a dozen gates. On a thorough repair of this wall government, in 1894, expended a sum of £25,000 and other means of restoring its importance have been employed. The manufactures for which it was long celebrated consisted chiefly of fine silk and cotton fabrics, cloth of gold and silver various other articles of the precious metals, and of steel, enamel, mother-of-pearl &c. Three government schools, one for English, and two for the vernacular, have been established here, and a new church was erected in 1846.

AIMEUX, a tn. and dist. Florida, about 300 m. S. Keyman, defended with a small mud-belt fort. The dist., which extends to some distance on all sides of the fort, has a pop. of about 1000 families, and yields a great quantity of cotton, rice, oranges, and other fruits.

AHMEDNUGGUR, a dist. provd. Bombay India, between lat. 19° 18' to 20° 30' N. lon. 75° 25' to 76° 37' E. 179 m. N W to S E, and 190 m. broad, and containing 9531 sq. m. with a pop. of about 1,000,000. It is intersected by the Great Indian Peninsula railway, and the Bombay and Agre and other roads. The manufactures are principally of

The chief products are grain, etc. and many goats, sheep, and cattle are reared. Pop. 1180

AINTAS, a river, S. Africa, which drains the Kalahari desert and flowing E. joins r bank Orange river about lat. 28 S. lon 30° 30' E. Its course is estimated at 400 m. and its basin 140,000 sq m. and yet, when visited by Mr. Modie, in Sept. 1888, it had a width at its mouth of only 80 or 90 ft. with a deep sand-bed fringed with the usual river trees.

AIR, AKU, or AKUNA a kingdom, Africa, Sahara, between lat. 16° 15' and 20° 15' N and lon. 6° 15' and 9° 30' E. area about 87,000 sq. m. It consists of a succession of mountain groups and valleys, with a general W slope, and attains in its culminating point, Mount Dogon situated near the centre a height of 6000 ft. In the N. a *haussa* or table-land forms the boundary and water-shed between the Sahara and Senegal. The prevailing rocks are granites and sandstones but in the S. basaltic cones and trachyte pierce the horizontal sandstone strata. The valleys though separated by complete deserts are very fertile, and often of picturesque appearance, whitening along steep precipices, and presenting threads of green in which the oleiferous and several species of mimosa and acacia, with the usual and other trees flourish in immense growth, sometimes garlanded and festooned by parasitical plants. Various wild animals, including the giraffe, hyena, wolf, jackal, wild boar, wild ox, etc. range at will in unfrequented places. The climate partakes partly of that of the Sahara and partly of that of Sudan more agreeable than the former less dangerous than the latter and on the whole healthy and not unsuitable for Europeans. The tropical rains fall regularly the rainy season lasting from the middle of August to the beginning of October. During the winter months the temperature sometimes falls to the freezing-point, and ice is occasionally found in the N. *Amadua*. The soil is cultivated mostly by slaves and gardens and corn-fields, irrigated during the dry months are common near the towns and villages. The principal vegetable products are plums (quilled) waxes dates, various kinds of vegetables, sesame, and radish. The most important mineral is salt, which is exchanged for the productions of Senegal, on which the inhabitants, consisting chiefly of two great tribes called the Kellewis and Kellewis, depend more than they ought, trusting too little to their own resources. The government is described as a monarchy with a curious mixture of the patriarchal character and even a dash of democracy. The chief town is Agades. Pop. about 64,000 and to furnish 14,000 able-bodied warriors.—(Buckley, *North, &c. Exped. to Central Africa*.)

AITONA or AITONA, a tn. Spain, Catalonia, prov. and about 11 m. Lerida, and about 80 m. W. W. Barcelona, r bank Segre, on a wide plain at the foot of a lofty and rugged hill. It consists of 450 well built houses, and the trade is in silk fruit, and especially live-stock of all kinds. Pop. 1427

AJI or HADEN a river India, Bengal which rises in dist. Rangpur, about lat. 24° 32' N lon 86° 10' E. flows successively S.E. through Rangpur and Mongher S. through Barabooon and E. along the S. boundary of this district separating it from Bardwan and, after a course of about 180 m. joins the Bhagirathi on its l. bank at Cuttack, in lat. 23° 29' lon 86° 5' E. It flows through a valuable coal-field which is worked to some extent, and, being navigable for about ten weeks during the rains is then used for sending down coal and iron to Calcutta.

AJOFRIN a tn. Spain New Castle prov. and 6 m. from Toledo. It consists of about 400 houses, many of them in a dilapidated state. The manufactures are woollens, bombazines, cottons, and articles in tapestry. Pop. 2283

AJROOD or KALAT AZROD Egypt the first station of the Egyptian pilgrims on their way to Mecca, 8 m. N.W. Boaz. Its castle is large and in fair order

AKARAMBAY or the iron gorges of the Niger Central Africa, is so called because the stream, previously of considerable width, suddenly contracts and rushes between two large masses of rock not more than 40 ft. asunder

AKHLI a tn. European Turkey near shores of Black Sea, 40 m. S. Yanya. It stands at a considerable elevation amid low country and is supposed to be the locality where a great battle was fought, in the beginning of the fourteenth century between the Catalans and the Massagetas.

AKIKI, a tn. Africa, on isl. of same name, belonging to a small group in the Red Sea, off the coast of Nubia, in lat. 15° 30' N. It is almost destitute of vegetation but is important because of the market which is held at it, and is much frequented by the Bedouins. Many of the inhabitants are engaged in the pearl-fisheries.

AKNUR, or AKNOR, a tn. N.W. India, Ghelab Singh's Dominion, 85 m. N. by E. Lahore, on the Channat, which is here a large navigable stream. It stands at the base of the lowest Himalaya range and at a distance presents a very picturesque appearance the remains of its old palace contrasting in a striking manner with the buildings of its new fort. When entered it is found to be mostly in ruins. There is here a ferry over the river Mount Triketa, in the vicinity is much resorted to by pilgrims visiting the temple situated on its N. side

AKOWLAH or AKORA a tn. India, Hyderabad on an affluent of the Pooree 290 m. E.E. Bombay. Its lofty and well-constructed walls, and the numerous runs contiguous to it, indicate a former magnitude and importance which do not now exist, but it is still a large and populous place.

AKPOKO, a tn. Central Africa, cap. dist. of same name, r bank Chadda or Benue; lat. 7° 55' N lon. 8° 5' 22' E. It is prettily situated at the foot of the Itoma hills, a small range consisting of unstratified rock, which rises to the height of about 600 ft. Its inhabitants are hospitable and commercially disposed

AKRABEH a large and flourishing in Palestine which of old gave its name to the topography of *Ararat* at some distance from r. bank Jordan, about lat. 32° 10' N and lon. 35° 25' E. It is finely situated on the base of a high ridge which here forms a watershed and sends the waters of the adjoining open gallery or plain in opposite directions, E. and W.

AKRON a tn. N. America, U. States cap. co. Summit, Ohio on the Ohio and Erie canal and on the Cleveland and Zanesville railway 100 m. N.E. Columbus. It occupies an elevated site about 400 ft. above the level of Lake Erie, and being furnished with ample water-power by the Little Cuyahoga, possesses a number of large flour-mills, as well as two woolen factories, and manufactures of cards, stoves, and steam engines. In the vicinity extensive beds of mineral paint are extensively worked. There is also a blast-furnace. Pop. above 5000

ALABAMA a river N. America, formed near Montgomery in the State of Alabama, by the junction of the Coosa and the Tallapoosa, flows W. and then S. to its junction with the Tombigbee, about 50 m. above Mobile Bay when it assumes the name of the Mobile, and falls into the bay of Mobile on the gulf of Mexico Steamboats ascend to Montgomery 380 m. but the navigation is interrupted during the season of low water. Some of the largest cotton plantations of America are situated on its banks.

ALACUAN, a tn. Spain Valencia, prov. and 11 m. from Valencia, on a plain in a healthy district. It is regularly built, and the manufactures consist chiefly of various articles of earthenware, made of a fine red clay and displaying considerable taste. Pop. 1778, of whom a considerable number are mulattoes.

ALAJAR a tn. Spain Andalusia, prov. and about 44 m. N. Huelva, and 340 m. S.W. Madrid. It stands in a central space, surrounded by four lofty and rocky heights, and, on the whole, magnificently built. Many of the inhabitants are mulattoes. Pop. 1895

ALA-KOOL, a lake, Asiatic Russia in the S.E. of gov. Tobolsk, on the frontier of Chinese Tartary. It is about 40 m. long by 17 m. broad, and has near its N. shore, a small rocky island rising about 100 ft. out of the water. It receives eight streams, but has no outlet. Humboldt states that a volcano exists on an island in the lake; but according to Atkinson (*Oriental and Western Siberia*) no volcano has ever been in action in this region.

ALAMAY a tn. Central Africa, Bornu, not far from Bendi. It is surrounded with a wall and a ditch, and a dome of clay rises about 10 ft. high.

ALAMO a fort, U. States Texas 1 bank river same name on N.E. side of San Antonio. It was the scene of a deadly struggle in 1836 between a strong body of Mexican troops and a handful of Texans, who shot themselves up in it and perished to a man

ALANIR, a tn. Spain, Andalusia, prov. and about 80 m. N. Sevilla and 305 m. S.W. Madrid, in a hollow between two hills at the end of the Sierra Moron. It consists of 505 houses, arranged in commodious, clean, and well-paved streets, and a spacious square. Pop. 1633, generally employed in cultivating the ground and rearing cattle.

ALANZILLA, a lofty and isolated mountain, Central Africa, near the W. frontiers of Abyssinia, 80 m. S.E. Yola. Its height is from 5000 to 10,000 ft., and its circumference at the base about 50 m.

ALASUA, a vil. Spain, Navarra, in the valley of the Bera, and within 1 m. of Ruesma. It is regularly built, and has manufactures of linen. Pop. 1116, many of them employed in falling timber.

ALATOZ, a vil. Spain, Murcia, prov. and about 30 m. N.E. Alhacete, and 145 m. N.E. Madrid, between some heights on the side of the Sierra Chichilla, near the Júcar. It consists of poor houses in irregular streets, and for trade is chiefly in agricultural produce, considerable numbers of sheep, and some sugar. See. Pop. 1863.

ALATOUAMBA, a tn. Abyssinia, Shoa, on a narrow mountain of same name, about lat. 10° 15' N. lon. 40° 50' E. It is an important place of 5000 inhabitants, who carry on an extensive trade with the interior sending thither glass, cotton goods and silks from India, and receiving in return coffee, cotton, tobacco, and slaves. Salt, in places of fixed dimensions, is used to be the usual medium of exchange.

ALALADEJO, a tn. Spain, New Castile, prov. and 50 m. N.W. Ciudad Real and about 85 m. S.W. Madrid on an uneven and somewhat elevated site. The inhabitants, 1665, are chiefly employed in agriculture and the rearing of cattle, and in exporting yam timber from the sierras of Segura and Almorá.

ALALADEJO DEL CUENDE, a tn. Spain, New Castile, prov. and 14 m. Cuencas, on an irregular slope. Agriculture is the chief employment. Pop. 1383.

ALBALAT DEL SEGART, or **ALBUCCEN**, a vil. Spain, Valencia, prov. and 10 m. N.E. Valencia, pleasantly situated on a mountain side, and a station on the Valencia and Castellon railway. It has many houses and indifferent streets, with a small square. The trade is chiefly in flour, fruit, oil, and honey. Pop. 346.

ALBANY (Fort and Island), Australia, Queensland, a short distance S.E. of Cape York, on the N.E. extremity of the continent; lat. 10° 40' S.; lon. 142° 55' E. The island is separated from the mainland by a deep channel not more than 6 m. in breadth, and is upwards of 8 m. long and 1 m. in its greatest breadth, with an irregular outline produced by a number of bays with small rocky headlands. It is well wooded, and has open tracts of excellent grass-land and the soil which mostly consists of red sandy loam 6 to 15 in. deep, mixed with nodules of ironstone, is well adapted for the growth of useful vegetable productions. The rocks of ironstone in irregular masses, and of coarse sandstone, furnish an abundance of good material for building; and on the E. side of the island are beds of coral of the best description for making lime. Near the N.E. point is a fill of pure water fringed with flowering shrubs and grasses and running into a small natural reservoir. — **FORT ALBANY** on the mainland, opposite the island, affords good and secure anchorage, and is convenient for large steamers, while whole fleets of ships might ride in safety in the adjacent Keweenaw and Newcastles Bays. The general nature of the soil in the neighborhood is a rich black sandy loam about 24 in. deep, and is well supplied with fresh-water streams flowing through valleys, in which are trees growing in great luxuriance, and fine clear fens with open forest ground. The timber on the mainland is of greater variety and better adapted for building purposes, than that on the island. The climate is exceedingly temperate and healthy being free from the excessive heat usual in tropical situations. The port and island have been selected for a new settlement (1862), in which the name of *Albany* has been given, and which is likely to become one of much resort and importance as an intermediate station for steam communication between the two southern colonies and the Eastern Archipelago, &c.

ALBARRACIN, a tn. Spain, New Castile, prov. and 16 m. Guadalajara, has principal and spacious streets, but indifferent houses. The principal crops are wheat, barley, oats, and hemp. Pop. 1081. — **S. Albarracín**, a tn. Spain, Aragon, prov. and 28 m. W. S.W. Teruel and about 105 m. S.E. Madrid, cap. dist. same name, on E. side of a mountain belonging to the chain of Sierra. It is surrounded by much dilapidated walls, and entered by three gates; it built of houses, generally of three stories, in narrow and very steep streets, many of them unpaved; it is the seat of courts of primary and of appellate jurisdiction, and has among its edifices and facilities a large cathedral of the Composite order of 16th cent. architectural merit, but containing some good sculptures and paintings; two other churches, and a college in which about 160 pupils are gratuitously educated. Neither trade nor manufactures are of any importance. Pop. 1580.

ALBAZOLA, or **EXUMA**, a tributary of the Amoor which joins the L. bank a little above Albazin. On a low island before its mouth are still traces of the batteries erected by the Tartars when Albazin was besieged. Albazin abounds with fish.

ALBEMARLE, an isl. S. America Ecuador in the Pacific, the largest, and, with Narborough the westernmost of the Galapagos group, is 60 m. long by about 10 m. broad and forms a singular mass of volcanic ejecta, consisting of six huge craters, situated at their base by the lava which has flowed from them. The loftiest rises to the height of 4700 ft. above the sea. The S.W. side, which lies open to the trade wind and is usually covered by the clouds brought by it, is green and thickly wooded. Immediately N. of S.W. Cape is the loftiest of the craters, and at its foot Iguala Cove so called from the numbers of iguanas frequenting it. These reptiles, though of repulsive appearance, are good eating. Two of the craters were seen in action in 1812 and a terrific eruption took place in 1825.

ALBEMCA, a vil. Spain, Leon prov. and 37 m. S. Sala manca, and about 110 m. W.W. Madrid, on the Sierra de Francia, consists of 460 ill arranged houses. In a very deep valley about 4 m. distant stands the celebrated monastery of Balanera. Pop. 1701 chiefly laborers and militiamen.

ALBERTI a tn. Austrian empire, Hungary, co. and 27 m. S.E. Fowl, on the railway with 2355 inhabitants, who are mostly Protestants. It has a brewery and a posthouse.

ALBOLUTZ, a vil. Spain, Andalusia, prov. and about 8 m. Granada and about 220 m. S. Madrid on a plain at the foot of Sierra Elvira, with houses of one story and a square, with the remains of an Arab fort adjoining it. Pop. 1623, almost all engaged in agriculture.

ALBONDON, a tn. Spain, Andalusia prov. and 38 m. S. Granada, and about 215 m. S. Madrid, on an elevated plain commanding fine views, with 496 ill-arranged houses in unpaved streets, and a parish church of the Doric order divided into three naves. The principal product is wine. A copper mine was once worked in the vicinity. Pop. 8897.

ALBOREA, a vil. Spain, Murcia prov. and about 23 m. N.W. Albacete, and about 110 m. S.W. Madrid between the Calvar and Júcar. A good deal of linen for home use is woven, and there is some trade in wool. Pop. 1771.

ALBUDEITE, a tn. Spain, Murcia, prov. and 14 m. Maron, on a hill with picturesque views. Pop. 1396 chiefly employed in manufacturing sparite.

ALBUQUERQUE, a vil. S. America, Brazil prov. Mato Grosso, beautifully situated in a grove of tropical trees about 8 m. W. of r. bank Paraguay lat. 17° 28' S. lon. 57° 56' W.

ALBUKAKH an isl. or rather group of swampy isls. On, W. coast of Africa, near the mouths of the Kwa, in the Bight of Benin.

ALOALA DEL VALLE, a tn. Spain, Andalusia, prov. and 45 m. E. Cadix, in a mountain valley with a distillery of oil and flour mill, and a trade in corn, wine, and oil. P. 1764.

ALCANADES, a tn. Spain, Old Castile, prov. and 14 m. N. Logroño, on a plain r. bank Ebro, with the supposed remains of a Roman aqueduct, and a trade in agricultural and garden produce, sheep, and corn. Pop. 1660.

ALMOCCER, a tn. Spain, New Castile, prov. and 35 m. Guadalajara, on a plain at the foot of a hill with two schools, a parish church, a Franciscan monastery, manufactures of bone-lime, and some trade in farm produce. Pop. 1662.

ALECUTE, a tn. Arabian empire, Hungary co. and 18 m. N.E. St. Louisburg, with 1900 inhabitants, and a fine archiepiscopal palace.

ALDEIDE or **ALDEIDE** a tn. Spain, Andalusia, prov. Granada, about 210 m. S. Madrid at the foot of the Sierra Nevada 8 m. from Granada. It is poorly built in winding streets. Pop. 1047 employed partly in agriculture, partly in making silpico de alca, and partly in the mines of zinc, lead and mercury in the vicinity.

ALDERHOTT or **ALDERHOTT** [add.] An extensive tract of moorland in the parish was purchased and a permanent camp for training the British army with extensive barracks was established upon it, by the government in 1864. Pop. in 1861 (including military) 16,720.

ALEGRETTE, a tn. S. America, Brazil, prov. Rio Grande do Sul on an affluence of the Iguazu, 290 m. W. Alegre. It is an agreeably situated place, consisting of substantial houses, and possesses a church with three light spires, which form conspicuous objects at a great distance. Pop. 1419.

ALEISA, a tn. Spain Catalonia, prov. and 62 m. Tarragona, on a mountain slope, with well built houses and regular well paved streets a parish church with a magnificent chapel and several distilleries, oil and flour mills.

ALELLA, a vil. Spain Catalonia, prov. and 6 m. Barcelona, on a hill near the sea with well-built houses many features of cotton and mixed goods and several distilleries. In the environs which are beautiful and picturesque, there are many fine villas. Pop. 1784, a large proportion of these fishermen.

ALFIRE, or **ALFIRE** [add.] a tn. and port India, pres. Madras, dist. Travancore, on the Malabar coast 83 m. S. by E. Cochin, 368 m. S.W. Madras lat. 8° 50' N. lon. 76° 25' E. It lies scattered between the beach and an extensive tract of rice-grounds bordering the backwater which here stretches eastward, and forms an extensive lake; it is also traversed by a canal, which passes through its centre, from the backwater to the timber-yard on the coast, and is crossed by six wooden bridges. The S. portion is divided into compounds containing the dwelling houses of the wealthier classes of the inhabitants. In the N. portion the Church Missionary Society have a school and mission-house. Alepe was comparatively insignificant half a century ago, but from the encouragement given to merchants and settlers of all classes it has gradually increased its population and become a place of great trade. It is now the chief entrepôt for the produce of the interior consisting chiefly of teak timber pepper and cardamom.

ALEXANDRA LAND the name recently given (1866) without any precise definition of its limits, to the territory of N. Australia, or to that part of it which extends from the parallel of Central Mount Stuart (lat. 22° S.) northwards to the mouth of the Adelaide river (lat. 12° 15' S.) thus including a portion of what has hitherto been known as Arnhem Land. The country S. of Central Mount Stuart, and intervening between it and the northern limit (lat. 26° S.) of the colony of S. Australia has been named Stuart Land after the indefatigable traveller J. M. Doull Stuart who was the first to cross (in 1828) the middle of the Australian continent from S. to N. and who has given the designation of Alexandra Land to the new country which he traversed. Probably this latter title will supersede or comprehend all previous ones, so that Alexandra Land will be used and understood of the whole of the territory of N. Australia, comprising either Stuart Land in the S. and Arnhem Land in the N. In this event, Alexandra Land may be described as contemporaneous with N. Australia, and therefore as lying between lat. 11° 30' and 26° S., and lon. 129° and 138° E., and bounded on the E. by Queensland and the Gulf of Carpentaria, W. by Western Australia, S. by South Australia and N. by the Arctic Sea. The interior of the country has been as yet only partially explored, but although mostly unexplored it is found to be of a highly fertile and salubrious character. Several rivers intersect it in various directions flowing through ranges of hills and lofty tablelands, the elevation of which render the climate unusually temperate and healthy. The principal of these rivers are the Roper which appears to rise in the table-land from 500 to 800 ft. above the sea in about lat. 15° S. and lon. 138° E., and flowing generally eastward, and meeting many tributaries, enters the Gulf of Carpentaria about lat. 14° 30' S.,

lon. 135° 40' E. the Alligator river which rises in the table-land of an elevation of 8000 to 4000 ft. in about lat. 13° 20' S. lon. 135° 40' E., flows N. into Van Diemen Gulf, the Victoria, in the N.W. running through a hilly and fertile district in a N.W. direction to the sea, and the Adelaide a fine stream, rising in the same range of high land as the Alligator and flowing N.W. into Adam's Bay opposite Melville Isl. The Victoria is one of the largest tidal rivers in Australia, the tide being said to rise 80 to 40 ft. and the gulf into which it flows is capacious enough and suitable for vast fleets of ships. The entrance to the Adelaide likewise affords an excellent harbour for vessels, with shelter from every wind. The river Adelaide has a depth of from 4 to 7 fathoms at its mouth and at 190 m. up it is still about 7 fathoms deep and 100 yards wide, with a clear passage all the way it abounds with fish and water-fowl. The country around it is excellent and abundantly supplied with fresh-water streams, and the herbage most luxuriant. The timber is chiefly composed of string-bark, gum, pine, and other varieties of large trees with quantities of bamboo of great size. The soil about the Adelaide is generally black and alluvial and capable of producing everything that is necessary. This is for the most part the character of all the country N. of about lat. 17° S. the soil being generally formed of fine lacustrine deposits; tropical vegetation appears in the valleys of the Roper and thence to the Adelaide and the sea-coast. Notwithstanding its tropical situation the country is considered admirably adapted for sheep farming, which is already largely carried on in the adjacent colony of Queensland as far N. as lat. 19° S. and is being rapidly extended northwards. There is also a vast tract of marsh land contiguous to the Adelaide highly suitable for the cultivation of cotton. The formation of the high land in which the Adelaide rises is fine granite and quartz, with occasional appearances of ironstone further S. are found sandstone and freestone, and ranges of sand-hills of great extent and elevation, the whole interspersed with extensive and luxuriant grassy plains the more southern districts towards the centre of the continent are less fertile and adapted for habitation, being subject to long droughts and consequent scarcity of water. The whole territory is sparsely inhabited by small tribes of natives, generally fine grown and athletic people but timid and inefficient. Upon the whole the new country especially in the vicinity of the Adelaide river is calculated to become very attractive to colonists, for it presents all the features desirable in new settlements. The introduction of labourers from among the Malays and people of the Eastern Archipelago would materially assist European settlers in the successful cultivation of the land. The home government is already preparing to organise an administration for its proper legislative management.

ALEXANDRIA [add.] a tn. N. America, U. States, cap. of same name, Virginia, finely situated on bank Potomac about 7 m. S. Washington. It is generally well paved and well lighted with gas, and possesses 13 churches several good schools and three banks. The port, now connected by a branch with the Central railway of Virginia, and provided with a good harbor carries on a considerable trade, exporting corn, tobacco, and coal. Shipbuilding is also carried on to a considerable extent, and several large cotton-factories have been erected. The whole country of Alexandria once formed part of the district of Columbia, but was retroceded to Virginia by an act of Congress in 1844. The adjacent heights have been noted as a fortified position during the civil war on the outbreak of which they were held by the Confederates but were taken possession of by Union troops in May 1861. Pop. 5728.

ALEXANDRIA (PORT), British Columbia, Western N. America, 1 bank Fraser river lat. 53° 55' N. lon. 122° 58' W. It is the head-quarters of the Hudson Bay Company for the district, and the nearest and best known port for the Queenella and Caribon gold diggings being the point to which various routes, existing and proposed, from the coast converge.

ALEXIEVSKAYA a tn. Russia, gov. Don Cossacks, cap. dist. Chuprinsk, on an affluence of the Volga 215 m. S.W. N. Novorossiysk. It contains 2801 inhabitants and has several public offices and an annual market.

ALEXINATE, a tn. Turkey in Europe, in the S.E. of Serbia, cap. circ. of same name, on the Balkan Mts., 103 m. S.E. Belgrade. It is the seat of a court of justice and other public office, and has a quarantine establishment, a church, and a school. Pop. 3704.

ALFACAR, a vil. Spain, Andalusia, prov. and 8 m. from Granada, 316 m. S. Madrid, on a mountain slope, a residence of the Sierra de Guadalupe. It has four squares, a public granary, a well-built prison, an endowed school, and a large and handsome parish church. It is an ancient place, and has many houses nearly as the Arabs left them.

ALGABA, a tn. Spain, Andalusia, prov. and within 3 m. of Seville, on a plain between the Guadalequivir and the Huelva, which often overflows its banks. It is poorly built, and has the remains of an ancient Roman tower. Pop. 1813.

ALGAWF, a tn. N. Arabia, lat. 30° 35' N., lon. 40° 30' E. It is beautifully situated in the centre of a valley of same name, which has nearly the form of a regular circle surrounded on all sides by the chain of Gai Alkawf, which rises with a uniform ascent about 500 ft. above the bottom. On the N.W. side the chain opens to a defile, through which the road towards Syria passes. The town itself, built for the most part of sun-baked bricks, and having every one of its twelve separate souks or quarters surrounded by a wall of the same material is nearly semicircular in form, opposite to it, on a limestone promontory, stands the old castle of Alkawf, overlooking the town and the whole valley the diameter of which is about 3 m. Besides the date-palm, which appears to be indigenous, almost every fruit common to the climate is cultivated, though only to a limited extent, in the gardens and orchards.

ALGERSDORF, a tn. Austrian empire, Bohemia, circle and 12 m. N.N.E. Leitmeritz, with a parish church, cotton, woollen and flour-mills. Lignite is worked in the vicinity. Pop. 1400.

ALGETE, a tn. Spain, prov. and 18 m. Madrid on the side of a hill overlooked by others of greater height. Pop. 1009 of whom many are muleteers.

ALGHAZALE, a large vil. N. Arabia, in the valley of Jebel Shammar between the two chains of Aga and Solma, about lat. 28° N., and lon. 42° E. It is surrounded by a wall of sun-baked bricks, and has a pop. of about 900 Shammar families.

ALGIERS, N. Africa, the central province of the three into which Algeria is divided, extends along the shores of the Mediterranean, from Cape Corbala westward to Cape Magreco, and is bounded E. by prov. Constantine, S. the Sahara, and W. prov. Oran. Area about 44,000 sq. m. The surface is composed of mountains and valleys, the former lying generally between S.W. and N.E. and the latter occupying the intervals between them. The mountains, which belong to the system of the Atlas slope partly toward the Mediterranean, and partly toward the desert. The division between the two slopes is formed by an elevated plateau. The two most important rivers are the Rhoud and the Djedid, which both have their sources in the lofty range of Jebel Amer. The Rhoud, after a circuitous course, northwards into the heart of the province, turns W., and after forming part of the boundary between Algiers and Oran, falls into the Mediterranean, near Mostaganem. The Djedid flows eastward, across the Algerian Sahara, and is lost in Lake Nahr. The other more important streams, are the Nissa, which receives all the waters which descend from the N. slope of Mount S. Jeter, the Isser which, after forcing its way through mountainous gorges, falls into the Mediterranean near Delia, and the Moudrit between the Sahel and the Atlas, on the S. lies the beautiful and fertile plain of Medja, which has a length of about 60 m., and a mean breadth of about 40 m., and is by far the finest tract in Algeria. For administrative purposes the province of Algiers is divided into two districts, a military and a civil. The former has six subdivisions; the latter forms the two arrondissements of Algiers and Blidah. The European pop. of Algiers, exclusive of the army is estimated at 74,457; the native pop., exclusive of the tribes of the Sahara, at 228,473.

ALGYOGY, a tn. Austrian empire, Transylvania, circle and 31 m. E.W. Karolyburg, pop. dist. of same name, on a small stream, near the confluence with the Murek. It has thermal springs, with baths, and a large trade in furs. Pop. 1189.

ALHABIA, a vil. Spain, Andalusia, prov. and 11 m. from Almería, l. bank Abolador, near its confluence with the Andarax. It is well built, and has manufactures of glass, distillery and some trade in wheat, barley and maize. Pop. 1492.

ALHAMA, a tn. Spain, Murcia, prov. and 18 m. from Murcia, at the foot of a hill covered by an ancient castle. It is well built in spacious streets, and a public square. The baths, erected over the mineral springs, are ascribed to the Romans. The manufactures are linens, woollen covers, and salt-petre; the trade is in grain charcoal, snow and timber. Pop. 6925.

ALHAMA, a tn. Spain, Aragon, prov. and 60 m. (by rail) S.W. Saragossa, and 123 m. (by rail) N.E. Madrid. It is a station on the Madrid and Saragossa railway.

ALHAMA LA BECA, a vil. Spain, Andalusia, prov. and 11 m. from Almería, 250 m. S.E. Madrid, on the side of the Sierra de Gador, with very indifferent houses; manufactures of linen, distilleries, salt-petre refineries, and oil and flour-mills. Pop. 3264.

ALHUCEMAR, a tn. Morocco, on a small rocky island of same name off its N. coast 97 m. S.E. Ceuta. It rises irregularly upon a slope, and is a place of some strength, being surrounded by a wall with two gates, and defended by a castle flanked with towers. It belongs to the Spaniards, who use it as a penal settlement, and garrison it with 300 men.

ALIAGA, a tn. Spain, Aragon, prov. and 30 m. N.E. Tarragona, 155 m. E. Madrid, on a beautiful plain at the foot of a mountain l. bank Guadaleva. In the vicinity there is an old castle in good preservation. The manufactures consist of seeking corduroys, and linens. Pop. 1122.

ALIBUNAR, a tn. Austrian empire, Servian Banat, military frontier 29 m. N.E. Belgrade, on the S. side of the sandy waste of Bielebort. It contains 4400 inhabitants and has three Greek churches, a school, and a postal railway.

ALI BUNDER, a small tn. India, Sultanate of the Gomee, one of the effects of the Indians to the E. The name Futeh Ali in 1799 in order to import the water for irrigation, and exclude the tidal salt-water constructed a dam near the town, which has had the effect of allowing the channel below to become almost obliterated, and of rendering the Gomee between the town and Hyderabad, navigable by boats only during the rainy season, through the vast deposits of alluvial matter brought down the river being prevented from passing the artificial obstructions. Thus the largest artery of the lake has been nearly blocked up, and the adjacent country formerly very fertile, reduced to the utmost sterility.

ALIPORE, a tn. India, presid. Bengal, 4 m. S.E. Fort William or Calcutta. It has a dry and healthy site, which has induced several Europeans to make it their residence and contains a large jail.

ALIBCH (GHALAT), a tn. Austrian empire, Transylvania, circle and 38 m. N.E. Hermannstadt. Here, in 1861 Prince John Kemény was defeated and slain by Michael Apafi, who, in alliance with the Turks, was contending for the principality. Pop. 1134.

ALIBERDA, a tn. vil. Spain, Extremadura, prov. and 18 m. from Cáceres, on a slope of the Sierra del Alga, in a rugged and mountainous district. It is regularly built on level streets. The trade is in bricks, tiles, and charcoal. Pop. 1764.

ALLAHABAD [all.] a city Hindostan at confluence of Ganges and Jumna, 380 m. (by rail) N.W. Calcutta. It is an important station on the East Indian railway which here crosses the Jumna. In the great meeting the towns suffered much from the violence of the rebels; the Marwaris, however, with a detachment of British troops, were besieged by them in the fort, until relieved. Pop. in 1852, 72,093.

ALLEE MOHUN or **RATON ALI** dist. and tn. India, Malwa, with an area of 708 sq. m., and pop. 70,000. By an arrangement with the Dhar state, to which it was subject, Allee Mohun became tributary to the British government in 1821. The rajah, who is a Hindu, resides at Rajpore.

ALLENDE (San Miguel), a tn. Mexico, state and 66 m. S.E. Guadalupe, on the Rio de la Plata, near the frontiers of Querétaro. It has a parish church, a Franciscan

necessary and a superior school. The inhabitants manufacture arms and articles in leather and also rear great numbers of cattle. Pop. estimated at 12,000.

ALLENSTOWN, a U. S. State, Pennsylvania, cap. co. Lehigh, on the river of this name, 18 m. above its junction with the Delaware, and on a railway which connects it on one hand with the anthracite coal field of the Lehigh, and on the other with Philadelphia and New York. Its pop. mostly of German descent, is about 8,000 and the chief trade is in coal and iron. For smelting the latter several large blast furnaces are in operation. Allenstown is said to contain the first Lutheran church that was built in America.

ALLISONIA, a U. S. State, Tennessee, on the Elk, and the railway from Nashville to Chattanooga, being nearly equidistant from both these places. It possesses the finest water-power in the state, and employs it partly in driving a very large cotton factory.

ALLIYAR-KA-TANDA, a U. S. India, Sindh, East and 34 m. E.W. Hyderabad. It has some manufactures, chiefly of cotton, plain and dyed, and a good bazaar. Its position at the intersection of two great routes the one from Hyderabad towards the E. and the other from Cutch to Upper Sindh and the Punjab, gives it great advantages for trade. Pop. 10,000.

ALMA, a river Russia, in the S. of the Crimea, formed by several streams from Mounts Glatz-dagh and Bahagun flows W. N. W. and falls into the S. part of Kalamita Bay about 18 m. N. E. of the port. It is a rapid but insignificant stream which has acquired celebrity from a battle which now bears its name, and was fought September 20 1854 when the Russians though advantageously posted with a most formidable artillery on the heights which line its bank were driven from their position at the point of the bayonet by the Anglo-French army and forced to a precipitate retreat.

ALMAS (GHEAT), a U. S. Austrian empire, Transylvania, circle and 26 m. N. W. Klausenburg, with 1610 inhabitants and the ruins of a castle which figured in the wars of the sixteenth century. There is a remarkable cavern in the vicinity.

ALMENARA, a U. S. Spain, Valencia, prov. and 17 m. S. W. Castellon-de-la-Plana, on the side of a lofty hill crowned with a strong castle. It is surrounded by a strong and high wall flanked with towers at the salient angles, and has substantial houses straight wide, and clean streets; and two good squares a massive and beautiful parish church faced with blue marble. It is near the railway from Castellon to Valencia. Pop. 12,700.

ALMENDEHAL, a U. S. Spain, Extremadura, prov. and 17 m. Badajoz, on three hills which are apart from others of greater elevation. It consists of houses or rather huts, for a labouring population. One of its two churches is a splendid edifice of three naves richly adorned both externally and internally. Pop. 10,700.

ALMONACID DE ZORITA, a U. S. Spain, New Castile, prov. and 29 m. Guadalajara on the side of the Sierra de Guadalupe. It has two fine mansions belonging to the Counts of San Rafael and Saceda, and a superb fane called the house of buildings, all entire, and constitute one of the chief ornaments of the place, the church being still used for worship. Pop. 12,665.

ALMUDEVAR, a U. S. Spain, Aragon, prov. and 7 m. from Huesca 24 m. by rail N. E. Saragossa, on an extensive plain with commodious and paved streets. It is a station on the Barcelona and Saragossa railway. The remains of an ancient strong castle crown a height in the vicinity. Pop. (agricultural) 18,998.

ALTAFULLA, a U. S. Spain, Catalonia, prov. and 7 m. E. E. Tarragona, on the slope of a hill near the sea-shore. It consists of very indifferent streets and houses; in the vicinity is an ancient castle of massive structure in tolerable preservation. Pop. 11,119.

ATAMAHIA, a river U. S. State, which, formed by the Ooneme and Oonohoe in the S. E. of Georgia, flows S. E. through sandy plains and pine barrens and after a course of 140 m. falls into the Atlantic, 13 m. below Darien. It is navigable through its whole course for vessels of 50 tons.

ATANGAN plateau, Russian Trans-Baikal territory. It is traversed from W. to E. by the Uralungui a tributary of the Argun attains in its culminating point, the mountain

peak of Sokoi, a height of about 9,800 ft., and is well wooded, except towards its S. front, where it becomes almost sterile, and may be considered as forming the N. E. extremity of the Gobi desert. On each side of it, to the W. and E. are several salt lakes of which the Tur-nor is the largest in the former direction, and the Ushakui Tugan-nor and Hize-nor in the latter.

ALTATA, a seaport, Mexico, prov. Baja California, Gulf of California, at mouth of river and 28 m. below Culiacan lat. 25° 8' N. lon. 108° 10' W. It has a considerable trade in Lima or Xicayagua wood, which grows all along the mountain of the Sierra, from San Blas up to Soconusco.

ALTGBERG, a U. S. Austrian empire, Hungary, circle and 8 m. N. Neosohl 120 m. N. Pesth with 2184 inhabitants and valuable mines of argentiferous copper.

ALTHUTTEN, a U. S. Austrian empire, Bohemia, circle and 25 m. S. S. W. Prague, with a machine factory in and from water, and blast furnaces supplied with iron ore from mines in the vicinity. Pop. 10,000.

ALTIN KOOL, a U. S. Russian empire, W. Siberia, gov. and 450 m. S. by E. Tomsk, among the Altai mountains. It is a long and narrow expanse, stretching about 70 m. from N. to S. with a breadth of not more than 8 m. and lies in an enormous chasm surrounded by lofty mountains some of them presenting nearly perpendicular precipices 2000 ft. high. On the W. and S. sides of the lake some of the mountain peaks exceed 10,500 ft. in height, and penetrate far above the line of vegetation into the region of perpetual snow. The depth of water is said to have been found in one spot 2000 ft.; in others still deeper there are no soundings. The surrounding rocks are composed chiefly of slate and granite, and many plants and flowers grow out of their crevices with almost tropical luxuriance. The lake is navigated by the Kalmouks, in canoes hollowed out of trunks of trees.

ALTON, a city and river port, U. S. State, Illinois, L. bank Mississippi river 31 m. above St. Louis and 3 m. above mouth of the Kaskaskia. It is well and pleasantly built, and has large quarries of fine limestone, an abundant coal and timber in its vicinity. It is the central point of several lines of railway diverging from it in every direction. Pop. 4,000.

ALTOONA, a U. S. State, Pennsylvania, on the Central railway 244 m. W. N. W. Philadelphia. Pop. 9,000 the greater part of whom are employed in the extensive engine houses and machine factor as belonging to the railway company.

ALTSTADT, a U. S. Austrian empire, Moravia, circle and within a mile of Hradisch with 1800 inhabitants, and a church. Between it and Hradisch stand the remains of Whitebird which was once the capital of an independent kingdom and was the cradle of Christianity in Moravia.

ALTSTADT, a U. S. Austrian empire, circle and 86 m. N. W. Olmitz cap. dist. of same name, on the Grupa, near the foot of the Spagitz Schneeberg with 1500 inhabitants an ancient parish church a paper mill, manufactures of linen and leather and four yearly markets.

ALXANDRIA, See **ALXANDRIA** in Gazetteer.

ALWUR, or **ULWAR**, or **ALXANDRIA**, a state, India, in the N. E. of Rajpootana situated between lat. 27° 4' and 28° 19' N. lon. 76° 7' and 77° 14' E. and bounded N. by the British dist. Goaroon, and the native state Kot Quarn, E. Goaroon and Bhurtpore, S. Jeypore and W. Jeypore and Jhal Jhar length N. to S. about 80 m. and breadth about 65 m. area, 3578 sq. m. The surface is generally elevated and rugged one or more of the summits rising to a height of 3000 ft. above the sea. The general level however is at least 1000 ft. lower and the greater part of the drainage is carried into a valley watered by the Banhi Nullah, which flows N. N. E. and joins the Jumna. Though much of the territory is of an arid description, water is somehow found on the plains by digging a little beneath the surface, and the means of irrigation being thus provided, the soil, though sandy is highly productive. The inhabitants, known by the name of Mowattas have long borne a bad name, but the influence of British rule, and the dread of punishment, are said to have had considerable effect in taming their predatory and turbulent disposition. Estimated pop. 250,000.

ALWUR or **ULWAR**, cap. of above state, stands at the base of a rocky range of quartz and slate 80 m. S. S. W.

Dalit. It is a place of no great size, surrounded by a mud wall, of which the gates only are flanked by bastions, and it is very poorly built. The only edifices worth notice are the rajah's palace, which is of a cultural form, and has its wall placed with numerous small windows, and decorated with rails and gilding; a pavilion of white marble, built by the late Rajah, near a very deep tank which he had excavated, and displaying no small degree of taste; and several Hindu temples, in a style imitated from Mahomedan structures. A fort, crowning the lofty mountain which overhangs the town, is highly ornamented, and serves the rajah both as a summer palace and as an asylum in times of danger.

AMAPALA or **AMALAPA**, a seaport, Central America, Honduras, on the E. side of Tiger Island, in the Gulf of Fonseca. It is beautifully and advantageously situated on the mountain slope of the island, but very indifferently built. Its port, the best in that part of the Pacific, completely sheltered, and with ample depth of water has made it the most important staple place of Honduras on the W coast and given it commercial relations with foreign places. Pop. not more than 1000.

AMARANTAK, a famous Hindu shrine, dist. Baghar territory Bangor and Noidada. 120 m. S.E. Jabalpur, on a mountain estimated at 8500 ft. above the sea. It is situated in a wild and almost pathless jungle, and though visited by large numbers of pilgrims, has never been thoroughly explored. The temple is said to be 40 ft. in height, and to contain a great number of images of Bhairav or Parbat, the consort of Shiva, who is worshipped here with great fervor. The rivers Noidada and Soans are said to rise in its vicinity.

AMANTE, a vil and par Spain, Galicia, prov. and 7 m. from Orense. The church is ancient, but not otherwise remarkable, and the two schools are endowed. Pop. 1660.

AMAZON, a tn. Marion, state and about 12 m. S.E. Pabla, at a point where two important roads meet. It stands in a fertile district, and is a large and well-built place, with two fine churches, and manufactures of sugar and horse-hair, which are of excellent quality and in general use throughout the country.

AMBA AHALIAN a vil Chinese Tartary Men chow, 2 hank Amoy, above the junction of the Kaya. It consists of a number of scattered houses, badly built of wood, rushes, and clay but each provided with a garden with clusters of trees, among which are hawthorn, plum, magnolia, peaches, and the apple *speciosa*. The fields are sown with varieties of millet and Indian corn.

AMBACA, a tn. W Africa, Portuguese settlements, prov. Angola, esp. dist. of same name, 140 m. E. by S. Lourenço, about lat. 9° S., 35 30' E. It is beautifully situated on an eminence in a plain surrounded on all sides by lofty mountains, and was once a place of importance, though it is now insignificant. The district, which has a pop. of upwards of 40,000, has a highly diversified surface, is wonderfully fertile, and rears great numbers of cattle, and all kinds of agricultural produce, at a cheap rate. About 19 m. to the N. of Ambaca, the Jesuits had a missionary station called Gebende. They are still spoken of with veneration, and seem to deserve it, since the fruits of their labours is still apparent in the great number of persons within the district who can both read and write. Few of them can have been taught directly by the missionaries, and the account given is, that ever since their expulsion, the natives have continued to teach each other.

AMBALAPULLEY a tn. Indian, prov. Madras, dist. Tanjore, situated between the Malabar coast and an extensive tract of cultivated ground, 57 m. S. by E. Cochin. Its chief attraction is its temple, a small, but neat and costly edifice, crowning an arched mound, and having its lower apartment covered with plates of copper and surrounded by three gilt spiral ornaments. Near it is another inclosure, containing numerous apartments for the Brahmins. Its annual festival draws great numbers of devotees from the surrounding country.

AMBALEMA, a tn. S. America, New Granada, 1 h. from Magdalena, in a fertile district, 80 m. W.E. from Santa Fe de Bogota. Tobacco of the finest quality is cultivated in its great extent in its vicinity and forms the chief source of its prosperity.

AMBAR, or **AMMON** [44], bay W Africa, Gulf of Guinea, at foot of Cameroons mountains, which stand directly on it. It is a well sheltered harbour open to the sea breeze, and capable of receiving the largest vessels, and of being made a most complete naval station. The land rises from the almost perpendicular cliffs which form the landward side, and attains an elevation of 8000 ft. within 5 m. of the shore. The E. and N. mountain ranges, named Miron Cove, is completely landlocked towards the weather and at the head of it is Victoria, the missionary station, on a broken volcanic ridge, formed by alluvium from the mountains, and extending 1 or 2 m. in breadth. Opposite the mission house are some scattered rocks, forming a natural breakwater and easily convertible into a pier. Several small streams of pure water flow into and near Miron Cove, and the heights are covered with noble timber trees and swallows in abundance furnish ample materials for building. It is the only point on the W coast of Africa, N. of Cape Colony, where a European settlement could be established above the fever level which is presumed to be 4000 ft. above the sea. The advantage its position offers are, besides its qualifications as a harbour the rapid ascent to a temperate climate free from fever, a small and peaceable native population a central position for all the trading ports on the coast, and a much needed anchorage. The Europeans could transport the cargoes at the port during the day and retire to the pure air of the high land at night. For these reasons it is said to be well adapted for colonization, and particularly so for a Scottish establishment, and is likely to become the Singapore of W Africa. In 1887 Billah, chief of Bumbia, who claimed Amba Bay and Island, as said to have ceded the best part of the country to Colonel Micholls, for the British government, and in 1844 slavery was abolished by a treaty made with the king and his chiefs for a consideration. Victoria was settled in 1865 by missionaries and merchants from Fernando Po, who therein reserved its right to that island, and refused toleration to those not of the E. Catholic faith; the site, a coast length of 12 m. being purchased from the native chiefs for £2000.

AMBATO a tn. S. America, Ecuador cap. esp. same name, 1 h. from the Ambato, on a sandy arid plain about 80 m. S. by W. Quito. It has straight and well-paved streets, good houses, substantially built some of them of two stories, with gardens attached and contains a parish church and several convents. Its manufactures of leather and leather articles are in high repute, and form a considerable article of trade. Pop. 10,000.

AMBOOR a tn. India, presid. and 130 m. W.W. Madras, dist. N. Arcot, near the E. hills of the Barramundi. It was once defended by a strong fort, occupying an adjoining height, and is a neat, well-built, stirring place, inhabited chiefly by active, enterprising Lalhey traders, who purchase the produce of the surrounding country both above and below the Ghats, and transport it to Madras. The staple articles of trade are cotton-ol which is largely manufactured within the town, glass, tobacco, and Indian corn.

AMBRUGIO SAN a tn. Austrian empire, Italy prov. and 10 m. N.W. Verona, with 1515 inhabitants, a new church, with a beautiful tower and excellent fountains of red and white marble.

AMBUIM, or **OMBA**, a territory W Africa, Benguela, between lat. 10° 40' and 11° 30' S. and lon. 16° and 15° E. bounded N. by Quanaa and Libolo, E. Kibala, S. Sella and W. Bamba; area about 8000 sq. m. It is divided into three distinct parts, each of them under a separate and independent chief. The southern is to some extent covered by the Bamba mountains, but has several broad and fertile valleys, and is watered by three considerable streams—the Lomba in the N., the Gava in the centre, and the Shumba in the S. The principal agricultural products are manioc, maize, beans, ground, and potatoes, and the trade is in ivory wax gum copal and coral. The inhabitants are charged with taxation. Pop. about 75,000.

AMEE, a river India, rising in dist. Gurdaspur, lat. 32° 5' N., lon. 81° 35' E. and flowing S.E. with a slow stream, and joined by the River of Bada, all about 70 m. from its source it expands into a lake. From this lake a branch stream flows round the right bank to a smaller island, on which stands the town of Maghar near which the Amee is crossed by the road from Gurdaspur to Ludhiana. One

slowing a S.E. course it flows into the Rapid a few miles below Gettysburg, receiving throughout numerous small streams in this level alluvial district.

AMERICAN, a river U. States, California, formed in the S. central part of the state by the junction of two forks—North Fork, rising at the foot of the Sierra Nevada, and flowing in a general W. S. W. direction for 100 m. and South Fork, issuing from Deepland Lake, 23 Dorado co., and flowing between the two and Sacramento, W. S. W. and W. to its confluence with North Fork. These streams pass through the principal gold-mining districts, and the main river runs with a S. W. course into Sacramento river near the city of that name.

AMES, a vil and par Spain Galicia, prov and about 40 m S. W. Coruña, with a modern church a primary school and several mills. Pop. 4804.

AMERBURY, a tn U. States, Massachusetts, 40 m. N. Boston. It lies along the N. bank of the Merrimack and contains 8565 inhabitants, the greater part of whom are employed in the manufacture of leather and leather articles cartilage, fannel and acetate. The American port J. G. Walker was born here.

AMILQUEUA, a tn. Spain, Basque provinces, prov Guipuzcoa, l. bank Oria, at the foot of Mount Aralar 33 m. N. W. Pampeluna, about 300 m. N. N. E. Madrid. The copper mines, which once enjoyed a great number of persons, are no longer worked. Pop. 1480.

AMHERST, an isl. British America, the largest of the Magdalen islands in the Gulf of St. Lawrence forms the S. W. extremity of the group, and is connected with Grindstone island, situated in the N., by a double line of sandbars enclosing an extensive lagoon 5 or 6 m. long and 1 to 3 m. wide. The hills of the interior rise to the height of 550 ft. Towards the S. E. a remarkable conical hill called the Demoselle and composed of trap of a dark red colour has a height of 290 ft. Amherst harbour situated about 1 m. S. E. of this hill and formed by a peninsula in the S. W. corner of the island they besides having the advantage of an excellent roadstead outside, is the easiest of access and agrees in the Magdalen islands. The depth over its bar bows or is only 7 ft at low and from 9 to 10 ft at high water.

AMITY, a river U. States, Mississippi and Louisiana, rises in the S. W. of the former and flows through Amity co. into the latter with a S. course, and then E. into Lake Maurepas. Small steamboats navigate it for 80 m.

AMJERAH [add.] a petty rajpoot state and in India Malwa, between lat. 22 16' and 22 47' N. lon 74 40' and 75 16' E. and bounded N. E. and S. E. by Dhar S. Dhar and dist. Rang S. W. Alise Rajpoot and N. W. Jabouch length N. E. to S. W. about 42 m. breadth S. E. to N. W. about 35 m. area 564 sq. m. estimated pop. 37 332. It forms five taluoks or small districts. The principal crop is opium, which is very extensively cultivated, the other staple crops are Indian corn, cotton grain sugar cane, jewelry (*Holcus sorghum*) and bayra (*Holcus spicatus*). The town cap. of above state, 60 m S. W. Ojain stands in an extensive valley open toward the N. and enclosed on all other sides by low hills, and is nearly 1900 ft. above the sea. It possesses good bazars where all fully supplied, and a fine tank, which furnishes abundance of water when the small streams which pass the town become dry. Number of houses 500.

AMNONOSBUCK, two rivers U. States, New Hampshire. The one Amnonosbuck, lower rising near Mount Washington in co. Coos, traverses a course of 110 m. and joins the Connecticut the other Ammonosbuck, upper also rises in co. Coos, and joins the Connecticut after a course of about 75 m.

AMONKEAG, a vil U. States New Hampshire, at the falls of the Merrimack, close to Manchester with which it is incorporated. It possesses several large cotton factories, in which also a 4000 hands are employed.

AMOI, [add.] This is the most accessible of all the ports in China open to foreign trade, for ships of large burden either entering or departing. So easy is the navigation according to the charts of the Royal Hydrographic department, that no pilot is necessary so that it is optional for a shipmaster to employ native boatmen for that purpose. Perhaps it was from this facility of access that Amoi became the first Chinese port to trade with foreigners, who are stated in the records

of the country to have visited its harbour before the eighteenth century. In 1780 English and Portuguese ships frequented thisemporium of the province of Fokien or Foo-chien, as it is pronounced by the inhabitants. According to an estimate made in 1860 the island of Amoi is 40 m. in circuit, having numerous fisher's hamlets scattered over it, containing an aggregate population of 115,000—while that of the city and suburbs was upwards of 310,000. The foreign residents are not more than 130 few of whom reside in the city as the sale of Koolangpoo, less than 3 m. in circumference, and 700 yards wide, is more pleasantly and healthily situated and has residences erected on the hill and along the shore; with docks 300 ft. long.

Since the formal opening of the port in 1844, and the establishment of British and other foreign consulates, the trade of Amoi gradually increased to 1860 with a considerable export of Anker Gooling and other black tea chiefly in foreign vessels, and sugar, alum, rice, tobacco and iron-wares; the imports comprising the usual descriptions of cotton manufactures and opium. A branch of the Foreign Inspectorate of Customs was established at this port under the regulations of the Treaty of Tientsin ratified in 1860 from which correct returns of legitimate trade are obtained, but there is a good deal of contraband traffic carried on in native junks. According to the returns furnished in that year the British trade was as follows—Shipping upwards, 33 418 tons; value of imports, 21 258 705 exports £795 958. Since that year the returns have shown a considerable decrease except in the aggregate tonnage—shipping forwards in 1862 38,819 tons imports £713 148 and exports £420,000. Besides this, the foreign trade in American and other vessels fell during the same period from 77 705 tons to 70,696, with a corresponding decrease of value in imports and exports, which cannot be exactly ascertained on account of a large portion of this tonnage not being engaged specially in the trade of Amoi. In the year 1863 the whole number of arrivals comprised 484 square rigged vessels, measuring 136 417 tons. Of the exports to Great Britain, tea forms almost the sole item and for the season ended May 31 1863 the quantity cleared at the customs was 2 130 000 lbs.—[Customs Returns Chinese Commercial Guide.]

After the suppression of the Taiping rebellion in the northern provinces by the capture of Nanking the survivors of Hung Bie taken and the decimation of the Chung Wang a number of the rebels escaped to the province of Fokien, under the leadership of a chief calling himself the Siao-Wang. Here they settled down within some 50 miles of Amoi about the close of 1864 and by the judicious proclamations of regard for private property on the part of their chief maintained a strong position in the surrounding country with a view to the capture of Amoi as an excellent support for supplies of munitions of war. The British consuls visited the chief, who stated to him that the rights of all foreign residents would be respected; and in April 1865 this remnant of the formidable Taiping army was located near Amoi with no prospect of being dislodged by foreign troops. The effect of this was to paralyze legitimate foreign trade; while there was a contraband traffic in arms and ammunition chiefly from Shanghai against which the governor of Hong-kong issued a proclamation.

AMALFA or **AMRELI**, a tn Bengal dist Hoogly on river Damooda, 29 m W. Calcutta. Large vessels ascend to it, and as it is the principal depot for the coal brought down in boats from Burdwan and Baccarat, it is a place of importance.

AMPUERO, a tn Spain Old Castle, prov and 20 m S. E. Santander 200 m. N. Madrid, on a mountain slope. It consists of houses built of stone, and covered with tiles, and has two churches, one of them a large structure of striking appearance, with rich internal decorations. Pop. 1801.

AMBAWUTY or **AMARAWUTY**, a river India, prov. Madras, which rises among the Annamallay or Dolly mountains, near the S. W. frontier of Colabaour flows e. curiously N. E. and after a course of about 146 m. joins the Cauvery on its r. bank a little below Caroor.

AMREELI or **URUSTIA**, a tn. India, Gulswar peninsula Kattywar on the Thobee, a tributary of the Betwa, which has its mouth on the W. shore of the Gulf of Cambay 180 m S. W. Ahmedabad. It has a rather striking appearance.

ance when approached, being surrounded by a strong wall with large round towers and consists of about 2000 houses, among which is the residence of the provincial governor. It appears prosperous, and is said to have greatly improved since the general protection of the British government was extended to the tributary vessels of the province.

AMOX IRLIUNG a tn. in Austro-Asiatic, Bokoania, circ. Tabur. 28 m. S. by E. Pragan. It contains 5718 inhabitants, and has manufacture of alcohol and leather a brewery an oil-press and two mills.

AMURNATH Cashmere a natural cave in a rock of *gyppum*, in the Himalayan mountains, N. E. Cashmere. It is regarded by the Hindoos as the residence of their god Shiva, and is therefore much frequented. Its dimensions are said to be 100 yards in width 80 in height, and 500 in depth. Vast numbers of devotees inhabit it and are regarded with much respect.

AMUSCO a tn. Spain, Old Castile, prov. and 18 m. by rail N. Palencia, on a beautiful plain. It is a station on the Alar del Rey and Venta de Bases portion of the railway from Madrid to Santander. The houses are only of one story and the streets, though wide, are ill paved and dirty. The chief buildings are a very large church with a lofty tower a court-house, and hospital. The manufacture of horse-cloths is important. Pop. 143.

AMVAYAT *Amvay* a vil. Palestine, between Tole and the road leading to Jerusalem from the W. It stands on a declivity looking westward over the great plain sloping to the Mediterranean and though a poor place gives proof of its former importance in a fountain and the ruins of an ancient church, a fine structure of large brown stones.

A N A A or **CHAM ISLAND** an isl. S. Pacific Feejee group lat. 17 14 S., lon. 145° 22' W. It is 12 g. long, by 7½ m. broad and contains about 5000 inhabitants, who are very dark, inclining to the Papuan type, and were once notorious cannibals, but have been professed Christians for the last twenty years. The island was first discovered by Captain Cook on 8th April 1769. — [*Official Rep. on 'Ced. Poly. news.*]

ANANDPUR a tn. India, in the hill state Kuluor on the tongue of land formed by a remarkable bend of the Sutlej, about 120 m. E. by S. Lahore. It stands at the base of the peak of Nisai Devi which rises about 3000 ft. above it and more than 4000 ft. above the sea, and has a somewhat imposing though rather somber aspect; it contains several large brick buildings, with flat roofs and windowless walls.

ANANIEV a tn. Russia, gov. Ekaterin. dep. circle of same name, with 4977 inhabitants, and two churches.

ANCHIALO a tn. Turkey in Europe W. shore Black Sea, in the S. E. of Bulgaria, with a harbour which is much frequented by coasters, and carries on a considerable trade in wine and fish chiefly mackerel. Pop. 4000.

ANCONA (add.) city and port, Italy on Adriatic, 132 m. N. E. Rome, has increased in trade and vitality since the consolidation of the kingdom. Shops and houses of a higher class have replaced old ones, and building has gone on in every quarter. Railway communication is completed or in progress with Rome, Florence, Foggia, &c. The growth of cotton to which the soil and climate are well adapted, has been attempted in the neighbourhood but with no great energy or success. The harbour has been materially improved by dredging and by the construction of a quay for the use of large vessels, and a line of steamers runs between this port and Alexandria. The imports in 1863 were—British, value £196,520, and ton 85,650; foreign, value £317,119 and ton 112,238 total value £513,639, ton 198,976. Exports in 1863—British, value £23,469, and ton 14,907; foreign, value £92,245, and ton 107,946 total value £115,710, ton 122,810. — [*Custom Report, Jan. 1864.*]

ANGUD or **San Carlos**, a munit in Chile, on a creek or gulf of same name N. side isl. Chilo, of which it is the cap. lat. 41° 52' S.; lon. 73° 55' W. It occupies two heights and an intervening valley and consists of houses chiefly of wood, small and with little appearance of comfort. The place, or public square, situated on a flat at the summit of the E. height, and commanding an extensive view contains the best buildings, public and private. Among the former are the cathedral, the residence of the intendant, and the public offices. The harbour though completely secure when

once entered, is rendered somewhat difficult of access by shoals and other obstacles. Anecd. in a bishop's see, P. 2365.

ANDACUOLLO a tn. Chile, prov. and 80 m. S. E. Coquimbo in a wild mountain district about 5500 ft. above sea-level. It is the seat of an important mining industry and derives considerable advantage from the number of pilgrims who annually resort to it on account of an image of the Virgin which has the reputation of working miracles. Pop. 1688.

ANDAHUAYLAR a city Peru cap. prov. same name, day Ayacucho lat. 13° 44' S.; lon. 73° 40' E. It takes its name from a cordillera belonging to the mountain knot of Cuzco, the most considerable in the Andes, and has a pop. estimated at 19,184. To the prov. 81 vils. belong.

ANDALA a tn. W. Africa, Benguela, territory Gangua about lat. 13 35' S.; lon. 17° 40' E. The inhab. lands, situated at 2300, have numerous herds of fine cattle obtained chiefly by plunder in the lands of the south.

ANDORRA a tn. Spain, Aragon, prov. and 60 m. Turul on the side of a hill, with commodious houses, generally of two stories spacious yards and clean streets two squares and two fine fountains. The trade is in corn, wine, silk, wool honey and wax. Pop. 1600.

ANDRA (87) a tn. Austrian empire, Duchy Carinthia, on the Lavant 27 m. N. E. Klagenfurt, with a beautiful cathedral and 1200 inhabitants.

ANDRES (88a) a tn. Bolivia prov. and 70 m. N. W. Oruro, with a large church surrounded by a dome. Immo. diately adjoining is an extensive building which occupies three sides of a square and serves alike for townhouse and hotel.

ANDRICHAU a tn. Austrian empire, Galicia, circ. Wadowice, cap. dist. of same name, in a beautiful district 30 m. S. W. Cracow with 2077 inhabitants, a fine baronial castle manufacture of woollen and linen cloth a walk mill and important weekly market.

ANDROS (add.) an isl. West India, one of the largest of the Bahamas, situated not far from the E. entrance of the gulf of Florida, and forming the W. side of what is called the Tongues of the Ocean. It is 90 m. long from N. W. to S. E. and varies in breadth from 40 m. near its centre to 20 m. in the S. and only 10 m. at its N. extremity. On the E. it is skirted by a narrow ridge from 70 to 100 ft. high, but is generally low and swampy especially on the W. shore, which is composed of a slimy mud like pipe-clay and so little above sea-level that in N. W. gales it is overlaid to a considerable distance inland. It is well wooded but little cultivated; the few inhabitants, who have a their chief settlement at Red Bay near its W. end, employing themselves in collecting sponge, which is found in large quantities, and in shipping the wood which is floated down from the lagoons in the interior.

ANDROSCOGGIN a river U. States, which issuing from Lake Umbagog, in Co. Loos New Hampshire, flows first E. then S. into Maine, and joins the Kennebec about 18 m. above its mouth in the Atlantic, after a course of about 150 m. The tide ascends about 30 m. above the point of junction.

ANDUJER a vil. Persia prov. (lat. 40 m. E. Kerman about lat. 29° 47' N.; lon. 67° E.) It is defended by a castle, situated at some distance from it on a lofty hill, and is a flourishing place tho' the extortion of the governor reduced the inhabitants to poverty. It has groves of palm, orange, and lemon trees, and the finest ham of Persia is grown in its vicinity. — [*Jour. Roy. Geog. Soc. vol. xiv. p. 86.*]

ANDULO a territory W. Africa, Kilmunda country between lat. 9° 40' and 11° 10' S. lon. 16 50' and 17 40' E. bounded N. by Malakuta, a dependency of Baidandy E. Masounghe or Klawor S. Bile; W. Baidandy. Area about 2400 sq. m. pop. 40,000. In physical features it strongly resembles Masounghe, which bounds it on the E. consisting of gently undulating plains alternating with dense forests and grassy prairies. Its chief river is the Baka, which, descending from the Bulum Baka steps, flows N. to the Kuleta, a principal affluent of the Ocean. The inhabitants, who are peaceful and industrious, cultivate the soil and carry on a considerable trade, chiefly in wax, and, in a less extent, in ivory. The prince, though nominally absolute as in his internal administration, is tributary to Melimbo

ANGRY KYOUNG, a long narrow isl. Humber Bay Arman, lat. 26° N., lon. 98° 10' E. It is about 30 m long 8 m. broad, rugged and uninhabited.

ANGIAMA a tn. W Africa, dist. Oru, l. bank Kwara, about 50 m above its mouth. It is the largest place belonging to the Warsa tribe, and has a melancholy interest attached to it as the place where the traveller Lander was mortally wounded. It is much frequented by the Benin palm-oil traders.

ANGOSTA, or **ANGOSTA** [add] a tn. and territory E. Africa, Mombiqué. The town 12 m above the mouth of a river of same name, lat. 16° S. lon. 89° 45' E. consists of a number of small houses, partly of wood and partly of stone, and ditched with palm leaves. The inhabitants about 1000, mostly Arabs, carry on a considerable trade with Zanzibar Malinda and Mornbaa. The principal articles are oil of sesame much used as a substitute for olive-oil, ivory, ebony gum copal soil and ground nuts, cocco nut oil and orebil.—The **WAZIRORE** governed by an independent prince, has a sea-board of 90 m between the mouth of the Antonio on the N. and that of the Quirana or Mome on the S. coast, and extends a considerable distance inland, closely along the banks of the river Angosta, which is said to have its source in a large lake, and to be navigable for 180 m.

ANGUIANO a tn. Spain, Old Castile, prov. and 20 m S.W. Logroño 182 m. N. N. E. Madrid at the foot of a mountain called Camara Alca, and crowned by the ruins of an old monastery. It is traversed by the Raynilla, is indifferently built, and has a copious and beautiful fountain. The trade is in wool and grain. Pop. 1020.

ANHIM a tn. Siam on the E. shore of the W. arm of the gulf of Siam lat. 15° 31' N. lon. 100° 55' E. Its celebrity has made it famous as a watering-place and sanatorium for Europeans and Americans suffering from the prevalent diseases of Bangkok. The first king of Siam and his court spend some time here every year and houses have been built for their accommodation. Many of the inhabitants are employed in catching and curing fish for the market at Bangkok. Between Anhim and Bangsan there are extensive rice-fields.

ANILON a il Spain, Aragon, prov. and 48 m Saragosa, at the extremity of a small mountain. It consists generally of mud houses plastered over and placed in various squares and narrow unpaved streets, and has several fountains, manufactures of linen, and distilleries. Pop. 1700.

ANJENGO a tn. India presid. Madras T. Tanjavore on a narrow strip of land between the Malabar coast and an extensive lagoon or back-water 92 m. S. by W. Cochin 890 m. S.W. Madras. It consists of a town composed chiefly of two parallel rows of houses, and of an old fort situated at its S. E. extremity. At the opposite extremity there is a R. Catholic church, most of the inhabitants, descendants of the Portuguese or native converts professing that form of Christianity. They are generally poor and live by fishing or manufacturing cordage of coral or cocco nut fibre. There is no proper harbour and ships visiting the place must anchor two miles off in an exposed roadstead. The E. India Company had long a factory here.

ANNABERG, a tn. Austrian empire, Lower Austria, circle Upper Wieserwald, on a considerable eminence 50 m S.W. Vienna. It contains 1480 inhabitants, and has a church to which pilgrimages are made from ironworks, quarries of gypsum and mines of coal and antimony.

ANNAMULLAY a mountain-range India, presid. Madras in the S. and S.W. of dist. Coimbatore. The mountain chain their greatest height toward the E. where they are said to be nearly as high as the Nilgierries or about 6000 ft. above sea-level. They are covered with magnificent oak forests which are systematically worked, on account of government, for the purpose of supplying the Bombay dockyard and the gun-carriage manufactories in Bombay and Madras. The timber is first conveyed in carts to the brow of the Ghats, about 7 m. distant, and then let down by a slide. What is intended for Bombay is carried for 40 m. farther to Mangalore near Pulgaon, on the Mysore railway and afterwards floated down the Pannai to the W. coast, what is intended for Madras is carried to Yengal near Caroor and floated to the E. coast by the Coovary.

ANN ARBOR, a city U. States, Michigan, cap. Washt-

awren co. on Huron river and Michigan Central railroad, 40 m. W. Detroit. It is well-built in a pleasant and healthy situation and has a flourishing university. The district is agricultural, and has an active trade. Pop. (1850) 4898.

ANOPSHUHUR, a tn. India N.W. Provinces dist. Bhojandeshwar 70 m. N. E. Delhi, N. bank Ganges the channel of which is here 1 m wide though not more than a fifth of this space is filled in the dry season. The town is both surrounded by a wall about 20 m. S. W. thick and defended by a large break fort; and at the N. end, the large antique palace of the semindar. The houses, either of mud or of cemented brick, are poorly built. Pop. 8647.

ANOVER DE TAJO a tn. Spain New Castile prov. and 11 m from Toledo on a considerable eminence, with houses of regular construction, a parish church with a very ancient tower and manufactures of earthenware, saltpetre, and fine plaster.

ANOSO a tn. Spain, Aragon prov. and 69 m. from Huesca, l. bank Veral on a plain surrounded by mountains. It is tolerably built and excellently paved and has manufactures of lace and woollen stuffs and a trade in wool. Pop. 1416.

ANFAL (Bakro) a tn. Austrian empire, Hungary co. Honth 6 m. S. E. Mohacs, with 1800 R. Catholic inhabitants, an imposing castle situated on an eminence, and a trade in wool, obtained from the large oak and pine forests of the district.

ANIANANARIVO See **TANANARIVO**.

ANTHONY (St.) a tn. U. States of Minnesota, l. bank Mississippi, near the celebrated falls of same name, 8 m. N. W. St. Paul. It stands at the head of navigation of the river contains 2256 inhabitants, and has a state college and a number of saw mills and manufacturing establishments. St. Anthony city which is a more village adjoins it on the S. and Minneapolis, which in 1860 had a pop. of 2564 is immediately opposite to it on the R. bank of the river.

ANTICOSTI [add], an isl. British America in the N. E. extremity of the St. Lawrence, has a length from W. to E. of 123 m., a breadth of 80 m., and a circuit of about 370 m. Its shores are everywhere bordered with rocks of secondary limestone and do not furnish a single good harbour. The want of anchorage coupled with the frequency of fogs makes the navigation dangerous. On and near the coasts the limestone is so overl with a thick and often impenetrable forest of dwarf spruce fir, which sometimes, in exposed situations are only a few ft. high and so twisted and matted that it would be possible to walk some distance on their tops. The surface of the island is nowhere higher than 700 ft. above the sea. The S. coast is generally low and shelving with limestone rocks which dry at low water the N. coast, for about 80 m. from its E. extremity is bold and precipitous, presenting picturesque headlands and cliffs which have upwards of 300 ft. of perpendicular height. The rest of the N. coast is low like the S. The interior of the island is little known, but is probably less sterile than the coasts as white spruce large enough for the mast of a schooner of 60 tons, and a species of larch called juniper of sufficient size to form a schooner's keel, have been seen upon it. Land birds are very scarce and the quadrupeds are confined to four or five species—the black bear fox, otter marten and a few mice. The climate being insular seems not to be more severe in winter than that of Quebec but the summer is cold, foggy rainy and stormy. Of its agricultural capabilities little is known the only attempts at cultivation being at Gascoche bay South west point, and Heath point the latter being exposed places. Potatoes, peas, barley and oats have been grown successfully and at South west point cattle have been kept in good condition.

Gascoche or Ellis bay about 5½ m. from W. end of lighthouse on the S. side, and Fox bay 15 m. from Heath point lighthouse on the N. side are the only harbours that are comparatively safe. They might be connected by a road, 120 m. long over a regular and tolerably level surface, thus opening the whole interior of the island. Along the low lands of the S. coast is a continuous peat plain extending upwards of 80 m. and 2 m. broad, with a thickness of peat from 3 to 10 ft., and along this coast lies an immense quantity of timber drifted from the rivers of the mainland.

From the water alone it is possible to obtain any profitable return for industry. The streams, which are numerous

though too small to admit boats, generally stowed with trout, and are periodically visited by great numbers of salmon which are taken by the two or three resident families and added for the Quebec market. Boats frequent the limestone reefs, and are taken occasionally off several parts of the coast in small salmoners, the crews of which often join the occupation of wrecks and that of fishermen. They come from the Magdalen islands and other parts of the gulf. Three lighthouses have been erected on Antioch—on Heath point, at its E. extremity another on the E.W., and the third on the W. point. The first two are built of a beautiful ornamental limestone, quarried on the spot, and the other of stone faced with fire-brick. They are all visible at the distance of 10 m. The only resident inhabitants of the island are the people who have charge of the lighthouses and provision ponds.

ANTIETAM a creek, U. States, rises in E. part of Pennsylvania, and, flowing S. into Maryland falls into the Potomac about 60 m N W Washington. On Sept. 17 1862 a great battle was fought upon it, near Sharpsburg between the Confederate army under General Lee and the Federal army under General M. C. Meade, each army numbering about 100,000 men. The engagement lasted with great determination and fury from daylight till dark without any decisive result; but during the night the Confederates withdrew and retreated to the Potomac. The losses were about 14,000 on each side.

ANTIGUA (I.A.), a tin. In Fuerteventura, one of the Canary Isles, on a spacious plain near its centre, consists of about 40 houses, and has linen and woollen manufactures. The chief products are wheat, barley, millet, barley, medicinal potatoes, and cotton. Pop. 1730.

ANTIFODDES [add] a group of isles to the S E. of New Zealand, near the boundary between the S Pacific and the S Polar or Antarctic Oceans. The name was formerly given to a single isle, which was supposed to be the land in the S hemisphere which, in respect of latitude and longitude, corresponded most exactly with those of Greenwich in the N hemisphere, and was believed to be situated in lat. 49° 40' S., lon. 179° 42' E. In other words, differed from the true antipodes only by a deficiency of 1° 46' in latitude, and of 6° 18' in longitude. The locality was visited in 1846 by Captain Dwyer and in 1859 by Captain Stansford, who both found, not a single island, but a group. According to Captain Dwyer, the group consists of a principal island about 10 m in circuit, surrounded by six or seven minor islands. Of the principal island which he proposed to call *Pennantia* he made the lat. 49° 40' S. and the lon. 179° 40' E., thus leaving the latitude exactly as before but increasing the deficiency of longitude, making it, not 1° 46' as was formerly supposed, but 1° 20'. Captain Stansford entirely agrees with him in regard to this increase of longitude, but counts only four islands in the group, which, according to him has nearly due N and S, and extends over an area of 4½ sq m. The islands seem to have a maximum height of about 600 ft. and are of a somewhat forbidding aspect.

ANTOLIN two places, Spain, Asturias—1 *Antolin* (San) a vil. and par prov. and W from Oviedo, on the Ulla, which is here crossed by a wooden bridge. Its monthly market for corn and farm-produce is important. Pop. 3600.—2, *Antolin de Villanueva* (San) a vil. and par prov. and 40 m. W. of W. Orio, stands on an open plain on the Navia, near its mouth in the Bay of Biscay. Pop. 2500, many of them fishermen.

ANTON (Wier), a tin. Antioquia Empire, Lower Austria close Upper Wierwald, on the Jamnits, 58 m. S. W. Vienna. It contains 1622 inhabitants, and has manufactures of silk and cast-iron pipes, an oil-press, several saw-mills, and a mass of lignite, which is worked to a considerable extent.

ANTONIO (San), a tin. Spain. Is. of Ivis, on a bay on the W coast which forms a large but imperfectly sheltered harbour. It is defended by a strong tower and has a large and substantial church of regular architecture, and some trade in farm-produce and charcoal. Pop. 2539.

ANTONIO (San) a tin. Central America, Honduras, lat. 14° 36' N.; lon. 87° 10' W., curiously built on a steep mountain-side of green sand, which permeates the magnificent valley of the Yucatan, and the road from Comayagua to Tegucigalpa. It has a handsome church, and in its immediate vicinity are silver mines, which are the oldest, and were

at one time considered to be the richest, in the country. Pop. about 1300.

ANTREE, a tin. India, Sikkim's Department, at the S. entrance of a rocky strait, 18 m. S.E. Gwalior. It appears to have been once a handsome place, defended by a fort with four strong towers, but is now very much decayed. Salt is manufactured here by washing the mines earth in the vicinity.

ANTWERP [add] the principal port of Belgium. It has in recent times made considerable advances both in general trade and in population. The steady increase in the number and tonnage of the vessels entering the port as shown in the subjoined table, is a satisfactory evidence of the progress of trade:—

	At Antwerp.	Tonnage.	At Antwerp.
1823,	1104	130,607	217
1845,	1201	308,361	243
1853,	1813	826,817	186
1864,	1930	429,516	201

The more recent state of the vessels entering and cleared and the exports and imports, is as follows:—

Entered.	Tonnage.	Cleared.	Tonnage.	Value of Exports by sea.	Value of Imports by sea.
1861,	3517	515,862	5231	619,100.	214,256,300.
1863,	5128.	817,500	5242.	645,270	17,474,000
1865,	5387	870,425	5403	685,020	11,400,000

Fully a third part of the vessels that enter the port of Antwerp are under the flag of Great Britain.

The chief imports are coffee, cotton and wool, in all of which there has been a considerable increase in recent years and besides these eggs, oil seeds, sugar, tobacco, and wine figure for large amounts. The principal exports are coals, iron wrought and cast, glass manufactures, grain, and fireworks.

Antwerp is one of the most important entrepôts for sugar and wool from the river Rhine. It has extensive refineries of colonial sugar and manufactures of sugar, silk and candles, and in addition several shipbuilding yards, including one for iron-vessels. The pop. had increased in 1863 to 117,824.

ANUNG HOY an isl. China, in the entrance to Canton river near the Boia Tigris. It has a peak which rises to the height of 1800 ft. immediately in front of which the principal fortifications for defending the strait are erected.

ANYIGHI a vil. W. Africa, dist. Kororudi, bank Benue, formerly situated at the top of a steep hill lat. 7° 48' N. lon. 9° 2' E. Among the huts are many palm trees and cotton bushes and immediately around, numerous cultivated patches of maize and Dava corn. Anyighi, recently founded by a tribe driven from their former seat Simbahi, is subject to Wukari.

ANZUOLA a tin. Spain, Basque Province, prov. Guipuzcoa, on the high road from Madrid to France, 20 m. Tolosa. It stands on a flat surrounded by mountains, and consists of four streets and two squares. It has two churches, one of which of very ancient date, belonged to the Templars. The industrial establishments are tanneries and flour mills and a number of looms are employed in weaving a kind of cloth which is made of flax and goat's hair and in large demand in the neighbouring districts. Pop. 1860.

AOM, a river Siberia, Manchouria, which rises in the Khotaki mountains, flows W. and joins the Ussuri on its R. bank, after a course of 190 m. in lat. 47° 30' N. lon. 126° E.

APANEGA volcano and Indian vil. Central America, San Salvador. The vil. which is situated 40 m. W. San Salvador at the N foot of the extinct volcano possesses little interest. But the volcano of Apanega, which rises 5530 ft. above the sea, presents some remarkable features. Its crater which is nearly three quarters of a mile in diameter and comparatively shallow is partly occupied by a lake surrounded by large numbers of ducks and other wild fowl and partly covered with green pastures on which herds of cattle are fed. The Indians, to whom these belong, have fixed their huts within the same locality and thus converted what is usually a solitaire into a beautiful landscape. The lake of the crater is, from its appearance, called the *Laguna verde*, and is nowhere above 15 ft. in depth: but there is a second outlet, which carries more of the storm which causes usually to this—discharging much wilder features, and includes within its precipitous sides a lake, called *Laguna*, which is in some parts so deep that no bottom has been found.

APARRI a tn. Philippine Isles Luzon prov Cagayan, 1. back river of same name, at its mouth on the N coast, lat. 18° 22' 15" N long. 121° 15' E. It contains about 5000 inhabitants who live in houses composed of small rectangular blocks. Some of the public buildings, however, are substantial, and the harbour-day the only one on the N shore of the island is not devoid of importance.

APATFALYA, a tn. Austrian empire, Hungary co. Bekas-Csanad, in a fertile dist. on the Muro 16 m. E S E. Segedin, 148 m. S E. It contains 4079 inhabitants, who trade in all kinds of agricultural produce and a good wine.

APATFALYA, a tn. Austrian empire, Hungary co. Borsod, 20 m. W S W. Markos, with 1800 inhabitants, a flour and a paper-mill. It is a stone-quarry. On the rocky hill of Belahor in the vicinity there is a cavern, from which in autumn issues a vapour that takes fire when a light is applied to it. At the foot of the same hill are thermal springs.

APATHI, a tn. Austrian empire, Hungary co. Tolna, about 7 m. S S W. Segedin with 1190 inhabitants; glass-works and stone-quarries.

APPE HILL or **APPE HILL** Chinese empire, on the S W coast of the island of Formosa lat. 22° 35' N long. 120° 15' E. It appears, on a N and S bearing like a truncated cone sloping toward the land and looks at a distance like an island. It rises to the height of 1110 ft. and though of a shape which indicates a volcanic origin is one vast block of coral, with no traces whatever of igneous agency. As the coast is here very low Appe Hill, from standing out prominently and being often distinctly visible when everything else is shrouded in mist, furnishes a most useful landmark. A huge level beach which juts out about 500 yards from the S side, and is separated from it by a deep channel 50 fathoms wide forms the little port of Tsai-kun-kon.

APPELTON or **GRAND CREEK** a vil. U. States Wisconsin, cap. co. Outagamie, on the Neenah or Fox 30 m. above its mouth in Green bay and 4 m. from the point where it issues from Lake Winnebago. The rapids of Grande Crique, in its vicinity making a descent of about 20 ft. in a mile and a half, furnish immense water-power while, by means of dams and canals on the Fox and the Wisconsin a continuous navigable communication has been established along the course between Lake Michigan and the Mississippi. Appleton, availing itself of these advantages has risen in importance, and had in 1855 a pop. of 4474.

APPOMATOX, a river N America, U. States, Virginia, which rises in a mountainous district near the centre of the state, flows circuitously E S E. joins the James at City Point. Flowing in a narrow deep channel, it is navigable by vessels of 100 tons to Petersburg 20 m. above its mouth and by means of a canal which avoids the falls at the latter place, may be navigated by boats carrying 4 or 5 tons for 80 m. further. It was the scene of many of the military operations of the civil war especially during the siege of Petersburg and Richmond in 1864-65.

ARABAT or **TORNA** an island or tongue of land Russia, off the E. of the Crimea, washed on its W side by the Bosphorus or Paphos Sea, and on its E by the Bos. of Anz. It is separated from the mainland on the N. by the Genuich or Tonkol Strait, and stretches continuously for about 70 m. between K N W. and S E. to the town of Arabat. It consists of a low bank, with an average width of not more than 1 m. though it widens out towards the N at two places, the more S. of which contains the fresh-water lake of Fresano and the more N. the salt-water lake of Genuich. The shore of its E side is nearly an unbroken line of sand, but that of its W side which is irregularly shaped and very much serrated, is chiefly composed of vegetable earth. The depth of water on the E side, about 1 m. off the shore, is from 14 ft. to 23 ft., with a bottom of mud and shells. A road has been carried along the whole line of the isthmus.

ARAKHOVA, a tn. Greece nomarch Phthiotis and Phokis, near the W frontiers of Aithia and Boeotia, 70 m. N W Athens. It stands in a mountainous district at the height of 3000 ft. above the sea, and has in its vicinity at the foot of Mount Likhura, a remarkable cavern, 280 ft. long by 200 broad, full of beautiful stalactites and stalagmites and capable of containing 3000 persons.

ARANAZ, a tn. Spain prov Navarra, dist and 23 m. from Pamplona, on a height surrounded by lofty mountains with a parish church primary school townhouse and prison manufactures of linen, several flour-mills, and a trade in charcoal and timber. Pop. 1849.

ARANDA a tn. Spain Aragon, prov and 40 m. W S W Saragossa, 157 m. N E Madrid, on a height above a river of same name. It consists of two distinct portions, one crowning the height, and evidently of Moorish origin, and the other on the slope below of comparatively modern date. The manufactures are confined to some ordinary linens the trade, consisting of hardware clothing, and foreign articles, is chiefly carried on at the large annual fair. Pop. 1560.

ARANGA a vil. and par. Spain Galicia, prov and 20 m. S E Coruña, on a height above the Mandeo, with 1500 inhabitants, mostly engaged in agriculture or in making charcoal.

ARANYOS (MADONNA) a tn. Austrian empire Hungary co. Szathmar 16 m. E Szathmar Nemethi, with 2223 inhabitants and an old castle.

ARAUOCO a tn. S America, Chili, prov and cap. dep. of same name, on the S shore of Aruco bay 35 m. S S W Concepcion. It was once a place of importance, and figured much in the early history of S. America, but is now only a small square fort, or rather enclosure of earth about 300 yards square, within which the white population find a refuge when attacked by the Indians. The bay in the entrance of which lies the island of Santa Maria is of large extent, having a breadth of 15 and a depth of 18 m. On its E shore good steaming but quick-consuming coal is worked and shipped to some extent at Lota immediately N of Colcura.

ARAWAK a tn. Western Africa, cap. dist. Arawak 115 m. N N W Timbuctoo. It has a pop. not exceeding 1500 but is of great commercial importance being a principal entrepot for the gold dust which is brought from the interior of the continent. Hence much of its general business is transacted by means of this precious metal, and the inconveniences of barter are avoided.

ARAYAT a tn. Philippine Isles, Luzon prov and on both sides of river Pampanga. It occupies a beautiful and healthy site on the S. slope of a volcanic mountain of same name, from the summit of which a view is obtained of the town and shipping of Manila. The adjacent lake of Baracua in the vicinity abounds with fish. Pop. 7765.

ARRA a tn. Algeria, prov and 10 m. S by E Algiers, near the foot of Little Atlas. It was founded by the French in 1849 and has made great progress. Iron and copper are exact in the district. The Arab weekly market is important.

ARBE [add.] a tn. Austrian empire Dalmatia, curia Zara, on the isthmus of same name in the strait of Quarnero, and off the W coast of Croatia. It stands on a height at the outlet of a valley is surrounded with walls with two gates; consists partly of very ancient houses was under the Venetians a bishop's see, and has still an ancient cathedral a Benedictine and a Franciscan monastery and a tolerable harbour. Large quantities of salt are made in the vicinity. Pop. 1000.

ARBECA a tn. Spain Catalonia, prov and 14 m. from Lerida, on the side of a hill crested by a feudal castle, with walls and towers in good condition having been restored. It is regularly built, and has flour and oil mills and a large trade, chiefly in oil and corn. Pop. 1000.

ARBO a vil. and par. Spain, Galicia, prov and 22 m. from Pontevedra, on a plain sloping gently to the Minho, with several flour-mills, manufactures of linen, and a considerable trade in wine. Pop. 3423.

ARBOS, a tn. Spain, Catalonia, prov and 20 m. E N E Tarragona, on a height above a bank of the sea, commanding a view of the Mediterranean. It consists of regular houses on a somewhat uneven site, and has a magnificent parish church. The manufactures consist of linen, broad lace, and brassy and there are two important annual fairs. This place was vainly burned by the French in 1508.

ARCADIA or **KYTHARRA**, a tn. Greece, Morea, nomarch Messenia, on a steep slope of the mountains which border the gulf of Arcadia on the E. It has a castle and a parish school, a justice of peace court, and a custom-house, and contains 3400 inhabitants.

ARCAILLANA, a vil. and par. Spain Asturias, prov

and 35 m S W Orvedo, in a mountainous district, not far from the bay of Biscay. It has manufactures of woollens, and herring and other milk. Pop. 1496

ARCHIBALD a vil. U States, Pennsylvania, Luzerne co., on Lehigh river and Delaware and Hudson rail way. Such coal-mines exist in the vicinity and the iron trade is carried on extensively. Pop. 1500.

ARDATOV a tn. Russia, gov. and 76 m. S. S. W. Nijni-Novgorod, esp. circle of same name, on the Leana. It contains 5751 inhabitants, and has three churches. Within the circle, castings, chemicals, and woollens are extensively made, and best-root for sugar is cultivated.

ARDEBAL, a dist. Persia, prov. and about 150 m S. W. Kermanshah. It is situated to the S. of Kermanshah, to the government of which it is at present attached, and contains seven villages, as well as a great many scattered or detached cultivated lands. It yields a revenue of 20,000 toman (210,000) partly in money and partly in kind. The principal productions are barley and wheat, rice, cotton seed, palm Christi, inferior tobacco, a little good opium, and various fruits, particularly melons of superior quality.

ARDBRAH, or **ALLADA** [add.] a tn. W. Africa, Dahomey 22 m N. W. of Abomey, anciently cap. of kingdom of same name, became subject to Dahomey by conquest, by Agaja the king in 1748. The town then said to be 2 m round is now no more than a large village and market. Pop. 4000, or perhaps much less.

ARENAL (2d.) a tn. Spain Old Castile, prov. and 25 m. from Avila, on a plain watered by a river of same name. It consists of good houses in very irregular and ill-paved streets, and has oil and flour mills, and a trade in fruit and vegetables. Pop. 1345

ARELYAS, Spain —1 *Arucas del Rey de alhama*, a vil. Andalusia, prov. and 15 m. S. W. Granada, on a slope at the foot of a mountain. There is a thermal spring here, but the water is of bad quality. Pop. 1280 —2 *Arucas de San Juan*, a tn. New Castile, prov. and 20 m. E. E. E. Ciudad Real. It is regularly built and has a very ancient church, and to have been belonged to the Templars. Pop. 776 —3 *A. de Old Castile*, prov. and 35 m. S. E. Avila, picturesquely situated in a hollow surrounded by lofty hills. It is built in regular well-paved streets. It has a very ancient church with a tower and the manufactures are crockery, hats, copperware, paint, and linens. Pop. 1548 —4 *Arucas de Foz*, a tn. Andalusia, prov. and 10 m. N. E. Malaga, surrounded on all sides by lofty heights. It is poorly built in winding unpaved streets, and has no oil-mill and two distilleries, and some trade in fruit. Pop. 1390

AREVTE DE MUNT a tn. Spain Catalonia, prov. and 22 m. (by rail) N. E. Barcelona, within a short distance of the sea, with well-built houses, espades, well-paved, and clean streets, a large church with a tower and richly decorated altars, several fountains of excellent water, manufactures of oaks and wooden ware, and a trade in wine of good quality. It is a principal station on the Barcelona and Girona railway. Pop. 1235.

ARFANZ a tn. Spain, Leon prov. and 45 m. W. Leon, 900 m. K. W. Madrid, in a somewhat unhealthy valley with a ruined palace, and linen and woollen manufactures. Pop. 1750.

ARGAUM, a vil. India, Nizam's dominions, near the N. frontier 40 m. W. S. W. Ellipohpur, memorable for the victory gained in the vicinity on the 28th November 1808 by the Duke of Wellington, then General Wellesley over the combined Marhatta force.

ARGENTONA, a vil. Spain, prov. and 24 m. from Barcelona, in a pleasant valley on a stream of same name, within 2 m. of the sea. It consists of houses of a single story and has a massive Gothic church with a lofty tower and manufactures of cotton and black lace, three spinning and five flour-mills. Pop. 1840

ARIFE [add.] a tn. Mexico, prov. Sonora, in a fertile valley on the Sonora river, at the foot of the Sierra Madre 60 m. N. N. E. Ures; lat. 30° 39' N., lon. 109° 50' W. It was once the cap. of the prov., and had a pop. bordering on 7000, but, in consequence of political changes, lost all its importance, and does not now contain above 1500 inhabitants. It is still, however, possessed of a church, which has not only a handsome exterior but many rich internal decorations. Its

alter is said to be covered with massive plates of embossed silver.

ARIZONA, a territory U States, formed from that part of the old territory of New Mexico lying W. of lat 109° W., and bounded S. by Mexico, W. by Colorado river and Gila fort, and N. by Utah and Nevada. Area estimated at 130,000 sq. m. The surface is generally mountainous, but many fertile and well-watered valleys lie between the ridges. The existence of gold-bearing districts has long been known, but in 1863 the great mineral wealth of the territory began to attract attention, and subsequent explorations have confirmed the belief of its vast richness in deposits of the precious metals, equal to any in the mining regions of the great plateau between the Rocky Mountains and the Sierra Nevada. The rich silvermines of Nevada on the N. of Sonora on the S. which latter have been traced into and successfully worked in the S. part of the territory, recent discoveries in the valleys of the Upper Colorado and its tributaries, and in western New Mexico and eastern Arizona, all point to this territory as the grand centre of the immense mineral deposits of the region. —(U. S. Commissioner.) The gold-fields are generally described as well supplied with timber, water and grass. The capital is Tucson. The territory was organized with the usual government administration in February 1863. White population roughly estimated at 30,000 Indian, 60,000.

ARIZCUN a vil. Spain, prov. Navarre, on an eminence open to all winds, 28 m. Pamplona. It is well built and has a parish church, with a beautiful facade and very large porch, and the ancient palace of Ursua, of which many strange and terrible legends are current. Pop. 1253

ARJISH a tn. European Turkey, Walachia, circle and on river same name. It is the see of a bishop and has an ecclesiastical seminary and the most remarkable church and the finest monastery in Walachia. Pop. 2700

ARKANSAS POST a vil. U States Arkansas, esp. co. same name, 1 bank Arkansas river 50 m. from its junction with the Mississippi. It was founded by the French in 1685 and has several stores and a landing for steamers. It was captured from the Confederates in December 1863 by Gen Grant with the assistance of gunboats, and a large number of prisoners and quantities of military stores were taken at the same time.

ARLESREGA a tn. Austrian Italy prov. and 8 m. W. N. W. Padua, on the railway to Milan with a parish church and a Confraternity villa.

ARMEDON a vil. India presid. Madras, on the coast, 66 m. N. Madras. A factory was established here in 1828 being one of the earliest settlements of the E. I. Company in the Carnatic.

ARMILL a vil. Spain Andalusia, prov. and 2 m. Granada, on a plain 1 bank Genil with ill built earthen houses, forming a single street along the highroad from Granada, manufactures of lumen hump, and wax. Pop. 1832

ARNI a tn. Greece, nomarch Cyclades, on the isl. of Andros, W. seven churches, and a pop. of 970.

ARNOYA —1 (San Salvador) a vil. and par Spain, Galicia, prov. and 12 m. from Orense on the Minho. The city contains an edifice in a suppressed Benedictine priory. The houses are generally ill built, in narrow winding streets. The principal products are good red and white wine, maize, flax, &c. The industrial establishments are a tannery and several flour-mills. Pop. 1840 —2 Small river flowing into bank Minho, about 20 m. below Orense, after a westerly course of about 30 m.

ARNSDORF a tn. Austrian empire, Bohemia, circle and 23 m. N. N. E. Leitmeritz, with 3500 inhabitants, manufactures of linen and hosiery dyeworks two mills, and a trade in glass.

ARQUELO a vil. Spain Old Castile prov. and 10 m. from Santander on a plain. Pop. 1980, many of whom find employment in other provinces as bull hangers, glaziers, and painters.

ARO or **ARO**, a tn. Western Africa, nearly equidistant from the Kwara on the W., the Old Calabar river on the E. and the shores of the Bight of Biafra on the S. It is described as being nearly three times the size of Aboko, and extremely populous. The inhabitants are skilful artisans, and manufacture swords, spears, and metallic ornaments. It owes much of its celebrity to the shrine of Thakina, to which pilgrimages are made from all the surrounding districts.

ABO vil and par Spain, Galice, prov and about 85 m. S W Coruña, cap dist. of same name, in a mountainous but healthy district watered by the Tambre. It has some trade in corn, cattle, and dairy produce. Pop 1410

ABRAH a tn India, presid. Bengal dist. Shababad in a fertile and well-irrigated district, 25 m. W Dinapore and 488 m. (by rail) N W Calcutta. It is a station on the East Indian railway and contains about 2775 houses and

FORTIFIED HOUSE AT ABRAH.—From Sketch by Major Rye.

the government school. It acquired some celebrity during a Sepoy mutiny in 1857 by the gallant defense made by a small body of European civilians against an overwhelming force of rebels. They retired to and heroically fortified the bungalow represented in our illustration, and were under a heavy fire of musketry and ordnance from 27th July to 1st August, at which latter date they were relieved under circumstances of the greatest difficulty by Major Vincent Eyre.

ABRONIA, a tn Spain, Navarra, on the S slope of Monte-Jarra 33 m. S W Pamplona. It consists of three distinct portions arranged in the form of a triangle, and has a parish church with a remarkable tower four oil mills, and some export of oil, corn, and wine. Pop. 1430

ABTA a tn Austrian empire Venetia, prov and 31 m. N Udine, bank But. an affluent of the Tagliamento, with 2108 inhabitants, and two mineral springs the one sulphurous and the other chalybeate.

ABTENARA a vil Spanish dominions Canary Isles island and prov of Gran Canaria, near the centre, on the declivity of a hill. The parish church a hermitage and two houses are the only stone buildings. All the rest are mere caves or cellars in which the natives live in a state of poverty and wretchedness. The vegetable products include grain, lentils, honey figs and other fruits and a good deal of goat-milk cheese is made. The only manufactures are a few articles of thread and wool. Pop 1074

ABTRES, a tn Spain Catalonia, prov and 18 m. from Barcelona, on a beach washed by several streams. It contains an ancient palace or castle of the former feudal lords of the place, which has been converted into a prison; and has manufactures of cotton and woollen cloth, a distillery three flour-mills, and a very limited trade. Pop. 1379

ARUL a navigable river India, Souda, running from the Manchar Lake which is formed by an expansion of the river Marra, into the Indus on the western side. During the rainy season the navigation by the Marra, the lake, and the Arul is preferred to that of the Indus, the current being more moderate. The junction with the Indus is in lat. 26° 24' N and lon. 87° 55' E

ARUN a river Nepal rises in Tibet, about lat. 28° 45' N lon. 87° 50' E. and flows through it for 200 m. to the Himalayas between which it passes, receiving the waters from the northern face of the snowy mountains, and then, with a further course of 110 m. through Nepal enters the Ganges of which it is the principal tributary in lat. 26° 58'; lon. 86° 57'

ARURU, a vil Spanish dominions island of Goceira,

one of the Canaries, is a pleasant and fertile valley at the foot of lofty mountains. It consists of 190 struggling houses, has a church and raises tolerable crops of grain, vegetables potatoes silk &c. &c. Pop 508

ASABA a tn. Western Africa, dist. and about 40 m. above Abok, r. bank Kwara, is finely situated on a rising ground about 100 ft. above the river is surrounded with walls and palisades of tall trees and consists of numerous huts wide apart, well constructed and often white-washed or coloured. The inhabitants though friendly are wild, rude-looking, and much intemperate. Yams and other agricultural produce, as well as fowls, cattle, and sheep are abundant.

ASAHAN a native state and river on the N E. side of the island of Sumatra in the Indian Archipelago.—The state consists chiefly of an extensive alluvial tract, which stretches along the coast, and is for the most part covered by a tangled and almost impenetrable forest. The cultivated crops are rice and pulses and the principal exports are pulses a red dyewood called *laka*, bees wax, horses and slaves. The inhabitants are Malays, who form the dominant class and Babahs Ti a fifth with which both the sea and the rivers abound, form their principal food.

—The river, which rises in a mountain range and plateau called Tubela, flows E. and falls into the straits of Malacca in lat. 8° 1' 30" N lon 99° 58' E. It is about 1000 yards wide at its mouth, but in the course of 7 m. contracts to a third of this width. The depth of its channel nowhere exceeds two fathoms.

ASBENI MMA a tn Central Africa, cap. Yaba country situated on a flat, at the foot of steep cliffs, about 880 m. S by Marouk lat. 19° 8' N lon 13° 15' E. It consists of about 130 cottages built with rough stones, very low and covered with the stems and leaves of the palmetto. The inhabitants suffer much from depredation. Dried fish is their chief medium of commerce.

ASHKUFER, a vil Persia prov and 12 m. W Yazd, 175 m. E S E Luristan. It is a large place, with a well-walled quarter, but owing to its site among scorching desert has gradually encroached so as almost to exclude field cultivation.

ASHLAND a tn U States Ohio pop. co. same name, 85 miles N N E. Columbus, in a fine farming country and connected by a branch line with the Cleveland and Columbus railway. There are manufactures of wool. Pop 1500

ASHTA two places, India.—1 A tn Malwa territory and 60 m. S W Bhopal r. bank Farabatty which is here fordable. It contains about 500 houses and possesses a fort and a large tank.—2 Ashke or Ashke, a vil prov. Bombay dist. Sholapore, 112 m. E S E. Poona. Here, in Feb. 1818 the Peshwa, Bages Kow pursuing a hopeless flight from the British force, was overtaken by General Smith and in consequence compelled to sign a treaty which finally extinguished the Maratha empire.

ASHWANIFI or HAMILTON RIVER. (See HAMILTON RIVER in Supp.)

ASHWANIFI (LAKE) British N America, Labrador lat. 53° 30' N lon. 55° W. It forms the head-water of the Ashwanuffi river and is sometimes from till the mouth of June.

ASPANG two nearly contiguous places, Austrian empire Lower Austria, 40 m. S by Vienna. One of them cap. circle of same name, has an old castle, a town house, a dye factory and oil iron and saw mills with a pop. of 690. The other with a pop. of 1830 has also numerous saw-mills and a very ancient parish church.

ASPINWALL a seaport in New Granada isthmus of Panama, on the island of Manzanillo, in Limon or Nari bay opposite Chagres, and near the Atlantic terminus of the Panama railway. It was founded in 1850 by the engineers and other officials and the workmen who arrived to commence the railway and has gradually grown into a place of some importance consisting of about 300 houses, and containing about 1000 permanent inhabitants.

ASSAM the name proposed for a mountain chain, which, rising suddenly from the plains of E. Bengal, about 220 m. N E. Calcutta stretches E. in a broadening chain of woody spurs and ridges, taking the successive names of the Ganges,

Kaima, Nogue, and other tribes, who inhabit it. In the vicinity of Manapouri it changes its direction to N. E., and after assuming the name of the Fackel range, becomes linked with some outliers of the S. Himalaya. Still further E. it becomes known as the Langtang range, and spreads down from the snows of its southern base the head-waters of the Iravadi. From its W. base it runs to the S. E. and is bounded by the Garo, from 3000 and 4000 ft. among the Garo, to 9000 ft. among the Kaima, and 8000 to 9000 to the N. of Manapouri. At least of Brahmaputra it reaches 12,000 to 14,000 ft., and he and rises far above the limit of perpetual snow.

ASSENTOS, or **ASSENTOS DE LAUREA**, a town in Mexico, state of 55 m. S. E. of Mexico, on the N. E. side of an almost isolated mountain group, at the height of 7000 ft. above the sea. It is a tolerably large mining town but above by the number of large and decayed houses within it, that its prosperity belongs to the past rather than the present. Its famous mines of silver, copper, and lead are in a good measure abandoned. The only minerals now wrought to much advantage, are copper and silver for which new mines have been opened.

ASINIBOIA, British American, better known by the name of the *Red River* or *Lord Selkirk's Settlement*, extends southwards from Lake Winnipeg up both banks of the Red river and thence westwards along those of the Assiniboine. Fort Garry situated at the confluence of these two rivers, and the head-quarters of the British American fur trade, ranks as its capital. The settlement, generally fertile and well adapted for agricultural purposes, has been so called since it is called the *choix de la terre*, and has been provided with a tolerably complete ecclesiastical organization in the shape of churches and schools. In St. John's parish where the bishop resides a college has been started, and the church, which is in a somewhat tottering condition is about to be supplanted by a substantial and commodious cathedral. The rest of the other parish churches have elegant spires, which form prominent objects in the landscape. The Catholics, forming a considerable proportion of the population have also an imposing cathedral in St. Boniface, and a spacious manse with schools attached; and in 1856 the Presbyterians obtained the erection of a church. The population, arranged under the heads of the above three denominations, is as follows:—Church of England, 2050; R. Catholic, 2500; Presbyterians, 400; total, 5050. The greatest difficulty with which the settlers have to contend is the want of a proper outlet for their produce.

ASINIBOINE [add], a river British America, which rises in lat. 51° 40' N. lon. 108° 20' W. flows first S. E. for about 550 m. to the confluence of the Qu'Appelle, then E. S. E. for about 240 m., and after a total course of about 600 m. parallel to the base of the Great Lakes on the E. of the Riding and Duck mountains, joins or is joined by the Red river of the North, at Fort Garry in lat. 46° 50' and lon. 97°. At Lake's Port, 23 m. above Fort Garry it is 120 ft. broad, with a mean sectional depth of 8 ft. and a current of 1½ m. per hour near Francis Port, 67 m. above Fort Garry its current is 2 m. per hour at the confluence of the Little Souris, 140 m. above Fort Garry it is 220 ft. broad, with a mean sectional depth of 9 ft. 6 in., and a current of 1½ m. It then appears that the river is larger when 140 m. than when only 23 m. from its mouth. Still higher up the same thing is observed, for at Fort Ellice, 240 m. from its mouth its breadth is 185 ft., and its mean sectional depth 8 ft. This singular fact of a decrease instead of an increase of water in the course of the river is brought out still more distinctly by another calculation, which shows that while the quantity of water hourly discharged at Fort Ellice is 5,575,500 and at the confluence of the Little Souris is 12,699,049 cubic ft., at Lake's Port, which is 318 m. below the former and 118 m. below the latter, the hourly discharge is only 5,703,000. Evaporation is the only cause yet assigned for this extraordinary diminution of volume. The principal affluents of the Assiniboine are, on its E. bank, the Two creeks, Pine creek, Shell river, Birdtail river and Rapid river or Little Saskatchewan, and on its W. bank, the White Sand river, the Qu'Appelle or Collingwood river, Souris creek, and the Little Souris or Mouse river. The only impediment to its continuous navigation for many miles is a rapid of no very formidable character as it is only in summer when the water is

lowest that it becomes impracticable. The valley of the Assiniboine is so fertile and well adapted for cultivation, particularly on the E. bank of its lower course, that several promising settlements have already been made upon it, and form the nucleus of a new territory.

ASIN YNSQHAH a town in Turkey in Asia, Anatolia, 28 m. E. S. E. of Angora. It occupies a picturesque site in a mountainous district and contains 250 houses, all occupied by Turks, whose chief employment is agriculture.

ASSOURI a river British N. America, which rises about lat. 49° N. lon. 105° W. flows E. and joins the Assiniboine, formed by it and the Little Saskatchewan. The prairie, through which it has cut a deep channel, is covered in extraordinary profusion with boulders of granite gneiss, limestone, &c., and in the strata exposed along its banks occur some thin beds of coal not well defined, and graduating into shales.

ASSUMPTION or **ASUNCION** [add] S. America, cap. Paraguay. Its streets are wide and crossed at right angles; the houses, of brick and one story high, are generally spacious and well constructed. It possesses several fine buildings, among others the cathedral and the churches of San Roque and the Incarnation the government house, the barracks the railway station, and a large market-place in the middle of the town. The port is convenient and safe, with a spacious quay and is defended by several batteries. Pop. (in 1857) 48,000.—(See Gray's Paraguay.)

ASSUNGU a town W. Africa, Bightside, on a steep height, but near a level, about 90 m. N. E. of Benin. It stands in the midst of beautiful scenery, is the residence of an independent chief, and contains 8000 inhabitants who cultivate the ground and trade in wax and gum copal.

ASU a town W. Africa, prov. Logon tributary of the Benue; bank Shari or Ba, a tributary of Lake Chad. It was formerly walled but the walls are ruinous, and the whole place exhibits signs of the decay common throughout the province. A considerable revenue is derived from the ferruginous water which is much frequented.

ASUA, ASUA or USUA a river E. Africa, supposed to rise from the Bakari-Ngo lake, about lat. 2° N. lon. 35° E. and uniting with the White Nile in lat. 5° 54' N.

ASUDI a town N. Africa, dist. Aïr situated not far from the foot of Mount Chereka lat. 18° 34' N. lon. 8° 54' E. was once a place of great importance, which is indicated by the extent of its ruins. It had at one time seven mosques and a population of 8000 to 10,000 but now possesses about 1000 ruinous houses, of which only 80 are inhabited. The market, however is well supplied with provisions and even ordinary merchandise.

A'ALAMA (SAN PABLO DE), a town S. America, Bolivia, cap. prov. same name, 1000 ft. above sea-level, on the Rio de Atacama, which about 5 m. below is lost in the sand. It is an extremely dirty place with only a few buildings which deserve the name of houses, and a church in a dilapidated state. Almost all the inhabitants are employed as carriers.

ATAD (GHEKAT), a town Austrian empire Hungary, co. Homorhy on the Rhine, 23 m. E. W. Kapuvár with 2061 inhabitants, a district court, Protestant parsonage, brewery, a trade in corn, and important annual fairs.

ATAJO one of a continuous chain of low islands, S. America, which skirt the E. bank of the Parana, immediately after the confluence of the Paraguay. The island is claimed by La Plata, but Paraguay has possession, and secures it by a military post.

ATAKI, a town Russia, gov. Samara, circle and near Kholm, with two churches, and a pop. of 6614.

ATHENA, a town U. States, Georgia, on bank Oconee river 32 m. W. N. W. Augusta, and 71 m. N. Milledgeville. The situation and climate are healthy and the branch of the Charleston and Decatur railway of which it is the terminus, has caused the town to increase rapidly, and before the civil war it was the market for an extensive cotton-growing district. It has five churches, a cotton factory, and several others in the vicinity and a college.

ATKAREK, a town Russia, gov. and 60 m. N. W. Saratov cap. circle of same name, on the Atkara. It has two churches, a school, and a charitable institute. Pop. 5778.

ATLANTA, a city N. America, U. States, Georgia, 101 m. N. E. of the junction of several lines of railway 101 m.

N W Mason 200 m. W Charleston. It occupies a healthy and elevated position and has grown rapidly from its commencement in 1845 into a place of considerable size and importance, the railways rendering it the centre of a large trade in cotton and grain, and connecting it with many principal ports and inland towns. In 1864, however, after being held by a Confederate army for some time, it was abandoned to the Federals who expelled great numbers of the inhabitants and subsequently evacuated it, leaving a great part of the town in ruins by fire. Previously it contained several churches and other public buildings. Gold iron, and other minerals, are found in the surrounding country.

ATBOWLEE a tn India N W Province, dist. and 20 m. E.N.E. Allypore in the Doab. It stands in a highly cultivated neighbourhood, abounding in fine mango groves, and is a large open place, with a well-supplied bazaar. Pop. 12,722.

ATSAIRKALA a tn. Ruanda gov. Don Cossacks r bank Akai at its mouth in the Doa. It is the chief ferry across this river on the road to the Cameroons, and has an important trade in corn wood and iron. Pop. 4842.

ATTANUGAH a tn India Oude, dist Salou 66 m S.E.E. Lucknow. The inhabitants, two-thirds of whom are Mahomedans as well as those of the district generally are of a warlike temperament, and used to furnish a large number of spy turbanis. Pop. 6000.

ATTLEBOROUGH a tn. U. States, Massachusetts Bristol co. 51 m S.E. Boston on the river Mill. It has a bank and extensive manufactures of cottons and other goods, and is connected by a branch with the Providence and Worcester railway. Pop. 4200.

ATTICHAN a mountain ridge Swedish Trans-Baikal territory which stretches from S.E. to N.W. not far from a bank Amoor and becomes linked with the low hills of the Takhon chain. It is composed partly of masses of granite. In the valleys and terraces at the base of the ridge bushes and isolated trees occur but its summits, consisting of a number of pyramidal peaks are perfectly bare.

AUBURN add a tn U. States, New York cap Cayuga co. on the Albany and Buffalo railway 174 m W of Albany. It is 24 m W by W from Oswego Lake the outlet of which runs through the town and furnishes water-power for many factories of cotton, wool, carpets, iron and paper and various

B.W., about 280 m, greatest breadth, measured on the parallel of 38° 300 m. area, 26,523 sq m or 17,000,000 acres. The coast is of very irregular shape, and so deeply indented that it measures, when its windings are followed, about 600 m. The continuity of the coast is least broken on the W., where the only important openings form the harbours of Manakau and Kaipara, the E. on the contrary presents a succession of large and deep bays with numerous creeks opening from them, and penetrating far into the interior. Proceeding from the N. the most extensive of these bays are Doubtless Bay the Bay of Islands, Hauraki Gulf and the Bay of Plenty. The interior is covered by wooded mountain ranges of moderate elevation with many intervening valleys of great fertility well watered by numerous streams. Most of these are mere mountain torrents, running a short and rapid course before they reach the sea. The largest are the Waikato which has its mouth on the W coast, the Piko and the Thames which both fall into the Firth of Thames a S arm of Hauraki Gulf; and the Wairarapa and Whakatane, which fall into the Bay of Plenty. Among the lakes are the Rotomua and the Tupo the latter by far the largest which New Zealand possesses. The climate, owing to its N position, is the warmest in the country and brings to perfection some fruits which cannot be grown successfully in any other part of it. Among the most important productions are the hard forests of which, situated chiefly on the W coast furnish the materials of an important spar and lumber trade. Of superior quality corn, fruit, gum, honey and wool. For administrative purposes the province is divided into five districts, of which Auckland is the capital. Pop. about 79,000.

The following table illustrates the condition of the provinces —

Year	European Population.			Native (whitened).	European.	% of 100,000.
	Males.	Females.	Total.			
1861	13,484	10,226	24,710	50,000	227,052	35
1893	15,145	15,488	30,634	—	116,064	—

AUCKLAND add a tn cap. of the above prov and of New Zealand is advantageously situated on the N side of an

other milk. A railway has also been constructed from it to Ribson, 40 m. northward. Pop. 10,590.

AUCKLAND the most northerly of the eight provinces into which New Zealand has been divided. lies between lat. 34° 30' and 39° E.; lon. 173° 30' and 178° 40' E., and consisting mainly of the peninsula which forms the N part of the island of Northland or New Ulster is washed by the ocean on the W N and E. and bounded on the E. by provs. Taranaki, Wellington, and Hawke's greatest length, N W to S.W. 124 m.

between two seas the one washing the E. and the other the W coast, and each furnishing an excellent harbour; lat. 36° 30' S. lon. 175° 45' E. Being situated on rugged ground much broken by hills it has scarcely a level street, but is nevertheless well built, and contains a number of houses and shops which would not disgrace any European town. The principal buildings are the government-house, newly erected near the site of an older edifice, which was burned down, the courts of justice, the official residences, the

Mineral church situated at the top of a ascent, and nearly built of white stone in the early English style; the Scotch, Wesleyan, and R. Catholic churches, the last a handsome stone edifice, with a large forested tower; the Wesleyan college, and various other schools belonging to the different religious denominations; the custom-house, the barracks, jail, &c. A line of wharves and jetties, and two or three streets of substantial shops and warehouses, some of wood

became very much degraded; but the upper country of Georgia becoming more densely settled and the formation of the Augusta canal 9 m. in length, bringing the waters of the Savannah to furnish water-power the prosperity of Augusta has revived, and stores, machine-shops, and similar works have been established and successfully worked. The streets are wide, straight, and lighted with gas, and among the public buildings are the city-hall, a museum hall, a medical college, 14 churches, an arsenal, 9 banks, and 4 or 5 newspaper offices. A line of steamboats runs to Savannah and a bridge connects the city with Hamburg in S. Carolina. Pop. 13 000.

AUMALE, s. n. N. Africa, Algeria, prov. and 55 m. S.E. Algiers, founded anew by the French in 1846, on the ruins of an Arab town of the name of *Sur Ghazien*, and of the much more ancient Roman *Ausia*. It occupies an important military position, which makes it the key to the country of the Kabyles, and keeps open the communication between Algiers and Sétif and the valleys of the Tell with the salt-lakes of the Sahar. The possession of this spot by Abd-el-Kader is said to have assisted him materially in keeping the French so long at bay. Since its new foundation it has made considerable progress, and the inhabitants have breweries and lime-kilns, but are chiefly employed in the cultivation of the surrounding district, which is said to be fertile. Government has here a breeding stud. There is a weekly Arab market. Pop. 1516.

AUPA (Gauz and Little), two nearly contiguous places, Austrian empire, Bohemia, circle and about 70 m. N.E. Gitschtin—*Gross Aupa*, situated in a valley of same name has a parish church four miles, and a limestone quarry the inhabitants are chiefly employed in the forests or in spinning. In the mountains near it are mines of copper and arsenic. Pop. 2611—*Little or Klein Aupa*, situated on a small stream at the foot of the Black Koppe; has a church and a mill and contains 1160 inhabitants.

AUBAG or **OMAYN**, a river India, which rises on the E.W. frontier of Bengal, in lat. 21° 30' N., lon. 87° 45' E. flows E. for about 100 m., and joins the Teli Nudda on its left bank 17 m. above the junction of the latter with the Mahanuddy.

AURONZO a town Austrian Italy prov. and 26 m. N.N.E. Belluno. It is the seat of a court of justice and has in its vicinity mines of lead and calcareous and the great forest of St. Marco, which furnishes the best timber for the navy. Pop. 5476.

AURUNGABAD the name of several places in India—1. A town in the Dominion of Gwalior.—2. A town in the Province of Agra, and 4 m. S.W. Muttra.—3. A town in Bengal dist. Mooradabad 31 m. S.E. Rajshah.—4. A town in Oude, 34 m. E. Shahjahanpur. It obtained an unhappy celebrity during the sepoy mutiny from its proximity to the scene of one of the horrible massacres perpetrated on defenceless Europeans.

AUSCHA a town Austrian empire, Bohemia, circle and 9 m. N.E. Leitmeritz, esp. dist. of same name; with a parish church an hospital and manufactures of cloth, liquors, and chemicals. Excellent hops are grown in this district. Pop. 1000.

AUREG [add.] a town Austrian empire, Bohemia, circle and 10 m. N. by W. Prag, at the confluence of the Biele with the Elbe, and on the Bohemian-Bavarian railway 231 m. by rail N.W. Vienna. It consists of the town proper and three suburbs in the seat of several important public offices, and has a deanery church, a high school a seminary, extensive manufactures of linen and cotton goods; and a consider-

but more of brick or stone, afford ample facilities for trade, and furnish proof of its great extent and increasing importance. The botanical gardens and the little suburban bays sparkling with the white villas of wealthy merchants, afford many beautiful walks. The great drawback, however, is the total absence of trees, except such as the settlers themselves have planted. Auckland, though founded only in 1840 has an estimated pop. of 30 000.

The following statistics present a view of the progress of the port—

	Immigrants.	Vessels.		Imports.	Exports.		
		Entered.	Cleared.				
		No.	Tons.	No.	Tons.	£	£
1860	264	88	26,506	88	24,219	434,211	19,364
1861	346	103	28,974	103	35,729	291,444	67,372
1862	465	107	31,013	106	34,433	314,906	73,354

AUCKLAND BAY E. side of Bay of Bengal in Tenasserim provinces. The rocks and islands of the Mergel Archipelago enclose the entrance.

AUERSEEG, a town Austrian empire, duchy Carinthia, 12 m. S.E. Lienz. It is supposed to occupy the site of the Roman *Augusta*, is the cradle of the Aversperg family and has a castle with a beautiful hall a riding-school and many antiquities. Pop. 1000.

AUGUSTA [add.]—1. A city U States, esp. Maine at the head of the deep navigation of Kennebec river and on the Portland and Bangor railway 60 m. N.N.E. Portland. It is handsomely built, chiefly on a bank of the river which is crossed by a bridge, and upon rising ground, which gives it an commanding position. It contains a spacious park, an arsenal and an hospital for the insane, besides several schools and manufactures. About half a mile above the city a dam has been constructed across the river to improve the navigation above it, and at the same time to provide water-power for manufacturing purposes. Steamboats ply above the dam between Waterville and Augusta. Pop. 6000.—2. A city U States, Georgia, esp. Richmond co., on the Savannah, 231 m. from its mouth, and on the S. Carolina and Georgia railways, of the latter of which it is the S. terminus. Originally it figured very much on the wagon trade, which was destroyed by the construction of the railway and the place

able trade in cotton goods, wine, which bears a high name, sugar, fish, fruit, wool. Both these and commerce and are worlded in the vicinity. Pop 3666.

AUSTRALIA. In no part of the world has geographical exploration made more rapid advance, within the last twenty years than in the great island-continent of the southern hemisphere. Nor has discovery been anywhere more fruitful of consequences. The rapid progress of settlement, and increase of population in Australian lands are among the most noteworthy conclusions in the social and commercial records of the present century. Discovery has, in this case, been not merely the solution of a geographical problem but the immediate precursor of civilized existence and colonial industry. The explorer has heralded the way for the squatter and the dwelling-places of man have sprung into existence along the tracks which he has marked out in the bush. A vast portion of the *terra incognita* of a prior (and yet but recent) date, as shown upon our maps of Australia, is now crossed by the lines which indicate the rapid advance of such enterprise.

The first settlement of the white man upon the Australian shores dates hardly more than three-quarters of a century since. Five and twenty years elapsed after the foundation of Sydney (1788) before the colonists had succeeded in crossing the range of the Blue Mountains, by which their western horizon was limited. Bathurst, on the Upper Macquarie, within the few plains that lie beyond the mountain-range, was at once founded (1818) and interior discovery thenceforward continued to advance, though for a time by slow and gradual stages. The great rivers flowing inland, in a westerly direction early rewarded the persevering efforts made by the colonists of New South Wales to extend their knowledge of the Australian interior. Portions of the rivers Laachlan, Macquarie, Murrumbidgee and Upper Murray (or Hume) were successively traced between the years 1817 and 1824, by Oxley, Cunningham, Hovell, Hume, and others. Sturt, in 1829 first reached the stream of the Darling. All of these rivers, with others of less considerable extent were subsequently ascertained to belong to the extensive basin of the Murray the main channel of which was ultimately (1830) traced by the last-named explorer to its outlet in Encounter Bay on the coast-line of the Southern Ocean. Major (afterwards Sir Thomas) Mitchell in succeeding years, 1831-6 visited the Karoola and other northern affluents of the Murray basin followed the stream of the united Laachlan and Murrumbidgee to its junction with the Murray and traced the Darling upward to the point to which its stream had been already pursued downward. A vast range of country extending through more than ten degrees of latitude thus became opened to the enterprise of the settler of New South Wales. The portion lying south of the Murray explored and partially surveyed by Mitchell received the name of Australia Felix—an epithet justified by its abundant and well watered pastures.

The foundation of Melbourne (1837) on the banks of the river Yarra, a short distance above its outlet into Port Phillip, and the occupation of the adjacent plains by the colonists of Tasmania and New South Wales rapidly ensued. The Port Phillip district however remained until the gold discoveries of 1851 a pastoral region and its population up to that date was only 77 000. It was in that year first colonized a distinct colony under the name of Victoria.

The year 1836 had witnessed the establishment of a settlement, entirely distinct from the elder colony on the shores of St. Vincent and Spencer Gulfs, the nucleus of the now flourishing colony of S. Australia. Already seven years previously (1829) the banks of the Swan river had become the home of British settlers and the name of W. Australia replaced that of New Holland, by which the western half of Terra Australia had, since the early days of Dutch discovery been chiefly known. Quasaland hitherto the Morston Bay district of New South Wales, was first made a distinct province in 1859.

The gold discoveries of 1851 exercised a vast influence over the growing prosperity of Australia and the development of its resources. Up to that date the total number of the colonial populations, including Tasmania, fell short of 400,000 of whom the colonists of New South Wales, with the Port Phillip district, included about a quarter of a million. The population of New South Wales had, however, doubled

itself within the preceding ten years, and the industrial resources of the province were already making rapid advance. S. Australia had at the same date 67,000 inhabitants; the Swan River settlement fewer than 10 000. Within five years of that period the Australian colonies jointly numbered more than 800 000 inhabitants; in 1861 their united population exceeded 1 100 000. Victoria alone having upwards of 500 000 inhabitants and its capital Melbourne, having grown from a provincial town of hardly more than 20 000 people, into a stately metropolis with upwards of 180 000 inhabitants. The population of Victoria, indeed became more than quadrupled within the five years immediately ensuing on the gold discoveries.

Before the era of development above adverted to the settlers on the eastern seaboard of Australia were comparatively isolated from the colonists on its southern and western shores. Such intercolonial intercourse as existed was maintained chiefly by sea. In the case of Western Australia, exclusively so. Vast tracts of impenetrable desert were believed to separate S. Australia from the province of New South Wales on the one hand, and the Swan River settlement on the other. Overland communication even between Adelaide and Melbourne—the two most nearly adjacent of the provincial capitals—was not established until the period when the attractions of the gold-fields of Victoria began to draw thither with irrepressible influence, the unsettled population of neighbouring lands. As early as 1837-8, however Mr Eyre whose name has subsequently become identified in an eminent degree with Australian discovery had driven a numerous herd of cattle overland from Sydney to Adelaide, a period of eight months being occupied on the route, although the direct distance between those cities is less than 800 miles. Mr Eyre repeated this exploit, with some deviation from his prior route, in the succeeding year accomplishing the distance in less than three months; overland communication between the colonies of New South Wales and S. Australia, for the purposes of the squatter was thenceforward definitely established. Subsequent efforts of Mr Eyre were directed towards the accomplishment of a similar communication with the settlement of W. Australia, and the exploration of the unknown interior lying to the northward of Adelaide. The years 1839-41 were chiefly devoted to these objects. In 1840 while engaged in examining the country lying at the head of Spencer Gulf Mr Eyre discovered the southern arm of Lake Torrens. In the following year leaving Adelaide under the auspices of the colonial government, he advanced nearly 400 m along the shores of the lake, to which however (owing in part, it appears probable, to the effects of swamps and in some measure to its extraordinary general character) he assigned proportions since proved to be vastly in excess of the reality. The enormous horse-shoe shaped Lake Torrens, which for many years after the date of Mr Eyre's journey continued to figure upon our maps, has only recently given place to numerous detached basins, ascertained to occupy its supposed place. Mr Eyre's most remarkable exploit, however was the making (1841) an overland journey from Port Lincoln on the western shore of Spencer Gulf, along the shore line of the great Australian Bay, to King George Sound, a distance of more than 1000 miles. This journey through a sterile tract of country almost destitute of water was accomplished under circumstances of peculiar difficulty the only white companion of the explorer being murdered by the native aborigines during its progress and the last 600 m. being traversed with the companionship only of a single native boy! The account of the journey passed through on this occasion was such as to deter others from repeating the attempt at opening inland communication between S. and W. Australia. Recently however the attention of the Swan River colonists has been turned in the same direction, there appear to be some reasons for regarding a portion of the hardships which Mr Eyre underwent as inherent only to the progress of a first explorer and it has even been proposed to found a settlement in the neighbourhood of Cape Frey and Point Malcolm midway between King George Sound and the head of the great Australian Bay.

The wide range already covered by the adventures of Sir Thomas Mitchell within the territory of New South

Wales was yet further extended in 1846, by a journey undertaken with the view of opening overland communication with the Gulf of Carpentaria. Starting from the banks of the Upper Darling, Mitchell traversed the more northwardly affluents of its extensive basin, he thence followed a general northwardly course, through a broken and difficult country as far as the parallel of 21° 30' S. and afterwards turning westward and crossing a dividing range of mountains, struck the channel of a river flowing to the N. W. Mitchell followed the course of this river (to which he gave the name of "Victoria") for six successive days, through a western region of the most promising description, finally leaving it in lat. 24° 14' S. lon. 146° 34' E. The course of this stream led his discoverer to the sanguine conviction that its outlet would prove to be in the Gulf of Carpentaria, and Mr. Kennedy was despatched from Sydney in the following year with the view of tracing the newly found channel to its expected outlet. Shortly after reaching the farthest point attained by his predecessor however the course of the river was found to turn S. W. and afterwards almost due S. while its waters, divided among several channels, became almost lost in the arid plains to which it conducted. Kennedy ultimately found it necessary to abandon the stream in lat. 26° 13' S. lon. 143° 20' E. returning to Sydney by a more southwardly route. The direction of the latter portion of its channel pointed to the inference since verified, that the Victoria of Murray and Kennedy would be found continuous with the Cooper Creek of Stuart's Central Australian expedition, and the name of Cooper River has since been substituted for the designation first conferred upon it. Kennedy's ultimate fate was disastrous; in the following year (1848) he took the charge of an expedition fitted out for the purpose of exploring the Cape York peninsula and the adjoining shore of the Gulf of Carpentaria, and perished in its course at the hands of the natives.

Meanwhile an overland journey between Moreton Bay and Port Essington at that time the site of a settlement maintained by the imperial government had been successfully made by Dr. Leichhardt, a German resident in New South Wales a man who combined high scientific attainments with a rare amount of courage and enterprise. Moreton Bay was then the most northwardly point of settlement on the east-coast of E. Australia, and it was from Jimba, the furthest inland station of Darling Downs (60 m. W. of Brisbane) that Leichhardt finally started on his perilous undertaking, in October 1844. After a journey of fourteen months, in the course of which he traversed a vast extent of watered and fertile country—much of it admirably adapted for the purposes of the settler—Leichhardt finally reached Port Essington in December 1845, and thence returned by water to Sydney to the mingled surprise and delight of the residents in that city by whom he had been given up as lost. In the course of this marvellous, and at the time unaccomplished journey conducted solely by the aid of private resources, Leichhardt had passed over more than 3000 m. of entirely new country much of it since occupied by the flocks and herds of the Queensland squatters.

The same enterprising explorer formed, in 1847 the plan of a still more extensive journey in which he proposed to cross the entire breadth of the Australian continent, from east to west. Leichhardt's first essay towards the achievement of this gigantic enterprise was thwarted by snowed circumstances, and after prosecuting a short way to the N. W. of Sydney he was compelled to return. He started again in the beginning of 1848, and never returned; his subsequent fate remaining involved in mystery. Traces of his direction were found by Mr. A. C. Gregory, who in the course of a journey undertaken expressly for that purpose in 1856 discovered a tree marked with the initials of the ill-fated explorer together with other indications of Leichhardt's having camped at the spot. This was about lat. 24° 30' S. lon. 146° 6' E. within the valley of Mitchell's Victoria river.

While Leichhardt was engaged in extending knowledge of the Australian interior from the side of New South Wales, the colonists of E. Australia were anxiously watching the result of an enterprise directed towards the central regions of the continent, of which their metropolis formed the starting-point. This was the Central Australian expedition

of Captain Stuart. In 1845 Captain Stuart had submitted to the home authorities the plan of an extensive exploration of the Australian interior and arrangements for the conduct of the expedition were finally made with the provincial government of E. Australia. The expedition which was upon a somewhat extensive scale, consisting in all of twenty persons (John Macdonald Stuart, whose name subsequently fills so distinguished a place in the records of Australian discovery was amongst the number being attached to the party in the capacity of draughtsman) left Adelaide in August 1844, and, proceeding in the first instance to Moorundi, on the lower Murray ascended that river to the junction of the Darling. Up to this point they were accompanied by Mr. Eyre. The channel of the Darling was then followed up to Williforra or Laidley Ponds (Moundie) in lat. 23° 36' S., whence the party finally struck into the interior through a hitherto untraversed region, following a general direction to the W. of N. They found themselves on the summit of a plateau, traversed by numerous rocky ridges, of moderate elevation with a general N. and S. direction beyond which to the westward extended vast and dreary plains covered with forest and scrub. After some months passed amongst country of this description, the ranges were found to terminate a short way to the northward of the 29th parallel, and the immense level of the interior lay spread before the explorers. The heat was intense, the thermometer ranging from 106° to 118° in the shade during the afternoon and on one occasion (January 21) standing in the bush at 132 in the shade, and 90° in the sun! The hot blasts of wind from the N.E. were felt like the scorching breath of a large fire, and the whole surface of the country was rendered lifeless by the intense heat. Yet the nights were cold, and the men, besides the shelter of their greatcoats, were glad to creep close to their fires. Birds of prey with parrots and pigeons, meanwhile migrated to the N. W. while pelicans, cormorants, and wild-fowl were observed to come from that quarter.

Captain Stuart's depot during this period was situated amongst the ranges in lat. 29° 40' S. Thence, after a lapse of more than six months without a drop of rain having fallen it was determined in July to divide the party, detaching a third of its number for the purpose of attempting to reach Adelaide while he himself made a further attempt to penetrate the dreary wilderness to the west and northward. The thermometer which had reached 15 in February fell in July to 34. A second depot was established between 50 and 80 miles N. W. of the former in lat. 29° 6' S. The alternations of sand ridges and flats which stretched to the westward were found to be terminated (at a distance of about 80 miles) by a sandy bed of an extensive lake—part of the Torrens basin of Eyre's map. This consisted chiefly of sand and salt with patches of clay and cyprus and though for the most part dry contained detached sheets of dark blue salt water with sulphur banks around. Further progress in this direction was impracticable, and a return to the depot was necessary. Thence, attended by four companions only taking a light cart and two pack horses, with fifteen weeks' provisions Capt. Stuart struck a N. N. W. course into the interior—leaving the depot on August 16 and continuing to advance until September 9th at which time he had reached a point in lat. 25° 4' S. lon. 126° 15' E. The ground passed over was in many parts of the most forbidding description—high and broken ridges of sand of fiery red colour exceeding even another like waves of the sea. The sand-hills only terminated in a vast stony plain, within which the horses lay so track, and in which no object was visible on the horizon. A polygonum of two miles in breadth bounded this stony desert on the west, and arid plains, desolate alike of stones and of herbage, succeeded. At intervals, however water was met with, and in its vicinity grassy and wooded tracts of country the resort of numerous parrots, cockatoos, and other birds. Native habitations were also seen. The bed of Eyre Creek, coming direct from the N. N. W., was found full of grass, but sand ridges crossed it in upon either side, and the sand fresh water sand at the head of the creek limited the advance of the party. They walked, indeed, a few miles further northward, but in every direction the country was alike impracticable and the drought was extreme. They reached the depot again upon October 2. One further attempt was made to penetrate the

interior from a bearing to the E. of the former coast), and the discovery of Cooper Creek, with extensive permanent sheets of water, rewarded their arduous labours. Beyond this, to the northward, the sand hills, and after them the stony desert, were again met with, and the same unbroken wilderness stretched around. The return to the depot was attended by extreme suffering, the party being only saved from perishing by the timely discovery of a solitary water-hole. Cooper Creek however was found to contain abundances of grass and water and was the abode of numerous natives, by whom Stuart and his companions were received with the greatest kindness. The depot again reached, the further and final task of bringing back the party in safety to the Darling involved considerable difficulty the country being in a fearful state of drought, and the heat intensely painful. By the 20th December 1845 the Darling was reached, and the ensuing 19th January witnessed the return of Stuart and his companions to Adelaide after an absence of sixteen months.

The results of this expedition were unfavourable to the prospects of settlement within the Australian interior and combined with the prior experience of Eyre, tended to discourage the sanguine hopes which had been directed to that quarter. A hasty generalization based upon imperfect and utterly insufficient materials led to inferences which have since been found altogether fallacious. Because Stuart, in a season of unusual drought, had struck a track which proved to lead to an arid wilderness it was assumed that the whole vast interior of Australia must be equally barren, and a million square miles of country were condemned. In the minds of speculative geographers, to irreclaimable sterility. Happily the enterprise of S. Australian colonists was daily taking a direction which involved practical disproof of these theories and has ultimately led to their relinquishment. The increasing flocks and herds of the settlers level of the continual discovery of further advances from Adelaide in every direction, and the establishments were gradually pushed forward into the tracts of country lying beyond the head of Spencer Gulf, both to the eastward and northward. In 1856-7 examination of the country enclosed within the supposed vast extent of the Torrens basin by Habbage, Goyder and others showed the existence of permanent waters near localities where Eyre had found nothing but an arid wilderness, and even in near proximity to the Mount Hopeless of that traveller. Within the same and immediately succeeding years, the labours of Habbage, Warburton, Macdonall Stuart, and other explorers were directed to the country lying west from Spencer Gulf towards Breckin Bay on the southern coast-line and stretching northward from the gulf past the western side of Lake Torrens, towards the more distant interior. The ideal Lake Torrens of earlier Australian geography has been found to include a chain of lakes distinct from one another to which the names of Eyre, Gregory, Frome, and others have been subsequently attached. Lake Gregory formerly regarded as the eastern arm of the Torrens basin, received the drainage of Cooper Creek, and with it of a large area of the more distant interior. Lake Torrens (which, even in the more restricted limits now ascertained to belong to it, extends upwards of 150 miles in the direction of N and S) has its drainage into the head of Spencer Gulf though divided from it during the season of drought by an intervening isthmus. Lake Eyre, like Lake Gregory represents a basin of interior drainage, and has permanent sheets of salt water fed by the floods and numerous smaller streams. Its basin, the surface of which is only 70 ft. above the sea, probably represents the most depressed portion of the interior yet known. The western limits of the Eyre basin however are marked by well-defined ranges of high ground, some points in which are probably from 1600 to 2000 feet above the sea.

Of these results the most important are due to the enterprise of Macdonall Stuart, whose subsequent labours have placed him in the foremost rank of Australian explorers. The more energetic among the settlers of S. Australia had long cherished the idea of opening communication with the northern coast of the continent, by a direct route across the intervening interior, with the ultimate view of establishing commercial relations with India and the islands of the Eastern Archipelago. Macdonall Stuart's exploratory journeys in

1856-59, joined to his previous experiences under the leadership of Captain Stuart, marked him out as the man to carry the bold project into execution and the necessary means were supplied chiefly through the instrumentality of two public-spirited colonists Messrs Chambers and Flinn. In March, 1860 Stuart started from Chambers Creek (on the S.W. angle of Lake Eyre), with the hope of reaching either the Victoria river or the N.W. coast, or of making the sea-shore at some point between that river and the Gulf of Carpentaria. His general course was a little to the W. of N. Alternate hills, plains, grassy flats, and intervening creeks were traversed water being sometimes scarce but the proportion of good land, on the whole, far exceeding that of an arid description. In seven weeks from the time of starting he had reached the centre of the continent, and fixed the place of a conspicuous eminence of red sandstone the Central Mount Stuart of subsequent maps. His advance thence to the north-westward, in the direction of the Victoria, was prosecuted for 150 miles, but the absence of water compelled a return to Mount Stuart and the resumption of a northward course. In this however after advancing to the lat of 19° 45' S. he was finally baffled, less by the difficulties and hardships attendant upon long continued drought than by hostile encounter with large herds of natives. Chambers Creek was again reached on September 8 six months only having been consumed in an enterprise which went far towards proving the feasibility of crossing the Australian continent than anything that had previously been accomplished. A second and a third journey were however necessary before final success was realized.

Macdonall Stuart's second journey occupied part of the year 1861. Passing over his track of the previous year he succeeded in reaching nearly to the parallel of 17° S. where he found the plains covered with a dense scrub which put a barrier to further progress, either in the direction of the Victoria or the Gulf of Carpentaria. The bed of Newcombe Water however in lat. 17° 30' S. presented a large permanent sheet of water with well-grassed and wooded banks, adjacent alluvial soil and evidences of a numerous native population. The limited means at the disposal of the party again necessitated return and Adelaide was reached by the middle of September. Public attention both in the colony and at home was thoroughly aroused to the importance of the enterprise yet incomplete and only a few weeks elapsed before Stuart again started (Dec. 1861) on his third and finally successful journey which involved a period of a few days more than a year. By the month of April, 1869 Newcombe Water was again reached, beyond were well-grassed plains, with a country dipping to the eastward. A northerly track was now pursued, until the party struck the banks of the Roper river well known in connection with Leichhardt's and Gregory's explorations and along the valley of which the former had travelled in 1845 on his journey to Port Essington. Stuart's further course lay in the direction of N.W. about 60 mi. to the W. of (and nearly parallel to) Leichhardt's track. The Roper river an affluent of the Adelaide, which debouches into Van Diemen Gulf was reached in the middle of July the Adelaide itself soon followed and at length (July 24) the sight of the sea rewarded the enterprise of Stuart and the delighted companions of his toils. The point reached lay a short way E. of the mouth of the Adelaide river in Van Diemen Gulf. The return journey was one of much hardship and personal suffering to the leader of the expedition.

Macdonall Stuart's successful enterprise was the immediate precursor of a scheme of settlement on the N. coast of Australia at the hands of the S. Australian colonists. The vast tract of country which extends northward from the 28th parallel (the prior northerly limit of S. Australia) to the Indian Ocean, between the meridians of 129° and 138° E. (and upon which the name of Alexandra Land has been bestowed by its explorer) has been provisionally placed under the charge of the colonial government. Stuart's journeys seem to give assurance that this country may be safely traversed by the floods of the settlers. It remains to demonstrate the successful completion, for national purposes, of a tract of country lying altogether within the torrid zone and approaching within twelve degrees of the equator.

While Macdonall Stuart was seeking to carry out the designs of the colonists of S. Australia, the people of the adjacent

ing province of Victoria had directed their regards to a similar result, and that the waters of the Gulf of Carpentaria had been actually reached (February 1862) by the members of an expedition fitted out at Melbourne during the preceding year. This was the ill-fated enterprise under the charge of Robert O'Hara Burke, which though undertaken with a more than ordinary amount of prior organisation, and abundantly provided with means of success—namely being for the first time employed upon this endeavor to penetrate the Australian interior—was ill-managed from the outset and cost the lives of its leaders. The Burke and Wills expedition, as it is called at Melbourne in August, 1860. McIndrie, on the lower Darling, was made its first depot, and an advanced party headed by Burke, rival of Cooper Creek by the 15th November. On the 16th of the following month, Burke, accompanied by three Europeans—Wills, King and Gray—and taking with him six camels, a horse, and three months' provisions, started for the Gulf of Carpentaria. The depot at Cooper Creek was left in the charge of Mr. Brad, with instructions to await the return of the leader of the expedition. Its remaining members, who, with the chief bulk of the stores, had been left behind at McIndrie, were to advance to Cooper Creek by more gradual stages. Burke and his companions, in a rapid journey of two months, succeeded in reaching the tide-water of the Gulf of Carpentaria, near the mouth of the Flinders river—their track lying for the most part along the line of the 140th meridian. Although the sea was not actually visible, its immediate proximity was indicated by the saltiness of the water in the channels of the intervening marches, upon which wild geese, plover and pelicans were enjoying themselves. A like period was consumed in the return journey to Cooper Creek, in the course of which one of the party, Gray, died. Burke, with his two surviving companions, Wills and King, regained the depot at Cooper Creek on the evening of April 21 and found it deserted—a note left by Brad conveying the information that the party under his charge had started upon the morning of that very day upon their return to the Darling. A supply of provisions had, indeed been left behind. The exhausted condition of Burke and his companions forbade any attempt at overtaking Burke's party and seemed to render equally hopeless the chance of their reaching McIndrie from which they were 1600 m. distant by any route of their own. After attempting in vain to reach the out-settlements of S. Australia, and prolonging for several weeks a wretched existence—almost their sole resource during the chief part of the time being the seeds of a plant called *nardoo* the use of which they learned from the natives of Cooper Creek—Burke and Wills their strength utterly exhausted and hopeless of relief, lay down to die. King the sole survivor was preserved from utter starvation by the kindly aid of the natives, and was found living amongst them in the ensuing September when a party of inquiry despatched from Melbourne under the charge of Mr. Howitt, reached the creek. Thus fatally for his leaders terminated the expedition in which the Australian continent was first directly crossed, from sea to sea. The charges kept by Wills convey information of the existence of much good country along the line of route taken by the explorers, and scarcely a day appears to be passed, either on the outward or the return course, but where watercourses having been traversed. A considerable portion of the country between the proper and the gulf was found to be well-watered and richly grassed.

The finding a practicable route from Victoria to the Gulf of Carpentaria was not the sole, nor even the most important fruit of the unfortunate Burke and Wills expedition. While the fate of its leaders was still in suspense, the keen interest awakened on their behalf led to the fitting out of expeditions for their relief on the part not merely of the people of Victoria, but also of the colonists of S. Australia and of Queensland. The services of M. Kinley Landborough and Walker were directed to this purpose—the first named at the instance of the S. Australian settlers, the two latter on the part of the Queensland population. These expeditions, although failing in the primary purpose of carrying aid to Burke and his companions (whose fate was, indeed, already decided) achieved results of high importance to the cause of interior discovery. M. Kinley leaving the most distant out-

station of S. Australia (in the vicinity of Eyre's 'Moore's Hopeless') in September, 1861 advanced northward across the Torrens basin—once supposed to constitute an impenetrable barrier in that direction. A walled region, with numerous lakes, succeeded. Part of the 'stony desert' of Stuart was then traversed, and, crossing the track which had been pursued by Burke and Wills, a general northwesterly course—through a partially flooded country succeeded by vast grassy plains, with volcanic hills as their boundary—brought the party to the southern shore-line of the Gulf of Carpentaria, at the point where the river Leichhardt enters the sea. This was in May 1862. Thence M. Kinley turning his steps eastward, pursued an overland route to Port Denison, in Queensland, reaching the out-stations of that colony early in the month of August.

Landborough, whose experience as a practical business rendered his journey a remarkable instance of great results successfully accomplished with limited means, had the mouth of the Albert river as his starting-point, being conveyed thither from Moreton Bay by sea. His first sought to penetrate inland in a S.W. direction from the Gulf of Carpentaria, but after an advance of 200 m. without meeting any traces of Burke and his companions, returned to his depot on the Albert. This was in January 1863. Starting again, in the following month he traversed the whole central interior of the Queensland province, from the Gulf of Carpentaria to the banks of the Warrego river and thence, by the Warrego valley and the Darling reached McIndrie, on the last-named river. The country crossed on this occasion consisted, in the neighbourhood of the gulf of thinly wooded and well-grassed plains, bearing the marks, so common in Australia, of alternate drought and flood, hostile ridges leading to fine pastoral uplands were afterwards found. Walker, meanwhile, starting from Rockhampton on the Fitzroy river in September 1861 had made his way over land to the Gulf of Carpentaria by a distinct route—first proceeding westward to the upper portion of Mitchell and Kennedy's Victoria river and thence striking northwesterly to the mouth of the Albert finding on the way upon the banks of the Flinders, the tracks of Burke and his companions. Much of the country passed through by Walker's party was found of the most serviceable description for the purposes of the explorer.

The routes of Burke, M. Kinley Landborough and Walker joined to those of Gregory, Leichhardt, and other explorers, interest in numerous directions the vast N.E. in terror of the Australian continent, as Macdonell Stuart's did its more central regions. The map alone can show with precision the immense field over which these explorations range, and their bearings relatively to one another. The practical enterprise of the Queensland settlers is rapidly filling up the gaps between them, in so far especially as the north and easterly divisions of that province are concerned. The cattle stations of the settlers are now found as far north as the parallels of 18° and 19° about 1000 m. distant from Brisbane, and the course of similar enterprises has well-nigh extended to the Gulf of Carpentaria, if, indeed its shores be not as there already reached.

One highly important series of expeditions remains to be noticed—those, namely, which had W. and N. Australia for their field of operation and with which the names of Augustus C. Gregory and his brother are intimately associated. The exploring labours of the Moors. Gregory range over a lengthened period—from the year 1846 downward—the most important amongst them being those connected with the N. Australian expedition of 1855-56, under the charge of Augustus C. Gregory. In 1846, in the course of an exploring journey through the country lying N. and N.E. of Borneo river the brothers Gregory discovered coal on the banks of the Arrowmuth river. Two years later Augustus Gregory was intrusted with the command of the settlers' expedition the object of which was to find available tracts of land to the northward of the hitherto settled districts of W. Australia, and, if possible, to reach the Gascoyne river which flows into Shark Bay. At the same time Mr. Roe, then surveyor-general of the colony explored successfully a large area of the country lying N.E. of Perth, and connected his observations in the most extensive outward from King George Island with the discoveries made by Eyre in 1841. Austin, in 1854,

extended the limit of Gregory's observations in the interior to the northward of Perth, passing over country scarcely truly worthless for the ordinary purposes of the settler, though containing evidences of mineral wealth. The abundance of a pelonious plant, which attains homes fully within large areas of the interior in this direction, forms a noteworthy and unsatisfactory characteristic. The same plant was found by Gregory in parts of the more northern interior.

The North Australian expedition of 1855-56 was a more important undertaking. Its main purpose was to ascertain the suitability of the NW coast for the purpose of permanent settlement. Hardly anything was then known of those portions of the mainland beyond the line of the coast surveys the expedition of Grey and Leachington, in 1837 having penetrated but an insignificant distance inland, in the neighbourhood of Hanover Bay and Prince Regent river. The Victoria river which enters the eastern arm of Cambridge Gulf, explored and ascended to some distance by Wickham and Stokes in 1839 seemed to offer a promising field of search, and it was thither that the N. Australian expedition (organised and led by Sydney in 1855) was directed, the party being conveyed to the mouth of the Victoria by sea. Mr. Gregory's first labours on this occasion were devoted to a careful examination of the lower Victoria, a depot camp being established about 80 m. above the mouth of the river. Thence, with a few companions the leader of the party sought to penetrate, in a S.W. direction, the unknown wilderness of the interior. Ascending the Victoria to its sources, and crossing (at a height of about 1800 ft) the dividing ground which separates the coast-drainage from the waters of the interior, he struck the corner of Stuart Creek, flowing S.E. W. which he followed for nearly 800 m. to its termination in the dry bed of a salt lake (lat. 19° 10' S, lon. 127° 30' E). The aspect of the country was here of the most forbidding description—a boundless waste of sand-dunes and low rocky hillocks, in which the surface waters become rapidly absorbed. Return to the depot was determined on, and thence the exploring party started (June, 1856) in the direction of the Gulf of Carpentaria and Moreton Bay. The general course followed in this prolonged journey of more than 9000 m. lay in the reverse direction of Leachington's track in 1845—in many parts nearly parallel to it though at a somewhat further distance inland. The dividing ground between the rivers of the north-west coast and those flowing into the Gulf of Carpentaria was found of very moderate elevation nowhere exceeding 800 ft. The valley of the Roper was next crossed. Thence the party skirted the edge of the extensive table-land of N. Australia, crossing the various rivers which Leachington had found flowing into the Gulf of Carpentaria, at points about 50 m. nearer their sources than in the case of the settler traveller. Gregory remarks upon the great scarcity of animal life in the level plains lying E. of the Flinders river, which, as usual showed marks of extensive inundation. The valley of the Gilbert was next ascended to its head, and the Carpentaria basin left behind, as the party crossed the heathy ranges which divide its waters from those of the Burdekin valley. The Burdekin was descended to its point of junction with the Sutter or Cape River of Leachington, and the route of that traveller connected with the explorations of Mitchell on the Belyando. Thence, crossing the Macintyre and Connet rivers, the out-stations of the colonists were reached and the party ultimately arrived at Brisbane before the end of 1856.

In 1858 Mr. F. T. Gregory at the instance of the settlers of W. Australia, conducted a highly successful examination of the tract of country watered by the Murchison and Gascoyne rivers—the former flowing into Ganthame Bay the latter into Shark Bay—large tracts of available land being found within the valleys of the upper Gascoyne and its northerly affluent, the Lyons. Mount Angustin, a detached hill near the N. bank of the Lyons, 8480 ft. in height, afforded a view over a wide range of country terminated to the eastward by bold ranges of trap and granite. The general aspect of the country explored on this occasion was indeed superior to that of W. Australia in general, and presented—especially towards the upper portion of the rivers—a more varied and hilly character. Three years later (1861) under the same leader an expedition equipped on a more extensive scale, was despatched from the mouth of Swan River to the

N.W. coast, which was reached at Nickel Bay (lat. 32° 40' S) the starting-point of its labours in the N.W. interior. Mr. F. Gregory's labours upon this occasion included the discovery of the Fortescue, Hardy and Ashburton rivers flowing towards the W. coast, from the last-named of which he connected his observations with those made on his previous visit to the valley of the Lyons. The country in which these rivers have their origin was found to be the most elevated in W. Australia, Mount Hanson (lat. 32° 35' S) which was ascended by our traveller having an elevation of 1000 ft. above the valley of the Hardy while Mount Bruce and the mountain-ranges to the eastward were assumed to reach not less than 4000 ft. above the sea. A large amount of fine pasture country was found adjoining the S. and E. base of the Hamersley Range as the hilly tract on the S. border of the Fortescue valley was called. Making a second start from the shores of Nickel Bay—this time on an easterly course—the travellers crossed in succession the valleys of the Sherlock, Yule, Boreley, Shaw, De Grey and Oakover rivers all flowing northward and reached their extreme limit in successive places of difficult lying E. of the last-named stream (between the parallels of 31° and 32° S. and the meridians of 121° and 125° E.). The country had gradually declined in elevation at this arid tract was approached, and it was necessary to fall back upon the watered districts. In the course of the return journey to Nickel Bay the De Grey river was followed down to its outlet in the sea which it enters through an extensive delta. Fresh water is here abundant, and there are large areas of well-grassed land, composed of alluvial deposit.

The two last-described journeys of Mr. F. Gregory go far towards completing the examination of the seaward division of W. Australia, from the N. coast-line of the continent northward to the mouth of the De Grey river. The remainder of the N.W. coast between the De Grey river and the mouth of the Victoria (at which latter point the labours of Augustus Gregory commenced) is the only portion of the Australian seaboard which remains untraversed in so far as inland exploration is concerned a very limited portion only of the wide intervening area having been examined by Grey and Leachington, in the unsuccessful expedition of 1847.

In glancing however briefly at the course of Australian exploration within recent years, it is impossible not to be struck with the vast successes made to our knowledge of the Australian interior and with the eminently satisfactory nature of the results that have been obtained. In nearly every direction in which the continent has been traversed, watered and grassy plains have been found to occupy at frequent intervals—sometimes indeed over continuous areas of large extent—the spaces hitherto supposed to be an arid wilderness, and the general capability of the Australian interior for the purposes of pastoral settlement is placed beyond doubt. Exceptional cases no doubt occur—among the most noteworthy those marking the termination of Stuart's journey in 1845 and of Augustus Gregory's inland tract (within the north-western interior) in 1856. But Macdonald Stuart's routes lie midway between those points, and the supposed barren waste of which they were once held to constitute the external limits can have no real existence. That interior Australia has peculiar characteristics, distinguishing it in a striking degree from any other continent, is undoubtedly true—one of the most noteworthy being the great flatness of large areas of its surface, and the moderate elevation of even its highest ranges. The absence of large rivers and the frequent decrease in the volume of its interior waters as they flow onward until finally absorbed in the light and porous surface-soil, is a consequence of the above condition. It is only in the south-eastern division of the continent that the streams belonging to the basin of the Murray make any pretension to rival the N. and E. of other lands and it is in the cordillera of the eastern coast—the most continuous and the most elevated of the Australian mountain-chains, that their sources are to be found. Nowhere but in the south-eastern corner does snow lie for any lengthened period upon the summits of the Australian mountains, and the moderate elevations of the vastly greater portion of the interior taken in conjunction with the parallels between which it is comprised, render temperatures below the freezing-point of rare occurrences. Terrace-beds of

moderate height, exhibiting sufficient relief to diversify not only the surface, but also the climate, and to mitigate the otherwise intense heats of the southern tropics, are however as we have seen, met with in many and widely-distant portions of the northern interior both towards the eastern and the north-western coasts and the hazy ranges which are of frequent occurrence in those directions are uniformly accompanied by conditions of fertility.

Another result, and one of high interest to the physical geographer as well as to the settler, consists in the large additions made by recent travel to the prior list of native produce—vegetable and animal as well as mineral—proper to Australia. If the indigenous flora and fauna of that continent bear no comparison with those of other lands in respect of utility to man, they are at any rate much less restricted than has hitherto been supposed. Even of food-plants, Australia is far from being entirely destitute, though with few exceptions, they have remained unimproved and even unutilized by its hopelessly degraded native race. Stuart found native wheat and oats, with rye-grass in the distant interior (Coral Creek) and clover, croc-grass. The same plants were seen by Stuart in his journeys across the centre of the continent. Leichhardt, in a widely-distant locality noticed various edible fruits—the pandanus and rye-grass amongst them—growing on tracts well stocked with game, where the air was fragrant with wild cherries and manzanilla, and where honey sweet as that of *Hymenitis* abounded. Within the northern interior again, Gregory found three varieties of indigenous fig, all well-flavoured with a native grape besides several other fruits used as food by the natives—particularly that of the *Adansonia* or gouty stem tree. Wild yams were also found, and on the banks of the Victoria, a plant of the potato kind, affording an edible tuber. The variety of the native woods is also much greater than had been supposed.

The formation of a settlement upon the northern shores of Australia, now (1865) in progress at the hands of the South Australian colonists, and as the immediate consequence of Macdonnell Stuart's discoveries, cannot fail to exert an influence upon the future course of exploration in this great region of the southern hemisphere—full of promises to the future prospects of mankind. A vast portion of the Australian continent, however is even yet unvisited by civilized man. The rapid extension of population on the side of Queensland and the eastern colonies in general is likely at no distant period to fill up the gaps that occur between the various routes of the explorer, but large spaces of the western interior are probably destined to remain long a blank upon the map.

AUSTRALIA (Continued) [add.] Population.—At the end of 1863 the provinces contained 155,323 persons (colonists) 80,608 males and 55,715 females, being an increase of 4702 over the previous year. By the census of 1861 the number of aborigines was found to be 5046 in the occupied districts they are rapidly decreasing.

Agriculture.—From 1855 to 1863 inclusive 2,510,315 acres of arable lands were sold for £2,150,216 of which 147,358 acres were disposed of in 1861 for £169,015 and 159,910 acres in 1862 for £153,890. 7,103,877 acres were inclosed and the area under cultivation in 1862 was 494,511 acres the crops being wheat, barley, oats, maize, and hay. The value of exports of breadstuffs, grain &c., was £712,769 in 1861 and £638,341 in 1862 the quantities exported in the latter year being larger but the value less. At the close of 1862 the colony possessed 56,251 horses, 258,843 horned cattle, and 1,431,000 sheep; the wool exported in the year having been 13,229,000 lbs. of the value of £285,270. The stations or farming settlements now extend between 600 and 600 miles from Adelaide.

	Imports	Exports	Revenue	Expenditure	Public Debt
1861	£ 4,410	1,828,620	556,295	465,301	—
1862	1,200,000	1,225,000	528,709	679,295	500,000

Being the amount of loans for public works.

The following table shows the rapid increase in the export value of the three staple productions of the colony—

Persons	Wool	Wool	Wool	Wool	Total
	1855-57	1858-60	1861-63	1864-66	
In 1855-57	237,130	238,000	278,724	407,000	1,160,854
" 1858-60	755,240	806,629	1,048,200	1,048,200	3,658,269
" 1861-63	809,841	804,270	847,000	847,000	3,308,111
In 8 yrs. 1855-57	1,812,071	1,812,071	2,041,012	2,041,012	7,686,166
" 1858-60	2,824,700	2,824,700	3,308,200	3,308,200	12,265,800
Average of 8 years.	1855-57	404,304	525,720	560,250	1,490,274
" 1858-60	1858-60	404,304	525,720	560,250	1,490,274

Manufactures, &c.—In 1863 the towns of the colony contained 70 brick manufactories, and 43 manufactories of agricultural implements. In Adelaide there is an establishment for the artificial formation of ice of which about three tons are produced daily and supplied at a moderate rate to the public.

It is believed that gold exists in the mountains within sight of the capital and explorations have been set on foot for its discovery.

In 1862 the colony possessed 563 places of worship with accommodation for 78,616 persons and 859 Sunday-schools with 8840 teachers and 20,703 scholars and there were 37 miles of railway open and 1096 miles of telegraph line.

AUSTRALIA (Warren) [add.]—The progress of this colony has not been so great or so rapid as that of the others in the continent, owing no doubt to the comparative scarcity of rich land, and to its having been to a great extent dependent on the labour of convicts. Under the strong remonstrances of the colonists the home government has decided on using it no longer as a convict settlement and so that it may become hereafter more attractive to capital and energy.

The following table will exhibit the general position of the colony—

Year	Population	Revenue	Expenditure	Imports	Exports
	Male	Female	Total		
1860	—	—	—	80,000	101,765
1861	8,250	5,000	13,250	100,000	100,000
1862	—	—	17,000	67,827	175,000

AUSTRIA [add.] In 1859 a rupture took place between Austria and Sardinia, and war ensued. The cause of Sardinia being espoused by the emperor of the French Austria was compelled, after a brief but fierce campaign and suffering a series of defeats, to submit to the surrender of the principal part of Lombardy of which she retained only a very small part of the S.E. extremity. This surrender involving the cession of nearly 8000 sq. m. of territory and 2½ millions of inhabitants, was ratified by the treaty of Villafranca July 11 1859 and of Zurich, Nov. 10 of the same year and received its final confirmation in the formal recognition of the kingdom of Italy by the Austrian government in 1860. Upon the conclusion of the Austro-Italian war Austria applied herself to the work of internal reform. Her finances were re-organized, and the imperial constitution was amended. By a diploma dated October 20 1860 and a patent of February 26 1861 the present constitution based upon the representative system, was established. Each of the provinces has a Diet composed of the archbishops, bishops, and chancellors of the universities, an official and certain elective members the office of the Diet is to regulate the county and local administration. Every man above the age of 24 years, and paying the a year direct taxes, has a vote in the election of members who must be citizens at least 30 years old and of irreproachable character. Hungary Croatia, and Transylvania have separate constitutions, allowing greater liberty of self-government. The Reichsrath, or Council of the Empire, consists of an upper and lower house; the former composed of the princes of the imperial family, archbishops, and bishops, and the latter nominated by the emperor. The lower house contains 545 members, elected by the provincial Diets from their own number, in the following proportion:—Hungary 80; Bohemia 54; Lombardy-Venice 30; Dalmatia 5; Croatia and Slavonia 5; Galizia 28; Upper Austria 10; Lower Austria 18; Salzburg 5; Styria 13; Carinthia 5; Carniola 5; Bukovina 5; Moravia 23; Silesia 5; Tyrol and

Vorarlberg 12; Transylvania 26 and Istria and Trieste 6. The duties of the Reichsrath are consultative, co-operative, and administrative. In the military financial and legislative business of the empire. The members of either house may propose new laws on matters within their competence; and the consent of both houses is required to give validity to any enactment. Another council, the Reger Reichsrath or Partial

Council of the Empire, is formed by the combined houses, excluding the representatives of Hungary and Croatia. Laws passed by this council have no force in the latter provinces, in order to allow them a greater share of self-government than the remaining provinces of the empire.

The latest census of Austria is that of 1857 of which the following are the chief facts.—

POPULATION AND RELIGIOUS PROFESSIONS OF AUSTRIAN EMPIRE IN 1857

PROVINCE.	Population, Jan. 1, 1857.	Roman Catholics.	Greek.	Armenian.	2 so-called Greek and Armenian.	Protestants.	Unitarian.	Jews.	Other.

Army.	879,880	438,913	30,300	—	41,159	51,778	1,067	8,330	447
Total.	33,018,388	32,046,956	3,350,323	9,780	3,151,670	3,182,616	50,870	1,540,871	8,865

The provinces thus marked out of Gallizia only the duchies of Austria and Ester pop 100,000 apart from the Germanic Empire. The Lombard provinces ceded to Italy in 1860 are deducted.

More than two-thirds of the population of the empire are occupied in husbandry; but in Silesia, Lower Austria and Moravia about one half are employed in manufactures. In 1857 the following cities and towns had the population annexed to them —

Vienna.	476,323	Maria Theresienstadt.	32,499
Prague.	142,298	Frankfurt.	45,078
Pesth.	181,705	Koenigsbrunn.	41,900
Vienna.	139,173	Debrecin.	39,454
Vienna.	85,574	Vienna.	33,806
Leoben.	70,286	Mantua.	32,984
Graz.	59,371	Linz.	31,078
Regensburg.	57,700	Augs.	30,650
Vorms.	50,180	Krainsdorf.	26,328
Brunn.	50,305	Chilgitz.	26,067
Buda.	45,840	Carniole.	26,845
Buda.	38,194	Dénes.	26,301

At the end of 1864 Vienna had about 660,000 inhabitants. Army and Navy.—The army on the peace footing stood at the end of October 1863, 269,103 men with 43,201 horses; on the war footing the number is 570,027

men. The navy in August, 1864, consisted of 89 steamers with 639 guns, and 11,730 horse-power and 30 sailing vessels with 146 guns.

Trade and Commerce.—In mining and smelting operations there were engaged, in 1860 107,534 work-people amounting of 98,656 men 4009 women and 5759 children. The value of the principal products obtained in 1860 and 1861 was as follows:—

1860	1861	
Gold,	\$216,470	\$214,393
Silver,	800,820	804,354
Copper,	\$73,000	879,287
Lead,	158,460	
Litharge,	81,173	303,445
Zinc,	33,744	
Coal,	\$600,000	\$735,000
Brown Coal,	\$280,000	\$324,200
Iron,	1,089,000	1,043,738

The quantity of ordinary coal mined in 1860 was about 1,700,000 tons and of iron 278,000 tons.

SHIPPING AND FREIGHT RECEIPTS IN AUTANGURRAY IN 1901.

Shipping.		Entered.		Cleared.	
		Tonnage.	Tons.	Tonnage.	Tons.
American.	(Sailing.)	6,654	1,075,615	41,999	1,361,000
	(Sailing.)	1,182	4,491	289,000	289,000
	(Steam.)	4,486	389,052	4,990	357,770
Foreign.	(Sailing.)	27	64,700	27	64,470
	(Sailing.)	68,119	1,794,661	68,500	1,750,000
	(Steam.)	4,165	2,013,141	6,105	1,004,761
Total.		79,807	5,436,609	79,650	3,746,939

In June, 1902, the commercial marine of Austria consisted of 9 "G's" vessels, of 249,157 tons, and manned by 24,664 sailors. Only 606 of these were for the foreign trade, the rest being small coasters.

There were 2450 miles of railway in Austria in June, 1902, constructed at a cost of \$74,862 '02, on rather more than half of which the government guarantee an interest of 5 per cent. per annum.

FINANCES.—The following table will show the national revenue and expenditure in the four years 1890-3—

Year.	Revenue.	Expenditure.	Deficiency.
1890	28,550,996	37,732,596	4,081,600
1891	32,552,232	34,606,928	2,454,696
1892	36,587,110	36,436,360	2,478,138
1893	36,351,297	36,445,715	3,224,205

Since 1789 the revenue has annually been less than the expenditure. At the end of 1890 the national debt amounted to 2726 000 000. In addition to this is the debt of 28,000 000 of the Lombardo-Venetian kingdom, which, with subsequent loans and other liabilities raises the total debt to upwards of 4290 000 000.

AUTANGURRAY is in India, south Madras, lat. Madras, at the mouth of the Vagay or Pak's river, 11 m. N. E. of Madras. It has a spacious and well-built citadel, or fortification, surrounded by a strong wall and is inhabited chiefly by fishermen, who keep the market of Madras well supplied with white fish and excellent oysters. The tobacco grown at Ullagannam, about 2 m. N. W., is reckoned superior to any grown elsewhere in the province of Madras.

AUTANGURRAY is a small island or rock, 8 miles, about 10 m. S. by W. of the main anchorage in Madras harbor, about lat. 12° 20' S. lon. 177° 0' W. It is a wall of rock from 400 to 600 ft. high, shaped like a horse-shoe, and having on its S. W. end a narrow passage from the open sea into its sheltered interior. It is accessible only in very calm weather when the adventurous natives of the small adjacent island of Woe shoot their canoes through the passage, and afterwards climb to the top of the precipice.

AUTANGURRAY is a small island, 10 m. S. W. of Madras. Its inhabitants are chiefly employed in the culture of sugar and in carrying on a trade in the salt made on the coast. A good deal of coconuts is produced. Pop. 8000.

AVATONIA, a bay, Asiatic Russia, on the S. E. coast of Kamtschatka. It consists of an enormous outer bay which is formed by Cape Fomofort or Gavara and Chupomski, and of an inner bay which lies at the bottom of the former and is entered by a channel 4 m. long and 1 m. wide. This inner bay is the principal port of the peninsula, and is so spacious and excellent that it would afford secure shelter for all the fleets in the world. On its S. side is the small deep, and well-sheltered harbor of Petropavlovsk, so called from the tower of some name standing at its head. In the S. W. is the harbor of Turaishi, and S. of Petropavlovsk that of Rakovaya. On the S. and W. sides of the entrance there are light-houses and a third a light S. of the entrance to Rakovaya, of the respective heights of 449 264, and 278 ft. above the level of the sea.

AVIA, a m. town, 75 m. S. W. of Tula. It stands on the site of an ancient town of same name, of which only some slight traces remain, and has a mound on which once stood a Cossack castle.

AVILA, a m. town, 180 m. S. E. of Oporto, on a sandy plain watered by the R. Ave, 180 m. S. E. of Oporto. Like other places in the same country it has lost everything which entitled it to the name of a city and is now only a mean village, with 170 families of Indians for its inhabitants.

AVON or **ORAWANA**, a river, New Zealand, Maitai or Middle Island which takes its rise in a swamp in Canterbury Plains, and flowing N. N. E. has its mouth at the S. entrance of the mouth of the R. of the R. on the N. W. shore of Banks Peninsula. From not being connected with the mountain ranges, it is less liable to sudden changes from swollen torrents, and flows on in a current which never exceeds 5 to 6 knots. In moderate weather its bar can be safely crossed by vessels drawing from 8 to 10 ft. The entrance is somewhat narrow and sailing vessels occasionally find access difficult.

AVZAPKEI a m. town, Turkey in Asia, Koonistan 67 m. S. S. W. of Erzurum, on the western edge of a plateau much broken by hills and traversed from E. to W. by the Taurus. Pop. 2000.

AWARUA the native name of the bluff promontory, Otago New Zealand on which Campbell Town now stands, is lat. 46° 30' S. It stretches bodily out to sea from the New river and ends in a steep eminence facing the S. The rocks which compose it are partly plutonic partly aqueous, ranging from granite and gneiss to indurated and soft shales. The harbour beneath is one of the best in New Zealand, the promontory protecting it to the W. while to the eastward a low tongue of shingle assists to nearly landlock the anchorage.

AWTON is a m. town, Turkey in Asia, Koonistan 67 m. S. S. W. of Erzurum, on the western edge of a plateau much broken by hills and traversed from E. to W. by the Taurus. Pop. 2000.

AXAMIS, a m. town, Turkey in Asia, Koonistan 67 m. S. S. W. of Erzurum, on the western edge of a plateau much broken by hills and traversed from E. to W. by the Taurus. Pop. 2000.

AYAGUS, a m. town, Russia, Khabarovsk, 680 m. S. W. of Tomsk, on a river of same name, which sends its water to Lake Tangut or Balkut. It is the remotest Cossack settlement in this region and consists chiefly of the Government buildings on the S. side of the town, and the small wooden dwellings of the Cossacks who are stationed here to the number of 900, most of them with families. Much of the country near Ayagus is a sterile character.

AYLMER is a m. town, British America, Canada, E. coast, 8 m. above Ottawa, on the Chaudiere lake. It was founded in 1830 and has since become a thriving place, with large lumber establishments. Pop. about 1500.

AYNTERAD a small town, E. Africa, about 40 m. N. E. of Berberth. Though consisting only of about 50 huts, it is upon a bank of sand and crumbling limestone, it is a frontier station, principally on account of its water which is of excellent quality. It is supported chiefly by the slave-trade, the Arabs preferring to ship their purchases at some distance from the great emporium. The harbour is defended with a fort.

AYORU or **AYRU** a m. town, British America, Canada, W. coast, 80 m. N. of Vancouver, on the Fraser river, 10 m. N. of Vancouver. It is a fertile district and exhibits a good deal of cultivation, its fields extending for two miles along the river. In its vicinity the navigation is rendered difficult by numerous creeks, and small but rocky wooded islands, on which tamarind and fig trees are conspicuous.

AYR, a m. town, British America, Canada, W. coast, 80 m. N. of Vancouver, on the Fraser river, 10 m. N. of Vancouver. It is a fertile district and exhibits a good deal of cultivation, its fields extending for two miles along the river. In its vicinity the navigation is rendered difficult by numerous creeks, and small but rocky wooded islands, on which tamarind and fig trees are conspicuous.

AYUTHIA, a m. town, British America, Canada, W. coast, 80 m. N. of Vancouver, on the Fraser river, 10 m. N. of Vancouver. It is a fertile district and exhibits a good deal of cultivation, its fields extending for two miles along the river. In its vicinity the navigation is rendered difficult by numerous creeks, and small but rocky wooded islands, on which tamarind and fig trees are conspicuous.

by staircases; upon the galleries rises a dome to the height of 156 ft terminating in a gilded spire. The new city surrounds the site of the ancient one, and is now the second place of the kingdom. It is situated on a creek or canal, connecting the main river with its great branch, and is inhabited by a mixed population of Siamese and Chinese with a few Burmese and natives of Laos who are principally employed in shop-keeping, agriculture, and fishing and live generally in floating houses on the river and canal. The city is ruled by a governor and deputy-governor and is annually visited by the king, who has a palace near the river side. Most of the principal merchants of Bangkok likewise have houses in the town, as shops or summer residences. The soil is extremely

barren, and the king of Chinese origin, for nearly a century settled upon Bangkok (the Burmese governor of which he surprised and slew) as the future capital, it having been fortified in an earlier age. Pop. 20,000 to 30,000—(See *J. Scurry and Mouchet*).

AZANGARO a tn. and prov. Peru, dep. Puno. The prov. divided into 16 districts, contains 18 villages. The tn. stands 86 m N of N W point of Titicaca lake, and has a pop. of 54,333.

AZAWAD a d at N W Africa, comprising an extensive tract to the N of Timbuctoo, and stretching N W to El Juf the great receptacle or belly of the desert. Though apparently a most sterile tract of country it is a kind of paradise to the wandering Moorish Arab, who counts it his home. In its more favoured localities he finds plenty of food for his camels and even a few cattle while the salt with which it abounds, carried to Aravan and Timbuctoo is easily sold or exchanged for corn or any other required commodity.

AZEMABAD a tn India, N W Provinces, Sitked on a low plain which is now dated during the rainy season 9 m N W Kurnal. It is surrounded by a high brick wall, which is loopholed for musketry and flanked by bastions surmounted with towers and possesses a large caravanserai encircled with a deep ditch and lofty embattled wall.

AZIMGHUR a dist. and to India, prov. Bengal.—The district is bounded N by Gorakhpore N E by Saran S E by Ghazipur, S W by Bhojpur and N W by Oudh, area, 2520 sq. m. It is a low and remarkably level tract sloping almost imperceptibly from N W to S E, and is drained chiefly by the Gogra which forms its N E boundary for 74 m and the Tons which, entering the dist. from Oudh and traversing it for 100 m, divides it into two nearly equal parts. The soil is generally fertile, and produces abundant crops, among which are sugar, opium, and indigo of fine quality. A few tracts however are rendered fruitlessly barren by the large quantity of saline matters with which the soil is impregnated. The manufactures, chiefly of cotton and silk notwithstanding the formidable competition of the United Kingdom are still important. Pop. 1,813,300.—The towns map of the above dist. 109 m N E Allahabad stands on the Tons, which is here navigable and is crossed by a bridge of boats. Though a place of some importance, it attracted little notice till it became and continued for some time to be the headquarters of a large body of insurgents during the history of 1857.

RUINS AT AYUTTHIA.—Mouchet's Travels in Siam.

fertile, producing rice, oil, and sugar, and abundance of indigenous fruits. Ayutthia was founded in 1350 on the site of a small older town by the king Phra Ram-til lool and became populous by the accession of immigrants from surrounding countries, and continued long to be the residence of the kings. In 1568 it was captured, after a brief siege by the king of Pegu but soon became again independent. In 1769 the Burmese besieged the city with an immense force and at the end of two years when the waters were shallow by reason of a drought, crossed the river battered the walls, broke down the gates, and entered without resistance the city and public buildings were fired, and the king killed. The country for some months was given up to plunder and then the

B

BAAN name of two tn. Austrian empire Hungary.—1 Co. Baranya, about 85 m S E. Bimkirchen, with an old Gothic castle and 2080 inhabitants.—2 Co. Lower Austria, on a height above a stream of same name about 70 m N E. Presburg, with a fine castle, and a trade in wool, corn and iron. Pop. 7256.

BAASEN a tn. Austrian empire, Transylvania, circle and about 26 m N E. Hermannstadt, with a sulphur spring and a much-frequented bathing establishment. Pop. 1270.

BABAHAN a tn. Persia, Khuzestan, near the sources of the Jural 46 m E. Buzorah. It is a modern place with about 10,000 inhabitants.

BABAHYO or **BOMBAY**, a tn. S. America, Ecuador prov. and about 40 m N W Guayaquil, N bank of a river of same name, at its confluence with the Caracol and Bece. The site is low so that the inundations of the river in the rainy season lay a large part of the place under water. As a security the houses, which are all built of wood, are raised on

poles, or made so high as to afford a place of retreat to the runaway, who, while thus cooped up, amuse themselves, or help to eke out a subsistence, by fishing. The only buildings which stand so high as to be beyond the reach of the floods are the parish church and the custom house, or salt-office. Singularly enough Babahoyo, while thus endangered by water has suffered much more severely from fire, which has repeatedly reduced the greater part of it to ashes. Among the articles of export are some coffee, rice, timber, and sugar, which last in excellent rivers of Andalusia in Spain.

BABALIYA, a tn. W Africa, E of Lake Chad, on the road from Gawi to Mawo, from the former of which it is distant a long day's journey. It was once the capital of an independent territory but having been captured and nearly destroyed, has never recovered. At present it is nearly deserted.

BABOCHA, a tn. Austrian empire, Hungary, on Bismoky r. back Banya, 43 m W Bimkirchen with the

value of a castle which figured much in the Turkish wars, and a trade in corn and wine. Pop. 1460.

BAPOLNA PUEBLA, a town, Austrian empire, Hungary co. and 30 m. W S W Oran, with a military stud, a fine castle with an English garden, breweries, distilleries, vinegar works, and a trade in honey and wool. Pop. 2016.

BABIAWAR, a dist. W India, peninsula Kattywar prov. Gujarat, bounded by the dists. of Kattywar, Golconda and South and the Arabian Sea. It contains 51 small towns and villages, the chief of which is Jafferabad. The pop. is estimated at about 18,000.

BACKMUTH a. in Russia, gov. and 130 m. E. by N Ekaterinodar on the Backmuth. It has five churches, large tallow smelting and other factories, an important yearly market, and a large trade in cattle, salt beef and wheat. There are extensive coalmines and alabaster quarries in the vicinity. Pop. 7156.

BADAMUNI or **GADAMUNI** a. in W Africa, on the N W frontier of Senegal, in an unhealthy and sparsely diversified country. The whole place forms a kind of shallow vale, surrounded on the W N and S. by hills from 100 to 200 ft. high, but terminating toward the E. in a flat sandstone, which rises 600 ft. above the level of the surrounding country. In the centre is a large and luxuriant plantation on which cotton, pepper, millet, &c. are cultivated. The population, belonging to the Fula race, reside chiefly in two villages—the larger on the N W and the smaller on the S W side. Many of them are employed in weaving. In the vicinity are productive salt lakes.

BADANJO a. in W Africa, Adamawa, 60 m. N E Yola, picturesquely situated in a beautiful valley so inclosed by hills that the interior of the village is seen from them. The environs are extremely fertile and well cultivated, yielding millet, sweet potatoes, yams, manioc, guinea, and calabash. The inhabitants belong chiefly to the Fula or Fari tribe, which has here its northernmost seat. The rugged nature of the country gives importance to Badanjo as a strategic point of view. Pop. 3000.

BADARAWA a. in W Africa, Hausa States, Zaria Lake north of the town of the country. It is surrounded on all sides by a dense belt of timber and is also inclosed by a wall. It has narrow streets, and when Dr Barth visited it a market was held, attended by about 10,000 persons. It was well supplied with fresh butter, onions, which are extensively cultivated throughout the district and beef and millet and cotton, particularly the latter seemed to be the staple commodities.

BADARIKA a. in Central India, in Oude, 4 m. E. L. bank of Ganges and 42 m. S W Lucknow. Pop. about 6000 of whom only 50 are Musulmans.

BADDA BADD a. in W Africa, Hausa States, prov. Kabbé, in the vicinity of Mount Robur. It is walled, and stands in a fertile district, almost entirely devoted to the culture of rice, for which it is well adapted. On a higher level negro corn is largely grown, and the pastures are full of cattle.

BADEN (GRAND DUCHE) [add]. From a recently compiled statistical account, it appears that the duchy has an area of about 5,290,000 acres, distributed as follows:—

	Area.		Area.
Water.	285,000	Mountains.	805,000
Arable land.	1,570,000	Forests.	273,000
Vineyards.	64,000	Fields.	1,200,000
Gardens.	84,000	Barren land.	261,000

Manufactures.—The cotton trade has risen rapidly in importance and extent; and notwithstanding the damage caused by the civil war in America, new mills with new machinery have been erected. The number of people employed, which in 1849 was 17,100, had risen in 1861 to 64,600 working in 406 spinning and weaving establishments and in other factories. The manufacturers of iron, however, from trying under local disadvantages and consequent absence of the ore and coal, has not progressed, though the iron produced is of very superior quality. In 1861 106 iron mines were in work, giving employment to 479 men; and there were 47 iron-foundries, &c. with 753 workmen. In total, only three in number 180 persons were employed. One blast-furnace employed 200 hands, and two of size had 128 hands, still-works also employed 188 workmen.

Population.—By the census of 31st December 1861 the population, compared with that of 1858, was found to be as follows:—

Cities.	1858.	1861.
Lake Circle.	126,500	126,100
Upper Rhine.	200,000	202,910
Middle do.	447,287	459,708
Lower do.	245,711	246,400
Total.	1,020,500	1,035,118

The pop. of 1861 consisted of 898,638 Roman Catholics, 445,539 Protestants; 3970 Musulmans, &c.; and 24,089 Jews. Of the principal towns, Carlsruhe had 27,108 inhabitants; Mannheim, 37,172; Freiburg, 18,888; Heidelberg, 16,289; Pforzheim, 18,854; and Bruchsal, 5,270. In the 10 years 1852-62 65,000 persons emigrated, of whom 24,505 were agriculturists, 15,649 artisans, and 15,776 other classes and professions, including government aid they took with them about £1,500,000. Of the 278,180 families in the duchy 42 per cent. are employed in agriculture and the forests, 37 in manufactures and mining, 7 in day labour and 14 in other occupations.

BADKEET a. in Austrian empire, Hungary co. Pesth-Bolt, about 26 m. S S E. Komorn. The inhabitants are mostly Protestants and rear great numbers of horses and sheep of excellent breeds. Pop. 2458.

BADRINATH a. in India, N W Province, dist. Garwal & Bhatnagar, in a valley of the Himalayas, 4 m. long and 3 broad lat. 30° 44' N. lon. 79° 53' E. The town stands on a sloping bank, and in the highest part of it is the Brahmam temple of Badrinath, about 45 ft. high and of conical form. It is of great antiquity as a religious establishment, but the present temple appears modern. The rajah of Garwal made over to it as security for loans at various times, 226 villages, which are still tributary. The temple is visited by large numbers of pilgrims in the summer, but is closed during the inclemency of winter. It stands 10,294 ft. above the sea.

BADRINATH PRAKAR Himalayas mts. about 12 m. W of Badrinath. This remarkable group of peaks have the elevation respectively of 23,441, 23,236, 23,264, 22,754, 22,556 and 21,895 ft.; and 6 m. S W is another summit 21,385 ft. above the level of the sea.

BADRHAPOOR in Central India, esp. pergunnah same name, 30 m. N E Allahabad, lat. 25° 40' N lon. 81° 10' E. It has a large bazar and is well supplied with water.

BADULLA [add] a. in Ceylon, esp. principality of Galle on an affluent of the Mahaveli Ganga, 40 m. S E. Kandy. It stands in a beautiful valley on one side of which rises Mamoon-kool, whose summit has a height of nearly 7000 ft. The valley has been so often desolated by war that nothing remains of the ancient city except its gloomy temples and vestiges of a ruined dagoba. The ancient residence of the prince of Ova has been converted into a fort strengthened by earthworks, and the modern town gives evidence of growing prosperity in the activity of its bazaar and the apparent comfort of its dwellings, generally surrounded by gardens of coco-nuts, coffee, and tobacco. In the town's dist. vicinity there is a hot spring, vented alkali by Boddhwa, Hindoo, and Mahomedans. —(Ceylon, by Sir J. E. Tennant.)

BAFK, a. in Persia, prov. and 62 m. E S E. Yazd on the eastern side of a great plain and in every sense an oasis in a salt and sandy desert. It is surrounded by extensive date-groves, is supplied by twenty four canals with water slightly salt, but palatable and has a climate which is mild in winter and warm but salubrious in summer. It consists of about 700 houses.

BAGAMOYO a. in E. coast of Africa, opposite to and nearly due W of the island and town of Zanzibar at the mouth of the Kruguan. It is garrisoned by a small body of Baluchas, and is one of the great points of departure for the caravans trading to Uryumuz. Notwithstanding its garrison it suffers much from the depredations of the Wasomah tribe. The sugar-tree occurs occasionally in the district.

BAGDAD [add] pers. Turkey in Asia. The country is described as a howling wilderness and yet its towering

soil tropical climate, and illimitable supply of water would render its resources almost unbounded. It is calculated that with a small outlay the old canals which re-colonize the country between the Tigre and Euphrates and which, in some cases 200 ft. wide require only their channels cleared and mounds reopened would afford a perfect system of irrigation, and render the whole provinces enormously productive in cotton (for which it is peculiarly suitable) silk, sugar, indigo, opium, and coffee, and provide a vast increase in the annual revenue. The Arabs are prepared to rapidly exchange their nomadic life for agriculture and fixed abode, and British merchants have trusted, in conjunction with native speculators with the pasha for the cultivation of tracts of land at a fixed rental but without success or encouragement.

BAGELE, a mountain district, W. Africa, Adamawa. It extends several miles from S.E. to N.W. and has a very rugged surface strewn with great irregular blocks chiefly of granite, from between which trees shoot up. There are, however, a good many spots of arable land the produce of which together with that of the pasture suffices to support a considerable body of mountaineers, who, after long defying the whole power of Adamawa were in 1838 reduced to slavery. They belong to the Batta tribe.

BAGELE, a town in India, N.W. Frontier dist. Kumaon at the confluence of the Buryoo and Gramah 210 m. N.E. Delhi. It is a small place, inhabited according to local tradition by descendants of the Moguls left in Kumaon by Tamerlane's orders. Its bazaar contains 42 shops, and has two large annual fairs, at which a great amount of business is done with dealers from Tibet.

BAGHENA a dist. NW. Africa, which belonged to the now extinct kingdom of Ghana and comprised part of the territory in which its capital was situated. At present it is difficult exactly to define its character. From position and physical features it naturally forms part of the oasis of El-Hedi but its population consisting of Sawak Arab and Fellata, is so heterogeneous that it cannot be said to have any political existence. The Sawak Fabe, or Wako, are the original inhabitants and while the kingdom of Ghana subsisted form of the great bulk of its population. When the Songhay empire was broken up, mainly by the united efforts of the Arabs and the Bambara, one of the chiefs of the former who had greatly distinguished himself, was rewarded with the lordship of Baghena, which was thus to some extent settled by his countrymen. The Fellata who had previously been in possession, and indeed claimed to be the lawful masters of the country endeavored to oust them but not having succeeded the whole district was and continues to be held by a kind of joint though by no means friendly occupancy. Baghena thus remains in a very unsettled position but were this obstacle to its improvement removed there cannot be a doubt that, as it is adapted alike for fixed settlements and nomadic wandering it might soon attain a high degree of prosperity.

BAGHIN or **BAGHIN** river Central India territory Bundelkhand, rising in the Panna range and flowing generally N.E. about 90 m. into the Jumna lat. 25° 55' N. lon. 81° 0' E. About 30 m. from its source it falls over a ridge in a cascade of 800 ft.

BAGIRMI a territory Central Africa, bounded N.W. by the Shari and Lake Chad, N.E. and E. Waday S. independent pagan tribes, and W. Adamawa, the Musaga country and Bornou. Bagirmi proper is almost a continuous flat, with a general elevation of about 900 ft. inclining very gently toward the S. and then rising so as to form a watershed between Lakes Chad and Fitri. In the outlying provinces beyond the limits of Bagirmi and particularly towards the S.E. the surface becomes rugged and even mountains of all or more is not uncommon. Much farther south there are said to be mountains of still greater height in which the Bemba, the Shari, and its tributary Logon have their sources. The two last mentioned traverse the country in a N.W. direction and are its only important rivers. The soil consists partly of lime and partly of sand; and according as the one or the other of these two predominates, it produces in abundance negro millet or sorghum—the most common article of food not only in Bagirmi, but over the most of

Negroland. In addition to these principal crops, rice, mung and beans are grown to a considerable extent. Rice though not cultivated, grows spontaneously and after the rains is collected in great quantities from the swamps and temporary pools. Water-melons are abundant, and in the vicinity of Mamea, the capital great quantities of onions are raised. The only crops for industrial purposes are cotton and indigo both of them under the superintendence, not of the natives but of immigrants from Bornou. The most useful trees are the tamarind, the date-palm the form-palm and the monkey bread tree the leaves of which are used for vegetables. The inhabitants are a fine race of people, distinct from the Kanuri and intimately related to the Kuka. Their conversion to Islamism is recent and presumed to be more nominal than real. The government is an absolute monarchy but the king is said not to rule oppressively. The tribute paid him consists partly in cattle, but principally in slaves of whom great numbers are annually delivered to him by the chiefs of tributary provinces. The inhabitants are constantly engaged in predatory incursions upon their neighbors and harassed by the retaliative aggressions of the powerful states of Adamawa, Bornou, and Waday. Pop. estimated at 1,500,000.

BAGMA a town Western Africa, Adamawa, in a mountainous district. It occupies both banks of a stream meandering through the plain and consists chiefly of huts of unusual dimensions some of them being from 40 to 60 ft. long 16 ft. broad, and from 10 to 12 feet high narrowing to a ridge at the top, and thatched all over without distinction of roof and wall. One reason for making the huts so spacious is to employ part of them in unseasonable weather, sheltering cattle, which form the chief wealth of the inhabitants who are all Mahometans.

BAGMUTTEE or **YAGWAT** a river India which rises in Nepal on the N. declivity of Shilpuri in the Himalayas, about 18 m. N.E. Kathmandu, flows N.W. past this capital and then nearly due S. crossing the Nepalese frontier and entering the British lat. Karun. After traversing this district, it turns S.E. and maintains this direction to its confluence with the Gangas, opposite to Mongher. Its total length is about 285 m.

BAHAWULPOOR, or **BEHAWULPOOR** [said.] a town India cap. state of same name on a branch of the Ghaz, about 2 m. from the main stream and 50 m. above the point where by its junction with the Chenab it forms the P. Punjab. It is surrounded by a ruinous mud wall which is about 4 m. in circuit, and incloses an area which not being wholly required for habitation is partly planted. The houses—some of burned and some of sun-dried bricks—are very indifferent. The Khan's palace is of the same character and in a very plain style of architecture. The place has long been famous for its loomgins, saris and turbans. It also manufactures chirties and other cottons. Its position at the junction of three routes from the S.W. S.E. and E. gives it great advantages for trade, which is carried on to a great extent, as the merchants are very enterprising and send their wares into Central Asia, and even it is said as far as Astrakhan. The neighboring country is very fertile, and the Gangas, the Ghaz, and the Chenab, afford excellent agricultural produce. Fruit particularly mangoes oranges and apples is abundant, and of excellent quality. Pop. about 20,000.

BAHR-EL-GHARAL (see GHARAL) (BAHR-EL)

BAHUERACIO a town Mexico prov. Sonora, in a mountainous district celebrated for its mines of copper and silver. The inhabitants are mostly miners, who appear to be in great poverty. Those who work in the mines are almost exclusively Mexicans, but most of the outdoor work such as cutting wood making roads bringing charcoal to the furnaces, &c. is done by Indians. Pop. 500 to 700.

BAHULY a town and fort, India, presid. Madras 480 m. S.E. Bombay lat. 12° 34' N. lon. 75° 6' E. The town is small and irregular and stands N. of the fort which is built on a lofty cliff projecting into the sea.

BAILA NDO a territory western part of S. Africa. Kimbunda country between lat. 9° and 12° S. and lon. 16 and 17° E. bounded N. by the Cunene separating it from the Portuguese settlements, N.W. by the W. Kibila, S.W. by the Kibila S. Hambo and Bembos, and E. by the Ambrico and Malencha. Area about 80,000 sq. m. In the south it is tra-

valley by two mountain chains which are about 100 m. distant from each other and nearly parallel stretching in a N.W. direction, the Liang-Liang on the W. and the Djamba on the E. Above the ridges of these two ranges are two plateaux of which that on the W. has an elevation of 4000, and that of the E. of 6000 ft. The former has a temperate and healthy climate; the latter is cold, the thermometer often sinking in the winter nights nearly to the freezing-point, and the ground becoming covered with dense hoar-frost. The western portion is mountainous and stony and extensively covered with forest; the eastern portion consists of finely undulating plains, on which forests of tall trees and grassy prairie alternate. The principal rivers are the Kyo, the Loupa, and the Kaita or Mungwa. The upper course only of the first two is within the territory, but the last waters the whole of its E. frontier flowing almost due north to its confluence with the Chama. Besides being thus fertilized by streams it is copiously supplied with water by the periodical rains, and yields excellent crops of maize, manioc, tobacco, &c. The trade is chiefly in wax and slaves. Baitoool is the leading state in the Kimbunda country. Its inhabitants surpass all the other races in S. Africa in personal appearance and in prowess, and have made their name. Munros described her and her wife, who were very warlike, as devoted against the Portuguese archer-master but the Hambe and Koba lands situated to the N.W. now furnish more tempting objects of plunder in the number and excellence of their horned cattle. In the W. cannibalism is said to be common in the E. it is professed on the celebration of great rites. At the head of the government is a chief who nominally rules with absolute power but there is also a kind of supreme council, called *mpemba* which may not only impeach his conduct but compel him to abdicate in favour of the next lawful heir. Pop. about 450,000.

BAITOOOL, or *Baitooal*, a tn. India, N.W. Province, Bangor and Korbunda territory, cap. dist. of same name, in a pleasant valley watered by the Macha, at the S. foot of the Baitooon range 112 m. N.W. Nagpore. It is defended by a fort and has in its neighbourhood some seams of coal of different quality. Pop. of the dist. or pergunnah 93,441.

BAJA [old], a tn. Austrian empire, Banat circle and 27 m. N.W. Zombor on the Danube and the frontiers of Hungary, cap. dist. of same name has several churches handsome buildings for the circle barracks, an asylum for children, various manufactures, wine, wheat, clover, and oil mills and much-frequented yearly markets. Pop. 18,641.

BAJVA, a tn. Austrian empire, Hungary co. and 10 m. S.W. Gran with a beautiful castle and several brandy distilleries. Pop. 2100.

BAKAA a mountain range S. Africa stretching from S.E.W. to N.W. between lat. 22° and 28° S. and lon. 26° and 27° E. The principal part of the range, called the Hamangwa hills, runs about 700 or 800 ft. above the plain, and is composed of great masses of black basalt. At the E. end the hills have curious cap-shaped hollows, of a size and shape which give them the appearance of a giant suggesting the idea of craters. Within these are masses of rock in the columnar form. The tops of the columns are quite distinct and hexagonal like the bottom of the cells of a honey-comb, but they are not parted from each other as in Fingal's Cave. In many parts the lava-stream may be recognized, for then the rock is rent and split in every direction. The mass of basalt, which is about 6 m. long, has tilted up the rocks both E. and W., and shown that they consist of ancient strata. Several large masses loosened by the action of the elements have slipped down, and becoming jammed against each other have formed large craters, in which the Bakas, the tribe which gives its name to the range, used to find an asylum from their enemies. This resource, however, is no longer wanted, as they have abandoned their mountain home, and taken up their abode among the Bakwena at Kolobeng. The only tribes now inhabiting the range belong to the Hamangwa and Makalaka. In the vicinity there is a hot spring called *Baroana*.

BAKADA, a vil. W. India, Nagpore, in a fertile dist. 20 m. W. Munma. It consists of four distinct hamlets, the inhabitants of which are almost all employed in agriculture, raising heavy crops of millet, and especially of asparagus, in which they carry on a considerable trade. The

market, which is held every Sunday is thriving, but is occasionally visited by marauders and marauders, including between Kama and Marana.

BAKALAHAR a tribe, S. Africa, inhabiting the Kalahari desert, N. of Cape Colony. According to tradition they are the oldest of the Bushmana tribes, and possessed numerous herds of large horned cattle, till they were expelled of them and driven into the desert, by a fresh migration of their own nation. Though they have ever since lived on the same plains, and under the same influence of climate as the Bushmana, they bear no resemblance to them and possess as strongly as ever the Bushmana love for agriculture and domestic animals. They have their gardens usually "open" livingstone, though often all they can hope for is a supply of melons and pumpkins. And they carefully rear their small herds of goats, though I have seen them lift water for them out of small wells with a bit of scotch egg-shell or by spoonfuls. They are a timid race, with thin legs and arms and large protruding abdomens. Their chief employment is in hunting and selling the skins of the animals they kill chiefly small carnivorous of the *felis* species, in exchange for spears, knives, tobacco and dogs. The skins made up by the Bakwena into a mantle, called *baros* form no small article of commerce. During the last century the Bakwena country between 20,000 and 30,000 skins were made up into karosses, some of which found their way to China—(Livingstone).

BAKALU a tn. Danubian Provinces Moldavia cap. circle of same name, near the confluence of the Bistritza with the Hereth 42 m. S.W. Jassy. It is the seat of a civil and criminal court has a normal school and carries on an extensive trade with Galatz in cattle, salt, and corn. Pop. 2000.

BAKERS ISLAND—1 An At Pacific Ocean one of the American Polynesian lat. 9° 15' N. and lon. 178° 21' W. It is covered with a deposit of guano several fms. in thickness.—2 An inlet off Salem harbour Massachusetts, U.S., 5 m. E.N.E. Salem.—3 One of the Georgian islands, in the Arctic ocean lat. 74° 55' N. lon. 77° 30' W.—4 Baker's Down Islands a group in Hudson bay in about lat. 57° 30' N.; lon. 81° W.

BAKHIRA or *Bawuwoor*, a tn. India N.W. Province, dist. and 19 m. N.W. Gorsekpor on the W. shore of Lake Hurrit. It is surrounded by a ditch, rampart and bamboo hedge, and contains about 450 houses. It has a market. The lake, called also the Bakhira Jheel is said to be one of the finest places of fresh water in India. The plantations on its banks are numerous and beautiful and its air here is constantly invigorated by falling anemones and vast flocks of water-fowl. In the dry season, however when its dimensions are much reduced and it is only about 7 m. long by 3 m. broad, the water becomes dirty and rather offensive.

BAKONYBEL, a tn. Austrian empire, Hungary co. and 16 m. N.W. Veszprim in the Bakony forest with an old Benedictine abbey suppressed by the emperor Joseph II., glassworks, and a potash refinery. Pop. 1050.

BAKOW a tn. Austrian empire, Bohemia, circle Budweis, 1. bank near with two churches, and a trade in fruit. Pop. 1100.

BAKU or *BANUK* [old], a port on the Caspian, Caucasus, cap. khane of Shirvan S. shore of the peninsula of Apcheron, W. coast Caspian Sea, of which it is one of the most frequented ports; lat. 40° 21' 30" N.; lon. 49° 51' 6" E. Baku is the city of the Guzer, or fire-rookippers, who regard it with as much veneration as the Mahomedans do the sacred Mecca. It is surrounded by flaming walls of asphalt, and the entire soil on which the city stands is so saturated with this liquid bitumen that if a stick be thrust a sufficient depth into the ground and a light applied to the end, so made, a jet of gas will immediately issue forth. The neighbouring sea-partake it is said of the inflammable properties of the earth, and if a light be applied to the bituminous surface it bursts into a vast sheet of flame that spreads for a considerable distance, and produces a strange and imposing spectacle. In the surrounding country vegetation is stunted and parched for want of water. At a short distance from the city is situated a Purser or Guzer temple, the famous Akash-Gah, where it is said to burn the eternal fire. It is attended by three priests only who are brought from Delhi. The temple stands in a vast plain; five escape from openings placed at

irregular distances in the centre rises a crescental edifice, from each of whose turrets or pinnacles springs a volume of flame, while a large volume, composed of five separate fires, crowns the highest cupola. The scene in the interior is

THE FIRE-TEMPLE OF ATTERBEGAM, NEAR BAKRU
From a View by M. Meylan.

equally imposing. The ground is full of jets of flame, and under this central cupola stands the altar seemingly alive with fire.

BAKWAIN or **BAKUNA** a country S. Africa which takes its name from its mountains belonging to the Bechuanas tribes. It lies between the country of the Bakall on the S and that of the Bamangwato on the N., with the Transvaal republic on the E. and the Kalahari desert on the W., and has a surface diversified by plains and hills and valleys. The vegetation has a vigorous sallow scent towards the E of the African continent. The hills are clothed with trees to their top, and the valleys are often of the most lovely green. The country however often suffers severely from drought, continued without intermission for several consecutive years. The Bakwains have a remarkably accurate knowledge of cattle, sheep, and goats and of the kind of pastures proper for each and show great judgment in selecting the soils best adapted for the different varieties of grain. They are also particularly successful in capturing wild animals by means of an ingeniously constructed trap fence, called a *kepe*. In some of these traps placed near some mountains at Kolobeng, it was not uncommon to take 70 head of large game in a single week. Dr Livingstone took up his residence among the Bakwains, and having purchased a piece of ground formed a missionary station at Kolobeng. The chief Bechela publicly embraced Christianity and many of the tribe have followed his example but the hostile interference of the Boers with the education of the natives, the unhealthfulness of the locality and the long drought rendered it necessary to break up the establishment at Kolobeng.

BALAKLAVA [add.] during the siege of Sebastopol, from which it is about 8 m. distant, Balaklava was occupied by the British army as a base for their operations and a port of entry for troops and stores. At a late period of the siege a railway was constructed between it and the camp before Sebastopol, by which munitions of war and supplies were conveyed from the harbor to the besieging army. On 25th October 1854, an attack was made by the Russians on the British base near Balaklava, but was gallantly and successfully repulsed; and on the same day the famous, but ill-fated, Light Cavalry charge was made against the enemy's artillery

BALANGLINI, an isl. Indian archipelago, belonging to the Sooloo group, but claimed by Spain as a dependency of the Philippine Isl. Mindanao. It lies in lat. $8^{\circ} 57' 30''$ N.; lon. $121^{\circ} 26'$ E. and though only 8 m. long by less than 1 m. broad has acquired notoriety from having long been the resort and stronghold of the most daring pirates of the archipelago. It was attacked by the Spaniards in 1843, who took 134 natives, burned 120 houses, slew 450 of the pirates, and released 200 captives. They afterwards completely demolished the houses and forts, and took effectual means of rendering the island uninhabitable.

BALASHEV a tn. Russia in Europe gov. Saratov cap. circle of same name. 1 bank Khoper. It contains two churches, a circle school, and a charitable institute. Two important yearly markets are held within the circle. Pop. 4614.

BALASINORE, a petty state and tn. India pres. Bombay Gujarat. The town, bounded N. by the Myas Caunta S.E. by the Rava Caunta, and S.W. and W. by dist. Kaira has an area of about 2.8 sq. m., and a pop. of about 19,000. —The town cap. of above state situated 46 m. N. Baroda, is surrounded by a wall and appears a thriving place.

BALASZEK a tn. Austrian empire Hungary co. Tolna 10 m. S. Szeged, 90 m. S. Pecs on the Sarva, is a district remarkable for its fertility. It has extensive vineyards, from which excellent wine, both white and red, is obtained. Pop. 5778.

BALÉ a tn. S.W. Africa. Kimpunda country territory. Balé lat. 11° S. lon. $17^{\circ} 10'$ E. It stands on the stream of same name, enclosed by a palisade and a ditch and has a pop. of about 5000.

BALI (Pulo), or Iloos Islands a group Indian archipelago, off the N.W. coast of Sumatra. It consists of one large and a number of small islands. The large island lat. (N. and) $9^{\circ} 50'$ N. lon. $96^{\circ} 23'$ E. is nearly in the form of a parallelogram 60 m. long N.W. to S.E. by 10 to 15 m. broad and has an area of 480 sq. m. Cocon nuts and half-fishes furnish the subsistence, and constitute the wealth of the inhabitants who are Mahomedans, and speak a peculiar language.

BALICE a tn. Austrian empire Galicia, circle and 7 m. N.W. Cracow with a remarkable oil cascade and 1000 inhabitants.

BALJIK or **BALZSCHIK** a tn. Turkey in Europe, Bulgaria, eyalet Silistra, on a bay of same name on the Black Sea, 20 m. N.E. Varna. Its harbor is capacious and deep enough to accommodate a fleet, and though open to the S.E. and E. is practically completely sheltered as the wind never blows violently from these quarters. It has a custom-house a quarantine, and extensive warehouses for its large and rapidly increasing trade. Its annual horse, cattle and sheep market is very important. A great quantity of excellent honey is obtained in the district by the rearing of bees, and sent chiefly to Constantinople.

BALKANY a tn. Austrian empire Hungary co. Res-boles, 30 m. N.N.E. Debreczin with a trade in wheat, tobacco, cattle, and honey and wax and 3779 inhabitants, mostly belonging to the Rumanian church.

BALKASH *Тарган Аз-Дерсу* [White Sea] or *ALA DERSU* (Coloured Sea) a large lake Central Asia on the boundary of the W. Siberian prov. of Semipalatinsk and the Siberian Kirghis steppes of the Great Horde, and after the Caspian Sea and Lakes Aral and Balkai the largest lake in Asia. It extends between lat. 45° and 47° N. and lon. $78^{\circ} 40'$ and $79^{\circ} 50'$ E. first in the direction of S. to N. and then from W. to E. and has a length of about 800 m. and a breadth of 10 to 60 m. and an area of 6400 sq. m. It appears to be about 500 ft. above sea level, to be deeper on the N. than on the S., but nowhere to exceed 66 ft. in depth. The N. and W. banks, with their sharply-defined contour are terraced-formed and prominent the plateau above them covered with desert sand, is without streams, or has only such as lose themselves in the sand. The character of the S. side is quite different. Here the shore has no sharp outline, but on the contrary presents a number of *sinuosities* and peninsular promontories, and passes gradually into a great low steppe, which, stretching away for 10 m. to the spur of the Altai range, is crossed by sand-hills and covered with a scanty vegetation and forms a large portion of the

chole of Ahlana, also named The Land of Seven Rivers, after the seven stopp-rivers, as the Great H. the Kanak and Kanak, Lapan, Akon, &c., which partly join the lake with extensive deltas, and partly do not reach it at all or connect by secondary direct flow. The country to the E. of the lake has the same stream character. Here is the remains of a former construction of the lake—the Sashy-kan and the Ala-kan or Aw-kan; the latter with the small island Aral Teba, formerly but erroneously supposed to be volcanic. The numerous bays of Lake Balkash are grown over with reeds often 30 ft. high. Among its numerous islands, which are all far from the shore, the largest is Us-Aral, about 10 m. long, which has a good harbour on its N.W. side. The water of the lake is clear but, especially near the shore and in the bays, brackish and undrinkable. From the end of November till April it is covered with ice. Only the smaller kinds of fish are found in it. By command of the governor-general, the navigation was opened in 1852 first from the N. shore to the mouth of the Kanak and Lapan; in 1853 to the mouth of the III. In 1855 a Russian vessel went about 300 m. up the III but this voyage has not had any practical result.

BALISTON SPA a vii U States, New York, cap. co and 7 to S.W. Saratoga, on the Saratoga and Schenectady railway. It possesses a courthouse and several churches, and was celebrated for its mineral springs, which, however, in consequence of the superior attractions of Saratoga as a watering-place are not now much frequented. Pop. 2,265.

BALMEER, a tn, India, Rajpootana, state and 116 m. S.W. Jeodpoor. It consists of about 500 houses, built chiefly of stone, and stands at the foot of a conical hill which is 500 ft. high, and crowned by a fort. Government had for some time a military station and a cattle establishment here.

BALOMBA a river S.W. Africa, which rises on the heights of the Long-Lang chain, flows nearly due W. receiving several streams and rivulets, empties the mountainous district of Bolan and pours its water into the Atlantic, in lat. 11° 8'.

BALOTRA a tn, India, Rajpootana, state and 65 m. S.W. Jeodpoor r bank Lyonsa. Standing on the highroad to the pilgrim shrine of Dwarka, near the W. extremity of Kattwar it is an important thoroughfare, and carries on a profitable trade in supplying the wants of the pilgrims. It has also considerable manufactures of plain and printed calicoes, velvet shawls, and trowsers in wool and ivory. The salt made at the neighbouring lake of Peshkera is sent to employ nearly 2000 persons in conveying it to market. Pop. 12,725.

BALTIMORE [old] U States, Maryland the third town in the state in respect of size and population stands on an arm of the Patuxent, 12 m. above its mouth in Chesapeake Bay 33 m. N.E. Washington, lat. 39° 17' N.; lon. 76° 27' W. From almost every point of view its appearance is striking and picturesque, and its general plan, though regular is sufficiently diversified to avoid tameness and monotony. The streets, though sometimes narrow from following the original location of the site, are of good width, well paved and well lighted with excellent gas; the larger mansions generally in good taste, and with a good deal of open ground about them, suggest ideas of health and comfort, and the smaller dwellings occupied by the working-classes have the advantage that each is complete in itself, and accommodates only a single family. Every respectable tradesman owns his separate tenement, or is able to engage one at a reasonable rent, and hence long rows of modest but pretty cottages, occupying some of the highest and best localities of the town, form one of its distinguishing features. All the houses are substantially built of red brick. The principal public buildings and institutions are 50 churches, many of which are elegant structures, though, perhaps the most imposing is the E. Catholic cathedral, built in the form of a cross, and surrounded by a dome and two towers; the academy, a very extensive range, containing the custom house, post-office, reading room, a vast room for public sales, &c.; a large and commodious court-house, and near it the record-office built of solid granite and fire-proof throughout the interior, built in the Italian style, and containing the rooms of the Historical Society, Lyceum College, under the mature charge of Jesuits, and intended as a substitute for St. Mary's College, which was

suppressed in 1821 by a mandate from Rome; a scientific institute accommodated in the buildings of the Maryland University, which, never flourishing, was finally abandoned in 1854; a medical school, which has always maintained a high name, and is the only portion of the so-called Washington University which the town has contributed; a Roman catholic institute a college for women, which in its course of study and power of conferring degrees is similar to colleges for male students; a E. Catholic seminary; 3 nurseries with large schools attached to them; a penitentiary, a poorhouse, an infirmary several hospitals, and a music asylum. Several beautiful cemeteries have been formed in the outskirts of the town. Baltimore is one of the few places within the U States where monuments deserving of notice have been erected. One of these in honour of Washington, is a Doric column of white marble, which, including its base and the colonial eagle of the hero at its top, is 175 ft. high another called the Battle monument, and erected to the memory of the citizens who fell in defence of the town in 1814, is also a column of white marble, with a sculptured Griffin at each of the four corners of its pedestal and a crowning figure intended to represent the genius of Baltimore.

The manufactures are not so important as might have been expected from the industries and striking character of the place, but there is at least one branch in which it still retains pre-eminence. The shipwrights are among the very first in the U States, and from the dockyards here the famous Baltic more clippers have been launched. The staple articles of trade are coal grain and flour and tobacco. The value of real and personal property in the city in 1863 amounted to 128,596,819 dollars on which a levy was made of \$21,462 dollars for the same year. The following table will give some particulars as to the trade and commerce of the port previous to the outbreak of the civil war:—

Year	Imports.	Exports.	Wholesale of Goods.	Flow of Goods.	Flow of Goods.	Flow of Goods.
	dollars.	dollars.	tonnage.	tons.	tons.	tons.
1850	7,282,220,000	188,200,000	101,540	214,720	214,720	148,138
1855	10,400,000	2,724,200	126,000	227,270	227,270	242,500
1860	10,371,510	2,000,000	126,000	227,270	227,270	242,500

The number of vessels arrived at the port in the three years 1858, -9, -60, were 2367, 2374, and 2426, of which 504, 508, and 162 respectively were foreign. The two sailing establishments produced upwards of 10,000,000 lbs. of light sugar in 1860, of which 547,500 lbs. were exported, chiefly to Bremen and Holland. Of bituminous coal from Connecticut, 231,521 tons were received in 1858 and 257,004 tons in 1860 via the Baltimore and Ohio railroad, and of anthracite, 126,186 tons and 235,129 tons were received by railway and canal in 1858 and 1860 respectively. The dryer trade is

also very extensive employing 8500 people and several hundred vessels. The number of barrels packed in the season of 1880 being 8 000 000 of the total value of \$1 500 000. After the outbreak of the war between the Northern and Southern states the trade and commerce of Baltimore greatly declined. Its inhabitants displayed strong secessionist predilections, and the town was long occupied by a Federal garrison, and ruled by military law. On the trade in the item of tobacco the prosperity of the town mainly depends, and the vast warehouses which the state has provided for its reception are not the least interesting of its sights. In carrying on the various branches of its trade Baltimore possesses ample means of transport. The harbour formed by the arm of the Patuxent, which has a length of 8 m. with an average breadth of more than 1 m. is spacious enough to admit 2000 vessels. Its depth however is not in proportion to its capacity. Its upper part, forming what is called the inner bay or basin has a depth of only 12 ft. and is used only by small vessels. The outer bay extending between Fall's Point and Canton on the N. and E. and Whetstone Point on the S. is capable of docking the largest merchant ships. Even it, however, has been gradually silting up and has shoaled so much in certain parts that Congress voted a sum for the purpose of deepening it so as to admit ships of the line and war-steamer of the largest class. The communication by railway is very complete including the Baltimore and Ohio the Baltimore and Susquehanna, and the Philadelphia, Wilmington, and Baltimore railways. By the census of 1880 the pop. was 212 418.

BALUMBRA a tn. in Western India, peninsula Kattywar prov. Gujarat 129 m. W Ahmedabad. It stands about 8 m. from the shore of the Gulf of Cutch.

BALZORAH or **BALZORAH** a tn. India, Oude near its frontier on a low swampy island, formed by a river from Nepal 120 m. N Lucknow. It consists chiefly of a fort, and is an important trading station, a mart being held every summer for two months, during which the mountaineers and the dealers from the plains meet and exchange their commodities.

BAMBIA or **KAMBA** a tn. Western Africa, Tawarak country 120 m. E Timbuctoo 1 bank Niger where it is constricted to about 700 yards and shut in between steep banks lat. 17° 45' N lon. 1° 10' W. It was formerly so important as to be repeatedly mentioned in history but now besides a mosque and two or three clay magazines, contains only 200 oval-shaped huts.

BAMBARA a tn. Western Africa, forming the most S. of the fixed settlements of the Songhay among the creeks and bank waters in this part of the country 115 m. S S.W. Timbuctoo. It stands in front of a chain of hills, and consists partly of huts, which alone are inhabited as dwellings, and partly of low oblong flat roofed clay buildings used as store-rooms or magazines. The inhabitants, almost all Fellahs of indifferent reputation possess numerous cattle, and also cultivate a large extent of ground the produce of which finds a ready market in Timbuctoo to which the inland navigation formed by the many lake waters and branches of the Niger affords a cheap and easy means of transport.

BAMOURI or **BUMBOURKI** a tn. India, N.W. Provinces, 43 m. S Bareilly r. bank of the Goula, where here passes through an extensive ravine lat. 28° 18' N lon. 79° 50' E. It is a police and trading station on the road from Bareilly to Almorah. The town stands upwards of 1700 ft. above sea-level.

BAMUNWAS a tn. Central India, Rajpoot state Jeyppoor 108 m. S.W. Agrah lat. 25° 34' N lon. 76° 37' E. It is a place of considerable size.

BANAJOA a tribe, S. Africa, inhabiting the banks of the Malaba and Tamenaki, north of Lake Ngami and a large tract of country to the eastward. They cultivate the millet (*Holcus sorghum*) but depend partly for subsistence on garden early when the crop of corn fails, on a root called *tsife* a species of *Ardisia*, which contains a very large proportion of resinous matter, and when dried, pounded into meal and allowed to ferment, is not unpalatable. Their huts are built on poles, and a fire is made beneath at night that the smoke may drive away the mosquitoes. A still worse plague is the *tsife*, a fly whose sting is fatal to cattle. The Banajoa women shave all the hair off their heads, and seem darker than the Bechmanes.

See. Ind. Gaz.—Vol. I.

BANAR, a river India, Rajpootana, which rises on the W. frontier of Oodypoor or Mewar amidst a cluster of summits of the Anwaril range, in lat. 24° 47' N lon. 73° 28' E. flows N.E. to Tonk where it changes its direction proceeding first E. and then S.E., to its junction with the Chambul, in lat. 25° 54' lon. 76° 50'. Its whole length is about 320 m. At Tonk, 85 m. above its mouth its bed consisting of heavy sand is a mile wide, but even here in the dry season it is a narrow shallow stream.

BANARA a vil. Upper India, Gurkwal in the valley and near the source of the Juma, lat. 30° 56' N lon. 78° 57' E. Its situation is very grand on one of a series of rocky ledges on the mountain side. A great part of the village was overwhelmed by the fall of a precipice in 1816. There are hot springs in the neighborhood.

BANAWARAH a tn. Southern India pres. Madras, territory Mysore, 380 m. W Madras, stands in a fine open country on the edge of a large tank, and formerly contained 2000 houses; most of the inhabitants however were removed by Hyder Ali to Nagapuri, but were afterwards allowed to return.

BANAY a tn. W. Africa, on a tributary of the Niger 60 m. S. Timbuctoo lat. 16° 50' N lon. 8° 10' W. The chief part of the town stretches along a bay in the river which is bordered by a rich belt of vegetation; but there is also a suburb of detached huts. The former is inhabited by Tawarak, the latter by Fellahs who possess numerous flocks and herds.

BANCALIS, an Isl. Indian Archipelago near the S.E. extremity of the Straits of Malacca, lat. 1° 26' N lon. 102° 15' E. It is one of a group of ten low islands of considerable size and which are separated by narrow channels from each other and from the N.E. coast of Sumatra. It is about 85 m. long by 10 m. broad belongs to the Malay state of Bank in Sumatra, is thinly peopled and is covered for the most part with dense forests.

BANCOORAH a dist. and tn. India, presid. Bengal—1 The DISTRICT called also sometimes W. Burdwan lies between lat. 22° 58' and 23° 45' N lon. 87° and 87° 59' E. and is bounded N. by Beerbhoom, E. by Burdwan, S. by Midnapore, and W. by Ferozabad and Pachetia, length N. to S., 60 m. breadth 40 m. area, 1476 sq. m. The surface is generally level, but undulates gently and slopes gradually to the S. E. The only locality at all elevated is Chata on the W. frontier where an insulated group of granite hills descends towards the valley of Damoodah. The principal streams are the Hadjee and Damoodah both of which flow through a mineral field which is rich both in coal and iron and is wrought to some extent particularly at Ranagumee within this district. As often happens where minerals are found the soil is of indifferent fertility. In the S. and S.W. it consists of a coarse earth formed by disintegrated granite overlying a slaty gneiss, which seldom appears above the surface. In the more immediate neighbourhood of the coal field the country is fertile and neglected. Where cultivation prevails the principal crops are rice, wheat, barley, grain, and some other sorts of pulse, oil-seeds, sugar-cane, indigo, and cotton. Pop. 480 000.—2 The town cap. of the above dist. 1 bank Dakshin 95 m. W Calcutta contains barracks a government English school accommodated in a large old building and attended by about 100 pupils an hospital a jail a bazaar and a spacious public bungalow for the accommodation of travellers.

BAND (Mme.) a tn. Austrian empire, Transylvania, circle about 7 m. N. Maros Vaserally with an evangelical a Greek R. Catholic and a Greek non-united church. Pop. 3224.

BANDAH [add.] a dist. and tn. India, N.W. Provs. Bundelcund—1 The DIST. lies between lat. 24° 53' and 25° 54' N lon. 80° 8' and 81° 25' E. and is bounded N. by Futehpore and Allahabad, S. by Buxar, E. by B. and W. some petty Bundela states, and W. and N.W. by Humsarpoor area, 2578 sq. m. The principal rivers are the Juma, which forms the N. and N.E. boundary for 180 m. and its affluents the Cane or Keya, the Runga or Bagha, and the Pyamnee. The surface W. and S.W. of the Juma is an extensive alluvial plain, rising gradually towards the S.W. and S. terminating in the Bundelcund range, some of whose summits have a height of 2000 ft. The soil of the plain is a black friable earth composed mainly of disintegrated basalt with a large

mixture of decayed vegetable matter. It is of coarse highly fertile, and produces in abundance wheat, barley, rice, millet, and palm. Sugar cane and indigo are also cultivated, but of commercial value by far the most important is cotton, which bears high name, and is mostly exported up the Juma, by way of Calpe. Pop. 535 526.—2 The town cap of the above dist. on the r bank of the Cane, 95 m. W by N Alhabad occupies a striking site at the foot of a pyramidal hill of red granite, which rises nearly 400 ft. above the plain. It is large, but straggling, ill built place with houses of mud, though building stone abounds in the vicinity. The only edifice worthy of notice is the palace of the nawab or thikdar, a modern structure, spacious and nobly built, but deficient in taste, Indian and European styles being strangely commingled. The trade is chiefly in cotton, for which Bando is a great and celebrated mart. Government has a cantonment here, usually occupied by about 440 native troops. It stands on the E. or r bank of the Cane, on what seems to be a favourable site. Experience, however, proves the contrary for fever is so prevalent that few escape it. In 1857 the nawab rebelled but was defeated by Sir H. Rose who took possession of the place. Pop. 35,464.

BANDO is river S America, New Granada, prov. Choco, which rises in a rugged land of some name belonging to the W Andes, flows W past the vil. of Bando, and falls into the Pacific, in lat 5 S lon 85 W after a course of 45 leagues of which 25 are navigable for the ordinary barke of the country.

BAÑEÍ HUNYAD a to, Austran empire Transylvania, circle and 29 a W N W Kispesburg cap. dist. of same name near the source of the Rapa Kfira. It was once a flourishing place but was almost destroyed in 1600 by the Walsburg circle Michael during the Transylvanian war. It has a castle, marble quarries, and large annual markets. Pop. 2160.

BANGKOK or BANGKOK [add] a city cap of the king dom of Siam extending for 3 or 4 m. on both sides of the Menam, 15 m above its embouchure in the Gulf of Siam and 45 m S. Ayuthia or Siam the former capital lat. 13° 58' N; lon. 100° 34' E. The city properly so called occupies an island 7 or 8 m in extent and is surrounded with crenelated walls, flanked by towers or bastions at certain distances. Situated in the midst of a garden, adorned with luxuriant and perpetual verdure it presents a very picturesque appearance. Its shores are lined with ships and glittering junks; above its walls arise a crowd of gilded spires, and domes, and pyramids the many storied pagoda, enriched with gilding and covered with polished tiles, reflecting the rays of the sun the winding river is gay with floating ships and a thousand barks; the heroic magnificence of the royal palace dazzles the eyes of the spectator. There is not a single carriage or vehicle in the city all trade and intercourse being carried on by water. Camels traverse a very quarter and it is only in the recesses of the interior and at the bazars and public markets, that any paved streets can be discovered. The principal objects of interest at Bangkok—which is in Sanskrit called Krung Thep Maha-nakhon or Si-yam-maha-nakhon, that is, the great royal city of the angels, beautiful and impregnable—are the palace and the royal pagoda. The palace stands on an island from 2 to 3 m in length, but very narrow and is surrounded by lofty walls. The whole area within these is paved with slabs of beautiful marble or granite military posts and batteries of cannon are placed at various points, and on every side glitters a multitude of elegant little edifices adorned with gold and colours. In the centre of the great court majestically rises the Mahachulalongkornrajavidyalaya, with its four sides crowned with pointed tiles decorated with superb sculptures, and crowned by a lofty gilded spire. It is here that the king receives ambassadors, and that the remains of deceased kings are placed in golden urns, for the transference previous to their cremation here also the priests discourse in the presence of the queen and the nobles, who are consoled by latter work. The great hall, or sometimes chamber in next arrival at; gigantic statues of granite, brought from China, keep guard at its gates; the walls and columns of the chamber are gay with paintings and magnificent gildings; a throne, fashioned like an altar is placed upon a platform of seven stairs. A dais rises on the king's apartments, and beyond the queen's palace, the houses of the nobles and nobles of honour, and a vast garden of

extraordinary magnificence. A tribunal a theatre, the royal library immense arsenals, stables and stables for the whole of Siam, a superb pagoda, and a new pavilion of marble in the Italian style are also included within the precincts of the palace. The royal pagoda are indubitably splendid. Eleven are within the city walls, and twenty without. The principal is that of Wat-Chan built in the form of a pyramid, and surmounted by a spire 300 ft. high, which is the first indication to the voyager of his approaching the capital of Siam. It stands on the r bank of the Menam, facing the king's palace. Two other pagodas of great magnificence are named Khetphong and Noverat. Each accommodates four or five hundred bhikkhus, or priests, with a thousand children to wait upon them. The houses of Bangkok are of three kinds the best are of brick, and very elegant, others are built of timber and those of the poor of bamboo. Fires are consequently very frequent and disastrous, and a conflagration will often destroy as many as 500 houses. But in seven or eight days all are again rebuilt, thanks to the generous help of the friends and relatives of the sufferers.

In the year 1864 there entered the port of Bangkok 457 vessels (aggregate tonnage, 55,549) of which 147 were British tonnage, 51,545) were British, and 184 vessels (tonnage 51,545) Siamese—there cleared in the same year 493 vessels (aggregate tonnage, 171,835) of which 145 vessels (tonnage, 54,771) were British and 101 vessels (tonnage 52,848) Siamese. The value of the imports in the same year amounted to £1 167,687 and of the exports to £1 817,923. The quantity of rice exported during the year was 126,507 tons, the demand being principally for China. The trade in teak timber is likely to be much increased in consequence of all obstructions in the way of it having been removed by the Siam government so that foreigners are now allowed to visit and work the jungles in the interior. The production of sugar in Siam has decreased owing to the heavy taxation to which it is subjected at every stage since being levied even on the boats in which it is conveyed to Bangkok. The cultivation of cotton has been carried on, though to no great extent about 20 000 piculs were brought down to Bangkok in 1864.

Though the city is not more than a century old it has a pop. of 400,000 to 500,000 of whom in 1865 200 were Europeans and Americans.—(Description of Siam; then on them, Fallgout and Menhot 2 vols in Paris, Cambodia, and Bangkok.)

BANGO a to, S.W. Africa, Portuguese settlements prov Angola, 85 m E by S Lourenço. It stands in a magnificent valley containing 4000 hearths, and was once famous for its convent of St. Hilson, which though deserted is as entire externally as on the day when it ceased to be occupied. The garden the church, and the dormitories are still kept in good repair. The furniture couches and large chests for holding provisions remain, but all the books and sacred vessels have been removed to Lourenço. The area or native chief of Bango resides here and exercises authority under the Portuguese.

As a sovereign chief he has his councillor and maintains the same state as when the country was independent. The male natives trusting to their wives to supply them with food spend most of their time in drinking-gems-toddy. This liquor which when tasted yields a sweet clear liquid which may be drunk with safety becomes highly intoxicating if left to stand for a few hours. It thus becomes the source of many crimes, and is the bane of the country. Pop. 20 000.

BANG PA KONG [add] a river Borneo which rises in the mountains to the N.E. of Mount Kabin, flows directly W S.W. and falls into the Gulf of Siam about 40 m. E.E. Bangkok. About 30 m above its mouth it is joined by a canal from Bangkok which is 55 m. long, and passes through a flat alluvial country entirely devoted to the culture of rice. A short way from the sea the river becomes narrow and winding, and cultivation is restricted to occasional strips of land on either bank. The inhabitants are few and poor and nothing like a village is met with before reaching Puchim, which, in 1857, was nearly destroyed by a fire from the prairie. At Puchim the river is about 40 yards wide, and during the rainy season, from July to November runs at the rate of 5 m an hour. During the rest of the year there is but a regular rise and fall of the tide. Above Puchim the navigation is rendered tedious during the wet season by the strength of the current, and at other times is impracticable

from the narrowness of the channel and numerous obstructions. The country along the river is generally level and densely wooded.

BANG-PA-SOE [add.] a town, Bang, in the E. height of the Gulf of Siam about 6 m. S. of the mouth of the Bangpakong, where there is a tolerable harbour for vessels of moderate draught. It is the residence of the governor of the district, and is an entrepôt for the produce of the large and fertile district along the banks of the Bangpakong. Many of the inhabitants are employed in catching and curing the fish which abound in the gulf and find a ready market at Bangkok. Pop. 8500 of whom 2000 are Chinese.

BANGOUNGA, two rivers, India.—1 The one rising in the Himalayas, on the N. frontier of Nepal flows S. into dist. Gorkhalep, and joins or is joined by the Horra Raptas, whose volume it more than doubles. Immediately below the confluence the united stream has a width of 100 yards, and is scarcely fordable even in the dry season, above the confluence the Bangunga is navigable and a considerable quantity of wood is floated down by it.—2 The other Bangunga rises in Rajpootana, near the N.W. frontier of Jeypoor about lat. 27° 50' N. lon. 76° 10' E. It flows first S. then easterly to E. and joins the Ghazias, an affluent of the Jamna. Its whole course is about 140 m. but, except during the wet season, it carries very little water. At Mussoorie 50 m. from its source it was found in August, after the rainy season had commenced, with a channel 60 yards wide and nearly dry and a few days later after heavy rains, it was fordable for camels at a point 40 m. lower down.

BANJA or **INDRAN**, a Il. Turkey in Europe Boana on the road from Mostar to Sarajevo about 6 m. from the latter it is finely situated has a pleasing appearance, and possesses sulphur springs, which are said to be very efficacious in cases of rheumatism. A modern but tolerably well arranged bathing-house has been erected by order of Omar Pasha, and several khans furnish good accommodation for visitors.

BANKS, an island, Australia Torres Strait, lat. (Mount Augustus) 10° 10' S. lon. 143° 15' E. It is about 26 m. in circuit, and appears to be inhabited by the natives into two distinct portions—an E. called Moon which is hilly and a W. called Mel, which is low and near the shore is covered with mangroves. In the N.E. where the island is leastest two of the summits, Aquinas and Banks Peaks attain the respective heights of 1310 ft. and 1346 ft. Between these ridges are two deep valleys, moderately wooded and covered with a green vegetation, basking in great natural fertility of soil. Narrow coral-reefs extend along the shores.

BANKS' PENINSULA New Zealand, a remarkable projection on the E. side of the Middle Island, about 20 m. long from N.W. to S.E., and 30 m. broad and attached to the mainland by a narrow isthmus the S.E. point is in lat. 45° 26' 16" S. lon. 173° E. It forms a part of the province of Canterbury and consists almost entirely of steep rugged hills covered with wood. Several harbours indent it on all sides, and near the N. side of the isthmus is the town of Lyttelton the principal port of the province.

BANKS' STRAIT a strait Arctic regions on the N. of Davis Island, and separating it from Prince Patrick and Melville Islands lat. (Cape Crozier) 74° 30' N. lon. 120° 30' W. It was navigated by Captain Sir R. M. Clure of H.M.S. Investigator in 1851 who thereby established the existence of a second N.W. passage, in addition to that discovered by him a short time previously through Prince of Wales Strait.—(Armstrong's Narrative of Discovery of N.W. Passage)

BANLOK a to American empire, Temesver Banat, circle Great Banat lat. 45° 30' E. lon. 26° E. Mojos, on the Berava, with a castle Pop. 2351

BANOB, a to S. America, Kowdori in a break or opening in the chain of the Andes, nearly equidistant from Ambato and Elio Rumba on an affluent of the Pastaza one of the largest tributaries of the Amazon. Steamers drawing from 4 to 6 ft. of water ascend to within 60 m. of Banob, after a river navigation of about 8000 miles.

BANOW a to American empire, Missouri, circle and 10 m. from Hannibal with a trade in dry fruit and nuts, and 1800 inhabitants.

BANEDA, or **BAUNEDA** a petty native state, India, bounded W. and N. by the British collectorate Surat, E. the

Dang, and S. the native state Durrampore area, 525 sq. m. The revenue amounts to £2700 under deduction of £370 payable as tribute to the British government. The state is under the political superintendence of the Bombay presidency and is managed by the governor's agent at Surat. From whence Baneda, the capital is distant 48 m. S.E. Pop. 24,000.

BANSEE or **BAUNEE** a to India, N.W. Frontier, dist. and 64 m. N.W. Gorkulpore r. bank Nagas which is here 900 yds. wide. It consists of about 600 houses, for the most part very poorly built. The only edifice of any pretensions is the palace of the rajah, to whom the paramount of Bansee belongs; but even it is little better than a collection of mud-walled quadrangular towers, connected by huts of one story with windows towards the interior.—There is another Bansee, of still less importance than that, and 23 m. S. Allahabad.

BANSWARRA a native state and to India, Rajpootana, between lat. 28° 10' and 28° 45' N. lon. 74° 2' and 74° 41' E. bounded N. by Dungeerpoor and Coderpoor or Mewar N.E. and E. Pertaubagar, S. by an isolated portion of Holkar's Domains and Jaboon, and W. the Rewa Cantons; length N. to S., 45 m. breadth 33 m. area, 1440 sq. m. The annual revenue is about £30,000 under deduction of about £2000 payable as tribute to the British government. Pop. about 144,000.—The town cap. of the above state situated 110 m. N.E. Baroda, is surrounded by a wall part inclosing a large area of which a considerable portion is laid out in gardens. The principal buildings are the palace of the chief a large battlemented and towered structure seated on a rising ground overlooking the town several handsome Hindu temples and an extensive bazaar. Near the palace there is a beautiful tank overlooking with trees and edged with a fine ghaut, or flight of steps, leading down to the water.

BANZA (Luzon) a to Austrian empire, Transylvania circle and about 14 m. S.W. Klausenburg with gold and silver mines. Pop. 1300

BANYALUKA a to Turkey in Europe, Borna on the Verbas, 72 m. N.W. Borna Borna. It is one of the largest towns in Borna, is the seat of the kamakan and extends for a considerable distance along the banks of the river which divides it into two unequal parts. It is defended by a citadel contains a large number of mosques, and has mineral springs. A number of Roman antiquities exist with it. Pop. about 15,000.

BAP a to India, Rajpootana, state and 98 m. N.F. Jaunpur. Owing to the arid desert around it, it derives much importance from the possession of a fine tank close to the town and of several wells of fresh water nearly half a mile to the S. On the W. side of the tank is a small shrine, which is visited under the idea that the presiding god is able to cure barrenness.

BAPUGLAI or **POUZY** a native vil. S. Africa, Transvaal Republic among the Magiesburg mountains. It is the chief place of the tribe of the Rappagans and consists of about 300 huts a number of which lie along the foot of a mountain spur, while others are situated at some distance. Each hut—of a circular shape built of stone plastered over with clay and in the better class polished inside and out with a thin wax—is 30 or 35 ft. high, has a conical roof thatched with straw or reeds, is surrounded by a broad area or verandah, and divided from the others by a fence or wall. In the formation of the streets there is no appearance of any regular plan but additions seem to have been made as occasion required the shape assumed being that of a series of circles surrounding the cattle kraals. One of these kraals, inclosed by a wall of dry stones 4 ft. in thickness and the same in height, and as well built as any European man could have done, forms an oval measuring 98 ft. on its longest axis. The general cleanliness of the native kraals ought to shame the Dutch boers.

BARA a vil. E. Africa, Kordofan about 200 m. from Khartoum, in the heart of a beautiful oasis embosomed among tall and graceful date-palms. It stands on the slope of a hill and consists of a number of mud houses and straw huts mixed and partly in themselves, but rendered attractive by their well-stocked gardens, which contrast strikingly with the sterile sand-hills of the surrounding country. During the possession of this part of Kordofan by Durrer Bara became the favourite residence of its sultan or sovereign,

who did much to adorn it. During the invasion of the Turks it suffered severely and since their conquest of the country it has little importance beyond that which it derives from being a military station.

BARAHAUT or **BARAKAT** a vil. India, Gurkwal, r. bank Bhagoretta or Ganges lat. 30° 45' N lon 78° 30' E. The houses are built of large stones, and are covered with slabs, or, sometimes, laid on strong timber. In 1803 an earthquake laid great part of it in ruins, and killed 200 or 300 of the inhabitants, besides great numbers of cattle. This disaster was a serious blow to its prosperity but it has to a great measure recovered, in consequence of the advantages which it derives from its position at the junction of the principal pilgrim routes leading to the sources of the Ganges. Pilgrims proceeding to Gangotri, which is about seven days' journey to the N. must here lay in their supplies. Near the village there is a remarkable trident set up, doubtless in honour of Shiva, whose emblem it is. The base made of copper and 8 ft. in circumference, supports a brass shaft 15 ft. high, terminating in three prongs 6 ft. in length. The Brahmins maintain that the trident is miraculously upheld on its narrow base but it is really fixed into the ground by an iron bar. A temple which once stood over it was thrown down during the earthquake.

BARAM, a river Barma, which has its mouth on the N.W. coast, 30 m. E. Labuan in lat. 4° 30' N lon 113° 50' E. Its entrance, which is about half a mile wide, is encumbered by a bar on which there is only 9 feet water but within the depth is increased to 4, 5, and even 10 fathoms, and continues so for about 100 m. In 1851 the iron war-steamer *Pluto* ascended it for 140 m. Coal and iron are found on its banks in the upper part of its course.

BARANOW a town Austrian empire, Galicia, circle and 60 m. N.E. Tarnow close to the Polish frontier. It contains an ancient, beautiful and strong castle, with a valuable library and a picture gallery. This place was once an important entrepôt for the transit of goods to the Vistula to Lemberg. It was also the residence of many of the Polish nobles and the birth-place of the poet Bernardini. The Swedes were defeated here in 1656. Pop. 1500.

BARANQI ILLA, a town S. America New Granada, at the mouth of the Magdalena, prov. and about 5 m. from Sabanalila. It is separated from the river by a narrow belt of land which during the rainy season becomes flooded and thereby forms stagnant pools and swamps, which make it very unhealthy. Its chief importance is derived from its harbour, which makes it the common entrepôt for the traffic of the Magdalena. It is the only place on the Magdalena which has a dockyard for building and repairing vessels.

BARASET a dist. and, to India, presid. Bengal—1. The district lies between lat. 22° 16' and 23° 59' N., lon. 88° 50' and 89° 22' E. and is bounded N. by Nuddea, E. by Jessore, S. by the Sunderbunds; S.W. the Twenty-four Pargannas, and W. the Hooghly length, S.E. to N.W., about 63 m. breadth 31 m., area, 1424 sq m. It is a flat alluvial tract intersected by numerous water-courses, offshoots of the Ganges; and having thus a superabundance of moisture with a tropical climate, it is so unhealthy that its natural resources have never been developed. Pop. 625,000.—2. The lower part of the above dist. situated 15 m. N.E. Calcutta, on the road to Dacca, is an insignificant place but has, however, a civil establishment, consisting of a magistrate and collector and other European and native officials.

BARATH (Nagy) a town Austrian empire, Hungary co. and about 6 m. S.W. Raab, and 73 m. S.E. Vienna with a trade in corn, wine, and fruit, particularly excellent cherries. Pop. 1140.

BARBARANO a town Austrian Italy prov. and 12 m. S. Vigevano, very dist. of same name, with a court of justice, several churches, Franciscan monastery and a mineral spring. Pop. 2180.

BARCA (La), a town Mexico, Jalisco, at the entrance of the Rio Grande or Santiago into Lake Chapala, 60 m. S.E. Guadalajara. It is a stirring place with about 8000 inhabitants whose chief employments are fishing, weaving and the feeding of swine.

BARCEL, several places, India—1. A vil. Gurkwal, 1 bank Jucos, lat. 30° 55' N lon. 78° 28' E. It possesses a few patches of fertile soil, in which grain and potatoes are

grown, and has some manufactures of woollen cloth, in which the whole process from the clipping of the wool to the spinning and weaving, is performed exclusively by the male inhabitants.—2. A town in the native state Dinapore N.E. corner of Balpootra, 44 m. S.W. Agra. It stands in a fertile district, and is little known to Europeans. According to an old account, its streets were narrow, but many of its houses built of red stone and two stories high, have a comfortable appearance.—3. A town territory and 44 m. S.E. Bhopal in a mountainous country on the N. or N. bank of the Jannair. It is the cap. of a pergunnah of same name, containing 230 villages, and is said to be a large and populous place.—4. A town N.W. Provencal dist. and 18 m. E. Ghanespoor r. bank Ganges, at the confluence of the Karanum—5. A town Oude, 79 m. N. Lucknow.

BARILLY [add] a town India, cap. dist. of same name. On 31st May 1857 the sepoy station here broke into open mutiny murdering their officers and other Europeans, and setting fire to the British quarters. They soon succeeded in gaining complete possession of the place, and afterwards formed part of the reinforcements which joined the rebels in Delhi. The town was recovered from the mutineers in 1858, after a sharp struggle by the British under Lord Clyde. Pop. in 1853 111,883.

BARING ISLAND or **LARV**, an isl. Arctic Ocean N. coast of America, lat. 71° 5' to 74° 37' N lon. 114° 20' to 125° 30' W. is separated on the N. by Banks Strait from Prince Patrick and Melville islands, and on the E. by Prince of Wales strait from K. roon Albert Land. It terminates on the S. in the lofty promontory of Nelson's Head and from this point to Point Kellett on its W. shore the coast is bold and precipitous, but the surface affords good pasturage to various arctic animals, such as reindeer, foxes and geese. Proceeding northwards, the coast subsides in elevation, but again rises at the N.W. extremity of the island where it presents a scene of universal ruggedness and desolation. Baring Land was circumnavigated for the greater part by H.M.S. *Investigator* which in the search for the expedition under Sir John Franklin passed the winter of 1851-2 in Mercy Bay on its N.E. coast.—(Armstrong's *Narratives of Discovery of N.W. Passage*.)

BARITO or **BARJAN**, a river Borneo which rising in a mountainous district, about lat. 1° 6' N lon. 114° E. not far from the sources of the Muzung, enters it in lat. 0° 18' N lon. 113° 58' E. The united stream sometimes called the Muzung sometimes the Barito, or Dusean, pursues a tortuous course southward hemmed in for the most part by lofty mountains. In lat. 3° 40' S the river again separates into two branches, the W. of which, under the name of Kalor Muzung, falls into the sea in lat. 3° 26' S lon. 114° 15' E. while the E. the Barito proper has its mouth in lat. 3° 25' S lon. 114° 33' E. the two arms forming a delta of 88 geo. sq m. The Barito at its mouth is nearly ½ m. broad. The whole length of the river both when united with the Muzung and separated from it, is estimated at 570 m. Of these, 412 are navigable for large vessels. Nearly the whole kingdom of Banjarmaran is included in the basin of the Barito.—(Zeit-schrift für Allgemeine Erdkunde, v. 1. 1857.)

BARKEIT (Ba) a town India, Bahar, occupied by a tribe of Barber origin, but subjected to the Hagar or Awar Tawariks 5 m. S. Ghaz, lat. 25° 0' N lon. 107° 30' E. It stands on a place of open ground at the foot of a sandy and loose and forms nearly a regular quadrangle, inclosed by a clay wall with four gates, and provided with square towers. The houses, about 300 in number are well built of nicely polished clay and are all of two or three stories. The only public building of much pretension is the mosque, which is of considerable size for so small a place, neatly whitewashed, and surrounded by a lofty mihrab. The inhabitants carry on no trade, and have their chief wealth in their date plantations and gardens.

BARKFELD a town Austrian empire, Hungary co. Baro, on the Tople, 30 m. N. by E. Kuperitz. It was once a royal free town, and consists of an inner town surrounded by walls, and of three suburbs, has clean and well-paved streets, a R. Catholic church, and a townhouse—both of which handsome structures—a Franciscan convent, a high-school, good potteries, and a large trade in lace, linen, wine, hemp, and flax. The baths in the neighbourhood, situated on the R.

slope of the Carpathians, have been known for three centuries, and are much frequented by visitors from Hungary, Poland, and Russia. Pop. 4222.

BARMEN a missionary station, S Africa. Damara land about 4 m. from r. bank Swakop. lat. 23° 8' S. lon. 17° E. It has a rather dreary aspect when first beheld but presents spots not devoid of interest and beauty. Immediately in front, towards the E., lies the river whose course is conspicuously marked by the handsome black stoneed summit; while behind toward the W. rise irregular masses of low broken rocks, ending abruptly on one side in a bluff about 1000 ft. high the whole covered with a profusion of shrubs and thorn-trees of the genus *acacia*, which during the great part of the year assume every shade of green. Bounding the horizon beyond the river is a noble range of plateau mountains, rising nearly 7000 ft. above sea-level and forming a prolongation of the chain which commences not far from Cape Town. Water is both abundant and good, and there is a warm spring with a temperature of 127° which is used with success for irrigation, domestic purposes and the seasoning of timber.

BARN a to. Austrian empire. Moravia, circle and 16 m. N. N. E. Omlitz with two churches, extensive manufactures of linen, and establishments for preparing flax, which is very extensively grown in the district. Pop. 3186.

BARACH or **BORACH** [add] a dist. and to. India, presid. Bombay. The district lies between lat. 11° 22' and 22° 11' N. lon. 73° 30' and 73° 10' E. and is bounded N. and E. by Gulikwar, S. the Kaim, separating it from Surat and

W. the Gulf of Cambay; length, N. to S. about 87 m., breadth, 41 m.; area, 1519 sq. m. The surface, belonging almost entirely to the deltas of the Nerbudda and Tapias is generally flat, and covered by two classes of soil—a light brown and a black. The former which is of very limited extent, is of superior fertility but somewhat difficult and expensive to cultivate. Its chief crops are bagree and other kinds of grain. The black soil, forming at least 88 per cent. of the whole, is a rich mould admirably adapted for jowars (*Solms sepium*) the principal food of the inhabitants, and cotton which now forms the great staple of the district, and furnishes a large proportion of what is known in the British cotton market by the name of Surat. Wheat and rice are grown to some extent, but the quality of both is said to be inferior. The manufactures, of which cotton cloth forms the staple, are unimportant. Pop. 290,984. —The towns *cap* of the above dist. r. bank Nerbudda, 80 m. above its mouth, is a station on the Bombay Baroda and Central India railway 200 m. N. by rail Bombay. It stands on an artificial mound, 80 ft. above the river which is here 2 m. broad but so shallow as to be navigable only by boats of 50 tons and is crossed by a long viaduct of the railway. The principal buildings are an English church, consecrated in 1856, a Parsee hospital for animals, government school the Silver Mosque with a handsome fruited ceiling the bazaar and cotton warehouses outside the wall. The wall which surrounds the town is very much dilapidated except on the river side which has been repaired. Barach was formerly a flourishing place for trade and the manufacture

BARACH, FROM THE HELON ISLAND IN THE CENTER OF THE RIVER.—From *Norfolk Oriental Memoirs*.

of cloth cloaks, which were very skillfully woven, mostly by Parsees. About 17 or 18 m. distant are the carnelian mines of Ratnapur large quantities of carnelian beads being exported from Barach. The cotton trade has recently become the most important Barach being the shipping port for the cotton grown in Gujarat. The town contains about 8341 houses within the walls occupied by 13,971 persons; the inhabitants of the suburbs are estimated at 13,261.

BABOTSE a dist. Central Africa between lat. 15° 20' and 16° 30' S. and lon. 31° and 34° E. It is bounded on the W. by a range of hills, from which it descends gradually to r. bank Zambesi or Loanzibya, crossing the river to another range of hills forming the E. boundary. The intervening tract, forming Barotsse proper is about 100 m. long and 30 to 60 wide. As it is annually inundated by the river like Egypt by the Nile, the villages and towns of which Nariela, containing scarcely 1000 inhabitants, is the chief, are built on mounds, many of them constructed artificially. The plains are covered with coarse succulent grasses on which large herds of cattle are grazed. Maize and Caffee corn are raised in abundance, and of excellent quality on the inundated grounds; and on the ridges above are fruitful gardens where sugar-cane, sweet potato, two kinds of manioc, two kinds of yam, bananas, millet, &c. are cultivated. These productions, with ample supplies of milk from the cattle, and fish from the river justify the inhabitants in talking of their country as the land of

plenty. It has, however, one serious drawback. Fever often of a fatal description is prevalent. Dr. Livingstone during his visit had eight attacks of it, the last of them very severe.

BARACKPOOR [add] a to. India, presid. Bengal 10 m. N. N. E. Calcutta. Previous to the mutiny in 1857 six regiments of sepoy were quartered here but upon its outbreak they became disaffected, and were on the point of marching upon Calcutta when they were dispersed and closely guarded by European troops. Subsequently extensive barracks for the permanent occupation of British troops were erected and are now occupied by them. The government also has works here for the manufacture of gunpowder.

BARACOUTA A *HAUT* or *PORT* BARRATA, a harbor Russian empire, Manchuria, on the W. shore of the Gulf of Tartary; lat. (Tulle Island) 49° 1' 50" N. lon. 140° 19' E. It is formed by Freeman Point on the N. and Tulle Island on the S. which are 2 m. apart, has depths varying from 5 to 15 fathoms, and contains several islands, with shelter for all classes of vessels. It receives the river Heil or U, which forms some small alluvial islands. Its shores are covered with dense forests of pine, yew and alder. The Russians founded the settlement Kowotmolovsk here in 1858. It consists of a few log-houses, supplied with water from a well, and is defended by two batteries mounting medium guns.

BAREEN [add] an island, S. Pacific, off the N. E. coast of Tasmalia near the E. entrance of Banks Strait. It belongs

to the Farnsworth group, is about 34 m long from E to W by about 18 m wide, and has a high rocky and irregular surface, with a remarkable peak on its E.E. end, and on its N.W. side some round wooded hills.

BARREN (old), a tn. in the S.E. of the Bay of Bengal belonging to the Andaman group, 86 m. E. of the Middle Island of the Great Andaman; lat. 14° 17' N. lon. 93° 54' E. It consists of a volcanic cone which rises to the height of 900 ft. above the sea, is about a mile and three quarters long, by less than half a mile broad, and is a hulk in the chain of volcanoes which extends in a curve from Java to the N.E. and N. Many violent eruptions must have taken place at a very early period. In 1795 the crater threw out red-hot stones of several tons weight, and immense volumes of vapour; and in 1808 a black pillar of smoke continued to rise from it at intervals of 10 minutes, while at night, on the E. side of the crater a burning fire was distinctly visible. Since then the volcanic activity has gradually diminished.

BARRE a tn. India, presid. Bengal, dist. and 35 m. E. Patna, r. bank Ganges, 265 m. (by rail) N.W. Calcutta, is a station on the East Indian railway. It occupies a large area, and carries on a considerable trade. Pop. 25,000.

BARRIE, a tn. British America, Canada West, cap. on Simcoe at the head of Kempenfelt Bay on Lake Simcoe and on the Ontario, Quebec, and Huron railway 50 m. N. by W. Toronto. It has two bank agencies and a weekly newspaper but its trade is chiefly local. Pop. about 3,000.

BARI WA a tn. Western Africa, Bornu near the N.W. shore of Lake Chad about 80 m. N. Kuka. It is enclosed by clay walls which are scarcely distinguished owing to high mounds of rubbish embedding them on all sides; and consists of closely packed huts, generally without a courtyard. The inhabitants are mostly of the Kanembu tribe. Fish, caught in great quantities in the lake, are at once the principal food and the main article of commerce.

BARWALD, a tn. Austrian empire, Gallia, circle Waidloch, in a mountainous district, 18 m. S.W. Graz. It consists of the three distinct villages of Lower Middle, and Upper Barwald, and has a fine mansion, and beautiful forest timber. Pop. 2,000.

BARZDORF, a tn. Austria, empire, Bohemia, circle and about 35 m. N.E. Komgrätz; with a church, three mills, and 1,700 inhabitants, employed in weaving and spinning.

BASADJIK, a tn. Turkey in Europe, 120 m. W. N.W. Adrianople, on the Balkans. The Christians here build churches, and possessed several flourishing schools, which Turkish fanaticism has suppressed, substituting for them only one Bulgarian school. The trade is important. It contains about 25,000 inhabitants of whom three-fifths are Turks and the remainder Christians.

BASARTSHIK or **BASARTSHIK** a tn. Ta key in Europe Bulgaria, eyalet Ruse, 24 m. N. Varna. It has in April an important annual fair and contains 8,000 inhabitants, almost all Mohammedans.

BATCHAR-MAADEN a tn. Turkey in Asia, prov. Kara, 45 m. N.W. Erzeroum on the S. slopes of a mountainous range near the I. bank of the Tchoru st. It is celebrated for its copper mines.

BATGUL, a tn. India, presid. Madras dist. N. Cannara, on a small stream, about 3 m. from its mouth on the W. coast, 90 m. N. Mangalore. It stands in a beautiful valley highly cultivated by means of irrigation, and enclosed by hills on all sides; and contains two mosques, though the majority of the inhabitants, about 2,000 are Hindus.

BATFVILL, a tn. U. States, Arkansas, cap. on Independence, 85 m. N.E. Little Rock, on the White River which is navigated by steamboats all seasons. It occupies a healthy site in a dirt wall wooded and amply provided with water-power which enables it to carry on a considerable trade. Pop. about 1,700.

BATH or **BEXLEY** a vii U. States, Virginia, cap. on Morgan, on the Baltimore and Ohio railway about 8 m. from the Potomac. It is much valued by invalids for its mineral springs, which have a temperature of 74° and are considered efficacious in rheumatism, dyspepsia, and rheumatism.

BATH (old), a tn. U. States, Maine, cap. on Tegadoc lake, r. bank Kennebec, 4 m. below its junction with the Androscoggin and on the Kennebec and Portland railway 35 m. E. Augusta. It stretches 2½ m. along the river and

about a mile back from it, and is very irregularly built though most of the dwelling-houses display neatness and taste, and some of the few public buildings, including several of the ten churches, are costly and elegant. The custom-house is a granite structure of some pretensions. The public schools, consisting of primary, grammar, and high schools, are in great repute; and the literary character of the place is moreover maintained by a library, an academy, and a public library. The principal business is shipbuilding, in which Bath is surpassed only by Boston and New York. The number of vessels built here in 1856 was 67 measuring in the aggregate 10,152 tons. A large proportion of these are owned by the inhabitants, who in 1864 possessed in all 164,000 tons, employed partly in foreign trade, and partly in coasting, and in cod and mackerel fishing. Pop. about 12,000.

BATH a tn. Austrian empire, Hungary, co. Bonth 10 m. S.W. Schenau, cap. dist. of same name, with a court of justice and several public offices a trade in excellent wine and much-frequented yearly markets. Pop. 1,260.

BATICALO (old) a tn. Ceylon, on an island off its E. coast, in a singular country where the confusion of several streams has formed a lake nearly 40 m long and not more than for 2 m broad lat. 7° 45' N. lon. 81° 42' E. It consists of a town and a fort, both situated on an inlet within the lake, and is called by the natives Poulvaiva, or the Island of Tamarind. The fort is a grim little quadrangular strong hold with a battery at each angle, connected by a loop-holed wall, and surrounded by a ditch swarming with crocodiles. The square within is surrounded by soldiers' quarters, and encloses a house for the commandant, a bomb-proof magazine and a church. On the upland in front are the remains of a Dutch garden, with a reservoir abounding with tortoises and small fish, and frequented by great numbers of kingfishers. The approach to the town is extremely picturesque, thick groves of coco-nut palms forming an impenetrable screen to the white houses, each of which is surrounded by a garden of fruit-trees and flowering shrubs. The line of the coast, N. and S. of Baticalo, is for nearly 80 m a belt of sand about 1½ m wide, separating the lake or lagoon from the sea. This natural embankment is covered from end to end with coco-nut palms of remarkable luxuriance, and producing fruit of unusual weight and richness. The lake and other waters of the district are remarkable for the numbers and prodigious size of the crocodiles that infest them. Their tooth are sometimes so large, that the natives mount them with silver links, and use them as boxes to carry the powdered charcoal which they chew with betel-nut. The port is flourishing, having doubled its tonnage within a few years.

BATINA a tn. Austrian empire, Hungary, co. Baranya, about 32 m. S.E. Fünfkirchen on the Danube, over which there is here a ferry. It has a ruined castle, a sturgeon fishery and a trade in corn and wine. Pop. 1,524.

BATHA a town Algeria, prov. and 56 m. S.W. Constantine, on a plateau along which the route from Constantine to Biskra passes lat. 36° 38' N. lon. 6° 14' E. It consists of an Arab and a European town. The former is of mean appearance, but carries on a regular trade with the tribes of the Sahara the latter founded in 1843 has already made considerable progress. The Arab weekly market is important. In the vicinity are numerous Roman remains, the most important of which belong to the ancient Lambaena. Among them are a temple of Victory and a temple of Esculapion, both in good preservation; a circus, an amphitheatre, baths, aqueducts &c. Government has here established a penitentiary for political prisoners. Pop. 1,668.

BATOKA, a tribe S. Africa, inhabiting large islands in the Lagoon of Zanzibar, and a considerable tract of hilly country on its N. bank, in lat. 17° S. lon. 37° E. The soil though unequal and incapable of being advantageously cultivated from a want of perennial streams, is in some quarters so rich and so free from obstructions of any kind that the whole surface might be converted into one great garden. The cattle of the Batoka are exceedingly small but very beautiful. One of the products of the country is iron, which is smelted to some extent, and employed chiefly in the manufacture of hoes. This manufacture is carried on chiefly by the Baka and Bayel, and to such an extent that most of the hoes in west Zanzibar, the capital of Ziboko, are the tribute paid by the natives of these tribes. All the Batoka tribes follow the sea

gular custom of knocking out the upper front teeth which is done to both sexes at the age of puberty and produces an unsouth appearance. Those on the islands are very dark and negro-like, while those on the high lands are frequently of the color of coffee and milk. They are both warlike and cruel, and before they were subdued by Belitane, the celebrated Makololo chief, used to be guilty of the most barbarous excesses, the different chiefs vying with each other who should mount the greatest number of skulls in his villages. Belitane, when his fortunes were at a comparatively low ebb undertook to subdue them, and near the great falls gained a complete victory capturing so many cattle that his people were unable to count the number of the sheep and goats. He afterwards overran all the high lands towards the Kafue and extended the limits of Makololo eastward so as to include a fine pastoral country of gently undulating plains covered with short grass and little forest. The Batoka in habitants having thus lost their independence have been tributary to successive conquerors, and their country which was once densely peopled is now in many parts almost deserted.

BATON ROUGE (add.) a city U States cap. Louisiana 1 bank Mississippi, 129 m. N W New Orleans. Standing on the first high bank up the river it is considered one of the healthiest places in the south part of the Mississippi valley and possesses a fine view of the majestic river and the highly cultivated district adjacent to it. Among its buildings are a handsome state house a college, several churches, an arsenal, barracks, and penitentiary—it has also two newspaper offices. Since it was made the seat of the state government it has become an active place and the value of property has much increased. In 1862 the possession of it was contested between the Confederates and Federal forces and on Aug 5th of that year the Confederates under General Breckinridge suffered a severe defeat before it. Pop. 4500.

BATONYA a tn Austrian empire, Hungary at Bekas. Capital cap dist. of same name 12 m N Arad with 8485 inhabitants and a trade in cattle.

BATOPLAS (SAM PAMON) a tn Mexico prov and 120 m W S W Chihuahua, on a river of same name in a mountain gorge at the foot of the W ranges of the Cordillera. It has many good houses and shops, and has long been celebrated for its silver mines, which, though mostly abandoned are supposed only to want proper skill and sufficient capital to be still successfully worked.

BATORKEKI a tn Austrian empire Hungary co Komors 4 m. S W Kne-Ujfeh with many handsome buildings, a fine baroque castle, and 2160 inhabitants of mixed denominations, R. Catholic, Protestant, and Jewish.

BATTA the most numerous among the native tribes of Adamawa, in Central Africa. Not only all the country on the middle course of the Benue and along the Faro for some distance beyond Mount Aintokta but also the whole region south of these rivers as far as the S boundaries of Bornu is inhabited by them. They are divided into several great families, speaking dialects which in some cases differ very widely from each other and are closely related to the Marghi. Previous to the conquest of the Follati their chief was the most powerful in the country and several of them still maintain their independence. It is their language that has furnished the name of Benue or Mother of Waters, by which the E. branch of the Kwara or Niger is now generally designated.

BATTAMBONG a prov tn and river of Cambodia, in the kingdom of Siam. Numerous monuments of antiquity are scattered throughout the prov. ruins of an unknown epoch, of an empire which long ago passed away and a civilization that has wholly disappeared. At Benette, Banone and Wit-ek are remains of vast and splendid Buddhist temples, with lofty columns, richly sculptured ornaments, and massive towers. The prov has been tributary to Siam for more than a century spite of several determined efforts to shake off its thraldom. The majority of its population are Cambodians, who have preserved their ancient customs and manners and being exempted from the heavy taxation imposed upon other parts of Siam, enjoy an extraordinary amount of prosperity. Their parents are wholly agricultural, and each cultivator has in the rear of his hut his little patch of rice-ground. They are strongly addicted to horse-raising and buffalo-hunting, pursuing the latter pastime

on ponies of great strength and remarkable speed.—The towns of Battambang on a river of the same name, which does not exceed 50 ft. in breadth and whose mud-banks are humbled by alligators, is a long straggling place of little commercial importance. lat. 12° 50' N., lon. 104° 30' E. It is surrounded by a small fort pompously called the Citadel but built only of baked clay. The bamboo and timber have each their plot of garden ground adorned with superb plantations of the banana, and the deep-green foliage of the mango.—(Mouhot, *Travels in Cambodia, Siam, and Laos*)

BATTANITZA a tn Austrian empire Peterwardein Military Frontier about 80 m S S E. Peterwardein with a large trade in silk, and 1760 inhabitants.

BATTELAU a tn Austrian empire Moravia circle Iglaue near the frontier of Bohemia with a beautiful parish church a large castle manufactures of cloth and an iron-mill. Pop. 2514.

BATTLE a harbor British America, on the N E coast of Labrador near the N E entrance of the Strait of Belle Isle. It is formed by an island-group of same name, of which the S. E. island is in lat. (N. E. point) 55° 15' 06" N. lon. 55° 28' 20" W and by the Great Caribou, which, having a circuit of about 9 m. is the largest island on this part of the coast. It is fit only for small vessels, being only 60 yards wide at the entrance, and 150 yards wide within and is usually crowded with the boats of the fishermen while the shores are covered with their houses and stages. It is scarce during the summer months, but in the fall of the year is subject to a heavy ground-swell called by the fishermen the *swedro* which rolls in between the islands, and damages the vessels and stages. This swell which at times rolls in from the E. into St. Lewis Sound, round the River islands and up the bays of the main to the W of them is thus described in the *St. Lawrence Pilot* (vol. 4, p. 111 of 1860). Perhaps there is not anything more grand and wildly beautiful than the tremendous swell which often comes in without warning slowly but irresistibly in from the sea, as if moved by some unseen power rearing itself up like a wall of water as it approaches the craggy sides of the islands; moving on faster and faster as it nears the shore until at last it bursts with fury over islands 80 ft. high or sends up sheets of foam and spray sparkling in the sunbeams, 50 ft. up the sides of the precipices. The roar of the surf in such a night can be compared to nothing less than the Falls of Niagara.

BATTLE CREEK a vil U States, Michigan on a stream of same name, at its junction with the Kalamazoo, 60 m E Lake Michigan. It possesses several churches, an auditory machine shops several woollen factories, and a number of saw and flour mills. There are quarries of excellent sandstone in the vicinity. Pop. about 2000.

BAU or **AWAU** (add.) an ul. S. Pacific, Feejee group on the E. of Yui or Yavir Levi, with which it is connected by a long coral flat in some places bare at low water lat. 17° 34' S lon. 178° 34' E. It is only about 2 m in circuit, but contains a town of same name, and is the residence of a chief who at one time assumed the title of King of Feejee and is still the most influential Feejee chief. Bau continued to be one of the strongholds of badmanner till April 1854 when its chief Thakomban, and his subjects embraced Christianity. Pop. 1500.

BAUGLEE a tn India Schindia Districts 54 m S E Ougan. It is situated on the Kales Road, has a well built fort, and contains about 8000 inhabitants.

BAUSKE a tn Prussia in Europe, gov. Covrland, on the Memel 35 m S E Mittau. It contains a Lutheran church a R. Catholic chapel a synagogue, two schools, two charitable endowments, and the ruins of an ancient castle. In the vicinity there is a R. Catholic monastery and also mineral springs, pleasantly situated in a valley. Pop. 8753.

BAUFZEN a tn Austrian empire, Bohemia, circle and N. E. Bannau, with a parish church a townhouse, and a corn-mill. Pop. 3091.

BAWGAN an ul. Indian Archipelago, about 50 m. off the N coast of Java lat. (southern) 5° 49' N. lon. 113° 44' E. It has an area of about 850 sq. m. and is surrounded by reefs and rocks affording scarcely any safe anchorage. It seems to be of volcanic origin and has a rugged surface, with peaks rising to the height of 3000 ft. above the sea. Hot springs some of them with a temperature of 125 are found

throughout the island. The principal cultivated product is rice, raised by means of irrigation, but the quantity grown falling short of the consumption is supplemented by an annual import of about 150,000 tons from Java and Bali. The inhabitants prefer fishing to agriculture, and at times 800 small canoes, each carrying only a single fisherman, may be seen off the coast. Their principal exports, which they exchange for iron and clothing, are mats made of pandanus leaves, horses, and braggan. Pop. 30,000.

BAYA, a *tu* W Africa, cap. dist. of same name, 210 m S.S.E. lat. 6° 49' N. lon. 18° 42' E. It has between a forest on the one side and mountains on the other and consists entirely of hills. The inhabitants go with no covering but a leaf, tattoo their bodies and make a small hole in the left nostril. They have neither horses nor neat-cattle, but abundance of asses, sheep, and poultry. Parrots and elephants are numerous. The latter they catch in pits and feed on their flesh.

BAI VERTE, British America, lying between New Brunswick on the N and Nova Scotia on the S, opens into Northumberland Strait. It is 14 m. wide at its entrance, and penetrates between the two provinces from E to W for 11 m. At its head—where the isthmus, 20 miles broad, which connects the provinces begins, dividing Northumberland Strait from Cumberland Basin in the Bay of Fundy—it receives the Tignish, which is of some commercial importance, as about 100,000 ducks are annually shot down it, and thereafter conveyed in rafts or small schooners to Piquash, on the N.W. coast of Nova Scotia, for shipment to the British market. There are three settlements on either side of Bay Verte, and especially at its head, where extensive tracts of meadow land have been gained by rearing and draining.

BEAGLE VALLEY, N Australia, Alexandra Land, about lat. 10° 30' S. lon. 130° 30' E., near the banks of the Victoria River. It has a fertile soil and produces abundance of high grass, but is thinly wooded. A few trees consisting of baobabs, acacias, and small eucalypts. With the adjoining valley it has an estimated area of 160,000 acres well watered, and suited for pasture.

BEAR RIVER, U States.—1 A river Utah which rises at a spur of the Rocky Mountains about 75 m E. of the Great Salt Lake, flows first N.W., then S.E., and falls into the Great Salt Lake after a course of about 400 m. Its valley is about 6000 ft. above the sea. On its banks are several remarkable hot springs, some of which throw up vapour like the geysers.—2, A river which rises on the W slope of the Sierra Nevada, in California, flows easterly to W and R, and joins the Feather River below Marysville.

BEAUFORT [adj.], a port, U States, N Carolina, cap. dist. Carteret, 1 mile of mouth of Newport River a few miles from the sea, 168 m. E.S.E. Raleigh, the railway from which runs to Fort Macon, on the opposite side of the river. The harbour is the best in the state and is accessible by steamboats from Albemarle Sound and the trade is considerable in turpentine, resin, &c. A lighthouse stands on Cape Lookout, and Macon Fort defends the entrance to the harbour.

BEAUMARQUIS, a *tu* Canada E. cap. of same name, r bank St. Lawrence here called Lake St. Louis 30 m. S.W. Montreal with which it communicates by steam. It has a church in connection with the Church of Scotland, a manufactory of reaping and threshing machines, a tannery and a pottery. The trade is chiefly local. Pop. about 1000.

BEAUMONT, a liberty, England, in the union of the New Forest, co. Southampton, 54 m. N.E. Lyndhurst. A site stood on a river of the same name, which rises in the New Forest and flows into the Solent a short distance below the town. On the eastern side are the ruins of Beaulieu Abbey founded in 1304 by King John for thirty Benedictine monks. The abbey-refectory a plain battlemented building of stone, enlarged in 1540 now forms the parochial chapel. About 2 m. distant is Park Farm, a grange formerly belonging to the abbey and still presenting some indications of its ancient splendour. Beaulieu has long been noted for its sucking muttons, and sheep-rearing is also carried on to some extent. The abbey offered sanctuary to Margaret of Anjou, wife of Henry VII., after the battle of Tewkesbury, and to Perkin Warbeck, in the reign of Henry VII. Pop. (1851) 1176.

BEAUMONT, a *tu* U States, Texas, cap. of Jefferson, r bank Neches River 20 m. from its mouth in Sabine Lake.

It is a junction on the railway between New Orleans and Galveston &c. there being a branch from it to Sabine lake. Small vessels ply regularly to and from Galveston. The chief business of the inhabitants is the raising of cattle on the vast prairies over which immense herds find pasture.

BEAVER, a *tu* U States, Pennsylvania, cap. of same name r bank Ohio River 38 m. N.W. Pittsburgh on the railway from Pittsburgh to Cleveland. It is pleasantly situated in a plain, and has several factories driven with water-power.

BECAI, a *tu* Mexico, Yucatan, 40 m. S.E. Merida. It is a decayed place with a parish church, and 1446 Indian inhabitants.

BECAUCOUR, a *vil* British America, Canada E. co. Nicolet, r bank St. Lawrence, 85 m. N.E. Montreal, with a R. Catholic chapel, manufactory of mill-wheels and carriages, a tannery and a trade in lumber. Pop. about 1000.

BECHI or **BECHU**, a *tu* W Africa, Hausa States, lat. 12° 15' N. lon. 6° 2' E. 20 m. N.W. Kano. It lies embosomed in a luxuriant mass of vegetation from which on approaching it the high grey walls seem suddenly to start forth. It has but one gate. Though belonging to the Hausa States, it is possessed in part by the Tawke tribe of Illes whose people, or *arafa*, live within the town, and cultivate the adjoining fields for their masters. Beyond the town the country becomes less cultivated and is mostly covered with the wild gamba bush which bears a most delicate fruit.

BECE, two places, Austrian empire Banat.—1 *New* or *Turkish Bece*, cap. dist. of same name, 18 m. N.W. Gross-Bismark, on the Theiss, cap. dist. of same name in the seat of several public offices, carries on a very extensive trade in corn, and contains 1472 inhabitants.—2, *Old* or *Serbian Bece*, cap. dist. of same name, 24 m. N.E. Novitsa, cap. dist. of same name, on the Theiss. Three battles in a row fought here—once in 1551 and the other two during the Hungarian insurrection in 1848 and 1849. It contains 11 222 inhabitants, a large proportion of whom live by fishing.

BECKZÖ, a *tu* Austrian empire, Hungary co. and 10 m. S.W. Trenčin on the Wang. It is surrounded by walls and otherwise defended has a Franciscan monastery a mountain castle, and a castellated mansion and contains 2250 inhabitants, who are chiefly employed in mechanical occupations.

BEDFORD.—1 A *tu* U States, Pennsylvania, cap. of same name, on a branch of the Juniata and of the Harrisburg and Pittsburgh railway, 80 m. S.E. Pittsburgh. It is celebrated for its mineral springs, which, together with scenery around it, have made it a favourite watering place. Pop. 1203.—2, A *vil* Indiana, near E. bank of White River 78 m. W.W. Indianapolis, on the railway from New Albany to Chicago. It is pleasantly situated on high ground and is a thriving place.

BEDMORE, BEDMORE NUGGET, or **HEBER NUGGET** [adj.] a *tu* India, prand Madras, Mysore, cap. dist. of same name, beautifully situated in the hollow of a rugged table-land of the W Ghats, at the height of 4000 ft. above the sea, 130 m. N.W. Seringapatam. Originally a village, it became in 1645 the capital of an independent prince who assumed the title of rajah of Bedmore. In consequence of this event it advanced with rapid strides, and ranked as one of the wealthiest and most splendid cities in the Deccan. Its prosperity had lasted for a century when it was suddenly arrested in 1763 by Hyder Ali, who took and pillaged it, obtaining a booty estimated at the incredible amount of 215,000 000 sterling. In 1783 a large British force, under Gen. Mathew, was obliged to surrender to vastly superior numbers under Tipoo, and all the principal officers were put to death, the rest of the force being cruelly treated. The town does not seem to have been ever regularly fortified, its principal defences consisting of a line of posts erected on the summits of the surrounding hills. It had, however, a citadel, which stood on a bold eminence and contained the rajah's palace. The latter is now in ruins, but the former is still tolerably entire. All other signs of grandeur have disappeared, and the place has declined down to a mere village. Bedmore is remarkable for the luxury of its climate. According to Wilks, who visited the place in 1804, every year and the country becomes so completely desolated that the inhabitants lay in a state of six months' provision. The extensive

meadows and heat produce a very luxuriant vegetation, and the surrounding district is covered with magnificent forests, with a dense and tangled undergrowth, which makes them almost inaccessible.

BEER, a *co.* Austria empire, Hungary about 35 m. S. of Vienna and with the ruins of an old castle and glass-works. Pop. 1480.

BEEMA, a river S. India, which rises in the table-land of the W. Ghats, 2090 ft. above the sea, about 50 m. E. Bombay flows easterly S.E., receiving the Nera on its E. and the Soma on its W. bank and after a course of about 500 m., joins the Kistna in lat. 16 34' lon 77° 20'.

BESULNUGGAR, or **BUSANNA**, a *tn* India Gujarat, 120 m. N.W. Baroda. It has manufactures of cotton cloth, and a considerable transit trade in forwarding iron and other heavy goods to Marwar. Pop. 18,000.

BESULPOOR two places, India.—1 A *tn* Rajpoot ana, state and 18 m. E. Jodhpur. It is supplied with water from seventy wells possesses a bazaar of 100 shops, and has a pop. of about 4000.—2 A *tn* N.W. Province Rohilund dist. and 25 m. S.W. Bareilly in an open fertile and well-cultivated country. It possesses a good bazaar. Pop. 7345.

BEISHÉ or **Beas**, a *tn* Archa, Yason in a large valley well watered by streams and wells and abounding with gardens 180 m. N.W. Sam. It is regarded as the key of Yason, and is a place of some extent surrounded by lofty walls and a ditch and defended by a strong castle. Its houses are well built. The environs are covered with groves of date-trees.

BEIT HAKARIEH a *vil* Palestine about 10 m. S.W. Jerusalem on a high and almost isolated promontory overlooking the western region of lower hills. It appears to have been once a strong and impregnable fortress, and is believed both from its name and position to be the *Beth-Zacharia* of Josephus and the *Hebron* of the Hebrews.

BELA two *tns*. Austria empire, Hungary.—1 Co Zips, 6 m. N. Kassak. It is one of the Zips royal towns; and has important manufactures of linen a trade in flax, a sulphur spring gin distilleries and five yearly markets. Pop. 2167 mostly Lutherans.—2 Co Alaud Toros, 7 m. N.W. Keszten with 1000 inhabitants, employed in mining iron silver and copper ore.

BELAT a *vil* Palestine, near the S.E. extremity of Lebanon on the edge of a precipitous bank 800 ft. above the Lebanon which has its course in the chain below. In its vicinity are the columns and architrave of an ancient temple.

BILBEK or **KARABAY**, a river Russia, in the S. of the Crimea, rises in a slope of the Yalta Mountains flows first N.W. then turns gradually W.S.W. and falls into the Black Sea 3 m. N. Sevastopol. In its upper course it forms small cascades among densely wooded valleys, and is usually called the Kabarta. At Alhat, where the Belbek proper commences, it rushes between a continuous chain of wild ravines and tall carcase heights of fantastic shape. Near its mouth these heights terminate in abrupt slopes.

BELCHERTOWN a *vil* U. States, Massachusetts in the N. part of co. Hampshire, 70 m. W. by S. Boston. It possesses a classical school and has a carriage factory of some celebrity. P. 2698.

BELLE KOLE, a *tn* Central Africa, near the S.E. frontier of Magdral. Native information describes it as a place of extraordinary natural strength. It stands in a kind of circle inclosed by rocky ridges, abutting on each other in such a way as to leave only a single approach. The inhabitants, belonging to the Bahr, dwell between the rocky ridges, and their prizes on an eminence near the centre of this remarkable basin, which is well supplied with water.

BELGAUM (add.) a town India, presid Bombay 204 m. S.E. Bombay 43 m. N.W. Barwar, 2600 ft. above the sea. Great improvements to the roads of the town and neighbourhood were undertaken by the Government aided by the Government in 1843, and others have been proceeding under sanction.

From Enc. clau.—Vol. I.

of the authorities. A church, for the emp., additions to the European hospital, and a dispensary are among them. A college for the sons of the upper and middle classes of the native was founded by government in 1864, and has advanced favourably in both numbers and efficiency the pupils being 96 in 1869 against 68 in the previous year. The dock, which is of an oval shape, is about 1000 yds. long and 700 yds. broad, and contains an arsenal and the various military quarters and stores, in which improvements have been made one of the old barracks has been converted into a library and school-room.

BELGIUM (add.) *Population*.—The population of Belgium has increased very steadily since the establishment of the kingdom in 1830 the tendency apparent in most European countries, to an aggregation of people in large towns, being very visible in Belgium. The following statistics exhibit this.—

Provinces.	Population.	
	1856.	1869.
Antwerp.	484,416	685,008
Brabant.	748,244	856,174
W. Flanders.	594,312	647,771
N. Flanders.	770,800	819,558
Hainaut.	708,076	846,812
Lige.	501,906	544,818
Limbourg.	191,708	197,916
Luxembourg.	128,758	204,497
Namur.	206,715	254,566
Total.	4,632,600	5,488,666

* On January 1 1864 the population was estimated at 4,564,671 so that, the area being 11,350 sq. m. the density of the population, 440 per sq. m. is greater than that of any other country in the world.

Amongst the population there were according to the census of 1869—

French	61,400	British	4,091
Dutch	49,322	Other nations	4,781
German	18,943		

About 3,500,000 are Flemish.

According to a semi-official statement in 1857 there were 908 000 families in Belgium, of which 89 600 were in good circumstances, 878 000 in straitened (poor) condition, and 446 000 in poverty the known beggars were said to amount to 88 019 of whom 48 041 were males.

The following towns had the population annexed in 1869:—

Brussels	151,799	Tournay	81,116	Lokum	37,327
Ghent	127,568	Verrier	26,264	Tyres	17,100
Antwerp	117,524	Mons	26,043	Orléans	17,159
Lige	99,003	Namur	23,289	Lierre	14,791
Bruges	60,647	St. Nicholas	23,281	Charleroi	18,064
Malines	64,445	Courcel	24,503	Turnhout	18,008
Leu. st.	54,371	Alind	19,983	Brussels	14,183

With the adjacent communes Brussels had 260 001 inhabitants.

Trade and Commerce.—The merchant service of the kingdom numbered, on 31st December 1862 188 sailing vessels, of 89 279 tons, and seven steam vessels of 5771 tons. In 1868 it fell lower still viz to 103 vessels measuring 27 947 tons.

The following tables will show the condition of commerce in the years 1859-61.—

	1859	1860.	1861
Imports (including Transit):—			
By sea.	—	11,158,715	12,456,444
By land and river.	—	26,004,798	26,260,550
Total.	—	37,163,513	38,716,994
Exports (including Transit):—			
By sea.	—	11,048,608	11,211,840
By land and river.	—	26,004,798	26,260,550
Total.	—	37,163,513	38,716,994
Vessels entered at Belgian ports:—			
No. Tons.	No. Tons.	No. Tons.	No. Tons.
270 74,500	463 75,700	—	—
2,220 202,141	2,319 209,481	—	—
Total.	2,490 276,641	2,782 285,181	—
Vessels cleared from Belgian ports:—			
No. Tons.	No. Tons.	No. Tons.	No. Tons.
474 74,500	467 75,700	—	—
2,244 202,141	2,319 209,481	—	—
Total.	2,718 283,641	2,786 285,181	—

The general commerce of the year 1863, i.e. the imports of all kinds, whether for home consumption, transit, or export, in conjunction with the exports of all kinds, whether of Belgian or foreign produce, amounted to an aggregate value of 233,400,000, exceeding by 14 per cent. that of 1861. The imports and exports about a constant magnitude, the former being uniformly in excess of the latter. The commerce of 1864 is known to have surpassed that of any former year. In that year the quantity of salt imported from England was 22,000 tons; from France, 18,450 tons and from other countries, 1875 tons; total 43,325 tons. The produce of sugar from beet-root has rapidly increased, the quantity manufactured in 1863 being upwards of 430,000 cwt. of which 96,490 cwt. was exported to England. In 1863 and 1868 respectively the number of vessels entering Belgian ports was 8353 and 8993, about one-half of which were British and from English ports the tonnage in each of the two years being 694,900 and 713,372. Two new lines of steam packets, from Newcastle and Harbottle were opened to Antwerp in 1863.

The commerce of the kingdom was greatly relieved by the redemption of the Scheldt toll by the treaty of July 10, 1868. The maritime nations combined to relieve the Belgian treasury of an annual charge of about £76,000 by a contribution raised among themselves—England a quota being £546,000. At the same time the foreign duty was abolished and the pilot dues were reduced, rendering Antwerp one of the least expensive ports for shipping. In the same year commercial treaties were concluded with all the most important foreign nations and on April 12 1864 a law was promulgated admitting the free importation of foreign-built vessels, and remitting all duties on timber used in shipbuilding and on Nov 8 1864, a convention was framed between Belgium, France, Great Britain, and the Netherlands, revising the system of duties on refined and unrefined sugars, with a view to the relief and expansion of the sugar trade.

Finances.—The budget of 1868 and 1869 estimated the total revenues at 156,848,790 francs, and 167,782,790 francs respectively and the total expenditures at 151,120,844 francs, and 151,778,575 francs respectively. The state is the proprietor of 467 miles of railway being nearly one-half of the whole length in the kingdom; the other half is in the hands of companies whose rights will lapse to the state after specified terms of years. The net revenues of the state have been devoted to the gradual redemption of the debt incurred in their construction, which, with the current rate of profit, is estimated to be effected in about twenty years from this time (1863).

BELLARY [adj.], a tn. British India, presid. and 373 on N W Malabar, cap. dist. of same name. It consists of two forts, a cantonment, and a petty or native town. The upper fort crowns a bare granite hill, of an oblong or rather semi-circular form, which rises abruptly from the plain to the height of 450 ft., and is about 2 m. in circuit. It is surrounded by a stone rampart, but has no accommodations for a garrison. The other fort, seated lower down, near the base of the same rock, between the N.W. and N.E. angles, has a dry ditch and several walls of stone and is enclosed by a wall surrounded at intervals by low towers. It is of a quadrangular shape, about half a mile in diameter and contains the arsenal and commissariat stores, barracks, a Protestant church, and a number of bungalows intended for officers, but seldom used by them. The cantonment occupies the plain around the rock. The bungalows of the officers are not white buildings, with tiled roofs, and the houses are ornamented with rows of trees. The cantonment, jail and hospital are situated in one large compound, about half a mile E. of the fort. In the same locality, on the S.E., is the native town, which is modern, and presents a good aspect. It is mostly of recent origin, and had no proper existence till 1816, when the native population gradually inhabiting the forts were removed to it at the expense of government. Pop. exclusive of military about 31,000.

BELLA VISTA a tn. E. America, La Plata, prov. and 70 m. S. Corrientes, 1 bank Parana, on an elevated flat overlooking the river lat. 28° 30' S., lon. 58° 15' W. It is the cap. of a dist. and possesses a church and a place. Orange and pomelo of excellent quality abound. Immediately above and below Bella Vista the navigation of the Parana is ob-

structed by numerous islands. Pop. 1000, chiefly engaged in agricultural pursuits.

BELLEFONTAINE, a tn U States, Ohio, reg. on Logan, 116 m. N.W.E. Cincinnati, and a junction on the Cincinnati and Sandusky railway. It is a farming place, containing stone-mills, foundries, and has a considerable trade in the produce of the surrounding district. The town is taken from some fine springs of water in the vicinity.

BELLEFONTAINE, a tn U States, Pennsylvania, cap. on Centre, 86 m. N.W. Harrisburg, on Spring Creek, situated at the foot of Bald Eagle Mountain, it is surrounded with hills, and takes its name from a large spring from which water is supplied to all parts of the town. The creek also affords abundant water-power which is applied to various manufactures. A canal carries iron and grain to the Susquehanna River and iron is wrought in foundries and other works.

BELLE ISLE [adj.], an isl. and count. British America.—The island, situated in the N.E. entrance of the strait, 2 m. E. of the coast of Labrador and 3 m. N. of that of Newfoundland, is about 9½ m. long in an E.N.E. direction, and 3 m. wide. It is composed of a range of hills, which are bare of trees, and rise to the height of 700 ft. These hills are chiefly of granite, alternating with clay and slate, and have steep sides which dip into the sea at every part, except the N.E. end, where the convergence of two low points forms St. John's Cove, which shelters small fishing boats during the three months of summer. On the S. side there is hardly a creek where a boat might be saved. On this side the bottom is always rock, but on the N. side it is sometimes sand. On the S.W. point of the isl. there is a circular stone lighthouse fixed with white fire-brick and 63 ft. high. This height added to that of its site makes the total elevation 470 ft. above the sea, and renders the light—a fixed white—visible in clear weather at the distance of 28 m. The great height of the light has been complained of as a serious defect, on the ground that it is often obscured by land fog when lower down the horizon is clear. In foggy weather a light is first seen from the lighthouse.—The strait separating the coast of Labrador from that of Newfoundland, and connecting the Gulf of St. Lawrence with the ocean is at its N.E. entrance, between York Point and Cape Baid, 26 m., and at its S.W. entrance between Greely Island and Ferrolle Point, nearly 21 m. wide. At Amour Point, in Forteau Bay where it is narrowest, its width is only 9½ m. Its total length is 66 m. On the Newfoundland side the strait is a low coast of limestone, partially wooded with spruce trees, and with no good anchorage for large ships except in St. Margaret's Bay. The Labrador side has steep granite shores as far W as Cape Diabla, where sandstone commences, and continuing to Grand Point, at the W. entrance occasionally forms magnificent cliffs several hundred feet in height. On this side too the water is deepest, varying from between 60 and 70 to 20 fathoms, and there are several good roadsteads. The strait is much encumbered with ice, which is carried into it by an irregular current, and which often reduces the water in summer to the freezing point. The current and icebergs render the navigation very difficult and dangerous.

BELLEVILLE, a tn U States, Illinois, cap. on St. Clair 16 m. S.W. St. Louis, with which it is connected by a branch railway. The district is very fertile, and there are beds of stone-coal said to be 80 ft. in thickness, in the vicinity. The town is active in trade and manufactures, and is rising in population and importance.

BELLEVILLE, a tn. British America, Canada West, cap. on Hastings, on both sides of the Mohr, near its mouth in the Bay of Quinte, and on the Grand Trunk railway 100 m. E.N.E. Toronto. It has three churches—Episcopal, Methodist, and R. Catholic, a grammar school, a Surgery Association, a mechanics' institute, a bank agency, and two weekly newspapers. The principal industrial establishments are saw-mills, an iron-furnace and machine-works turner's, and soap and candle factories and there is a considerable trade both import and export, the staple articles of the latter being lumber, flour and other agricultural produce. Maritime questions have been opened in the vicinity. Pop. about 7000.

BELLLOT a strait, Arctic regions, situated about lat. 72° N. lon. 60° W., is 12 m. long, and is named in honour of Lieutenant Bellot, a French naval officer, who had generously volunteered to assist in the search for Sir John Franklin,

and unfortunately perished, by falling between two hammocks of ice, while engaged in performing an important and arduous service. The next morning a further interest, from the two boats—first, that crossing Bouchie Falls on the N. from N. Sunset on the N. it forms the extreme N. boundary of the American continent; and that, according to Prince Rupert Inlet with the sea to the W. it forms part of the channel by which the north-west passage, now ascertained to exist, must be actually navigated. The possibility of navigating it was proved by Sir F. L. McClintock, in 1857 though the task is doubtless of a very formidable description in consequence partly of the high granite rocks which line its shores, and the strong tides which sweep through it.

BELLOW FALLS, a village, U. States Vermont, co. Windham, 80 miles S. by W. Montpelier right bank Connecticut River in which, opposite the village, are several falls having a total descent 44 ft. in half a mile. Around the falls a canal has been cut in the rock, and a bridge spans the river. The village, situated at the intersection of the railway from Boston to Montreal has beautiful scenery and a medicinal spring.

BELETA, a town, Austrian empire Hungary on Slavaya 40 m S. E. of Kiskun, near the borders of Slavonia and the Banat, with a castle built by Prince Eugene & trade in corn and cattle, and a starogon factory.

BELOIT, a vil. U. States, Wisconsin, on a beautiful plain ascending gradually from a bank Rock River 40 m S. Madison. It is well built, containing several handsome streets, and possesses several fine churches, a college, and several other schools; manufactures of woollen goods, reaping

winnings, and other machinery; timbering, saw and flour mills, and a considerable trade. By means of railways is communicated both with the Mississippi and Lake Michigan. Pop. 4947.

BELEI a town, Russia, gov. Rensburg, esp. circle Jany on the Bank, on alluvial of the Dnieper 60 m. N. N. W. Kishinev. It has two churches, a circle and a Lancasterian school several manufacturers, and a yearly market. Pop. 5881.

BENEDETTO (San) a town, Austrian Italy prov. and 10 m. S. E. Mantua, near a bank Po, in a marshy district. It is the seat of a court of justice, and has several churches. Pop. 8000.

BENESCHAU two vills, Bohemia—I. Circle Budweis with woollen spinning. Pop. 2074.—E. Circle Tabor east of the district court; with a Placiat college, and manufactures of excellent paper and leather. Pop. 8169.

BENEST, a vil. France, dep. Charente, near Confolens, surrounded by chestnut woods. Here Charlemagne gained an important victory over the Saracens. Pop. 1410.

BENGAL [add] presidency India. *Commerce and Trade*.—The extinction of the rule of the East India Company and the assumption of the supreme power by the British Government in 1858, consequent on the rebellion of 1857-8, introduced great changes in the policy of the administration. Many important alterations in the commercial relations were introduced and extensive works for the development of the resources of the country were instituted. The statistics which follow are therefore of more than ordinary interest, as showing the progress of this change.—

Railways.—On 31st December, 1902 there were 1181 m. of railway completed, and 563 m. more in course of construction in Bengal and the N.W. Provinces. Upon the 903 m. open for traffic in the year ending 30th June, 1902 8,478,650 passengers were conveyed, and the receipts for passengers were £287,510 and for goods traffic £406,790 together £694,300. The working expenses £434,870, leaving a surplus revenue of £259,430. The cost of construction up to the end of 1902 was £24,804,710.

BENICULA [add.] a town in the Affric, Portuguese settlement, cap. dist. of same name, in a large plain on a bay of the Atlantic lat. 12 35 S. lon. 15 22 E. It consists of well built houses for the most part of a single story and roofed with tiles. The streets, unpaved but clean, are wide and regular generally intersecting each other at right angles and lined on both sides with fine trees which afford an agreeable shade and give the place a pleasing appearance. The principal public buildings are the church with two towers the governor's palace, the townhouse, and custom house. Trade is very limited, and only shows some activity from time to time when the caravans arrive, bringing ivory, wax, gum copal, and urania, a dye-wood, which form the principal exports. The climate is very unhealthy. The pop. which has greatly diminished since the abolition of the slave trade is estimated at 3000 all natives except a few mulattoes, and still fewer whites.

BENICIA [add.] a town in U. States California, cap. co. of same name, on the Strait of Carquinez between the Pablo and the Suisun Bays. It once rivalled as the capital of California, and was then provided with several large hotels and some important public buildings. Among the latter the capitol, a brick building faced with stone, and situated on a slope, still makes a conspicuous appearance. The other buildings, all of wood have a neat appearance. The works of the Pacific Mail Steam Company a navy station and an arsenal are within the town, or in its vicinity. The harbour admits vessels of the largest size. Pop. about 2000.

BENI FERRAH a town in Africa, Algeria, pleasantly situated near the summit of a steep rock, near Oran. It is built in the form of an amphitheatre, but very irregularly and consists of about 500 houses, constructed partly of earth and partly of stone, with flat roofs formed of something with a coating of gypsum. It is entered by three gates, one at the foot of the precipice, and the other two opening respectively on the E. and W. slopes. The streets are extremely narrow having often a breadth of not more than 4 ft. To make matters worse, the roofs project so far as nearly to meet, and thus leave beneath a mere lane which neither air nor light can enter. The inhabitants, about 1000, confine themselves almost exclusively to agriculture and the raising of bees.

BERNOLD a valley, N Africa, gov Tripoli, near the commencement of the desert. It is about 14 m. long from W to E, and has both its slopes covered with villages, while the bottom is covered with forests of palms and olive trees. The eastern outlet is defended by a castle. Its inhabitants, about 5000 Arabs of the Urfila tribe, possess 12,000 head of camels.

BERNICH a tn Austrian empire, Bohemia, cap. dist of same name, 12 m. N W Troppau with manufactures of cotton and linen goods, a trade in linen and yarn, and four yearly markets. There are mines of lead and silver in the vicinity. Pop. 3319

BERNEN a tn Austrian empire, Bohemia, circle and 16 m. N N.E. Leitmeritz, r bank Pilsener; with a parish church, two castles, two hospitals, a brewery and a cotton and a paper mill. Pop. 1500

BERNION a vil U States Wisconsin, co. Lafayette, 18 m. N Gilman. It is a flourishing place which owes its prosperity to the lead mines which are extensively worked in the surrounding district. Pop. 2318

BERNTWE or **BERNU**, a river N Africa forming the E. branch of the Kwara or Niger. It for some time bore the name of the Chadde, apparently for no better reason than that it had been erroneously represented as an outlet of Lake Chad, but now that the error has been discovered, the name of Chadde will doubtless be abandoned and only that of Benue or Benue, used by the natives and meaning the Mother of Waters, be retained. The source of the Benue is yet unknown but Dr Barth who came upon it in 1851 while travelling in Adamawa, saw the confluence of the Furo which joins it on its L. bank about lat. 12. 30' E. was told that it comes from the S E a distance of nine days journey. In consequence of this discovery an expedition was fitted out by the British government for the purpose of exploring its Kwara from its mouth upwards, and thereafter tracing the course of the Chadde then only conjectured, but not actually known to be identical with the Benue.

Captain Beccurt, already known as an African traveller was appointed to the command of this expedition, but, in consequence of his death, the command devolved on Dr W H Allen Balfour Baikie, whose previous appointment was that of medical officer and naturalist. The expedition was made in a small steamer called the *Placid*. After reaching the point of confluence of the Benue with the Niger about lat. 7. 40' N Dr Baikie followed the former eastward for a direct distance of about 370 m. The point time reached was about lat. 9. 25' N lon 11. 50' E and 50 m. below the junction of the Furo. He had been obliged to leave the steamer and perform a few of the last miles in the gig but there was sufficient depth of water though the rig was only rising to allow a still further exploration. The natives, however had begun to display their hostility in such a manner as made it necessary to return. The result has been to prove that a large, fertile and populous tract of a region of Africa, hitherto in a great measure unknown, is accessible by means of a navigable river.

BERAR (add & a large prov) Hindoostan in the Deccan was incorporated into the British dominions in the year 1854, on the death of theajah Bajah Ba Boshah.

BERBERA, **Berzura**, or **El-Maxari** a tn Africa, Jubba, cap. prov. of same name, r bank N. lat. 17. 58' N lon 84. E. It stands on a slope on a spot which is gravelly and steeple, with the exception of a narrow strip close to the river. This is laid out in gardens well-stocked with the date-palm and various other fruit-trees—the orange lemon, lime, fig, pomegranate, vine, and banana. The houses generally built of sun-dried bricks, and plastered over with a composition of manure and sand to protect them against the rain of the wet season consist for the most part of one large lofty room, with a wooden column in the centre, on which the large transverse beam carrying the roof rests, and of one or two small rooms on either side of it, used for stores. The windows are merely small apertures high up in the walls. Even these are often wanting, and then the door is the only opening for access, light, and air. Among the more substantial houses, the kitchen is in a separate hut. The only public buildings worthy of notice are the mosque or government house, a spacious building of red brick, flat-roofed like the other houses, and containing a number of apartments all on

one floor which is raised about three feet above the level of the ground; and the bazaar, consisting of a long row of small uncovered shops on each side of the principal street, and abundantly supplied with every necessary. The usual food of the natives is *sanda*, consisting of maize or millet flour boiled into thick porridge, and turned out into a wooden bowl, heaped up into a cone and surrounded with a sauce made of a powdered glutinous vegetable called the *baghah*, and pounded dry beef, highly seasoned with salt, peppers, onions, and aromatic herbs. This compound is served first to the male part of the family and not till they have finished to the female. In eating it they sit on the ground in a circle, and use only the fingers, each morsel of the porridge being dipped in the sauce. Pop variously estimated from 10 000 to 50 000.—(Petherick.)

BERCHSEL, a tn Austrian empire Hungary co. Neograd, N Balassa-Gyarmath in a fertile district, with 1500 inhabitants who are mostly employed in the culture of the vine.

BEREE, a tn India, N W Province, dist. and 22 m. S E W Rohilk, and 45 m. W Delhi. It was made over by the Mahabats to the adventurer George Thomas who took forcible possession of it, and extorted the Rajpoot garrison. The roads are good and there is an ample supply of water. Pop. 5597

BEREMEND a tn Austrian empire, Hungary co. Baranya, about 18 m. S. by W Pilsfichirath with lime-kilns, and a trade in corn, wine, swine, and burned cattle. Pop. 1370 Hungarians, Germans, and Serbs

BERENTY (Cakay) a tn Austrian empire, Hungary co. and 8 m. N W Stuhlensburgh with 1700 inhabitants who are mostly Protestants and engaged in weaving, or in cultivating the vine

BERGHOLTZ or **NEW BERGHOLTZ**, a vil U States, New York, about 15 m. N Buffalo. It was settled in 1843 by Lutheran emigrants from the town of same name in Prussia. Pop. about 2000

BERGSTADT a tn Austrian empire, Moravia, circle and 30 m. N Olmutz, with cattle and old or rusty ironworks, linen weaving and iron mining. Gold and silver were once worked here. Pop. 1500

BERHAMPORE a tn India, presid. Madras dist. and 25 m. W S W Gajiam lat. 19. 20' N lon 84. 50' E. It stands on a rocky ledge, surrounded by an extensive cultivated plain and consists of a cantonment and a native town. The former occupies a dry and gravelly plot pierced in all directions by rocks of granite, but the only buildings of importance are the officers' houses which though built of mud plastered over wattle, and thatched are comfortable dwellings, and particularly cool the bomb-proof magazine, and the hospital. The native town consists of narrow dirty streets, and houses built occasionally of brick, but for the most part only of mud. The bazaars are well supplied with all sorts of grain most fish &c. and its manufactures which are extensive, consist chiefly of silk and cotton tissues, sugar and sugar-candy. An excellent macadamised road has been made from it to Rameswaram, a distance of about 45 m. at a cost of £15 000. The climate is generally healthy but in April and May fevers and rheumatism prevail. Pop. of native town 20 000

BERHOMLTH a tn Austrian empire, Bukovina dist. and about 23 m. W B W Casimirovitz on the Berwick with rich seams of iron-ore. In the vicinity there is an establishment for the cold-water and the milk cure. Pop. 2108

BERI the name of two places Central Africa, prov. Kanem on the N shore of Lake Chad lat. 14. 40' N lon. 18. 40' E. The one place, from being the more important of the two is called Beri-kura, or the Great Beri and the other, which has been greatly reduced is called Beri-fut, or Western Beri from its position relatively to the other. The greater part of the inhabitants are Kanembu, of the Bagirmi clan. The situation of Beri gives it importance as a military station, as troops proceeding from Bornu into Kanem generally make a long stay at it to regain strength for the ensuing march, and lay in a stock of fresh provisions.

BERIEFNA, a tn N Africa, Algerian Sahara, on the E. slope of the Ualeid Sidi Sheikh Shergau, 190 m. E. Orleansville; lat. 28. 24' N, lon. 1. 18' E. It is the largest place in the district, containing 150 houses is surrounded by a

cruciform wall, and has a public square, on which a market is held. Agriculture is the chief employment; but some of the inhabitants manufacture gunpowder.

BERLAT or **Berlar** a *tu*. Turkey in Europe, Molavia, cap. d'Arda Tuzova, on a stream of same name, 22 m. S. Jany. It is the seat of a civil and criminal court, has a normal school and a hospital, and is an important entrepot for the corn trade with Galatz. Pop. 4000.

BERLOO a *tu*. Austria empire, Military Frontier, Croatia, dist. Otoczek, 49 m. S. S.W. Karlovatz; with a Greek non-united church, a trivial school and a castle and 1500 inhabitants.

BERNARDO (San), a *tu*. Chili prov. and 12 m. S.E.W. Santiago; lat. 33° 35' S. lon. 70° 40' W. It is built with considerable regularity along the sides of the public road, with considerable intervals between the houses for flower-gardens, and has its public square, municipal buildings and almshouse. The only industrial establishments are some small flour-mills driven by water. Pop. 3800.

BERNAU a *tu*. Austria empire, Bohemia, circle and 20 m. N.E. Eger, on the Erzgebirge, with 1550 inhabitants, the greater part of them employed in lace-making.

BERNDORF a *tu*. Austria empire, Bohemia, circle Gittulda, on a stream of same name; with a parish church and three mills. Pop. 1000.

BERNSTEIN a *tu*. Austria empire, Hungary co. Eisenburg 30 m. N.W. Steinamanger with an old castle seated on a rocky height, and once a place of strength along and violent works, manufactures of annaber and a mine of copper. Pop. 1150.

BERRY group of islands, West India, Bahamas. It consists of a number of small narrow wooded cays, which lie to the N. of Andros and New Providence and sweeping round to the eastward form nearly a semicircle 23 m. in diameter. Great Harbour Cay the largest of the group, is 4 m. long by 1 m. broad, and has few inhabitants.

BERSETH, a *tu*. Austria empire circle Liria, on the Bay of Quarnero. It is seated on a lofty height, and has an endowment for the poor and a harbour with some trade. Pop. 1100.

BERSEIMIS a river British America, Canada East, which, issuing from a lake 20 m. S. 70° W., flows S.E. and falls into the estuary of the St. Lawrence on its N. shore. It is nearly a mile wide at its mouth, but so shallow that this wide mouth is closed by sand, which dries at low water and leaves only a very narrow channel. There is also a bar of sand, which shifts frequently but over which, provided the proper channel is kept, a depth of 6 ft. can be carried at low water and from 13 to 18 ft. at high water according as it may be neap or spring tides. Within the entrance the width of the river varies from 700 to 800 yds., and the depth from 2 to 3 fathoms. The navigation is practicable for 30 m. of current and nearly 40 m. of indirect distance, and is then stopped by falls which have a descent of 30 to 40 ft. over rocks of granite. The Berseimis discharges a large volume of water, especially in spring.

BERTHIER two vils. Berthier America, Canada East—1 *Berthier-en-Haut*, of same name, 1. bank St. Lawrence 45 m. N.N.E. Montreal; with an English Episcopal and a R. Catholic church, a foundry, a tannery and an active trade in grain, flour and hay. Pop. about 1800.—2 *Berthier-en-Bas*, co. Montmagny 7 bank St. Lawrence 25 m. N.N.E. Quebec; with a R. Catholic chapel and a trade in flour and lumber. Pop. about 1500.

BERZENECZ, a *tu*. Austria empire, Hungary co. Somogy 83 m. S.W. Kaposvar near 1. bank Mar. with a beautiful church, a fine modern mansion; the ruins of an old castle, and a large fish-pond. Pop. 2213.

BERZEVICKE, a *tu*. Austria empire, Hungary co. Sarva, on the Tura, N.W. Eperjes; with four churches, and several flour and saw mills; and 1400 inhabitants.

BERZENKEP a *tu*. Byria, Haroun, in the ancient land of Sushan, beautifully situated on the border of a wide green leading into the great plain below, near the mountain chain of Jolab-ed-Dum. Its climate is temperate, is indicated by the apparently ornamented house-dwellings, a beautiful temple, and numerous deeply cut Greek inscriptions; but it had long been uninhabited, till a body of Druses recently arrived and introduced its population. On this occasion it was shown by an inter-

esting example how perfectly ready the old houses of Sushan are to receive new tenants. "All that the Druses left to us," says Mr. Graham "was to throw down a piece of masonry, or those who could afford it, a piece of carpet, and to bring with them the few cooking utensils of which they had need. This furnished the entire furniture of the houses; they then shut their stone doors and were secure against any sudden attacks of the Arabs."

BERKEA BAY Asiatic Turkey coast of Asia Minor immediately N. of Isl. Tenosus, and S. of the Dardanelles. It is neither very commodious nor well sheltered, but was for some time the station of the allied British and French fleets before their entrance into the Black Sea, at the commencement of the Russian war.

BERKARABIA [add] By the treaty of Paris, of 1856, a rectification of the frontier of Bessarabia took place, by which, with the view of excluding Russia from the future control of the navigation of the Danube, a canon was obtained of the southern portion of its territory to Turkey. The new frontier between Russia and Turkey extends from the Black Sea, at the E. entrance of Lake Buzura Sola, northwards to the Akhman road follows the latter to the Wall of Tagian passes to the north of the town of Bolgrad, ascends the river Lalpach to Saratiska, and terminates at Kalamot on the Pruth. By this arrangement the mouth of the Danube are wholly within the Turkish territory and that river now forms the boundary between Moldavia and Bulgaria.

BESTENA (Novva) a *tu*. Austrian Italy prov. and N.E. Verona, with a fine waterfall on the Alps, and coal-mines. Pop. 2543.

BETHLEH, a *tu*. U States Missouri, on the N. fork of North River 98 m. N.N.E. Jefferson. It contains 1000 inhabitants, almost all Germans, who have erected a handsome church, and possess a glove-factory and several mills.

BETLER, a *tu*. Austria empire, Hungary co. Güns about 6 m. N.W. Rosenau; with a beautiful castle and park belonging to Count Andorffy brownworks and mines of iron and antimony. Pop. 1000 mostly Lutherans.

BETTIAR or **Bettiar** a *tu*. India, presid. Bengal dist. Baran 96 m. N.W. Patna. It is a considerable place, and possesses a large stone fort with bastions and towers.

BETWA or **Bettwa** a river India, Malwa, which rises a little to the S. of Bhopal, flows N.E. into Sindhia's Dominions enters Bundelkand, and proceeding through it in a very tortuous course, joins the Jumna on its R. bank at Humeepoor. Its total length is about 800 m., but its channel is so obstructed by loose rocks and stones that it is nowhere navigable. During the rainy season it is from a mile to two miles wide and runs with a velocity varying from 8 to 9 miles an hour. Even during the dry season it is half a mile wide at its junction with the Jumna, but so shallow as to be generally fordable.

BETPOOR a *tu*. India, presid. Madras, dist. Malabar 7 bank estuary of the Sharpey, 405 m. (by rail) S.W. Madras. It is the terminal station of the Madras railway. The situation of the town is very beautiful and endeavours have been made to give it importance as a port, but a bar at the entrance of the river over which vessels drawing more than 12 or 13 feet of water have to be floated is a great impediment. The chief exportation is that of the timber brought down the river from the teak forests in the ghats of the interior. Iron ore has also been found in the neighbourhood, and smelted in furnaces that have been erected for the purpose producing iron of good quality. The railway has added greatly to its activity and importance.

BEZAU a *tu*. Austria empire, Vorarlberg, circle and 18 m. S.E. Drogen, in a valley; with a Capuchin monastery founded in 1656, an infirmary a poor-house, an orphan asylum, and manufactures of cotton cloth. Pop. 1000.

BHANPOORA a *tu*. India, Holkar's Dominions, 38 m. E. Neemuch, on the Bara, at the foot of a ridge of hills. It is surrounded by a wall, and has a stone fort, with a palace inside, but both neglected. In the palace there is of the marble statues of Jivarnat Han Holkar, by whom both the palace and the fort were constructed. Pop. about 30,000.

BHEEM GHORA, India, presid. Bengal, prov. and 106 m. N.E. Delhi, and 1 m. N.W. Haridwar (by rail) is a place famous for the religious ceremony of bathing in the Ganges, a pool being supplied with water from a small

mouth of this river, in a small cove of the mountain overlooking the Dehra Doon on the S. An adventure in the rock, about 5 ft. sq. occupied by a lakor is said to have been formed accidentally by a kick of the horse on which Bhenu was mounted when placed here to prevent the Ganges taking another course.

BHILSA, or **BHILA** [add.] a tn. India, Solinda's Dominions, on a trap rock r. bank Dehra, 280 m. S.W. Allahabad. It consists of a town, a fort inclosed by a ditch and by a stone wall surmounted by square towers and a suburb which has some spacious streets lined with good houses. One of the curiosities of the place is a gun of the finest brass measuring 12½ ft. in length with a bore of 10 inches elegantly perforated, highly ornamented and said to have been made by order of the Moghal emperor Jahangir. The finest tobacco in India is produced in the vicinity of Bhilsa. On an isolated hill 4½ m. to the S.W. are some very large and remarkable ancient monuments. One of the principal is a hemisphere 70 or 80 ft. in perpendicular height, constructed of thin layers of freestone ornamented but it stands upon a circular base 554 ft. in circumference, and 12 ft. high, overlaid with a coat of mortar. Its summit is a flat horizontal space 85 ft. in diameter is surmounted with the ruined fragments of a spire. It is surrounded with four gateways, opposite each of which is a colossal statue of Buddha. On many parts of the hill are inscriptions in the Pall character.

BHIND a tn. India, Solinda's Dominions 49 m. N.E. Gwalior. Though now decayed it was once an important and populous place, with a fort inclosed by a double rampart, the inner of masonry and the outer of mud, and flanked with towers. In a pleasure-ground near the town are three fine buildings supported on columns and arches of stone.

BHUPPOOR, two places, India.—1. A tn. N.W. Prome, dist. and 9 m. N. Moradabad. It was once a flourishing place, but was ruined during the Rohilla war. It possesses a mosque and a bazaar and still maintains cotton plain and dyed, to a considerable extent. Sugar-cane is extensively grown in the vicinity.—2. A town presid. Bengal district Shahabad 69 m. W. Dinapore. It is the capital of a pergunnah of same name and contains about 1000 inhabitants.

BHOOPAL [add.] a state and tn. India. The state presid. Bengal under the political superintendence of the governor general, has between lat. 22° 32' and 22° 45' N. lon 76° 25' and 78° 50' E. length E to W 157 m. breadth 76 m. area, 6764 sq. m. The Vindhya range which traverses the state from N.E. to S.W. divides it into two unequal portions. The latter and more southerly portion belongs to the valley of the Narmada. The far larger portion, situated on the other side of the range, is a table-land sloping northward and is drained chiefly by the Betwa and its tributary Damsa, the Parvati and the Narmad. The prevailing geological formation is trap, overlying sandstone, and containing some indurated iron ore but, so far as is known, no other minerals of any importance, except rock-salt, which is met with in the vicinity of the town of Bhopal and coal found in the S. The Betwa, formed chiefly of disintegrated trap, is very fertile. Pop. 663,871.—The town, capital of the above state situated 100 m. N.E. E. Oryen, is surrounded by a stone wall about 2 m. in circuit inclosing a fort also of stone, but in a dilapidated state. Outside the town, on a large mass of rock, is another fort, with square towers, containing the nabob's palace. The commercial quarter of the town has wide streets, but presents few indications of activity and tells rather of a past than of a present prosperity. During the mutiny in 1857-8 the rebel sepoy several times attempted to occupy the town, but were successfully repelled by the inhabitants.

BHOOR GHAT a mountain pass, 6 m. long, India, presid. Bombay dist. N. Concan about 40 m. S.E. Bombay being midway on the direct route from Bombay to Poona. It was formerly considered the key of the Deccan and a proposal was made to fortify the pass but an excellent road has since been made to traverse it, affording great facilities to both travellers and commerce, which are again greatly enhanced by the Ghats being upon the line of railway which is opened from Bombay to Poona and Solapur. The former is 68 miles (by rail) of 11½ m., and the latter 37½ m., with a probability of further extension.

BHUNEMANA, a tn. India, Nagpootan, state and 22 m. S. Jodhpur, in a depression traversed by a salalk; which is dry in summer but becomes a large torrent in the rainy season. It possesses a fort of sun-burnt brick with four bastions. Pop. 2600.

BIALYKAMIEH a tn. Austrian empire, Galicia, circle and about 13 m. N. N. E. Zlowow with an architecture of best-wood sugar chocolate, and chimney. Pop. 2745.

BIARMI or **BIARMA** a river India, which rises among the Vindhya Mountains in the Nagar and Merchuda territory at the height of 1700 ft. above the sea, flows N.E. for about 110 m., and joins the Sonar on its r. bank about 10 m. above the junction of the latter with the Cane. Its total descent during its course is 700 ft.

BIC, or **St. CATHARINE** a tn. British America, Canada West, co. Ramsey a bank St. Lawrence 160 m. N.E. Quebec. It is a well-built place with a R. Catholic chapel and a commodious harbour at which a great deal of lumber is shipped. Pop. about 8000.

BIC, an island, British America about 2½ m. off Cape Ariguole on the r. bank of the St. Lawrence 165 m. N.E. Quebec. It is only about 2 m. long and 1 m. broad, nowhere rises higher than 150 ft. above the sea, is composed of clay rocks, of which sections are seen on its shores, and is densely wooded, but not inhabited. Lying nearly in the fair way of the navigation of the St. Lawrence it attracts attention in consequence partly of the many dangers which surround it, and partly of the excellent anchorage which it affords under either extremity and also between it and the mainland, according to the wind. About ½ m. to the N. is another island called Biquette or Little Bic about ½ m. long by ½ broad. Shallow reefs and rocks above water contrast the intervening channel. A lighthouse has been erected on the W. point of Biquette, showing a white light, which is visible at the distance of 17 m. in clear weather. During fogs and snow-storms a gun is fired every hour.

BICSI a tn. Austrian empire, Hungary co. and 23 m. N.N.E. Temein, at the confluence of the Kollerswaka with the Waag. It has a ducal court, a castle numerous poteries and an important trade in wool. Pop. 2483.

BIDDEFORD a tn. U. States Maine, on the Saco close to the falls, and about 6 m. above its mouth on the Portland Saco and Portsmouth railway 12 m. S.W. Portland. It possesses several churches an academy and other excellent schools, a large iron foundry numerous cotton flour and saw mills and carries on an extensive trade, particularly in lumber. The falls, though furnishing valuable water-power seriously obstruct the navigation of the river and thus limit the foreign trade. Scarcely however has been the progress of the place that it nearly doubled its population in seven years from 1850 to 1857. In the former year it was 6095; in the latter 12 000. As Saco has immediately opposite on the river the two towns may be considered as one.

BIDJAN a river Chinese empire Manchouria, which rises in the Hingon or Kungun Mountains and flows S. to the Amoor which it joins on its l. bank, above the confluence of the Sonen. On the banks of the Ujien one of the principal articles, besides of silver are found.

BIECH, a tn. Austrian empire, Galicia, circle and 11 m. W. by S. Jaslo, cap. dist. of same name on the Rapa with a parish church in the old German style, with fine monuments a large and ancient townhouse, a castle a Franciscan monastery a richly endowed institute for the poor and a tolerably active trade in corn, flax, and linen. It was once surrounded with strong walls of which portions still remain, and under the Polish kings enjoyed many privileges which procured for it the name of *Freea Chroscia*. Pop. 2400.

BIELEBEI a tn. Russia, gov. Orenburg cap. circle of same name, on the Bielschika, 85 m. S.W. Ufa. It has a church, a charitable institute, and an important annual market, which lasts six days. Pop. 1838.

BIELEF [add.] a tn. Russia gov. 65 m. S.W. Tula, cap. circle of same name, on a height above l. bank Oka. It has nineteen churches, two monasteries, a chapel and a parish school, four benevolent institutes several manufactures, and an active trade. The empress Elizabeth died here on her return from Tiflis. Her body was taken to the city and was interred in a white house, and a monument has been erected to her. Pop. 7243.

BILITE [add.], a ts. Austrian empire, Moravia, cap. dist. same name, at the foot of the Carpathians, on the Elbe, opposite to the town of that name in Galicia, 351 m. by rail N.E. Vienna. It consists of the town proper and two suburbs, is the seat of several important public offices, and has Protestant and R. Catholic churches and schools, a beautiful castle, with a park, belonging to Prince Salizovsky an hospital, an infirmary, an orphan asylum, manufacturers of woollen and linen cloth, machines, and flannels, dyeworks, spinning mills, a trade in wool cloth, and Hungarian wine, and several important yearly markets. It is the principal entrepot of the rock salt of Gubins, for the supply of Moravia and Galicia, and has recently acquired great additional facilities of transport by the construction of a branch communicating with the Oderberg and Cracow railway. Pop. 8699 — Old Bilite, in the vicinity here a castle, and 2906 inhabitants.

BIGA DE LA PAZ, a ts. R. America, La Plata, prov. and 80 m. S.E. Mendoza, near I. bank Tunuyan, an affluent of the Desaguadero 1630 ft. above the sea; lat. 33° 50' S. lon. 67° 50' W. It is a considerable place, with spacious streets and many good houses. The most conspicuous building is the barracks, with a view of one of its walls being recently intended for defence, but evidently in such a state that a cannon ball striking it would lay it in ruins.

BIG BLACK RIVER, U. States, Mississippi rises in Co. Choctaw near the centre of the state, flows S.E.W. for about 300 m. and enters the Mississippi on its I. bank by two mouths, near Grand Gulf.

BIG BONE LICK, a salt spring, U. States co. Boone, in the S.E. of Kentucky is famous for the number of fossil bones of the mastodon and other animals found in its vicinity in a dark-colored bed, generally overlaid with gravel, and resting on blue clay.

BILIE, a territory S.W. Africa, Bechuanaland, between lat. 11 and 12° S. and lon. 16 and 18° E. area about 11 000 sq. m. The surface is generally undulating and exhibits an alternation of forests and grassy plains. The most elevated points are towards the N and W. In the former direction the Kanya Mountains attain the height of nearly 7000 ft., and in the latter is the remarkable plateau or steppe of Bechuanaland. The principal rivers are the Cossun, on the E. frontier, with its tributary Koksna, which flows northward, dividing the territory into two unequal portions, and the Cuito on the W. frontier. In the E. portion are several extensive pools or lakes, formed by the inundations of the Cossun. Most of these become nearly dry in the hot season, but one, called Lake Oriva, enclosed by the Duma and Kanya Mountains, has a considerable depth of water during the whole year and abounds with crocodiles. The climate is healthy and on the whole temperate rather cold than hot, but subject to sudden changes, which are trying to feeble constitutions. The inhabitants have few manufactures the only ones deserving of notice being coarse cottons, neat parti-coloured mats, and smith work. In the last they excel, and among other articles make muskets, which are well finished in everything but the bore. Trading is the favorite occupation, and is carried on to an extent, and with a skill and enterprise, not surpassed by any other people of S. Africa. The Bilie traders penetrate into the remotest parts of the interior carrying with them European goods, which they exchange for ivory wax, and slaves. There at least the two former as the last are now interdicted, they dispose of in the markets of Loanda or Benguela. The religion is a gross fetishism, in which the good and evil principles are represented and worshipped under the form of Noss, pastures, hyenas, serpents, crocodiles, &c. The government is an absolute despotism, the sovereign disposing at pleasure of the lives and property of his subjects though there are some old customs or laws which it would be dangerous for him to violate. Not his own but his sister's son, is his successor. Pop. about 150,000.

BILKOUR, a dist. and ts. India, N.W. Province, Bahadur. The mountain lies between lat. 28° 54' and 29° 22' N. lon. 78° 1' and 78° 55' E. and is bounded N. by Ghazipur, E. by Moradabad, and W. Mount, Musnadpur, and Saharunpur, area, 1904 sq. m. The surface is generally level, in the N. where it rises gradually towards the Himalayas, the greatest height does not exceed 1000 ft. above the sea. The soil is for the most part light and sandy but along the I. bank of the Ganges, and in the N., where it forms part of the

Tera, there is much rich marsh land. The principal crops are rice, millet, pulses, wheat, cotton, and sugar-cane. Pop. 330,548. — The river cap. of the above dist. and the residence of the British authorities, is situated near I. bank Ganges, 70 m. N.N. Delhi, and has an estimated pop. of 7280 — There is another Bilkour in Oude, 14 m. S. by W. Lucknow with a large bazar.

BILKOV a ts. Russia, gov. and 85 m. R. Mogilev cap. circle of same name, on the Dnieper in lat. 53° 20' N. lon. 30° 25' E., with six churches a Lancaster school a charitable endowment, several manufactures and a pop. of 6810.

BILKIV a river, Russian empire, Manchuria, which flows W. in an undivided stream through a valley about 3 m. wide, and joins the Ussuri on its R. bank, 180 m. above the junction of that river with the Amoor. Its whole course is about 165 m. It appears to be navigable. Its valley is bounded on both sides by picturesque mountains, and on its banks are six villages inhabited by a people called Orochi.

BILKUMPOOR, a ts. India, Rajpootana, state and 92 m. N.E. Jaisalmer lat. 27° 45' N. lon. 72° 15' E. It consists of about 120 houses, inhabited chiefly by Brahmins, who carry on an active trade between Bordin on the one hand, and Jaisalmer and Bikaner on the other and have 250 oxen employed in sowing crops. The principal buildings are two temples, of very great antiquity. Nearly contiguous to the town on the N.W. is a fort seated on an eminence. It is about 100 yards square, and is inclosed by a wall of rubble stone 25 ft. high, with very small bastions. At the N.E. angle a round tower of considerable height overlooks the surrounding hills. Though of imposing appearance, the fort is of little real strength, as a range of sand-hills at a short distance completely commands it. It is, however, manned with four guns, and garrisoned by 100 men.

BILCEE, a ts. Austrian empire, Galicia, circle and about 16 m. S. by E. Czortkow with an ancient castle. In the neighbouring mountains are several remarkable caverns with walls of pure alabaster. In some of them human bones, as well as those of wild animals, and Roman coins of the time of Hadrian, have been found. In the vicinity there is an instance of the Sisters of Mercy and an old castle, which was once the residence of a Russian prince. Pop. 3610.

BILINJIK, a ts. Asiatic Turkey, Anatolia, 100 m. S.E. Constantinople. It is finely situated on the side of a deep valley and contains about 800 houses, most of them of three stories, but by no means substantially built. The culture and preparation of silk is carried on to a great extent, and is exclusively in the hands of the Armenians who form the main bulk of the population. There is also an extensive trade in merchandise the material for which is obtained from pits situated at some distance in the direction of Samur Hissar. The 10 per cent. ad valorem duty levied by government yields a considerable revenue.

BILROUR, or BILROU, a ts. India, N.W. Province, dist. and 80 m. N.W. Cawnpore. It is the cap. of a pergunnah of same name, and contains 6045 inhabitants.

BILKE, a ts. Austrian empire Hungary, co. Ugocsa or Beregh-Ugocsa with iron mines and limestone quarries and 2081 inhabitants.

BILNITE, a ts. Austrian empire, Moravia circle and 14 m. N.E. Hradisch; with glass-works. The so-called Wharf. Then in the Carpathians, through which most of the caravans of the Turks and Hungarians were made in the seventeenth century is situated in the vicinity. Pop. 1500.

BIMLIPATAM, a ts. India, presid. Madras dist. and 15 m. N.E. Visapattinam, near the mouth of a small stream in the Bay of Bengal lat. 17° 55' N.; lon. 83° 30' E. It was once a Dutch settlement, the existence of which is still attested by an old cemetery with well-engraved tombstones bearing the date 1628 and was long celebrated for its cotton piece goods, which were largely exported by the E. India Company. Its trade, now limited is chiefly in the hands of native merchants. In the vicinity are three indigo factories, and at Chittavaram, about 5 m. distant, extensive sugar-works, with the most improved machinery.

BING-BONG, or TUNG-WANG, a ts. China, prov. Kiangsoo, on the Szechuan branch of the Yang-tse-Kiang W. of Shanghai. It occupies a central position on the sharp of a double of river, and has two navigable canals leading from it to all the important towns of the large and fertile plain

where it is situated. It is, however, a small place, though exhibiting many signs of commercial activity.

BINGHAMPTON, a *tu* U. States, New York, cap. co. Rome, at the junction of the Champlain and Mohawk rivers, and on the New York and Erie railway 140 m. N W New York. It is a well-built starting place, containing eighteen churches, and superior and ordinary schools, and carrying on an extensive trade in flour and lumber. Pop 5815.

BINTENNE, a *tu* Ceylon, cap. dist. of same name, on a wide level plain, in an angle formed by the Mahawelle Ganga, where it turns suddenly S. in the direction of Trincomalee, 60 m. E by N Kandy lat. 7° 21' N lon. 81° 4' E. It is among the most ancient places of Ceylon and began to flourish under the name of Mahayagama at least three centuries before the Christian era. At present it is a more vil lage, consisting of about thirty miserable houses. The only rule of any consequence which remains to attest its former greatness is that of a very ancient dagoba, in the form of a huge semicircular mound of brickwork, 880 ft. in circuit, and still 100 ft. high, but so much decayed at the top that its original outline is no longer ascertainable. It has still priests attached to it who occupy a large dwelling or palace, in which visitors are sometimes lodged.

BIRKADEM, a *tu* N. Africa, Algeria, prov. and 8 m. E. Algiers, beautifully situated in a valley enclosed by hills. The vine and mulberry thrive well in the vicinity. P 1107.

BIRMANDREIF, a *vil* N. Africa, Algeria, prov. and 6 m. S. Algiers, in a pleasing valley at the extremity of a ravine. The inhabitants cultivate aromatic plants with success. Pop. 320.

BIRMEHAWA, a *tu* W. Africa, on the N. W. frontier of Bornu, 60 m. N E. Kano. It is a small place, but strongly fortified with an earthen wall and two deep ditches, one within it and the other without. Its only gate is on the W. side. The interior is tolerably well inhabited by natives of the Hausa and Kanuri races, and there is a good deal of cultivation in the environs.

BIRMINGHAM two places, U. States—1 A *vil* Co. near the center on a commanding height at the junction of the Housatonic and the Niagara, opposite to Derby, with which it is connected by a bridge 10 m. N W New Haven. It consists of well-formed streets, and a handsome square which is occupied chiefly by churches and schools, and possesses numerous industrial establishments, including many factories of pins, carriage springs and axle bolts, engines &c. rolling-mills for copper iron, and steel flour and saw mills and a large trade in coal and lumber. The value of the manufactures is estimated at \$300,000. Pop. 2600.—2 A *tu*, or bor. Pennsylvania, on the Monongahela, opposite to Pittsburg, of which it may properly be considered a suburb, being connected with it by both a suspension bridge and a steam-ferry. It contains several churches and possesses manufactures of iron railing saws and machines glassware a pottery a planing mill, and several breweries. Pop. 3743.

BIRILLPOOR, a *tu*, India, Rajpootana, state and 118 m. N E. Jeonaghar. It consists of a town and a fort. The town contains 400 houses, many shops, and eleven wells 60 ft. deep, which yield very brackish water. The fort, seated on an eminence on the N W. side of the town is about 90 yds. square, and is inclosed by a wall 80 ft. high with four or five bastions on each face. It is so illly constructed of a calcareous stone common in the country but a sandhill about 1 m. distant completely commands it. Its interior is crowded with buildings.

BISKOWICK, a *tu* Austrian empire, Galicia, circle and 3 m. N W Sambor with a beautiful monastery and 2000 inhabitants.

BISTRA—1 A *tu* Austrian empire, Transylvania, circle and about 80 m. N W Carlsburg, in a romantic mountain district; with 5128 inhabitants many of whom are employed in the neighbouring gold mines.—2 *tu* Austria on the Wang, a *tu* Austrian empire, Hungary, co. and 22 m. N N E. Transilvania; with an old castle on an almost inaccessible height, and numerous potatoes. Pop. 2400.

BITEACH (Ghar), a *tu* Austrian empire, Moravia, circle and 70 m. N W Brunn. It has an ancient and strongly built parish church steep-roofed, potteries, and six annual fairs. Pop. 8096.

See also BIR—Vol. I.

BITHOOR, a *tu*, India, N W Province, dist. and 13 m. N W Cawnpore, a bank Ganges. It contains several Hindoo temples, and has an ancient fort, at which Brahmins are annually venerated. There are also numerous flights of steps, or ghats, leading to the river for the purpose of the Brahmins performing their religious ablutions. The pla of Brahma's alipor dropped after the sacrifice of a horse upon the conclusion of his work of creation, is professed to be shown in one of the steps. But the place has acquired a more signal and infamous reputation as the residence of Dhana Part, or Nana Sahib, the adopted heir of the Maharajah Baji Row whose festivity of the atrocities perpetrated at Cawnpore on the outbreak of the happy mutiny in 1857 has won for his name a perpetuity of execration. General Havelock gained a brilliant victory over the rebels in the vicinity and subsequently quantities of treasure belonging to the Nana were discovered by the troops in a well close to the palace.

BITSOCHKA Esmouca, a *tu* Austrian empire, Moravia, circle and 8 m. N W Brunn with an old castle and large foundation and 1200 inhabitants.

BIYU, a *tu* W. Africa, about 160 m. N E. Yakobe, cap. of the Bable tribe who bound with the Marquis on the E. and have to a certain extent preserved their independence in the face of a very unequal struggle with their Mohammedan assailants. Scarcely anything is known of Biyu, but it is reported to be of large size and to be the only town of importance which the Babel possess, the rest of the tribe occupying small hamlets scattered over a mountainous district, where the prevailing natural is banal.

BLACK HILLS, a mountain range, U. States, which breaking off from the Rocky Mountains on the W. frontier of Nebraska about lat. 42° N lon. 110° W stretches N E. to lat. 47° Laraine Peak, its culminating point, is 8000 ft. above the sea. The drainage of its W. slope is carried to the Yellow Stone, that of the E. slope to the Missouri.

BLACK RIVER, or *Big Black River*, U. States rises in the S. E. of Missouri flows easterly to S. to its frontier enters Arkansas changes its direction to S. E. W. after a course of about 400 m. joins the White River on its E. bank 40 m. below Batesville. It is closed for three winter months, but during the remainder of the year is navigable for 100 m. above its mouth.

BLAGOVESHCHENSK a *tu* Russian empire, Man churia, 1 bank Amoor at the mouth of the Zeya. It was founded by the Russians, and though still a small place surrounded with palisades, and consisting of a village with a few mud cottages, may be expected to assume importance, as an urbanism of the emperor has made it the seat of government.

BLAIRSVILLE, two places, U. States—1 A post bor. Pennsylvania, on the Conemaugh, here crossed by a hand some bridge and on the Pennsylvania canal, 70 m. from Pittsburg. It is substantially built, possesses about half a dozen churches and carries on an active trade in grain, pork, lumber and coal. Pop. 1136.—2 A *tu* Georgia, cap. co. Union, in the midst of the magnificent scenery of the Blue Ridge. It possesses a court house and a school valuable quantities of marble and iron, and some traces of gold.

BLAKELEY a *vil* U. States, Alabama, cap. co. Baldwin on the Tusculum just above its mouth in Mobile Bay. It contains some handsome buildings and numerous stores and possesses a harbor at once deeper and more accessible than that of Mobile, was expected to become a formidable rival to it. This expectation has not been realized.

BLANCO commonly called South Cape Blanco, to distinguish it from another cape of same name considerably to the N on the W coast of Africa; lat. 30° 46' 30" N lon. 17° 4' W. It is a white cliff which competent judges have estimated variously at 150, and at only 50 ft. above sea-level, and terminates a sandy promontory about 25 m. long. It is composed of a calcareous grit, and rises vertically with a white and barren surface from a sloping beach. With its E. side it forms the large Bay of Lervier 35 m. long by 20 wide. With its W. side it forms West Bay which is much resorted to by Canary fishermen.

BLANCKO a *tu* Austrian empire, Moravia, circle and 13 m. N Brunn on the Zwettawa, and on the Vienna and Prague railway. It has a castle belonging to the prince of Salm, blast furnaces, and other ironworks, at which numerous locks and various articles of hardware are manufactured on a

a large male. At short distance, on a steep height, stand the picturesque ruins of the old castle of Blaraka. Pop. 2304.

BLAR (BLAS) [old.] a tn. Matles possessing the most important harbor of state Jalisco, on a bay of the Pacific, near the mouth of the R. Grande or Santiago, 150 m. N. W. Guadalajara. It has a deep seaport and well-sheltered harbor at which during the Spanish rule, an extensive trade was carried on with the Philippine Islands and other parts of Asia. Since 1821 when the Spanish cortex declared it an open port, its trade has rapidly increased. Some ships have been built, and a good deal of salt is made in the vicinity. The great obstacle to its prosperity is the unhealthfulness of the climate which during the rainy season from June to the end of November becomes so pestiferous that all its inhabitants who are able to leave it take refuge chiefly in Tepic. During the dry season, which is healthy though swarms of flies and mosquitoes make life anything but comfortable, the population amounts to about 3000.

BLATTA a tn. Austrian empire, Dalmatia in the N. W. portion of the island, and about 18 m. W. of the town of Carls. It contains 5000 inhabitants, who are mostly employed in cultivating the ground and in fishing.

BLATTNITZ (BLAK) a tn. Austrian empire, Moravia circle and 10 m. E. Hradisch. On the summit of a neighboring mountain commanding a beautiful and extensive view there is a pilgrimage chapel. Pop. 1,500 chiefly employed in the culture of the vine.

BLAUDA a tn. Austrian empire, Moravia circle and 30 m. N. W. Olmitz with a parish church and two castles, one in ruins, and the other with fine gardens. Pop. 2408.

BLINTAUF a tn. Austrian empire, Bohemia, circle and 13 m. N. E. Eger r. bank Zwoda with a parish church a brewery several mills and establishments connected with the lead mines in the vicinity. Pop. 1100.

BLIND BAY an extensive opening New Zealand, in the N. of Munster or Middle Island, has a width of 16 m. between B. L. Island, on the E. and Naparua Point forming its N. W. extreme and a depth within these limits of 25 m. The depth of water in the outer parts varies from 35 to 28 fathoms, and shoals gradually to 12 9 and 5 fathoms, with a 2 m. of its head. It is entirely free from danger and so well sheltered toward its head that at Nelson Haven, which lies there, it is frequently fine and calm weather when a strong N. W. gale is blowing in Cook's Strait. On its E. shore is Crater Harbor which is of easy access, and gives good shelter in all weathers, and on its W. shore are several good anchorages, partly in rades, and partly in the mouths of the rivers Moturoa, Moturoa, and Waimea. The land towards the head of the bay presents some remarkable white cliffs, but is generally low on the E. and W. shores, on the contrary it is mountainous, rising to heights which vary from 3000 to 4000 ft.

BLOOMBERG a tn. U. States, Pennsylvania, cap. co. Columbia, 1 m. from N. branch of the Susquehanna, and 8 m. N. E. Harrisburg. Iron-ore and limestone abound to the vicinity as the N. branch canal aids the activity of the trade of the place. Pop. 3200.

BLOOMINGTON a tn. U. States, Indiana, cap. co. Monroe on a ridge between the E. and W. forks of White River and on the railway from New Albany to Michigan 40 m. S. W. Indianapolis. It consists of houses partly of brick partly of wood to the east of the state a diversity which is attended by about 175 students and possesses several churches, a female academy and other schools. Pop. 8000.

BLOESBLERG a tn. U. States, Pennsylvania, on the Tioga, and on the Corning and Elmburg railway 20 m. N. W. Elmburg. It stands in the center of a very important mining district, which is rich both in coal and iron. A blast-furnace is in operation in its vicinity. Pop. 850.

BLOWITZ a tn. Austrian empire, Bohemia, circle and 12 m. E. E. Pilsen cap. dist. of same name, with a parish church a townhouse, a benevolent institute, a brewery, and three mills. Pop. 1200.

BLOXWICH a chapelry dist. England in par. and union of Walsall co. Stafford 2 m. N. W. of Walsall, in whose townships and trade it participates to a considerable extent. The surrounding country is level and the soil gravelly and sandy. Extensive coal-mines are in operation, and little-iron and steel blades are manufactured in large quantities.

ties. The church is a neat edifice with a square tower enlarged in 1835. There are also places of worship for Roman Catholics, Wesleyans, and other denominations.

BLUDOWITZ a tn. Austrian empire, Galicia, dist. Tscholom, 35 m. E. S. K. Troppau with a parish church of the Anglican Confession and 1518 inhabitants.

BLUE LICK SPRINGS U. States, Kentucky 70 m. N. E. Frankfort is celebrated for the mineral waters from which its name is derived and which form an article of traffic in various parts of the country.

BLUFF or **AWABA**, a harbour New Zealand in Foveaux Strait, on the E. shore of Munster or Middle Island. At full tide it is an extensive sheet of water stretching in two arms, one to the N. for 4 m. and the other E. for 5 m. The space for anchorage is, however narrow and confined, the whole of the exposure, from a mile beyond the entrance, being flat and shallow and mostly uncovered at low water. The tides also run very strong. Bluff harbour was formerly a large whaling station.

BLUNDA BAY N. Australia, Alexandra Land, at the mouth of the Victoria River lat. 30° 15' S. lon. 139° 40' E. It is not considered safe for vessels entering the Victoria River and Queen's Channel to proceed farther up than Blunda Bay.

BORBO a tn. Austrian empire, Hungary co. Arva-Thurocs, 50 m. N. E. Neuhof. It contains 1600 inhabitants, who are partly employed in raising a coal-mine in the vicinity and have a considerable trade in lace and linen.

BODAJK a tn. Austrian empire, Hungary co. and 18 m. N. N. W. Stuhlweisberg with a church to which pilgrims go, and a mineral spring. Pop. 1900.

BODHANETZ a tn. Austrian empire, Balaemia, circle Chrusim 6 m. W. N. W. Pardubitz with a parish church a townhouse, no hospital manufactures of alcohol and three mills. Pop. 1400.

BODONY a tn. Austrian empire Hungary co. Heves, near the Matra Hills, with copper and silver mines, and 1800 inhabitants.

BOGAT a tn. Austrian empire, Hungary co. Szabolcs, 27 m. N. E. Debrecen with a distillery and an oil-mill. Pop. 2097 mostly belonging to the Reformed church.

BODOI a mineral spring Siberia Trans-Baikal province, near the source of the Gorbun, an affluent of the Nihka, on the l. bank. It has acquired some celebrity by its file which is attended by Russian and Cosack merchants, who ascend the Amoor from Aigun in large boats bringing printed cottons silk, tobacco and brandy which they barter with the Manchoes for glassware soap, and the horns of the moose, a species of large stag.

BOGHAZ, or **BOGHADDER** a vil. European Turkey at the foot of the Hama or Balkan, 13 m. S. W. Yarna. It stands near the entrance of a wild mountain gorge, and its vicinity is supposed to have been the scene of the battle which Alexander the Great fought with the Thracians before he crossed the Hama, on his march from Amphipolis to the Danube.

BOGHAZ-KOPI [the son. Perle] a tn. Turkey in Asia, near the E. frontier of Anatolia, 300 m. E. S. E. Constantinople. It lies at the N. W. foot and on the first slopes of a rugged limestone ridge, and is a very straggling place, containing about 150 houses. The rocks are full of caverns, which are partly used by the inhabitants as magazines. In the vicinity is a remarkable ruin as to which archaeologists are divided in opinion as regards its as a temple and others as a palace. The only existing public building of any consequence is a mosque. Close to Boghaz-Kop is another place called Yabba. Regarding them as one town, we may estimate their total pop. at 1800.

BOGORAH or **BOGORAH** a dist. and tn. India presid. Bengal between lat. 24° 36' and 25° 19' N. lon. 85° 49' and 89° 45' E. and bounded N. by Dinapore and Rangpoor, E. the Komee, a branch of the Brahmaputra, separating it from Myingating S. Myingating and Puna, S. W. Rajahmundry, and W. Dinapore; area, 5160 sq. m. The surface, a level alluvial tract, has a very gradual slope southwards, as indicated by the course of its rivers. These are very numerous; but by far the most important is the Komee. Among the others are the Gogget, the Kurattee, the Jemuna, and the Atore. The principal crop is rice. Sugarcane is extensively grown as is also indigo and cotton. The subsidiary to rear silkworms,

forms large plantations. Hemp is cultivated only for its narcotic properties. Pop. 900,000.—The town, one of the above dist., situated on the Kinnesta, 185 m. N. N. E. of Calcutta, possesses a well-tempered climate, but has no other importance than that which it derives from being the seat of the British civil establishment.

BOGOROGLAN a tn. Russia in Europe, gov. and 100 m. E. E. Samara, on both sides of the Terek, at its confluence with the Kinnesta, lat. 53° 35' N., lon. 53° 30' E. It has two churches, a circle school a charitable institute, several manufactures, a well-frequented annual market, which lasts from the 1st to the 8th of September, and a trade in cotton, woolen and silk goods. Pop. 5000.

BOGOS, a territory E. Africa, Abyssinia, situated between lat. 15° 35' and 16° N. lon. 38° 30' and 38° 55' E. and bounded N. by Habab, E. by Menz, S. by Hamar, and W. by Bera. It is mountainous, particularly in the S. where some of the summits attain a great elevation but towards the N. descends gradually to a fertile plain, watered by the Ain Baha. It is rich in metals, and also raises large quantities of grain, particularly the *Eragrostis corymbosa*, which is celebrated for its quality.

BOGASAR (Dereves) a tn. Austrian empire, Temesvar Banat, circle and 23 m. E. Lugos, cap. dist. same name, on the Berava, with iron works, including two blast furnaces, naileries a brewery and tileworks. Pop. 2390.

BOGLICHA, a tn. Russia, gov. and 135 m. S. E. K. Voronezh on a river of same name with two churches and two charitable institutes. Near the castrum of Slobodka, within the circle, there is an important yearly market. Pop. 1976.

BÖHMISCHKEH or **BÖHMISCHKEH** a tn. Austrian empire, Lower Austria, on an affluent of the Danube, 35 m. W. by R. Vienna. Has two saw mills and a trade in wood. The vine is extensively cultivated in the vicinity. Pop. 2040.

BÖHMISCHKEH a tn. Austrian empire, Lower Austria, circle Lower Mauternburg on the Poltsch, 80 m. N. by E. Vienna. It contains 2510 inhabitants chiefly employed in agriculture, for which the district is well adapted.

BOHUSLAWITZ, a tn. Austrian empire, Bohemia, circle and 12 m. N. N. W. Koenigsgrätz, with 1500 inhabitants, and a Protestant and a R. Catholic church.

BOIKOWITZ, a tn. Austrian empire, Moravia, circle Hradtsch on the Osawa, 7 m. E. Hungarian Brod. It has a beautiful castle, and contains 2000 inhabitants who are chiefly employed in wine lag.

BOLARUM a military encampment, India, Vishnu's Domains dist. and 11 m. N. E. Hyderabad lat. 17° 30' N. lon. 78° 55' E. It stands on a granite ridge 1890 ft. above the sea, has lines for two battalions of infantry, a number of irregular horse and 250 artillery, and possesses a handsome little church of Gothic architecture with coloured glass windows a well-constructed hospital and produce a garden, in which European vegetables as well as the ordi-

nary Indian fruits, are grown. The station is so healthy that invalids often derive benefit from residing to it.

BOLCKKE, a tn. Austrian empire, Hungary, on Teina 29 m. N. E. Szigetvár, bank Danube, with some handsome buildings and a trade in corn and wine. There are many Roman remains in the vicinity. Pop. 4217.

BOLGREAD a tn. Turkey Moldavia, on the Yalpoob, 32 m. N. by W. Ismail. It built almost entirely of stone and was included in those parts of Bessarabia which the Russians by the treaty of Paris, ceded to Turkey in order to place the Danube entirely beyond their control. Pop. 3300.

BOLON a tn. Austrian empire, Transylvania, circle and 23 m. S. E. Udvarhely with an Evangelical a non-united Greek and a Unitarian church. Pop. 2313.

BOLSONOW, a tn. Austrian empire, Galicia circle and 20 m. S. S. W. Brest in a fertile district, on an affluent of the Dniester with 1700 inhabitants. At the village of Poplawski in the vicinity the Tartars sustained a complete overthrow from the Poles in 1624.

BOMBAY [add.] presid. India.—Statistics.—The area of the presidency is 149,045 sq. m. and the pop. according to the latest estimates, 12,502,544.

At the end of December 1863, 738 miles of railway were completed in the presidency and 639 miles more remained for completion. In the year ending 30th June, 1863 over the 632 miles then open 3,756,121 passengers had been conveyed and the receipts from them were £311,765 the receipts from goods traffic were £278,750 together £590,515. The working expenses were £278,176, leaving net receipts, £312,339. The amount expended upon the line up to 31st December 1863 was £16,226,544.

The troops in the presidency on 30th April 1862 consisted of 13,841 Europeans and 21,016 natives total 34,857 being composed of staff and staff corps, 711 engineers, Art. 751 artillery 8448 cavalry 8988 infantry 23,964.

BOMBAY [Ind.] a city and port, India. In 1850 a university was opened for students who are matriculated after an examination, and in due course are admitted to degrees in arts, for which periodical examinations are held. The number of students has progressed very favourably and several schools and colleges have been affiliated to the university the principal of which are the Elphinstone Poona and Grant Medical College, and the Free General Assembly's Institution of Bombay.

The commercial activity of the port has materially increased, owing very much to the rapid growth of the cotton exports, which have passed largely through Bombay. The completion of the Bombay, Poona, and Central India railways will afford additional facilities for this important branch of trade. At present (1863) the line is open only to Grant Road, a distance of 34 m. from the port; but it is expected that the completion of the line to the harbour at Colaba will not be long delayed. The length now open, from Bombay to

Almohad, is 306 m. The value of the imports and exports is shown in the following figures:—

	Imports.	Exports.
1860	215,044,671.	215,101,001.
1861	14,988,989.	17,278,401.
1862.	15,471,452.	15,774,977.

BOMBEH or **BANNEH** a town in India, in the N.W. of Bandedah, Raj Coorah or Talwar 173 m. S.E. of Agn. It stands on a narrow ground composed of wide and clean streets, and possesses a fine fort or lake, about 4 m. long by 3 m. wide, deep and clear and abounding with fish. This lake, formed by a vast artificial mound constructed across the mouth of the valley is extensively used for irrigation. On a rocky ridge overlooking it is the ruined palace of the rajah who made the embankment.

BONCEHIDA a town Austrian empire, Transylvania, circa and about 10 m. N.W. Klausenberg cap. dist. name same with a remarkable castle, with fine gardens, belonging to Countess Bani. Pop. 1850

BONYHAD a town Austrian empire, Hungary, co. Tolna 8 m. S.W. Bonyhad with a district court and several public offices some fine castellated mansions some features of tobacco pipes a steam mill a trade in corn, wheat and cotton and a mixed population of Lathians, R. Catholics, and Jews, amounting to 6908.

BOODHANUH a town India, N.W. Province, dist. Delhi is a considerable place, with a well-supplied bazaar. Pop. 5559.

BOGLUNDASHUR a dist. and in India, N.W. Province, Doab, between lat. 28° 5' and 28° 45' N. lon. 77° 55' and 78° 55' E. and bounded N. by Meerut, E. by Moradabad and Budaon, S. by Aligarh and S.W. by W. Gurgaon and Delhi length S.E. to N.W. 80 m., breadth 57 m. The surface, generally level has a gradual slope S.E. at the average rate of only a foot and a half per mile. The principal streams are the Ganges the Jumna, the Hindon and the E. Kales Noddee. The district, situated near the centre of the Doab, has a full share of the fertility for which this tract is celebrated and produces in abundance millet, wheat, barley various kinds of pulse sugar-cane, tobacco and indigo. It is the most important commercial crop however is cotton, for which the soil is admirably adapted. There are no minerals of any consequence. Pop. 594,939.—The towns of the above dist. and known also by the name of Buree situated on bank Kales Noddee 40 m. S.E. Delhi has a well supplied bazaar. It was one of the centres of revolt during the Bepoy mutiny. Pop. 13,049.

DOORANPOOR, **BURHANPOOR**, or **BURHANPOOR**, a town Hindoostan presid. and prov. Bengal dist. and 8 m. S. by W. Mooradabad 1 hour 30 min. by Meerut off the Ganges, on a rich alluvial soil, covered with luxuriant and almost tropical vegetation, and, though once extremely unhealthy as to have been so much improved by sanitary measures as to be second to no locality in Bengal for salubrity. It is the seat of a civil establishment consisting of the usual European and native functionaries; and builds many stately houses in its vicinity, giving it an air of grandeur and im-

portance, has splendid military accommodations, in which the quarters of the European officers, composed of long ranges of edifices, built of brick and stone, and the grand square, including an excellent parade-ground have a striking appearance. — (Thornhill's *Gen of India*)

BOOREAH, a tn. India, Sindh, cap of a protected Sikh state of same name on the coast of Feroz Shah, 116 m N Delhi is over a small state though there are indications of its having been large and populous. It possesses a banner and derives some commercial importance from its proximity to a ferry across the Jumna, in the line of road leading from Umballa to Saharanpore. Besides a fort within the tn there are five others in the neighbourhood. — The district is fertile and well cultivated and is both adorned and enriched by luxuriant and productive mango groves.

BOOREE DHING a river India, which throws off by the Brahmaputra on the E. frontiers of Assam, flows W for 121 m., and again joins the parent stream in lat. 27° 35' lon 94° 41'

BOOR, a tn. Austrian empire, Hungary co and 18 m. S W Pressburg on the Eszika arm of the Danube is an ancient place, with a castle flanked by towers and otherwise defended. The Hungarian insurgents were defeated here on June 10, 1849. Pop 2029

BOOTAN [add], an independent state, India. Between the hills which traverse the state from E to W and the British frontier are several districts or provinces taking their names from the Doers, or mountain passes, eleven of which are on the Bengal frontier and seven are that of Assam. The central government at the capital Thimphu exercises a generally effective control over the subordinate provincial governments, but from the contentious which occur among the latter its influence is sometimes powerless.

The aspect of the Bengal Doers is that of a low marshy expanse of sandy land closed abruptly on the N by the ranges of the Bootea mountains, for the most part unimproved and covered with coarse vegetation, with occasional thick woods, and a belt of dense forest along the foot of the hills. This tract is intersected with countless streams which are ever changing their channels and water lying everywhere within a few feet of the surface, suggests the idea of one vast river-bed, of which rather than clothed with the most luxuriant vegetation engendering a deadly atmosphere. The ordinary lands of the Assam Doers are of a higher level and are more consolidated with a gravelly soil and plains of short grass, apparently pleasant and salubrious but really deadly in the extreme with miasmatic exhalations. The passes through the mountains are very rugged and difficult of ascent.

The Bootea pass divides for the Assam Doers which they held in a kind of joint title with the Assam government. After the annexation of Assam, this tribute, amounting to about £200 annually was paid to the British government, the system of joint occupation being still maintained. In 1828 there began a series of aggressive outrages upon the British frontiers from the Assam Doers which resulted in the annexation of three towns to the British territory in 1841 with the condition of a payment of £1000 per annum to the Booteas, as part of the ratification of the districts. In 1860 a demand was made by the Booteas for an increase in this amount, which was refused and subsequently fresh outrages were committed and the Dwarangi rajah was reported to be building forts and preparing roads for a continuance of the aggressions on the British frontiers. Bikkim and Cooh Bikkim likewise became subject to incursions and the Indian government, finding remonstrances vain at length made preparations for enforcing them which were interrupted by the outbreak of the mutiny in 1857. In 1880-3 negotiations with the Booteas were resumed and in the latter year a mission with much difficulty reached the Bootea court, after discovering that a revolution had just taken place. The mission was entirely unsuccessful was treated with insult and injury and was only allowed to depart after signing articles of humiliating submission to the Bootea demands.

In 1864 active measures were adopted; bodies of British troops entered the Doers, and occupied some of the places most important in a strategic point of view. From one of these Dwarangi, however they were disastrously defeated by the Booteas, but it was subsequently reconquered the

Doers were permanently held and annexed to the British territory and measures taken (1866) for organizing a proper governmental administration. The extreme unhealthiness of the districts makes their acquisition one of doubtful value, except as a means of checking the Bootea aggressive propensities.

BOOTHBAY a tn. U States Maine, on the Atlantic, where the harbor is one of the best on the coast, 40 m S S E Augusta. It possesses a Congregational church, several large saw and grist mills, building yards and a considerable coasting trade. Many of the inhabitants—who are estimated at 8000—are employed in the fisheries.

BOHGO-BESSIENCZE a tn. Austrian empire, Transylvania, circle and about 15 m. N E Bistritz, not far from the mountain pass of same name leading into Moldavia. It has a Greek non-united parish church. Pop 1450

BOHSLAY or **BOHSLAVI**, a tn. Russia gov and 40 m. N E E Kherson, on bank Dnieper has three churches and a parish school. A number of Swedish and German colonies have been settled in the district. Pop 5632

BORJA [BARTJA] a tn. Brazil prov Rio Pedro do Sul, on a height in a bleak and rugged district at a short distance from L bank Uruguay 810 m W N W Porto Alegre lat 28° 40' S lon 56° 10' W. It consists of regular streets but gives no signs of industrial activity and has on the whole a dull and melancholy appearance partly owing to the number of ruinous buildings within it, and the manner in which the more ancient materials have been employed in the erection of modern houses. The Jesuits had here one of their principal missions, and many monuments of their prowess still remain. In the centre of a large public square stand the remains of their fine church. Top above 2000. — (Lallemant's *Russia*.)

BORODINOS the name of two sals, of the N Pacific, situated about 5 m apart, and 171 g between N N F and S S W lat. (S. extremely of S. lat) 52° 47' N lon 181° 19' W. The name of coral formation runs the height of about 40 f above the sea, and are covered by trees, the use of which indicates that the islands themselves cannot be very recent.

BOROVITCHI a tn. Russia gov and 95 m E by S Novgorod, cap circle of same name, on bank Msta which here forms numerous rapids. It has nine churches secular and religious schools for the girls and the parish, three old stable institutions and various industrial establishments. Coal is found in the vicinity. Pop 5522

BOROYO a tn. Aust empire Kingdom of Croatia and Slavonia, co and 17 m. S E Zagreb on the Danube with 1830 inhabitants, chiefly employed in fishing.

BORVA a tn. Russia gov and 39 m N E E Tcherni gov cap, circle of same name. It has four churches a circle school and a charitable endowment. Excellent tobacco is a staple product of the circle. Pop. 4927

BORZECZOW a tn. Austrian empire Galicia, circle and 8 W Czortkow cap dist of same name with a ruined castle and 3455 inhabitants.

BORZARI a tn. Western Africa, Bornu prov Manga 190 m N E E Kano is a place of considerable size, surrounded by a crenellated wall and a ditch, and is well built. The market is very indifferent, and there is no appearance of industry. Water is supplied from wells 10 fathoms deep. Estimated pop. 7000 to 8000

BORZBZEEK a tn. Austrian empire, Transylvania, circle and about 45 m. N N E Udvarhelyi with mineral springs which are famous for their cures, and the water of which is largely exported.

BORZONY a tn. Austrian empire Hungary co Honth 10 m. S. Ipoly Sagh with 1490 inhabitants, half Lutherans, half Catholics, who cultivate the ground and feed swine in their extensive oak forests.

BOSANCZE, a tn. Austrian empire, duchy Bukovina, 47 m S by W Czernowitzi with a large trade in excellent fruit. Pop 5528

BOŠING a royal free tn. Austrian empire, Hungary co and 10 m. N E Pressburg on the Tysan railway. It has a magistracy a Protestant and a Catholic church, a synagogue, a Capucin monastery a castle belonging to Prince Palffy an institute for the poor and an asylum for children. The Biding white table-wine is famous. In the

vicinity sulphur-springs is mined and there are works for making sulphur and sulphuric acid. Pop. 4375.

ROSOVICE, a tn. Austrian empire, East Military Frontier, on the Mura, at its confluence with the Nera, 70 m. S.W. of Trieste. It has a R. Catholic and a Greek church, a tr. st. school and a copper mine. Pop. 3470.

ROTHSCHILD, a tn. Turkey in Europe, Moldavia, capital of same name, on the Danube 65 N.W. of Jassi. It is irregularly built, in the seat of a court of primary jurisdiction contains one Armenian and fourteen Greek churches, several synagogues, a normal and an Armenian school, and carries on an important trade particularly in horned cattle sent from Moldavia and Bukovina into various parts of Austria. Pop. nearly 20,000.

ROUCHTANNA, a tn. Russian empire, W. Siberia, on a river of same name, on the S.E. frontier of Tobolsk, 450 m. S. of Tobolsk. It was formerly a place of much more importance than at present, and contains several large buildings, which give it rather imposing appearance. In some ancient ruins in the vicinity gold and similar implements have been found. The surrounding steppe or valley is of considerable extent, and pastures large herds of horses and cattle. The river which falls into the Irkutsk about 2 m. below the town, is a considerable stream.

ROUFARIK, a tn. N. Africa, Algeria, prov. and 20 m. S.W. Algiers in a fertile and well-cultivated district. It contains a church and a caravanserai and has an important Arab market every Monday. Pop. 3535.

ROULANDKE, an isl. British America, on the P. coast of Cape Breton where it forms by its opposite sides the two channels of the Great and Little Bras d'Or leading to the Bras d'Or Lake. Its length from N.E. to S.W. is 2½ m. and its extreme breadth 5 m. Sandstone, containing in some parts coal shale, limestone, and gypsum is found on its shores. Its interior which rises to the height of 400 ft. is thickly wooded.

ROUBIN ISLAND [add.] Indian Ocean 400 m. E. Madagascar, belonging to France, in consequence of an abundant trade carried on in shipping and the failure of crops and commerce I deposed in the trade of the island has greatly declined. In the year 1864 365 French vessels entered, and 236 cleared from the various roadsides, while only 40 British ships arrived and 41 departed from the island. The sugar crop had been very small and only 27,318 tons were exported in the same year chiefly to France. The other exports in 1864 were of coffee, 23 tons cocoa, 4 tons cloves, 42½ tons mace, 4 tons nutmegs, 2½ tons vanilla, 12½ tons castoreo, 8½ tons rum, 18,572 gallons the cotton crop having proved an almost total failure. The produce of the island is hindered very much by the want of a safe harbour and it is proposed to raise a loan for the formation of one at St. Pierre in the S.W. part of it. Pop. (1863). 183,471.

BOURBON VENDEF [add.] Since the accession of Louis Napoleon to the empire the name of this town has been again changed to Napoleon-Vendée.

BOVANI or **BOWARY**, a tn. and river India, premed Malabar. The town sits at 80 m. N.E. Coimbatore at the confluence of the Be and Canyery both of which are here crossed by bridges—the one of 9 and the other of 16 arches. It is a neatly built and populous place, much valued by Hindus on account of the sanctities which they attach to the locality. The river flows among the S. spurs of the Koodak range, belonging to the Nethergherry, flows E. across the district of Coimbatore and joins the Canyery on its S. bank, at the town of Bovani, or Bhovankhedi, after a course of about 120 m.

BOYOLENTA is a Austrian Italy prov. and 10 m. S.W. of Trieste. It has a parish church, a tr. st. school, an academy, five churches, divided into two sections, one for science and the other for the fine arts, beautiful gardens, and good wine. Pop. 2922.

BOYOLONE, a tn. Austrian Italy prov. and about 13 m. S.E. Verona, on the Mincio; with several churches, a palace built by Christoforo, and a fine country seat of the Bishop of Verona. Pop. 3510.

BOWDOINHAM, a tn. U. States, Maine, on the Kennebec, at the junction of the Canaan, and on the Kennebec and Portland railway 30 m. N. N.E. Portland. It possesses

three churches and important building-yards, being accessible by vessels of 1000 tons. Pop. 1282.

BOWEN an isl. Australia, New South Wales, off the E. coast, where it forms the E. entrance of Jarvis Bay. Its surface is formed of high vertical rocks, in many places deeply rent. From these it slopes gradually towards the bay, where its shore, though intersected with rocks, is low and nearly level. On the W. side it is separated from the mainland by a breach not more than 200 yards across, which appears as if some sudden and violent wrench had torn the cliff to pieces, and left here and there a straggling rock to indicate its former condition. Bowen is moderately wooded, has much clear ground covered only with long grass, and displays beautiful scenery.

BOWLING GREEN, a tn. U. States, Kentucky, cap. of Warren at the head of navigation of the Barren, which has been made accessible at all seasons by steamers of 200 tons, and on the Nashville and Louisville railway 100 m. S.W. Louisville. It contains four churches—a college, a female academy and other schools, a court-house, a woolen and a candle factory an iron foundry and several mills. The trade is chiefly in pork and tobacco. Pop. 2500.

BOWMANVILLE, a tn. British America, Canada West, on the Durham on the N. shore of Lake Ontario and the Grand Trunk railway 80 m. P. N.E. Toronto. Its advantageous position with a great command of water an excellent bay, and a descent remarkable for fertility has led to its very rapid increase. It is well laid out, possesses two churches—Church of Scotland, English Episcopal Free, Congregationalist, and Primitive and Wesleyan Methodist, a grammar-school, a mechanics institute and a weekly newspaper, and has large flour-mills, a pottery, tanneries and other industrial establishments, and considerable trade. Pop. about 4000.

BOW RIVER, British America, which contributes with the Belly River to form the R. branch of the Saskatchewan rises in the Rocky Mountains in lat. 51° 40' N. lon. 117° W. and flows easterly S.E. As it is much larger and more important than the Belly it is much more regarded as not an affluent but a prolongation of the Saskatchewan and takes its name.

BOYD TOWN, a tn. U. States, Virginia, cap. of Mecklenburg 70 m. S.W. Richmond. It is the seat of Randolph Mason College, which belongs to the Methodists, and is attended by about 50 students.

BRAD, a tn. Austrian empire, Transylvania, circle and 25 m. N.W. Bross, near the sources of the Wilts Kéré with an active trade in iron. In the vicinity are mines of gold and silver. Pop. 1740.

BRAMPTON, a tn. British America, Canada W. co. Peel on the Grand Trunk railway 30 m. W. by N. Toronto. It possesses five churches—Church of Scotland, English Episcopal and Episcopal, Wesleyan, and Primitive & Methodist, a grammar school two weekly newspapers, a large retail country trade, and an important corn market, at which wheat is extensively purchased for the mills in the vicinity and also for export. Pop. about 2000.

BRAND, a tn. Austrian empire, Bohemia, circle and 18 m. S.E. Eger in the Böhmerwald on the frontier of Bavaria with a church two mills, and 1000 inhabitants.

BRANTFORD, a port U. States, Connecticut, on New Haven about 8 m. E. by R. New Haven on the railway from it to New London. It has a well-sheltered harbour adapted for vessels of 300 tons, and a substantial wharf. At one time it rivalled New Haven as the centre of a considerable foreign trade.

BRANNA, a tn. Austrian empire, Bohemia, circle and 22 m. N.E. Gitschin, on the slopes of the Riesengebirge. It is the seat of the finest linen manufacture in the N.E. of Bohemia, and has a parish church a castle, an hospital for the poor and a brewery. Pop. 2921.

BRANTFORD, a tn. British America, Canada W. co. on the Grand River where it ceases to be navigable, and on the Buffalo and Lake Huron railway 55 m. S.W. Toronto. It has five churches—Church of England, Free, Congregationalist, and Primitive and Wesleyan Methodist, several schools, four newspapers, three bank agencies, tanneries, potteries, factories for steam engines and agricultural implements and other industrial establishments; and a large trade in flour facilitated by a canal which communicates directly with Lake Ontario. Pop. about 6000.

BRAS DOR, a lake, British America, forming a large expanse of very irregular shape, in the southern portion of Cape Breton. It consists of two distinct parts, which open into each other the one on the N side called the Little, and the other on the S the Great Bras d'Or. The former is of comparatively limited dimensions, but the latter is 87 m. long and 12 m. wide. Its depth varies exceedingly in some parts amounting to 60 fathoms and in others from the prevalence of shoals, not exceeding a foot. The entrance to both lakes from the sea is by two channels, one on the N.W. and the other on the S.E. side of Bonaventure Island. The straits in the vicinity are chiefly of Highland descent, and, though much isolated from old country associations, retain the best qualities of the Highland character.

BRATTLEBOROUGH a town, U. States, Vermont, Windham co. on bank Connecticut River on the Connecticut River railway 100 m. S. Montpelier. It consists of an E. and a W. village and contains six churches, an academy, a lunatic asylum, a paper-mill, and an extensive printing establishment. A covered bridge across the Connecticut connects it with Haverhill in New Hampshire. Pop. 8816.

BRILANSBERG a town, Austrian empire, Moravia, circle Neudachau on the frontiers of Slovenia, with an ancient parish church, extensive cloth manufactures, and 9933 inhabitants.

BRAZIL [add] empire, S. America.
Finance.—Since the year 1857-58 when the revenue reached the highest point ever attained, and the treasury held a considerable balance in its coffers, the receipts have diminished, while the expenditure has increased to meet which loans and debts of various kinds have been contracted, and as a natural consequence the finances of the country have fallen into a state of embarrassment. The balance of revenue and expenditure in the four years 1858-63 shows an aggregate deficiency of 14,405,243 milreis. The budget for 1864-65 estimates the total receipts at \$2,000,000 and the total expenditures at \$2,588,818 mil showing a probable deficiency of 4,588,818 mil. The foreign debt contracted on Dec. 31, 1861 is \$7,462,100 of which £278,900 was for loans for the construction of railways, the internal funded debt was \$7,583,192 and other internal liabilities amounted to 47,860,524 more.

In 1863 a new state department under the title of Ministry of Agriculture, Commerce, and Public Works, was established with the view of giving special attention to the development of agricultural industry by the construction of roads, canals and public works of various kinds.
Commerce and Navigation.—

Countries.	Imports 1860-61	Exports 1860-61

Total	3,127,000	7,676,000	Pernambuco.

The new province of Amazonas is formed of some parts of Pará, and of parts of some parts of S. Paulo.
+ Rio de Janeiro had 265,180 inhabitants in 1865.

BREGANZE, a town, Austrian Italy prov. and 10 m. N. by E. Verona, on the side of a hill. It is famous for the sweet white wine grown in the district, and contains 3489 inhabitants.

BRENT PORTSCHEN a town, Austrian empire, Bohemia circle and 10 m. S. Pilsen on a small stream with a desamir chattrah a castle an hospital a brewery and two mills. Pop. 1400.

BRENTIVO a town, Austrian Italy prov. and about 30 m. N. W. Verona, on bank Adige, with a famous pilgrimage church, situated on a prospect of Mount Baldi, to which the ascent is made by 90 steps.

BREZA a town, Austrian empire, Hungary co. Arva, Thurova at the confluence of the Kilmán with the Arva. It contains 1100 inhabitants who are chiefly employed in the adjoining forests in felling and sawing timber.

BREIBIE an isl. Australia, Queensland forming the W. side of the N. entrance of Moreton Bay. It is 16 m. long by 8 to 4 m. broad, of moderate elevation and separated from the mainland by Pomorie Strait which hangs only a mile wide at its entrance and nearly filled with mangrove islets and muddy flats, was mistaken for Captain Windisch's first discovery for a river.

BRIGHTON a town, and port of entry U. States, New Jersey esp. co. Cumberland, on Cohasset Creek, over which there is a drawbridge connecting the two parts of the town 40 m. S. Philadelphia. It is a well built place, and possesses an active trade, employing 15,000 tons of small vessels, it has also an iron-foundry and several factories of hardware. Pop. 2446.

BRIGHTON a town, British America, Canada W. co. Northumberland, on Passaic Bay on the N. of Lake Ontario and on the Grand Trunk railway 63 m. E. N. E. Toronto. It possesses two Wesleyan churches and two weekly newspapers and, being a port of entry carries on a considerable trade. Pop. about 1500.

BRISBAU is in Australian Empire, Moravia, circle and 28 m. N. Berlin, near the Bohemian frontier on the Elbtawa, and on the Vienna and Prague railway. It has two churches, manufactures of cloth and paper and five annual horse and wool markets. Pop. 1200

BRISBANE, a la. Australia, cap. Queensland, pleasantly situated on the banks of a river of same name, which falls into Moreton Bay 17 m. below lat. 27° 30' S. lon. 153° 3' E. It is surrounded by hills, many of them adorned with handsome villas, and is a well-planned flourishing town, containing many substantial private dwellings, shops, and warehouses, several elegant churches, a hospital, barracks, mechanics institute, club-house, and other public buildings, where literary philosophical, agricultural horticultural and climatic, and other societies meet. The river which is about a quarter of a mile broad, is encumbered at its mouth by a bar which vessels drawing more than 9 or 10 ft. cannot

pass but measures are in contemplation for removing the bar and deepening the channel so as to allow large vessels to come up to the town. A regular steam communication is established between Brisbane and Sydney which has recently been extended to the more northern ports of Maryborough Gladstone, and Rockhampton. There is also telegraphic communication with all the southern cities and towns of Australia. A railway is in progress of construction from Brisbane to Tweedmouth, a distance of 80 miles, on the Darling Downs, to connect this outpost with the wool-growing districts of the interior. Brisbane was established as a penal settlement in 1825 as a subsidiary place of punishment for unrecalcitrant offenders at Sydney and Parramatta. In 1842 the convict establishments were closed and the settlement thrown open to free colonists. On the separation of the Moreton Bay District from New South Wales, and the foundation of the colony of Queensland in June, 1859 this town became the capital and seat of government. Here are the governor's residence, with the offices of the executive, and two houses of legislature forming the local parliament. Although the latitude of Brisbane is four degrees S. of the tropic of Capricorn, yet its climate is tropical, and subject to the humidity of the E.E. trade-wind. Hence there is no true winter while the heat and humidity of summer is unobscured by European laborers in the fields. In the botanical garden may be seen growing the banana, cassava, rice-crop, and other tropical plants, in the open air while the grape, pear, plum apple, and other temperate fruits and cereals, fed to produce useful crops from the arid and damp. Hence it is not so healthy for the British emigrant as the towns of Sydney and Melbourne, situated in the drier localities of the

temperate regions of Australia. The population is fluctuating according to the arrival of emigrants, and their departure for the interior. In 1861 the census returns gave a total of 5235; which has been more than doubled in subsequent years, and may be calculated approximately in 1865 at 12,500.—(M. L. N. N. Colonial Blue-Books, &c.)

BRISTOL, a la. U. States, Pennsylvania, a bank Delaware about 10 m. N. E. Philadelphia, and on the Philadelphia and New York railway. It is a well-built, flourishing place, with four churches a flour-mill and a mineral spring. Pop. 2570

BRITISH COLUMBIA See COLUMBIA (BRITISH) in Sup.

BRITISH EMPIRE [adj.] The prosperity of the

British Empire has advanced of late years with unprecedented rapidity. Its commerce has been developed to an immense extent, and has received fresh impulse not only from the increase of home resources and requirements, but also from the expansion and growing importance of its colonial possessions. The Australian colonies, New Zealand and the newly formed provinces of British Columbia in the W. of N. America, have furnished vast fields for the exercise of energy and labor which have been speedily occupied by a continuous influx of emigrants from the mother country and present vast openings for commercial enterprise. The momentous events of the war with Russia in 1854-5 the Indian mutiny in 1857-8 and the American civil war of 1861-5 calculated as they were to affect and seriously impede the progress of commerce and the internal and external resources of the empire, seem to have had no permanent influence upon them but, on the contrary appear to have given additional impetus to the activity which had begun previously to manifest itself. The statistics of the series of years from 1850 to 1864 exhibit a course of unvarying progress in almost every particular and most unambiguously so in all that concerns the substantial interests and resources of the empire. This will be best perceived from the statistical accounts which are subjoined, and are for the most part so arranged that they may exhibit a ready means of comparison.

Population, &c.—The details of the population of the British Isles will be found in the tables prepared to accompany this supplement, so that here only the totals will be given of the census of 1861 the summary of the colonial possessions being taken from official returns and estimates in 1862

United Kingdom		Population, 1861
England and Wales,		29,285,407
Scotland,		2,696,928
Ireland,		5,556,808
Islands in the British Seas,		143,674
Total,		29,221,288

POPULATION BIRTHS, MARRIAGES, AND DEATHS IN GREAT BRITAIN
in the four years 1861-64.

		Estimated Population.	Births.	Deaths.	Marriages.
England and Wales	1861	30,110,400	694,484	488,114	168,708

conveyed to and fro by a number of steamers constantly plying. The number of churches now amounting to about 150 gives to the place one of the most striking features, while several of the edifices rank among the greatest architectural ornaments. Among others may be mentioned the church of the Pilgrims, a beautiful structure of gray stone with a tall tower and spire forming a landmark to mariners and Grace church the church of the Restoration, the church of the Holy Trinity and the Unitarian church, all built of brown stone in the Gothic style. The other principal buildings and institutions are the city hall, an edifice of white marble, with a portico of Ionic columns, and a dome the apex of which is 153 ft. high the lyceum, a fine granite building with a spacious lecture-room the astronomical college and polytechnic institute for boys, the Pacher collegiate institute for girls the city college, and marine hospital, the city and St. Catharine orphan asylums, the eye and ear infirmary and many other benevolent institutions. The other leading objects of interest are the Atlantic dock, constructed by a chartered company with a capital of £200,000 and having a basin of rather more than 40 acres, the navy yard, located on an area of 45 ac. by a high break wall and containing a naval museum, with a large collection of curiosities and valuable geological and mineralogical cabinets two handsome ship houses and the largest dry dock in the country and several beautifully laid out cemeteries. The manufactures are very important among the leading articles are beer spirits and liquors, iron copper brass and bronze castings gold and silver, refiners silver and plated ware tin and sheet iron, dressed flax, paper ropes and cordage cloths plate and common glass refined sugar and syrup, leather campurs, chemicals, oilcloth linseed and other oil steam engines, cabinet ware cut stone porcelain tobacco, and cigars. Ship building and repairing are also carried on to a considerable extent. The total value of real and personal property amounted according to the city comptroller's report, in 1857 to £19,735,205. Pop in 1810 4402 in 1820 7175-1820 15,896 1840 36,238 1850 58,838 1860 (including the towns of Williamsburg and Brooklyn incorporated with it) 268,661

BROUGHTON BAY, or **CONSA** GULF Chinese empire, Sea of Japan on the E coast of the peninsula of Corea is 93 m. wide between Capes Durao on the S and I-tai Thousan on the N and extends westward for 50 m. Its shores are winding and mostly low and are generally well wooded with occasional waste places and rocky cliffs. Inland ranges of lofty mountains rise both on the N and E. In the latter direction about 16 m. off, the Helaevs Mountains attain the heights of 5022 and 5684 ft. and to the former Mount Hien-fang, situated about 24 m. in the interior is seen towering to the height of 2118 feet. Within the bay are a number of small islands and at its head the two harbours of Yang lung and Port Laxrae. The latter in particular which is formed on the N side of Nakimof or Bosquet Peninsula, which shelters it from the E affords excellent anchorage having a mud bottom with a depth of 7 to 10 fathoms. It is 2 m. wide at its entrance, and trends N for about 6 m. On the left bank of a river which flows into it on the NW there is a large village, apparently the port of a considerable town in the interior.

BROWNSTILL, three places, U. States.—1 A tn. Tennessee, cap. of Haywood 65 m. N.E. Memphis, in the Memphis and Trenton railway. It stands in the midst of maize and cotton plantations possesses a superior female academy and carries on an active trade. Pop 1000.—2 A tn. formerly called Port Brown, Texas cap. co. Cameron. It bank Rio Grande opposite to Matamoros, and about 40 m above the mouth of the river in the Gulf of Mexico. It contains three churches and a custom house, and has rapidly risen to be one of the largest and most important towns in the state, carrying on a very extensive trade. It made some figure in the war between Mexico and the U. States and has since been the starting-point of several filibustering expeditions into the Mexican territory. Pop 5000.—3 A tn. Pennsylvania, Fayette co., r bank Monacahe, 40 m S. Pittsburg. Steamboats ply from Pittsburg up the river over which is a handsome bridge. An abundance of bituminous coal in the vicinity has given rise to manufactures of iron, glass, cotton and paper. Pop 4500

BRUCK (82) [add.], a tn. Austrian empire duchy Styria, cap. circle of same name, on the South railway at the confluence of the Mur with the Mur 25 m. N N W Grätz. It consists of the town proper surrounded by walls, and of three suburbs and has two churches one of them with the tomb of the Iron Duke Ernest, a superior and a common school a townhouse, town hospital theatre and barracks. Above the town stand the ruins of the feudal castle of Landauken. Pop. 6000

BRUGINE, a tn. Austrian Italy prov and 8 m. S. by E. Padua, with a palace built by a paladino and possessing paintings by Paul Veronese an old English garden, and manufactures of cotton. Pop. 222

BRUMER, a group of islands, Coral Sea off the S.E. coast of Papua or New Guinea, lat. 10° 56' S. lon. 150° 50' E. It consists of six small islands of basaltic formation. The westernmost and largest is only 21 m. long by $\frac{1}{2}$ to $\frac{3}{4}$ m. broad, and rises to a steep ridge, terminating in a peak 655 ft. high. Though thus precipitous it is covered with vegetation—the effect not only of natural fertility but of careful cultivation, as extensive plots of ground are seen along the slopes of the hills. The chief products of the islands are yams bananas, coconuts and breadfruit, which are bartered for rice, hoop, &c. The inhabitants have cane canoes and canoes, the latter fitted with single outriggers and mat sails, and seem to reside chiefly in two populous villages the houses of which have sharp gables, and are built upon piles. Notwithstanding their progress in civilization, the natives are inclined to treachery.

BRUMOW a tn. Austrian empire Moravia, circle and 16 m. N E Hradisch in a pleasing valley with a parish church a castle, and glass-works. On a hill in the immediate vicinity are the ruins of the old castle of Brumow which is said to have been built as early as A.D. 830. Pop. 1800 many of which are employed in rearing cattle.

BRÜNDEL, a tn. Austrian empire Military Frontier, Croatia, dist Ogulin in a valley of same name 38 m. S.W. Karladet. It has an elegant parish church a castle commanding a magnificent view a school, and a large magazine. Pop. 2480

BRUNI [add.] an island off the S.E. coast of Tasmania, between Storm Bay on the E and Endeavour Channel on the W and immediately S of the entrance of the Derwent. It is about 27 m. long and of singularly irregular shape hung out by numerous indentations and divided into two distinct portions—a N and a S—only connected by a very narrow isthmus. The surface is usually elevated to the higher parts presenting remarkable geological features. Fluted Cape in particular and the part of the coast joined to it southward has the appearance of an abrupt cut, composed of numerous basaltic columns. The vigorous vegetation everywhere visible proves the fertility of the soil. On Cape Brun the S.W. extremity of the island is a lighthouse with a revolving light 540 ft. above the level of high water and visible in clear weather at the distance of upwards of 21 m.

BRUNSWICK two places, U. States.—1 A vi. Maine, r bank Androscoggin at the head of tide-water and on the Kennebec and Portland railway 80 m. N Portland. It possesses six churches, Bowdoin college, and a number of excellent schools a cotton factory a machine-shop numerous saw mills and important building yards. Much of the wealth of the place is invested in shipping. Pop. about 4500.—2 A tn. and port of entry Georgia, cap. co. Glynn, pleasantly situated on a height above Turtle River 80 m. S.W. Savannah. It is the terminus of a branch railway from Warehous and its harbor at once spacious and secure, with 13 ft. of water on the bar at low tide furnishes considerable facilities for trade.

BRZYBKA, a tn. Austrian empire, Galicia, circle Rzeszow 9 m. from Leszok. In the vicinity are seven ancient mounds which according to tradition contain the bones of an army of Tartars who perished here. Pop. 1650

BUCHA a tn. Austrian empire, Bohemia, circle and 32 m. S.W. Eger cap. dist. of same name; with a parish church a town hospital a ruined castle, three mills, and a mineral spring. Pop. 1400

BUCIN a tn. Austrian empire, kingdom of Croatia and Slavonia co. and 17 m. N W Poesteg, cap. dist. of same name, in a romantic valley. It has a baronial castle with large gardens and a mineral spring. Pop. 1270

BUCKEA, a river India, which rises in Nepal on one of the lower ranges of the Himalayas in lat. 27° 6' N; lon. 83° 40' E. flows first S. into the British territory after forming part of the boundary between the two states, then S.E. through dist. Tirhoot and joins the Bhagmati on its S. bank in lat. 26° 10' lon. 85° 56' after a course of about 195 m.

BUSILM a town in Austrian empire, Transylvania, circle and about 33 m. N. W. Karlsburg, in a mountainous district, with 840 inhabitants, mostly miners.

BUTYKUN a town in U. States Ohio, exp. Crawford co., on Sandusky River and Indiana and Ohio railway 62 m. N. Columbus. The adjacent country is level and fertile and contains several mineral springs. A fine specimen of the muscovite was found in 1838 embedded in a marsh near the town. There are several mills in the place. Pop. 2500.

BUDAPEST, a town in Austrian empire, Hungary co. and 4 m. E. Pesth. The inhabitants live by raising wheat, fruit, and wine, and rearing cattle. In the vicinity in a high valley enclosed by forests are the ruins of an ancient monastery. Pop. 27,885.

BUDAON a dist. and town in India, N. W. Province, Rohil kund. The district between lat. 27° 35' and 28° 00' N lon. 79° 11' and 80° 35' E. is bounded N. by Moradabad, N. E. Bareilly, S. E. Shahjahanpur, S. Panchsahel and Mynpoore and W. Aligarh and Meerut districts, 2,568 sq. m. The surface low flat and generally fertile, is watered in the N. W. throughout its whole length by the Ganges, in the E. by the Ramganga and in the intervening space by the Yamunah and Sote and the Muhana. Part of the district is still wild and uncultivated and wolves are very numerous. Pop. 823,713. —The town cap. of the above dist. on an affluent of the Ganges 30 m. S. W. Bareilly became the headquarters of a body of mutineers during the sepoy mutiny and was in consequence wrested from them on the 19th of April 1858 after a defence which cost them four guns and five hundred men. On the 30th of same month, a second defeat was inflicted on them in the same locality. Pop. 1,269.

BUDAPEST, a town in Austrian empire, Hungary co. and 4 m. S. E. Pesth. The inhabitants are almost all employed in cultivating the vine. On a hill in the vicinity numerous rocky caverns have been converted into wine cellars. Pop. 28,500.

BUDAPESZT a town in Austrian empire Hungary co. Mar mar about 17 m. S. E. Szeged in the midst of extensive forests, with 1,600 inhabitants, who are employed in selling and sawing timber and in making charcoal.

BUDIN a town in Austrian empire, B. house, and 10 m. S. Leitmeritz, on the Elbe with a deanery church a town-house a castle, an hospital and a brewery. Pop. 1,200.

BUDIN a town in Austrian empire, Dalmatia, circle and 10 m. S. by E. Lattaro. Though a small place it is surrounded by walls and defended by a castle, and has a R. Catholic and a united Greek church. Pop. 900.

BUDANOV a town in Austria, empire, Galicia circle and 10 m. N. Caribor cap. dist. of same name on the border with a fine castle an institute of the Sisters of Mercy an infirmary an orphan asylum and an extensive trade in corn. Pop. 4199.

BUDNO a river or Chilo prov. Valdivia, which issuing from Lake Manos, flows W. in a very serpentine course for about 30 m. is then augmented first by the Pimayquen coming W. N. W. from Lake Puyehue and next by the Rahue from Lake Langulilla, and still continuing to flow nearly due W. falls into the Pacific. It is navigable at all seasons from the junction of the Rahue a distance of about 20 m.

BUEEN AYRES [add.] The disturbed state of the Argentine republic, caused by the internal dissensions and conflict of the members of it has greatly obstructed its prosperity. Buenos Ayres has suffered especially have recently more than once been subjected to invasion and siege. The exports from the port of Buenos Ayres in 1860 were —

4,428,545 milled on hides, valued at 25c. each	256,478
121,771 doz.	1,217,771
25,000 milled horse hides, do.	625,000
60,000 doz.	11,000
11.50 pipes of tobacco	261,000
1.7. 1000	145,000
66,746 lbs. of wool, do.	1,318,150
7,546 " horse hair	125,000
5,551 " sheep skin	225,000
466,734 cu. m. of milled beef	566,984
	24,176,496

The militia and national guard of the province number 19,567 men, besides the quota of the federal army. The public debt of the province upon British loans is £2,285,000. The estimated population of the city and province is as follows:—

Nationalities.	City	Province.
Argentines	7,000	159,000
Spaniards	10,000	16,000
English and Irish	5,000	80,000
French	10,000	15,000
Italians	10,000	10,000
Americans	2,000	1,000
German	2,500	1,000
Portuguese	1,000	1,000
Montebiancas and others	9,000	500
Indians	—	30,000
Total	140,000	230,000

Since 1856 from 6000 to 8000 immigrants have annually entered the province about 12,000 Irish have acquired settlements.

BUFFYNTURA a river and town in S. America, New Granada. The river, rising in the W. slope of the Cordillera flows N. N. W. and falls into the Bay of Choco in lat. (Bueno Punto, 8° 49' 27" N. lon. 77° 10' 50" W. It is a broad deep stream and is navigable for 10 m. above its mouth by vessels drawing 24 ft. —The town situated on the E. bank of the river at the point where, as already stated, it is navigable for vessels of large burden, possesses great natural advantages as a port and promises to become an important emporium for the state of New Granada, as all the W. foreign traffic of Bogota the capital must pass through it, there being no other practicable communication to the Pacific. The great drawback to the want of good roads and hence the town is as yet a comparatively poor place, consisting of mean houses inhabited chiefly by negroes and mulattoes. It is however the residence of a governor is defended by a battery possesses a custom-house, and carries on a considerable trade, exporting rum, sugar and tobacco, and importing salt, garlic, straw hats and hammocks. The climate is considered unhealthy. Pop. 1000.

BUFFALO [add.] a town in U. States, New York, cap. Erie, at the E. extremity of Lake Erie, where the Niagara issues from it, and on the New York Central R.R. 42 mi. S. E. of Buffalo. It is connected principally by wide and straight streets, which cross at right angles, but partly also of others which meet the main street obliquely and prevent monotony of aspect. The whole site is a plain with a gentle descent towards the lake and well covered with houses except in a few localities, where open spaces or squares have been left for ornament and ventilation. The climate is said to be more equable than that of any other place within the States of the same latitude and thus, combined with an admirable system of sewerage has proved so conducive to health that the yearly mortality is only 9 per cent. The principal public buildings are a large and handsome edifice, erected by the general government, and containing a courthouse, custom-house, and post-office. A excellent market houses and 57 churches among which particular notice is due to the Episcopal churches of St. John and St. Paul the former built in a kind of transition style from the early English to the Gothic the latter remarkable for its picturesque appearance and the variety of its outlines, and to the R. Catholic cathedral, an imposing structure of decorated Gothic, flanked on its E. front with two towers, and adorned with a window of stained glass from Madrid. The other buildings and institutions of note are Buffalo university occupying a fine building but as yet confined entirely to the medical department; a liberally endowed and flourishing female academy a young men's literary association, with a library of above 9000 vols. an orphan asylum a general hospital and a fine cemetery situated in the suburbs, and covering about 75 acres. Manufactures are numerous, and produce annually to an amount exceeding £3,000,000 but the only one of much importance is ship-building. For it there are seven yards from which in 1847 there were launched 18,358 tons of shipping. The trade, greatly favoured by the harbour which by means of breakwaters, has been rendered safe and spacious and by the

vacuous railways, is largely developed. The chief articles are flour and grain. Pop. (1860) 81 129

The imports by lake in the year 1861 were of wheat, 96,685 725 bush, corn 20 572,600 bush, flour 1 500 667 as to be in place incommensurable, and having moreover a shallow bar at its entrance, it is not likely ever to possess importance as a navigable stream.

The lake shipping at the port in 1861 is stated to have been as follows:—

	Unladen.		Loaded.	
	Vessels.	Tons.	Vessels.	Tons.
American.	1184	1 167 597	1171	1 105,403
Foreign.	681	62,140	623	49,281
Coasting.	4301	1 586,218	4176	1 836,805
	6066	2,866 720	6000	2,978 584

BUCAS-BOCARD a tn. Austrian empire, Transylv. vana, circle and about 17 m N. E. Kriching with a fine castle a salt spring and a trade in wine and fruit. Pop. 1850

BUGHIAZ a delta, N. Arabia, Najd about 50 m S W Medina, where the Egyptians under Tassam Bey were totally defeated by the Harb Bedouin and the Wahabees in 1811

BUGOMAN a tn Central Africa, nominally belonging to Bagirmi but virtually independent 60 m W Masena, 1 bank Stan which is here about 500 yards wide and has a low sandy bank, which it overflows during the rains so as to inundate a large extent of country. Though rather in a state of decay the town on approaching it, has a pleasant appearance, produced by the variety of trees by which it is surrounded. Its market presents a busy scene to which additional interest is given by the number of boats crossing the ferry. When the sultan of Bagirmi stopped Dr Barth on his journey to Masena he ordered him to wait at Bugoman but when the doctor sent a messenger to the governor to request a passport, the functionary showed how little he valued the sultan's authority by promptly refusing to admit him.

BUI a tn to Russia gov. and 40 m N by F Kostroma cap circle of same name in the Kostroma, where it recovers the Weska. It has four churches, a circle and a parish school and three benevolent institutions. Pop. 2018

BUCJAK, a tn Austrian empire Hungary co Neograd 10 m N W Balaia Gymnastic with the ruins of an old castle seated on a wooded hill and a trade in excellent wine Pop. 1850

BUKOWIN a tn Austrian empire, Galicia circle New Bouda about 40 m E by N Gzow in an alpine district at the height of 5600 ft above the sea. To the S. of it is a wall and romantic street, containing one valley with seven lakes another with five lakes and a waterfall which plunges over a precipice between perpendicular walls of granite, and a third containing the great Fish Lake, the largest of all and the source of the Bialka. From the borders of this lake rises the Bielica, the loftiest summit of Mount Tatras. Pop. 1050

BUKTERMA a river Siberia, one of the affluents of the Irtysh. It is the W commencement of a line of demarcation, by which in accordance with a treaty concluded between Russia and China in 1728 the frontiers of the two countries were defined. This line which had its E. termination in the Sea of Okhotsk was 3000 m. long

BULKUN a river Amoor land an affluent of the Amoor which it joins on its 1 bank above the confluence of the Kumara. Its course is upon the whole S E. On arriving at the Bulkun from the W the country watered by the Amoor assumes a more pleasing character. The plains become wider the meadows are covered with a nourishing grass, and trees of poplar ash and wild apple occur with shrubs of red-barked alder and willows, &c.

BULLER, or KAWATZKE, a river one of the largest in New Zealand has its source in Lakes Rotomah and Rotiti in the N of Middle Island or Munster 40 m S W Nelson flows W S W through an extensive gap in the mountains which bound it on either side and, augmented by several smaller streams, reaches the ocean on the W coast 7½ m E.

of Cape Foulwind. It varies in width from a quarter to a third of a mile, but being subject to very heavy freshes from the mountains torrents, and rising with great rapidity frequently between rocky gorges and cliffs so perpendicular as to be in places inaccessible, and having moreover a shallow bar at its entrance, it is not likely ever to possess importance as a navigable stream.

BULL RUN a stream 1 State Virginia, crossed by the railway from Alexandria to Manassas, and flowing through a range of hills and ravines, between high and wooded banks, into the Osoaquan River 14 m from its mouth. It is memorable as the scene of the first great encounter of the civil war on July 21 1861 between the Federal and Confederate armies in which the former after maintaining their ground for some time were seized with a sudden panic, which impelled them to retreat in the most disorderly and precipitant manner towards Washington

BULRAMI OOR a tn India On the near the frontiers of Nepal 89 m N. L. Lucknow. It stands on a beautiful plain on the Raptree and is a place of considerable size, consisting of mud houses covered with thatch. Being situated on one of its most frequent routes from Thakoon to Nepal it is visited in spring and summer by great numbers of traders from the mountains and the low country who meet here to exchange their products

BUI SAR [old] a tn India grand Bombay dist. Surat, at the mouth of a small stream of same name in the Gulf of Cambay and on the Bombay and Baroda railway 19 m N Bombay. Though ill-situated on rugged ground close to insubstantial swamps and possessed only of a harbour across the mouth of which there is a rocky bank with not more than 6 ft at low water it is a thrifty place, with manufactures of cloths, and a considerable trade in salt grain and sugar Pop. 7000

BULUGURU BALANGARAK or FENIKHABAD, a tn India, N W Province, cap jaghira of same name, 29 m S. by P Delhi a pleasing and well cultivated district. Though small and crowded into narrow streets it is not ill built is inclosed by a deep ditch and a high brick wall with mud bastions and contains many good houses and several temples. The rajah's palace is a neat edifice arranged around a small court, with a marble fountain in its centre and an open arched hall. The jaghira of which this town is the capital extends 20 m along the S bank of the Jumna, and has an estimated pop. of 57 000. The rajah revolted in the spring of 1857 but was speedily captured and the insurrectionary movement suppressed

BULM BUI U a plateau or steppe, S W Africa Kun handi country territory 1316 consisting of a long and comparatively narrow tract bounding or forming an outlying portion of the S and W and stretching for a long distance N near the 1 bank and almost parallel to the course of the Kunala. Its whole length is estimated at 160 m and its height above sea-level not less than 6000 ft. Several rivers great and small have their sources upon it. It is covered with long grass, but over the whole not a single tree or prominent object of any kind meets the eye. The surface, however being undulating has a number of small depressions, in which springs of water are found and it appears not wholly destitute of human habitations. Storms of hail in seasons as large as a hand rest, are sometimes seen. Ledwicks Magpies encountered one of them when in a few minutes covered the whole steppe as far as the eye could reach with a mantle of white.

BULM or BAH a tn Persia, prov. and 100 m S E Kerman, on the Tehrud lat. 29° 8' N lon 58° 16' E. It is an ancient place, and said to have been once as large as Kerman. It now consists of a small square fort crowning a lofty mound and rock and a number of houses clustering round its foot. The fort appears to have been built with care and has a small garrison with a few guns. The town is little better than a ruin and the inhabitants estimated at about 400 families, live almost entirely outside the walls, in houses scattered among gardens and groves of palm pomegranate and other trees. Though the trade is trifling the products of the British looms were observed among the articles exposed for sale in the shops

DUNAE, or BHUAY a tn and fort, India, dist and 80 m S. S. E. Ajmere, cap pergunnah of same name lat.

26° 5' N lon **74 47 E**. The town stands at the foot of an isolated steep craggy hill covered with cactus and is a good-sized place, with two very elegant little temples.—The town crowns the summit of the hill, and is the real centre of the rajah, who belongs to the Rajpoot tribe of Rajpoots. The rajpoots contain 85 villages and 87,340 inhabitants.

BUNARHISSAR, a town European Turkey 85 m W N W Constantinople, on a stream of same name supposed to be the ancient Taurer contains 150 Turkish 150 Greek, and 150 Bulgarian houses. Its ancient importance is still indicated by scattered fragments of ancient walls three miles toward, and the remains of a Byzantine castle which was taken and destroyed by Sultan Murad I in 1371.

BUNAR, two rivers India.—1. *E. Bunas* which rises on the S E frontier of Bundelcund, flows N W, and after a course of 70 m joins the Ganges in lat. 24 14 N lon. 81 33 E. near Banpoor.—2. *B. Bunas* which rises in the Aravalli Mountains in Rajpootana, on the confines of Jodpore and Mewar flows S W into Gujarat and after a course of 180 m, dividing into several small and intricate channels is lost in the Kunn of Cutch.

BUNDER DHIM a small seaport on the Persian Gulf, 85 m N N W Bushire. Though now only a miserable fishing village it was once the site of a Dutch factory which is still pointed out, and a place of considerable trade.

BUNDER KILIL, a town Persian Khuzestan 38 m N E. Bushir. It is walled, but derives its chief importance from its admirable military position at the junction of the Karun and Abund, or Dufal, commanding both rivers.

BUNDER RIK a small seaport on the Persian Gulf at the mouth of Kishut, 20 m N N W Bushir. It was once the stronghold of the celebrated pirate Meer Mahura who was the terror of the gulf. When the place was taken he retired to Karak from which he was driven out by the British fleet. The fortifications of Bunder Rik being razed it lost most of its importance though it continues to be the residence of the principal Arab chief on the coast.

BUNDY a town in Africa, Roman cap prov of same name 115 m W. Birm. It is a place of tolerable size, surrounded not only with an earthen wall and ditch but with a dense thorny fence. The town as well as the whole province exhibits many symptoms of decay produced mainly by misgovernment. There is no market of any importance, though the inhabitants, who belong to the Mungu nation, the chief element of the Kanuri amount to about 8000.

BL NE, the names of two nearly contiguous towns W Africa, Bornu prov Muwyi, 185 m W N W Birm.—1. *Old Duse*, which is built in a recess among the rocky cliffs of a mountain at a height of about 1150 ft. It had been nearly destroyed by a conflagration, but some progress had been made in rebuilding it at the time of Dr Barth's visit. Its prosperity has been seriously affected by the foundation of—2. *New Duse* which has in a great measure eclipsed its predecessor and carried off its trade.

BUNGAVAPILLY a town India, presid. Madras dist and 64 m N W Cuddapah, and about 200 m W V. Madras. It stands on a plain near the entrance of a broad defile, and is intersected by different branches of a small stream called the Zeyar. It is defended by a fort, surrounded by a high wall flanked with round bastions but presents an unimpressive and ramshackle appearance. The only edifice of any consequence is the palace of the nabob, who holds Bungeavapilly jaghire. The diamond mines, which have given it celebrity are situated about half a mile from the town near a low range of hills.

BUNIC a town Austrian empire, Military Frontiers, Croatia dist. Otoczek, 56 m S R. Karlovitz, with a Greek neo united parish church and the ruins of a strong castle, built by the Turks in 1555. There is a remarkable cavern in the vicinity. Pop. 3780.

BUNIA a town W Africa Hausaland prov and about 45 m W Katsina, is surrounded by a half-natural half-artificial stockade of dense forest, and a clay wall 12 ft. in height. It consists of the town proper and a suburb, and the inhabitants are industrious and sociable. Gray monkeys abound in the neighbourhood. Pop. about 5000.

BUNTAWAL, a town India, presid. Madras, dist. S. Canara, c. bank Mettawati, which descends from the W Ghats,

and falls into the sea at Mangalore 17 m below the town. It consists of about 1000 thatched houses, and is an active entrepot for the trade between Canara and Mysore. One of its staples is coffee. The town was nearly destroyed by Tipu Sultan during the Mysore wars in the eighteenth century.

BURAZJUN a town Persia, 25 m N E Bushra. It is a large place, the cap. of a district, and is fortified with walls and towers of mud. In the vicinity date-palms are very numerous.

BURDEKIN [add] a river N E Australia, Queensland which runs about lat. 18° 8' lon. 144° W flows S E along the W slopes of a lofty range, running nearly parallel to the coast, and on reaching Mount M. Connell near the point where it receives the Sutton and the Baylands forces its way through the granite of the range, and turning N E, pours its waters into the bays of L'Esperance, Howling Green, and Cleveland about lat. 19° 30' S, forming a delta which extends over 60 m. With its affluent it waters a large extent of country much of which is well adapted for settlement, and it was hoped that it might prove navigable from the coast, and thus afford ample facilities for reaching the interior. It was ascertained however by careful exploration in 1860 that of the numerous branches into which the Burdekin divides in forming its delta, there is not one fit for navigation.

BURDWAN [add] a dist and town India, presid. Bengal. The town between lat. 22° 53' and 24° 40' N lon 87° 21' and 88° 53' E is bounded N by Burdwan N. E. and E. by Nadia, N. W. by Hooghly and Midnapore, and W. by Jessore. Length N. E. to S. W. about 70 m, breadth 60 m, area, 2,144 sq m. The surface with the exception of some slight hilly eminences in the W is flat little elevated above the sea, and watered by numerous streams of which the most important are the Bhagratree, the Hooghly formed by it and the Jellinghee, the Hudgee, and the Damoodah. All these streams are navigable but the district is provided with additional means of conveyance by the East Indian railway. Burdwan owes much of its importance to its mineral field, which is rich in both coal and iron, and has for some time been worked to a considerable extent. The whole district, except a few spots, is well cultivated, and raises good crops of rice, sugar, potatoes, indigo, oilseeds, tobacco and cotton. Pop. 1,854,152.—The town cap. of the above dist situated 6 m (by rail) N N W Calcutta, on the bank of the Damoodah and on the East Indian railway consists of a town and suburbs both composed for the most part of mud huts covered with thatch and intermingled with a number of good houses. The only building of any pretensions is the residence of the titular rajah, placed in the midst of a natural garden, but presenting the appearance, not so much of one regular and symmetrical structure as of a conglomeration of buildings of various sizes and colours. One of the greatest ornaments of the place is an artificial lake covering about thirty acres, surrounded by a causeway formed of the earth thrown out in digging it and giving access through an ornamented porch to it numerous bathes where the people descend into its waters. There are here two English schools one established by government and the other belonging to the Church Missionary Society. Pop. about 50,000.

BUREJA or **BURJA** or **BURJA** a river Siberia Mandchuria, which rises about lat. 52° N lon 124° E, in a mountain range which furnishes the sources of several rivers, flows tortuously S. W. and joins the bank Amur considerably below the Zeyar about lat. 49° 30' N lon 129° 40' E. The tract between these rivers is said to resemble the middle zone of European Russia, and to be capable of sustaining a large population. The valley of the Burja is very picturesque, and in its upper part is much frequented by hunters for its excellent fables.

BURGBERG a town Austrian empire, Transylvania, circle and 16 m N E. Hermannstadt, with a parish church, a R. Catholic, and a neo united Greek church. Pop. 1900.

BURICA a territory Isthmus of Panama, prov. Chiriqui between lat. 8° and 9° N and lon. 82° 54' and 88° 10' W. It extends from the coast of the Pacific to the summit of the N Cordillera, and has an estimated area of 800,000 acres. It has three ports on the Guanamoo coast an extensive region of coconut trees, 21 to 25 m. long and an unusual abundance of other vegetable products, including dyewoods.

It is understood also to be rich in surfers and other minerals, though this is rather conjectured than ascertained. The railway across the isthmus has necessarily made a most important addition to its facilities for trade.

BURKE CHANNEL [add.] British Columbia, 80 m N Vancouver Island. It runs inland for 50 m and then divides into three arms. Doan's Canal which trends nearly N for 20 m and North Beltrusk Arms, from which a good available route is projected over a generally level country to the Caribou gold-fields.

BURLINGTON [add.] three places, U States.—1 A town and port of entry Vermont, cap co. Chittenden on a bay in Lake Champlain. It stands amidst beautiful scenery occupying a slope which rises gradually from the lake, and commands one of the finest views in New England. It is the largest place in the state contains many spacious streets and avenues planted with trees and lined by elegant mansions and possesses eight churches a university with seven professors and ninety-eight students, numerous other schools a court house and jail a custom house, and a marine hospital. The harbour the best on the lake, is protected by a break water 900 ft long and additional means of transport in all directions are furnished by the Vermont, Central and Canada, and by the Rutland and Burlington railways. Most of the shipping in Lake Champlain is owned by the inhabitants who amount to about 8000.—2 A town and port of entry New Jersey on the Delaware at the junction of the Assanunk Creek, 20 m N E Philadelphia. It is one of the few places in the United States which has retrograded rather than advanced. Its trade may be traced to the rise of Philadelphia which has carried off the greater part of its trade. The principal public buildings are nine churches of which three belong to the Episcopians are well endowed a college and a hall both Episcopal, and attended by a large number of students an ancient library possessed of many rare and valuable works, and a large number of schools partly supported by the liberality of an early settler. Pop about 5000.—3 A town Iowa, cap co Des Moines on the bank Mississippi and on the Chicago and Burlington the Peoria and Burlington and the Burlington and Missouri River railways. It possesses eleven churches a university occupying a conspicuous site and said to be flourishing and various other schools, several of them of superior description. The extensive coal fields in the vicinity afford great facilities for manufacturing which accordingly are numerous and important, including starch and soap factories iron foundries breweries, pork packing houses and oil flour and saw mills. Pop (1858) 16,000.

BURMAH *Burmah*, a prov British India, lying along the E. shore of Bay of Bengal from the mouth of the Mafetuary in about lat. 20° 50' N to the Pak-ohai River in about 10° 50' N. It possesses a direct line of sea coast of not less than 500 m area 90,000 sq m. It is formed of three divisions each of which possesses one principal export. Pagan has Monks' large Rangoon and Arracan. Akyah the first and last of which have risen entirely under British rule. Arracan, the N division of the province is separated to the E. from Pagan and Upper Burma by a range of mountains whose greatest elevation is about 7000 ft and running nearly parallel with the coast, gradually lowering towards the B. The N part of the country has a large area of alluvial soil in the lower courses of the river Kaladyn and

its numerous affluents. The breadth of the land there, from the sea-shore to the mountains, is from 80 to 90 m, and is generally fully covered with forest, and difficult of access. Between the range separating Arracan from Pagan and the sea, for a length of nearly 800 m as far as Cape Negrais, the country is a mere narrow strip of land. 1 Akyah and Martaban lie in the valleys of the Irrawaddy and Sitang Rivers these valleys, bounded E. and W. by mountain ranges, are narrow in the upper portion but expand at the delta of the Irrawaddy into a magnificent alluvial region penetrated by a vast number of tidal creeks and extend over 10,000 sq m. N. Tenasserim is bounded on the W. by the last 100 m of the course of the great river Salween and here the breadth of land from the sea shore to the central mountain range, which divides the two rivers on the E. from Kusan, is about 80 m. This space is gradually narrowed to 40 m at the extremity in lat. 11 N. There is no river of any importance S. of the Salween. The interior is a wilderness of hills densely wooded, with long narrow valleys. The country is generally peopled by various branches of the Indo-Chinese family. The Burmese are the most advanced race and the Arracanese are of the same race and speak the same language though geographically isolated. The occupation is chiefly agriculture, which is rude in kind but the fertility of the soil is very great. There is only one grain crop in the year and one cereal rice is cultivated almost exclusively. On the hills the people clear a fresh patch of forest by burning the timber on the ground and change their villages as the soil becomes exhausted. Usually they have plenty of food and clothes and occupy houses of bamboo raised on platforms above the ground. The remote hill tribes are in a savage state, except in the district of Loongoo in which education and Christianity have wrought an entire change. At the principal seaports Europeans and foreign Asiatics have settled in considerable numbers and opened a trade for the tea, rice, petroleum and other products of the country. The people generally since the British occupation have acquired a good deal of personal property the small landed proprietors are independent as the laborers obtain wages sufficient for their comfortable subsistence.

In 1855 a war broke out between Great Britain and the Burmese empire occasioned by the refusal of the government of the latter to give satisfaction for various insults and oppressions exercised against it by British merchants at Rangoon. General Godwin Haig bore thereupon sent with an army to the mouth of the Irrawaddy compelled hostilities by the siege and capture of the town of Martaban on 5th April, and although our troops sustained afterwards a repulse at Rangoon the expeditions against Prome and Pegu were more successful resulting in the capture of both these places, and the consequent annexation of the provinces of Pegu to British India. The king of A. shortly afterwards agreed to make the concessions demanded and in June 1856 the war was formally terminated by a proclamation of the Indian governor-general.

The maritime provinces comprising the ancient kingdoms of Pegu and Arracan with the long line of sea-coast known as Tenasserim were united under one local administration under British rule, and called British Burma on January 31 1867. Arracan and Tenasserim were acquired by treaty after the war of 1825-6. The following table gives the last statistics of the produce for the year 1861-2—

Divisions.	Area, sq m.	Pop.	Area cultivated.	Land Revenue.	Capitation Tax.	Outposts, &c.	Fiberine, Opium and Siam.	Total Revenue.
Pegu	24,500	1,150,128	90,401	£119,835	£119,304	£156,875	£171,107	£567,021
Tenasserim	35,000	3,102,380	301,415	£5,838	£5,838	108,108	108,108	120,301
Arracan	17,800	875,356	859,158	£7,300	£7,048	55,066	38,000	179,549
Total	90,000	1,527,864	1,050,589	£225,073	£223,305	£320,049	£317,215	£966,748

In the same year 1861 777,771 vessel of which 559 were British and 108 American entered the ports of British Burma and 768 vessels (508 British and 113 American) cleared from them the respective tonnage being 401,499 and 887,817 in addition to which 608 net, craft entered and 628 cleared, the tonnage being 88,684 and 88,880 respectively. The imports, still of the same year amounted to £200,145 in *Sure Ins Gaz.*—Vol. I.

merchandise and £28,645 in treasure of the former £288,957 was from the United Kingdom the exports were of the value of £1,422,275 in merchandise, of which £1,178,687 went to the United Kingdom the principal articles of export being cotton £12,088 drugs £23,083 rice £208,782 oil, £22,180 and timber and woods, £417,610.

The ports of British Burma had the following amount of

foreign commerce in the year 1863:—Moulmein, imports 244,643; exports 243,308. Mangung imports, 244,643; exports, 243,308. Alayah, imports, 243,308; exports, 243,308.

BURNAB a river India, which rises about 15 m. N. of the town of Burnab, for about 25 m. above S.E. forming for 50 m. the boundary between districts Mirzapur and Jansang, and continuing the same direction for about 25 m. through d. t. Benares, joins the Ganges on its left bank in lat. 25° 18' N. lon. 83° 7' E. During the rains it is navigable by large boats.

BURNABANDA a vil. India, Rajpootana, state and 50 m. N.E. of Jaipur. It is situated in an open grassy plain forming a pleasing contrast to the general aridity of the surrounding country and is supplied with good water from a tank and four wells. Pop. 1640.

BURBANK or **BURBANK** a vil. Hindoostan, present Madras, dist. Ganjam, 335 m. S.E. of Calcutta. It consists of a town and a military cantonment. The town has arrow dirty streets, mean houses, mostly of mud with a few of brick, bazars well supplied both with necessities and luxuries, and manufactures of silk and cotton goods, and of large quantities of sugar and sugar-candy. The cantonment is situated on a rocky ledge, in the midst of a large cultivated plain studded with numerous tanks but not watered by any permanent stream. Top of it is extensive of cantonment, about 2000.

BURBANK (also British Columbia, Western N. Am. river, 15 m. N. entrance Fraser River. Cant. has been found on its shores and in the winter when the Fraser is sometimes frozen up the only access to the interior of Columbia is by this inlet and F. t. Moody to which steamers have to bring their passengers, mail, and supplies which are then transported by a good road to the cap. New Westminster distant 3 m.

BURBANK a kingdom W. Africa, lat. 14° 30' N. lon. 16° 40' W. The chief town is Jod 26 m. N. of the river. The men are tall, muscular, and in appearance and manner the women above the ordinary stature full well made with small high features, and sparkling eyes. The exports are gum, cane, rice, lime, cattle, hides and ivory.

BURBANK a vil. India, Bundelkhand 83 m. N.E. of Allahabad. It lies at the base of a lofty rocky ridge overlooked by a picturesque old fort, which crowns one of the summits and possesses a banner. To the E. of it is a fine sheet of water abounding with excellent fish and formed by damming up the lower gorge of a valley with a masonry embankment 1 m. long and 60 ft. broad.

BURBANK a vil. India, Bundelkhand, lat. 14° 30' N. lon. 16° 40' W. It is situated on the central plateau in the basin of the Godavari, at the height of about 2000 ft. above the sea, 160 m. S.W. of the town of Hyderabad. It was taken by the French in November 1840 and immediately converted by them into an important military station. Before the capture it was the centre of a considerable trade, and the principal entrepôt for the products of the surrounding district. It has been somewhat improved by the settlement of a number of European merchants, and by the houses which they have erected for their residences. The town however presents almost as much of the Arab type as ever. It is surrounded by beautiful and productive gardens and divided into eight quarters, consisting of houses built mostly of earth. The principal buildings are five mosques, one of which is a very handsome structure. The inhabitants, about 2600, are very industrious, and employ themselves partly in manufactures, as armaments, dyes and weavers, or in trade in which the principal articles are the products of the Tell and of Bouda, including wool and silk. The importance of the latter article may be inferred from the fact that the town contains forty silk factories.

BURBANK a vil. Turkey in Europe, Macedonia, cap. circle and on a river of same name, 60 m. N.E. of Thessalonica, on the road leading from it to Janina. It is the seat of a court of primary jurisdiction and the one of a bishop, and has an ecclesiastical seminary, a normal school and important weekly markets. Pop. 5200.

BURBANK a vil. N. Africa, Algerian Sahara on a river of same name 190 m. S. by E. of Oran. Though only a small place containing about a hundred houses it is

surrounded by a wall with three gates. The springs in the neighbourhood furnishing the means of irrigation, the surrounding district is remarkable for its fertility and gives full employment to the greater part of the inhabitants, the remainder working at the ordinary handicrafts. In the large gardens of the environs from 3000 to 4000 date-palms are growing.

BURBANK (also), a hill state, N. India, between lat. 30° 56' and 32° 8' lon. 77° 54' and 78° 58' S. Gurwal, and by the British dist. Bhillai. It Chinese Tartary, S. Gurwal, and S.W. several adjacent hill states; length, N.E. to S.W., about 50 m. breadth 55 m. area, 3000 sq. m. It is one of the loftiest and most mountainous tracts in the world, being nearly in a line of the principal axis of the Himalaya. The lowest elevations, as determined by the points at which the Kulu and Pabna gorges in their descent, are respectively 8087 and 4932 ft. above the sea, and its highest summits rise from 18,000 ft. upwards to the culminating point of 21,178. At least five peaks exceed 19,000 ft. Nearly the whole drainage is received by the Kulu and the Pabna part of it directly and part by numerous affluents and mountain torrents. Copper is found near Ropay in the Darbhanga valley. The vegetable productions vary from the inter-tropical character which they present on the banks of the Kulu in the lowest part of it to those within the state, where bamboos and some tropical fruits thrive to that of evergreen vegetation on the borders of perpetual snow. The deciduous which is one of the most magnificent of the Himalayan pines and promises to become acclimated in our own country is found at elevations varying from 6400 to 13,000 ft. The vine (of which 6000 acres were under cultivation in 1860) ripens its fruit as high as 8000 ft. Where it falls the currant and raspberry commence. Apples thrive and yield abundances of fruit at 11,000 ft. wheat and barley are cultivated at 13,000 and vegetation is not entirely extinct at 17,000.

In the lower elevated regions wheat is the main crop. Potatoes first introduced by the Gurwal, are now so extensively grown as to form an important article of export to the lower country. Of some articles two crops are matured in a single year and the interval between them is so short that the reaper and the sower are often seen at work together in the same field. The inhabitants according to one account, bear a bad name and are said to be violent, treacherous, and addicted to all the worst vices. According to others they are a fine and active race, hospitable, trustworthy, honest, and truthful, the higher classes being of Caucasian descent. In several districts, new industries including wool and textile fabrics, are carried to considerable perfection and traders traverse the country with their goods, and an extensive business is done. The state is governed by a rajah of Rajpoot extraction, as a tributary of the British government. His annual revenue paid principally in kind and consisting of agricultural produce, metals, blankets and other coarse manufactures is estimated at £150,000. The amount of tribute is only £1500. Estimated pop. 150,000.

BURBANK a vil. India, W. Province, dist. and 43 m. W. of Lucknow. It is enclosed by a ditch and a bamboo hedge and has a mud fort and a well supplied bazaar. It is however a poor place, about half a mile square, consisting of about 800 huts buddled together in narrow lanes.

BURBANK an inlet British Columbia, E. side Gulf of Georgia. It is long and narrow stretching to the N.E., and from the head of it a company have undertaken to construct a route of 241 m. of which 85 m. are by lake and river to Alexandria, on the upper Fraser River for the Cariboo gold-fields.

BURBANK a vil. Austria, empire, Bobanin circle and about 15 m. W. Prague. It has a castle, finely situated on a commanding height, a chapel, a brewery and a distillery. Pop. 3600.

BURBANK a vil. Austria, empire, Hungary, cap. circle and 34 m. S.E. of Pest, dist. of same name, with an infirmary, a court of justice, and a mill. Pop. 5149.

BUTUAN a vil. Philippine Isles, cap. dist. and near a bay of same name, on the N. coast of the island of Mindanao, about lat. 8° 45' N. lon. 125° 12' E. It stands about 4 m. above the mouth of a branch of the river which proceeds from Lake Sapogang and is here navigable for vessels of 100 tons burthen. The only important product of the vicinity is the sago-palm. It coincides with its dist. a pop. of 9804.

BUYUK ALADIN a vil. European Turkey Bulgaria 6 m. W. Varna. The battle between Alexander and the Thracians was fought in its vicinity.

BYAN KENO a vil. Russian empire Trans-Baikal prov. on the Bialka, below Nerchinsk. It is a large place, containing two churches, the one of wood and the other of brick, and is inhabited partly by Cossacks and partly by convicts.

BYETORNEFE, a river India which rises near Lalail eggs, in Orissa in lat. 23° 29' N. lon. 84° 55' E., flows very obliquely first S. E. W. and then S. E. E. through Cuttack and falls into the Bay of Bengal after a course of about 270 m. during the last ten of which it takes the name of the *Dhuanetz*. It is full in great veneration by the Hindus especially at its source.

BYGHOOI or *Brasul*, a river India which rises in dist. Pilleeshoot in Rohilkund flows S. for about 130 m., and joins the W. Ramganga on its l. bank. It is much used for irrigation.

DYBON an island British America Gulf of St. Lawrence, about 10 m. from the N. cape of the Magdalen group. It is rather more than 4 m. long and 1 m. broad and is formed of alternating and nearly horizontal strata of red sandstone, red ochreous clay and shaly gray sandstone. These rocks form perpendicular or overhanging cliffs all round the shores and being soft and friable are broken in holes and caverns, and fast giving way to the action of the sea. A large upland tract is covered with good native grass but a great part of the surface is wooded with dwarf spruces. The soil is much habited.

C

CABANGO a tn. S.W. Africa on the W. frontier of the country of Landu or Balanda, lat. 9° 31' S. lon. 30° 31' E. It is situated on the (N)hombo is the residence of a native chief subordinate to Matambo and consists of about 200 huts and a dome square houses constructed of poles interwoven with grass. The latter are occupied by half-caste Portuguese, agents of the Cape traders. Irvanians are here very about land and sheep.

CACABA a tn. Brazil prov. Rio Grande do Sul beautifully situated on a mountain at alt. 2,000 ft. above the sea 190 m. W. S. W. Alegre lat. 30° 30' S. lon. 53° 30' W. It consists of several well-furnished streets with some substantial and even elegant houses but is on its chief claim to notice from having been at one time selected as an important military station and the site of a citadel. The selection was afterwards abandoned but in the meantime the works had been commenced, and the consequence is that the greater part of the place is occupied by unfinished buildings evidently intended to be of a magnificent description on which from the progress made in their erection a very large sum must have been expended. Among these unfinished buildings, which have very much the appearance of ruins, the most conspicuous are the church, the barracks, the house of correction and large portions of a octagonal citadel. P. 60.

CACABANA a river La Plata which rises in the prov. and the Sierra of Cordova, at first pursues an E. course, under the name of Turero. On receiving the Quirio which doubles its volume, and entering the prov. of Entre Rios, it becomes the Caracana, which thereafter has a circuitous course for 130 m. and joins r. bank Parana. Its fall, at the rate of 2½ ft. to the mile is too great to admit of its successful navigation either in its natural state or by the appliances of artificial means.

CAOLUGA a tn. British America Canada E. on Temagami, beautifully situated on a height above r. bank St. Lawrence 100 m. N. E. Quebec. It possesses a R. Catholic chapel and having a fine beach for bathing has become a very fashionable watering place, especially popular in summer months between St. Montreal and Quebec. Pop. about 1000. **CADEREYTA-XIMENES** two tns. Mexico.—1) Nuevoleon in a fertile district, 23 m. E. Monterey lat. 25° 44' N. lon. 99° 48' W. It is a well built handsome town with about 2000 inhabitants most of whom are engaged in agriculture.—2) A tn. state and 22 m. E. Queretaro in the valley of San Juan and at the foot of the Sierra Gorda. It is a well built place, which long owed its prosperity to the richness of its mines, but now depends on agriculture and grazing. Pop. 4000.

CADING a tn. China prov. Kiangsoo, on the Soochow branch of the Yangtze-kiang about 55 m. from Shanghai. It is an ancient city surrounded by walls, and situated in the midst of an undulating and very fertile plain on which indigo is grown to a very large extent. Among the manufactures is paper made from the bamboo by saturating it with lime and water and then converting it into pulp. So

abundant and cheap in this paper that a coarse description is made for the sole purpose of being mixed with the mortar used by bricklayers.

CAHAWBA a RIVER U. States which rises in co. Jefferson, Alabama, flows through a valuable coal field and joins the Alabama at the village of its own name. It is navigable for about 100 m. —A VILLAGE Alabama, at the confluence of the Cahawba with Alabama river. It contains several churches, and is the shipping point for the cotton produced in the district.

CAICUS [add] a group of islands West Indies, situated among the western portion of the Bahamas, on a large shallow sand bank of same name, which stretches 55 m. from E. to W. and nearly the same distance from N. to S. It is principally islands proceeding from P. to W. in an irregular curve. East Caicos, Grand Caicos North Caicos 1) *corvidae* and West Caicos. They are wooded and tolerably fertile and at one time a produced cotton but at present the inhabitants who are few in number and mostly fishermen and wreckers, employ the land mainly for the rearing of stock and the cultivation of vegetable produce.

CAIRO a tn. U. States Illinois, Alexander on a low point at the junction of the Ohio with the Mississippi 10 m. S. by E. Springfield. The site, though commercially advantageous was so judiciously chosen that it became necessary to protect it from inundation by means of an embankment 70 ft. wide and 10 ft. high. Even this proved insufficient, and during a remarkable flood in the summer of 1858 nearly the whole town was swept away. Previous to this catastrophe Cairo consisted of about 470 houses, and possessed five churches, two banks, eighteen hotels, an iron foundry, two railway depots, and three mills.

CAINA a small tn. S. America, Bolivia prov. and 30 m. S. E. Potosi in a mountain recess. It consists of mud houses and has a public square a church and a superior post-house.

CALAIS [add] a tn. U. States Maine, on the St. Croix, at the E. extremity of the state, opposite to St. Stephen in British America, the river forming part of the boundary between the two countries. It contains eight churches, an academy, a high school and a school house and besides possessing an iron foundry a dry dock a building yard and a large establishment for calico and grinding plaster of Paris, is largely engaged in the lumber trade, which employs no fewer than sixty three mills and forty lath and shingle machines. In 1857 the export of sawed lumber amounted to 85,000,000 ft. of which about 30,000,000 went to St. Louis, chiefly Great Britain and the West Indies while the remainder was carried coastwise as far as the 1) tonnage. The other exports of that year were 68,000,000 lbs. 17,000,000 shingles 2,000,000 pickets 90,000 aleboards 8000 sugar boxes, 4000 blacksmith shop-houses, and 1400 cords of wood and bark. Pop. 6119.

CALAMA a tn. S. America, Bolivia, prov. Atacama, 43 m. E. Cobija, on a stream of same name, at the height of

The number of vessels entering the port in 1856 was 248 of 86,246 tons, in 1860, 377 of 156,865 tons, in 1861 391 of 84,175 tons, and in 1862 399 of 148,655 tons. Of vessels cleared from the port the number was in 1856 323, of 64,737 tons; in 1860 377 of 151,941 tons; in 1861 396, of 192,013 tons; and in 1862 403, of 144,138 tons.

CALDIERO is an Austrian Italy prov and 8 m. E Varona, on the railway to Venice. It occupies the S slope of a mountain ridge and has two parish churches and thermal springs which were known to the Romans. The environs were the scene of bloody conflicts between the French and Austrians on the 12th November 1796 and the 29th, 30th and 31st October 1805.

CALDWELL, a vil. U States, New York in a beautiful district at the S. end of Lake George, 56 m. N Albany. It is much visited by tourists for its picturesque scenery and contains the ruins of Fort William and Henry which figure much in the French and revolutionary wars. 1 1084 CALLEDONIA is a British America Canada W. S. Haldimand on the Great River and the Buffalo and Lake Huron railway 47 m. S.W. Toronto. It possesses three churches—a Church of England and Free, and a United Pres byterian and carries on a large trade in flour and lumber. Pop about 1800—2 A to U States, New York, on the Genesee with iron mines, and salines and sulphurous springs. Pop 1013—3 A lake and river NW America on the British and U States frontier. From the lake in a S.W. direction flows the river of same name. It ultimately forms two branches, one of which falls into Adirondack Lake, and the other into the Gulf of Georgia.

CALCUTTA [said] is a vil. Hind, Hind and 83 m. S. W. Madras dist. Malabar on a flat of the Malabar coast, little raised above the sea. It consists of a principal street, about three-fourths of a mile long and several small cross streets leading from it. The houses are built chiefly of latania, and are partly covered with tiles partly thatched with coconut leaves. Of the four quarters into which the town is divided, that to the S is densely peopled by Moslems and contains numerous mosques, and that to the N.W. or Fort area part contains a R Catholic church, and a large jail capable of receiving 600 prisoners. The principal European residents dwell in houses facing the sea, the custom-house is in the same locality. The other principal buildings are two hospitals, the cantonment and the Telli Devassam a celebrated Hindu temple. Calcutta has no proper harbour and very little trade; but possesses historical interest as the first spot in India on which Vasco da Gama landed in 1498 and subsequently as the scene of many struggles between the Portuguese and the natives. Pop. about 15 000.

CALIFORNIA [said] is one of the U States. The resources of the rich and productive country continue to be developed at a rapid rate, and appear still to be far from reaching their limits. The gold mines naturally hold the first place in importance, and the quantity of the precious metal shows generally an annual increase. The application of machinery and improved methods of mining enable those engaged in the work to turn to good account vast deposits which would otherwise have remained unproductive. Thus in Nevada, Another Maryono, and elsewhere mills have been erected which crush the quartz rock at a trifling expense—12s. or 14s per ton so that rock yielding not more than 25s. to 40s. or 60s. of gold per ton can be worked to advantage, which in former years was considered almost valueless. The consequence is, that an almost inexhaustible source of profit is opened to industry. In other places where gold was found near the surface of the soil, and after a time appeared to be exhausted, new values of ore have been discovered at a greater depth, and thus by successive sinkings fresh supplies have been obtained. The shafts are now in many instances of considerable depth in one case 1900 ft. The quantity of gold and silver received at San Francisco from the interior of the state, and from Nevada state, during the year 1864 amounted to \$9,092,100 and in the same period arrived \$1,260,475, the produce of Oregon state and the territories of Washington and Idaho and \$350 000 from

British Columbia. The exports of treasure during the five years, 1860-64, were as follows—

Destination.	1861.	1861	1862.	1863.	1864.
England	834,000	\$18,880	2,200 000	6 000,400	6,877,000
New York	7 181,800	6 831 600	5 238,615	3,477 105	2,445,375
China	674,000	704,100	243,162	261 373	1,777 372
Panama	60 190	70 800	80 800	808,000	75,750
Other Countries	87,000	15 3 0	64 600	116,585	127 400
Total	8,450,800	8,135 850	8,513,243	9 285,785	11 141 456

Copper mining also has been carried on in various parts of the state, the ore is found in deposits, and about 15 000 tons of it were shipped in 1864, containing from 15 to 20 per cent. of copper. Within the last three or four years several quicksilver mines have been discovered but the New Almaden is the only one as yet producing any great quantity of metal from that mine over 40 000 flasks (75 lbs each) were extracted in 1864 of which 88,377 flasks were exported one-half of them to China. Coal mining has also been put in active operation at Mount Diablo. There are indications of petroleum springs in several parts of the state but it has yet to be ascertained if the oil can be obtained in sufficient quantity to be remunerative.

A new branch of profitable industry has been discovered in the suitability of the soil and climate of the state to the cultivation of the grape vine. The growth of the vine was formerly confined to the county of Los Angeles 350 m. E. of San Francisco, but is now carried on all over the state. By a perhaps too sanguine estimate, it is calculated that the state consumes twice as much land adapted to the culture of the vine as there is in France and that the produce will be one-fifth of that of the latter in both quality and relative quantity. In 1862 official returns report that there were 10 622 096 vines growing in vineyards and that the number was in increasing annually and very largely. It is said that there were made in 1864 between 3 000 000 and 4,000 000 gallons of wine, and from 150 000 to 200 000 gallons of brandy but probably this is beyond the reality. The produce is all absorbed by local consumption.

Agriculture generally is receiving more attention in both the mining and other districts, and in some of them farming and stock raising are already equal in importance to the mining interest. This attention to the cultivation of the soil, the vast improvement everywhere in the style of building in the towns and villages throughout the mining districts, and the ameliorated condition of the mines and their families generally show how much of the capital raised in the state, that used to be sent for the support of relatives in distant countries, is now retained and invested on the spot. The value of the cereal productions exported in 1864 was not large, the produce of the land being mainly required for home use, but it comprised of wheat, \$155, 00 bushels \$11 700; beans, \$13 900; oats \$2450; and flour \$106,050. The season however had been very unfavourable to the crops. Of wool about 6,000 000 lbs were grown in 1864 being about 400 000 lbs more than in 1863, but the drought of the previous winter had destroyed vast numbers of sheep as well as of cattle.

In the year 1864 the following ships arrived from various countries—

Nationality	Vessels.	Tons.
Atlantic Ports of the Union	110	190,094
Pacific Ports of the Union	100	289,490
Great Britain	44	90 505
Australia	24	17 789
Chile	1	600
New Zealand	2	24, 400
Falkland Islands	61	1,200
China	28	63,370
France	28	1,438
Hamburg	9	4 106
Japan	7	3,700
Holland	19	6,400
Java	1	230
Spain	1	204
Sweden	10	2,377
		5,393

Ships arrived from various countries in 1904.—Continued.

Nationality	Vessels	Tons
Chile	10	4,265
Peru	9	1,220
Brazil	1	325
Mexico	49	24,801
Cuba	2	1,011
Sandwich Islands	27	12,912
Congo Islands	15	2,024
Central America	15	7,003
British America	10	4,026
Russian Asia	3	818
Whaling	22	10,080
New Grenada	43	12,329

In the same year the departures were as follows:—

Nationality	Vessels	Tons
Atlantic Ports of the Union	19	21,500
Pacific Ports of the Union	1055	382,046
Great Britain	16	12,102
New Zealand	8	2,145
Australia	19	8,900
East India	4	2,266
Vancouver Island	69	7,523
New Grenada	42	16,100
Bombay	2	266
China	69	44,266
Japan	3	64
Hawaii	1	6,500
La Plata	1	360
Chile	27	12,226
Peru	66	60,195
Mexico	66	21,185
Sandwich Islands	49	12,026
Congo Islands	11	1,900
Central America	10	16,145
British America	5	1,008
Russian Asia	3	497
Whaling	20	9,778

A large part of the imports are received through the eastern ports of the Union and consequently a correct statement of them cannot be arrived at. Of manufactured goods of linen work, cotton, etc., very small quantities have been received since the introduction of the tariff in 1891 which amounted almost to a prohibition of them, the demand for such goods is now met to a great extent by home productions. The import of lumber is very considerable. It amounted at San Francisco in 1904 to 117,918,000 ft. of board of 12 in to 12,378,400 ft. of planks, 12,348,450 ft. of piles, 515,194 lineal ft. maple 800 trees and cedar logs, 245 tons. Of coffee, 9,623,176 lbs., and 1,477,723 lbs. of tea from China and Japan, were imported in the same year, as well as 5909 tons of rice, 12,240 tons of sugar and about 2,000,000 lbs. of tobacco.

The value and destination of the exports exclusive of transients previously specified was in the same year as follows:—

To Eastern Ports of the Union	\$1,028,250
Great Britain	191,178
Australia	125,260
Vancouver Island and British Columbia	307,100
Mexico	445,120
Peru	20,000
China	2,4,720
Sandwich Islands	171,000
Japan	5,000
Other Countries	160,000
Total	\$2,544,206

The length of railway existing in California is as yet not great. A few short lines have been, and are being constructed chiefly in the Sacramento district; but more lines and extensions of present ones, are in contemplation, and when effected, will aid greatly in developing the resources of the country. Telegraphic communication also is rapidly being opened in various directions, one line, already partially constructed, being continued to Vancouver Island and British Columbia, under an arrangement between the governments.

The population of the state of California, according to the census of 1880, was 379,994, being an increase of \$10 per cent. upon that in 1860; compared it was 24,819 Chinese, and 17,562 Indians. It has since continued to increase, the net accession of emigrants alone amounting in 1894 to about 10,000.

CALINGAPATAM, a tn. India, presid. Madras, dist. and 94 m. S.W. Ganjam, B. bank Vindhya. Under Mahomedan rule it was a place of great size and importance, and possessed many mosques, of which the remains are still seen. After a long decline it is again rising into importance in consequence of its harbor which with the exception of Cochin, affords the best anchorage on the coast during the S.E. monsoon. Its principal exports are rice, ginger, mace, wheat, grain, hie timber and bees wax.

CALAU [old] a tn and port, Peru. A railway has been opened between Calau and Lima the capital a distance of 7 m. much to the benefit and convenience of both places. The commerce of the port has steadily increased, the number of vessels and their tonnage entered and cleared in the three years 1891-3 having been as follows:—

Entered. Cleared.	1891.		1892.		1893.	
	vessels.	tons.	vessels.	tons.	vessels.	tons.
	1892	460,125	1281	701,000	1521	723,371
	1902	468,302	1108	678,230	1521	762,540

The value of the imports in the year 1893 amounted to \$2,000,000 and of the exports to \$2,500,000.

CALPER, CALPER or KALPER [old] a tn India, N.W. Province, cap. pergunnah of same nat. a r. bank Juma which has here a width of a mile and a half in the rainy and only half a mile in the dry season 140 m. W.N.W. Allahabad. It is situated among rugged ravines, and is meanly built, consisting for the most part of mud houses, with a few of a better description constructed of brick or calcareous conglomerate. It is defended by a fort situated on an isolated height between the town and the river but so imperfectly constructed as to be incapable of resisting a serious

GRANAT CALPER.—From Deane's Nine Impressions of India.

attack. It has manufactures of paper and refined sugar the latter said to be the finest in the world, but too high-priced to be in general demand. During the recent mutiny Calper became a principal rendezvous of the revolted Gwalior contingent, which, however, was signally defeated, first by Sir Colin Campbell in the vicinity of Chawpore, on which it had previously made an unsuccessful attack, and afterwards at Calper itself by Sir Hugh Rose, on the 26th May 1858.

Pop. 11,125.
GALTAGIBONE, a tn. Italy in a mountainous dist. in the S.W. of prov. Catania, 66 m. S.W. Messina. It is the

most important town in the interior of the island, but stands in a manner completely isolated as there is no good road by which it can communicate with any town on the coast. Several roads in tolerable condition lead from its gates, but after a short distance become lost in swamps, or rise so steeply that pack-mules only can be used upon them. The only manufacture for which the place has acquired any celebrity is terra cotta, which is modelled with much taste into articles of handsome form, similar to those found in Pompeii. These articles made chiefly terra and in Catania, command an extensive sale. Pop. 15,000.

GALUTRA [add.] a town on the S.W. coast of Ceylon a little above the mouth of the Kalu-ganga, which is navigable by boats up to Ratnapoora, 34 m. S.W. Colombo. A fort built on a green eminence once defended the entrance to the river but it has been dismantled, and now forms the residence of one of the civil officers. The only other buildings deserving of notice are a handsome Wesleyan church and school. The extensive cocoanut groves around the town make it one of the principal places for the distillation of arrack. From the climate and quality of the soil it was one time expected that the sugar cane might be successfully cultivated as a remunerative crop. The attempt has scarcely been made but without the anticipated result. The Lake of Polonnaruwa only a few miles inland is frequented by prodigious numbers of wild fowl which roost and breed in the luxuriant forests by which its banks are encircled.

GAJ PADOH, a long group of high islands belonging to the Louisiade Archipelago, to the S.E. of New Guinea. It extends about 45 m. from East E to West Island the central hill of which is m. ht. 11,920' S. lon. 158° 30' E. All the islands are well wooded, and of beautiful appearance, large groves of cocoa-nut trees occupying the low lands about the bays while the hills above are covered with rich vegetation. The inhabitants are numerous and appear to be careful cultivators raising large quantities of yam and cocoa-nut together with Indian corn, ginger and sugar cane. Some of their canoes are of large size.

GAMBAY [add.] a dist. and to India, Gujarat.—The river bounds W. by Kalpi, W. by the Sabarmuttee R. by the Gulf of Cambay and E. by the Mithra. It has an area of 500 sq. m. and a revenue of about £30,000.—The river on the N. shore of the estuary of the Mithra occupies an uneven site on an eminence of considerable elevation and is surrounded by a brick wall implored for musketry and flanked by fifty two irregular towers in bad repair. The whole place tells, by the number of uninhabited houses, and considering mosques and palaces of a greatness which once existed but has now passed away. The principal buildings are the palace of the ruler, a large but tasteless structure, the principal mosque, a handsome building in which originally a Hindu temple was converted to its present use when the Mahomedans conquered Gujarat. A Jain temple, with a curious crypt, and a number of large and often beautiful mausoleums in the form of circular or octagonal temples. One of these tells of a frightful death, during which an eminent Mogul whose remains it inclosed, perished from starvation after he had in vain offered a measure of pearls for one of grain. Gambay was long celebrated for its manufacture of shibbi, silk and gold stuffs, and had no longer a trade that Tiffenbaker in 1773 estimated seventy vessels at anchor in front of it. Its subsequent decay is attributed partly to the oppressive exactions of its rulers, and partly to increased difficulty of access to its harbour. The only species of manufacture which now gives it any celebrity is the working of carnelians, agates, and onyx into a variety of ornaments. The stones are found about 80 m. to the S.E. among the Rajpalee Hills on the banks of the Nerbarde. Pop. 37,900.

GAMBODIA [add.] cap. of the ancient kingdom of same name, now mostly incorporated with Siam, stood near the N. extremity of King's Lake or Tala Sah, about lat. 13° 45' N.; lon. 104° 30' E. The only trace of it now remaining is the Nokon temple, which was spared when the city was taken by the Cochins Chinese about A.D. 200 and is still too perfect to be called a ruin. It stands solitary in the midst of jungle and is entered across a magnificent stone causeway a third of a mile long leading through an ornamental entrance. The building is composed of three quadrangles, the outer one including the others, which rise successively above it. The

outer and lowest quadrangle is 200 yards square, and has a broad verandah, with a double row of square ornamented pillars running all round, with large and elaborate decorated entrances at the corners and centres. The whole is built of a hard gray sandstone, without wood cement, or iron, and is covered within and without with carefully executed bas-reliefs of Buddhist deities. It is still visited as a shrine by the Cambodians, and several priests reside outside the walls.

CAMDEN [add.] four places U. States.—1. A town, New Jersey cap. co. same name, on a plain 1 bank Delaware opposite to Philadelphia, and on several lines of railway. It is laid out in regular streets which cross each other at right angles and possesses many fine buildings, ten churches, two literary associations, a courthouse and jail. The chief industrial establishments are iron foundries, glass-works, chemical works, several mills and building yards. The communication with Philadelphia is kept up by means of five ferries. Pop. (1880) 13,560.—2. A town, N. Carolina, cap. dist. Xorahaw, on a fertile stream on the Waters which is here crossed by a bridge, 10 m. N. W. Charlotte. Having ample means of communication both by railway and by the river which is navigable by steam boats it carries on a large trade of which the principal exports are cotton and turpentine. Pop. 1621.—3. A village, Alabama, cap. co. Wilcox, on a healthy and some what elevated site overlooking the Alabama River 100 m. N.E. Mobile. It is a flourishing place, with an academy two female seminaries, and an active trade. Pop. 800.—4. A town, Arkansas, cap. co. Washita, on the slope of a range of hills above a bank Washita and at the head of navigation for large steamers, 90 m. S.E. Little Rock. It is a handsome place, in the planning and building of which considerable tests have been displayed. Pop. 2,119.

CAMEROONS or **CAMAROOONS** [Portug. *Cameroes* shrimps] add.] mountains Western Africa, Cap. of Biafra. The base of the mountain occupies an estimated area of 800 sq. m. about one-third larger than Madeira or the Isle of Man. It is bounded on the N. by the Kunene Mountains on the S. by the Atlantic, on the E. by a creek flowing into the Bahr River and on the W. by a branch of the Rio del Re or Kunene River. It thus forms a parallelogram, within lat. 4° 20' and 3° 57' S. and lon. 9° 1' and 9° 25' E. The mountain is of volcanic formation and the upper region of it presents numerous extinct craters often rising into elevated peaks. The summit—about 18 m. N. from Victoria, the settlement on Amba Bay—is a cone crowned with two distinct peaks, the higher named Albert Mountain rising to the height of 13,129 ft. above sea-level and the other the Victoria Mountain 4 m. due S. is about 486 ft. lower. The Albert Crater is a "bowl" about 1000 ft. in circumference and 150 ft. in greatest depth its form is that of an inverted cone with a slope varying to 45° the colours are red, white and yellow where stone occupies the surface, a deep blue shows the sides of scoria and the bottom is black. Its outlet is to the south. It appears to be a more modern formation than Victoria Crater which though exposed to the furious N.E. wind has an abundant growth of cryptogams while the Albert is almost bare. The other principal elevations mostly with craters at their summits are Monte Imbel and Helen lying 4 to 5 m. S.W. of the great peak, the latter reaching the height of 9273 ft. and several lofty peaks on the W. side, which have not hitherto been examined. Little Cameroons, upon the S.W. part of the mountain, and within 5 m. of the sea is another of considerable magnitude, standing alone and rising to a point. The volcanic character of the mountain is everywhere apparent in some places the surface is studded with small craters, as many as 81 having been counted within a radius of 2 m. at a spot 5 m. S.W. of the summit at the height of about 7000 ft. The western are of two distinct formations. Those under the elevation of 6000 or 7000 ft. are mountains covered with dense forest; those above that altitude are smooth, grassy regular, and uniform. As may be supposed, the surface is everywhere largely covered with streams and beds of lava and scoriaceous deposits. Some of the craters have the appearance of having been eruptive at no distant epoch, while others must have been long extinct. According to native accounts about the year 1888 fire came out of the ground; but the only existing indication of volcanic activity observed by Captain Burton

In January 1862 was on the northern counter-slopes of the Albert Center where the surface is a clayey detrital with abundant bands of bright green sand, white lime, and calcareous marl red and yellow. It was soft and yielding to the tread, and regular lines of sandstone and path rose in rings and curls from the stripes, emitting strongly of sulphur and by the gentle warmth attracting many small birds to the vicinity.

Up to the altitude of 7000 or 8000 ft. the surface of the mountain is clothed with forest. In its lower part the vegetation consists of palms, coconuts, and a variety of other trees of tropical growth. The soil extending from the shore to 1500 ft. above sea-level is a rich yellow loam, admirably fitted for growing sugar-cane, tobacco, and coconuts. At the height of 4500 feet the blackberry is seen, and the salvia, beach, and various flowering shrubs. There are also large tracts of fern, succeeded by forest growth to the level as has been said, of 7000 or 8000 ft. vegetation then becomes scanty. The mountain is generally occupied by natives, who have a few villages on its southern slope, the highest being that of Mangraya, 2650 ft. above the sea, and nearly 8 m. by the road N. W. from Victoria, the settlement on Anchor Bay. The climate naturally varies according to elevation from the tropical heat and fever-breeds of the base, to the temperate and beautiful region of its middle altitude, and the cold and perhaps perpetual frost of its summit. Upon Albert Mountain the highest temperature registered in January 1862, was 65° and the lowest 21° at 7500 ft. the temperature varied from 45° or 50° to 70° or 75° at the same period, and was sensibly affected by the apparently constant N.E. wind often blowing with great violence. The temperate regions of the mountain, above the range of fever appear well adapted as a sanatorium, and a resort for Europeans from the unhealthy stations on the west coast of Africa, such a retreat in the mountains and hot seasons has long been felt to be a great desideratum.

CANALPOOR, a vil. India, presid. Madras, dist. and 33 m. N.W. Bellary. It is defended by a fort with a ditch and glacis; but the greater number of the houses which is all amount to about 2000, are outside its walls. The ancient but ruined town of Naganagur is in the immediate vicinity and the descendants of the rajahs used to live at Canalpoor till 1820, when they removed to the other side of the Tumbud. Some from it brought from the neighbouring hills and settled here.

CANADA [said]. The subject of the union of the North American provinces under one general government, which had been under consideration for some years, was brought more prominently forward in 1864, and in October of that year a meeting of delegates from Canada, Nova Scotia, New Brunswick, Newfoundland, and Prince Edward Island, was held, at which a scheme was drawn up and subsequently submitted to the English government whose approval it could scarcely be expected. The provisions in regard both to their internal economy and to their external interests. The resolutions adopted at the conference of delegates proposed that there should be a federal union under the crown of Great Britain, based upon the model of the British constitution; that the general government should be exercised by the sovereign or a duly authorized representative of the sovereign and a parliament composed of a legislative council and a house of commons. The members of the legislative council are to be nominated for life, under certain restrictions, by the crown, the members being fixed and in proportionate representation of the several provinces. The house of commons is to consist of members elected from the basis of population, as determined by every decennial census; the number until after the census of 1871 to be 184, in the following distribution—

Upper Canada,	82
Lower Canada,	48
Nova Scotia,	16
New Brunswick,	10
Newfoundland,	5
Prince Edward Island,	5

The houses of commons is to be elected for not more than five years, and the parliament is to hold a session once a year at the least. This form of government was to meet, amend or repeal laws, for the peace, wisdom, and good government of the federated provinces, saving the sovereignty

of England. Subordinate to the supreme government, such provision is to have a lieutenant-governor and local legislatures, constituted in such manner as the present legislature of the provinces shall provide; the provincial government to have authority in the regulation of certain local branches of administration, and within defined limits. Provision is made for the admission into the union, upon equitable terms, of the North West Territory British Columbia, and Vancouver Island. This scheme of confederation has commended itself very generally to the approbation of statesmen, and representatives of the provinces came to England in the spring of 1865 to confer with the queen's government upon the subject, and it appears to be anticipated that it will be put into operation with no greater delay than is necessary for carefully maturing it.

Of late years the Canadian have progressed rapidly in material prosperity and importance, as the following statistics prove. The area and population in 1852 and 1861 respectively were—

Upper Canada,	Area in sq. m.	Pop. in 1852.	Pop. in 1861.
Lower Canada,	300,000	363,000	1,000,001
	300,000	600,361	1,211,666
Total,	600,000	1,263,361	2,207,667

The estimated population at the beginning of 1864 was 2,733,078.

The sections of the population in respect of religion were in 1861 as follows—

Denominations,	Upper Canada,	Lower Canada,
Church of England,	311,368	65,497
Presbyterians,	103,244	945,328
Methodists,	311,368	10,750
Baptists,	61,539	7,751
Unitarians,	26,285	1,087
Independents,	4,257	4,927
Quakers,	7,289	121
Unitarians,	614	615
Jews,	64	73
No religion,	1,373	1,477
Minor sects and Other	50,319	14,076
Creeks not classed,		
Total,	1,260,091	1,211,666

In 1859 the number of schools in Upper and Lower Canada respectively was 4,047 and 8,199 total 7,246 and of scholars 807,346 and 188,148 total 475,494.

The net revenue of the provinces amounted in 1862 to \$2,335,841 and the expenditures to \$2,369,185 the public debts in 1860 amounted chiefly for public works, being \$12,144,264, bearing an annual interest of £268,806.

The trade of Canada has been increasing with great rapidity in 1848 the total exports of horse products amount to rather above \$2,150,000. The following figures show the value of the exports of domestic produce in recent years, and of the goods entered for home consumption—

	Imports.	Exports.
1866	\$2,520,278	\$2,580,234
1861	7,335,500	\$2,016,464
1862	\$,718,220	9,128,188
1863	\$,896,500	\$,197,886

In the last-named year timber of various kinds figured for \$2,230,297 wool for \$200,306, and agricultural produce for \$2,685,680.

CANAJAHABIE, a vil. U. States, New York, on the Mohawk River and the Erie canal, 50 m. W. N. W. Albany. It contains a number of churches a bank, and an academy. Steam-ferries are worked in the vicinity. Pop. 4,184.

CANARAC, a m. S. America, Ecuador dist. Assuay on an elevated and healthy site, 50 m. S.E. Guayaquil. It consists of well-forested slopes, with many handsome houses, and carries on a considerable trade in wheat and other agricultural produce of the surrounding district. In the vicinity are some interesting ruins of the Incas of the Incas.

CANARAC, a m. presid. Bengal territory and 45 m. S.E.E. Cuttack, on the N.W. shore of the Bay of Bengal. About 2 m. to the S.W. are the remains of a celebrated temple of the sun, called by the natives Chander Bandh Murari-ya, said by the British the Black Pagoda. Part of the great tower, still standing, is 150 ft. high, and the walls, which are in some parts 20 ft. thick, are covered over with mythological sculptures.

CANAL, a strong inlet, which rises in the S. W. of Mount Aspid, near the foot of the Range and Northern district, at the height of 3,500 ft. above the sea, flows diagonally N. N. E. partly along the base of the Boulder range, rising the Pettit, Brown, Macpherson and several other streams, and joins a bank thence about 50 m. W. of Alibabab. Though it has a course of 180 m., it is so much encumbered by rocks and broken by cascades, some of which are said to have a fall of 800 ft., that it is nowhere navigable. It abounds in fine fish, and beautiful pebbles, in great request for ornaments, are found in its bed.

CANFIELD a vil. U. States, Ohio, cap. co. Mahoning 65 m. S. E. Cleveland. It is nearly built among trees, and in a rich and fertile country which abounds in coal and iron-ore. Pop. 1891

CANGOZIMA [add] tn. and seaport Japan (See KAGOSHIMA)

CANNAN KANA, or CANINHA [add.] a tn W Africa, Dahomey 55 m. N. Whydah on the N. edge of a valley in a picturesque and cultivated district. It was of old a settlement of the Oyo to whom the Dahomans were for a long time tributary. But in the early part of this century the Dahomey king Gue, expelled the Oyo and Cannan became a sort of country residence of his court. The town, which covers about 3 m. of ground, is a straggling place of huts and thatched dwellings, inclosed in compounds of mud wall or palm-leaf and detached. It stands 271 ft. above the sea. The climate is hot, humid and unwholesome the sea-breezes relieve the temperature in the day but the nights are extremely oppressive, and during the rainy season are vile. In the S. W. is an old palace of the Dahomey king, in poor and ruined condition. A sacrifice of human beings was established here by the late king Gue, which precedes the outcome, or similar sacrifices, at Abomey the capital. That held in May 1855 is thus described: Near the palace wall were eleven platforms on poles 40 ft. high. On each of these was the dead body of a man in an erect position clothed in the native style and having in his hand a calabash or similar vessel, filled with oil, grass, or some other produce. One was represented leading sheep, also dead. The victims are made to pass over in dress and wearing Oyo a pastoral and agricultural people, to whom the Dahomans were formerly tributary. Pop. 4000.—(Burton's Mission to Dahomey)

CANNELTON a tn U. States Indiana, Perry co. on the Ohio, 70 m. (by river) E. Evansville. Canal coal 4 or 5 ft. thick, is worked in its vicinity and forms one of the main sources of its prosperity. It possesses a large cotton factory which can produce 40,000 yards of shirting weekly. Many of its private buildings are elegant, and its public edifices include several churches. Pop. 2150.

CANNING, PORT See CALCUTTA in Sept.

CANZO or WYANCO a vil British America near the E. extremity of Nova Scotia, on a fine harbour formed by Pleasant, and St. George lake, on the E. and the mainland and Dorel Id. on the W. lat 45° 28' N., lon 61° W. It is a long, straggling place consisting of an ancient and a modern portion, the former standing on hills of red sand, clay and large boulders, and containing the church which, seated on a ridge 100 ft. high, is the most conspicuous object at sea, and the latter which contains two obelisks, built further westward along a narrow channel called the Tickle. The harbour was much visited by the French fishermen and fur-traders as early as the sixteenth century and was the scene of frequent contests between the French and British, till the supremacy of the latter was established. The position of the harbour at the E. entrance of the Bay of Chedabucto, through which numbers of vessels are continually passing to or from the Gulf of St. Lawrence, gives it an importance which it would not otherwise possess. Pop. about 600.

CANTERBURY [add.] a settlement, New Zealand, Middle Island or New Munster E. coast, Port Cooper dist. Banks Peninsula, is a level dist. from the coast to the base of the mountain ridge whose highest peaks are usually covered with snow, and reach an elevation of 8000 to 8500 ft. Mount Cook, the loftiest, is 12,900 ft. above the sea-level. It is watered by numerous rivers, which have been named after the distinguished individuals who interested themselves in the formation of the colony—Fletcher, Ashley, Eyre, Grey, Hargrave, Harpole, Selwyn, Chalmersley, Wynne, and Sir J. G. G. —Vol. I.

Asiabutan. A large bay or lake, W. of New Zealand, called Waihora by the natives, has been named Lake Ellesmere. The most conspicuous harbour is Port Cooper. A charter having been granted by the crown, the colony has been settled under a regular government. The chief places in the prov. are Christchurch, the capital, and seat of a bishopric, on the river Avon; and Lyttelton, the port town, on Port Victoria, 8 m. from Christchurch. The breadth of the prov., from N. to W. is about 180 m., and its length from N. E. to S. W. about 250 m. area 21,875 sq. m. or 14,000,000 ac. The soil is well adapted for agricultural purposes, and the climate is exceedingly healthy.

The revenue of the prov. of Canterbury as of that of New Zealand in general, is principally territorial, being derived from the sale of crown-lands, pasture licenses, and assessments. The ordinary revenue in 1853 from customs &c. amounted to 271,058, and the territorial to 2328,514 total, 2599,572. In 1861 the pop. was 18,040 of whom 9299 were males and 7101 females the natives numbering, in 1856, 249 males and 289 females. For 1856 the census gives the pop. of the prov. at 32,353 some of whom, 19,935 were males and 13,231 females, so that it has more than doubled in three years. The number of immigrants arriving in the prov. in each of the years 1860-3 was 1869, 1866, and 5973 respectively in the same years respectively 380, 236, and 306 persons left it. The total number of acres of land fenced in 1864 was 843,416, of which there were in wheat 18,238 ac. in oats 14,673 ac., in barley 3482 ac. in maize, 107 ac. in potatoes, 1573 ac. in gardens and orchards 220 ac. in artificial grasses, 31,870 ac. and other crops, 2564 ac. The stock returned of the prov. give 10,683 horses, 61 mules and asses, 45,263 cattle, 1,567,830 sheep, 769 goats, 10,233 pigs, and 73,745 poultry.

CANTON [add.] name derived from the Portuguese manner of spelling the prov. *Quangtung Kanton or Canton*. From various drawbacks, the result of war, famine, rebellion, and tempest, to which this city has been subjected during the last twenty years, the population and commerce have not increased as in other cities in China open to foreign trade. In 1853, when affairs were in a state of comparative quietude, the population was estimated at 1,173,000 divided as follows—

Host population, residents	577,500
Within the old city wall	304,800
Within and without the new city wall	272,700
Western suburb	184,000
Eastern suburb	87,600
Southern suburb (Hosam)	115,000

1,178,000

Though there are no bridges across the Cheo-Kiang yet there are numerous ferries, with crews of men pass plying continually day and night, that serve the purpose for traffic. In August 1862 the host population as well as others suffered severely from an unusually terrible burlesque or typhoid when it was calculated by the Chinese authorities that not less than 80,000 people were drowned or killed by falling houses, during its continuance of fourteen hours. The actual known loss was ascertained to be 52,550 as a dollar was paid for every body found and buried. During the period that Commissioner Yoh held supreme power at Canton (1855-58) upwards of 70,000 real and suspected rebels were decapitated, about one-third of them being Cantonese. These calamities, together with the famine that succeeded the war with the British and French allied forces (1856-57) and the considerable reduction in foreign trade after that event have seriously checked the increase of population during the past ten years.

Amongst this large native community there has been at no period any great number of foreign residents; but these are greatly diminished since the formation of the colony of Hong-Kong and the opening of new ports in the northern provinces, whither commerce has induced them to remove. In 1864, according to the Hong list, including Whampoa, the foreigners of all nations and occupations numbered only 1180—

Chinese and Americans	14
Westons and Americans	10
Customs Officials	10
Doct. Europeans	10
Missionaries and others	26
	180

Of this number 73 were British, 36 American and other nationalities. 27 In 1846 there were 307 foreign residents, exclusive of the families belonging to several of them. Up to 1856 this foreign population resided at the factories chiefly built by the East India Company which at the bombardment and capture of Canton, at the close of that year were burned and razed to the ground by the Chinese; and after peace was proclaimed, the merchants had to rent native tenements on the Western side, while the Chinese and other officials were scattered over Canton city and western suburbs. This was exceedingly inconvenient and detrimental to trade, and therefore Lord Elgin obtained a concession from the Chinese authorities of the Sun-moon forts, which had been destroyed and which were situated at a salubrious point of the west suburb, on the river's bank where the water almost insulated the site. The area allowed for the foreign settlement has been filled up and levelled, giving an extent of 24 acres. On the river boundary it is protected by a granite wall and there is sufficient depth of water for a vessel of 1000 tons to lie alongside, on the landward side it is separated from the Chinese dwellings by a canal having stone embankments, across which are three substantial bridges of lava stone. Good roads are constructed along the margin of the concession, and that part facing the river is planted with trees and shrubs forming a delightful promenade. Streets have been laid out, and the land parcelled into building lots, which realised 245,500 by auction in August, 1861, when building has progressed but slowly. The British, American and French consulates, however, and the chief mercantile firms in China, have erected spacious houses and dwellings, and the residents have formed themselves into a committee for municipal purposes. Connected with the change of site and destruction of property at the old factories there was a claim made against the Chinese government for the loss each resident sustained, which was to be paid out of the indemnity money. On the part of the British it amounted to £700,000 while the American and French claims were about a third of that sum.

Foreign vessels bound for the port of Canton generally bring up at Moon Roads, or Victoria harbor Hong Kong, there being an authorized body of Chinese pilots at hand to take them to either anchorage. From the strong ebbes and intricate navigation in the estuary and inner waters of the Canton River (which is only one of several outlets of the Great West River and its affluents) it is necessary to take a second pilot as far as the Bores Tigris, which is considered the limits of the port, and distant 45 m. from the city; thence a third pilot assists to the anchorage at Whampoa, which is the actual foreign port of Canton, although 12 m. distant from the Sun-moon settlement. By the treaty of Tientsin (1858) there are local consular regulations for the shipping enforced by a resident British vice-consul and an American consular agent. From the rise of the tide, and nature of the ground here it has been found most advantageous to construct docks for repairing ships of which there were ten in January 1864—two of stone one wood and seven earthwork—from 146 ft. to 550 ft. long two being pumped dry by steam-engines. From these facilities of dock accommodation a number of ships entered inwards and outwards have no traffic at this port, so that the shipping returns are in excess of the commercial losses.

begun to surpass it. In 1843 the northern ports were opened; in 1851 Chinese emigration to Australia and California was removed to Hong-Kong; in 1854 a serious insurrection which destroyed the manufactures of Foshan, happened; in 1856 the foreign factories were burned, and the river blockaded, and in 1857 the city was captured by the British and French; these misfortunes, joined to the previous drawbacks, completed the commercial decadence of the port. Since then the opening of other ports for foreign trade has diminished the relative importance of Canton and will continue to interfere with its prosperity. According to the latest consular returns, the following is the estimated value of the export and import trade:—

	1862	1863	1864
Total Exports	£1,000,746	£3,563,289	£3,541,434
Total Imports	—,612,510	2,361,254	2,031,259

The import trade of Canton has suffered from the levy of additional imports to meet the immense expenses assessed to the Chinese government by the Taiping rebellion, as well as from a mercantile revolution that is taking place. The Chinese merchants, apprehending by degree the value of foreign trade, are getting it more and more into their own hands and now go to Hong-Kong to purchase what they require, importing the merchandise in native vessels to the various places on the coast. The consequence is, that the trade of Canton shows a great falling off in both cotton and woolen manufactures, and also in opium, the value of which in dollars (4s. 9½d.) in 1864 was 1,522,866 against 2,500,334 in 1863—a decrease of 607,368 dollars. In the export trade of Canton there has likewise been a falling off, affecting almost all the articles of export as the following table shows:—

	1863	1864
Tea	5,662,293 dols.	5,244,978 dols.
Silk	2,760,497	1,671,870
Cotton	25,280	23,008
Chinese produce	7,000,408	4,975,273

The decrease in tea is attributed to its having been forwarded during the year 1864 to the Portuguese port of Macao where it can be shipped duty free and to the ports of Foo-chow and Hankow shortening all that need to come down before they were opened.

From the spirit of commercial enterprise which is spreading among the native merchants and possessing as they do considerable advantages over foreigners in buying and selling it is probable they will gradually absorb both the import and export trade as well as the extent of coast-trading traffic.

Formerly the whole of the foreign trade was carried on in sailing ships, which received and discharged their cargoes through native junks at Whampoa. Since the establishment of the colony of Hong Kong, there has sprung up quite a flotilla of river steamers, chiefly of American build, which ply daily between Canton, Hong-Kong, and Macao, and convey the greater part of the produce and merchandise, for native and foreign consumption. The traveller now visiting the far East can find in these steamers speed and accommodation equal if not superior to the best river boats in Europe. From Canton to Hong Kong the distance is 96 m. which is ordinarily performed in 64 hours. A large native passenger traffic is done frequently carrying 500 to 800 at a trip.

Events of vital importance to the prosperity of this ancient city as well as to British and foreign relations with the empire at large, have occurred in the annals of Canton within the period of the last ten years. On the 8th October 1856, a small vessel named the *Arrow*, having a Chinese crew but owned by an English firm at Hong-Kong, and commanded by an Englishman, was seized upon upon protest by the native authorities twelve of the crew were bound and carried away and the British flag was hoisted down. Rear-admiral Sir Michael Seymour demanded satisfaction for the outrage and insult, but was refused by the notorious anti-

SHIPPING IN THE PORT OF CANTON IN THE YEARS 1862-64.

Nationality	1862.				1864			
	Entered.		Cleared.		Entered.		Cleared.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
British	56	7,435	65	86,705	99	16,793	100	49,979
River Steamers and Lorcha	117	21,264	167	21,264	118	6,325	118	6,325
American	27	16,979	38	19,908	9	7,798	9	7,798

Total	367	206,500	367	206,119	347	365,760	355	385,166

The trade of Canton has been known for three centuries throughout the civilized world and the city continued the chief foreign emporium in China until 1856, when Shanghai

and carried away and the British flag was hoisted down. Rear-admiral Sir Michael Seymour demanded satisfaction for the outrage and insult, but was refused by the notorious anti-

foreign merchants. Then, then at Canton as a special commissioner from the court of Peking. This was deemed a *casus belli*, and hostilities commenced on the 24th by the capture of the river forts at Canton and the entrance of a large force into the city by blowing one of the gates to pieces. On the 13th November the fleet reduced the Bogue forts 208 guns, and the Amoy forts, 310 guns, having complete command of the river. The expedition was then reinforced by two brigades of infantry and artillery and a large contingent of French sailors and marines, beside their fleet under Rear Admiral de Genouilly. The combined forces made a grand attack on the 28th and 29th December bombarding the city and carrying it by storm while the stubborn Commissioner Teh was taken prisoner and afterwards deported to Calcutta, where he died. Meanwhile the allies held military possession of the city without interfering with the peaceable inhabitants who became excessively friendly towards their conquerors.

The place was ceded as a material guarantee for the payment of an indemnity of £668,000, in equal proportion to the British and French. For nearly four years the allies held supreme jurisdiction over the city which at length was evacuated by them on the 21st October 1861 and possession handed over to the viceroy of Quang-tung. (See *Blue-books, Williams Chinese Commercial Guide, N.S. Notes*.)

CANTON a to U States, Ohio, up on Stark beach tidally situated on the Mississippi Creek, and on the Ohio and Pennsylvania railway 75 m N W Pittsburg. It stands in the finest wheat district of the state, and possesses an assembly gun-barrel factories woolen factories, and iron foundries. Bituminous coal and limestone are found in the vicinity. Pop. 4041.

CAOKEE, s to Austrian Italy prov and 30 m N.E. Venice, at the mouth of the Isonzo in the Adriatic. It has a small fort and a fishery and was once the seat of the patriarchate of Venice. Pop. 3152.

CAPE FEAR, a river U States which is formed by the union of the Haw and Deep at Hawood, co Chatham N Carolina, flows tortuously S.E., and enters the Atlantic by two channels—one on each side of Smith's Island. Its whole length including one of its head branches is about

208 m of which about 120 are navigable by steam-boats. It is the only river which has its course wholly within the state, and carries its waters directly to the ocean.

CAPE GIRARDEAU a v to U States, Missouri r bank Mississippi, in a well-timbered and fertile county of same name, about 100 m. S.E. St. Louis. It is the seat of St. Vincent's college, and has a good landing on the river. **CAPE ISLAND** a v to U States, New Jersey on the small island of same name at the N. extremity of the state, 95 m N. Trenton. It is one of the most fashionable watering-places in the State and in summer having daily steam communication with Philadelphia, is crowded with its citizens, for whose accommodation several hotels have been erected. Pop. 600.

CAPE NORTH British America, forming the N.E. extremity of Cape Breton Island, is a bold and rocky head land which rises abruptly from the sea to its height of 1100 ft., and is composed of slate in nearly vertical strata. Frequent and heavy squalls prevail in its vicinity. About 8 m E of it the N.W. extremity of the island is formed by Cape St. Lawrence, composed also of slate rock, and as steep that except on its W. side there is no landing even for boats. About a mile S.E. a remarkable sugar-loaf peak called Bear Hill rises from the shore to the height of 750 ft. Still farther E towards North Cape is St. Lawrence Bay which is 4½ m. wide and 1½ m deep, and within half a mile of the shore affords an anchorage of 9 or 10 fathoms with a bad bottom of rock or loose sand.

CAPE OF GOOD HOPE [ad] a British colony S Africa. In consequence of the anomalous position of the territory of British Kaffraria, which is administered by a lieutenant-governor subject to the direction of the governor of the Cape Colony the inhabitants of it have agitated a demand for separate legislative powers of their own. It has therefore, been proposed and is contemplated by the home government, to annex the territory to that of the Cape of Good Hope and give the inhabitants a share of representation in the Cape parliament. The Cape Colony will thus be increased by the accession of a population of 81,253 consisting of 8706 Europeans and 74,648 natives, amongst whom are 7418 settler and European landholders occupying 739,819 acres, of which 314,806 acres had been surveyed in 1861. The total revenue for the public service of British Kaffraria in 1861 amounted to £24,718 and the expenditure to £27,491; the deficiency having to be supplied by grants from the imperial treasury.

Finance.—Unfortunately the financial position of the Cape Colony itself appears to be somewhat similar the revenue falling short of the expenditure and requiring to be supplemented by loans by which means a public debt has been created, first appearing at £20,000 in 1859 and then at £715,950 in 1865. The year 1862 however had been a disastrous one for the colony excessive drought and the ravages of locusts having wrought serious damage to crops, cattle, vines, and almost every branch of colonial industry.

The state of the public revenue and expenditure in the years 1860-1862 is apparent from the following figures—

	1860.	1861.	1862.
Revenue, £	272,771	£45,086	£715,480
Expenditure, £	739,000	739,000	861,709

The apparent excess of revenue over expenditure in 1862 is accounted for by the fact that certain loans are reckoned under the head of revenue; the net amount being in reality £27,000 less than in 1861.

Commerce.—The condition of the foreign trade of the colony will be understood from the following table of shipping entered and cleared in 1860-62—

	Entered.		Cleared.	
	Yankee.	Thurs.	Yankee.	Wesp.
1860	2014	229,064	2048	228,527
1861	878	228,257	682	204,463
1862	1044	309,587	1065	299,263

Of this shipping in 1862 788 vessels (entered) measuring 227,277 tons, and 502 vessels (cleared) of 247,217 tons, were registered. In the three years 1860-3 six vessels, of 480 tons in the aggregate were built in the colony.

The value of the imports and exports in each of the years 1861, 1862 and 1863, was as follows:—

	1861	1862	1863
Imports	22,002,385	22,33,003	22,273,852
Exports	1,972,700	1,907,600	2,236,646

The principal articles imported and exported, and the value of them, are exhibited in these tables:—

Principal Articles of Imports	1861	1862	1863
Apparel,	134,280	130,740	117,723
Beer	48,774	17,084	49,613
Clothing and Uphol. Ware,	26,484	29,497	27,825
Cord,	10,510	25,383	26,478
Coffee,	141,682	146,087	1,020,200
Cotton Manufactures,	202,123	183,283	18,041
Drumsticks &c.	238,467	255,257	191,250
Hardware, Cutlery &c.	160,000	140,000	100,000
Iron,	24,507	37,426	10,000
Lumber Manufactures	19,277	98,136	7,791
Woolen Manufactures	36,405	18,842	9,922
Woolen Goods,	8,825	11,114	81,976
Rice,	44,044	54,801	58,995
Spices	36,003	26,720	15,914
Sundries and Hardware,	121,432	146,444	120,225
Raw Sugar,	18,510	4,920	20,832
Tin,	9,002	8,400	7,561
Tobacco, Manufactured and	72,000	30,000	9,262
Woolen Manufactures,	112,961	100,071	71,212
Principal Articles of Ex. port	1861	1862	1863
Copper Ore,	61,445	64,562	103,214
Cashmere Peas,	94,000	2,000	10,000
Wool,	12,126	17,025	17,387
Iron,	14,721	26,815	10,773
Cashmere,	22,077	45,226	23,677
Woolen Goods,	21,007	65,900	50,000
Wine,	20,991	51,400	40,004
Wool	1,400,000	1,201,126	1,004,641

Population.—According to the last return, in the year 1856, the population on and area of the colony stood thus:—

Population.

White.	Coloured.	Albino.	Various	Aves
100,150	139,147	10,000	(Mixed, &c.)	27,000
Making a total population of 257,000				

CAPE VINCENT a vil and port of entry U States, New York, on the St. Lawrence, and on the Watkinson railway 180 m N W Albany. It possesses a steam boat landing, and a ship-yard. Pop 2565

CAPO DI PONTE, a tn. Austrian Italy prov and 4 m N E Belluno, r bank Piave. It possesses a splendid bridge, which is thrown across the river at a point where its stream is confined between rocky precipices. Pop 2350

CAPTIGNAC, a tn. Canada East, co. Montmery r bank St. Lawrence, 42 m N E Quebec, on the railway to Trois-Rivières. It possesses ship-building yards, and has an extensive trade in lumber. Pop about 2800.

CARAHALLUM (Tvr Cordillera) of a mountain range, Philippine Isles, which stretches from N to S. over the island of Luzon, over 6 of lat. with a breadth which where greatest is about 45 m. Its culminating point, of which, however the height is not stated, is in lat. 16° 7' N lon 120° 50' E. From this point, as a common nucleus, it proceeds in three branches—two of them N terminating respectively in Capes Engano and Pato and the other S terminating in the volcano of Balacan.

CARACOLLO a tn. S. America, Bolivia, prov and 30 m. N N W Oruro, near an affluent of the Desaguadero. It covers a large space, is of pleasing appearance, consists of houses of one story but commodious and has a spacious plain or square with a number of shops and a church.

CARAGA a prov Philippine Isles forming the large portion in the S E. of the island of Mindanao. Taken it is bounded by prov Misamis, and the territory of the native nation of Mindanao. On all other sides it is washed by the sea. Area about 7000 sq. m. On its coast are several bays and indentations, affording tolerable anchorage. The

interior comparatively unknown is covered with mountains, apparently volcanic. Dense forests, containing much fine teak timber clothe their sides and summits, but, owing to the impossibility of transport, possess no commercial value. Cultivation is confined to more fertile and moist of the zone concerned is obtained from Zamboanga and Zambo. The favorite employment is gold-washing which is said to be more productive here than in any other part of the Philippines. The bulk of the population at Bianga but there are several wild tribes of unknown origin. Pop. exclusive of wild tribes, 31,963

CARBONDALF a tn U States Pennsylvania, in a valley near the head of the Lackawanna, and on a railway which connects it with Honesdale, 140 m. N E Harrisburg. Its prosperity which has grown very rapidly is owing to its coal-field, the beds of which are said to be extremely rich, and to be 20 ft thick. Pop 5575

CARDENAS, a tn. and bay on the N coast of Cuba, 45 m. N E Matanzas lat 23° 12' N lon. 81° 5' W. It has a small shallow harbour where the American filibuster General Lopez, landed on the 1st May 1890, and overpowered the garrison of the fort to surrender but was soon checked in his advance into the interior and with difficulty succeeded in his escape from the island. Pop. about 1200

CARLETON a vil and township, British America, Canada East, co. Bonaventure, on the shore of a shallow lagoon in Chaleur Bay. It possesses a church a school and an excellent and capacious roadstead safe in all winds. Immediately in rear of the village, Mount Carleton rises to a height of 1800 ft. Pop. of township, 1000

CARLEISLE, or NEW CARLEISLE a tn. British America, Canada East esp. co. Bonaventure dist. (Inq.) on the N shore of Chaleur Bay. It contains two churches, a courthouse and jail, and is actively engaged in the fisheries; possessing in Parvise Bay situated to the E. of it an excellent roadstead and the principal fishing establishment in Chaleur Bay. Pop 500

CARLIAPAGO an Austrian empire Military Frontier, esp. dist. of same name on the Striat of Morlacco, in the Adriatic, 85 m. S S E. Fiume; with a fine old parish church a Caput in monastery a German trivial school a fair haven, and a large trade. Pop 600.

CARLOS, (SAR) or ARCAR a tn and port Chili (See ARCAR on page)

CARLOS (SAR) a tn. Chili prov Nuble esp. dep. of same name, on the Naburua Creek 30 m. S. by Valsparito lat 36° 8' lon 72° 2' W. It contains about 800 houses regularly arranged in a plaza, and in longitudinal and transversal streets, and has a church, a public and two private schools, and an almshouse. The dep was once celebrated for its gold-mines. Pop 4250.

CARMEN or PUERBA CARMEN a tn. S. America, r bank Parana, on the S. frontiers of Uruguay lat. 27° 15' 30" S lon. 56° 14' 21" W. It is a new place, built after govern ment had thought proper to abandon the old and important settlement of Ypanora or Encarnacion situated 12 m further up the river. The inhabitants, about 1000 carry on a considerable trade with the neighbouring districts.

CARRACOU an Isl West Indies Windward Islands, the largest of the Grenadine group, 16 m N E Grenada, is of irregular form, about 21 m in circuit. Its S and W sides are so encumbered with shoals and small islets that none but small vessels can approach them with safety: but on the N shore are two commodious anchorages. The island is inhabited.

CARRIPAL, a tn. Mexico, state and 126 m N Chilhuahua, near the German lat. 20° 29' N lon. 106° 49' W being originally established as a presidio or military station, it is still surrounded by a wall and provided with a small garrison. These however have failed to protect it from the incursions of the Indians, from whom it has repeatedly suffered severely. Though still well peopled, it possesses little importance, and is remarkable chiefly for the beauty of its site. A little to the S W of Carrisal are found the extensive ruins of an old Indian temple, to which the name of Casa Grande, or Casa de los Ancestrales, has been given.

CARROLLTON, two vils. U States —1 A vil Louisiana, 1 bank Mississippi, 7 m. above New Orleans, with which it is connected by a railroad. It is the residence of many

persons who are engaged in business in New Orleans and has pleasure-gardens which are much frequented by visitors. Pop. 1756.—A vil. Illinois, esp. Greene co. on the railway from Alton to Springfield, 70 m. S.W. the latter. Is a fertile and populous district, and with coal and timber in its vicinity it has several manufacturing and possesses four or five churches, and a free school. Pop. 2753.

CASA BLANCA a tn. Chili, prov. and 20 m. S.E. Valparaiso, cap. dep. of same name, in the midst of a narrow valley 790 feet above sea-level. It is built chiefly along both sides of the highroad to Santiago has a considerable number of shops, supplied chiefly with such articles as are required by the constant stream of cartmen and muleteers moving to and from the port and contains 2000 inhabitants who find profitable employment in raising fruits and vegetables, and rearing poultry for Valparaiso.

LABALEONE a tn. Austrian Italy, prov. and 32 m. S.E. of Verona, on an unhealthy site; with a good church and numerous villas. Pop. 2400.

CAMLADE COVE New Zealand, on the S. side of Dusky Bay near the S.W. extremity of Middle Island or Munster, has at its entrance a width of about $\frac{1}{2}$ m. with a depth of 25 fathoms and stretches $\frac{1}{4}$ m. in a S.W. direction. Within the entrance a sandy point projecting from the S. shore narrows the navigable space, but fertile up to the beach increases, and gives good anchorage in 12 to 15 fathoms. A considerable stream at the head of the Cove forms the cascade from which it has derived its name.

CASCAPEDIA a river and bay Canada East, dist. Quebec.—The river, issuing from a lake in a mountainous district, flows circuitously S.E. for about 60 m. and falls into the bay of its name on the N. shore not far from the head of Chaleur Bay. Though a considerable stream it can only be entered by boats in consequence of extensive shoals of sand and mud.—The bay, which lies between Black Point and Treedigh Point on the W. is 13 m. wide and 5 or 6 m. deep, and is much visited by timber ships. Immediately to the E. is the village of Richmond rendered conspicuous by its church, while its W. shores are well settled mostly by French Canadians and Acadians. Black Point its E. extremity is a bold and rocky promontory rising 400 ft. above the sea.

CASSANGÉ a tn. S.W. Africa, interesting as the farthest inland station of the Portuguese dist. 9° 37' 30" S. lat. 14° 45' E. It stands in a deep valley about 40 m. W. of the Quango or Congo, and 810 m. nearly S.E. of Loanda. It consists of about 40 or 50 houses belonging to Portuguese traders, all built of wattle and daub and surrounded by plantations of maize, manioc, &c. Behind are kitchen gardens, in which grow the common European vegetables, potatoes, peas, cabbages, onions, &c. All the traders are officers, in the militia, and many of them have become rich by sending out pombeiros or native traders with large quantities of goods to trade with on their account. The Portuguese government, fearing that once of collision might thus occur and compel them to interfere have prohibited the subjects from crossing the frontier; but the prohibition is little more than a dead letter and the traders seem inclined to spread along the banks of the Quango. In addition to the traders there is a considerable colored population in Cassangé.

CASSINGODDE, or **KASSANGODA**, a vil. India, presid. Madras dist. S. Canara, 100 m. N.W. Calicut. It is scattered over a large area in the rear of a backwater and contains an industrious and thriving population of Hindus and Mahomedans who carry on an extensive trade in coconuts and rice, which constitutes their principal produce.

CASTELMUSCHIO a tn. Austrian empire, circle Trent, on the N. extremity of the island of Viglia, in the Bay of Quarnero; with an old castle, a charitable endowment and a good harbour. Pop. 1400.

CASTLETON a vil. U. States, Vermont, on a river of same name, and at the intersection of the Rutland and Washington, and the Rutland and Castleton railways. It possesses a medical college in connection with that of Middlebury. Pop. 2823.

CASTRIES a bay Russian empire, on the W. coast of the Gulf of Tauris, to the E. of Mamma Brulai lat. 51° 38' N. lon. 141° 48' E. The entrance, in the middle of which lies Danger Rock, is between Castris Point on the N. and Quoin Point or Klosterwamp on the S. Although the greater part

of it is open to easterly winds, which throw in a heavy sea there is good shelter behind some islands within it particularly Observatory Island, where the depth is 3 fathoms. On Quoin Point stands a lighthouse 250 ft. above the sea, showing a fixed light visible 18 m. The isthmus separating Castris Bay from the Amoor is only 40 m. across, and the distance between it and Lake Kryn is not more than 16 m. It has hence been proposed to make that bay the great maritime outlet for the produce of the Russian territories on the Amoor. With this view the town of Suifuok has been founded on the river and a good road made to connect it with the bay. A railway also has been projected and several magnificent works which time may probably mature. The great draw back to Castris Bay as a port is its being frozen from the middle of November to April. The shores of the bay are surrounded by hills which terminate in bold cliffs of trachyte and basalt. The loftiest of the hills, Mount Arbol, has an elevation of 1200 ft. and forms a good landmark. At the mouth of the Naily a rivulet which enters the bay the Russians have erected the port of Alexandrovsk defended by several batteries and about $\frac{1}{2}$ m. farther inland have established the military colony of Castris consisting of a church and hospital and about 60 log-houses inhabited by about 180 soldiers and their families.

CASTRO a seaport tn. Chili, on the eastern shore of the island of Chilo lat. 42° 38' S. lon. 73° 50' W. It stands on a steep hill near the bottom of an inland-flooded bay at a distance of about 250 wooden houses, forming two or three streets. Of the two churches, one, built by the Jesuits is becoming ruinous, the other in the middle of the plan has a picturesque and venerable appearance. A model and two primary schools are supported by government. Under the Spaniards the annual ships from Peru landed their treasures at Castro.

CATACAMARCA, an Indian tn. Central America. Hon. Jure on a stream of same name, near its confluence with the Guaymas, 10 m. W. Jutalpa. It is regularly governed as a municipality with an Indian at its head consists of dwellings, most of them roofed with tiles and many of the substantially built. It possesses a handsome church and contains about 3000 orderly and industrious inhabitants all professedly Christian.

CATAMARCA [add.] a prov. La Plata bounded N. by Salta E. Tucuman and Santiago, S. Cordoba and La Rioja, and W. La Rioja and Chili, area about 60,000 sq. m. The surface is very mountainous in all directions except the S. where it stretches out into a large plain of very indifferent fertility. The loftiest and best-known of the mountains is the Sierra de Aconquija, which stretches from S. to N. towards the frontiers of Salta and attains in its culminating point near its S. extremity a height of more than 16,000 ft. Here Aconquija becomes linked with two other ranges—the Sierra del Alto, which stretches S.E. and is prolonged by the Sierra de Anacoate, and the Sierra de Ambato, which stretch N.W. into prov. Rioja, and is connected by other chains with the Cordillera of the Andes. The Santa Maria, flowing N. to its junction with the Huachupe, is the only river of the last consequence, but every valley having its stream or mountain torrent, the whole province is well watered. The only lake is the Laguna Blanca, which lies at the foot of Cerro Azul, in the bottom of one of four large valleys formed by the Sierra de Aconquija. It is very shallow and though covering a large area during the rains becomes almost dry in the hot season. The soil is tolerably fertile in producing large crops of maize and wheat, and raising large numbers of live stock especially goats. The vine is also cultivated and yields wine and spirits which bear a high name in the surrounding countries. The principal exports are beasts of burden sent into Bolivia and Peru, horned cattle which find a ready market at Copiapo or Chile, and hides and goat-skins, raw or tanned sent in great numbers to Buenos Ayres. Other articles are wheat, capotomus, anise-seed, tobacco, wine, spirits, and dried figs. The principal mineral is iron, but gold silver and lead are also found. The political division of the prov. is into eight departments.—El Restaurador or dep. of Catamarca, the capital pop. about 20,000. Piedra Blanca pop. 10,000. Amaripe pop. 16,000. Alto pop. about 12,000. Fuerte de San Miguel, pop. 140,000. Santa Maria, pop. 8000. Balen, pop. 7600; and Tinogasta,

pop. 9900. Pop. of province about 80,000, chiefly of Indian extraction, with a considerable mixture of Spaniards.

CATAMARCA (lat.) a tn. La Plata, cap. of above prov., on the W side of Valle Vieja, at the foot of the mountains of Ambato 170 m. W. W. San Diego lat. 37° 40' S. lon. 67° W. It extends over a large space, and consists of wide regular streets, with commodious whitewashed houses, presenting a pleasing contrast to the dark green of the orange gardens with which they are surrounded. The principal industrial establishments are flour-mills. There is also a considerable manufacture of woollen and silk hats. A little E. of the town excellent clay is found, and employed to some extent in making roofing tiles. The surrounding district, though both sandy and stony, is well cultivated, and in addition to ordinary crops of maize, wheat, and beans, yields excellent cotton to such an extent as to furnish a considerable export to Cordoba. Fruit also, particularly apples and water melons abound. Pop. 5150.

CATHARINES (riv.) a tn. Canada West, situated on the Welland canal in the township of Grantham and co. of Lincoln 13 m. from Niagara Falls, is beautifully situated on a plateau above the valley watered by the canal and in the heart of a fertile and agreeable country. Its medicinal waters are held in high esteem and during the summer months it becomes a favorite resort of travellers in search of health or pleasure. The manufacture of machinery and agricultural implements is carried on to a considerable extent. Pop. in 1856, about 6500.

CATORUM (lat.) a tn. Mexico, state and 130 m. N by W San Luis Potosi on a steep mountain, at the height of about 3000 ft. above the sea. It is very irregularly built: the streets, following the original inequalities of the ground are in many places totally unfit for carriages, while the houses are so unevenly placed, as to be sometimes of three stories on one side and of only a single story on the other. The buildings for smelting silver ore and other purposes are at some distance S. of the town and the mines lie scattered over the neighbouring mountains. Large fortunes were made up to the time of the revolt on but immediately thereafter in consequence of the withdrawal of capital and the continued unsettled state of the country the returns were soon reduced to a fourth of what they had previously been.

CAIGHAWAGA or **SATUL** BY LOCH, a town, British America, Canada East, co. Lapeere, r bank Mt. Lawrence, 5 m. N.W. Montreal. It is entirely occupied by Indians of the Innuque tribe and governed by a council of seven Indian chiefs. Pop. about 1700.

CAUQUENNES a tn. Chili, cap. prov. Maipo, on a slope between a river of same name and Tumbaco Creek, 200 m. S. Valparaiso. It consists of seven streets running N. and S. and six others intersecting them at right angles and has a plaza, a public promenade, two churches, and seven schools. Pop. 3500.

(AYACU) **KAYAKO**, or **MARIENBERG** a river, S.W. Africa, which forms the limit of the town of Densuaga on the N. runs in the mountains of Gambia, flows N.W. through the marshy tract of Makrop, and he has entered the plain and formed a number of small lakes called Bimbe, is lost in the sand. During the greater part of the year it exists merely as a sand-ridge which becomes visible only when the sand covering it is dug through. There are many rivers of the same kind in Africa: but there is this peculiarity in the Cayaco that its water is perfectly sweet, while the water obtained by digging into others has usually a mineral saline taste.

CAVAZZO a tn. Austrian Italy prov. and 36 m. N. Udine r bank Tagliamento; with a parish church and a sulphur spring. Pop. 2077.

CAWNPORE (lat.) a dist. India, N.W. Province, Deah, between lat. 25° 25' and 27° N.; lon. 79° 34' and

80° 37' E. is bounded N.W. by Etawah and Farrukhabad S.W. the Jumna, S.E. Panchpore and N.E. the Ganges; length N. to S. 75 m., breadth 45 m.; area, 3357 sq. m. It is traversed by the Grand Trunk road and the portion of the Great Indian railway between Allahabad and Agra. Lying between the Jumna and the Ganges, it forms a vast alluvial tract raised from 60 to 130 ft. above these streams in the dry season, remarkably fertile and for the most part cultivated like a garden but with a surface so little diversified as to be monotonous in the extreme. The principal alluvial crops are wheat, barley, pulse, oil-seeds, potatoes, sugar-cane, and maize. The two last are particularly luxuriant, growing to the height of 8 or 10 ft. and so closely as to exclude the light of the sun. The principal commercial crops are tobacco, opium, castor-oil, indigo, and cotton. Almost the only exception to the general fertility of the district occurs in the vicinity of the tannery of Cawnpore, where the soil is sandy and during the season when stifling hot winds blow is carried aloft in clouds of dust, sometimes producing an almost mid night darkness. The means of education though still very deficient, are more ample than those possessed by most districts of India. In 1848 the number of schools closed under the hands of Persian Arab, Hindu, European, and English, was 540 with an attendance of 4700 pupils. Pop. 1174136.

CAWNPORE (lat.) a tn. cap. of above dist. 120 m. N.W. Allahabad on the E. Indian railway. The town on the r bank of the Ganges, was fatally distinguished in the Indian mutiny of 1857. In June the native regiments stationed here mutinied and placed themselves under the Rajah of Bithoor the notorious Nana Sahib. General Wheeler with a small body of English troops, hastily intrenched himself but was compelled by famine and loss of men to surrender stipu-

THE PLASHTIES HOUSE, CAWNPORE, in which the Mutineers took place. From Green's Sketches on India during the Mutiny.

lating that he and his party should be allowed to leave the place unhurt. But after the troops, with the women and children had been embarked in boats on the Ganges, they were treacherously fired upon many were killed and the remainder conveyed back to the city where the men were massacred and the women and children placed in confinement. On the approach of General Havelock the Nana ordered these helpless prisoners to be slaughtered and their bodies to be thrown into a well (July 1857). On the following day the victorious progress of Havelock forced theajah to retreat, and the British soldiery inflicted a terrible retribution on the sanguinary assembly. For some time after these events Cawnpore was little better than a heap of ruins, but having been partly rebuilt it is beginning to resume its previous appearance. A church perpetuates the record of the Cawnpore massacre, and memorial gardens enclose the cemetery, the well, and other sites of the melancholy catastrophe. The approach to the gardens is exceedingly barren and uninviting, but on entering the gates everything looks fertile and green. The gardens are beautifully laid out, and are irrigated by miniature canals conveying water to them

a distance of 15 m., so that their verdure is kept up even during the dry season. Close by the site of the bungalow or house in which the woman and child were murdered is the well, over which an octagonal building of beautiful architecture has been erected entered by steps and a bronze gateway. In the interior is a kind of tomb also octagonal of carved stone, with an inscription round the base, and surmounted by a figure of Mercury in white marble. There is no roof to the building the idea of a well being preserved as much as possible.

CAENNE [add.] an island river and in S. America, French Guiana.—The **CAENNE** formed by the rivers Oyao and Cayenne, and a branch which unites them so as to separate it entirely from the mainland, is situated on the N.E. coast of Guiana, and consists of an alluvial tract slightly raised above the level of the sea, and even somewhat depressed toward the centre where it becomes swampy and very unhealthy; the N. part, however, are mountainous, and the N.E. shore is formed of sandy bays separated by bold rocky heights which decline towards the S. and W. It is of an irregularly square form and has a circuit of about 55 m. The soil is generally fertile, and produces in abundance maize, manioc, vanilla, sugar cane tobacco indigo pepper cloves cacao and cotton.—The river rising in a mountainous district, flows N.E. and after contributing to form the island, by passing along its N. side falls into the Atlantic. Its whole course is about 40 m.—The town which ranks as the capital of French Guiana, stands at the mouth of the river on the N.W. extremity of the island. It consists of about 500 houses, constructed mostly of wood and well finished or painted so as to have rather a cheerful appearance. The older portion is very irregular in its form but the more modern portion has spacious straight streets generally well paved and clean and lined with houses of which a few are handsome. Between the two portions is the Place d'Armes, a large open space, planted with orange trees. The harbour which is defended by a fort, is shallow but otherwise commodious, and the roadstead immediately beyond it is the best on the coast. In 1856 the value of the imports was 246,000 and of exports 218,000. Cayenne, which had long been used as a penal settlement has recently acquired additional notoriety from the number of political persons who have been banished to it, on the summary charge of disaffection to the existing French government. In 1857 the different penal colonies on the island contained 4000 persons who had been transported. Exclusive of them the pop. of the town of Cayenne is about 6000.

CAYMAN [add.] the name of three islands, W. Indies nearly equidistant from Jamaica on the S.E. and Cuba on the N.—1 *Great Cayman* is 17 m. long from E to W and varies in breadth from 4 m. at its E to 7 m. at its W extremity. It is low and sandy in the S.W. but both its N.W. and S.E. ends form rounded bluff cliffs about 40 ft high. It is almost everywhere thickly wooded. Owing to a reef, which skirts it on all sides but the W., great confusion must be used in approaching it. In several places however on the S. side there are openings in the reef in which the small vessels of the island find shelter. The only anchorage for large vessels is under the W. extremity. The inhabitants amounted in 1855 to 1878 partly occupying a village along the shore of a shallow lagoon on the N. shore but settled chiefly at Borden Town on the S. Turtle abundance on the island and forms its principal article of trade.—2 *Little Cayman* is 9 m. long by about 1 m. broad, and from 45 to 55 ft high. Its S. coast, which is sandy is skirted by a reef.—3 *Cayman Brac* is 10 m. long from E.N.E. to W.S.W. by 1 m. broad, well wooded and though low and sandy at its W. end, rises in the E. in a bold rocky cliff 100 ft high. Its inhabitants amounting only to two or three families are chiefly employed in catching turtles.

CAYUGA a lake, U. States, in the W. of the central portion of New York is a long and narrow expanse, with a length of about 98 m. and an average width of not more than 2 m. It is shallow towards the N. but deepens towards the S. and is said to be in some places unfathomable. Its surplus water passes by an outlet into Seneca River. The shallow part only becomes frozen.

CAZENGO a dist. S.W. Africa, Portuguese settlements, prov. Angola, on the Luanda, 180 m. E.S.E. of Luanda, famous

for the abundance and excellence of its coffee. On the sides of the several lofty mountains which cover the larger part of the district, coffee plantations exist. As there were not formed by the present Portuguese settlers and there is no record of their original formation some have maintained that the coffee plant is here indigenous. The fact, however seems to be that the miscegenates, to whom the country is much indebted, brought some of the fine old Mocha seed to Angola, and that to the plants thus propagated the excellence of its coffee is due.

CAZENOVIA, a vil. U. States, New York on a small lake of same name 190 m. E. Albany. It is the seat of an educational institute, called the Overa Conference Seminary which is attended by 800 to 900 pupils. Pop. 4495.

CEDAR LAKE British America, lying with Lake Winnipeg on the E. and Lake Winnipegosis on the S. is properly only an expansion of the Saskatchewan which enters it on the N.W. and issues from it on the N.E. It is nearly 50 m. long and where widest 35 m. broad and with its coast-line embraces an area of about 515 sq. m. Its highest shore Lake Winnipeg is upwards of 16 ft. and above the sea upwards of 638 ft. Its only feeder besides the Saskatchewan is a branch from Moose Lake which enters it from the N. Its depth of water is sufficient for the largest craft, except on the N.W. where the quantity of alluvium brought down by the Saskatchewan is rapidly filling it up. Its N. coast is deeply indented and forms the edge of a low flat, which extends far back into the country. At some points, and on many of the islands which dot its surface, horizontal beds of limestone are seen. Both the mainland and the islands are well wooded with balsam spruce birch poplar tamarack, Balsam poplar and cedar the last growing on its shores, particularly the N.W. and from its being somewhat rare in other parts of the country gives it its name. The Saskatchewan on issuing from the lake, is divided by an island into two branches. At the commencement of the E. and far narrower branch the Indians have a fishing station, where white fish and sturgeon are caught in abundance. Cedar Lake is separated from Winnipegosis by a low isthmus about 4 m. long which as the Hudson's Bay Company at one time sent their supplies to the Swan River district across it, bears the name of the *Musny Portage*.

CENTREVILLE a vil. U. States, Virginia Fairfax co. 27 m. W. Washington, contains one church and a few stores, but is memorable for the series of battles fought in its vicinity on the last days of August, 1862 in which the Federal army under General Pope, suffered heavy loss and a severe repulse.

CERKOWE (Naw Lower, and Urtze) three places, Austrian empire Bohemia circle Tabors.—1 *Yew Cerkowe*, 63 m. S.E. Prague with a parish church two mills, and 1100 inhabitants.—2 *Lower Cerkowe*, 76 m. E.S.E. Tabors with a parish church two mills, and 1100 inhabitants.—3 *Upper Cerkowe*, 22 m. E.N.E. Tabors on the Igau with a parish church a castle a townhouse, a brewery and saw mill and other mills. Pop. 1800.

CERHOWITZ a tn. Austrian empire Bohemia, circle and about 24 m. S.W. Prague has a parish church, a town house and a brewery and contains 1000 inhabitants.

CHERIGVANO a tn. Austrian empire, dist. GÖtz on the frontiers of Vaoetia with several public offices and some trade. Pop. 1000.

CEGIO a tn. Austrian Italy prov. Belluno, 6 m. N.N.E. Feltre with a valuable mine of quicksilver. Pop. about 8400.

CFWKOW a tn. Austrian empire, Galicia, circle Zol. kiew about 53 m. N.W. Lemberg with manufactures of turpentine and pitch. Pop. 1850.

CEYLON [add.] The commercial activity of the island has advanced to a considerable extent of late years, but from the nature of the climate, which, though not generally unhealthy is not suitable for Europeans, the commerce must necessarily be dependent in a great degree upon native energy. Coffee has become of rapidly increasing importance as an article of foreign trade, and the aggregate of exports has gradually but not uniformly risen in amount. The value of the imports, however exhibits a steady annual growth for many years. The pearl-fishery on the Arripo banks was revived, after a long interval of suspension in 1855 but

Finance.—The customs produced in 1893 an income of \$235,574, being nearly one-third of the whole revenue. The total amount of the revenue and expenditure is that and the two previous years was as follows—

	1891	1892	1893
Revenue	\$77,101	\$76,186	\$76,186
Expenditure	\$70,449	\$65,230	\$69,501

Population, &c.—The following table shows the area and population of the several provinces, according to the last return in the year 1892. It reveals the curious fact that the males are considerably in excess of the females—a state of matters the reverse of what is usually the case in old countries—

Provinces.	Area Sq. m.	White.		Coloured.		Total.		Afric. and Burgh. m.	Total.	Per Sq. m.
		Males.	Females.	Males.	Females.	Males.	Females.			
Western	3,889	4,289	4,039	898,967	815,095	409,189	81,099	5,079	128,518	189.00

CHAK CHAK the chief port, fort, and town of the island of Pemba which lies off the E. coast of Africa, N. N. E. of Zanzibar. It is situated on the W. side where the island is narrowest. The houses generally containing only two rooms, are square wattle dab-tubs raised on platforms of tamped mud generally with a deep verandah in front, where poultry, fruit and fish are exposed for sale; the principal street, lined with huts of the above description, is merely a long narrow lane. By far the most prominent and attractive object is the fort, whose white walls and tall towers rise on a wooded hill and stand boldly out from its dark green back ground, commanding the bay and the coast line. Its structure, consisting in front of a loop-holed curtain of masonry flanked with turrets, was probably suggested by the Portuguese who long made Pemba the green island of the Arabs, one of their principal slave-depots and traded regularly to Chak-Chak as late as 1822.

CHALKI R BAY [old] British America, on the W. shore of the Gulf of St. Lawrence has at its entrance a width of about 35 m. a length from E. to W. of 75 m. and a current, from Cape Despair round to the N. extremity of Muscon Island of 185 m. It forms the boundary between the district of Gaspé in Canada East and New Brunswick. This magnificent bay without rock reef or shoal so common with bays during the summer months that it has among the natives the name of the sea of fish. The scenery on its coast is very fine, the grand wave-worn cliffs near its entrance, and among them the lured Rock, 280 feet high, through which a boat can pass, being notable and remarkable objects. Mount Forêt is the background, rises to the height of 1,250 ft. and forms a conspicuous landmark. The N. or Canadian shore is of moderate height but a few miles behind it is an irregular range of hills of considerable elevation. The predominating features are red cliffs of sandstone and shale, with intervening shingles and sand beaches. The S. or New Brunswick shore is mostly composed of similar rocks but is much lower excepting between Bathurst and Carleton Place where the red sandstone cliffs rise to the height of 200 ft. The sandstone belongs apparently to the coal measures and the veins of bituminous coal are seen in many places. The chief rivers of the bay are the Musconigbee, which enters at its head with a broad estuary forming the fine harbour of Dalhousie and the St. Lawrence, which flowing N. N. E. through the N. E. of New Brunswick, falls into the large bay of its name at Bathurst. The navigation is by no means difficult the fogs which prevail with E. winds on the banks of Muscon Island (on which there is a lighthouse being of rare occurrence and the weather is thin the bay being in general warmer and much finer than in the gulf outside. The bay 110 m. from Rivière de Loup vires the Grand Trunk railway of Canada terminates offers every advantage as a principal station for steam communication between England and Canada, the magnificent harbour at its head and at the mouth of the Rivière de Loup being open and accessible for at least ten months of the year. All round its shores are increasing settlements with harbours, roads, and rivers, which are much frequented.

SEE ENCYCLOPEDIA—Vol. I

visited by vessels engaged in the lumber trade and the fishery.

CHAMIRA a tn. Western Africa, Adamawa fully situated on the Fave near the S. foot of Mount Alanku, 60 N. S. S. E. Yola. It is a large place, and the residence of a powerful and warlike chief. The inhabitants are almost exclusively Fellatah.

CHAMIRA or JUNIOR a tn. India near the S. frontier of Gholab Singh's Dominions 100 N. N. E. Lahore. It occupies a beautiful and picturesque site on the Ravine, at the base of a snowy peak of the Himalayas and consists of about 100 houses, constructed of wood and ranged along the sides of an open rectangular space.

CHAMLEY a tn. Canada East, cap. of some name, on the Richelieu, 141 F. Montreal. Though it ranks as a single town it consists of three distinct municipalities, called respectively the Basse the Canton and the Parish. Near the second of these, situated near the Rapids the remains of a fort erected by the French in 1711 may still be traced. Chamley possesses an English Episcopal a Wesleyan and a M. Catholic of which a M. Catholic college a Protestant academy a Canadian and a Methodist institute a deaf and dumb asylum, and a run of 1000 acres. Numerous flour and saw mills take advantage of the large supply of water power and an important market is held twice a week. Pop. about 1,500.

CHAMLEY (CHL), a tn. W. Africa, Senegal States prov. Gambia, 180 m. W. Fouta Djall 13 19 N. 105 2 E. It is a small town on the N. by a wooded hill and towards the N. by a small chain of hills at the foot of which are the wells 7 fathoms deep. The corn magazines or granaries of the inhabitants are round or consisting of towers or quadrangular buildings raised first 3 ft. clear of the ground as a protection from the ants, and then continued with a gradual slope to the height of 15 ft., with an a large diameter of about 8 ft. the only opening being a window like aperture near the top through which the corn is taken in and out. Every court yard has one or more of these magazines which consequently form more prominent objects than the low huts, of which the great part of the dwellings are composed. The only building of any pretensions in the residence of the governor whose jurisdiction extends over a large district.

CHAMPANEER, two places India. The one is situated on the S. frontiers of the dist. and 80 m. S. N. E. Ajmer and possesses little importance. The other in Gujarat, about 50 m. N. Baroda, consists of a tn. and fort the former of which, once an important city as indicated by the remains of its houses tanks, temples and mosques is now a poor straggling place in the midst of dense jungle infested by tigers and other wild animals. The fort, or rather two forts, an upper and a lower are situated on a isolated rock of great height, and surrounded by walls rising in some places three-quarters of a mile long and 600 yards broad. The upper deemed by the natives impregnable contains a famous Hindu temple. The lower which is also very difficult of access, and of great natural strength, contains some curious and very ancient Hindu monuments. Pop. 2000.

CHAMPLAIN a tn. Canada East, cap. co. of same name, 1 bank St. Lawrence, 70 m. N.E. Quebec. It possesses a E. Catholic chapel and several families, together with a large trade in flour and lumber. A light-house erected on a height near the bank of the river gives important aid to those navigating it. P. 2000.

CHAMUÑO or **JENORON** a tn. Mexico, state Yucatan on the bank of a stream of same name, 12 m. N.E. Campeche. It suffered much during the war with Mex. co. in 1840 and has lost much of the trade which it once carried on with the interior. Pop. 1000.

CHAMULA a tn. Mexico, state Chiapas, about 6 m. N.W. & Christoval with 10181 inhabitants.

CHANCELOUSVILLE, a vil U. States, Virginia, Appomattox co. 80 m. N. by W. Richmond and 10 m. W. Fredericksburg. It is memorable for the great battle which bears its name, and which was fought in its vicinity between the Federal and Confederate armies with great fury and pertinacity during the three days of May 3 & 4 1863. The battle had no decisive result for either side but during the night of May 4 the Federal army under General Hooker retired across the Rappahannock. An enormous loss in killed and wounded was suffered on both sides, the most serious casualty on the part of the Confederates being the death of their illustrious general T. J. (General) Jackson.

CHANDAIKKE, or **CHANDAIKKE**, a tn. India, Scindia's Dominion in a hilly and dry tract, 103 m. N. Gwalior. According to the Ayen Akbery it contained 14 000 stone houses, 354 markets, 360 caravanserais, and 12 000 mosques and there are at it ruins enough to attest its former extent as a metropolis. But Mahatta oppression and British competition have culminated in destructive war. It was long famous for a fabric called muscadine which was highly prized by wealthy natives for its lightness, durability and softness. The cotton yarn of which it was woven was so fine that single threads were almost invisible and it was sold for three times its weight in silver. It seems still to be made, but costing ten times the price of the finest British muslin has a very limited sale. The fort which figures much in the wars of the Mogul dynasty is seated on a lofty hill and is enclosed by a strong stone rampart flanked with circular towers.

CHANDIPUR, an oral place, India, —1 A tn. N.W. Province, dist. Bijnor 45 m. N.E. Delhi, stands in an open and partially cultivated country and is a place of some importance with an estimated pop. of 11 491. —2 A tn. Malwa territory and 43 m. E. Bhopal. —3 A tn. Barr or Agpore, 51 m. N.E. Agpore. —4 A tn. N.W. Province, dist. Meerut and Noida 20 m. N.E. E. Bangor at the height of 1075 ft. above the sea. —5 A tn. Scindia's Dominion, on the road from Gwalior to Bangor 35 m. S.E. Gwalior 1 bank South which is here about 300 yards wide.

CHANDRA (Tm), the second in importance of the 8 great rivers of the Punjab British India, rises in the Bara Lacia Pass lat. 32° 30' N. lon. 71° 40' E. and flows in a south-westerly direction towards Kokear where it attains a considerable size. At Tandi, about 25 m. below Kokear it receives the waters of the Bhaga River which also has its source in the Pass of Bara Lacia. From this point the united stream is called the Chandra Baga or Chenab, and falls into the Indus at Ismail Khan lat. 31° 10' N. lon. 2° 16' E.

CHANG-CHOW [adj.] a city China, prov. Kiang-soo near the east bank of the Imperial canal 76 m. S.E. Nanking and about 100 m. N.W. Si ngai. It was formerly an important commercial city being situated between Soochow and the Yangtze River with numerous small canals leading from it into the Tai-ho, or Great Lake. It is adorned with so ornate triumphal arches, and the sides of the canal leading to it are lined with brass stones. A moat surrounds the walls, which are 25 ft. high, and pierced for guns. This city has recently become famous in the annals of the Taiping rebellion as one of the strongholds held by the insurgents for four years, and governed by a picked man, who gave a desperate resistance to the forces of Anglo-Chinese, under the command of Major Gordon. After two months, which were rendered with serious loss of officers and disciplined troops, the place was invested by 70 000 imperial soldiers; regular engineering operations were carried on up to the walls where a breach

was made by the artillery as in European warfare, and after a sanguinary hand-to-hand conflict the city was captured on the 11th May 1864. In it were 30 000 pressed inhabitants of the province, who were saved by wearing white turbans, while the Cantonese soldiery 3000 strong were put to the sword, among whom were four rebel chiefs. —[North China Herald. Du Kaido.]

CHAO-CHOW, a departmental city China, prov. Kiang-tung 195 m. N.E. of Hong Kong. It is the centre of an important maritime division of the province on the frontiers of Foo-kien, up the river Hian near its mouth, the tide flowing up to the walls. The channel leading to it is very shallow in consequence of the waters of the river separating into several subsidiary streams before reaching the sea so that foreign ships of large burden can sail up only at high water. There has been a large river trade carried on at this port for centuries, being the centre of a populous department well watered and fertile, and there are nearly 4 000 000 inhabitants within a circuit of 50 miles so that a considerable emigration of the surplus population takes place throughout the year to the Indian Archipelago, Cebu, China, Siam, and Singapore, where they constitute the most thriving portion of the Chinese populations, and are expert sailors. This city —locally called *Tai-chiao*—was included in the treaty of Tientsin (1858) as a port open to foreign trade although no foreign ships had proceeded up the river. It never unlike the people of the other twelve on a par with the inhabitants of Chao-chow refuse to have any direct intercourse with foreign traders and have shown, up to the present time (1864) a decided repugnance to foreigners residing amongst them on the banks of the gates of the city. Consequently the British consul and others together with the foreign residents, have refrained from taking up their abode there and few visit the city. Hence the trade of this treaty port is now carried on at Swatow where the foreigners are located, and all the foreign commerce is transacted.

The people of this city and department are noted for their independent and turbulent spirit, as well as their enterprise and industry. They rank among those who are sparing in their allegiance to the court of Peking and seldom yield up the quota of revenue justly due to the emperor. —[Gustaf's Journal. Williams. Com. O. Id. M. Asia.]

CHAO-HING prov. Che liang China. See **SHAO-HING** in Supp.

CHARAN (Santa Maria de Lan) a tn. Mexico state and 80 m. N. San Luis Potosi. It was once an important mining town, and is still a handsome place though the working of the mines has in a great measure ceased. The inhabitants now give their attention particularly to the rearing of cattle, for which the district is well adapted. P. 6000.

CHARITON or **GAULT** CHARITON a river U. States which rises on the N. frontiers of Iowa enters Missouri, and is nearly 500 m. towards the centre of this state and joins the river Missouri on its N. bank, after a course of about 250 m. of which 50 are navigable. Its principal affluents are the East Chariton and the Middle Fork; the former joining it on the left and the latter on the right bank.

CHARLES an oral Pacific Ocean Gales group, about 600 m. W. of North America, Ecuador lat. 1° 30' N. lon. 91° 30' W. It is 24 m. in extent, and presents a singular appearance from the number of round topped hills of similar shape, but different size, with which it is crowned. One of these hills is about 1500 ft. and exceeds the largest and loftiest, 1780 ft. high. Various the largest settlement in the Galapagos group, is situated among the high hills of this island and has extensive plantations on which every kind of tropical product is raised in abundance. In 1849 how ever the number of settlers only amounted to 25, though the land uncultivated appeared to be as fertile as that which has already proved so productive.

CHARLESBORO a tn. Canada East, co. and 4 m. N.W. Quebec with a E. Catholic church, and an extensive general business and trade in lumber. Pop. about 2500.

CHARLESTON [adj.] a tn. U. States, S. Carolina, cap. co. or dist. of same name on an extensive bay of the Atlantic, formed by the confluence of the rivers Cooper and Ashley and at the common terminus of a number of lines of railway; lat. 32° 45' 38" N. lon. 79° 55' 35" W. It occupies the S. extremity of a tongue of land formed by the two rivers,

and so low and flat, that the town when approached from the sea seems to rise out of the water. The surrounding country is equally flat, and some want consequently is felt of a back-ground to set off a scene which is otherwise striking and beautiful, but the area occupied is far larger than the population would under ordinary circumstances require. This is owing to the manner in which the place is built. A large proportion of the houses belong to the planters of the adjoining districts, who are wealthy enough to have both town and country residences. Most of the houses occupied by these residents stand among open grounds laid out in ornamental shrubberies or gardens, and are pre-ided with ample piazzas and verandahs. The streets where more closely built and densely populated are tolerably regular and with few exceptions cross at right angles. One of them, Meeting-street, a fine avenue of 60 ft. breadth stretches nearly across the city from N. to S. contains most of the public buildings and is the chief centre of the wholesale trade. King street which runs nearly parallel to Meeting-street, but is much more limited in width is the fashionable shopping locality. Several of the cross-streets are so narrow as to be unhealthy. The principal materials used in building are wood and brick.

According to a regulation rendered necessary by the frequency of destructive fires no new buildings are to be of wood but this regulation is understood to apply only to the old town and hence beyond its limits wood is still generally used. The principal public buildings are 16 churches (among which particular notice is due to the Episcopal churches of St. Philip and St. Michael the Baptist church in Citadel square, and the E. Catholic cathedral) two Jewish synagogues the college, high-school and other educational establishments the S. Carolina Institute for the encouragement of the arts, the Citadel the courthouse the old and new custom houses, the orphan asylum and Reper hospital. Immediately outside the town there is a large and beautiful cemetery with a number of fine monuments. The harbour of Charleston formed by the estuary already mentioned is of ample dimensions, and is landlocked on all sides except the E. where the sea pours in and a troublesome bar has been formed, which is all the more dangerous that the sand-banks composing it are shifting and leave only a few navigable channels of varying depth and width. The entrance to it is well defended. On the right is Fort Moultrie, on Sullivan's Island and on the left, raised upon a mole in the harbour and directly covering the channel is Fort Sumter and before the

city it was to be one of the best-built forts in the U. States. A third fort called Castle Pinckney stands about a mile in front of the city covering the crest of a mud shoal and facing the entrance. In respect of trade Charleston is the greatest mart of the Southern States and has large exports of cotton, rice, tobacco, indigo grain, beaver, tar, pitch, turpentine, and lumber. In its immediate vicinity are grown the famous Sea Island cotton and the largest rice crops within the limits of the U. States. In cotton and rice alone it is a surplus previous to the outbreak of the war were as follows: cotton (Sea Island), 25,238 bales do. (L. Island) 391,706 bales; clean rice 128,340 tonnes. The tonnage of its port exceeded 48,000 tons. Some ship-building is carried on and there are two dry docks for repairs, but the manufacture as a whole is insignificant.

Independently however of its commercial importance, Charleston has been made ever memorable by the events of the civil war of 1861-5. On the 12th of April 1861 the first shot of the war was fired by the Confederates upon the small Artillery garrison which occupied Fort Sumter within the harbour and which surrendered on the 14th. Subsequently Charleston became a chief receptacle of the stores, ord and military conveyed by vessels from the blockade which the Federals established. In 1863 the Federals made vigorous preparations to capture the place, but their naval attacks were repelled and lost Sumter though reduced to ruin, held out against a persistent and furious bombardment. The siege was protracted with more or less energy throughout the remainder of 1863 and into the year 1864. Then the issue of the war turned against the Confederates, and on the night of February 17 1865 Charleston was evacuated by its defenders when it remained by the advance of General Sherman from the south and was immediately occupied by the Federals on the 18th. Previous to the evacuation the upper part of the city was set on fire and in the conflagration 6000 bales of cotton were burned. This followed the rapid collapse of the Confederate cause, and on April 14 exactly four years after it had been hailed down and on the day of the assassination of President Lincoln the U. States flag was formally and solemnly replaced on Fort Sumter. Pop. 1880 40,194.

CHARLESTOWN a town U. States, Virginia, cap. co. Jefferson on the Winchester and Potomac railway 60 m. N. W. Washington. It stands in what is called the Valley of Virginia, in the centre of a beautiful and fertile district. It is built on land which once belonged to Washington's brother. Pop. about 1000.

CHARLOTTT a town U. States N. Carolina cap. co. Mecklenburg on Sugar Creek and on the N. Carolina Central railway 125 m. S. W. Raleigh. It stands on a range on which from time to time considerable quantities of gold have been found and is indebted for any prosperity which it possesses to the gold mines and washings in its vicinity. In 1888 a branch mine for counting the produce was established here. Pop. about 2500.

CHARLOTTESVILLE a town U. States, Virginia, cap. co. Albemarle on Moore's Creek 2 m. also a junction with the Rappahannock, and upon the railway from Washington to Lynchburg, 65 m. N. W. Richmond. Its only claim to notice is its being the seat of the university of Virginia which was planned by Jefferson and the buildings of which were erected at an expense of above £50,000. Pop. 2500.

CHARLOTTE a town U. States N. Carolina cap. co. Mecklenburg on Prince Edward Island advantageously situated on the N. shore of a long creek or bay which has received the name of H. Hecuborum River. It is well laid out in a large square, and in wide streets which cross at right angles; but the plan contemplated is as yet very imperfectly filled up, and the population though rapidly increasing will not soon be able to occupy the space allotted to them. The only stone edifice in the place is the new provincial building occupying the centre of the principal square, about ten others are of brick, but with these exceptions, all the other buildings public as well as private are of wood. The most conspicuous erections are the Scotch church, with a square white tower and the Government house, distinguished by its colonnade. Prince of Wales College, supported from the public revenue, was established in 1880; there are also a private college, named St. Dunstan's and a normal school for training teachers. There are also two banks in the town. The harbour is some-

what difficult access from the narrowness of its entrance, which shoals so much on either side, and not to have a navigable width of above a quarter of a mile, but beyond the entrance the channel opens gradually into one of the finest natural harbors in the world having depth and space sufficient for any number and description of vessels. Though entered from the S coast the distance from its head to Savage harbor on the N coast is less than a mile. In 1863 the entrance were 6'4" depths (49 611 tons) and the clearances 520 vessels (51, 05 tons) Ton (11841) 8700

(HARAOVA a vil. Aracani, dist. Rala, on a branch of the holiday, about lat $^{\circ}1$ N. It is composed chiefly of hais and charas or ferns, for the accommodation of the numerous pilgrims to the temple of Mahasamnee. This temple situated about $\frac{1}{2}$ m. E on a mound, consists of a heavy solid dome with a short turret or minaret at each corner. The worshippers are Buddhists.

(NATALCINA or TCHATALDOR, a in Turkey in Europe
on the Attyras, 20 m W N W Constantinople, In a well
watered wooded valley of the E slopes of the Little Balkan
The modern town which possesses three mosques, consists
of 120 Turkish and 180 Christian houses of comfortable
appearance The remains of fortifications prove the ancient
town to have been a place of some importance

CHATHAQUE, a lake, U. States New York to the centre of the co of same name, about 18 m. long by 1 1/2 m. wide. It is said to be the highest navigable water on the N. American continent, being 90 ft. above Lake Erie and 1790 ft. above the Atlantic. It is frequently covered by mists.

CHATEAU *har.* French America, on the N.E. coast of Labrador at the entrance of the Stra t of Belle Isle lat 52 N. Long. 50 W. It contains within it three harbours—Heleny, Antelope and Pitta the first fit only for small vessels, and frequented by the Falmecura who leave their boats and stages on its shores, the last two suitable for the larger vessels. The shore is low and sandy, and from 4 to 18 fathoms over a soft bottom while inland the shelter comes completely on the S.E. and W. The scenery of the bay is magnificent. Pitta II II on the W side of Pitt's Harbour is 306 ft above the sea. (Baron 211) to the N of the bay is the high and the High Peak is the N of York Bay, 859 ft. The islands are capped at the highest point of 700 ft. by a level plain.

CHATEAU D'ICHET a tn. Canada East co. Mont
monrney 1 bank St. Lawrence 16 m N E. Quebec with a
1 Catholic church and a large trade in flour and lumber
pop about 1200

CHATHAM is a British Army, New Brunswick town, Northumberland, on bank Miramichi, about 7 m above the mouth. It is a straggling place, extending about 12 m along the S bank of the river but as rapidly increasing in size. It has a large house, three clubs and two hotels, and several small places of worship, a court and a police station. It has wharves with deep water, close to town. All the buildings are of wood mostly painted and finished. 10 352/ 219 (21 236 tms) entered and 105 vessels (21 951 tons, 10 352/ 219, 1000).

CHATHAM two in British America —1 Chatham, Canada East, no. Argenteuil on the Ottawa, in a thickly settled district, 42 mi W N W Montreal with two churches —the one Baptist and the other in connection with the Church of England—and a number of flour mills and carding

Chatham—about 8 mi. S. of Detroit; 100 sq. miles; pop about 2500 — 13 Chatham Canada West, exp. co. Keat, on 7th bank Thames, about 13 m. above its mouth at Lake St. Clair and on the Great Western railway 43 m. W. Detroit. It is a large and well built town, with a number of churches and schools, and other fine public buildings; a harbour accessible by vessels of the largest class; and building yards, in which some of the finest sailing craft on the inland water of N America were built; and a very extensive trade in wheat and other agricultural produce oak and walnut timber and W India and pipe staves. Two steamers ply regularly between Chatham and Detroit. Pop abt. 6000.

CHATHAM, as Isl. in the Pacific, the southwestern of the Galapagos group, about 600 m W from the continent of S. America, Ecuador. It is 10 m long by 8 m. broad and has peaks at its S.W. end which rise to the height of 1650 ft. It has a fertile soil, several good anchorages and abundances

of water² and seems better adapted for settlement than any other island of the group. Freshwater Bay so called from a fine stream which falls into it from a lava cliff about 30 ft. high affords secure anchorage in 30 fathoms. On two plantations situated about 4 m inland most tropical productions are raised with ease.

CHATTANOOGA, a city of Tennessee, Tennessee, on the Tennessee River, navigable by steamboats eight months in the year and at the terminus of the Nashville and Chattanooga, and of the Western and Atlantic railways. It is advantageously situated for trade, is the shipping place for the surplus produce of E. and Central Tennessee, and possesses a number of mills and factories. Wood, coal and iron abound in the surrounding country. In 1863 the town was occupied and fortified by a Confederate army but in August was abandoned to the Federals. In September the Federals being defeated in the battle of Chickamauga, retired to it and were followed up by the Confederates. A memorable battle was fought in the vicinity of the town between the two armies, on November 23-25 in which the famous assault of Lookout Mountain was made by the Federals and the Confederate forces were driven from their position, and lost 15,000 men.

CHAYALASKA, a river in Russia, goes 9000 yds. circle of same name, r. bank Volga. It stands amidst fruit gardens, contains four or five churches, and parish schools, a charitable endowment, numerous manufactures, and has an extensive traffic on the river. Pop. 9200.

CHIEF-GROW or **TSICHUO** a tn (tns prov Nganhwa) on a branch of the Yangtze River 153 m SSW Nanking. It is a large and important city situated among hills, surrounded by a wall and containing many handsome buildings—one of them a seven-storied pagoda which forms a conspicuous object at a considerable distance. It had the misfortune however to fall into the hands of the rebels, who made it one of their strongly fortified positions.

The FOX or CNU, pur a harbour China, prov Siam, on the N side of the promontory of Shantung in the prof waters of Tsen-chow. This is one of several small orange boats which are used by the promontory of Siam, by native craft during adverse monsoon, who good shelter & food and the favorite resort of the British and French ships of war for recuperating the health of the men. It is also a place of call for steamers plying between Shanghai and Tsientsin. Its name has been adopted to designate the treaty port of Tsen-chow, named to signify trade by a triad of

port of 1840-1842 opened to foreign trade by a treaty of *Tientsin* (1858) although it is 30 m E of that city. From some time it has been found more convenient for shipping than the harbour of Tientsin, and the comparatively small town of *Yen-tai* on the river of the bay was taken as a station as the actual trading port. This arrangement emanated from the French who have normally considered the adjacent territory as held by them as a material guarantee for the payment of the indemnity from the *Chi-nese* government, due on the capture of *Peking*. (% *Tax* *chow* and *Yen* *tax* in *Szech*—*South China Herald*, 1892 *Notes*

CHILONEA is in U States Massachusetts. It is in the immediate vicinity of Boston and under the name of Wamsutter actually formed part of this city till 1788, when it received a separate charter of incorporation and assumed the name of Chelsea. Though thus legally discovered from Boston it is still to all intents one of its suburbs, being little more than a mile distant, and in communication with it by ferry and omnibus. P. 12, 400.

CHERALLA is a small prasad Madras, dist and about 35 m S. Guntur not far from the sea-coast is inhabited chiefly by weavers, who manufacture coloured handkerchiefs and cloths to such an extent that after supplying the local demand, they send large quantities to Madras and other parts of the empire.

CHERCHÉ [sədd.] a N. N. Africa, Algeria, prov. and 40 m. ESE Algiers, advantageously situated on the coast of the Mediterranean. It is the Zulma Casbah of the Moors, and is a jolly town, the chief business of its population being the export of wool from the mountains. It is in consequence become a large and populous city with a suburb of nearly 5 m. and many splendid structures. It was destroyed by the Vandals but rebuilt by the Greeks. By another vicissitude it became an asylum for the Moors expelled from Granada. In 1581 it was nearly laid in ashes by Andrew Doria, when

he destroyed the fleet of Barbarossa. Under the Romans the harbour was of great extent and provided with jetties and a basin but it had been nearly destroyed by an earthquake and had almost ceased to be used as a harbour when the French obtained possession of the country. Since then much has been done both for it and for the town which is assuming a handsome appearance, and contains among other new edifices, a church, an hospital and barracks. The trade chiefly in grain is important. Iron, copper and gypsum are found in the vicinity. Pop. 30,000.

CHESTER, a town in U. S. States, Pennsylvania, on the Delaware, and on the Philadelphia and Wilmington railway 15 m. S.W. Philadelphia. It possesses some interest as the oldest place in the state, having been founded in 1639 by Swedes who gave it the name of Upland. Pop. 16,667.

CHEYAIR, or **CHAY AIR**, a river India, presid. Madras which formed by the union of the *Panchees* and *Banboo* from the S. of dist. Cuddapah flows very circuitously first N. then E. then N.W. and joins the Pennar on its l. bank, 10 m. of direct distance above its mouth. Near Kundeloor the Cheyair expands, so as to have a breadth of 1200 yards.

CHIAMPINO, a town in Austria, Italy, prov. and 14 m. W. Vienna, where coal mines worked on the banks of the Chiusa. Pop. 3,219.

CHIAIAS and **BOCONUCO** forming by their union a single dep. Mexico are bounded N. by Tabasco, W. Vera Cruz and Oaxaca, S. the Pacific, and E. Guatemala and Yucatan. This united dep. lies between lat. 15° and 17° N. lon. 91° and 94° W. and has an area of about 45,000 sq. m. with four cities, seven market villages (*cabes*), 96 villages or hamlets (*parishes*) and 591 domestic or rural towns (*hijos de rancho*). The surface is intersected from E. to W. by three mountain chains, of which that in the centre may be considered as the prolongation of the Sierra. One of the loftiest summits is Huasteco. E. from San Cristoval which has an absolute height of 8500 ft. These ranges enclose valleys which, from their fertility and the excellence of their climate have been denominated the paradise of Mexico. The drainage of the dep. belongs partly to the Pacific and partly to the Atlantic but chiefly to the latter all its larger streams falling into the Gulf of Mexico. Among these are the Chiapas, which, rising in the mountains of Chiapas in Central America, traverses the dep. first in a W. and then in a N. direction and quits it to enter Tabasco where it takes the name of Tabasco or Grijalva, the Usumacinta which formed by streams from the mountains of Peten and Lake Punahebel divides into three branches which take different directions and the Tulija, which ultimately joins the Tabasco. The lakes are also numerous, but small. The vegetable kingdom comprises almost all the productions both of the temperate zone and the tropics. Among them may be mentioned maize, rice, wheat and barley (large of our dry-woods mahogany and other timber for cabinet-work, wine, tobacco, cotton, some of the best quality sugar, coffee from elastic or wild vanilla and macapilla. The animal kingdom is almost equally well supplied, and includes besides the ordinary domestic animals of Europe many singular denizens of the air, land and water. The mineral kingdom furnishes rock salt, soda, and sulphur, the precious metals occur only in too limited quantities to be of economical value, precious stones and valuable pebbles are not uncommon. The industry of Chiapas is still in its infancy, furnishing scarcely a single article worthy of notice and trade, though not unimportant, is unable to develop itself in consequence of the want of any adequate means of transport. The cap. of the dep. is San Cristoval. Pop. 160,088 of whom about one-half are Indians, and the rest whites and mestizos with a sprinkling of negroes.

CHICAGO (add.) a town in U. S. States Illinois, cap. co. Cook, on the S.W. shore of Lake Michigan, at the mouth

of Chicago River and on various lines of railway which in the aggregate, start 100 trains from it every day. It occupies a flat, which to the eye seems to be a level though it rises gradually from 3 to 24 ft. above the lake. As a security from inundation, the principal streets have been raised from 3 to 8 ft. above the original surface, and are in general spacious, and either paved or macadamised. The

STREET IN CHICAGO—FROM PHOTOGRAPH.

sudden rise of the place has made the public buildings more numerous than elegant. Among others are 70 churches and two Jewish synagogues, a large and magnificent building for an exchange and chamber of commerce erected in August, 1855, a medical college, a Methodist college and 311 law institutes, a mechanics union, a historical society, a high school, various grammar and numerous primary schools. The manufactures, though still imperfectly developed include steam-engines and other machinery, agricultural implements, stoves, brass and tin ware, carriages and waggon, soap, candles, and hard furniture, barrels and wooden ware, leather boots and shoes, bricks, beer, &c. The trade—chiefly in grain provisions, and lumber—has increased with amazing rapidity. Up to 1830 in which year it had but 70 merchant vessels, Chicago was merely a trading post and in its agency and the country W. and N.W. of it was all lost a wilderness. It was not for ten years after that it began to assume any commercial importance, it is a means of transport being extremely limited. The first wheat exported from the place was in 1838 and then only to the extent of 78 bushels. In 1847 the aggregate quantity of corn was 6,195 bushels. Of provisions, 3,000 barrels of pork were packed in 1843, and three years later 600 barrels of beef. The subsequent enormous increase in these branches of trade will appear from the following table—

QUANTITY OF WHEAT FLOUR, INDIAN CORN, AND OATS (in bushels), sent forward to FOREIGN MARKETS FROM CHICAGO, in each of the following years.

Year.	Wheat & Flour	Indian Corn	Oats.
	bushels.	bushels.	bushels.
1856	9,449,795	17,189,668	1,014,637
1857	11,144,506	6,614,013	608,784
1858	11,202,267	7,22,281	1,549,039
1859	10,246,823	4,810,860	1,184,707
1860	15,592,817	19,700,118	1,001,606
1861	22,954,568	31,472,36	1,083,23
1862	23,608,143	36,428,810	8,114,908
1863	15,598,823	24,096,584	8,000,175
1864-65	10,897,863	14,195,064	10,000,000

In 1864 of live-stock, 586,437 hogs and 323,446 cattle were sent off besides which there were packed 760,614 hogs and 93,450 cattle—the number of hogs, owing to the dull slowness of the harvest, being 464,000 less than were packed and shipped in the preceding year.

An idea of the number and capacity of the grain warehouses in Chicago may be gathered from the fact that, in 1861 they afforded room for the storage of 6,815,000 bushels. As a mart for lumber Chicago is one of the most important places in the world, if in that article as in grain it does not indeed stand first. The following figures show the receipts and shipments during the last few years—

Years.	Receipts.			Shipments.		
	Lumber.	Shingles.	Lath.	Lumber.	Shingles.	Lath.
1850	2,025,543 30"	105,977,000	48,182,000	2,021,135,308	95,536,638	47,879,125
1860	2,092,194 708	127,304 0-0	66,061,000	1,930,653,628	92,179 125	47,879 125
1861	2,419,208 708	179 554 000	72,937,000	1,807 279 444	94 4 1186	52,362,728
1862	2,655,674 616	151 225,000	53,830,000	189 7 379	51 61 609	16 807 000
1863	412 381 516	17 361 978	41 68,000	221 706 330	103 654 467	38 303 647
1864-65	361,204,696	100,108 70	65,958,500	340,406 379	125,48 326	39,303,010

The population which in 1839 was only 70 had risen to 4470 in 1840 and was estimated in 1861 at 180,000 with an annual increase of 70,000.

CHICHEBOULEY a tn. India, N. B. of a small protected Sikh state of same name 47 m N.W. Saharunpore on the route from this town to Subathoo. It stands in an open level and well-cultivated country, is surrounded by a mud-wall, and possesses a well supplied bazaar.—The state is an area of 63 sq. m. and a pop. of 3367.

CHICKAMAUGA a river of Ga. rises in the N. E. part of Virginia runs in a northerly course and falls into York R. or about 8 m above Jamestown, furnishing extensive water power in its course. It was the scene of many of the military operations of the civil war and is especially memorable for the battle or battles bearing its name, which occurred on May 31 and June 1 1862 between the Federal and Confederate armies, and which with the subsequent series of engagements, forced the Federal under General M. C. Lee to withdraw from their attempt to reach Richmond and to abandon the campaign.

CHICKAMAUGA a creek or small stream, L. Malabar rises in Walker co. Georgia and flows N.E., enters the Tennessee near Chattanooga. It has been made famous by being the scene of a prolonged and fiercely contested battle between the Federal and Confederate armies, on Sept. 19 and 20 1863 which resulted in the line of the Federals being broken, and their consequent retreat to Chattanooga.

CHICOUTIMI a river Canada E. which rises in an elevated district, not far from the N. frontiers of co. Montserrat flows directly N. E. and joins r. bank, Saguenay of which it is the largest tributary at the town or trading post of Chicoutimi. Though sufficiently wide and deep for navigation an insuperable barrier is interposed at a short distance above the point of confluence, by a series of rapids, through which the water rushes in a narrow rugged and rocky channel with a descent which amounts to the aggregate to nearly 50 ft. In its course the Chicoutimi expands into a long and narrow lake, called Kiguagoum.

CHICOUTIMI a tn. Canada E. cap. co. of same name, r. bank Saguenay about 75 m above its mouth, and 160 m N. by E. of Quebec. It has a R. Catholic chapel and several schools and whips large quantities of timber. In a. about 1000 **CHICOWA** a dist. S. Africa, in the Natal country on the R. or r. bank of the Zambesi. It has attracted some attention in consequence of a tradition that native mines were once worked in it. If it was so the natives have lost all knowledge of it, and there is nothing in the strata to indicate the presence of any precious metal. Dr. Livingstone, however found a thin seam of coal or lignite underlying strata which contained in descending series of coarse sandstone sandstone flag and slate. But the strata are so much intersected and tilted up by dykes of basalt as to make the working of the coal all but impossible.

CHIDEN is a town in America, Bolivia, on the border of the Orizaba, with a parish church, a castle, a townhouse, two breweries, vinegar works manufacturers of sherry, a paper and two other mills. Pop. 1200.

CHIPPOWA a tn. W. Africa. Bornos, dist. Gammal 75 m. N. E. Kano. It is a considerable place, surrounded by a low earthen wall.

CHILAW a tn. on the W. coast of Ceylon near the mouth of the Dodderoo-oya, 43 m N. by W. Colombo. Its proximity to the pearl fishery gave it an interest which it did not otherwise possess and made it repeatedly the object of a keen contest. The Tamils wrested it from the Singalese in the 14th century and it afterwards passed successively to the Moors, the Portuguese, and the Dutch. From the last it was taken by the British in 1790. In the forest to the E. of Chilaw within a radius of 20 or 30 m. are contained the ruins of a number of ancient cities. The road leading from Chilaw southward to Negombo passes through almost continuous rice plantations.

(HILL) [add] The construction of railways is given a great impetus to the production of several parts of the country. A new line, connecting the mining districts of Copalco and the adjacent country with the new port of Caldera in the province of Atacama; another 40 m in length connecting Copalco and Berena with Las Cardas and the mines in the interior with an extension of 19 m to Pannellillo and another proposed to be constructed from the port Paltahano to Chilian a distance of 104 m running past Concepcion and the N. side of the river Rio Bio he has opened and promises to open most important fields of mining and commercial enterprise. The total length of railway open in 1863 was about 188 m, viz from Valparaiso to Santiago, 115 m. Santiago to San Fernando, 83 m. Caldera to Paltahano 74 m. Paltahano to Chacabuco 26 m. and from Copalco to Las Cardas, 40 m. The total cost of these lines was £427 215 and the receipts for passengers £193 015 and for goods traffic £222 271.

Copper mines are worked in the cordillera of San Carl N. of Chilian, by a British subject, and coal mining is carried on very successfully at the ports of Lota and Coronel at which also the smelting of copper is done on a considerable scale. In a coal mine at Lota, the property of a Chilian are worked by English miners. The foreign trade of the country has expanded greatly within the last twenty years for whereas the imports from Great Britain in 1841 are stated to have been only £39 410 and the exports to it £21 640 in 1863 the imports had risen to £1 474 040 and the exports to £2 288,382 the latter in 1864 advancing further to £3 088 001. In the year 1862 the total value of the exports from Chilian was £25 253 850 and of the imports into it £3 095 064. The value of some of the principal articles exported were as follows—Copper £2,045 173 copper ore, £459 174 silver £236 172 81 or ore, £295 230 wheat, £249 738 and flour £183,799. Among the chief imports were cotton goods £280 771 other manufactured goods (silk, linen wool &c.) £2 096,161 and sugar £426,516.

The number of vessels and their tonnage entered and cleared at the ports of Chilian in the same year 1862 are shown thus—

Ports.	Imports.		Exports.	
	No.	Ton.	No.	Ton.
Valparaiso	1006	841 574	1500	357 166
Copalco	363	171 008	527	114 160
Buenos	122	62 056	181	40 498
Caldera	299	143,653	495	144 128
Concepcion	198	20 625	185	38,995
Paltahano (Concep- cion)	190	74,513	183	3,191
Yumb	257	101,477	268	102,665
Valdivia	73	23,278	74	34,325
Arauco	158	79 435	158	90,078
Total	5880	985 503	2782	971,560

Chili possessed in 1862 268 merchant vessels, of 59 789 tons. The total revenue in 1860 amounted to £1 498,950 of which £264 960 was derived from customs, and £215,222 from government monopolies; the total expenditure was £1,501,406. The public debt was, in 1861 £3,050,330, £1,041,800 of it being due upon foreign loans, and £1,540 800 for loans for railways in 1866.

The population at the end of 1862 numbered 887,049 males and 599,194 females; total, 1,576,243. And in that

year there were 499 government schools, 80 municipal 19 monastic and 333 private scholars 933 schools with an aggregate number of 35 976 scholars.

CHILICOTHE [add.] a tn U States, Ohio, esp co. Ross, 65 m. E Cincinnati with which it is connected by railway and upon the Ohio canal and the Scioto, which winds picturesque through a valley enclosed by cultivated hills rising to the height of 500 ft. It is regularly built, with wide streets lighted with gas, and containing many good buildings. The valley is one of the finest farming districts in the State, and its proximity to the railway river and canal gives it ready access to the coal and iron mines of southern Ohio and consequently great advantages as a manufacturing place. It was founded in 1795 and in 1800 became the seat of the state government which was subsequently removed to Lancaster. The old stone state-house is now the court-house. Pop. (1860) 7828.

CHILKEPA a tn India, N W Provinces dist. Moradabad about 140 m. E N E Delhi at the height of 1076 ft. above the sea lat 29° 21' N lon 78° 10' E. It stands in the gorge or pass of Dikhal, down which the Koda rushes toward the plain, and consists of a wretched assemblage of cottages half buried in high grass. In summer the air is so pestiferous that the inhabitants abandon it but in spring it becomes a busy mart for the trade between Chinese Tartary and Kunming on the N and the low lands on the S.

CHIL LAN a tn *Chih* esp prov. Nubia, in an angle between the Chilian and Nubia, 160 m. S by W Bentago. It consists of an ancient and a modern portion, the former built by the Spanish conquerors, who found it a place of some strength in which the early settlers often found an asylum when hard pressed by the Araucanians. Pop. 10 282. On the E limits of the province, whose fertile soil produces much grain and wine and rears numerous herds of cattle in the great volcano of Chilian.

CHILLATANA a tn India, N W Provinces, dist. and 25 m. N W Banda r bank Janna over which there is here a ferry. Though a small place it has a considerable trade, particularly in cotton which is here shipped in large quantities for the lower provinces.

CHIMARA a tn Turkey in Europe, S Albania, eyalet and 61 m. N W Yennise, on the Adriatic. It is the chief place of the Chimarots and contains about 2000 inhabitants, who live partly by trade, and partly it is said by plunder.

CHINANDEGA a tn Central America, Nicaragua, dep. Orondental on a fertile plain terminated by the mountain slopes of El Viejo, 15 m. N W Leon. It is a well built flourishing place, with paved streets, which cross each other at right angles, and a handsome square, in which the principal church stands. The other churches, four in number are built of adobe plastered and whitewashed. Some of them are surmounted with the peculiar rounded dome of Moorish architecture. There is nothing in their exterior entitled to notice and their interior deprived by successive revolutions of all costly decorations, no longer possesses any object of interest. Chinandega is famous for its white pine-apples and oranges. Pop. about 15 000.

CHINCHA or GUANO ISLANDS [add.] a group of three islands off the coast of Peru, about 100 m. E of Lima lat 13° 44' S lon 78° 19' W celebrated for deposits of guano which are so extensive and so much in demand as a manure that the government of Peru derives a larger revenue from the sale of it than from all other sources. The group consists principally of three rocky islets, which lie about 12 m. from the coast, and are composed of a beautiful bright red granite, of which the components are darkish flesh-red feldspar white quartz, and a little mica. These granites form tolerably steep walls which rise abruptly from the water to the height of 25 to 30 ft. and form a gradual ascent towards where they at length assume a rounded form. The surface, totally devoid of vegetation is covered with the dung of sea lions (seals) or guano, to a depth which on the principal island, exceeds 100 ft. In consequence of this valuable deposit, the islands, which would otherwise be uninhabited and totally uninhabited, present a very busy scene a number of ships loading or unloading to be loaded by the labourers employed for that purpose who are composed of convicts from the mainland Chinese apprentices, and free labourers. In this way a kind of temporary settlement has been formed, and

numerous tents or booths are either occupied in dwelling-houses or furnished as shops. The houses of these people are almost all made of totora, i.e. bulrush matting, stretched on bamboo supports and in this dry climate afford sufficient covering. The quantity of guano annually exported exceeds 65 000 tons. The deposit of guano is sometimes represented as so great as to be almost inexhaustible but this estimate must be too sanguine a one it appears that already a good half of what the largest island originally contained has been carried off.

CHINCHIFF a river S America, formed by two streams which rise in the S.W. of Ecuador the one, the Loya, from the cordillera of Zamora and the other the Savanilla from the mountain mass of this name, flows S E. and enters the Marañon after a course of about 90 m. Gold is washed from its sands. Owing to the hostility of the Iwaros Indians inhabiting its banks it remains in a great measure unexplored.

CHINDWARA a tn India, N W Provinces, dist. Meerut and 187 m. N Nagpore on an elevated table land 2100 ft. above the sea, in the mountains called Deogarh above the Ghauts. Its climate in one of the most agreeable and salubrious in India and it has hence many visitors in search of health or recreation. It was at one time a station for a detachment of the Nagpore auxiliary contingent which ceased to exist in 1850 there are still a bazaar and some straggling bungalows.

CHINESE EMPIRE [add.] Since the opening of this vast empire to foreign intercourse in 1859 by the Elgin treaty of Tientsin much valuable information has been obtained by European residents at Tientsin regarding its geography of the country the polity of the government and people, and the nature of the institutions in addition to what was previously known or erroneously entertained. As regards that province of the empire between Pechiles and the Corea named Shingking or Tsau tung formerly a Tartar province and classed under the head of dependencies in all maps and gazetteers there is now sufficient reason for concluding that it is geographically and politically an integral part of China proper. According to the above-mentioned treaty of Tientsin which was opened to foreign commerce on the same terms as those relating to all the ports in the empire provinces privileged to trade with western nations and reports from the British consular resident at Yung-tse state that it is a mode of government, class of officials and the bulk of the inhabitants are as such Chinese as in the chief provinces. I have facts far to prove that it is Manchho Tartar element, which invaded China 270 years ago has not only become absorbed into the multitudinous race they have conquered but that this extraordinary people from their natural fecundity agricultural industry and commercial enterprise is slowly but surely exterminating the tribes of Manchhooria.

Another and a more important change has taken place in the map of this empire among the Tartar dependencies which has severed a large and fertile region from the sway of the emperor of China and transferred it to the czar of Russia. This country is now known as the Amoor territory from including within its bounds the river of that name for a course of 1200 m. but is equally distinguished by having a seaboard in the Gulf of Tartary and Sea of Japan, measuring not less than 700 m. While tributary to China this territory was called Keching and bordered on the Russian province Yakutsk, bounded by the Yakutsk-Khabt chain of mountains. The new boundary line extends to the left bank of the Amoor or Bagallen River along its upper part and diverges southwards up the Usuri River a tributary to Yachia River including a territory with an approximate area of 320 000 sq. m. nearly seven times the extent of Siam and about three times the area of Great Britain. This land was ceded to Russia in 1858 at the same time that the British and French also negotiated the treaty of Tientsin but the Russians, while they benefited by that convention obtained it as magnificent concession by a separate treaty.

CHINA PROPER [add.]

Physical features—Several expeditions have been undertaken into the interior of China by British officers and merchants, under the auspices of the treaties, which provide that no let or hindrance be given to travellers the subjects

of treaty powers, peacefully journeying through the country and much additional information has been thus obtained. Of these expeditions the most extensive and interesting was one formed to cross E to W up the Yang-tze River passing through Tibet into India. Circumstances prevented the latter project being successful but the party ascended a distance of 1800 m by the river and Captain Blakiston has left an able record of its geographical, geological, and botanical features, as represented on the banks of that great stream. It is evident that its upper waters pass through a rich mineral region, where gold, silver and other metals, together with coal and every species of building stone, occur in abundance. Similar data has been afforded by an expedition which crossed from Canton, through the mountain pass that divides the southern from the inner shed of waters down which they travelled until they can go to Hankow where the Lower Yang-tze begins, 600 m. above Shanghai. Further north other parties have travelled through the land parts of Shanling, Fochow, and Shingking to Mookden and the coal measures of Su mia. E. everywhere these travellers observed that the mineral wealth of the country was quite undeveloped, and that there was sufficient evidence to conclude that China has resources of this kind equal in extent to those of Europe. With the introduction of machinery and scientific appliances under the superintendence of skilled foreigners, these riches may be developed. Already this importation of foreign coal is being superseded by the native article and this is no longer a staple import.

Agreeable.—In like manner the opening of China to foreign interests has given a new impetus to the cultivation of an exportable product. Amongst these cotton now appears as a considerable item on the export list whereas formerly it figured as an import. This no doubt has been caused by the high prices obtained in Europe through the dearth caused by the American war. Articles of increased production exist and it is also able that the farmers are beginning, to use the better seed, so as to grow qualities most suitable to foreign buyers and to adopt a better system of cultivation. European machinery and other agricultural implements are in request and there is every probability that ere long the northern provinces, in which the cotton is chiefly grown, will cease to import cotton cloth.

Treaty and Commerce.—By the treaty of Nanking (1842) Canton, Amoy, Foochow, Ningpo, and Shas shan were opened to foreign trade and Hongkong was ceded to Great Britain. The clauses of that treaty were far from satisfactory as in a great measure gave rise to subsequent misunderstandings with the local authorities, which led to two costly wars against the Chinese government, by the English and French allied in the south and north provinces of the empire from the capture and occupation of Canton in December 1855, to the triumphant entry into Peking October 1860. The result of these necessary hostilities was the ratification of a treaty signed at Tientsin June 26 1859 placing the commerce of the United Kingdom with China on a most satisfactory basis which was equally shared by France, Russia, Prussia, Portugal and the United States and in addition to the five ports previously open, permission was granted to the subjects of England and France to trade at Yenching (Yungling), Tungchow (Chefoo), Tsai-tan Formosa, Chanchow (Swatow), Kiamchow (Hankow) and the river Yangtze was opened to foreign navigation with power to traffic at the ports of Ching King, Kiang, and Han keu. A convention was also entered into at Peking on the exchange of ratifications October 24 1860 by which the port of Tientsin was opened to trade, and the Cowloon shore on the mainland, opposite the island of Hongkong ceded to Britain. Further a supplementary convention added the port of Tamsui in Formosa, as an open port. The effect of the treaty upon the increase of foreign trade and shipping is exemplified in the commercial annals of the East. To give the details of that trade with a very waters name would occupy more space than is at our disposal. However the following analysis of the portion of it which belongs to Great Britain will suffice to show its rapid development, especially in the staple product tea.—The total export of that commodity in each season which commences in June and ends in May according to the foreign customs returns published every six months, was as under:—

Year.	Ton.
1854-55	95,179
1855-56	90,467
1856-57	90,062
1857-58	100,244
1858-59	111,578
1859-60	119,017
1860-61	121,266

It must be remarked, however that the immense increase during the three last named seasons was caused by the fact for the American market being largely shipped in English vessels, and a part of them also was transhipped to Russia in consequence of the reduction of the duty on tea at the ports of that country.

The export of raw silk during the same period does not show similar results, as the production of that article was checked by the Taiping occupation of the silk-growing districts now happily relieved from the depressing presence of the rebels.

Year.	Ton.
1854-55	18,136
1855-56	14,163
1856-57	15,964
1857-58	20,264
1858-59	24,168
1859-60	32,517

A new export has arisen in consequence of the war in America, by the remunerative price of cotton. In the year 1853 the exports to Britain were 30,856,586 lbs. and in 1861 55,157,008 lbs.

The import trade in British manufactures is far from being equivalent to the value of the produce exported the balance of trade being maintained by shipments of specie from England and opium from India. Among the important changes effected by the treaty of Tientsin is that of legalising the trade in opium hitherto carried on as a contraband traffic, although while it by Chinese officials which rendered it demoralizing alike to natives and foreign traders. Not only has this measure augmented considerably the customs revenue by a duty of £10 a very chest weighing 133 lbs. but its legitimate sale and consumption has lessened the evil produced by its excessive and unwholesome use. All the shops where it is smoked are licensed, and under the supervision of the police. Those who have recently visited these establishments in the chief cities and open ports have failed to observe the prevalence of the horrible excesses resulting from the use of the drug which travellers depicted formerly. The value of this commodity imported from India, was as follows:—

Year.	Value.
1850	£10,000,451
1860	8,706,121
1861	9,425,267

The following figures show the total value of the exports and imports passing between Great Britain and China in the four years stated:—

Year.	Total Exports.	Total Imports.
1850	£29,070,445	£29,215,690
54	1,127,000	8,445,777
1860	15,145,110	6,444,778
1864	15,073,300	

Including the import of opium from India and a few other articles as part of British commerce with China, and also the specie shipments to pay for tea and silk our trade with that empire in exports and imports, during 1863 was over £30,000,000 sterling. As the details of the whole external trade are given under each open port, it will suffice to state here that the commerce with other nations, carried on under foreign flags, far exceeds that with British and her Indian possessions, so that the total value of the foreign trade in 1863 is estimated at £104,348,804 against £29,208,378 in 1847. The total amount of duty paid on foreign vessels and cargoes at the treaty-ports in the same year 1863 reached the sum of £2,802,995.

History.—In 1850 an insurrection broke out in the provinces adjoining Canton, with the object of expelling the Tartar dynasty from the throne. For a long period the insurgents succeeded in maintaining their ground against the imperial forces, and it was not till after the lapse of several years that the latter were enabled in some degree to quell the rebellion. The intolerance of the Chinese towards the British and other foreigners had long been the subject of complaint, and, in 1856, a manifestation of this arrogant spirit led to a second war with Great Britain. In October of this year a small vessel or ketch, carrying British colours, while at

anchor at Canton was boarded by a Chinese officer and party of soldiers and twelve of the crew were carried off. All reparation or apology for this outrage being refused Admiral Sir Michael Seymour, commander of the British fleet for the China station found himself under the necessity of proceeding to active hostilities which led to the destruction of the Chinese fleet at Fushien in the Canton River in June 1857 and the capture of Canton itself after a brief siege, in December of the same year. The Chinese government now made overtures of accommodation and a treaty was concluded by Lord Elgin on behalf of the British government with the Imperial commissioners at Tientsin, on 26th June, 1858. The terms obtained were sufficiently satisfactory but were rendered futile by the treacherous attack shortly afterwards on the British and French ambassadors at the Taku forts, while on their way to Peking to obtain a ratification of the treaty. A renewal of hostilities was thus necessitated, an allied army of British and French troops marched upon the capital, which after a fresh instance of treachery on the part of the Chinese with respect to Messrs. Loch and Parkes and the barbarous murder of Captain Anderson and others was entered in triumph by the attacking force. On 24th October 1860 a fresh treaty was concluded by Lord Elgin, in which the conditions already stipulated in the treaty of Tientsin were repeated with additional clauses and satisfaction was exacted from the Chinese, in the shape of a large sum of money to be paid by them towards the expenses of the war and as compensation to the survivors and surviving relatives of those who had been the victims of the treachery above referred to. Between the signing of the first treaty of Tientsin and the ratification at Peking, it will be seen that an interval of two years and five months elapsed. During that period this ancient empire suffered so much from foreign and internecine war that it was apparently in the throes of dismemberment if not dissolution. In her central marine and maritime provinces the Taiping rebellion was at its height and the leaders of that movement were for the time de facto rulers of a country containing upwards of 6,000,000 inhabitants. In the south Cent in was in the military occupation of the British and French forces while in the north the victorious allied army had captured Peking and reduced to a smoldering palace at Yuen ming yuan to ruins. The financial resources of the empire were at a low ebb, and the government had to comply with the fresh demands of their conquerors, and pay an indemnity of £4,000,000 besides an unsettled demand of £2,000,000 more. To pay this indemnity without time given was quite out of the power of the imperial treasury and to effect immediate payment would have been a harm and an insult on the part of the allies. Accordingly it was arranged that the customs at the treaty ports should be placed under the control of foreign collectors and the first charge upon the revenues be instalments of the indemnity money. No measure could have been better calculated than this to develop the foreign commerce of these ports and purge the corrupt system of the native customs. I venture, with all these seemingly amiable concessions to foreigners, the party who wanted the reins of government were determined to renew warlike operations against them when another opportunity offered. Meanwhile the emperor Hsin fong who had fled in his palace of Zabol in the fastnesses of the Fatahian Alps died and the warlike party assumed the regency of his youthful son who succeeded to the throne excluding from their counsels Prince Kung and others favorable to foreign policy. The latter party resolving to gain the ascendancy secretly conspired together and the leaders of the opposite faction and executed them, declaring a new reign of Tung-chai signifying one of law and order. These events happened about the close of 1861 since which the most satisfactory relations have existed between the ministers of the treaty powers resident at Peking. Not only has the *status quo ante bellum* been unbroken but the British and French forces have added materially in suppressing the Taiping rebellion. Under the instruction of the military upwards of 20,000 Chinese have been drilled and armed after the European manner and have conducted themselves with prowess in the field. Further efforts were made to form an Anglo-Chinese navy for the suppression of piracy on the coast, and to aid in crushing the rebellion. The project was so matured that the fleet arrived in China from England, but from some

more for Gak.—Vol. I.

misunderstanding about the control of this formidable power it was abandoned and the fleet paid off. Nevertheless, the navy which has dawned upon this exclusive nation promises to be one of great fulfilment in the cause of universal humanity, religion, politics, and commerce.

Population.—Since the official census of 1812 which gave the population of the 18 provinces at 361,693,879 no other as far as can be ascertained has been published by the Chinese government. It is known that a census was taken in 1842 but the particulars in it as yet been made public. In the absence of statistical returns various computations have appeared from time to time. Of these, the latest and in every respect the nearest to an official census, is that furnished by M. Backeroff in the works of the Imperial Russian Embassy at Peking. This computation is for the year 1842 giving a total of 414,086,984 including the population of Shing king and dividing the provinces as follows:—

Provincias	26,379,825
Sh. u-tang	29,529,8
Shen sui	17,665,926
Shan sui	10,869,789
Ho nan	22,005,771
Kiang-su	20,645,941
Kiang sui	20,115,040
Ning-shi	20,890,562
Fen kuo	20,799,756
Chi-kiang	20,457,474
Hoo pui	20,364,506
Hoo sui	20,648,903
Kan-su	20,776
Shan sui	20,464,044
Quang tsi	1,152,008
Quang sui	1,121,527
Y	8,633,773
Ki chow	6,113
Shing king	1,066,842

Total, 414,086,984

—(North China Herald Customs Returns MS Notes)

CHING KIANG [add a city (has the first importance on ascending the great Yangtze Ki or 1604 naut miles from Shanghai). From its position at the junction of the Imperial canal with that stream which was the designation of Guard of the River it was included in the treaty of Tientsin (1858) as one of the open ports. At ancient times it was the chief, apurium of trade to the Lower Yangtze, and continued as such up to 1842 when it was captured by the British. But, altogether, restored the same year it failed to recover its former prosperity; and circumstances since then have doomed it to a miserable notwithstanding its eligibility for military as well as commercial purposes. In 1835 the Taipings captured it and continued in occupation for four years. During that period it is estimated population were robbed and ruined by their ruthless conquerors within and their habitations destroyed by the Imperialists from without, after long bombardment recaptured it in 1837 but it is only a mass of ruins. In addition to these desolating effects the chances of its recovering traffic from the north were stopped by the filling up of the Imperial canal near Whanggen so that communication with the country south of Tientsin ceased. In 1869 after the restoration of the treaty several merchants from Shanghai established branches of their houses at this port, but as it was not safe to remain on shore, their agents lived on board hulks and ships laden with merchant lace. Here a small precarious trade has been carried on under the surveillance of foreign customs officers forming one third of the small community of 25 residents. For three years the British vice-consul of the port fixed his residence on Silver Island a picturesque rock in the middle of the river a few miles below the city where the stream is greatly narrowed, and runs with a velocity dangerous to small vessels and boats. As all British ships bound for the river were obliged to obtain a pass from the consul many accidents happened from this cause so that the consul was removed in 1863 up to the consession adjacent to the ruined city. The Taipings rebels have been completely driven away in 1864 confidence is slowly returning to the few inhabitants who have survived the rebellion, and the foreign residents are gradually moving on shore where they are building stores for the reception of their goods. In 1865 the imports were of the value of £1,829,609 and the exports £280,278. The Imperialists are slowly restoring

23

carry a large body of water at least in the dry season, though it has been known by its junction to raise the level of the James T or S R. to 12 hours. The height of its source above the sea is 2019 ft., and the facility of its bed averages 1 1/2 ft. per mile. It does not seem to be at all useful for navigation.

CHUNDLAH is a village, Benares, at the foot of a granite rock, described as jet black, about 77 m. S Calcutta. It is a thriving place of about 2000 inhabitants, but the heat radiated from the rock is said to be almost intolerable.

CHUNDWEE, a village, N W Province, dist. Moradabad, 45 m. W Bareilly on the route from it to Delhi. It is a considerable place, surrounded by a low mud wall, and possesses a well-supplied bazaar. Pop. 10,000.

CHUNGANAUCHERY is a village, south Madras dist., Travancore, 86 m. N. Calicut. It is built on a rising ground on the E. border of a large delta, known by the name of Kootanad, and being well situated for trade in both pepper and flourishing. The inhabitants are composed of a mixture of Syrian Christians, Brahmins, Nairs, &c. each having their own streets and places of worship. The fair held twice a week is so well attended, that the canal is often blocked up with the masses and hosts of crowds coming from the west.

CHUPAT a river, S. America, which rising not far from the frontiers of Chile flows E. across Patagonia, and falls into the Atlantic near half way between Port San Antonio and the Gulf of St. George. Nothing is known of the upper part of its course, but in the lower part it flows in a very winding course through a fertile country along banks which are well wooded with trees near a species of willow. On the bar at ebb there is scarcely a foot of water but at flow there are from 7 to 12 ft., according to the state of the tide.

CHUPMATH (old) a village, Bengal dist. Baran, on a channel of the Ganges, 25 m. W. Dinapore. It occupies a low wide island only a few feet above the level of the river along which it extends nearly a mile. Many of the houses belonging to the wealthy traders are large and handsome, but a far larger number are mud huts. It contains also several British factories. There is only one street along which wheeled vehicles can pass the others are so narrow as to be unfit for the conveyance even of palanquins or litters. The civil station situated outside the town and N. of it, is said to be substantial. Pop. 90,000.

CHUTTERPORE, or **CHAYANPORE** (old) a village, Benares, dist. Moradabad, 146 m. W. W. Allahabad. It occupies a picturesque site among lofty hills to the west of a large and deep pool or lake, and consists for the most part of narrow streets and very indifferent houses, though a few of the latter belonging to the more wealthy inhabitants, are not only spacious, but costly and elaborate in their style of architecture. The principal objects of interest are a large and handsome school, recently built by the rajah for the accommodation of travellers; and the ruined palace and mosque of Chatterjee who founded the short-lived independence of Benares, and given the place its name. The mosque is a large, massive, and elaborate structure, surrounded by five domes. Chutterpore has manufactures of paper and of coarse cotton. The latter is made from an iron ore obtained from mines in the vicinity. The transit trade once considerable, is now very limited.

—The **TRANSPORE** has an area of 1240 sq. m. contains 120,000 inhabitants, and yields a revenue of £20,000.

CHYNEPORE, or **CHAYANPORE**, a village, Benares, dist. Moradabad, 146 m. W. W. Allahabad. It occupies a picturesque site among lofty hills to the west of a large and deep pool or lake, and consists for the most part of narrow streets and very indifferent houses, though a few of the latter belonging to the more wealthy inhabitants, are not only spacious, but costly and elaborate in their style of architecture. The principal objects of interest are a large and handsome school, recently built by the rajah for the accommodation of travellers; and the ruined palace and mosque of Chatterjee who founded the short-lived independence of Benares, and given the place its name. The mosque is a large, massive, and elaborate structure, surrounded by five domes. Chutterpore has manufactures of paper and of coarse cotton. The latter is made from an iron ore obtained from mines in the vicinity. The transit trade once considerable, is now very limited.

CICACOLE (old) a village, Benares, dist. Moradabad, 146 m. W. W. Allahabad. It occupies a picturesque site among lofty hills to the west of a large and deep pool or lake, and consists for the most part of narrow streets and very indifferent houses, though a few of the latter belonging to the more wealthy inhabitants, are not only spacious, but costly and elaborate in their style of architecture. The principal objects of interest are a large and handsome school, recently built by the rajah for the accommodation of travellers; and the ruined palace and mosque of Chatterjee who founded the short-lived independence of Benares, and given the place its name. The mosque is a large, massive, and elaborate structure, surrounded by five domes. Chutterpore has manufactures of paper and of coarse cotton. The latter is made from an iron ore obtained from mines in the vicinity. The transit trade once considerable, is now very limited.

Desgal. The fort, which is so completely dismantled that the walls and the ditch cannot easily be traced, is situated to the N. and contains the casemate, the treasury, the post-office, the commandant's house, the barracks, hospital, and magazine stores. The regimental lines are about 150 yards S.E. of the fort. At a corner of the parade-ground stands a small little church; and near the river about 1/2 m. from the casemate, the court-house and jail. The civil hospital and dispensary is accommodated in what was formerly one of the best private residences in the place; the military hospital is in the same locality. The London Missionary Society has a school within the town where English is taught, and there are also several native schools. Pop. 12,500, of whom about 140 are native Christians.

CIEMERZYNOCK, a village, Austrian empire, Galicia, diocese and 9 m. N. W. Brzezany, was in very remote times the scene of a great battle between the Slaves and the Poles. Pop. 1500.

CINALOA, or **SHALOA** (old), a village, Mexico, dep. Oaxaca, on the bank of a river of same name, about 40 m. above its mouth in the Gulf of California. It stands on hilly ground and was once a flourishing town of 5000 inhabitants, with a fine cathedral which possessed among its riches an altar-piece of solid silver. The cathedral and its wealth have entirely disappeared and another large church which stood in the public square has nothing left but the tower the nave and choir having been swept away by a tremendous flood from the mountains. The whole place now looks desolate and can scarcely muster 8000 inhabitants.

CINCINNATI (old), a village, U. S. State of Ohio, on the Ohio, and at the focus of nine lines of railway: lat. 39° 5' N. lon. 84° 22' W. Its site is a natural plateau about 18 m. in extent, divided by the river into two nearly equal parts and surrounded by hills about 500 ft. high and grouped so as to form a beautiful amphitheatre. It was first laid out in 1788, and up to 1800 was a small straggling village in the midst of a wilderness. Shortly afterwards it began to expand, schools, churches, banks, and factories sprung up, and with its accompanying warehouses, occupied the lower part of the plain and the inhabitants who had settled there were obliged to retire, and either gradually climbed the hill sides, or all the little valleys on the E. and W. From the manner in which the town has been formed great regularity of plan was imposed, and many changes and improvements will be necessary in order to make Cincinnati the metropolis by which it is doubtless destined to become. Still however the work of improvement goes rapidly forward and every year while it adds greatly to the population sees new structures rising in every quarter. Churches to the number of 100, several of them elegant and imposing structures, have already been built, while provision has been made for education by a system both of elementary and superior schools. Among the latter are two male and three female colleges, schools for theology, medicine, and law several commercial academies, two high schools and numerous seminaries, male and female. Libraries also are numerous and extensive, one belonging to the Mercantile Library Association having 30,000 vols., another belonging to the public schools 12,000, and a third belonging to the Lane Seminary 10,000. As yet the buildings properly called public have hardly received the attention due to them, and mention can be made only of a city-hall, Manufactures and trade, which is in a great measure founded upon them, are both very important. The most conspicuous among these establishments are iron-works, pork-packing factories, and distilleries. The average annual production of the iron manufactures in all its branches are estimated at \$1,500,000. The quantity of work done by the distilleries may be estimated from the fact that 500,000 barrels of whisky were sold in Cincinnati in one year and that the aggregate sale of all kinds of liquor amounted to \$1,500,000. Next in importance to these three great staples are furniture and clothing. The total arrivals of steamers at the port in 1853-4 (ending Sept. 1) were 2708, against 2708 the previous year and the number of steamers and barges plying between Cincinnati and other ports during the year was 400, against 349 in the year before. The tonnage of the Imports was 11,185, and of the exports 51,600, making together 62,785 tons, against 71,735 tons in the previous year. There were built during the same twelve months 32 steamers and barges

of a burden of 20 117 tons. The river commerce for the period in question was larger than in any former year.

The unusually high price of nearly all commodities owing to the civil war and the inflation of the paper currency, gives an enormous increase in the value of the imports and exports, as is seen in these figures—

	Imports	Exports
1890-1	\$18,717,978	\$25,993,181
1891-2	\$1,312,582	\$1,357,084
1892-3	\$1,089,410	\$1,323,744
1893-4	\$1,304,851	\$6,808,206

Among the principal imports in the year 1893-4 were barley 878,455 bush, corn 1,817,945 bush, flour 541,698 barrels, oats 1,483,513 bush, wheat, 1,660,159 bush, lumber 69,000,900 ft. cord 35,000,000 bush, pork and bacon, 20,169,059 lbs, coffee 124,753 sacks and butter 52,889 tubs. The number of bags packed was in 1893, 606,457 and in 1894 (8 months) 870,633. The exports comprised—candles, 217,413 boxes, coffee, 107,783 sacks, cattle, 14,908 head, flour 893,268 barrels, hides, 169,424, lard 95,864 barrels, and logs all 63,740 barrels, pork and bacon, 227,856 barrels & and 1,810,875 lbs, oats 861,897 bushels, wheat, 948,737 bush, whisky 218,410 barrels, and tobacco 109,584 kists, &c. Pop. (1890) 161,941.

CROBASSIA [add.] The protracted resistance maintained by the gallant Croatians against Russian aggression, has at length terminated in the triumph of the more powerful of the two foes, and the Croatians having surrendered to Russia, have been removed to the Turkish provinces where they are endeavouring to form a colony under the protection and with the assistance of Turkey (1864).

CIFFADPILA, a to Austrian Italy prov and 17 m by W Padua. It is inclosed by a wet ditch and walls *banked with towers in the east of a court of justice, and has a fine high church with an altar-piece by Bassano an hospital, a theatre manufactures of cotton and linen cloth and numerous silk mills. Pop. 7218.

CITY POINT [add.] a vil and port U States, Virginia, on the James River at the mouth of the Appomattox 25 m. S E Richmond and 10 m. E N E Petersburg with which it is connected by railway. It has good landing and is accessible by large vessels. It derived great importance during the protracted siege of Petersburg and Richmond in the civil war from being made the base of supplies for the Federal armies.

CLARENCE ISLAND [add.] S America, situated toward W outlet of the Strait of Magellan is separated from Chilil on the N by Froward Reach from Dawson Island on the E by Magdalen Sound, from Santa Ines Island on the W by Barbara Channel and from Terra del Fuego on the E by Cockburn Channel lat 54 S. lon. 72 W; length, N W to S W 65 m. breadth about 25 m. Its coast is generally bold and its surface mountains. On the E shore there is a steep mountain called Vernal or Summer-House. From a remarkable lump of rock on its summit, and at its foot a little port called Hope Harbour much frequented by the Indians. Southwards Mount Bon Queros rises precipitously to the height of 8000 ft. and terminates at an extremity called Squally Point, from the furious squalls that are continually blowing down its sides. The S shore is skirted by a numerous group which bears the name of Froward Islands, and behind which some good anchorage are found. Throughout its whole coast Clarence Island is penetrated by numerous inlets the largest of which, San Pedro Sound, extends in a southerly direction for nearly 13 miles.

CLARKE [add.] an island off the N E of Tasmania, forming the southernmost of the Furneaux group, and the N side of Banks Strait. Its greatest length is 8 m. and its breadth 5 1/2 m. On its S end, which is rocky there is a dangerous shoal called the Mortuary Bank, extending nearly 5 m. in an E direction. All its W shore is rocky, and is separated from Burro Island by Armstrong Channel which is 10 m. long between E. N. E. and W S W and from 1 to 4 m. wide. At Hamilton Head, within this channel, shelter may be found from all winds except those between S. and S.E.E. which do not throw it much sea.

CLARKSBURG a vil U States, Virginia, cap. co. Harrison, on the W fork of the Monongahela, and the rail

way to Parkersburg 216 m. N W Richmond. It stands high and is surrounded by hills. Steep-coal abounds in the vicinity. Pop. 1200.

CLAYTON two vils U States—1 New York, on the St. Lawrence, where it has a landing-place and at the terminus of the Lake and Black River railway 100 m. E N W Utica. It is a port of entry in the collection district of Cape Vincent and has pop. 4696—2 Iowa, see same name, on the Mississippi 50 m. above Dubuque. Being the most accessible river port, much of the produce of the district is shipped at it in steamers. Lead mines also have been opened on the bank of the river. 1 op 723.

CLEVELAND or **CLEVELAND** [add.] a to U States, Ohio, cap. co. Cuyahoga, at the mouth of the river of this name on the S shore of Lake Erie, and on the Ohio canal and several lines of railway which give it almost unlimited means of communication. It occupies a high and commanding bluff immediately above the lake, is laid out in broad well paved streets and open squares, generally well planted with trees is well built and presents a very attractive appearance. Among its public buildings are 85 churches many of it are provided with handsome spires numerous schools maintained at the public expense and under excellent management a medical college and a marine hospital. The harbour furnished with fine piers, is everywhere complete and a wharf is very extensive, a large portion of it with Canada. The increase of trade has been accompanied with an extraordinary increase of population. The inhabitants of Cleveland amounted in 1830 to 1100 in 1840 to 6071 in 1850 to 17,084 and in 1860 to 43,417.

CLIFTON a to British America, Canada West, co. Welland about 85 m. (by lake) S.E.E. Toronto. It is the eastern terminus of the Great Western railway and is situated at the suspension bridge which crosses the Niagara about a mile above its celebrated falls and connects the railway system of Canada with that of the state of New York, and all other parts of the States. The Erie and Ontario railway connecting with the Ontario steamers also passes through the town. The numerous facilities for trade which Clifton possesses yet remain to be developed.

CLINTON four places U States—1 A vil Massachusetts, on the Nashua, 35 m W by N Boston a thriving place, with some 20 churches a number of good schools, large gingham factories, in which about 800 operatives are employed an extensive carpet factory several machine-shops and numerous mills. Pop. 1869—2 A vil New York, on both ends of Orriskany Creek, and on the Chenango canal 9 m. S.W. Utica. It contains several churches, and is the seat of Hamilton college. Pop. 1174—3 A vil New Jersey on the R. branch of the Raritan River and on the New Jersey Central railway, 10 m. h. Flemington. It possesses several mills and factories, and stands in a fertile and highly cultivated district. Pop. 2949—4 A vil Louisiana on a railway which connects it with Port Hudson on the Mississippi 22 m. N Baton Rouge. It is inhabited chiefly by wealthy planters, and contains a fine courthouse and two churches. Pop. 1252.

CLINTON a to British America, Canada West co. Huron, on the Buffalo and Lake Huron railway 10 m. E. Lake Huron with a Welland and a New Connection Methodist chapel, janitor, and flour and saw mills. Pop. about 1000.

CLUTHA or **MATAC** a river New Zealand which has its mouth in Molyneux Bay in the S.E. of Mullie Island or Munster 4 1/2 m. N. Ngaget Point. It is a considerable stream, with deep water and broad within the entrance. The entrance itself however is narrow and a constant fresh running out of it at the rate of 5 to 6 knots makes it unsafe to be navigated by anything but boats though small steamers might navigate it with advantage.

COALCOOMAN or **SANTIAGO COALCOOMAN** a to Mexico, in a fertile valley in the S.W. of state Michoacan, about 50 m. from the shores of the Pacific. It is of recent origin, and has made rapid progress, chiefly in consequence of the rich mines of iron in its vicinity. Pop. 2000.

COBIJA [add.] or as the official documents style it *La Mar* after the name of the first president of Bolivia, is the only port of Bolivia, and cap. dep. of same name, lies on the shores of the Pacific lat. 22° 54' S., lon. 70° 17' W. It stands

upon the beach at the foot of a lofty range of hills, the natives are very unhygienic and but for its position as a port few persons would choose it for a residence. The only good houses are in a long and spacious street, stretching from N to S, along the shore, the landing-place is best owing to the heavy surf but the harbour affords tolerably good anchorage. The prosperity of Cobla depends entirely on the mining districts, but the products of the mines are shipped principally from Cochin, 5 m., and Aliphoon, 38 m., to the N. They are chiefly owned by English companies, who import almost every necessary. In 1856 the quantity of raw copper shipped at Cobla amounted to about 70,000 tons. Till 1837 it was merely a fishing village occupied by Chinese Indians. In that year it was declared a free port, and in 1839 it became the capital of the department. In consequence of these privileges it began to flourish, and had in 1856 a population of 600 souls. There was only a commencement of its prosperity for in 1868, besides a permanent population of 2350, it had a floating population of persons going to and from the mines, estimated at about 2000, and consequently giving an aggregate of more than 4000.

COBURG a tn. British America, Canada West, cap. co. Northumberland, pleasantly situated on the N shore of Lake Ontario, and on the Grand Trunk as well as the Coburg and Peterborough railway 49 m. S.S.E. Toronto. It possesses 8 or 10 churches, an educational establishment which bears the name of Victoria college, a great number of flour and saw mills, with an extensive supply of water power, an arsenal, and other industrial establishments. The island communities of Coburg and its proximity to Rochester and other parts of the American shore, have made it in the course of fifty years a first-rate place of business. From its harbour which is at low ebb commodious and safe, there were exported in 1857 7000 barrels flour 300 000 bushels wheat, 500 bags butter and 14,000 000 ft. of sawn lumber Pop. about 7000.

COCA a river N. America, Ecuador formed by the San Francisco, Yagron, and Comaga, from the E slope of the W Andes, flows between the cordilleras of Guacumaga and Galeana in a deep channel between lofty and precipitous banks, and joins the Napo more than doubling its volume. In its course it forms a magnificent cascade of nearly 150 ft.

COKANADA or KAKHNAIDA a tn. India, presid. Madras, dist. and 37 m. E. of S. Rajahmundry on the shore of the Bay of Bengal. It is a rising place the residence of several European merchants, and is annually increasing its exports. By means of a commodious canal boat for passengers and light goods it communicates daily with Rajahmundry and it is expected that when the Godavary navigation is opened towards Nalgonda, it will become the port of shipment for all the cotton which is now conveyed by tedious land journey from Berar to Bombay.

COCHIN [add.] a tn. India, presid. and 355 m. S.W. Madras, cap. dist. of same name, on a low sandy flat of the Malabar coast. The present town stands on the shore, at the N. entrance of a back-water which, extending S. to N 40 m., forms a spacious harbour but is encompassed by a bar which, even at spring tides, does not admit vessels exceeding 400 tons. Most of the streets are formed with considerable regularity crossing each other at right angles, and the houses are generally of two stories with pent-tiled roofs, and open to the south; from the number of courts and walls which surround them, deficient in ventilation, and ill adapted to the climate. Shipbuilding, once among the most important occupations of the place, is still carried on to some extent. The chief exports are coconuts, coral, sardines, coconuts, oil, cassia, fish-maws, and timber. Cochin, besides the town proper includes the suburbs of Calvary and Muttissherry which form long straggling streets for half a mile to the S.E. along the edge of the back water. At the latter suburb is a remarkably extensive set of palaces belonging to the Cochin prince and immediately adjacent to it is the synagoga of the Jerusalem or White Jews. The Black Jews, of whom there are many in the interior of the district, have also a synagoga, the floor of which is paved with china very neatly laid. In 1505 the Portuguese obtained permission to erect their first Indian fortress here. This became the nucleus of a large town with a fine cathedral. After the expulsion of the Portuguese Cochin became the capital of the Dutch settlements in India, the cathedral was turned into a warehouse, merchants

crowded to it from all quarters, and the trade by way of the Red Sea became so extensive, that Venetian ships obtained a large part of the common currency. The British came into possession in 1795, and in 1814 demolished the strong fortifications and levelled the ramparts. Pop. 20 000.

COCHIN-CHINA (Fazoua) a French settlement, occupying three of the six provinces of the Annamite country of Lower Cochinchina, namely Dong-nai or Binh-hoa, Saigon or Gia-dinh, and Mi-tho or Binh-trong. The settlement is bounded N. by the kingdom of Cambodia and the territory of Vinh-xuong, E. by Vinh-long and the China Sea, E. by Binh-thuan, in Middle Cochinchina, and W. by the prov. of Chao-don. Binh-hoa, the easternmost prov. is the most healthy and pleasant, especially in its higher part, its chief town of the same name, is fortified, and stands on the N. bank of the Dong-nai. It is divided into two departments, and has a soil admirably adapted to the growth of sugar-cane, and of tobacco and indigo. Vast forests of useful trees and the lofty mountains of Boria and Cape Titoum add to its picturesque appearance. Iron is found at Hongo. Gia-dinh the central prov. forms three arrondissements, and its soil in the N. is similar to that of Binh-hoa, in the S. rice is extensively grown. Saigon is the cap. and stands on the S. bank of the wide and deep river of the same name. It is divided into a military and commercial port, the latter being S. of the former and separated from it by the Chinese canal. The third prov. Binh-trong, or Mi-tho, is the richest and most extensively cultivated, but the least healthy of all the French possessions, cholera and malarial fever being permanent scourges.

The lowlands, where the waters stagnate, are covered with a rank vegetation from 3 to 10 ft. high, out grows in the flowing streams are extensive rice-grounds. Where the soil is somewhat raised above the water level it is very fertile, and in some places ranges of low hills follow the line of the rivers. In the more elevated districts are grown tobacco, sugar-cane, maize, indigo, and betel. Among the other products are tea, gums, coconuts, oil, silk, sugar, and various aromatic and aromatic articles. The Annamites raise also great numbers of buffaloes, cattle, pigs, and birds, the first being employed in agriculture, and as well as oxen for draught purposes; but since the French conquest oxen are reserved more strictly for food. The elephant, rhinoceros, and crocodile are not indigenous, but tiger, deer, apes, and serpents, and many kinds of birds, are common. Fishing, in a country so abounding with streams, is naturally a great source of livelihood to the inhabitants, who prepare considerable quantities of the fish they catch for exportation, and for the Saigon market, where they can command a good price. The mineral productions are few. Only one kind of stone possesses any apparent value, an agglomerate of chalk or shells, is found fit for building purposes. Alum and salt are obtained on the coast of Binh-hoa and iron exists, but not in quantities sufficient for profitable working. Copper and iron are imported from China, and manufactured by the people, but to no great extent. Industrial arts are as yet limited among the natives. They are skilful in all kinds of basket-work, in which they use the reeds and other similar materials which abound in the low lands, silk and cotton are also wrought. But they excel in the use of wood, of which they construct pagodas and temples are built, and ornamented with elaborate carving. They live in villages—numbering nearly 1000 altogether—adjacent to the rivers, which is the result of the nature of the country for land traffic runs almost the only means of communication. Their houses are either tiled or thatched with straw, the roofs being supported with wooden pillars; the better class are in two sections, the inner apartments, and the outer verandah which serves for use in the daytime; they are often well furnished and not devoid of comfort. The only roads at present existing are these connecting Saigon the capital, with the principal towns. Telegraphic communication between many of the principal places has been steadily opened, and is being extended. The people are more warlike than the Chinese and have learned from their long conflict with Europeans the use of strategy and fortification. Slavery has been abolished since the French occupation; polygamy is permitted, but not generally practiced. The climate of Cochinchina, lying between lat. 10° and 19° N. is not liable to great variations. In the dry season, from October to April, the N.E. monsoon brings a

refreshing mitigation of the heat, which is greatest in February and March, the season of the rains and the S. W. monsoon is humid and exhausting but upon the whole the climate is said to be much less oppressive and unhealthy than that of Bengal or Guinea. Cholera, dysentery, ague and cutaneous affections are the prevalent diseases.

A persecution of the French & Catholic missionaries in Annam furnished the imperial government with an excuse for repelling a long desired footing in the East. An expedition against Cochin China was decided on in 1857 and Saigon was occupied. The Austro-Italian war deferred further operations till 1861 when the conquest of Xi-thé gave the French possession of the most fertile district of lower Cochin China, and enabled them to extend their frontier to the borders of Cambodia. At the end of the same year Bâ-nh, and in the early part of 1862 Vinh-xuong, fell into their hands, and a treaty of submission was exacted from the king of Annam. But insurrectionary movements delayed the final and peaceful settlement of affairs until April 1863 when by a new treaty the king of Annam ceded the three provinces which now form the French territory together with the free navigation of the several arms of the Cambodia River and the opening of the ports of Balet, Tourane, and Quang-an besides assuring protection to the French missionaries in Annam, and stipulating to pay an indemnity of 4380,000. The province is now organized in prefectures, sub-prefectures, and cantons. The population is estimated at 900,000.—(De Gressant, *Shanghai*, &c.)

COOCH, an isl. of the N Pacific, about 400 m W of the coast of New Granada in S America, in lat. (Chatham Bay) 5° 23' 57" N lon. 86° 58' 23" W. It is about 30 m in circuit, has an elevated surface, becoming visible at sea at the distance of 60 m and is abundantly supplied with excellent water. At one time it was almost covered with coconut trees but most of them have been barbarously cut down for fuel. Wild pigs are numerous, and the sea around the shores teems with fish. In Chatham Bay on the N E side of the island there is good anchorage in 14 fathoms. Cocos was a favorite rendezvous of the buccanniers and is still visited by whales.

COO CARA [add.], a sandy peninsula, U States forms the S E extremity of Massachusetts and stretching first E. for 25 m with an average breadth of about 8 m, and then nearly due N for 30 m more, with an average breadth of less than 4 m. *How it faces the S and E its coast line is convex, but its N and W faces are concave, and inclose between it and the mainland a considerable expanse of water called Cape Cod Bay.* As the navigation is dangerous several lights have been erected upon it. One of these, at Race Point, its N extremity is a revolving light 155 ft. above the sea. The lower portion of the cape is a waste of barren sand hills with occasional patches of beach grass and a long stretch of salt-marshes. Where the ground rises pitch-pine with a sprinkling of several varieties of oak, forms considerable forests, in which wild deer are still found. Numerous boulders lie scattered on the surface but no rock is to be seen, nor in the sinking of walls has any been discovered. But notwithstanding the prevalence of sand the peninsula is by no means destitute of inhabitants. In many of its sheltered nooks are thriving villages occupied mostly by industrious and enterprising fishermen, and furnishing excellent marine stores, from which the masters of many of the best ships in the American merchant service have been obtained. Cape Cod was first discovered in 1520 by an English sailor of the name of Gosnell who had sailed from Dartmouth in the bark *Concord* on a voyage of discovery fitted out mainly by the Earl of Southampton. The number of cod fish caught in its vicinity induced him to give it the name which it still bears. The most memorable occasion on which it was subsequently visited was on the 9th of November 1620, when the *Mayflower* arrived with the Pilgrim Fathers, and anchored next day in the fine land locked harbor of Provincetown.

COEL, or Koya, a river India, which rises in a mountainous tract on the S. frontier of Gheta Nagpore, flows N and joins the Ganges on its right bank, in lat. 24° 31' N, lon. 83° 54' E. its whole length is about 140 m. Scams of coal have been discovered on its banks.

COHAWILLA or COHAWA [add.] a state, Mexico, bounded N by Texas, from which it is separated by the

Rio Grande, E. Texas and Nuevo Leon S. Sonora, and W Chihuahua and Durango; area, 93,600 sq m. It is traversed from N W to S E. by two nearly parallel mountain ranges and so intersected by detached ranges in other quarters that its only plain of considerable extent occurs in the N and from the manner in which it is inclosed having an entrance without any proper outlet has received the name of the Bolson or Sack of Mexico. This Bolson is almost entirely in the possession of the Comanche and Lipan Indians, who have thus not only appropriated the best part of the territory but are so determined and barbarous plunderers, that neither agriculture nor any other branch of industry can be carried on within reach of them, large farms, and even whole villages, have already been abandoned as the only effectual means of escaping from their depredations. The quantity of tillable land is very limited but, where quietly possessed, is well cultivated, partly in fields of wheat, maize, and barley and partly in vineyards from the produce of which wine and brandy of high repute are made. Saltillo or Leone Vieiro, situated in the S E corner of the state, near the frontiers of Nuevo Leon is the capital. Pop. 68,278.

COHASSET a vil U States, Massachusetts, co Dorset, on the coast, at the terminus of the South Shore railway 12 m. S E Boston. The inhabitants are extensively engaged in the mackerel fishery which here employs about 44 vessels and 560 persons. Pop. 1775.

COIMBRA or FORT COIMBRA a town Brazil prov Mato Grosso, r bank Paraguay lat 19° 55' 43" S lon 57° 52' 32" W. It is the most southerly Brazilian settlement on the Paraguay and stands on a height 40 ft. above it. The fort a solid stone structure mounted with six guns, completely commands the channel of the river which is only one-third of a mile wide.

COLBOURNE, a town in British America, Canada W on the Grand Trunk railway and about 2 m from the harbour of its name called also Fort Cornwallis on Lake Ontario. It possesses an Episcopal Methodist and a Wesleyan church a superior grammar school a saw and flour mills, a tannery a pottery and saw and flour mills. The labourer of Colbourne is a port of entry from which a considerable amount of lumber is annually exported. The fishery in the lake which abounds with white fish and salmon trout, and the curing of them for inland or foreign markets has recently sprung into notice, and promises to become important. Pop. including that of town and harbour about 1400.

COLD SPRING a vil U States New York, co Putnam 45 m N New York on the Hudson River railroad. It is situated in the Highlands contains five churches and has an iron and brass foundry and machine shops. Pop. 1200.

COLD WATER, a vil U States, Michigan on E. branch of Cold Water River and on the Michigan Southern railroad 115 m W by S Detroit. It stands alone in a prairie of its own name surrounded by a fertile country and being furnished with water-power from the river possesses several mills, &c. and has a large retail trade. Pop. 1800.

COLD WATER RIVER, British America, peninsula Labrador an affluent of the Mealy river in Trout Lake in the table land of Labrador at the height of 1468 ft. above the sea in lat. 51° 35' N lon 66° 5' W. It forces its way through gorges flanked by noble mountains rising 2000 ft. high, rugged and wild. In the course of 20 m it falls 1480 ft. In one place it falls 608 ft. in about 2½ m. over a series of cascades broken by masses of rock and boulders and lower down between two of the lakes through which it flows, there is a descent of 270 ft. in a distance not exceeding 1200 yards. In its lower part it is in some places 60 ft. broad but at its mouth on the bank of the Mealy about 85 m. above the debouchure of the latter in the Gulf of St. Lawrence, it is not more than 80 ft. in breadth. Its course has a length of about 80 m and its general character is that of a torrent navigable only occasionally by canoes for short distances between the rapids.

COLGONG [add.] a town India, Bengal dist. Bhagulpore, r bank Ganges, and a station on the East Indian railway 245 m. N W Calcutta. The fort, which stands close to the river is now a heap of ruins in the river near it are three masses of rock 50 ft. high with their summits filled with stunted trees. Steam-packets ply from it to Jessore up and down the river.

COLLALTO, a tn. Austrian Italy, prov. and about 12 m. E. Treviso, with an old castle of the middle ages, the cradle of the emperors, new prince of Collalto, descendants of the house of Habsburgs.

COLLINGS, two places, U. States.—1. College Hill, a vil. Ohio, 6 m. N. Cincinnati containing two prosperous educational institutions, Farmer's college, attended by about 800, and Ohio female college, by about 150 students. Pop. 500.—2. College of St. James a post vil. Maryland on Washington, containing a Protestant Episcopal college and preparatory school.

COLLINGWOOD a tn. British America, Canada W. co. Simcoe, on the Georgian Bay, at eastern branch of Lake Huron and at the terminus of the Ontario, Simcoe, and Huron railway 75 m. N. N. W. Toronto. Though a few years ago it was little better than a wilderness, it now possesses two churches, a weekly newspaper, steam saw-mill, and building-yards, from which ships of 150, 250, and 450 tons each have been launched. Pop. about 3000.

COLIGNA a tn. Austrian Italy prov. and 22 m. S. E. Verona, on a picturesque site on the Gm. It is surrounded by ancient walls, is the seat of a court of justice and several public offices, and has a new cathedral with a Corinthian portico, several other churches, with good paintings, a fine courthouse, an hospital, and trade in wine and hemp, which are here grown to a large extent. Pop. 4596.

COLIGNOLA, a tn. Austrian Italy prov. and 10 m. E. Verona, at the entrance of the Illus valley. It has many fine villas, and a parish church with paintings by Farinati and J. Goltz. Pop. 3074.

COLORADO, a territory, U. States, formed in 1861 out of portions of Kansas, Nebraska, New Mexico, and Utah is bounded by the parallel 37 and 41° N., and the meridians 102° and 109° W. and has an area of about 106,080 sq. m. It is traversed from N. to S. by the Rocky Mountains, which divide it into two parts, and send down numerous streams, from which the territory takes its name and those of the E. slopes carrying it to the basin of the Mississippi, through the Arkansas and the R. of the Platte. The territory is rich in mineral wealth containing gold, silver, copper, iron, coal, salt, saltpetre, limestone, and gypsum. There has been gold here as yet been worked to any extent, but there are productive both in the quartz rock, for crushing which many hand and water mills are in operation and in the beds of the streams. On the W. slopes of the Hoory Mountains silver mines have likewise been discovered. Ironstone is found in all parts of the territory and a smelting furnace has been erected at Boulder for the manufacture of pig-iron. Deposits of lead and quicksilver also exist and coal has been found at the base of the mountains near Denver City. The territory is scantily timbered, but there are large tracts of good agricultural land, and farms are being cultivated in all parts, producing grain of all kinds and vegetables in abundance. In many districts however irrigation is requisite, so that agriculture is at present confined principally to the valleys of streams and a few other favored localities. The extension of the Pacific rail road westward, passing probably a little above Denver with the facilities it will afford the population and products of the territory will be largely and rapidly increased. The mines yielded about \$3,400,000 in 1863. Golden City is the capital. Estimated pop. (1863) 70,000, of whom 15,000 are Indians.

COLOTTA AN (SAN ANTONIO) a tn. Mexico, state Jalisco, about 55 m. N. W. Guadalajara, 1 bank Xero in a fruitful valley at the height of 5000 ft. above the sea. It carries on an important transport trade by means of mules, and contains about 2500 inhabitants.

COLUMBIA, two places, U. States.—1. A tn. Tennessee, cap. co. Maury on the E. bank of Duck River and on the Tennessee and Lake railway 48 m. S. E. W. Nashville. It contains two churches, a college, a female academy, in a handsome office, with beautiful and extensive grounds, and several other excellent schools and carries on an active trade.—2. A vil. Missouri, cap. co. Boone, 18 m. N. W. Jefferson. It derives its chief claim to notice from being the seat of the state university the buildings of which including the ground, cost \$35,000.

COLUMBIA (Shawana), a colony formed on the Pacific side of British North America in 1866, of territory ceded from the Hudson's Bay Company comprising the districts formerly known by the names of New Caledonia, New Georgia, New Norfolk, and New Cornwall. It is bounded N. by the Simpson and Finlay Rivers E. by the Rocky Mountains, S. by the parallel of 49°, which here defines the boundary between British America and the U. States, and on the W. by the Gulf of Georgia, Charlotte Sound, and the Pacific Ocean, the former separating it from Vancouver Island, with which however it is combined for governmental purposes. Its extent lies between lat. 49° and 57° 27' N. and lon. 114° and 121° W.; its length N. to S. being about 450 m., and its mean breadth about 300 m. area, 300,000 sq. m. The coast line is deeply indented with sounds and bays, which furnish a number of excellent harbours, but the pre-existence of the port of Victoria, in Vancouver Island, and its proximity to the entrance of the Fraser has hitherto precluded any necessity for occupying them. The interior of the country is much diversified in character and surface, the eastern side being entirely mountainous, from the base of the Rocky Mountains with its many peaks rising to an average height of 15,000 or 18,000 ft. and the subordinate ranges which extend westwards almost to the centre of the land. The surface of the western parts—after passing a range of hills fringing the coast, and shooting up in irregular peaks, varying from 1000 to 10,000 ft. in height and intersected at intervals by the long inlets which indent the coast—is irregular with occasional high land as far as the Fraser River between which and its tributary the Thompson is a large tract of level forest. The rivers are numerous and large and form an important feature of the country, but their value as means of transit and of access to the interior is destroyed by the many rapids and falls which occur along them owing to the precipitous and mountainous nature of the country through which they flow for the most part. The most navigable, and on this account important, is the Columbia, which rises in the vicinity of the Rocky Mountains, between the Brazeo and Selkirk ranges, in about lat. 50° 30' N. lon. 114° W. and flowing N. to lat. 52° 10' makes a sudden bend to the S. W. and E. passing this course till it passes the U. States boundary near Angles state, through which it turns westward to the Pacific. This river is navigable, will bear few breakers by steamers as far as, or even perhaps beyond, the head of Upper Arrow Lake in British Columbia, but it has the disadvantage of passing in the first instance through a foreign territory and as yet that part of Columbia in which it lies has but few settlers, though probably the recent discovery in it of gold diggings of the richest kind will soon attract a large accession. The Fraser which is wholly within the Columbian limits, is the best known, and practically most important. It takes its rise in the western slope of the Rocky Mountains about lat. 58° N. lon. 119° W. and after flowing N. W. to about 54° 30' like the Columbia, makes a bend to the S. in which direction it flows, with a slight inclination to the E. receiving during its course, and on its left bank in about 50° 15' the waters of its principal tributary the Thompson soon after which it makes a sharp turn westward flowing in a broad and navigable stream into the Gulf of Georgia, a few miles below New Westminster, the newly founded capital of the colony upon its right bank. Steamers are able to ascend it as far as Yale, about 90 m., though the current is often extremely rapid, but beyond that point it rushes through mountain gorges in a narrow torrent, with a velocity of 15 to 20 m. an hour. This is also the characteristic of its affluent the Thompson which rising in the ranges to the S. W. of the source of the Fraser flows, with the name of North Thompson through lofty and precipitous hills, densely covered with almost impenetrable forest, in a southerly direction to Kamloops Lake, through which it turns W., and then S. W. into the E. bank of the Fraser. The Fraser River rises on the northern side of the hill range which defines the Fraser from its source to its southerly course, and flowing N. into the Finlay also has importance from being likely to prove prolific in gold. The character of vast torrents dashing through mountain gorges usually developed with a dense growth of timber, sufficiently describe the principal rivers of British Columbia, which are unsuitable for the purpose of navigation, with rare exceptions.

of occasional short distances. The expense of primitive travel, for the most part as yet pathless and unexplored, is a remarkable feature of the eastern mountain districts. Some idea of it may be gathered from the graphic description by the intrepid travellers, Lord Milton and Dr Chesley, of what they witnessed upon the Thompson. The steepness of the path was not the greatest difficulty. It was the collection of stumps and the impenetrable character of such a region. There were piles and slugs of every size, the patriarch of 800 ft. in height standing close or thickly clustering groups of young ones struggling for the vacant place of some prostrate giant. The fallen trees lay piled around, forming barriers often 6 or 8 ft high on every side; trunks of huge oaks, moss-grown and decayed lay half buried in the ground, on which others as mightily had recently fallen; trees still green and living recently blown down, blocking the view with the walls of earth laid in their matted roots; living trunks, dead trunks, rotten trunks dry barbed trunks, and trunks rotting and green with moss; bare trunks, and trunks with branches prostrate receding, horizontal, propped up at different angles; timber of every size in every stage of growth and decay in every possible position untangled in every possible combination.

The difficulty of transit in such a country would be considered insuperable, were it not for the absolute necessity of a road to reach the sites of its incalculable wealth, the gold-fields. These have been discovered to exist in all directions upon and eastward of the Fraser River. The most extensive, at least those hitherto most extensively worked, are the fields in the Cariboo district which lie in the N head of the Fraser about lat. 58° 30' (Cariboo is a sea of mountains and pine-clad hills the former rising to a height of 7000 or 8000 ft and surrounded by a confused congeries of the latter the surface everywhere having been disturbed the strata tilted on and beds of streams heaved up to the top of hills. Gold is also found in the Thompson and many of the small streams tributary to it, and upon the Nicola, Kamloops and Okanagan lying between it and the Columbia Lakes and River as well as in the Kootenai already mentioned; indeed the whole of the eastern division of the territory abounds more or less richly in auriferous deposits, both in the beds of the streams, and in the quartz of the hills. The first discovery of gold in this region was made in 1856 by an Indian, it is said who stooping to drink of the Nicola saw a small affluent of the Thompson near its junction with the Fraser saw a nugget glittering in the water. The news soon spread, and a rush of gold-seekers took place. The Cariboo district became the centre of attraction from its extending richness in the precious metal, which is there not confined to the rivers but is found in the gulches and table land 300 or 400 yards from them, and much beyond their highest levels in some spots about a foot of gravel overlies the bed rock of light-coloured shale, which is very soft, and in the crevices of which the gold is deposited in others it is worked at the depth of many feet. The richness of the deposits may be gathered from the fact that parties of three or four miners have collected quantities varying from 3 or 4 to 70 lb or so, of gold per diem. The quartz rock is also considered to be of unusual richness. Coal also has been found on the W coast.

The quality of the land for agricultural purposes is a subject of differing opinion. The country on either side of the Lower Thompson is exceedingly beautiful and picturesque, being a succession of green rolling hills and valleys lakes and rivers, and apparently of great value as a grazing district but hitherto very few settlers have attempted farming operations though between the Thompson and Fraser they have begun, with a good chance of success with the aid of artificial irrigation. Similar negotiations were entered into the Lillooet sets, W of the Fraser which were at first celebrated as excellent feeding grounds but are described by Milton and Chesley as having become in 1865 merely bare, dusty plains the bunch grass which formerly covered them and which constitutes the principal herbage throughout, having been destroyed by continued grazing it grows in distinct tufts, and requires, after being eaten down three years to recover itself. Upon the lower part of the Fraser in the straight W course from Hope to its mouth are fertile lands, but they are covered almost entirely with dense forest,

See the Col.—Vol. I.

and exposed to summer frosts. It seems likely then that until the country becomes more thickly and permanently populated—and then only after a lapse of years, until the vast expanse of forest can be partially cleared, and its place occupied by cultivators of the soil—the population must be dependent upon foreign sources for most of the commonest necessities of life. But the nature of the country makes the transportation of them a work of extreme difficulty and expense, and imposes a high cost upon all articles of consumption. Hence the devising of methods of transit is a matter of primary importance, and is engaging the attention of the government and all others interested in it. The only available approaches to the interior at present existing are those proceeding from New Westminster the capital up the Fraser until one diverges up the Harrison River and Lake, and then the Lillooet and other lakes by what is known as the Harrison-Lillooet route reaching the Fraser at Lillooet, and thence proceeding by trail to the Cariboo or other districts in that direction the other route continues up the Fraser as far as Yale after which it lies along the trail passing over the mountains which tower above the lower part of the river presenting difficulties and dangers which though they have been lessened by ingenious engineering efforts, are still not a little formidable. Other routes have been proposed, leading more directly from the coast to the Upper Fraser some of which have been traversed more than once. One of these lies through Burke Channel, the entrance of which is about 80 m N of Vancouver Island, and which runs inland for 80 m and is then continued by three arms for 25 m, further the central one of these arms called Bellinella Bay Mr Collin Mc Kenzie reached from Alexandria on the Fraser a distance of 160 m in 18 days, the river in the watershed of the coast range being so gradual, that he only knew he had passed the summit by finding that the streams flowed W instead of E. Another and perhaps even more eligible route, is suggested from Dean's Cove at the uppermost of the three arms to the Nahcuth, an affluent of the Stuart, and along the latter to Fort George upon the Fraser immediately adjacent to the Cariboo gold fields. All these routes save the entry from the Pacific side but the great desideratum is that the country should be accessible from the eastward overland, and through British territory. The Rocky Mountains form the great barrier; several passes through them have been traversed with more or less difficulty the chief of them from the N northwards being the horn dary Kootenai, Kananaski, Vermilion, Kicking Horse, Athabasca and the 1st, 2nd, 3rd, or Yellow Head, or Lescher. All, except the latter presenting various degrees of difficulty upon the E side, are met on the W by a country completely blocked by mountains and forest. The last named the 1st, 2nd, 3rd or Yellow Head Pass, is said to be the most feasible as it traverses a wide break in the range, only 8760 ft above the sea, offering a natural roadway of very gradual ascent and obstructed by timber only. The head of the pass is with in 80 m of Cariboo, but the interval is mountainous and densely wooded though not so to present any insuperable obstacles. If this route were opened it would have the additional advantage of offering a communication with the fertile country of the Kootenai on the E of the Rocky Mountains, which is admirably suited for agricultural settlement, and only needs such a market as Columbia would furnish as an outlet for its produce. Mutual benefit would thus be conferred on two most valuable districts of our colonial territory. It is by this pass that the Hudson's Bay Company propose to carry the line of telegraph which they are about to lay across the continent. Railway communication with this region through British territory is distant, the connection between the Atlantic and Pacific being likely to be first made through the U States to California. The Pacific railway now in progress will, on the western side, this year (1866) be extended to the summit of the Sierra Nevada Mountains, 104 m from the city of Sacramento which is itself 2700 ft above sea water. Four thousand men chiefly Chinese, are now engaged on that railway and the state of California has voted \$2,000,000 for its prosecution. To meet this railroad the railway on the eastern side of America now extends from New York to 200 m beyond St Louis, the border city between Illinois and Missouri.

Government etc.—The colony as yet in its youth, has not been organized with a representative system of government,

the administrative and legislative power being invested in the governor of Vancouver Island, who is also governor of British Columbia. This supreme authority has been so judiciously exercised that even upon the first rush of gold-mining immigrants law and order were rigidly preserved and enforced and life and property are protected in almost perfect security. For judicial purposes a supreme court exists, which, given the circuit, and there are local magistrates, &c. for the settlement of matters within their cognizance. The establishment of a hospital and a staff of clergy was early effected and missions have been placed not only among the European population, but also among the aboriginal Indians and the Chinese immigrants.

Commerce and Population, &c.—As yet no formal statistics have been published of the foreign and internal trade of the colony. The state revenue and expenditure of the colony in 1892 are set down at about £200,000 respectively. It was estimated in 1865 that the united population of Vancouver Island and British Columbia was about 100,000. Vancouver Island having about 25,000 of that number.

COLUMBUS (add.), three places, U. States.—1. A town, Georgia, cap. of Milledgeville, 1 bank Chatahoochee, which is navigable for eight months in the year and at the junction of three railways on the E. frontier of Alabama. It ranks as the third town of the state in population, commerce and importance, is regularly laid out in streets, from 59 to 145 ft. wide and contains many picturesque dwellings freely shaded by trees which give the whole place an attractive appearance. The principal public buildings are a very handsome courthouse, five churches, a female college, an academy, a seminary, an orphan asylum, a market house and jail. The industrial establishments consist of a paper mill, five flour and five large cotton mills, foundries, machine shops, cotton presses, a woolen and an agricultural implement factory. Before it was nearly 80,000 bales of cotton were annually shipped here. The village of Grand Rapids, on Columbus, about 700 ft. higher, is by a handsome bridge 1 p. (1860, 1861) 1 when 3217 were slaves.—2. A town in the Ohio valley near the centre of the state on the F. bank of the Ohio, on the Ohio canal, and at the junction of five railways lat. 39° 5' N., lon. 85° 8' W. Standing on an alluvial flat it presents nothing attractive in its site. Its most striking feature is the nave and extent of the public buildings and institutions. The capital is second in size only to that of Washington, and though not very striking from being built of grey limestone in the simple Greek style is truly a handsome structure. Its interior is elegantly finished. The other principal buildings and institutions are a seminary, churches, a German Lutheran theological seminary, a medical college, lunatic, blind and deaf and dumb asylum and a penitentiary containing 350 cells for prisoners. The ample means of communication both by water and rail give Columbus a very extensive trade and make it the central entrepot for the produce of the surrounding country. Pop. (1890) 18,534.—3. A town, Mississippi, cap. of Lumbard, 1 bank Tombigbee which is here navigable all seasons, in a fertile district occupied chiefly by plantations, 145 m. N. E. Jackson. It contains six churches, a female academy, a seminary, a courthouse and jail carries on an active trade, and is a shipping place for cotton. P. 3308.

CUMBARALLA a town in Chh. prov. Cochin, cap. of some name 100 m. S. E. Cochin, on a rugged site surrounded by barren mountains; with a parish church, a post office, and 1200 inhabitants.

CUMISA a town, Austrian empire, Thuringia, circle Spaltein, on a large bay on the W. side of the island of Lissa. It has a harbor defended by a tower and a valuable sailing harbor. P. 19,400.

CUMITAN or **CUMITAN** (add.) a town, Mexico, state Chiapas on the Gravelo, 40 m. S. E. San Cristobal. The inhabitants are mostly in prosperous circumstances occupying good houses in the town, and living on the incomes of their haciendas or farms which they cultivate by the labor of Indians and only occasionally visit. Pop. 10,000.

CUNCEPION (add.) a town and port, Chili. (See Cuzco, Chilean in Supp.)

CUNCEPION a town in La Plata, r. bank Uruguay prov. Entre Rios 150 m. N. Buenos Ayres. It is a pretty place, and boasts of a college, where youths are educated, without

partiality or distinction of rich and poor at the expense of the province. This institution the buildings of which are handsome and commodious, has in a great measure supplanted that of Cordova, which was long celebrated, but has now dwindled to a provincial school. Pop. 4000.

CUNCEPION a town, S. America Ecuador is the interior of the country to the E. of the cordillera of Quito, on the banks of the river Guano. It is inhabited by about 150 families of Indians, who cultivate a little tobacco and some other crops, and are sometimes employed as porters in carrying burdens across the country to San Juan.

CUNCEPION of VILLA REAL DE CONCEPCION (add.) a town, Paraguay r. bank river of the same name, lat. 28° 35' S., lon. 57° 30' 30" W. It stands on a plain about 30 ft. above the ordinary level of the river, was once a flourishing place and should now be a principal part for the export of yerba, or Paraguay tea, and mountain but the policy of the government in monopolizing all trade and centralizing it at Asuncion has destroyed its prosperity and left it with a pop. of not more than 3000.

CUNCEPION (VILLA DE LA) a town, Mexico, state and 63 m. W. Chihuahua, on a beautiful mountain stream of same name, an affluent of the Yaqui. It stands in an elevated valley forming the most fertile district in the state, and famous particularly for its apples, which are raised chiefly by the Indians. The famous mines of Santa Maria, situated on the E. frontier of Sonora, have been the main source of its prosperity.

CUNCORD (add.) two towns, U. States.—1. Massachusetts, cap. on Middlesex on the river of its name and at the junction of several lines of railway 22 m. N. W. Boston. It possesses two churches, an academy and various other schools and a courthouse and a townhouse both handsome structures. Its manufactures and trade are unimportant. Concord figures both in the early wars with France and Spain and in the war of independence. Pop. 1844 8, cap. of New Hampshire, on the Merrimack and at the junction of five railways, 63 m. N. W. Boston. It consists of two distinct portions, formed by the Merrimack which traverses it from N. to S. The main village, situated on the W. or right bank of the river, contains a number of handsome buildings. Among these are conspicuous the state-house, which is built of granite, and is in a finely wooded park, the city hall, an elegant church, the Methodist Episcopal hall and the state lunatic asylum. One of the staple manufactures is carriage, for which Concord is long been famous. The other principal articles are woolens, cottons, cabinet work, cutlery, iron castings, and musical instruments. In the vicinity are extensive quarries of a beautiful white granite and granite which is largely exported. Pop. 16,896.

CUNCORDIA a town, La Plata, cap. of same name, r. bank Uruguay about 60 m. above Concepcion. Its inhabitants carry on a considerable transit and foreign trade. The principal exports are hides, tallow and yerba or tea. Concordia boasts of a flourishing free-school. About 20 m. higher up the river the navigation is obstructed by the Salto Grande, where for about a third of a mile the channel is covered with verdant slate and insubstantial rocks of a redish sandstone, over and through which the foaming waters dash with the greatest fury. Owing to the obstructed navigation in the last town of Entre Rios from which there is an uninterrupted communication with the towns of the Parana and La Plata. Pop. 2600.

CUNDAVILL (add.) a town, India, presid. Madras dist. and 52 m. N. W. Manipalpet. It stands at the foot of a range of hills, one of which is crowned by a picturesque fort, and was once the capital of a circle of same name. It is built into steeply sloping hills, which still surround it, inclose an area far larger than the inhabitants require for dwellings, and a considerable portion of it is therefore under cultivation. The houses are actually occupied by only a small portion at the foot of the hill. The only object of interest in the fort already mentioned which has an elevation of 1700 ft. above the sea, and exhibits in its remains a degree of architectural magnificence.

CUNDAVEED a ruined fort, India, presid. Madras, dist. and about 12 m. W. Guntur. It stands on a granite range of same name, at the height of 1000 ft. above the sea, and shows by the remains of fortifications, granaries, and

dwelling-houses, that it was of large extent, of great strength, and of sufficient importance to justify its selection as the capital of a state. During the hot season it recommends itself to the notice of European residents at Guntur by the grateful relief which it affords from the burning heat of the plains. When the hot wind blows the difference of temperature above and below is from 10° to 12° at other times the difference is 5° or 6°.

CONNELAUT a tn. U. States Ohio on a creek 2 m. from Lake Erie, at the junction of the railways from Cleveland and Pittsburgh to Buffalo. It contains a number of churches and schools, possesses a good harbour with a light-house at the mouth of the creek, and carries on an active trade, being the principal port for the produce of the adjacent parts of Ohio but also of a considerable portion of Pennsylvania. Pop. about 1500.

CONNECTICUT [add.] one of the U. States. The state established on Jan. 1 1864, 770 m. of railway of which 616 were completed, the total cost of construction and equipment being \$4,618,890. The value of the property in the state was estimated in the census of 1880 at \$22,567,107. The revenue for the year ending April 1 1883 (it including temporary loan) was \$240,180 and the expenditure \$218,011 and the state debt amounted to \$268,416. With regard to agriculture, there were in 1880 1,890,808 acres of improved land in farms and 673,457 acres of land unimproved. The number of horses was 83,376 at Sep. 117,100 milch cows 98,877; working oxen, 47,998 other cattle 9,173 swine 75,120. Of agricultural produce the state furnished, according to the returns of 1880—

Wheat	Barley	Potatoes	Indian Corn	Other Cereals	Hay	Timothy	Other
12,484,792	1,553,146	35,964	296,107	18,611	3,865,511	18,924	309,432
609,885	296,107	18,611	3,865,511	18,924	309,432		

The population of Connecticut by counties in 1880 is stated as follows—

Counties	Whites			Coloured	Total
	Males	Females	Total		
Fairfield	36,614	39,199	75,813	1,979	77,792
Hartford	44,627	46,543	91,170	1,819	92,989
Litchfield	23,001	23,506	46,507	1,131	47,638
Madison	14,711	15,791	30,502	887	31,389
New Haven	46,881	48,351	95,232	2,113	97,345
New London	27,089	29,595	56,684	1,144	57,828
Tolland	10,763	10,848	21,611	264	21,875
Windham	16,741	17,645	34,386	41	34,427
Total	221,568	229,098	450,666	862	451,528

CONNERSVILLE a vil U. States, Indiana, cap. en Fayette, on W. bank Whitewater R. and the Hamilton and Rushville railway of M. & E. Indianapolis. Among its public buildings is the courthouse, one of the finest in the state several churches, and two banks. The Whitewater Valley canal furnishes water-power and facilitates trade. Pop. 3119.

CONSTANTINE [add.] a prov. N. Africa, the most easterly of the three into which Algeria is divided, is bounded N. by the Mediterranean E. Tunisia and W. the prov. of Algiers, its N. limits are scarcely defined area, 68,860 sq. m. of which, however considerably more than a half belongs to the Sahara. The province is naturally divided by its physical features into three distinct parts, the N. slope, which sends its waters to the Mediterranean, the plateau forming the connecting link between the mountain chains and the slope southwards towards the desert. The principal streams, each watering and fertilizing a valley of greater or less dimensions are the Bedjan, which falls into the Gulf of Boughaia the Seybous, which is lost to the Lake of Boua, the Roumel and the Medjarda, which flows E. into Tunis. The soil in which, from the general prevalence of limestone calcareous matter forms a principal ingredient, is fertile and well adapted for the cultivation of grain, the vine, the olive and the date and numerous other fruits. Cotton also grows well. The most valuable minerals are iron, lead, copper, antimony and many beautiful varieties of marble. The only mines in working order however are the iron mines of Karama, from which

27400 worth of ore was raised in 1882 and the lead mine of Kefum Tebel, from which 211,000 worth of metal was extracted. Mineral springs, some of them thermal and of considerable celebrity occur in different localities. On the coast the coral industry is carried on with some success, yielding an annual return of about 270,000. Railways are contemplated connecting Mafif Boughaia Fil Philippeville, Constantine, and Bone but the portion between Philippeville and Constantine is likely to be the first constructed. The proposed lines are portions of a system designed to run parallel with the coast 80 or 40 m. inland from the frontier of Morocco to that of Tunis, with branches to the principal places on the sea-board. The administrative division like that of the other provinces of Algeria, is into military and civil the former consisting of four subdivisions and the latter forming three arrondissements, of which Constantine Bone and Philippeville are the respective capitals. European population of the army 37,883; native pop. about 1,014,211.

CONSTATINOVSKAYA a tn. Russia gov. Don Cosakos r. bank Don. It is the seat of the civil authorities of the first district of the gov. and has three yearly assests. The town is extensively cultivated in the vicinity. P. 4242.

CONSTITUTION [add.] a seaport in Chittagong prov. and at the mouth of the river Maule 160 m. S. by W. Val paraiso. It sits on the N. bank of the river at the bottom of an amphitheatrical basin and owing to its advantageous site has more than doubled its population within twenty years. It has at length assumed the appearance of a compact and well-ordered town and contains a number of handsome residences though the majority of the houses continue as before of one story and have a rather mean appearance. The streets, however though not paved are spacious and either parallel or at right angles to one another. On the plain situated very centrally are the church barracks, and prison all of them of too humble a character to deserve special notice. Abundance of timber along the banks of the Maule a good harbour at its mouth and a shipping basin for launches ways offer inducements to shipbuilding. Of these advantages have been taken and shipbuilding is carried on to a considerable extent but the chief trade is weaving and preparing the timber which is floated or otherwise brought down from the interior. The coasting trade is considerable but the foreign trade is very insignificant. The principal articles sent coastwise or to other ports are sheep, beef, butter, barley, wheat, tallow and oil. Pop. upwards of 4000.

CONVILLE a tn. British America Canada E. co. Verébères r. bank St. Lawrence 16 m. N. W. Verébères. It possesses a R. Catholic chapel and several schools but cannot boast either of its manufactures or its trade. P. about 1000.

COOK'S ISLANDS [add.] a group, S. Pacific Ocean between the F. and Society Archipelagos consisting of nine or ten islands, including Karotonga one of the principal stations of the London Missionary Society pop. 5000. Mangapa pop. 5000 Atulaka 1400 Atua 1000 Mitaka 250 Maaki 800. The islands are much frequented by whale ships for fresh provisions. They receive their name from their great discoverer.

COOK'S LAND [add.] This district was now included in the colony of Queensland (which see in this Supp.).

COOMBLA or **COOMPTAH** a tn. India, Madras, dist. S. Canara, 19 m. S. Mangalore. It stands on an elevated peninsula which runs to a salt-water lake formed by a sand-spit di. Miling it from the sea. Two rivers discharge themselves into the lake and in the rainy season their waters make the lake fresh. Formerly a bridge over the narrow inlet which connects the lake with the sea linked Coombla with the opposite town of Kanayapur. The fort occupying a lofty spot, has a fine situation but the town is now much decayed.

COOMPTAH a tn. India, presid. Madras, dist. N. Canara, 100 m. N. W. Mangalore. It stands about a mile E. of a creek on the coast which forms its harbour and was a place of consequence till it was pillaged and burned by the troops of Hyder Ali. After a long period of desolation it began to revive, chiefly in consequence of the rapid extension of cotton cultivation in the district. Handsome dwellings and warehouses have been built at it by native merchants from Bombay and its port, which was formerly dull,

is now in the shipping season the scene of great commercial activity. The export of cotton which is brought down from Ballary and the Mahabita country for shipment has become a large and important trade. Pop. 6888

COONDAPPOOR is a town, Madras, dist. N. Canara, 205 m. N.W. Bangalore. It stands on the S. side of the estuary of five rivers which flow down from the Ghats; the estuary, however, is very shallow and navigable only by small vessels and canoes, which ascend the Cheekur River 10 m. to Wender. The country around is very beautiful and an old fort with outworks stands in a fine position a little inland. Salt is manufactured by evaporation of sea-water.

COOLIER or **YICHOIA** (native *Yichoi*) a port, New Zealand Middle Island or Munster on the N.W. side of Banks Peninsula. It is formed by Godley or Cook's Head on the N. and Tokai Head on the S. and lies at the entrance a width of 1 m. which is maintained as far up as the town of Lyttelton, situated on the N. shore of a small bay 4 m. within the Heads. At the anchorage off Lyttelton the depth is only 24 fathoms. Port Cooper is easy of access in most weathers, except N.W. gales, which blow down it with great violence. There is also a considerable swell in N. winds.

COOSSY a river India, pres. Bengal which rises in dist. Rangpur about lat. 23° 35' N. lon. 85° 58' E. flows easterly S.E. to Midnapore then nearly due E. then again S.E. and joins the Hooghly on its R. bank where it begins to sail a narrow barbed estuary. Its whole course is 90 m. During the dry season it is generally fordable.

COOFA a river India, which runs along the snowy peaks of Mount Gannath, which reaches the height of 24,000 ft. near the N. frontier of Nepal flows easterly S.E. to the British frontier and, crossing it continues nearly due S. across the alluvial district of Purnea to its junction with the Ganges. Its principal affluents are the Arun and the Tambar both of which receive on its left as Nepal and the *Coopare* which joins it on its right only 10 m. above its mouth. In descending from the mountains, it forms three cataracts or rather rapids. In Bengal it throws off numerous branches, but still continues a large stream with a channel from 1½ to 2½ m. wide.

COPACAVANA a town La Plata, on the W. frontiers of prov. Catamarca and the eastern slopes of the Cordillera, lat. 29° N. lon. 65° 30' W. It occupies a long stretch of ground, and is a well built flourishing place, of cheerful appearance, with numerous fine gardens and vineyard, and an extensive trade in cattle, chiefly with Chili, being the chief and natural entrepot for the traffic across this part of the Cordillera.

COPALPO or **SAN FRANCISCO DE LA SIERRA** [add.] a town, Chili prov. (Quinquema) about half way between the Andes and the Pacific lat. 27° 20' S. lon. 72° W. It consists of the town proper and two suburbs one at the E. and the other at the W. extremity. The E. suburb is a wretched place, consisting of mean huts occupied by the poorest classes. The W. suburb is composed of elegant houses and villas with fine gardens attached to them. The town proper is in the form of a rectangle, extending a considerable distance from E. to W. with a comparatively narrow breadth, and consists of a spacious plaza and four long streets, crossed at right angles by about twenty avenues or lanes. Owing to the frequency of earthquakes, the houses are of slight construction, being composed of wood fastened with cane and covered over with two successive coatings of mud and another of lime. Slight as the construction is, it answers well in a climate where little rain falls and has therefore been employed in several public buildings, among others the principal church which in consequence, has all the appearance of a mere temporary erection. In the plaza near to the church is a bronze statue erected in 1851 in honour of Juan Godoy for his discovery of the silver mines of Chacabuco in 1832. The only solid structures of any importance is an old church whose low and massive walls have been enabled it to withstand the most violent shocks of earthquakes. Copapo mines among its industrial establishments iron foundries and factories for crushing mills and other machinery employed in working the mines, and is enabled to carry on a considerable trade by means of its port of Caldera, situated about 30 m. W. on the Pacific, and now connected with it by railway. Pop. about 15,000

COQUIMBO [add.] a port and seaport in Chili.—The province contains, besides Coquimbo the ports of Guayaque, Tongay and Totorillo but vessels bound to them must first touch at Coquimbo or some other chief port of the republic. The copper ores of it are very abundant, but not sufficient for the requirements of the smelters, and consequently large quantities are imported from the north of Chili and from Bolivia, and coal is likewise brought from Concepcion and Lota. The chief branch of industry in the province is the mining and smelting of copper. In several smelting establishments wood is used for the fire but coal is burned in all the large works. The productions of the mines and smelting-works is shown in the following returns for the year 1864:—

Name of Mine.	No of Men employed.	Quantity of Ore raised.	Value of Ore.
Pique	800	Tons, 8 000	£ 135 000
San José	450	11 400	135,600
Ballalier	250	400	51 000
Panuelillo	604	36,000	120 000
Total	2000	56 000	416 000

Name of Works.	No of Men employed.	Ore smelted.	Copper produced.	Value of Copper.
Guayaque	94	Tons, 44 000	Tons, 18 000	£ 600 000
Coquimbo	13	23,325	8 000	944 000
Compelia	7	16 840	1,5 5	100 000
Panuelillo	9	36,550	1,000	136 000
			Regalia of 15 p.c.	
Total	63	110,915	19,5 5	1 880 000

A railway was opened in 1862 40 m. in length connecting Coquimbo and Barrera with Las Cardas and the mine in the interior the plant employs 400 men, being all English. An extension of the line from Las Cardas to Iquimilto 18 m. is being made and cart-roads are under construction from Barrera to Higuera a distance of 10 m. from Panuelillo, which altogether will give considerable impulse to the mineral trade. Pop. (1854) 110,630.—The town is to be supplied with water by the railway company who has contracted to build a reservoir with filtering appliances, and French water gratuitously to the inhabitants. An English contractor is also engaged in the erection of gas-works for Barrera. The nature of the country and climate is unfavourable to agriculture, but some fine farms and gardens in the neighbourhood of Coquimbo are made productive by irrigation by means of a canal communicating with the Coquimbo River.

The following table gives the statistics of British and foreign shipping in the port of Coquimbo in the years 1863 and 1864 showing a large increase in the latter—

	British.		French.		Chilian.		Total.	
	Vols.	Tons.	Vols.	Tons.	Vols.	Tons.	Vols.	Tons.
1863	42	16,464	11	8 872	410	102,002	463	125,940
1864	60	27,456	14	7 9	611	77 404	685	111 967

The Pacific Steam Navigation Company's vessels touch at the port eight times a month, but are not reckoned in the foregoing statement.

The cargoes entered at the port consist chiefly of coal and materials for mining and smelting purposes; the cargoes outward comprise copper in ingots, bars, regulus and ores, small quantities of silver and cobalt ore, hides &c. The following table exhibits the value of the imports and exports in the years 1863 and 1864—

	Imports.		Exports.	
	1863.	1864.	1863.	1864.
£	£	£	£	£
England	57,060	87,154	640 610	815,718
France	1,284	290	106,417	125,640
Banahua			14 019	85,964
United States	7 125	10,877	17,299	109
Bolivia	3 028	80,516	116	963
Peru	925	827	1,273	4,308
Total	63,070	148,911	960 625	979 776

CORDOVA [add.] a tn. La Plata, esp. prov. of same name on the S. side and about $\frac{1}{2}$ m. from the banks of the Frías which here bends round N.W. to N.E. and half a mile to the S.W. lat. 81° 20' 15" S. lon. 66° 46' 21" W. Cordova is the largest and most important place in the interior of La Plata and is built, according to the old Spanish fashion, in regular streets crossing each other at right angles, and usually terminating in a large central square. The principal buildings are the cathedral on a neat and venerable structure situated on the W. side of the plaza, built by an Italian in the Renaissance style with a richly decorated front, two towers and a dome and generally regarded as the finest church which La Plata possesses, the church of Santa Catalina, attached to a large and wealthy monastery of same name, which is occupied by about 40 nuns belonging for the most part to wealthy families, the monastery of Santa Teresa, with 20 nuns, the three monasteries of St. Francis, La Merced and St. Domingue the first with a fine new church attached the second old and in a somewhat dilapidated state but remarkable for the solidity of its structure, and the third completely by its two towers; the university occupying the extensive buildings of the old Jesuit college and provided with a rector and six professors, the Cabildo the orphan hospital and the infirmary. Cordova, which long figured as the ecclesiastical metropolis of S. America, still retains much of its original character. All the buildings of note, and all the endowments, are more or less clerical, and the clergy or their connections and dependants form by far the most influential and by no means small numerical portion of the whole community. The trade though only transit, is very important, as all the traffic of the W. and N.W. provinces must pass here on the way to Santa Fe and Rosario. At present the only mode of conveyance is by ox-waggon or mule, but it has been proposed to connect Cordova with Rosario by a railway. Could this be done, there cannot be a doubt that a vast increase of traffic would ensue. The province, which exported in 1856 about 304,000 lbs. of wool in 1863 exported 912,600 lbs. The pop. of Cordova is so uncertain that it is estimated variously from 16,000 to 40,000.

CORMANTYK [add.] a tn. and ruined fort. W. Africa on the Gulf Coast, in the Gulf of Guinea, about 12 m. E. Cape Coast Castle. The fort is in the form of a square, about 100 ft. on the side, with bastions at the angles and an outwork which seems to have been a parade-ground or the place where during the slave-trade, the slaves were given air and exercise. On the S.W. side there is a tower 146 ft. high and a series of apartments in a state of ruin. The inside of the fort is filled with weeds and rubbish. The fort though said to have been the first built by the British on the Gulf Coast, fell into the hands of the Dutch who gave it the name of New Amsterdam and continued in possession of it till 1807 when it was plundered by the Ashantis. The native town which stands at the corner of a range of high ground is a large and populous place, with nothing remarkable except the great size of some of its trees.

CORNING a tn. U. States, New York on the Chemung River and on the New York and Erie, the Corning and Bleeckerburg and the Buffalo, Corning, and New York railways, 200 m. N.W. New York. It is pleasantly situated at the foot of a hill contains six churches a distillery a tannery two furnaces and several mills and carries on an active trade in coal and lumber. Pop. 8626.

CORNWALL a vil. U. States, Connecticut, about 2 m. E. of the Housatonic railway 40 m. W. by N. Hartford. It owes its chief claim to notice to its foreign mission-school which was founded in 1816 for the purpose of training native converts from paganism and making them fit to become missionaries to their countrymen. In one year 19 of the students were American Indians, and 10 natives of the islands in the Pacific. Pop. 3041.

CORNWALL, a tn. British America Canada West, esp. of the united counties of Stormont, Dundas and Glenbury 1 bank St. Lawrence, contiguous to a station of the Grand Trunk railway 6 m. S.W. Montreal. It possesses six churches—Church of England Church of Scotland Free, Wesleyan Congregationalist, and E. Catholic—a grammar school a weekly newspaper tanneries, foundries and flour mills, and saw mills, and, being a port of entry commands

a considerable trade, particularly in flour the boats of the through and American lines between Montreal and Hamilton and those of the Montreal and Kingston line sailing daily. The Longue Point Rapids, immediately above the port, are avoided by a canal, 12 m. in length. Pop. about 2800.

COROMANDEL [add.] a settlement, New Zealand New Ulster or North Island, on the E. shore of the Firth of Thames, 30 m. N. by N. Auckland. It possesses a tolerable harbour for small vessels, and is the centre of a large and flourishing timber trade the kauri pine and other valuable trees being here fine and abundant. Gold has been discovered in the neighbourhood.

CORSEICA [add.] an isl. and dep. France. The natural products of Corsica are beautiful and various, the summits and sides of the mountains are covered with extensive forests of Corsican pines, evergreen oaks cork trees beeches, and chestnuts. In other parts the hill-sides are overgrown with dense thickets of elms myrtles, arbutus, and other shrubs. The state holds about 100,000 acres of forest the communes 129,200 acres and private proprietors, 40,500 altogether about 279,700 acres. About two-thirds of these forests consist of resin-yielding trees many of the largest pines measuring 12 1½ and 13 ft. in circumference, and from 140 to 160 ft. in height. The falling of timber commenced only about 1853 but has already become a valuable business, as has also the extraction of resin.

Agriculture in no means keeps pace with modern improvements, and the island scarcely produces corn and grain sufficient for six months supply of its population. The construction of roads, the draining of marsh lands and abatement of water, especially on the east coast, the greater facility of communication with other countries, and the steady though slow increase of the population are tending to a better state of things. As yet, however, large tracts of fertile land remain uncultivated and implements are of a rude sort. The land is greatly subdivided almost every peasant possessing a small holding; a tract is farmed out for a certain period the peasant provides the labour the proprietor the seed and the produce is divided between them.

The chief towns in the island are now connected by good roads 568 m. of good roads were open to traffic at the beginning of 1863 and 124 m. more were under construction the total expenditure upon them having been £180,250.

The formation of the new port of Bastia was authorized in 1863. It will extend before the new quarter of the town to the north of the old port, hug an area of 4½ acres and a protecting mole 768 yards in length. Improvements are also being made at other ports.

The number of vessels entering the ports of Corsica from foreign places more than doubled during the ten years from 1811 to 1861. In the former year, 18 vessels of 68,600 tons entered and in 1861 2006 vessels, of 140,796 tons. The few British vessels that frequent the Corsican ports generally bring coal to them for steam purposes.

The value of the imports and exports has gradually increased as appears thus:—

Imports.		Exports.	
From France.	Other countries.	To France.	Other countries.
1858 6266,541	428 37	236,878	238,441
1859 621,188	90 04	30 206	32,441
1860 624,828	130 138	247 961	30,206
1861 706,579	169 081	251 821	218,200
1862 722,419	187 082	314,151	148,919

The total value of the imports in 1863 was £1,022,154 and of the exports £245,400. The trade at the port of Bastia alone in 1863 amounted to £244,400 in imports and to £165,696 in exports.

The state of Asiatic cholera the capital of the island, and containing about 14,000 inhabitants, is exceedingly equable and salubrious and is highly recommended for sufferers from pulmonary disease but the total want of proper accommodation unfit it at present for a residence for strangers.

The population of the island at the last census (1861) was 252,884.

COSALA [add.] a tn. Mexico state Chinaloa at the foot of the Sierra Madre 80 m. N. by W. Mexcala. It depends partly on its name, which are still extensively worked, and partly on trade. Pop. 4000. A little to the S. is another mining town called Copala with a pop. of 1200.

COTAGATTE, or **SANTIAGO DE COTAGATTE** *Atn. Bolivia*, pop. and 15 m. N.E. Potent placidly situated in a beautiful dampy *Atn. Bolivia*. It contains several broad streets lined with superior houses an imposing cathedral adjoining a capacious square and one of the largest and best post houses in Bolivia. It is situated, however to sudden inundations. In the vicinity is a large extent of well-cultivated ground.

COTAYAM or **KOTAYAM** *Atn. India, presid. Madras, dist. Travancore*, 24 m. S.E. Cochin. It is built along the banks of the Mambal which falls into the lake or back water of the Mambal a few miles below. It is defended by a small fort situated at the N. extremity and has in the same locality a small square of houses, where a weekly market is held and some trade carried on. The Syrian Christians (comprising the main body of the inhabitants) consider Cotayam as the principal seat of their religion, and has a several large churches in the neighbourhood. The Church Missionary Society has long had a station here; and with the view of aiding in the instruction of the Syrian population generally a college was erected and liberally endowed by the late prince. Her mission is unfortunately of a different spirit, and disconcerts every species of improvement or reform. The scenery of the surrounding country is very picturesque.

COTEAU the name of three places *British America, Canada, East*. 1 *Coteau du Lac*, a vil. co. Roulegue, 1 bank St. Lawrence, within a short distance of a station on the Grand Trunk railway 35 m. W. Montreal, with a 1-roomed inn and a Catholic chapel. Pop. about 600. 2 *Coteau Land up* also co. Roulegue, about 5 m. from the former and with nearly the same pop. 600. 3 *Coteau de la* is situated near the E. end of Mount Royal on the island and 5 m. from the city of Montreal. Many of the inhabitants find employment in the extensive quarries of limestone in the vicinity. Pop. about 2000.

COTTIAR KOTIAR, or **KOTIAR** *Atn. Ceylon*, a little E. of the mouth of the Mahaweli Ganga, on the N. side of the bay and 12 m. S. of the town of Trincomalee. It was a place of importance in the 16th and 17th centuries, when it carried on an active trade with India. In 1512 the Dutch by permission of the emperor of Candy erected a fort here and in 1515 they led from 80 to 100 Europeans employed in building roads and other works from the Coromandel coast to exchange them for arca, nutra, pulvina sugar and timber. The surrounding district was full of villages and rich in arable and pasture land, and carried on a large trade both export and import. Within less than a century all this prosperity ceased. Cotton did not as Trincomalee rose and its population so much decreased that it was seriously proposed to enclose it from Java or China. At present its chief inhabitants are laborers. One thing for which it is still remarkable is the use of its oysters. One of these measured by Ser. E. Tennant was 11 inches long by half as many broad.

COLDERS [add.] an *ad. British America, Canada, East*, in the St. Lawrence, and (with the exception of Orleans) the largest in that river below Quebec from which it is distant 54 m. N. E. It is 6 m. long by 2½ wide, is lined on its S. side by rocky shoals, which stretch out fully a mile from the shore but on the N. side presents a bold coast for 3 m. to the westward of Prairie Bay though the elevation neither there nor in any part of the interior exceeds 200 ft. above the sea. The rocks are composed of gneiss and slate, the soil is tolerably fertile and well cultivated and the whole island, forming a distinct parish contains many inhabitants as it is able to support. Prairie Bay on its N. shore is completely sheltered from easterly winds, and has deep and spacious anchorage.

COUNTRY HARBOUR, *British America*, is the finest which Nova Scotia possesses to the E. of Halifax. On the E. side of the channel leading to it is a bold and precipitous headland of clay-stone in nearly vertical strata 160 ft. high. Its surface is 600 yds. wide and 11 fathoms deep. Beyond it across its width from a third to a half of a mile, and in depth from 10 to 5½ fathoms. Its whole length is about 5 m. The shores on either side are steep, and increase in altitude towards the interior till they attain the height of 470 ft. near the harbour head. The population, thinly scattered along the shores, have employed themselves in lumbering and the fisheries, to the neglect of agriculture.

COURTALLUM *Atn. India, presid. Madras, dist. and 31 m. N.W. Tinnevely* a few miles S. of the Aringay and Alchoron Passes in the mountains which separate Tinnevely from Travancore. Its site is at the height of 700 ft. above the sea, and is the direction of the current of air which flowing through the mountain passes, maintains a delightful coolness, points out this as a 1 mile admirably adapted for invalids. Its scenery also is of its most picturesque description, presenting along with the most luxuriant vegetation, a series of magnificent cascades the lowest of which descends 175 ft. by two successive leaps of nearly equal height. In the vicinity there is a beautiful pagoda, much visited by Hindoos, who ascribe a peculiar sacredness to the whole place, and have hence given it the name of Tencau or Southern Benares.

COURTNEY *Atn. India, presid. Madras, dist. and 10 m. W. by N. Bellary*. It is a place of considerable and quite surrounded by a wall of mud and stone, with stone gateways. A large part of the space enclosed is covered with ruins; the present inhabitants occupying not more than 200 houses, and employing themselves chiefly in agriculture, but partly also in the manufacture of saltpetre. The Bimling Stenoos, for which the vicinity of Courtney is famous, are angular and globular masses of a large greenish-blue dyke which from their peculiar positions and the nature of the rock give a sharp ringing sound when struck.

CIVINGTON [add.] two places *U. States*. 1 *A. to Kentucky* on Kenton, on the Ohio R. or opposite to Cincinnati of which it may be considered a suburb and upon railways connecting it with Lexington and Louisville. It stands in an extensive plain and is regularly laid out after the plan of Cincinnati. It contains 10 cl. churches two banks, a city hall and well endowed Baptist college and has manufacturing of cotton, hemp, silk, and tobacco on iron-rolling mill and an establishment for picking beef and pork. It is also the residence of many persons whose business is in Cincinnati. Pop. (1860) 16,412. 2 *A. to Indiana* rap to Fountain, 1 bank Walush River and on the Walush and Erie canal 73 m. W. N. Indianapolis. A bridge is built across the river. Large quantities of grain are shipped here by the canal and in the vicinity coal and iron are abundant. Pop. 1860 1000.

CWITCHEN R. a large val. and river in the S.E. of Vancouver Isl. 4 m. W. of the R. port of Admiral Isl. The harbour which lies about 25 m. northwards from the capital Victoria is not of great importance, except as giving access to the fertile valley of the same name which runs back from it in a W. direction. This valley is very extensive, and calculated to contain 40,000 or 45,000 acres of excellent agricultural land the soil being a rich loam 3 or 5 ft. deep. The climate also is equable and temperate, and many varieties of fruits and plants grow wild. Through the valley runs the C. Witchen River issuing from a lake of the same name 24 m. inland, and emptying itself into the head of the harbour for some miles it is navigable by canoe. The valley is peopled by a tribe of Indians bearing the same appellation who however are indisposed to the settlement of strangers in it, and are a somewhat unmanageable community.

COWLOON or **KOWLOON** a dist. China forming a peninsula at the mouth of the Canton River province of Guangdong, directly opposite to the island of Hongkong, of the harbour of which it also forms the northern shore. It was ceded to Great Britain by the convention of Peking concluded on 24th October 1860 between Lord Elgin and Prince Heng, and was formally taken possession of, on behalf of Her Majesty on 18th January following. Its acquisition had been rendered a desirable object in consequence of its being the favourite resort of pirates and other desperadoes, who it is to be hoped may now be rooted out and suppressed by the vigilance and energy of the British authorities.

CRAB, *British America*, or *Virginia* *Atn. India* [add.] West Indies one of the Passage group of the Virgin Islands is 16 m. long from E. to W. and from 2 to 4 m. broad. A ridge of small hills runs nearly its whole length along the middle of the island, rising to a moderate height at its E. W. end. The E. end is low. The S. side has several small bays, of which Dances and Bowd or Settlement Bays afford tolerable anchorage with sandy bottoms. On the N. Port Mule is formed by an abrupt bend of the shore from E. to N.; it is a small bay,

and at the mouth of a small stream on its E side is the village of Isabella II. The island is a Spanish possession attached to Porto Rico and has several estates upon it producing sugar of which about 8000 tons are said to be shipped annually.

CRAOW [aid] a tn Austrian empire, Gallic, cap gov and circle of same name, on a plain surrounded by gently rising hills, 1 bank Vistula, here crossed by a newly erected bridge, and on the railway to Breslau 300 m N.E. Vienna. It consists of the town proper and of seven suburbs is the seat of important government offices and courts of justice, of a general Protestant ministry and of a Roman Catholic bishopric. Among its 40 churches notice is particularly due to the cathedral which was founded in 1269 by Casimir the Great and occupies a beautiful site on Mount Wawel. It has 26 beautiful marble altars the silver tomb of Stanislaus, a shop of Casimir who suffered martyrdom in 1078 and fine monuments of the Polish kings who reigned between 1163 and 1788 of several bishops and of the three greatest Polish generals Sobieski Poniatowski and Kosciuszko. The most remarkable of the other churches are—St. Mary's built in 1226 and adorned with fine glass paintings and wood carving of the 15th century the church of St. Anna with the tomb of St. John of Nepomuk and a monument to Copernicus St. Peter's and St. Paul's church, with the tombs of the Branicki family and the Franciscan church, which was built in 1237 and possesses fine paintings. The other principal buildings and establishments are the royal palace immediately adjacent to the cathedral on the large Kiloplatz, built by Casimir in the 14th century and completed in 1848 into a strong castle with barracks and military hospital the university with a library of 42 000 vols. and 2200 MSS. the government house and offices the observatory and botanical gardens the technical institute, the painting and music schools, the upper gymnasium the ecclesiastical seminary the industrial commercial Jewish and infant schools, 8 monasteries and 9 nunneries a house of correction and 4 hospitals. The manufactures consist chiefly of agricultural implements woollen and linen cloth leather &c and an active trade is carried on in wood iron wine, silk, linen and fat cattle. On an artificial hill near the town which has a height of 800 ft. and used to bear the name of Kosciuszko a strong fort has been erected. Craow has recently been laid in ashes both by casual conflagrations and by enemy fire—the latter particularly in 1902 when attacked by the Bohemians in 1241 by the Moengels in 1640 and 1657 by the Swedes under Gustavus, in 1857 by the Habsburgers under Rakoczy and in 1902 by the Swedes again under Charles XII. A congress of princes held here produced the abdication of Casimir the Great in 1368. Pop. 41 096 incl. a c. of military.

CRAIGLEITH a vil British America, Canada West near the E extremity of the Georgian Bay an eastern branch of Lake Huron. It stands about 6 m from Collingwood at the foot of Blue Mountain the highest ground in Canada West rising 1600 ft. above the sea, and commanding a magnificent view. The inhabitants are employed either in fishing or in the excellent stone-quarries for which the Craigleith of Canada like the Craigleith of Edinburgh is celebrated.

CRAUP an isl British America, Canada East lying in the St. Lawrence between the Middle and the South Towns, 84 m below Quebec. Being bound by low meadow land to Goose Island about 2½ m below it is properly only one island with it, and thus the two with the connecting meadows, form a long and narrow belt of land 10 m long and parallel to the right or S.E. bank of the river. Taken by itself Crane Island is 8½ m long is densely wooded on its S.W. side, and on the N side where there is a village and a church it is in a good state of cultivation and rises into a ridge of granite and slate. The meadows connecting it with Goose Island feed great numbers of cattle. (See Goose Is. art.)

CRESPIADORO a tn Austrian Italy prov and 17 m W W Vienna, on the Champ; with a parish church and large stone quarries, and 2348 inhabitants.

CRETE (aid) an isl Mediterranean. The staple produce of the island is olive-oil. Cotton, from American, but chiefly from indigenous seed, has been grown of late years, the quantity produced in 1863 being about 1170 cwts.

and in 1864 2000 cwt. A number of coffee-trees was imported by the pasha from Mecca in 1864 as an experiment and an attempt is also being made to introduce oysters which did not previously exist on the coasts by laying down some beds of them in Suda Bay and elsewhere.

The foreign trade of the island amounted in 1863 to 2399 091 in imports and 2401 417 in exports and in 1864 to 2344 407 imports, and 2446 780 exports. The principal articles imported and exported in 1864 were as follows—

Imports.		Exports.	
Rubber	41 231	Olive-oil	2118 000
Manufactured Goods	239 240	Sugar	170 800
Nickel	10 780	Silk	19 000
Lobacco	20 74	Cocoa	16 734
Wheat, &c	80 000	Cotton	4 627

Of the shipping frequenting the various ports of the island in 1864 there entered the port of Lasea 514 vessels, of 90 391 tons, and a 474 vessels of 81 423 tons and 202 218 vessels, of 17 473 tons. These figures are likely to be increased in the course of 1865 by a recovered line of steamers between the island and Greece, and a project to open steam communication with Egypt. The port of Matame has been improved and improved by dredging and the same operation is being performed at Candia.

CRUSS LAKE, British America, between Cedar Lake on the W and Lake Winnipeg on the E, in the northern extremity of the Mackinac River, the waters of which become, as it were, altered in it before it reaches the lake. It is an oblong sheet of water about 8 m long from N to S by 8 m broad and has its greatest length nearly at right angles to the course of the river which just before entering it is obstructed by a band of limestone lying across its bed and forms what is called the Cross Lake Rapid. This obstruction the first of any magnitude which interferes with the rapid flow of the river produces a descent of 54 ft. in a short distance. The Hudson's Bay Company's boats carrying about five tons are only enabled to ascend it by digging the load, and taking it up at two successive times. Loaded boats descending run the rapid without difficulty. The case is different with another rapid of a more formidable character called the Grand Rapid, which occurs after the river issues from Cross Lake, and is about in pour its waters into Lake Winnipeg (which see).

CSABIA a tn Austrian empire, Hungary co and 9 m E Pesth on the wooded outline of the Pál Mountains it has an archiepiscopal palace with gardens. There appears to have been a Roman station here. Pop. 1200.

CSAI RING a tn Austrian empire, Hungary co Oedenburg cap dist. of same name on the Rapp, with a court of justice two churches a castellated mansion and a tide in wine and wool. Pop. 2419.

CSAKUTS a tn Austrian empire Hungary co Bashmar in the Banat, 3 m N.W. Sathmar & much with a castle and a distillery and 263 inhabitants mostly belonging to the Reformed church.

CSILRETFAIU a tn Austrian empire, Hungary co. Borsod about 10 m S.W. Miskolcz. The inhabitants belong mostly to the Reformed church and has a quarry of marble and limestone. In a romantic valley in the vicinity are the ruins of the old castle of Odor. Pop. 2450.

CSIKSANKA a tn Austrian empire Hungary co Vasprim on the road to Raab. It has a trade in excellent fruit and tobacco. In the vicinity are the ruins of a castle built in 1314 by Sigismund Gara. Pop. 1120.

CSOKULY a tn Austrian empire, Hungary co. Somogy not far from Atad, with a trade in flax and well-attended markets and 2020 inhabitants.

CSONOPOLJA a tn Austrian empire Banat, circle and 19 m S by E Zombor with a trade in corn and cattle, and 511 inhabitants.

CUCULLI a tn South America, La Plata, prov of Salta. Approached across a flat and uninteresting country it stands out in bold relief against the blue horizon having from a distance, in consequence of the regularity of its shape and the uniformity of its build a good resemblance to a fort. The streets crossing at right angles form regular blocks of the houses, which are for the most part solidly built of brick while the ground plan is occupied by an imposing cathedral and several other large buildings of some architectural pretension. In other parts of the town are

chickens with peated spires, the Tambos, a large hotel not unlike a monastery and shops well supplied with almost every species of goods. The market held in the plaza is, on market-days, crowded with huge waggons from the country some of them filled with butcher's meat, and others with pumpkins, water melons, and various other kinds of fruit and vegetables.

CUDDAIAH or KURPA [add.] a dist. and its capital. India. *presid.* Madras. The tract lies between lat. $13^{\circ} 5'$ and $14^{\circ} 30' N$ lon. $77^{\circ} 45'$ and $78^{\circ} 50' E$. It is bounded N. by Kurnool and Gundoor E. Nellore and N. Arcot, S. North Arcot and Mysore, and W. Bellary and Kurnool area. $12,970$ sq. m. The mountains form an interrupted chain of great extent rising abruptly from the plains, and traversing the district throughout its whole length in continuous and parallel ridges. About 30 m. E. of Cuddapah these mountains become linked with the Eastern Ghats. The E. and W. ranges consist chiefly of gneiss, overlain with sandstone and argillaceous and intersected by veins of granite. They form long ridges, some of them bare backed and ribbed with ridges deeply excavated by mountain torrents, and thus presenting an unbroken abutment of perpendicular precipitous from 40 to 60 ft. high and having all the appearance of gigantic artificial walls. The N. ranges consist of granite, with gneiss and mica slate, all more or less in a state of decomposition. They are usually of a conical form, are often isolated, and are either steeply truncated or terminate in precipitous peaks some of them 3500 ft. high. In other quarters sandstone prevails, with a structure varying from quartz rock to conglomerate and loose grit and sometimes finely variegated. It usually rests on limestone of a deep blue colour which cuts easily and is often employed as a coarse marble. The sandstone conglomerate is the matrix of the diamonds which are found about 7 m. N.E. of the town of Cuddapah. The mines are still worked, but have a latterly proved by no means profitable. On the surface of the limestone in the plain around Cuddapah large accumulations of berrillite and fluorine iron ore are found. Soda, saltpetre and common salt are found in great abundance in a sandy ferruginous clay. The district is drained almost entirely by the Pennar and its tributaries of which the most important are the Sengalur the Cheyarr and the Papayay. The soil of the plains in the W. and N. is the rich black loam celebrated for the production of cotton. In the same soil wheat and indigo are largely cultivated. The other principal crops are rice and dry grasses such as cholam, raggi &c. In gardens, particularly those around the town of Cuddapah, sugar cane, tobacco, turmeric and betel are grown. As there are few forests, wild animals are not numerous. The characteristics of the climate are intense heat by day and a stifling stagnation of air at night. Against these European constitutions are ill fitted to contend. Pop. $1,451,921$. — The town also called Kurpa, lies 140 m. N.W. Madras on the Boga. Though a place of great consequence in the time of the Hindoo rajahs of Bedjanagur most of its public buildings are in ruins or appropriated to new purposes, and the houses still occupied as a native town are in the majority of cases merely mud built of a wretched description. The fort, inclosed by a dilapidated mud wall with round turrets and stone towers, contains the palace and the buildings of the Patna rulers of Cuddapah. Its moats in good repair but the other parts or rather the site on which they stood is now occupied by the civil october treasury jail and post office. The palace of the nabob situated close to the pettah now exists only as a mud fort. The important station attaching to Cuddapah at present is almost entirely derived from the cantonment, which is about 3 m. to the E., and separated from it by the river. Its barracks and hospital are substantially built of brick and stone, and covered with tiles. The principal products are cotton wheat and indigo besides sugar cane, tobacco, turmeric, and betel which are grown in the gardens.

CULIACAN [add.] a *tin.* Mexico. *rep. state* Chimalco. A river of same name, which falls into the Pacific at Altate, about 26 m. below. It occupies the site of the old city of Huemaculhuacan, which is famous in Mexican history on account of regular streets, which run in parallel lines or transversely from the public square which is surrounded by a fine colonnade, and contains among its edifices a cathedral

of large dimensions, decorated within with fine paintings, but wearing an old and dilapidated appearance; a mint, a modern erection which cost about $\pounds 70,000$ and a magnificent club-house where billiard gambling forms a favourite pastime. Most of the inhabitants are interested in the working of the gold and silver mines in the vicinity which still continue to be worked to some extent, and with considerable success. Lima or Mosquera wood which grows all along the ranges of the Sierra Madre, and is exported as the little report of Altate, is the principal article of trade. Pop. 9850 .

CUTLUMA or COLUMA, a *tin.* U. States. California, on the S. fork of American River and on the road from Sacramento to Nevada 56 m. E.N.E. Sacramento. In the vicinity is a number of saw-mills, one of which, called Butler's mill is remarkable as the spot where gold was first discovered in California.

CUMBERLAND a *tin.* U. States. Maryland cap. of Alleghany 1 back Potomac and on the Baltimore and Ohio railway 120 m. W.W. W. Baltimore. It contains several churches a courthouse, and other county buildings, and carries on an active trade, particularly in coal and iron, which are extensively worked in the vicinity. Next to Baltimore Cumberland is the largest town in Maryland. Pop. 6078 .

CUMBERLAND a territory British America on the northern shore of Lake Winnipeg extending between lat. 52° and $56^{\circ} N$, and lon. 100° and $105^{\circ} W$ and watered by the Saskatchewan and Mad Deer Rivers. Its appearance is partly that of a rich prairie country interspersed with forests of oak and elm trees and partly of a succession of hills and dale beautifully adorned with lakes, grass, and woodland. It presents many obvious advantages to settlers.

CUMHUM a *tin.* India, *presid.* Madras, dist. and 80 m. N.E. Cuddapah. It consists of a fort, which is strongly placed, but is a very dilapidated condition and a town which, though decayed is of some size and importance. An artificial lake, about 3 m. long by 4 broad surrounded by picturesque hills, and forming one of the most beautiful objects of water in this part of India, irrigates and fertilizes the grounds around the town.

CUM-SING MI N a harbour China on the E. side of the island, and about 30 m. N. of the town of Macao. It is said to be more safe and commodious as well as more healthy than any of the other harbours or anchorages near the mouth of the Lanton River and would be a desirable haven for vessels of large draught to run far from the anchorage off Lanton on the approach of a typhoon, were it not for an extensive shoal with a depth of only two to three fathoms at 2 m. outside the entrance which is about 4 m. wide. Cum-sing-mun used to be the great rendezvous of the vessels engaged in smuggling opium into Canton.

CUNENE, KUNENE or NOURNE [add.] a river S.W. Africa, which rises in the marshy plateau of Bamboos in the Klamboende country about lat. $12^{\circ} 40' S$ lon. $17^{\circ} 30' E$; descends rapidly southwards augmented by numerous affluents so as soon to become navigable, traverses the lands of Molomo, Kamba, Humba, and Hinga, belonging to the kingdom of Kanyama, united with the Oval, and at some distance below with the Kakabale coming from the W. W. changes its direction to S.W. shrubs the Mucibale lands (Ambohe), and then turning W. falls into the Atlantic, at lat. $17^{\circ} 15' S$. It was at one time supposed to lose itself in the sands without reaching the ocean, but an expedition, fitted out by the Portuguese government in 1864 having landed on the 14th November on the Tiger Peninsula, proceeded southwards till it struck the river and then travelled along the bank to its mouth, thence after it proceeded up the stream for about 25 m. Owing to the bar at its mouth and a succession of sandbars it is not navigable. It is said to swarm with crocodiles and hippopotami. The banks are clothed with a rich vegetation, and in the adjoining forests elephants are so numerous that the Cune was known and marked on maps as Elephant River.

CURIA MI RIA or KOOSIA MOOKIA [add.] a group of islands situated in a bay of the Indian Ocean, off the S.E. coast of Arabia. They are five in number and lie between lat. 17° and $18^{\circ} N$ lon. 56° and $57^{\circ} E$ occupying an elliptical patch of sea, 20 m. long by 5 m. broad. Though almost barren it was rumored that they were rich in guano, and under this impression the British government obtained a cession of the group from the Imam of Muscat, vessels

battered to possess themselves of the fabled treasure in such numbers that in the beginning of 1868 50 vessels, with an aggregate burden of 45 000 tons were seen at anchor off the islands; and it was marginally calculated that though the treasure was found on only two of the smallest of the group the quantity was not less than 200 000 tons. 45 000 tons are stated to have been loaded up to the end of 1868 and the export was briskly continued up to 1869. The error was as to the quality. Large quantities of earthy gypsum formed by the dashing of the salt spray on the limestone rocks at which the islands are partly composed and the dung of fowls, with its most valuable ingredients washed out of it by the heavy rains of the S W monsoon are the only guano of the Curie-Muna group. The essential difference between Curie-Muna and Peruvian guano becoming well understood the demand for the former has in great measure, if not entirely ceased.

CURICO [add] a tn Chili prov Colchagua esp. dep of same name, 110 m. S S E. Valparaiso. It is by far the nearest and apparently the most thriving town in the province, is regularly and compactly built on the fork between the Lenteo and the Teno; has several well paved streets a plaza, a very pretty alameda, three churches one of them particularly handsome and conspicuous from its white tower and two schools, in one of which French and Latin are taught. It is said that it are rich copper mines in the vicinity of Curico which might still be worked to advantage. Pop about 7000.

CURTIBA [add] a tn Brazil prov Parana near the source of the river of same name 230 m. S W San Paulo. Previous to its erection into a capital it was a comparatively insignificant place, and some time must elapse before it can assume an appearance at all to its altered position. Much of the old town remains, with its narrow angular unpaved streets and squares, and its old houses many of them verging on ruin, but the work of reconstruction has begun and the necessary public buildings, though certainly not on a scale of much magnificence, are in course of erection. The president has now a modest structure which serves for his palace. A state-house also has been erected together with a treasury a general guard house a prison a lyceum, &c. Pop about 8000.—(Lallemant)

CURRENT RIVER U States, rises in Missouri co. Texas enters Arkansas and after a S W course of about 250 m. joins the Black River. It is navigable by flat boats and abounds in excellent fish. Its chief affluent is the Jacks Fork.

CURTIS, an isl Australia, Queensland off the E. coast from which it is separated by Kuyul Bay which forms the estuary of five considerable creeks or arms of the sea. It is 25 m long and 13 m broad near its N W end. The surface generally low and in some parts swampy rises towards the S E and becomes well diversified by hill and valley. On

the N W the channel which separates it from the mainland is not only narrow but so shallow that it dries at low water about 6 m. from the entrance.

CUYOS [add] a group of isls., about 86 in number lying between the isle of Parray and Palawan in the Philippine Archipelago and forming part of prov Calamianes. Gran Cayo, the largest, between lat. 10° 48' and 10° 53' N lon 121° 1' and 121° 7' E has a medium length and a medium breadth of about 3 m. The soil is of indolent fertility and the cultivation is chiefly confined to mountain rice. The population is however considerable and in finding full employment in the fisheries, chiefly of trepang and in gathering edible nests and the women in weaving fabrics of alaca and cotton. The cocon palm is abundant, and its sap forms the chief article of export. On the W side of Gran Cayo there is a town of same name containing 7540 inhabitants. It consists almost entirely of native huts, but is defended by a fine strong fort with four bastions, mounting heavy cannon. It is said to have been built as a protection against the pirates of Sooloo and Mindanao.

CZAKA THURN a tn Austrian empire kingdom of Croatia and Slavonia, circle and 9 m. N E Warasdin on the railway to Olen. It has an hospital and an old castle, on the residence of the heretic Miklas Zrinyi. Pop 3618.

CZANIEC a tn Austrian empire, Galicia, circle Walo-wicz, 34 m. S W Cracow in the midst of extensive forest with a fine baronial castle and 1900 inhabitants who are chiefly employed in weaving of flax.

CZARNY DUNAJEC a tn Austrian empire Galicia, circle New Sandec esp. dist. of same name 1 mi. N. Black Donajec 48 m. S by W Cracow. It has rich seams of iron ore. The marsh of Bory in the vicinity is remarkable from standing so close upon the watershed between the Mollerau and the Dniepr, that of the two streams which issue from it one carries its waters N to the Vistula, and the other S to the Danube. Pop 1760.

CZERNOW a tn Austrian empire Galicia circle Bochnia about 30 m. S E Cracow on the Donajec. It is pleasantly situated in a valley and was once fortified and the seat of a Polish starost. In the vicinity is an old massive tower once used as a state prison. Pop 1800.

CZKIADNA a tn Austrian empire Moravia, circle Neuhäbeln contains 1800 inhabitants, who are chiefly employed in working the iron mines of the neighbourhood round the town of Grotte.

CZERNY TICA a tn Austrian empire, Galicia, circle and about 20 m. N F Kolomoia, with an old castle, in which for a long time the Polish king John Sobieski resided. Pop 2834.

CZERNIEJOW a tn Austrian empire, Galicia, circle and 8 m. S. Minniau was in the fourteenth century a place of strength and the residence of a Muscovite prince. Pop 1500.

D

DANILING a vul India, 1 beg of the Butley 4 m from the confluence of the Ispedoo, 9400 ft above the sea. It stands in a fertile spot, amid groves of poplars and orchards the chief fruit of which is the apricot. The opposite bank of the Butley presents a perpendicular section of 6000 or 7000 ft of pure rock. About 1 m. E is another village named Dooling with which it is usually associated. The inhabitants are of the Chinese Tartar type.

DAGBO a tn Africa territory Doma, r bank Benue, 90 m. above its confluence with the Kwara; lat. 8° 2' N lon. 7° 58' E. Between Dagbo and Komo situated a few miles below the river is studded with large wooded islands, some of them inhabited. They add to the beauty of the scenery but greatly increase the difficulty of navigation. A hill to the E the Dome Hills prettily rounded and well wooded with a central peak about 700 ft high, form conspicuous objects.

Butley Inf. Gaz.—Vol. I

DAGGS SOUND New Zealand on the S.W. coast of Middle Island or Munster lat. 42° 23' S lon. 160° 52' 30" E. The width of the entrance is 2 m. but soon narrows within to 800 yards. After a general trend E. by R. for 5 m. the sound branches off into two arms a N by W and a S E. each running for 2 m. Within the heads for 1½ m. the depth is from 20 to 30 fathoms, but after the narrowing of the channel it increases to 0 and 50 fathoms. The best anchorage is at the head of the N arm in 12 to 18 fathoms within 800 yards of a stony beach with several streams of fresh water running through it. A remarkable scene which occurred while H.M.S. *Albatross* was anchored here in 1881 is thus described in the Remark book of Commander G. H. Richardson: Our anchorage was at the head of the northern arm, a cable's length from the shore in 13 fathoms, the change of the moon brought a N W gale, with heavy rain and in the course of a few hours no fewer than fourteen magnificent cascades were

pouring down the steep sides of the mountains (upwards of 3000 ft. high) by which we were surrounded bringing with them rains of considerable size, and all other obstructions met with in their passage. There was as if a heavy surf were breaking round the vessel: the sea, flowing as it was over mountain-tops occasionally obscured everything but the summit of the mountains and the foam below and produced altogether a scene as grand as it is possible to conceive, which lasted without abating in any degree, for two days, when the water abated, which had been as salt as the ocean was for a considerable depth below the surface perfectly fresh.

DAGO-N DAJI is in Western Africa, Iles de St. Paul, prov. Kehl 50 m. N. by W Sokoto. It has a dilapidated clay wall, but notwithstanding the symptoms of decay has a pleasing appearance, in consequence of the number of goods and date trees scattered within its area. Its market is important, and has for its staples, cattle, sheep, milk, and beads.

DARIBALI is a prov. Arabia, Oman on the E. side bounded N. by the prov. of Sharjah, and touching the Persian Gulf with its N.W. corner E. by Dalmah S. Djebel Akh-fah and W. the Great Sandy Desert; between lat. 28° 30' and 24° 25' N. and lon. 54° 20' and 58° E. It is a tract about 100 m. in extent more than in arable land and bears a kind of sheep rivaling the Arabian breed the domesticated of the district too are fleet and enduring. The inhabitants are Somalis and Bedonko. Borsaymah is the principal town, and stands in a strong position amid the peaks of Djebel Akh-fah surrounded by several villages. The Djebel Akh-fah is a lofty mountain range the soil about which is light, and the vegetation not luxuriant.

D'HOVEY [add.] kingdom W. Africa. The present extent of the kingdom is estimated by Captain Burton to be much less than was formerly supposed. He states that the northern frontier is the river Tevi about 100 m. from the coast on the N.E. are the tribes of Yariya or Yoruba on the N.W. the Ays and other tribes, all of which though liable to the attacks and ravages of the Dahomeans are practically independent. The extreme breadth of D'Hovey thus does not exceed 50 m. and is narrower towards the N. where it is not more than 20 or 30 m. the area being about 4000 sq. m., instead of 30,000 according to earlier computations. The population is likewise set down at the smaller total of 150,000 of whom Captain Burton estimates that four-fifths are women and children; and adds, The annual withdrawal of both sexes from industry to slave-hunting and the customs at the capital, the waste of reproduction in Amazons (the female soldiers who are compelled to celibacy) and the losses by disease and desert have made the country in parts a desert. The population must be a third of what the land could support. The soil is red and exceedingly fertile, but agriculture is despised slaves being employed in it the women, however, are the chief labourers, and cultivate their land with some degree of skill. The oil palm might be a much greater source of wealth than it is and the roads to the coast are generally good enough for wheeled carriages.

The cap. is Abomey or Agbomey at which the king principally resides leaving a second palace at the village or town of Canthah about 7 m. S. of it the situation is higher drier and less unhealthy than Wiyeh which is the capital.

The people are of a warlike and aggressive character considered no doubt by their implication in the slave-trade. Incursions are frequently made by them upon neighbouring tribes and the captives seized in these marauding expeditions are either sold to the traders, or are reserved with condensed criminals, for the king's annual customs, or human sacrifices, which are held by the present king, Glele, in the last days of December and first ones of January and are alleged by Captain Burton to have a good plain object, namely the furnishing the spirits of his deceased father and other ancestors with the requisite attendance in the shades below. The numbers of human beings alleged to have been slain on these occasions by the present king have no doubt been exaggerated but when in the lowest reckoning is added the fact that whenever any event occurs important or trifling, which the king wishes his father to be made acquainted with, a messenger is despatched to convey the news, and that this involves the death of one or more almost every day the annual destruction of life is evidently very great. See ASSOCIATE.—(Burton's Mission to Dahomey.)

In December 1863 a special mission was despatched by the British government to Agbomey to make representations to the king with a view of inducing him to repress the traffics in slaves, and to modify if not discontinue the barbarities of the customs and also to represent to him the advantages he would derive from establishing a legitimate trade with foreigners at Wiyeh. It is feared that little good was practically effected by the mission. The king was contemplating at the time an attack upon the neighbouring Egbas in their city Abbeokute and at the end of February he marched thither at the head of an army of 10,000 or 15,000 men and Amazons, with three small brass guns. After a three weeks' march they assailed the town the inhabitants of which had received warning of the intended attack and had prepared themselves for it: after a few hours fighting the Dahomeans were forced to a retreat, and then completely routed by the pursuing Egbas their loss being reckoned at nearly 7000 while that of the Egbas was about 400 killed and 1000 wounded. The result is considered a heavy blow upon the stability and perhaps the existence, of the throne and kingdom of Dahomey many signs of its decadence having previously been noted.

DAILLEBOU is a vil. British America Canada East, co. Joliette 48 m. N.E. Montreal with a R. Catholic church boys and girls schools, and a considerable trade in lumber Pop. about 1800.

DAKOTA is a territory U. States, between lat. 42° 30' and 49° N. lon. 94° 30' and 105° W. bounded N. by British America E. Minnesota and Iowa S. and W. Nebraska length from N. to S. 450 m. average breadth about 200 m. area, 152,000 sq. m. The surface though not mountainous is elevated one plateau called the *Coteau des Prairies* about 1450 ft. above the sea stretching for 200 m. near its E. frontier while another of less altitude occupies a considerable portion of its N. and centre. In the N.E. and S.W. are open grassy plains and high rolling prairies. More than half of the boundary lines are formed by large rivers—Minnesota separating it from Nebraska, and its affluent the Big Sioux from Iowa, while the Bole de Sioux and the Red River of the north separate it from part of Minnesota. Lakes are very numerous, and for the most part fresh but one in the N. called Minn. Wakan or Devil Lake about 40 m. long by 12 broad and with no known outlet, is salt. The climate in the S. is mild and temperate, and in the N. very severe, the cold there being sometimes so intense as to freeze quicksilver and sink the thermometer 48 below zero. The soil in the S. and S.E. is excellent and several of the valleys partitioned early those of the Missouri and Red River produce good crops of Indian corn oats wheat and tobacco. In the unsettled and unexplored districts, occupied chiefly by the Indians as hunting-grounds are vast herds of buffaloes, deer, and antelope the black bear and wolf are also common, and the fur-bearing animals are so abundant that the American fur trade derives its chief supplies from this quarter. Dakota, formerly included in Minnesota, having been separated from it in May 1858, the inhabitants elected a legislative assembly which met in October following at Pierre Falls, adopted a code of laws, divided the country into counties, and applied to congress for a formal organization which was completed in 1861. Pop. (1860) whites 2578 Indians 2261 total 4837.

DALAMOW is a India Oude, dist. Baranwa 1 bank Ganges, 68 m. S. Lucknow. It possesses a brick built fort, and two large ancient Hindoo temples, which are located on the banks of the river with flights of steps down to the water present a striking appearance when approached by it. Pop. about 10,000.

DALHOUSIE, a town British America New Brunswick, beautifully situated on the side of a hill S.W. of the island of same name, at the E. extremity of the Wedge-shaped promontory in Chatham Bay. It contains a church and possesses an excellent harbour which is secure in all winds and much visited by timber ships, which here load with lumber. The place, at present small, is rapidly increasing.

DALJA is a town Austria empire, kingdom of Croatia and Slavonia, co. and 12 m. E.S.E. Enns, on the Danube, here crossed by a ferry. It contains 4450 inhabitants chiefly employed in agriculture, the rearing of cattle and fishing.

DALKISSORE is a river India presid. Bengal, which rises in dist. Pundich, about lat. 28° 50' N., lon. 85° 54' E.

pursues a S.E. course of about 170 m., nearly parallel to that of the Coony and joins the Hooghly on its R. bank at Diamond Harbour.

DALLA a. in Western Africa, esp. prov. of same name 170 m. S. by E Timbuctoo. It is a place of considerable size, situated in the W. of the mountains of Hombori and is inhabited mostly by Tomba, only a small part of the population being Haugway. Its governor being in subjection to the fanatical chief of Masina, who would never allow a Christian to visit his territory Dr Barth on arriving here felt obliged to assume the character of an Arab.

DAMAGHAN a. in Persia, Taberistan 190 m. E.N.E. Teheran. It was once a flourishing place under the ancient name of Hamompyria, but is now without importance, though surrounded by a wall flanked with towers, and has only 1200 to 1500 inhabitants.

DAMIAUN a. in India, presid. Bombay dist. \ Concan at the mouth of the r. or of same name and near the Bombay and Baroda railway 104 m. N. Bombay. The town is fortified with a rampart having two bastions and two gateways and contains nine Christian churches and a castle named St. Hieronymus. The surrounding district is low but fertile and pleasant, and well stocked with timber suitable for shipbuilding. The r. or has a bar at its entrance outside of which there is a good roadstead where vessels may anchor and within the bar which has about 3 fathoms at high water there is a depth of 18 to 20 ft. Ships of 500 to 600 tons have been built in the river. The town formerly belonged to the Portuguese.

DAMIROWA a. in Austroasiatic empire, Gallica, urdu and 10 m. N. Tarnoo. esp. dist. of same name has a large castle with beautiful gardens and famous horse-markets. It was ravaged in 1858 by the plague, and two years later by the Swedes 1 op. 1900.

DAMERIGUN a. dist. Western Africa, between the S. frontiers of the Timbuctoo and Jawak country immediately N. of Zinder and Tassawa, and the S. frontiers of Air or Ashon to which it belongs lat. 14° 30' N. lon. 8° 50' E. length about 60 breadth about 40 m. It has an uninteresting surface and a soil as fertile as to be capable of maintaining a very dense population. It was devastated by the bloody wars carried on between the king of Bornu on the one side, and the sultan of Agades and the Twarek on the other. It is still proverbially spoken of as the granary of the kingdom. One proof of its great productivity is seen in the little stacks of corn (millet) scattered among the huts, and readily consuming only of enormous reed-baskets placed on a wooden scaffold about 2 ft. high as a protection against the moose and the ant, and it sicked over like the brick. The district appears to have been originally peopled by the Kanuri race who were still its chief occupants, though many of them have been reduced to the condition of serfs or predial slaves. The surface of Damerigun though usually undulating sometimes assumes a mountainous character and rises into peaks, of which one of the most conspicuous is the cone of Zozawa.

DAMMOODA a river India presid. Bengal w. h. rates in dist. Bamber about lat. 23° 55' N. lon. 84° 58' E. and flows first E. to Paduota, and then S. past Haneegum, and nearly parallel to the railway between the town and Dunder. Here it turns almost due S. and continues this direction to its junction with the Hooghly on its R. bank near Diamond Harbour and a little above the junction of the Dakisora. Its total length is 350 m. Coal and iron abound in its valley.

DANF or **DANES**, an Isl. China in the Canton River close to Whampoa. It is not above 5 m. in circuit, but has a very picturesque appearance, being broken into hill and dale and fertile glens occupied by a peaseable rural population. On its N. shore there is a steep dock 500 ft. long with a gate 80 ft. wide. Vessels drawing not more than 17 ft. can be taken into it at very high tides. On other parts of the island are numerous wharves and docks for vessels of smaller draught.

DANGEE ISLAND, in the American Polynesian of the S. Pacific Ocean lat. 10° 54' N. lon. 165° 54' W. They are three in number surrounded by rocks and breakers and have a dangerous reef 27 m. E. S. E.

DANABUA a. in Western Africa on the road from Katsena to Kano and near the boundary line of these two provinces. It is a considerable place defended only by a

stockade, and exhibiting so few signs of industry among the inhabitants that it has a deserted look.

DANUBE [dœ.] In consequence of the rectification of the frontier of Bessarabia, as provided in the treaty of Paris in 1856, the whole of the lower course of the Danube, from Orsova to the Black Sea, lies within the Turkish territory. The portion of Bessarabia which formed the north bank of the river is now included within the principality of Moldavia.

DANVILLE [dœ.] two places, U. States—1. A. in Pennsylvania, esp. co. Montour on the N. branch of the Susquehanna, 48 m. N.N.E. Harrisburg and on the railway from Ft. Mifflin to Elmira. It contains five churches and an academy and being situated on the heart of a coal and iron district is actively engaged in the iron manufacture. Among its industrial establishments are two foundries five blast furnaces and one of the largest establishments in the U. States for making iron rails and chairs. Pop. 6383.—2. A. in Kentucky esp. co. Boyle, m. a branch of Dick's River and on a railway connecting it with Lexington 40 m. S. Frankfort. It is the seat of a Presbyterian theological seminary with 4 professors and 35 students, of a college, with 5 professors, 185 students, and a library of 5600 vols. and of the state asylum for the deaf and dumb. 1 op. 4962.

DAODNUGUR or **DAODENAGUR** [dœ.] a. in India, presid. Bengal dist. Behar 89 m. S. Benares r. bank Bone, which is here navigable. It consists of about 2000 houses ranged in streets, of which some are straight and wide, but the most part are wretched lanes. It contains two large seras, or public lodging houses, both of them surrounded by walls and one hospitalised so as to be capable of defence and has manufactures of blankets, coarse cotton carpets, and other cotton fabrics, and a considerable trade.

DALOREE, a. in India, presid. Bombay dist. and 4 m. N. on the Mootah a feeder of the Nerma. It contains a residence for the use of the governor of Bombay and in its vicinity are the botanical gardens maintained by government.

DARAGUNJ a. in India N.W. Provinces, dist. and opposite to Allahabad with which it communicates by a railway 1 bank Ganges. It is a place of some importance, with a pop. of 9103.

DARIN a. w. l. U. States Georgia, esp. co. McIntosh 1 bank Altamaha 60 m. S.S.W. Savannah. It contains 1 v. of churches and an academy is a port of entry and exports plus iron bar. Its former trade and importance have been diverted from it by the Central railroad 1 op. 600.

DARLEN or **DARHOUN**, S. America, New Grenada, w. l. in the Gulf of San Miguel on the L. arm of the Bay of Panama, is a magnificent sheet of water which is formed by the junction of the Tayra and Savannah Rivers and stretches S.E. for 11 or 12 m. as far as the village of Chuparra. It affords excellent anchorage in 7 to 10 fathoms and in the hands of an energetic people would soon become valuable. Several rivers discharge their waters into it, its shores are almost without exception are continuous lines of mangrove with densely wooded hills 100 to 300 ft. high at short distances inland the mangrove palm, and 1 die, rubber trees can be had in abundance and maize, rice, sugar, coffee, coconuts, yams, and plantains grow almost wild. The climate has a bad name but with common care it might be preserved during the worst season and during the other six months the weather is fine.

DARNLEY or **DARNLEY**, an Isl. Australia, which forms the principal landing mark for the great north-east channel into Torres Strait from the eastward lat. (peak) 8° 33' N. lon. 145° 43' E. It is about 5 m. in circuit, of volcanic formation and is situated in a peak rising from its W. portion the height of 610 ft. It is skirted on the E. and S. by a coral reef but on the N. and W. is bold and free from dangers. On the N. shore there is good anchorage in 14 or 15 fathoms in Treacherous Bay so named in consequence of the barbarous murder of a Captain Hill and four seamen by the natives. The surface is well diversified by hills and plains, and the richness of the soil is proved by the luxuriance of vegetation. The natives, though far more intelligent and industrious than those of Australia, have given many proofs of cunning and ferocity. In their fields which are numerous and inclosed by neat fences of bamboo, they raise yams, sweet potatoes

plantains, and sugar-canes. Cocoa-nut trees are also very abundant particularly in the neighbourhood of their dwellings, which consist of huts resembling haystacks, 12 ft. high and are arranged in groups of ten or twelve, each group with its bamboo fence. Pop. about 1000

DARBORO a tn. Western Africa. Hausa States, prov. Zogagge 140 m. S. Kano. It stands in a mountainous district, and occupies a position so strong by nature, that a wall on the N. side only in all the defence which it requires for its security. At some distance E. there is a cascade on the Gura.

DAR HIGESAN a vil. Persia, prov. Azerbajan, within a mile of the E. shore of Lake Urmia. It is a miserable place, with houses composed of a kind of patchwork of talaf-stone and bits of marble stuck together with mud, but deserves notice from having in its immediate vicinity the celebrated marble quarries out of which some of the most splendid buildings of Persia and W. Asia were constructed. The marble is of various colours, among which the most highly valued are the milk white, the lemon-coloured and the pink. It is also more or less transparent, the greater degree of transparency enhancing the price.

DALLÉ a tn. S. America, Ecuador prov. and 80 m. N. W. Guayaquil, cap. east, and near 1 bank river of same name. It was a handsome place in 1839 when it was nearly destroyed by fire. Before it had been completely rebuilt the calamity was repeated in 1854 and at the greater part of it is still in ruins. Its annual festival attracts multitudes from all parts of the country.

DAUHLIN a lake British America situated between Riding Mountain on the R. and Winnipeg on the N. It is 700 ft. above sea level or 2 ft. above that of Lake Winnipeg, and has a length from W. to E. of 21 1/2 m. a greatest breadth of 12 m. and an area of 170 sq. m. It is very shallow. Its feeders are numerous, but unimportant. Its outlet is the M. River by which it discharges itself into Winnipeg. It abounds with large pike and at its S. extremity the hop grows in great luxuriance and abundance.

DAURA a tn. Western Africa. Hausa States, cap. dist. of same name 5 m. N. by E. Kano. It is a large place surrounded with a strong clay wall in good repair, but is only thinly inhabited. Its weekly market is unimportant. Daura is one of the oldest of the original, as the Hausa states, and boasts of having had an apostle of its own Mohammed Ali el Baghadi who took the lead in introducing Islamism into the country.

DAVENPORT [add.] a tn. (States Iowa, cap. on River & bank Mississippi on the Mississippi and Missouri and opposite to Rock Island the terminus of the Chicago and Rock Island railways, 47 m. E. Iowa. It stands at the foot of a bluff which rises gradually from the river and is inclosed on the land side by an amphitheatre of hills. The streets are regularly laid out, and many of the houses are large, commodious and handsome. The principal public edifices, are 1° churches, a college attended by 100 students, of whom about a fifth are of the female sex, another college exclusively for females a commercial college and other schools, a courthouse and other municipal offices. A magnificent bridge across the Mississippi connects Davenport and Rock Island. The industrial establishments include foundries and other ironworks brick yards article works, breweries and planing and saw and flour mills. There are also manufactures of soap and cordage agricultural implements, waggon, carriages, and pianofortes. The trade of 1857 amounted to the aggregate value of nearly three millions sterling consisting of 53 099 tons of imports and 34,197 tons of exports, the latter composed principally of wheat, barley flour and lumber. Pop. (1860) 11 257.

DAWSON ISLAND S. America situated in the Strait of Magellan off the W. coast of Terra del Fuogo opposite to the deep inlet of Admiralty Sound and to Uclesen Bay is 4 1/2 m. long, and about 20 m. broad. It terminates in the N. in Cape Valentin, which is less than Mount Graves in the vicinity rises to the height of 1426 ft. On the W. side, the only places where vessels can anchor are Lomas Bay and Port San Antonio. The E. coast is intersected by several deep inlets, one of which, Branton Sound, penetrates as far as to be only 4 m. from Lomas Bay. The S. coast is separated from Terra del Fuogo by Gabriel Channel which is

25 m. long, and from 1/2 m. to 1 1/2 m. wide, extending in the direction of the strait in a remarkably straight line with almost parallel shores. This channel appears to be merely a ravine of glacial formation into which the water has found its way and thereby isolated Dawson Island from the mainland. The N. shore of Gabriel Channel is a ridge of slate rising abruptly to a sharp edge and then as abruptly descending on the opposite side, where it forms a valley. The S. shore is of a different character being formed by a mass of mountains. Among these the most conspicuous are Monte Buckland and Sarmiento. The former of these, which has its estimated height of 4000 ft. is a pyramidal block of slate terminated by a sharp-pointed peak. The latter rising from a broad base to the height of 6500 ft. and terminating in two peaked summits is the most remarkable mountain in the Strait of Magellan. From the humidity of the climate, and its being clothed with perpetual snow it is usually enveloped in thick vapour. Sometimes, however, during a low temperature, with a N. E. or S. E. wind, when the sky is often cloudless, it becomes exposed to view and presents a magnificent spectacle. The summit of the range between these two mountains is occupied by a large glacier which as it melts feeds innumerable cascades. These leaping down from height to height on their way to Gabriel Channel add a singular and beautiful feature to the surrounding scenery.

DAYTON [add.] two places U. States.—1. A tn. Ohio, cap. of Montgomery on the Mad and Great Miami Rivers, and at the terminus or junction of several railways, connecting it with all parts of the country 66 m. W. S. W. Columbus. It is built with great regularity in spacious streets 100 ft. wide and crossing each other at right angles, and exhibits in many of its private mansions an elegance and in public buildings a magnificence not often witnessed in a provincial town. The most conspicuous edifices are seventeen churches many of them with spires a high school a large female academy two other high academies conducted by nuns, a county courthouse, planned after the model of the Parthenon and built of a coarse but can just white marble an orphan asylum a lyceum and two large market-houses one of which contains on its second story a city hall and council-chamber. The principal industrial establishments are two paper two flour four saw and 1 cotton mills, driven by water wheel is connected from the Mad River by a hydraulic canal two woolen and three cotton factories five machine shops three iron foundries a large brewer, and various manufactures of agricultural implements railroad cars, gun barrels, pugs and lactic hollow ware &c. The quantity of superior flour manufactured annually is about 125 000 barrels, and the value of the assessed property exceeds a million sterling. Pop. (1860) 20 061.—2. A vil. Alabama, pleasantly situated, 6 m. S. W. Tuscaloosa in a healthy district covered with cotton plantations. It is inhabited chiefly by wealthy planters, and has neither manufactures nor trade of any consequence.

DE ANA CANAL an inlet, British Columbia, at the head of Burke Channel on the W. coast. The entrance to Burke Channel is about 80 m. from the N. end of Vancouver Island, it runs inland about 20 m. and then divides into three arms. Deane Canal being one of them and running nearly N. for 25 m. the other two are North and South Bentrick arms, running respectively N. E. and S. E. directions. From these inlets an available route can be opened to the inland districts of the Fraser.

DEBICHIN a tn. Russia, prov. Perm, circle Solikamsk, in a mountainous district, is celebrated for its salt mines.

DEBILSKI a tn. Atymania, Tigris, prov. Muscar. lat. 12° 50' N. lon. 33° 40' E. It occupies the summit of a mountain of same name, which is at least 3000 ft. above the adjoining valley. Till recently it contained only a few huts and one or two churches but having become the favourite residence of Prince Ub and an asylum for political refugees, it has rapidly increased in size and importance. Its isolated position almost excludes it from trade for which, indeed, its inhabitants have no inclination most of them being Ub's soldiers and dependants.

DEBRO (Uva) a tn. Austria empire Hungary co. Neva, about 11 m. S. W. Erlau on the Tarna with a trade in excellent tobacco. Pop. 1500.

DECHTITZ, a tn. Austrian empire, Hungary co. Upper Neutra, on the Blava, which divides it into two parts. It has

extensive potteries, and a paper and other mills, the streams are covered with vineyards. Pop. 1800

DECESE, is the Avestan empire, Transylvania, circle and about 72 m. N. E. of Bucharest with an active trade in fruit and meadows. At Mierleia, in the vicinity a great battle was fought in 1600 when the Wallachian widow Michael was defeated by the Imperial general Basta.

DEDERNO-OYA a river (eylon) which rises among the mountains to the W of Kandy near the S E frontiers of the N W Province flows first N W then W S W and falls into the sea near the town of Chikaw. Its length is 70 m and the area of its basin 788 sq. m.

DEERHAM a town in U States, Massachusetts, cap. of New York, on the Charles River and a branch of the Boston and Providence railway 14 m. S.W. Boston. Its principal buildings and institutions are a handsome courthouse, built of granite with a Doric portico on each front, ten churches a library a high school, and several grammar schools. The manufactures consist chiefly of ironware machines, leather refined sugar cards soap and candles and there are several cotton and woolen mills. Pop. 6380

DEEG or **Die** a river in India, Rajpootana, territory Bhurpur 67 m. N. W. of Jaipur, and numerous islands and marshes during a great part of the year surrounded by water. It is a place of great antiquity and was regarded by the natives as almost impregnable, till Lord Lake stormed it on the 23d December 1804. It was held at this time by a usurper and was shortly afterwards restored to the legitimate ruler but not till his fortifications had been dismantled in consequence of this proceeding Deeg ceased to be a place of strength but still possesses some interesting public buildings. Among them is the rajah's palace, forming the four sides of a fine garden 4.5 ft. long and 250 ft. wide. The buildings, constructed of a fine grained sandstone, are said to yield only to the Taj Mahal in respect of elegance of design and beauty of workmanship.

DEEL RIVER, U States N Carolina, rises in Co. Guilford flows first S E then nearly due E and after a course of about 100 m. unites with the Haw in forming the Cape Fear River. Mines of anthracite and bituminous coal are worked on its banks in Co. Chatham up to which it has been made navigable.

DELSAKNA a town in Austria, Transylvania, circle and S W Deas, with mines of rock salt and 4020 m. inhabitants.

DELSAUN a river India which rises near Seemow in the N E. of Jhupal at the height of 2000 ft. above the sea, flows N across the territory of Bangor and Nerbudda into Bundelkand and joins the Betwa on its banks after a course of 150 m. It is about 6 ft. in fall but is not navigable.

DEHRA DOON a beautiful and fertile valley India, N W Province at the N W base of the lowest and outer most ridge of the Himalaya, betw. lat. 30° and 32° N. lon. 77° 43' and 78° 24' E. It is bounded on the N by the Jumna, N.E. by the mountains of Gurwal from 7000 to 8000 ft. high S.E. by the Ganges, S.W. by the Bewal range 3000 to 3500 ft. high. Its length from S.E. to N.W. is about 45 m. breadth from 15 to 30 m. A transverse range divides it into two basins—that on the N.W. belonging to the Jumna which drains it by the Aum and that on the S.E. to the Ganges, which drains it by the Bhoora. The valley contains 234 towns, the chief of which is Dehra standing on the dividing ridge overlooking the two basins at the height of 2850 feet. The valley is remarkable for the beauty of its scenery. In its general appearance it is sloping and picturesque with finely cultivated fields separated with hedges, and intersected with streams and tracts of woodland, and thus closely resembles the scenery of England. It has much soil of a deep rich mould, well adapted for the growth of the maize, grain cotton sugar cotton hemp and indigo. It abounds with dense forests, in which are found elephants tigers leopards and other wild animals. The climate is temperate and healthy for Europeans, except from July to September when the monsoon prevails and fever is rife. A great number of persons were induced to settle in it in 1837 and saw their labours about to be rewarded by abundant crops of the finest quality when at the setting in of the rains the jungle fever began to rage like a pestilence. Many fell victims, and many who survived felt terrified and

have never returned. The new settlement has in consequence made little progress though the population—mostly Hindoo—is still considerable, amounting to 22 083.

DEHRAH a town in India, N W Province chief place in the above valley 72 m. S.E. Simla. It stands at the height of 5400 ft. on the crest of a ridge which crosses the valley contains a large number of houses partly belonging to Europeans, and possesses a small but handsome temple built of stone, with stucco embellishments. Its position at the intersection of two great thoroughfares is advantageous for trade.

DELATYN a town in Austria, Galicia, circle and 20 m. S. by W Branslau in a mountain basin at the confluence of the Budina with the Pruth, has salt springs salt rubneries and baths, with a milk cure establishment, and contains 3299 inhabitants.

DELAWARE or **DELAWARE** CONGRESS, a town in U States, Ohio, cap. Co. Delaware pleasantly situated near the Columbus and Cleveland railway 1 bank Olentangy here crossed by a bridge, 70 m. N. Columbus. It is a hard some well built place containing six churches and the Ohio Wesleyan university. A sulphur spring in the vicinity is much resorted to. Pop. 3889

DELEH (del) On the breaking out of the Ind an mutiny in May 1857 Delhi became the centre of the operations of the rebels who flocked to it from all quarters. The nominal representative of the Great Mogul who held the sovereignty of the place under British protection joined cause with the rebels and in addition to assuming the character of an independent potentate, gave his sanction to the massacres and atrocities perpetrated on the European residents. By the middle of June a British army under generals Wilson and Nicholson was assembled in front of the city and a siege commenced which from the smallness of the besieging force, was unusually slow and protracted. It was brought to a successful termination on 20th September when Delhi was entered by the British troops and the nominal sovereignty heretofore possessed by the king was declared extinguished and the himself after being tried for the murders committed under his authority was found guilty and sentenced as a convict to transportation for life. A great part of the place was reduced to ruins, the mutiny and siege, but it has since recovered much of its former appearance, as it has also been much improved in its sanitary condition.

DELLYB a town in N Africa, Algiers, prov. and 43 m. E. by N Algiers on a small bay of the Mediterranean and on the site of the ancient Roman town of *Thimacres*. It stands in a beautiful and healthy district and consists of a native and a European town. Among its buildings is a handsome mosque. Its markets (held twice a week) are important, and though the town is not so fertile large quantities of produce (chiefly oil and grain) are shipped at it. Pop. 250

DEMAVEND ad] a mountain Persia, belonging to the Elburz chain and situated 40 m. N. of the Caspian Sea and very nearly the same distance N.E. of Teheran. It is the culminating point of a lofty mountain chain that there has been great diversity in the estimates of its height. According to an early calculation founded on a partial ascent, it was no more than 14 686 ft. Humboldt found on similar data, made the height 19 600 ft. In 1838 Mr. E. F. Thomson and Lord Schomburgk Kerr reached the summit and with a hypsometrical apparatus ascertained the height 21,900 ft. A previous trigonometrical measurement by Lieut. colonel Lamm had made it 20 120 ft. In 1860 Capt. I. Vassiliev at the head of the Russian Caspian expedition by trigonometrical measurements found it to be 28,549 ft. The difference between the trigonometrical calculation of the Russians and that of Colonel Lamm is so great that the question cannot be considered to be yet set at rest. In the lower half of the mountain the rocks and precipices consist principally of limestone. Long high ridges commencing at the foot of the cone run out for some distance, and end abruptly leaving between them deep valleys and ravines, covered for the most part with loose stones, gravel and earth. Here and there huge volcanic rocks pierce through the outer covering. In ascending the upper part of the mountain the first thing necessary is to climb a narrow and very steep ravine covered with loose stones, which yielding under the foot, makes walking difficult and painful. Beyond this, and

nearly at right angles to it, is another steep ravine filled with snow. After it is crossed the ground, though still very steep, becomes more practicable, consisting of a fine reddish soil, on which grow numerous and various plants, including among others the forget-me-not, wild thyme, lavender forest, and a beautiful variety of the aromatic flower of the most delicate form and colour. Near the foot of the cone, at a height of nearly 13,000 ft., vegetation ceases. At a distance the cone appears to be nearly smooth, and to slope evenly from top to bottom at an angle of 45° but is found when approached, to consist of a number of ridges which run from the summit to the base, and are separated by deep ravines full of snow and ice and large accumulations of debris. The ascent is now made over rocks of lava and basalt, broken up into a thousand shapely masses piled in confusion. At length a long ridge is reached, evidently formed by a stream of lava, which has run over the surface and left it as smooth and steep that it is left up to maintain a footing. The best part of the ascent is up a steep slope, among rocks of a light yellow colour formed of limestone and talp. The cone terminates in a crater about 85 yards in diameter and nearly surrounded by jagged rocks composed partly of basalt and partly of enphir and limestone. The basin within is almost entirely filled with snow. From two caves near the summit and many small holes in the rock a steam strongly impregnated with sulphur issues.

DEMBA a tr. S.W. Africa, cap. dist. Lower Koonan Kumbunda Country about 20 m. E. of the Atlantic, and 100 m. S. Louisa, stands on a black height. The inhabitants, whose chief employment is the manufacture of mill, suffer much from draught, and as some protection against it, have converted the baobab trees into water-cisterns, by hollowing them out to give considerable shells from top to bottom. The trees still left can long in the condition continue to grow vigorously. Pop. about 7000.

DEMBAICA a tr. Austrian empire, Galicia, circle and 20 m. E. Tarnow on the Wyalica, and on the railway from Cracow in a fertile district with a baronial castle in the Gothic style. It was devastated by the Hungarians in 1441. Pop. 2500.

DEMBOWIEC a tr. Austrian empire, Galicia, circle and 4 m. S. Jasch with 1500 inhabitants chiefly employed in a mill and in distilling yarn.

DEMBAHSEK a tr. Italian prov. and 60 m. S.E. Novgorod, cap. circle of same name, on the Yarus with two churches and 1000 inhabitants. Within the circle lies Krasna Russia, the capital of the military colonies. It is situated on two small streams has 17 churches, an imperial palace, a monastery, three schools and salt springs, and contains 8160 inhabitants.

DEMTERBOVENK a tr. Russia, gov. and 40 m. S.W. Orel, cap. circle of same name on the Oshtrivna with four churches, a school for the circle, a charitable institute, and several industrial establishments. Pop. 4014.

DEMENIA a tr. Austrian empire, Galicia, circle and 26 m. S.W. Fry with large iron-works, at which both cast and malleable iron is made. Pop. 1380.

DEMIRKE a river which rises in Tibet at lat. 28° 45' N., lon. 92° 11' E. flows E. for 60 m. to a gorge of the Himalaya, after passing which it turns S.W. and joins the Munas, an affluent of the Brahmaputra, after a course of about 180 m.

DEMNU8, a tr. Austrian empire, Transylvania circle and about 25 m. S.W. Boveu with a Greek non-united church, built out of the ruins of an ancient heathen temple. There are iron works in the vicinity. Pop. 1360.

DEMNI a tr. Western Africa about 15 m. S.E.W. Sokoto. It is a large and comfortable-looking place, with a profusion of trees, among which the doreas or parkia, the baobab, and the baobab are conspicuous. On its east side is a depression full of fresh herbage.

DEMEK MADEN or **GUMUSKANA** a tr. Turkey in Asia, Anatolia, 45 m. S.E. Angora. It is a mining village with 150 Greek and 15 Turkish dwellings and possesses a very old silver mine. The mines, which consist of argenteous iron lead are worked to some extent, and tolerably productive. The silver only is sent to Constantinople, and the lead (probably the more valuable of the two) belongs to a proprietor to be superintended.

DENHAM WATERS, a large bay on the W. coast of Africa, in the kingdom of Dahomey running in from the Bight of Benin a distance of more than 65 m. and extending to a breadth of 45 m. lat. 7° N. lon. 2° 57' E. The native name is *Alamaga* S.

DENMARK [edit]. The character of the geological structure and geographical situation of Denmark show that the country is designed by nature to derive wealth from agriculture and commerce rather than from manufactures. The soil is well irrigated, and unbroken by great elevations which hinder tillage. It is under the influence of a climate equally free from continuous drought and excessive moisture, and it is capable of a greater variety of culture than would seem compatible with so high a latitude. On the other hand it is almost entirely destitute of mineral wealth, and affords but a very small extent of water-power two important obstacles to manufactures on an extensive scale. At the end of 1855 the kingdom possessed five factories of cloth of a coarse kind one of which was in the hands of the government, and supplied the army and navy. There were also eighteen paper-mills only six of which were of any importance.

Twenty-one oil-mills, producing oil of the annual value of about £240,000 six sugar-refineries, yielding about £700,000 worth of sugar annually distilleries of brandy from corn and potatoes the annual production of which was estimated at £500,000 to £600,000 gallons; six large iron-works, and various small foundries twenty-two yards for ship-building and manufacture of soda from the new mineral spring salt. A new tariff reducing some of the high protective duties, was inducing a slight increase in some branches.

At the close of 1854 the Danish territory was politically distributed into four parts, viz. the mark proper (consisting of the Danish islands and North Jutland) with an area of 14,730 sq. m. and a population (in 1850) of 1,900,551 purely Danish the duchy of Schleswig or South Jutland area 3540 sq. m. pop. 409,907 more than one-half Danish the remainder Frisian and German the duchy of Holstein area 3280 sq. m. pop. 544,418 purely German and the duchy of Lauenburg area 402 sq. m. pop. 50,147 also German. Thus the total area was 21,942 sq. m. and the population 2,600,024. The policy of the Danish government in respect to the German part of the inhabitants of the Duchies, chiefly in the alleged coercion of the natives forced assimilation to the Danes, and eventually in compelling the use of the Danish language in the state schools, had long given umbrage to the German powers. Certain measures of the Danish government, and the strong remonstrances offered to them by the German Confederation—even meaning the validity of the treaty of London of 1850 by which the principal European powers recognised the sovereignty of the king of Denmark over the Duchies—brought matters to a crisis in 1853. On the last day of that year in consequence of the Confederation resolving on federal interference in the Duchies the Danish troops evacuated Rendsburg on the border which separates Holstein from Schleswig and 6000 Saxon troops immediately entered the town and were enthusiastically welcomed by the inhabitants. In January 1854, a misunderstanding arose between the federal diet and Austria and Prussia, whereupon the two latter powers determined upon independent action and Holstein was occupied by them with detachments of troops. The popular feeling in the duchy was almost unanimously in favour of Germany and an address was presented to the federal diet by a delegation from it, offering homage to the Duke of Austria and the heir of the Schleswig-Holstein crown as their lawful sovereign. On Feb. 1 the Prussian forces marched from Kiel under Marshal Wrangel across the Schleiwig frontier and occupied Gottorp the Danes retreating at their approach. The first conflict occurred near Kiekenau on the Kolbe after which the Prussian troops crossed the Schlei by night in boats to turn the left flank of the Danish army and another body crossed by a pontoon-bridge, in order to unite with the former and take the Danes in the rear. While the Austrians pressed it in front; but during the night the Danes overcame their position abandoned their artillery in the fort, and retired northwards, concentrating their forces about Fredericia, Duppel, and on the island of Als. The Prussians addressed themselves to the siege of Duppel the siege of the island of Als, till the 18th of April when

many well-built houses, but seems a dull spiritless place, without any sign of commercial activity. None of the streets can properly be called a thoroughfare, while most of them are laid out as if the object had been to obtain, not business, but seclusion. Almost every public building has an antiquated appearance. The president's palace, the churches—mostly angular structures—the post-office, and the houses of correction, are all of this description. The only edifice which may be considered as an exception to the general rule is the Mercantile, or house of the Sisters of Charity which is so far new that it still remains undisturbed. The harbour formed between the island and the mainland is, next to that of Rio de Janeiro the best on the Brazilian coast, combining all the requisites of sufficient depth capacity and shelter in one respect, however the position of Desterro is unfortunate. Being situated on an island, it can only communicate with the mainland by a ferry. The consequence is, that it cannot be made the common except for the foreign and island trade without requiring a double shipment necessary. Pop. 6000 to 7000. (Lallemant's Notes.)

DETROIT [add] a n. U. States, the cap. of Michigan on the strait or river of same name, which here forms the boundary between the U. States and British America, at the outlet of Lake St. Clair and 30 N. of Lake Erie. The town is built principally on a slope, which rises gradually from the strait and, though laid out on the wh. is in streets which cross at right angles, presents numerous irregularities. Some of the streets and avenues have a width of 300 ft, but a greater number do not measure above 60 and some are barely 50 ft. Some of the dwelling-houses are large and elegant, and several of the hotels are on a very extensive scale. The public buildings include a court-house custom-house and post-office, about 30 churches of which several are large and splendid structures, and the public schools. The 3-rooms hall and the Oddfellows hall are also fine buildings. The means of communication by both water and rail have, very ample, trade and manufactures have been its early development, Detroit being the natural entrepot for the produce and general traffic of the whole state, and nearly all the merchants in the upper lake region as well as in the interior making most of their purchases here. To meet the requirements of this commerce numerous large warehouses have been erected along the banks of the river and the wh. the place is full of stores of various descriptions. Among the industrial establishments are nine large steam saw mills, which annually prepare about 40,000,000 ft. of pine lumber for export, five flour mills, large building yards for ships and boats and numerous foundries, tan vats, and breweries. Extensive establishments also manufacture locomotives and other engines, machinery agricultural implements &c. Considerable trade is carried on with the Canadian and the aggregate value of exports and imports is said now (1865) to amount to several millions of dollars annually. The harbour is one of the finest in the U. States and has a depth of water sufficient for the largest vessels. Its shipping amounts to upwards of 100,000 tons of cargo in large schooners, brigades, and steamers. In September 1864 a large vessel named the *Eden* made the voyage from Liverpool to Detroit, traversing the whole route by the lakes and canals, and returning with a cargo of copper from the Michigan mines.

The following is a list of the principal imports and exports in the year 1860—

	Imports.	Exports.
Flour	bushels 822,175	898,518
Wheat	bushels 1,094,061	2,207,737
Corn	" 665,243	662,014
Rye	" 15,190	10,690
Barley	" 110,500	17,785
Oats	" 376,608	306,500
Wool	" 4,845,065	4,696,111
1st. Eggs	do 61,200	49,850
Cattle	do 61,410	8,378
Pork	barrels 51,431	40,408
Beef	" 18,582	32,001
Sheep	" 8,573	1,261
Woolly do	barrels 22,716	15,350
Woolen do	" 3,874,828	4,123,100
Lumber	ft. 15,366,178	41,664,080

The value of property assessed for taxation in 1866 was

about \$2,500,000 sterling. The progress of the pop. has been very rapid. In 1850 it was 21,019; in 1860 45,619.

DEUTSCH HANDEL, a n. Austrian empire, Moravia, circle and 18 N. N. Olmitz, with four markets yearly. The inhabitants, who are chiefly employed in growing flax and weaving linen, number 1900.

DEUTSCH ROSEN, a n. Austrian empire, Tyrol circle, Bozen, 8 m. S.E. Bozen, with an important trade in corn, cattle, and wood. In the vicinity is the famous pilgrim resort of Wiesentzen with a Servite monastery. Pop. 1400.

DEVIL'S BRIDGE, a celebrated bridge over the Rhine, in the canton of Uri, Switzerland, on the road to Italy by the St. Gotthard Pass. It crosses a fearful abyss with vertical walls of rocks on each side, and is situated in the very midst of the spray of the cataract down which the Rhine dashes with a tremendous uproar. It consists of an old and a new bridge—the former an aerial structure of one arch, barely allowing two persons to pass, and originally thrown across the gorge by Abbot Gernold of Einsiedeln, in 1118. The new bridge stands immediately above the old and forms a safe and massive erection of two arches. The Devil's Bridge was obstinately contested on two occasions, in 1799 between the French and Imperial armies, the victory remaining ultimately with the latter who compelled their opponents to retreat down the valley of the Rhine to Aled. The grand and terrific character of the surrounding scenery renders this location one of the most remarkable in Switzerland.

DEVILIA PHAM, a n. India, presid. Madras, dist. and 60 m. S.E. Madras, on the W. shore of Palk Strait. It takes its name from a natural ball formed by nine rocks in its vicinity and owes its existence to one of the many legends interwoven with the history of Rama, who is said to have here planted nine stones or the sea-shore, and worshipped them as representatives of the nine planets. The belief founded on this legend is that every one who bathes in the sea in this locality washes away all his sins and is sure of succeeding in all his undertakings. Accordingly scores of pilgrims annually resort thither to perform the necessary ablutions, and Devipham has become a place of no small importance not only because it is a temple which draws crowds to its annual fests all but carrying on a considerable trade particularly in rice which is here stored up in large granaries and reserved for sale in times of scarcity.

DHALAC or DHALAC [add] an archipelago of the Red Sea, off the coast of Abyssinia between lat. 15° 25' and 16° 35' N. lon. 39° 25' and 41° E. and forming a indentation between Massawa on the one side and Lokela and Jedda on the other. It consists of nearly 100 rocks and islets mostly unhabited, clustering round the island of Dhalac or Kobar which is about 30 m. long by 80 broad and has a very irregular shape, being deeply cut into numerous bays and creeks. All the islands are little raised above the level of the sea, and consist, at least in their upper portion of very porous and crumbling coralline rocks, which are covered with a very thin coating of soil. The two large islands Dhalac and Kora, possess a scanty vegetation of thorn bushes and a few fine palms. Theghalabians, who language indicates an Abyssinian origin, are rich in cattle, camels, and asses, all of which roam at large in a half wild state on Dhalac Island cows also are reared. In water swarms cheese is made from goats milk. Upon the large island hereditary chiefs dependent on the Pasha of Massawa, to whom they pay a yearly tribute of 1000 dollars in boats and slaves, exercise authority in certain localities; but in other respects the government is native. The principal villages were formerly very rich but have been impoverished by the rapacity of the Turks. For this reason and in fear of further exciting the enmity of their masters, the inhabitants never cultivate their land, though the soil is favourable, but devote themselves to fishing as their principal occupation, the women and children attending to their cattle and household. The pearl is the chief fishery for which the sea of Dhalac is specially suitable; but the quality of the pearls is considered to be inferior. The market for them is Omdin, on the large island. Tortoise-shell also and mother-of-pearl are collected on a large scale, and form an important part of the native trade; the former finds a market at Jedda, and the latter is sent to India, as well as to Europe and Syria. Extensive fishing, however has much injured the pearl-oyster

heads. Sponges also are collected. Agriculture would be profitable, in consequence of the winter rains, water is plentiful the climate pleasant, and not too hot in summer. The people are plentifully supplied with butter, durr, rice, dates, and other fruits, by the numerous vessels frequenting the islands from the ports on the mainland.

DHAMORA a river India, which rises in one of the lower ranges of the Himalaya, flows S. E. for about 50 m. through the Terai of Nepal, enters the British territory and proceeding S. through dist. 1. Thoot and Bhagpur joins the Goganes in lat. 25° 21' N. lon. 88° 48' E. after a course of about 120 m.

DHAP a m. India, presid. B. Nagal dist. and 6 m. N. W. Rangpoor. It consists of about 300 houses, and has a pleasing aspect who approached from a number of European villages situated in its vicinity and embosomed among trees.

DHAR (add.) a small native state and by India, Malwa. The state, situated to the W. of Holkar's Dominion, about lat. 22° N. lon. 75° E. has an area of about 1070 sq. m. and a revenue of £47,500. Much of its soil is fertile, and yields good crops of rice, wheat, maize, millet, pulse oil plants, opium, tobacco, sugar-cane, hemp, and turmeric. The rajah is a Puar or Pramar Rajput of ancient descent but his sovereignty is comparatively modern date the territory having been conferred upon his family by the peshwa about a century ago. For a long time it suffered greatly from the devastations of the Mahadars and Pindarries and must have lost its independence had it not been saved by British interference. Pop. 104,800.—The town cap. of the above state, 85 m. W. S. W. Indore is surrounded by a mud wall inclosing an area ½ m. long and ¼ m. broad and contains, among other striking buildings, two large mosques built of red brick, but falling to decay. It is said to have once contained from 12,000 to 20,000 houses but the number of inhabited houses is now comparatively small. Outside the town on an eminence 45 ft. above the plain, is a large fort, built of red stone, with a rampart from 20 to 35 ft. high, surrounded by two squares and twenty four round towers besides octagonal bastions which defend the gateway situated on the W. face. The rajah's palace is within the fort. During the sepoy mutiny a body of mutineers who made Indore their headquarters were openly contumacious by the rajah's authorities but as the rajah was a minor and was not properly responsible for the misdeeds of his guardians, his territory after a nominal confiscation has been restored. Pop. 5000.

DHAWAR a dist. and in India, presid. Bombay. The district between 14° 18' and 15° 30' N. lon. 74° 50' and 76° E. is bounded N. by Belgauz, E. the Nizam's Dominion and Bellary S. Mysore and W. the Madras dist. Canara and Belgauz greatest length N. to S. 105 m. greatest breadth, 77 m. area, 3537 sq. m. The surface is composed in a great measure of extensive plains. One small portion has an inclination to the S. W. and sends its drainage through a gorge in the Ghats to the W. coast, but the general declivity as indicated by the course of the Tumbhira, its principal stream, is towards the N. E. The soil is in many parts fertile and in its dry state is very silty nature and heavy undulating surface, is particularly adapted to the cotton plant, the climate also being congenial to the growth a large quantity of ground is annually sown with it. There are some cotton fields near the town, but the greater part of the district lies some miles to the E. the intervening land being chiefly sown with grain. About 270,000 acres are planted with cotton being nearly or quite the whole available extent. The cotton yielding about 250 lbs. (unseeded) to the acre, is not pressed in taler but packed in loose bags, and sent to port on the backs of bullocks, but a better system is being introduced. The cultivation is carried on chiefly by the ryots who occupy holdings averaging about 24 acres. A good deal has been done lately in the construction of new and repair of old roads, and in providing and renovating tanks. Pop. 754,835.—The town cap. of the above dist. presid. and 275 m. S. S. E. Bombay consists of a petty or native town inclosed by a ditch and a low mud wall of no strength and of a fort which situated in a plain N. of the town, is surrounded both by a wall and an outer and an inner ditch, from 25 to 50 ft. wide, and nearly as deep. The works, though constructed principally of mud, and somewhat dilapidated present at least a formidable appearance. Three government

Surf. Inr. GAZ.—Vol. I

schools—English, Mahatma, and Canara—have been established here.

DHOLKA a m. India, presid. Bombay dist. and 28 m. S. S. W. Ahmedabad. It is surrounded by a mud wall 4 m. in circuit and though still a considerable place, shows that it was once of much more importance, by standing in the midst of ruined palaces, mosques, mansions and fine tanks unattended and filled with masonry. Pop. 2600.

DHOLPORE, a small native state and in India, Raj

poshima. The state, between lat. 26° 30' and 26° 57' N. lon. 77° 32' and 78° 30' E. is bounded N. and N. E. by Agra S. E. the Chambal separating it from Sandia's Dominion; and S. W. and W. Kacrowly; length N. E. to S. W., about 54 m. breadth 28 m. area, 1629 sq. m. revenue £70,000. The surface is in the E. level and sandy and in the S. W. hilly being traversed by low ranges of sandstone. The soil as may be supposed under such circumstances, possesses little natural fertility but being greatly improved by careful culture and liberal irrigation yields fine crops. The chief who is styled rana and the majority of the inhabitants are Jats. Estimated pop. 550,000.—The town cap. of the above state stands 1 m. from a bank Chumbal and 35 m. S. by W. Agra. It is an ancient place and indicates its antiquity by numerous old mosques and mansions. Almost all the structures are composed of the fine freestone of the district and exhibit, among other specimens of skillful and elaborate workmanship, some stone arcades, the trellis-work of which is as beautiful as when first made. The fort situated on the high and steep bank overlooking the river has a striking appearance. It is the only modern building in Dholpoore deserving notice as a large public bazaar for travellers. It was held by the Indore rebels for a time during the mutiny.

DHOLU a m. India, presid. Bombay dist. and 180 m. S. E. Bombay. It is a place of some trade and importance on the great road from Bombay to Agra and at the intersection of several others, but its position in a hollow surrounded by hills is a very unhealthy one. S. of the town extends to the sea have been constructed.—There is as oil or place of the same name upon the Bombay Baroda and Central India railway about 52 m. N. of Ahmedabad near which is the Mhye viaduct the loftiest in the line being 88 ft. above the river at a constructed of 27 spans of 60 ft. each upon the iron screw principle.

DHULIBHOGH or **DHULWARR** a m. India (Ujjain), 16 m. S. E. Baroda. It is a very ancient but decayed place, of nearly quadrilateral shape inclosed by a rampart 2 m. in circuit built externally of large heavy stones, and furnished within with a beautiful colonnade. At each angle of the rampart is a large tower and at intervals along it are of other towers of minor dimensions. On each face is a double gate, as in the interval a spacious area surrounded by a corridor and a guard room. The E. gate, in particular and a temple adjoining it are noble specimens of Hindoo architecture. Within the rampart there is a large tank of strong masonry giving access to the water by a magnificent ghaut, and bordered by numerous pagodas. These and all the other built objects are covered with elaborate sculptures of warriors on foot and on horseback, elephants, lions, camels, birds, snakes, and various other animals. Seen from a distance nothing can be more imposing than the appearance of it, but within the ravages of time and of war are everywhere visible. Though the number of inhabitants is still considerable, they attract less notice than the swarms of monkeys, which have made the ruins of Dhulibhogg their favourite residence, and are allowed by general consent to play their pranks without molestation.

DHULSAREE a river India, which rises in lat. 25° 20' N. lon. 78° 38' E. on the S. frontier of the Toola Ram Sansapatt country flows N. N. E. into Assam then N. W. and joins the Brahmaputra on its l. bank, after a course of about 140 m.

DIADIN a vil. Asiatic Turkey in Armenia, 125 m. E. S. E. Erzeroum, is said by Wagner to be one of the dreariest Khoorish areas he visited, but is a place of much importance to the caravans in winter as it furnishes them with provisions, and an escort if required. It is said to occupy the site of an ancient and important Armenian city called Zahrawan and has a castle, which some have attributed to the Genoese. Without view of it, to the S. E. rises the green

slopes of Mount Ala-Dagh in which the Maral tshel, or Russian Esquimaux, takes its rise.

DIAMANTE, or **PURTA GUANA** a to South America, La Plata, prov. Entre-Rios, 1 bank Paraná, 20 m. below Santa Fé, prettily situated on a height. Though comparatively magnificent as a town, it would be important for steamers ascending the river as here, for the first time, they would obtain suitable fuel that of the lowlands and islands being too soft for the purpose, whereas on the firm banks of Entre-Rios commencing with Diamante both the algebra and espartina attain great size, and from their remarkable solidity afford the best fuel for steamers one cord being fully equal to a ton of coal. Pop 1000.

DIEGO (San) [add] a to U. States, California near its S. frontier on a bay of same name; lat. 32° 45' N lon 117° 10' W. It stands in a district remarkable for its sterility but said to be rich in minerals, including gold, copper, quicksilver and coal and consists of the usual square plaza, and some streets containing low and wretched-looking houses built of sun-dried bricks. The country buildings which are small and in bad taste, and a few churches, are the only public edifices. The harbour though not protected from the E. wind is considered the best on the W coast of America between Acapulco and the Strait of Juan de Fuca. The Indian natives live chiefly by fishing and making salt. Pop 731. — (Fisher's Atlas 133, 1861)

DIGNIGGUR, a to India, presid. Bengal dist and 18 m. N W Bardwan about 5 m. from the railway from Bardwan to Ranaghat. It is a large place inhabited by a considerable number of wealthy natives and has a considerable trade in sugar the produce of the surrounding district.

DIKOWA a large to E. Africa, Barotsi in the Gambia 60 m. S by E. Kotawa. It is surrounded by walls, which overtopped by the regularly shaped crowns of magnificent fig-trees give it a very imposing appearance and at the same time form a most effective defence being about 30 ft. high terraced on the inside and in good repair. The huts lofty and of a round shape want the characteristic to be seen elsewhere with a courtyard, but towards the interior the streets are formed out of huts, but of clay built houses.

The favourable impression produced by the general appearance of the place is much aided by the number of large, beautiful wide spreading fig-trees, dense groves of palm-trees and occasional isolated paper trees. The inhabitants cultivate cotton to a large extent, but their fields, overgrown with rank grass and even bushes, prove them very slovenly cultivators. At some distance, S. of the town flows a stream called the Yalwe which sends its waters to Lake Chad. Pop roughly estimated at 25,000.

DILILIA a lake, S. Africa, country of the Balonda, on a plateau or elevated prairie 4740 ft. above sea-level lat. 11° 32' S lon about 22° 25' E. It is a fine sheet of water somewhat of a triangular shape, 6 or 7 m. long by 1 or 2 broad. The most interesting circumstance connected with it is that it probably forms part of the watershed between the Atlantic and the Indian Ocean, furnishing notwithstanding its limited dimensions, the sources of two rivers, the N and the S. Lombarda, the one of which sends its waters through the Kama to the former ocean and the other through the Zambezi to the latter.

DINDIGUL [add] a to India, presid. Madras, dist. and 80 m. N W Madras in the middle of a wide plain surrounded by hills and 720 ft. above sea level. The town which stands on a gentle slope, low wide streets, well-built houses, and plentifully supplied bottom. The fort, which is on the W side of the town, and made some figure in the wars of the Carnatic, is merely a fortified rock which rises abruptly from the plain to the height of 280 ft. and consists of a singular wedge-shaped mass of granite veined with feldspar and, with the exception of a few patches, perfectly bare of vegetation. The military lines situated at the N W corner of the town on the highest part of the slope are well drained and always dry and clean. The manufactures consist of an excellent black and white fabrics of Cochin wool, some silks, muslins, and coarse goods, paper implements of husbandry and domestic use. Pop about 6500 exclusive of the detachment of troops.

DINKA a negro tribe Central Africa inhabiting a territory which lies between Senaar and the Sobat on the N

and S. and between the White Nile and the Blue Nile on the W and E. Part of this territory is well adapted for grain but the far greater part of it is covered with a coarse herbage on which the Dinka rear immense herds of cattle. These however tempt the cupidities of their neighbours, particularly the Shillouks, living on the opposite bank of the river who are ever on the alert to cross over in their canoes and commit depredations. The Dinka, who are a hardy and powerful race are thus deterred from availing themselves of the rich pastures close to the r. bank and usually reside in the interior beyond the reach of their persecutors.

DIRAWUL, or **DILAWUL** a fortress India, Bhawalpoor in the desert, 40 m. E. of the Furdgh. It is strongly fortified, but probably its greatest security lies in its position, which is approachable only through a parched desert entirely devoid of water. The nabab Blaw Khan used it as a treasury as well as for garrisons or for safety. Gunpowder for artillery purposes but of inferior quality is manufactured in it.

DISANG a river India, which rises in the country of the Nag tribes flows first N then N W through the British dist. Sanchpur in Assam and after a course of about 20 m. joins the Brahmapootra on its left bank lat. 27° 4' N lon 94° 30' E.

DIBNA a to Rattana gov and 120 m. N E. Wideship circle and on a stream of same name, at its confluence with the Dena. It has four churches and a parish-school and contains 6208 inhabitants.

DITI (1) a to Austrian empire Transylvania, circle and 48 m. N by E Udvarhely with a mineral spring, and 4464 inhabitants.

DJEBEL RHOMER See SHOMER (Damen) in Egypt.
DJEBEL TOW'YK See FOWAK (Damen) in Egypt.
DJELAJIL, a to Central Arabia, kingdom of Nejd, 128 m. N N W Raab. It is remarkable for its remote antiquity being mentioned by Arab writers before the Mahometan era. It is a considerable town, with an unusual extent of palm groves and plantations irrigated by a rivulet which springs from a fountain 12 to 16 in. from the town and flows between grassy banks in a considerable stream down itself in the plantations of the suburbs. Run sung water of this kind is very rare in Central Arabia. The buildings of the town and its walls are noticeable for their pretty situation among the trees in the locality. It is named from the hills attached to the necks of mules and sheep.

DJIRBA a tribe, Central Africa dwelling on the N bank of the Sobat, an affluent of the White Nile about lat. 7° N and lon 37° E. They are a fine tall race of a dark brown colour and a warlike temper. Their ordinary weapons are spears and clubs—the former from the security of iron often pointed with antelope horns straightened and finely sharpened—they add a peculiar kind of iron-brocel which tapers out to a sharp edge, and is used in close combat with an assegai. Another singular practice of these warriors is to interweave the hair of fallen enemies with their own at the back of the head and thus form a tangle of about 4 inches wide, which is decorated with cowries, and so long that it reaches nearly to the ground. Elephants and lions are numerous in the Dybban country.

DJIMBIRI See KIRIRANDI in Egypt.

DJOUR a tribe Central Africa situated some distance to the S. of a large lake which seems to be an expansion of the White Nile near lat. 5° N and lon 27° E. Though not allied to the Dinka, they are like them pastoral in their habits, possessing large herds of cattle and numerous flocks of sheep and goats. Agriculture is practised but being looked upon as an inferior species of employment is left entirely to the females. The chief articles of food are milk and grain the latter not of native growth but obtained by barter with neighbouring tribes. Dress is confined to the married females only and consists of an apron of scanty dimensions all old men, like their congeners the Shillouks, who live considerably to the N, going naked. Notwithstanding the low state of civilization thus indicated the Djour have made some progress in one of the most important branches of industry not only smelting iron-ore but rendering the metal malleable, and manufacturing it into bow lathe-like lances, &c. with a skill which considering the rudeness of their implements is astonishing.

DJOWF *Tra* [the belly] a valley and province of the kingdom of Djebel Shumra forming an oasis in the N W of Arabia, lat. (of center) 29° 30' N. lon. 40° E. It is a large oval depression lying generally E. and W 60 or 70 m. long and 10 or 12 m. broad between the desert which separates it N from Syria, and the sandy waste intervening S between it and the mountains of the Djebel Shumra the nearest of the central Arabian plateau. Approached from the W it has the appearance of a deep broad valley descending ledge after ledge till its innermost depths are hidden by far reaching shelves of reddish rock. Below everywhere studded with palm-groves and clusters of fruit-trees in dark green patches, down to the furthest and of its windings. It consists of a border its capital of the same name and the populous town of Belakani about 13 m. N E of it, several villages and hamlets clustering round water-springs and containing from 20 to 50 or 60 houses in each. Attached to it are, as to the principal towns, are extensive gardens, which are much celebrated for their productivity. The date-palm apricot, peach, fig-tree, and vine are largely cultivated and their fruit is very superior in both flavor and abundance. Corn leguminous plants and many other vegetable are grown extensively the land being carefully and continuously irrigated by running streams of pure water. The inhabitants are tall, well proportioned of rather fair complexion with long curling black hair and features for the most part regular and intelligent they are thus good specimens of the pure northern or Semitic Arab type. Then I negatively too is noteworthy it being so uncommon to find a man of seventy set out fully armed with a band of youths. The climate is good and dry during the months of June July and August, the temperature is said to average about 90° or 95° Fahr in the shade at noon at night the air is comparatively cool. The inhabitants are stated to have once been Christians before their rebellion conversion to Islamism, and to be descended from the ancient Arab clan of Tal. Towards the end of the last century the Djowf was subjected to the Wahhabite monarchy but after the overthrow of the Najdian empire in 1817-8 recovered partial independence but it became long distracted and exhausted by intestine civil extension, till the surrounding Bedouins were able to force the inhabitants into a tributary position. Upon the rise of the new kingdom of Djebel Shumra a little to the S, the Djowf was soon marked out for subjugation which though incomplete for a time, was effected in 1855 by Ismail the reigning prince, who stormed the capital and destroyed the dwellings, and seized the chiefs of the nation opposed to his rule. A governor of the town and province was appointed and under a new system of government the district has recovered much of its former strength and prosperity while the inhabitants are once segregated by houses and social quarrels almost to the lot of Bedouins have advanced rapidly in civilization as well as in wealth numbers and commercial activity. The population of the valley or province is estimated at 45,000. (*Julgraves's Central and Eastern Arabia*)

DJOWF a in Arabia, chief place of the above district, 350 m. N Medina. It is composed of eight villages, which though now merged into one town still retain the distinction of quarters. The principal is that of Haboub which contains a castle and about 400 houses. The other quarters of various size stretch up and down the valley that are enclosed by their extensive gardens. The entire length of the town thus formed is about 4 m. but its breadth nowhere exceeds half a mile. Every family has a separate dwelling. The better kind of houses have an outer court for unloading camels, &c. an inner court, a large reception room and several smaller private apartments occupied by the family. Very many of the houses have a round tower 30 or 40 ft. high, and 12 ft. or more in diameter with a narrow entrance, and loopholed above, sometimes contiguous to the building and sometimes placed in the adjacent order, the use of the towers appears to be as places of refuge and defence in the surrounding lands of rival chiefs. They are built of unbaked brick of great thickness and solidity. At the present time they are generally in a dismantled and half ruined state. While the houses of the upper class are thus usually detached those of the lower orders are clustered together with no regard for order. The Djowf being in this way a mixed collection of houses and gardens is naturally unvalled. The

gardens are inclosed with high walls of unbaked brick, and are intersected by a labyrinth of little water-courses, passing from tree to tree and from shower to shower. The population is estimated at about 17,000.

DOBCHAYE, a in Austrian empire, Galizia, circle and 16 m. S.W. Bochnia, cap. dist. of same name with the ruins of a strong castle seated on a height overlooking the Raba. Pop. 2390.

DOBRIČA a in Austrian empire Sardinia, cap. dist. of same name with a parish church and a school and 2430 inhabitants.

DOBRUDZHA (Tula) a territory in the north-east of Bulgaria, European Turkey is included between the Danube, which forms its boundary on the W and N the Black Sea on the E and Trajan's Wall on the S which extends from Kustelji on the Black Sea to Chernavoda on the Danube. In its centre it is traversed from N to S by a range of upland downs which forms a sort of watershed between the Danube and the sea in the E it is marshy and combines several lakes. There is a great scarcity of good water for drinking. It contains, however many fertile spots but in the summer the countries adjoining it resembles a desert. With the spring from the melting of the snow, the soil takes the appearance of a vast muddy slough. The inhabitants support themselves by rearing sheep and buffaloes. The fauna is large and diversified comprising eagles, bustards cranes wild geese partridges, kites, ducks, wild swans, and wild dogs. The principal town is Balasgrad situated in the N.E. about 4 m. to the W of Lake Kanasia. In Dobrudzha is noted the victory of the Russian war by the entrance into it, in 1864 of the Russian army compelling the Turks to fall back to the fortress of Shabla.

DOBZHEVICH a in Austrian empire 1st incl. circle and 23 m. S.W. Prague cap. dist. of same name. It has a parish church a castle with large garden, a chemical works a potash refinery a brewery a distillery a steam and two other saw mills. Pop. 2000.

DOLMATOV or **DOIMATOV** [add] a in Russia gov. and 300 m. S.E. E. Ierni, 1 bank Irkut. The town now of considerable importance has fallen into decay and is now only a village. It contains a large and splendid monastery dedicated to St. Dolmatov standing on an eminence on the bank of the Irkut, and its function with the river Archa. The walls surrounding it give it the effect of a Kremlin which indeed it much resembles in its architectural features. The surrounding country is well wooded the soil fertile producing good crops of rye and wheat. There are no forests in the fields here every village has a ring-fence of posts and rails enclosing a considerable area, with gates on the road and a watchman to shut and open them and within this inclosure all the cattle and poultry of the village are turned out to feed. (*Atkinson's Sib.-via, 161-2*)

DOMBĀN KIBANDA a dist. S.W. Africa, prov. and about 40 m. S. Benguela. It is inclosed by bare volcanic mountains and contrasted with the parched and sterile tract by which it is approached looks like a green oasis. Its fertile soil irrigated by the Kupaal makes it the granary not only of Benguela, but of several districts situated further to the N. Its inhabitants belonging to the Hamudom tribe are excellent cultivators, and in addition to their agricultural crops prepare large quantities of manure, which is disposed of to the European factories along the coast. They also possess numerous herds of cattle, for which the grassy banks of the Kupaal afford a rich pasture. In the mountain surrounding the district copper sulphur and saltpetre are said to be found but no attempt has been made to work them. The Portuguese have here only a nominal authority of which the principal sign is a small fort with a garrison of 20 men. Pop. 10,000.

DOMOKOS (Bazar) a in Austrian empire Trencsina, circle and 80 m. N.E. Udrachy. The inhabitants are chiefly employed in mining and smelting copper. Pop. 2430.

DONARI a in Western Africa, Bornu country of the Manga, about 90 m. W by N Birni. It was formerly a considerable place, and is still surrounded by a certain rampart, enclosing a large area of which however only a small portion is actually occupied. The majestic monkey bread trees are the chief ornament of the place. Cattle seem to form the wealth of the inhabitants.

DONDE, a tn. S.W. Africa, Kimpunda country territory, Kaibanda, on the Kalaba, near for source, and on the W edge of the Kalaba Basin desert. It stands on a lofty plain under the shade of *Acacia* trees. The inhabitants, taking advantage of the high carriage which road through it devotes themselves chiefly to trade. Pop 3000.

DINGI RPOOR, or **DOONBURPOOR**, a native state and to India Rajpootana. The city, between lat. 23 35 and 24 3 N. lon. 78 40' and 74 18 E. is bounded N and E by Newer Rajpootana, S.E. Banavara, and S. and S.W. by Mace Canals, dist of Gajrat length E to W 40 m; S. 25 m. area, about 1000 sq m. Revenue, £10 900, from which the British government is entitled to draw not more than three-eighths as tribute. Pop. 100 000.—The river, esp. of the above state, extends 110 m. N.N.E. Baroda, is of considerable size and fortified and contains the palace of the royal who reside in it.

DOODHOO, a tn. India, Rajpootana, state Jeypore 148 m. E. Agra. It is of considerable size contains 100 houses and more than 100 shops, is enclosed by a ditch and ramparts nearly a mile in circuit, and is, moreover, defended by a small fort built of masonry and faced with earth.

DOODNA, a river India, which, rising in the N.W. of the Nimnā Domes, lat. 20° 3' N. lon. 75° 15' E. flows S.E. and joins the *Foran*, an affluent of the *Godevady* after a course of about 120 m.

DUR, a tribe Central Africa, inhabiting a territory whose S. frontier is said to be in lat. 3 N. and in lon. 27 E. and to extend above 300 m. from S. to N. The surface generally is well adapted for agriculture and is carefully cultivated by the inhabitants, who display much skill and industry both in raising the crops and in harvesting them. Their dwellings are constructed of a beautiful basketwork of cane, with perpendicular walls 6 ft high crowned with a pretty cup-like-shaped roof. Their food consists principally of a thick porridge of maize flour flavoured with a sauce of herbs and red pepper, but animal food, whenever it can be obtained, is so much relished, that even rats, mice, and snakes are greedily consumed. In regard to dress the Dur display feelings of decency and propriety unknown to the neighbouring tribes of 1 jour.

DUR, or **LUBARD**, a tn. Western Africa, esp. prov. Libéria, 320 m. W. Monrovia lat. 14 11 N. lon. 0° 7' Though once of importance, it is now in a state of miserable neglect and decay the wall which surrounded it having been allowed to become a mere heap of rubbish. It has, however, an important market, being a great place of resort for the Arabs of *Liberia* a district to the north of Timbuctoo, who bring to it great quantities of the salt of *Tadmert* for the *Wangvira* or *Eastern Mandingoes*, who bring white kola-nuts and also shells, ardently imported from Sierra Leone or the river *Vinnar*; and for the people of *Moss* who bring cheap cottons and fine donkeys, the latter in great demand. There is said to abound in thieves.

DORH, **DORH**, or **DORH**, a harbour Indian Archipelago, on the W. E. shore of the N. province of Papua or New Guinea, near the entrance of Great Geopline Bay, lat. 0° 51' S. lon. 154 E. The inhabitants occupy four villages on the borders of the sea, two on the N. side of the harbour and the two others on the islands *Mau-Somari* and *Mau-Sompi*. Many of the houses are within water-mark raised on posts, and reached by a rough and tottering causeway. They are very low and long, with roofs shaped like the convex bottom of a boat, and are rarely put together with any materials that chance to be most easily obtained such as old mats, coconut-leaves bits of board broken boats etc. except in that most wretched of all. The people recognize the sovereignty of the Sultan of *Tidore*. The harbour is entered by a long low promontory extending round towards the African range, which rises abruptly from the opposite shore to a height of 8500 ft. This promontory is a round coral reef apparently of recent formation. A narrow channel about 5 m. long leads into the harbour which is of very limited extent, but well sheltered and with sufficient depth, over a bottom of sand and shells, for vessels of any size. A fine river discharges its water into the harbour at its N. extremity. On the S. side is a fort built by the Dutch in 1828 for the protection of a colony which they had just established. The locality is very unhealthy.

DORFEL, a tn. Austrian empire, Bohemia, circle Bannat, about 5 m. from *Biklanitz-Austria*, with 2175 inhabitants, who are chiefly employed in weaving and spinning yarn.

DORNA WATERA, a tn. Austrian empire, district Bannat, 48 m. S.W. *Smurava*, on the *Highroad to Silesburg*, and not far from the *Blatitz* and the frontier of Moldavia with a sulphur spring and a bathing establishment attached to it. Pop 2418.

DOROHAI, a tn. Turkey in Europe, Moldavia circle of same name, on the *Shilka*, an affluent of the *Pruthi* 60 m. N.W. *Jassy* is an entrepôt for the manufactures sent into Moldavia from Austria, France, Prussia, and Saxony and has important annual fairs.

DOUERA or **DOUERA**, a tn. N. Africa, Algeria, prov. and 17 m. E.W. *Alger*, on a bare and rugged site, about 560 ft. above the sea. It is an important military post and consists of clean and regular streets. Scarcely an except for the produce of the surrounding districts, it carries on a considerable trade in corn and cattle. The whole neighbourhood is covered with vineyards and mulberry culture and tobacco plantations. Pop. 1800.

DOUGLAS, a tn. Canada East co. and on the S.W. shore of the Bay of Gaspe, at the point where the latter receives the *R. John*. As yet it is little more than a village of fishermen and farmers, but its excellent and abundant catch of cod in any part of which vessels may anchor in 11 to 6 fathoms over sand and clay bottom promises to give it maritime importance. The shore leading to it from *Peter's Point*, a distance of 13 m. presents a succession of precipitous headlands, the cliffs of metamorphic shale and sandstone rising to the height of 200 ft. above the sea.

DOUHA, a vil. L. *Matras*, *Oila*, r. bank 12 m. from *Wass*, near the mouth of *Fagar* Creek and on the *Oiso* canal about 80 m. S. *Cleveland*. It is regularly built, possesses six churches, a woollen factory, several tanneries and mills, and is the shipping point for large quantities of wheat and flour. The river in the annual snow at its mouth 400 000 bushels, and the latter of about 40 000 barrels. Pop. 1423.

DOWSA or **DOWSA**, a tn. India, Rajpootana, state Jeypore 110 m. W. Agra. It consists of a town and a fort. The town which is of considerable size, is surrounded by a stone wall in a very dilapidated state, and contains some large and richly-carved houses several Hindu temples, one of them a fine old structure, a mosque and many handsome tombs, all of these however verging to decay. The fort is built on one side of a rocky hill with a sea summit nearly 4 m. in circuit, and, besides being naturally difficult of access, is enclosed by a loopholed wall flanked at the bottom by two large bastions. It is used by the rajah of Jeypore as a state prison.

DRACUT, a vil. U. States, Massachusetts, on the *Marblehead* opposite to *Lowell* with which it is connected by two bridges, 25 m. N.W. *Boston*. It contains four churches, and possesses a woollen, a cotton and two paper mills. Pop. 1881.

DRAHA or **WADY DARAH**, a river N.W. Africa, Morocco, which flows in the S. slope of the *Great Atlas* about lat. 33 30' N. lon. 5 30' W. and proceeding southwards in a course remarkable for the number and extent of its windings is lost in the sands. Its length is supposed to exceed 300 m.

DREW POINT, a low flat promontory on the N. coast of Russian American Arctic Ocean lat. 70° 04' N. lon. 153 40' W.

DRISA, a tn. Russia, gov. and 100 m. N.W. *Vilnyak*, esp. circle and on a river of same name, at its confluence with the *Dnna*. It has two churches, a parish school, and a charitable endowment. At the village of *Khramin*, in the circle, a battle was fought between the French and the Russians in 1812. Pop. 3823.

DRUDRAJAPAFAM or **DOORARAHUPUTEM**, a tn. India, presid. Madras on the *Comorand* coast, W. side of the entrance into *Pollut* Lake, 60 m. N. *Madras*. The town is connected with *Madras* by means of the lake and a cutting, called *Cochran's* canal, about 14 m. long, and starting from the back-water near the town of *Pollut*. A little S.E. of *Drudrajapam* is the only place on the *Comorand* coast which offers the best protection to shipping during an eastern gale.

DRUSES [add] The region of Lebanon is shared between the Druses and the Maronites a sect of Christians,

who, up to 1840 lived with them in peace and harmony. The change of dynasty however, which subsequently took place, by the substitution of the Turkish sultan for that of Mahomet Ali, seems to have engendered a feeling of bitter animosity and deadly strife between the two peoples, in which the Druses were greatly excited and supported by the Turks, and more especially by the fanatical rabble of Damascus, considerable provocation also was given by the Maronites. The hostile spirit continued to increase in intensity till it broke out with fearful violence in the summer and autumn of 1860. The most atrocious massacres and barbarities were perpetrated by the Druses upon the unhappy Maronites which the Turkish government appeared unable to arrest, till an expedition from France, under the sanction of the principal European powers, sailed to the Syrian coast. Through its agency and the diplomatic intervention of the European states with the Sublime Porte, a species of tranquillity was restored and a guarantee given for the prevention in future of such scenes of horror and also for the punishment of those who had committed or encouraged the barbarities. Large subscriptions were collected in Britain and other countries for the relief of the unfortunate Christians of Syria, multitudes of whom though they had escaped the massacres in which thousands of their nation perished were reduced to beggary and exile.

DRZEWOHOSTITZ, a tn Austrian empire, Moravia, sits and about 14 m S.W. Neutitschein on the B station, with a parish church a castle an ancient townhouse and wool cattle, and other yearly markets. Pop 1500.

DRLIKOWA or **DIKOWA** a tn Turkey in Europe, in the N.E. of Adana eyalet Rum ili, on the Grank, 63 m. E.N.E. Sertari. Mountains: mosques, a R. Catholic and a Greek church and about 8000 inhabitants.

DURKA a river, India, which rises in Mount Gager or Gaigar in the dist of Kurum on lat 29° 37' N. lon 79° 25' E. flows first S.W. to the village of Surona, where it descends from the mountains into the plains, it is nearly due S. and joins the West Ramanganga, about lat. 25° 34' N. lon 78° 17' E. Below Heroos it often bears the name of Ganga and still flows down that of Nabal. Its whole course is about 90 m.

DUBUQUE, a tn U States, Iowa, on bank Mississippi, about 50 m below its confluence of the Wisconsin upon the Illinois Central railway and at the point where the three states of Iowa, Wisconsin, and Illinois touch each other. It stands on a broad plateau at the foot of hills, with terraced vineyards, not unlike those of the Rhine, extending several miles along the river here nearly a mile wide, in regularly laid out, and contains several handsome buildings. It is the central depot for the mining region of Iowa the lead from the mines in the vicinity being conveyed down the river in steamboats. Steam coal and limestone are abundant, and a quarry of variegated brown marble is said to have been found on the opposite side of the river. Its prosperity is owing partly to the extent of immigration to the far west, and partly to the rich lead mines. The town contains a R. Catholic cathedral several Protestant churches and two banks. Pop. 18,000.

DUCHE a tn W Africa, Hausa States, prov. Zambar, 140 m N.W. Kano. Its name, meaning rocks, indicates the peculiar nature of the place, a labyrinth of rocky eminences intersected by a red line giving it a very wild and romantic appearance. The houses scattered about in several groups among the rocks, are scarcely visible. The surrounding district having only a slight covering of fertile soil is well adapted for millet. In some parts cotton of good quality seems to be grown.

DUKELARBA a tn, Abyssinia, cap prov. Dageana, about 12 m. W. Lake Tana or Damben. It is a large place, with a church on a lofty height, but possesses no other object

of interest, as it is only recovering from the disasters brought upon it by civil war.

DUMARAN an Isl Indian Archipelago, belonging to the Celebese prov. of the Philippine Isles, and situated about 10 m N.E. Palawan, about lat. 10° 31' N. lon. 118° 22' E. It has a computed area of 151 geo. sq. m. and on its E. coast a small town of 1750 inhabitants with a R. Catholic mission. The coast is steep, with no anchorage for large ships, and little shelter even for boats the interior is covered with forest, containing the wild buffalo, the wild hog and deer. The people are employed chiefly in fishing trapping shell tortoises and pearls, and in gathering seedling swallows nests.

DUNAJOW a tn Austrian empire Galizia, circle and N.W. Bressan with a copper mill and 1600 inhabitants.

DUNEDIN a tn. New Zealand, S. Island or New Munster cap prov. Otago is situated on the E. coast, at the head of a fine bay or creek which may be said to form an outer and an inner harbour the former extending to Port Chalmers beyond which large vessels do not go and the latter to Dunedin itself, which is accessible only to light craft and

small steamers. The town which was founded in 1848 by a body of Scotch settlers in connection with the Free church, possesses a church, manse and school. Agricultural operations, which were for some time confined to the vicinity of the town, are gradually extending to other quarters, and it is confidently expected that the colonies will become large exporters both of corn and wool. The area occupied by the town and fenced around it is 629 acres of which 529 were under cultivation in 1861. The number of vessels entering the port in the same year was 256 of 84,194 tons being nearly quadruple that of the previous year the number leaving the port was 218 of 89,724 tons, showing a similar increase. Pop. (1861) 5666.

DUNKIRK [p. 61] a tn and port France. In consequence of the increase of the population and the limited area within the ramparts, much difficulty has been experienced in procuring sufficient accommodation for the inhabitants. The Beau Ville in particular is very unhealthy owing to its crowded state and the ditches flowing it on all sides. The local authorities, however have prevailed upon the government to level a part of the ramparts and fill up the ditches, hitherto productive of fever and ague, so that building may be freely carried on to the W. of the town. A new and handsome building the palais de justice, was finished in 1864, the section of which cost £20,000 besides the fitting up of the interior. A church is also to be built for the French Reformed congregation.

Agriculture is making rapid progress in the district of the town, both in cultivation and draining the latter being essential to the land about 10,000 acres of which have been subjected to it.

The Island cod fishery though less productive than in 1861 produced in 1862 a gross amount in weight of 11,900 cwt. of the value of £107,681. About 175 vessels, of 12,500 tons, belonging to the port, were employed in the fishery in 1863. Five oyster-beds, *perce d'Avre*, have been established, and well organized, and provided with the means necessary to render them profitable and profitable.

The principal imports in the year 1863 were tallow, grain, and live oil, rape-seed, bean, timber, iron, and machinery. The exports were chiefly raw sugar, wine, oil, flour, wheat, fruit, and vegetables. A brick trade in pug iron is carried on with Scotland and large quantities of machinery are imported, and iron rails, tyres, cast steel &c. from Sheffield and Hull. British vessels to the number of 771 and of a tonnage of 96,490 entered the port in 1863, bringing, amongst others, 259 cargoes of pug and manufactured iron. A considerable trade is also carried on with Spain, railway materials to the value of £62,131 having been exported thence in the same year. Timber from Norway also passes through Dunk, to the Interior in large quantities. P 8 000

DUNNVIK, a town in the Landed, W. of Halden, 50 m. S. by W. from Trondheim, on the Grand River and on the Buffalo and Lake Huron railway. It possesses five churches, several stores and saw mills amply supplied with water-power, a tannery and a foundry. The chief exports are wheat and sawn pine timber. Pop. about 1500.

DURANGO (add.) a town Mexico esp. state of same name on the elevated plateau of Anahuac at the height of 5500 ft. above the sea, in lat. 24° 25' N., long. 104° 30' W. Originally established as a military post in 1539 to check the incursions of the Chichimeca, it long remained without any importance, and dates its prosperity from the discovery of the rich mines of Guanajuato situated at some distance to the W. Its leading streets, its principal square, and most of its public buildings owe their existence to the proprietors of these mines. It has a cathedral and several other churches and chapels, four monasteries, an old Jesuit college, a mine, an hospital, a large tobacco factory and various other industrial establishments. In its environs are two celebrated places of pilgrimage, and out of the plateau in its vicinity rises a hill called the Cerro del Mercado, which is entirely composed of magnetic iron. It still more remarkable object to be seen in the same locality is a meteoric stone of the extraordinary weight of 41,600 lbs. P. 14,000.

DURBAN, a town in S. E. Africa, about 1 m. east of the anchorage in the large and fairly-sheltered circular bay which forms Port Natal. It is well laid out in wide streets, lined with beautiful trees, which give it a healthy and pleasing appearance, and consists of about 400 houses, chiefly of wood, but gradually giving place to stone houses. The inhabitants, mostly English, have an Episcopalian church and a Wesleyan Methodist chapel. A railway connecting Durban with the port about 2 m. distant, is meant to be extended along the fertile valleys, producing indigo, coffee, and sugar to the timber districts of Natal. Pop. 1500.

DURGUTLI (anc. *Eporea*) a town Turkey in Asia, Anatolia, 30 m. E. Smyrna. It stands among mountains in the vicinity of a large marsh and contains a pop. estimated at nearly 30,000, who are largely engaged both in manufactures and trade.

DURKAUNGDIRA (add.) a town India, Gujarat, peninsula Kattywar near the town of Beldi March, 75 m. W. Ahmedabad. Though greatly decayed it is still a place of importance, surrounded by a comparatively modern wall, and containing about 7000 substantial houses. Its manufactures are chiefly coarse cloth and carpets.

DURVILLE, an island New Zealand, off the N. coast of Middle Island or Munster. It forms a prominent feature in Cook Strait projecting into it as a bold and silent point from the E. shores of Bluff Bay to 37 m. long from N. to S., by about 6 m. wide and is only separated from the mainland by a very narrow channel. Its harbours are on the E. Port Hardy and on the W. Greville or Brooks Harbour. It has also on the E. a roadstead, called Rungtoun formed by three islands of the same name. The surface of Durville is

wooded and monotonous, attaining in its highest point an elevation of 2180 ft. Stephens Island, 2 m. N. E. of Durville, though only 1 m. in extent, is a scarcely less prominent object, as it rises abruptly from the sea to the height of nearly 1000 ft. Coasters sometimes pass between these islands, but never without risk.

DUSKY a sound or bay New Zealand in the S.W. extremity of Munster or Middle Island, lat. (Five Fingers Point) 45° 44' 15" S., long. 165° 27' 45" E. It is formed between Five Fingers Point, the S.W. extremity of Resolution Island, on the N., and South Point on the S. having between them a width of 4 m., stretches in an E. N. E. direction for 22 m., and is studded with numerous islands and rocks. The principal anchorages are Pickett Harbour and C. Jacobs Cove on the S., and Puddle Harbour and Dunk Cove on the N.; temporary anchorages may be found in other places but the depth of water is in general too great. Among the islands of the sound, are Anchor Island which lies immediately within its entrance, is 3½ m. long, and rises to the height of 1380 ft., and the three islands, Indian, Long and Cooper respectively 1½, 7 and 8½ m. long forming a chain which extends nearly to the head of the sound and leaves a navigable channel both N. and S. of it. Dusky Sound was so named by Captain Cook, who discovered it on his first and explored it on his second voyage.

DUTHUMI a settlement S. E. Africa territory Kilima, belonging to the basin of the Kilima, about lat. 7° 30' S., long. 37° 30' E. It is one of the largest and most fertile localities in the territory consisting chiefly of a plain of black earth and sand choked with vegetation where not corrected by the axe. It is watered by a perennial stream of same name, which, joining the Mpana an affluent of the Mgota, belongs to the basin of the Kilima. The means of irrigation thus furnished are carefully employed. To the N. of the plain rise the craggy hills of Duthumi stretching N. W. and ultimately it is said, becoming linked with the Kilima chain considerably to the N. W. It is also not improbable that they become linked in a similar way with the Ngara Mountains in the E. Their estimated absolute height is from 8000 to 4000 ft. They appear to rise abruptly but throw out branches which slope gradually toward, and seem likely to merge into it their jagged crests and peaks indicate a primitive formation. The Kilima is said to issue from a cove or fissure in the E. slope of these hills and to receive as many feeders as to swell immediately into a large perennial stream. Its affluent, the Mgota, rises in the W. slope, and flows along the S. base. Owing to the prevalence of rain and the great humidity of the atmosphere the Duthumi Hills are generally damp capped and never expose their outlines except in the clearest weather. Notwithstanding the allegation that water freezes upon the heights, the ordinary crops of the low land districts holms and manioc and sweet potatoes, are grown and cucumbers, beans, plantains, and sugarcane abound. The jungle at the base of the hills gives shelter to the elephant, the rhinoceros, the gazelle, &c. The great stress of Duthumi is the slave-trade. Arab traders often reside there for months for the purpose of purchasing slaves cheaply. I captured slaves among the chiefs of the Duthumi, and, scarcely a month passed without fields being laid waste, villages burned down, and the unhappy cultivators carried off for sale.

DUTTEAH a state and town India, Bundelkand. The state, between lat. 25° 32' and 26° 15' N.; long. 78° 15' and 78° 54' E. has an estimated area of 860 sq. m., contains 180 villages and produces a revenue of about £100,000. The rajah pays no tribute, but maintains a military force of 1000 cavalry, 5000 infantry and 80 artillerymen. He faithfully supported the British in the mutiny of 1857, becoming the rajah of Jaspur, who had revolted. Pop. 120,000. The rajah's cap, of the above state, lies on the route from Agra to Bangalore, between parallel low and rocky hills 110 m. S. by E. Agra, and is surrounded by a stone wall about 80 ft. high, but without ditch or glacis. It consists of narrow winding streets, in which, however, many of the houses are large and substantial. The rajah's palace, situated within a well laid out pleasure-ground of about 10 acres inclosed by a lofty wall with embattled towers at each of its four corners. Within the inclosure is a reservoir with a fine fountain in the form of an octagon, surrounded by adorned obelisks, with a

sculptured elephant at each corner spouting water from its uplifted proboscis. There are two other palaces, one within the town and the other outside but both untenanted. Pop about 40 000

DWALAGIRI [add] a peak of the Himalayas, in Nepal. This mountain which was formerly believed to be 28 000 ft. in height, is now ascertained to be only 26 838 ft. The highest point of the Himalayas range is Mount Everest. (See Everest)

DYALOUNG a river India, which rises in lat 36 4 N lon 93° 42 E. on the boundary between the Tchoon Rann Sempitney country and the British dist. Nongong

Lower Assam, flows W for 95 m and joins the Kallang an affluent of the Brahmaputra.

DYIKUMA, a cn. S W Africa, Kambunda country territory Salla, between the Kikombo and the Balombo 70 m N E. Benguela, is the residence of an independent native chief. The inhabitants employ themselves in agriculture, the making of Dingo leas and trade. The Dingo flowing from E. to W through the district adds greatly to its fertility. Pop about 1500.

DAWINGOOROD a m. in Austrian empire, Galicia, north and about 83 m N W. Bressan. It was once fortified, and stood several sieges. Pop 1400.

E

EASTON [add] a tn U States Pennsylvania, cap of Northampton r. bank Delaware and on railways connecting it with the Lehigh coalfield Philadelphia and New York, 84 m N Philadelphia. Though the site is rather uneven, the streets are regularly formed at right angles and spacious and there is also a public square. The principal public buildings and institutions are eleven churches and two Jewish synagogues, Ladysmith college with 6 professors 700 students, and a library of 4500 volumes; a superior high school, an academy and a farmers and mechanics institute. In the vicinity a cemetery of about 40 acres has been formed on picturesque ground overlooking Bushkill Creek. The industrial establishments include tanneries, foundries blast furnaces cotton factories silk factories and numerous distilleries and oil saw and flour mills. The trade is in the above articles, and more especially in flour and whiskey. Of the last 14 000 barrels were exported in a single year. The surrounding country is said to contain inexhaustible seams of excellent iron ore. Zinc also has been discovered and is worked to some extent. Pop. 8844.

EASTPORT [add] a v. U States Maine near the boundary between the U States and British America. It stands on the S E. shore of Moose Island communicating with the mainland by a covered bridge 1200 ft. long; is compactly built, and contains seven churches, six schools, and a public library. In its spacious harbour which is never blocked by ice, the tides rise 25 ft. Shipbuilding employs many of the inhabitants, and an active trade is carried on, partly with the British provinces and partly in the export of lumber. There is also an extensive fishery and at times 200 to 300 boats engaged in it may be counted within sight of the town. At the termination of the war in 1815 Great Britain claimed Moose Island, on which Eastport is built, and other islands in Passamaquoddy Bay but, in 1818 a commission appointed to decide the question adjudged them to the U States. Pop 3850.

EAST RIVER U States, is the name given to a strait situated between New York and Brooklyn and connecting New York Bay with Long Island Sound. It is about 18 m long by 4 m wide and has a rapid current caused by the tide of the Atlantic, which rushing through it reaches New York three quarters of an hour earlier than the tide from the bay and thereafter runs up the Hudson many miles in advance of the latter tide. East River is navigable by the largest vessels, but has a pass called Hellgate which is dangerous, though several of the more formidable obstructions have been removed by blasting.

EATON, a v. L States, Ohio, cap co. Preble, on the Seven Mile Creek and the Eaton and Hamilton railway 60 m N by W Cincinnati. It stands in the centre of a rich agricultural country and has some trade in its produce. Pop 1600.

EBED a tn Austrian empire Hungary co. and 20 m E. Komorn on the Danube. The inhabitants are partly employed in the culture of the vine but more especially in the sturgeon fishery which is here important. Pop 1120.

EHOLLMACUB a v. Canada East co. Chateaufort 1 bank St. Lawrence, 65 m N E Quebec. It has a R

Catholic church, but as most of the inhabitants appear to prefer official employment to private enterprise neither trade nor manufactures exhibit any signs of activity. Pop estimated at 2500.

ECHING a city and dist. in China department of Yangchow on the bank of the Yangtze River 20 m above Ching-chang and 204 m from Shanghai. It is situated at the junction of two small creeks one of which communicates with the Imperial canal forming a trading part of importance to native traffic. The town is pleasantly situated on rising ground about 2 m N of the river bank and presents a thrivng aspect compared with some larger cities. In the eastern suburb there is a fine temple surrounded by lofty trees and a seven-storied pagoda in excellent preservation marks the centre of the town. At all times along the creek leading to the great river a forest of masts may be seen with ensigns of every stripe and colour giving it a lively aspect. The port is not open to foreign commerce but as there is no prohibitory clauses in the treaty of Tientsin to prevent foreign steamers towing a large junk on the river from port to port, there is a non derelict traffic of it in kind carried on from Echng to Yangtze small steamers near the city of Fungchi 252 m higher up the Yangtze on the r. bank of the river. These junks are chiefly laden with salt from the Yellow Sea, conveyed up the small streams on the coast leading into the great canal. There is a high duty on this commodity as it reaches the central provinces of China where it is not found in a natural state. Formerly the junks had to pay the duty at the inland trade customs houses on the r. or which led to much smuggling and exaction. Since the foreign steamers have commenced to tow them an arrangement has been made between the mandarins of Ning and Ta-tu who collect the duty for all the customs, and allow the junks to pass under foreign flags from port to port without further levy. It is in this way that several ports on the Yangtze extensively devoted to foreign trade are open to merchants who have no hesitation in stretching the terms of treaties, and while they carry on the trading traffic between the ports at the rate of one mael (the 60) per ton they make a handsome profit on opium and merchandise for which there is a large demand at these towns for the interior markets. These innovations, it is expected may lead to Echng and other riverine ports being ere long added to the number of treaty ports. (M.S. Notes)

ECUADOR [add] a state, S America. In consequence of hostilities with Peru and New Granada, the prosperity of the state has been obstructed of late years. Commerce and industrial pursuits have been paralyzed labourers and artisans have been thinned and demoralized by being drafted into the army agriculture necessarily neglected and trade generally reduced to stagnation. The cultivation of cotton, which is produced with great facility has been suddenly and greatly extended the quantity grown in 1868 having been about 800 000 lbs and in 1869 9 000 000. Unfortunately the increase of population, but above all the wretched state of the country hinders the success of ardent commercial enterprise, which otherwise exists. The following figures

show the state of foreign trade during the years succeeding that of its most flourishing condition, 1858 —

	Imports.	Exports.
1858	2,556,324	2,414,344
1859	304,914	497,453
1860	439,577	912,426
1861	1,208,150	864,300
1862	861,701	455,238
1863	1,325,014	583,151

The number of vessels entering in 1861 was 273 of 64,480 to us, and of three outward bound, 265 of 57,614 tons. Pop. (1863) 1,040,371 of whom about 600,000 were whites.

EDGARTOWN a vii U States, Massachusetts, cap. co. Duke, on the N. E. side of the island of Martha's Vineyard, 75 m. S. E. Boston. It contains three churches, and has manufactures of oil, candles, and salt, boat-building yards, and a well-sheltered harbor with a pier 1000 ft. long a lighthouse, and from four to five fathoms' depth of water P. 9, 2119.

EDMONTON [Power] a station of the Hudson Bay Com. near British America 1 bank of the N. Saskatchewan 40 m. above its junction with Sturgeon River lat. 53° 33' N. lon. 118° 18' W. It is the most important establishment in the Saskatchewan district, and is inhabited by about thirty families living in the fort, who find employment in the making and repairs of the cattle boats, sleighs, &c. required for the Company's traffic. It has a wind mill, a forge, and carpenter's shop. Wheat grows luxuriantly and potatoes and other roots flourish as wonderfully here as everywhere else on the Saskatchewan. At Lake St. Albans, 9 m. N. is a colony of half-breeds, who have left the service of the Company and formed a small settlement presided over by a R. Catholic priest. The other colony of Lake St. Anne, of similar character but with more numerous inhabitants lies 40 m. beyond to the W.

EDROBN or **LYNOVA** a tn Turkey in Europe, Turkish Kervan, on the frontiers of Bulgaria, eyalet and 30 m. E. S. E. Nicia. It is beautifully situated on the banks of the Little Lika. There is a walk-mill and iron was at one time smelted and cast in the vicinity. Pop. about 2000 partly Bulgarians.

EDIR ENER, or **EDIR**, a state and tn. India Gujrat, Myhee Laanta. The state which is tributary to the Gujrat but under the political superintendence of the Bombay government, is ruled by a descendant of the celebrated Ajit Singh rajah of Jodhpur and yields a revenue of £23,451 under the deduction of £3,920 to the Gujrat's tribute.

The ruins cap. of the state situate 108 m. N. by W. Haroda, is encircled by hills on three sides, and on the fourth defended by a wall. On a hill completely commanding it are the remains of a ruined fort, in which the rajahs used to find an asylum in times of danger. The ascent to it is by a steep zigzag path protected by four gateways. An adjoining hill commands several Jain temples and the remains of a palace. Pop. about 6000.

ELKAIRET or **AKKERT**, a ruined tn. India, presided Madras ter Mysore, 20 m. N. Bednore, and 162 m. N. W. Seringapatam. It is now in a decayed condition but was once the capital of a powerful state. Inclosed by three concentric walls of great extent, it contains a citadel a large temple of Riva, and an ancient palace of the Sahavie dynasty famous in Hindu story. All the buildings, except the temple, are demolished, and the town is without inhabitants; the government having been removed to Bednore and the place deserted in the middle of the sixteenth century.

ELKA a country E. Africa, inhabited by the tribe which gives it its name, and is probably the most powerful branch of the Somali nation. It extends N. to the Weyna family of the Usakali S. to the Gudebeud and midway between Zaylah and Berberah E. to the Indian Ocean, and W. to the Gulf around Harar. The tribe said to number 100,000 individuals, is divided into numerous clans, which again are subdivided into minor segs. An agem, or chief, who resides in the Haddah hills, and is generally called Robleh is usually recognized as the head of the whole tribe but every tribal or temporary village has its own chief (sheikh) or headman from whom the settlement takes its name. His direct authority is very limited and depends in a great measure on his individual power and influence. The Elka are sociable, good humoured and warm-hearted, but at the

same time fierce and irascible, and (worse than all) proverbially cruel and treacherous. These Redwines, say the people at Zaylah, offer a bowl of milk with the left hand, and stab with the right. They are blacker and uglier than the other Somalis. Their wealth consists in flocks and herds.

EGBA, a name applied to the inhabitants of the walled town of Abbeokuta, W. Africa, and the adjoining districts. The Egbas are well made and muscular, and evince a greater facility in receiving the influences of European civilization than almost any other negro tribe. (See AMBOKUTA in Supp.)

EGLE, a valley Western Africa, Kanem, 175 m. N. E. Lake Chad. It is a very celebrated locality with the nomadic inhabitants of the adjacent regions and is temporarily frequented by a variety of tribes who visit it to water their animals at its famous wells, which have the reputed virtue of promoting the camel's growth and to collect the fruit of the amlak (*Capparis*) which grows here in great abundance. Egle, thus largely resorted to, is also a marked point for predatory expeditions.

EGGENBURG a tn. Austrian empire, Lower Austria, circle Upper Marchburgstadt at the W. foot of the mountain of this name, 49 m. N. W. Vienna. It is surrounded by walls, is the seat of several public offices, and has an old parish church, a museum house belonging to the Habsburgian congregration a madder mill and numerous farms. Pop. 1550.

EGMONT [add] a mountain, New Zealand occupying the outer portion of a peninsula at the S. W. coast of North Island or Ulster lat. (summit) 37° 18' S. lon. 174° 4' 43' E. Though not the highest it is the most strikingly remarkable mountain in New Zealand and in clear weather may be distinctly seen from a ship's deck at sea at the distance of more than 100 m. It rises in a perfect cone from a base of 80 m. in diameter to the height of 8370 ft. Its summit an extinct crater is flattened and covered with perpetual snow for nearly a fourth of its height. A saddle-shaped eminence forming a kind of neck on the N. W. has an altitude of 4600 ft. Numerous torrents descend from this mountain. The coast line of the peninsula on which the mountain stands is so nearly circular that supposing a pair of compasses were placed on the summit of Mount Egmont, with a radius of 14 m. and a compass were then described it would be an almost accurate delineation of the coast for a distance of 45 m. or from the Karpokemus streams to New Plymouth. — (New Zealand Pilot)

EGRI PALANKA a tn. Turkey in Europe, in the N. of Macedonia, eyalet and 41 m. N. E. Uskub. It has several squares, adorned with fountains and lined with houses, along which vines are planted. The shops are full of arms manufactured within the town and of iron the produce of iron-works in the vicinity. Pop. about 5000.

EGYDI (87) AM NEWALDI, a tn. Austrian empire, Lower Austria, circle Upper Wismarwald near the source of an affluent of the Danube, 48 m. S. W. Vienna, with many features of hills and various articles in steel and iron, and saw-mills. Pop. 1630.

EGYHAZA (88), a tn. Austrian empire Hungary co. Szabolcs, 29 m. N. W. Debrecen, cap. dist. of same name; with a Lutheran college an hospital an asylum for children, baths manufacture of soda and matches, a distillery three oil-mills and important yearly markets. Pop. 14,787 mostly Lutherans.

EHLEN a vii, Syria, prov. and 15 m. S. E. Tyrol in a beautiful and well-cultivated tract on the W. slopes of Lebanon about 10 m. S. E. is the famous group of cedars of Lebanon not less remarkable for their position than for their size and beauty. They are situated says Dr. Robinson, at the head of a vast amphitheatre looking W. surrounded by the loftiest ridges of Lebanon, which rise from 2000 to 3000 ft. above them, partly covered with snow. In the midst of this vast temple of nature the cedars stand as the lonely sentinels, with not a tree, and scarcely a green thing beside.

EHRENBERG (Old and New) [add] two contiguous places, Austrian empire, Bohemia, circle and 85 m. N. E. Leitmeritz with a parish church two mills, and large manufactures of Manchester goods. Pop. of Old Ehrenberg, 4608 of New Ehrenberg, 1800.

EHESKOWICE, a tn. Austrian empire Galicia, circle and 4 m. N. E. New Bauden cap. dist. of the same name

near the Buia, with an important trade in linen, and 1950 inhabitants.

EIKHAMS, formerly a missionary station but now the residence of an independent chief, S. Africa, Damara land is prettily situated on the slope of a hill which, though here on its summit, has its base clothed with large groups of mimosa, and watered by a tributary of the Bushok. The springs in the vicinity one of them with a temperature of 190° are infinitely copious and elevated to afford ample means of irrigation, and the soil thus treated is very fertile.

Taking it as a whole excites Mr. Anderson, Eikhams is the prettiest place I ever saw either in Damara-land or in Namaqualand. Unfortunately all this beauty could not secure permanency to the missionary station and hence both the excellent dwelling-house and most substantial church which had been erected are falling rapidly to decay.

KINSIEDL a tn Austrian empire, Hungary co. Zips, on the Gilmits about 18 m N W Leutachan, with mines of silver and copper. Pop. 2400 mostly Lutherans.

Elphel, a tn Austrian empire Bohemia, circle and 27 m E. N. E. Gitchin with a town-house, a parish church a brewery, flax-spinning and other mills. Pop. 1800.

EISENBACH a tn Austrian empire, Hungary co. Bars about 6 m N Bohemian, with pleasantly situated and much frequented thermal baths and mines of gold and silver. Pop. 800.

KishNHROD a tn Austrian empire, Bohemia circle Banaua, on the Pardubitz and Reichenberg railway with several public offices, a parish church a town house yarn-spinning factories, and three mills. Pop. 2084.

ELIEL, a tn Austrian empire Galicia, circle Wadowice about 34 m S W Cracow. In the vicinity are the extensive blast-furnaces and other iron works of Wegu la-Gorda. Pop. 1300.

EL-AKRAABI a tn N W Africa near the W borders of the Sahara, on the caravan route from Shinghet to Nusi it consists of a number of huts enclosed within a mud fort, and some houses of a better description situated outside. Altogether it is a poor place and dirty in the extreme as the horses, camels and other domestic animals are regularly shut up within the courts at night to prevent their being carried off by a robber tribe which grows in the vicinity.

ELAMIAZLA, a tn India, Punjab Regal, dist. Jhelum, about 90 m N Calcutta, on the bank of the Jhelum which is here navigable. It is a great mart for rice which is extensively grown in the vicinity. Pop. 2950.

EL-BASANI a tn Turkey in Europe, Albania, eyalet Rum Eli, on the Skutari 63 m S. S. E. Scutari. It is the see of a Greek bishop, contains a Greek church and three mosques, and has a much frequented market. In the vicinity is a monastery founded about the beginning of the 11th century and about 10 m. S. W. are ten hot sulphur-springs. Though consisting of about 5000 houses it does not contain above 4000 inhabitants.

ELHUKOSTELTZ, a tn Austrian empire, Bohemia circle and about 18 m N. E. Prague on the bank and on an island of the Elbe, with a parish church (town-house, hospital, and cavalry barracks. Pop. 1500.

ELBTEINITZ, a tn Austrian empire Bohemia, circle and 12 m N W Casselau on the Elbe, a little above Koile, and on the Vienna and Prague railway with a parish church a town-house, a brewery and two mills. Pop. 3469.

EL-BIOD-SHEIKH, a tn S. Africa, Algerian Sahara, on a plain on the S. E. side of the high El Ghazal range 180 m S. S. E. Oran. It is surrounded by a castellated wall 10 ft. high, and flanked by four small towers, is defended by a castle and contains a mosque with a minaret. The inhabitants, occupying about 180 houses, are chiefly employed in agriculture and the weaving of woollen stuffs. El-Biod-Sheikh is only one of a cluster of six villages which bear the common name of El Abied Sidi Sheikh, and are under the rule of the chief Marabout of the Ulad Sidi Sheikh tribe. As might be expected under such circumstances the villages contain no fewer than seven Marabout establishments. All of them are well endowed by gifts and the offerings of pilgrims, and one in particular occupying a central position in the group, is a handsome structure, rendered conspicuous by its white dome, and richly decorated within the pavement being covered with carpets, and the walls hung with ostrich feathers, Bore Inf. Gas.

ostrich eggs, skins, and mirrors. The villages are surrounded by productive and well watered gardens, stocked with date-palms and other fruit-trees.

EL-FUERTE a river Mexico, winds rising among the mountains of Chihuahua, near the watershed between the Pacific and the Atlantic, flows first N W past the town of Uruque whose name it then bears in the upper part of its course, and then, on receiving the Rio Verde on its N bank changes its course to E. flows past the town of its name, forming the boundary between Sonora and Sinaloa, and after a course of 400 m falls into the Gulf of California, in lat. 27° N lon 110° W. Though broad and deep particularly during the rainy season for a considerable part of its course, it is so shallow at its mouth that it cannot be considered navigable except for the smallest craft.

EL-FUERTE a tn Mexico, dep. and 70 m N by W Sinaloa I bank river of same name lat. 26° 56' N lon. 106° 59' W. Before the Spanish yoke was thrown off it was a petty village, composed chiefly of Indian huts, but Sonora having after the declaration of independence made it the seat of government, it soon became a flourishing town of 5000 inhabitants. This property was not destined to last. Another political change made Alamo the seat of government, and El Fuerte sunk as rapidly as it had risen. It has now scarcely 8000 inhabitants and possesses nothing worthy of notice except its fine cathedral. Mining and agriculture constitute the chief employments.

ELGIN a tn United States, Illinois on both sides of the Fox River and at the junction of the Fox River Valley and the Galena and Chicago Union railway 14 m N W from Chicago. It is a prosperous trading place with several academies and schools, manufactures of agricultural implements and carriages a distillery and a flour mill. Pop. (1869) 9797.

EL GULLA EL GOUELA or EL MEWIA a tn. N Africa, Algerian Sahara lat. 31° 58' N lon 0° 12' W. It consists of a high town crowning the summit of a rock and surrounded by lofty walls, and a low town occupying a hollow between the high town and the spur on which are still seen the ruins of the ancient Quana. Around both towns but without any attempt at regular arrangement are a number of date plantations. The houses composed of four earthen walls with a roof of palm-branches are divided into two or three apartments, each with a court attached but they have no terrace and are invariably of a single story. El Gula is of Berber or gub but the Arabs, who gained possession of it have so completely extinguished the former nationality that the Berbers still forming the bulk of its population have forgotten their own idiom and speak Arabic.

EL-HAMRA a vil W Arabia, Hejaz, 70 m S. S. W Medina. It is built upon a narrow shelf between a high steep hill and a sandy watercourse about 1 m broad, and consists of a collection of huts of unburnt brick and mud roofed over with date-leaves. It possesses a fort, and contains a bazaar consisting of a few shops disposed in a long lane. Dates, grown in its palm-orchards grain ready-made bread horse-platains rice, butter and similar articles are plentiful and cheap. Like all settlements in El Hejaz it is half in ruins but thickly peopled wherever the walls are standing.

EL HODH [the ham] an extensive district, W Africa lat. 17° 30' N lon 8° W to which its Arab inhabitants have given its name from the being surrounded by a range of rocky hills called EL-KI oia. At the one extremity of the range stands Walata, and at the other Tibhi, both belonging to El Hodh and so far fixing its limits. The N. E. part of this district, called Ark from the fact of being enclosed on the W and E by light sand-hills, is rich in wells and some centuries ago was densely covered with small towns and villages. Several other districts of El Hodh from the want of water are not habitable. Baphna, though sometimes viewed as distinct naturally belongs to the district of El Hodh and is one of the most favoured portions of it being no less fit for fixed settlements than for nomadic wandering.

EL-HUBN or KALAWAT HUBN a vil Syria, prov. and 33 m N. E. Tripoli. It is the site of an ancient fortress, occupying a height from which there is a view of the waters flowing E to Lake Hume and W to the Mediterranean and commands a pass which must always have been of much importance.

ELIZABETH or **ELIZABETH CITY** two places, United States.—1 A in New Jersey cap. co. Union, on Elizabethtown Creek 2½ m from its entrance into Staten Island Sound, and on the New Jersey Central and the New York and Philadelphia railways 9 m S.S.W. Jersey city. It is built on an eminence in regular and straight streets shaded with trees, contains twelve churches and a number of excellent schools, and has several large manufacturing. Its port, situated in the second is accessible by vessels of 800 tons, and the town itself by vessels of 50 tons. Pop. 11,567.—2 Elizabeth / *de N* Carolina, cap. co. Pasquotank, on the river of that name, 20 m above its mouth, 110 m N.E. Goldsborough. It is one of the principal towns in the N.E. part of the state, and communicating with Norfolk, Virginia, by the Pasquotank and the Dismal Swamp canal exports lumber and the various products of the panhandle. Pop. 1798.

ELIZABETH a cape Russian empire forming the N. extremity of the island of Saghain lat. 54° 34' 30" N. lon. 142° 46' 30" E. It is a mass of rock terminating an interrupted mountain chain, and presents a number of pointed summits, on which no vegetation of any kind appears.

ELIZABETHGRAD a town Russia, 70 and 126 m. N. Kherson, cap. circle of same name, on a beautiful plain watered by the Ingul lat. 48° 30' N; lon. 32° 30' E. It is a thriving place defended by a citadel and has a church an arsenal a large hospital and several religious schools for the Greek and Russian. Pop. 1,300.

ELIZABETHSTADT a town Austrian empire Transylvania, circle and 20 m N.E. Hermannstadt cap. dist. (same name, on the Great Ahol. It is a royal free town and has two fine R. Catholic churches, a Mechitarist monastery with a valuable library extensive culture of silk, and an active trade. Pop. 2,741 many of whom are Armenians.

EL-KANTARA a vil N. Africa, Algeria, on a rivulet of same name at the outlet of a pass in the Jebel Aurès 55 m S.W. Constantine. Though called by a single name it is more properly a group of three nearly adjacent villages each of which is inhabited by a distinct sub-tribe of Arabs. It possesses several mosques and two Marabout endowments. The inhabitants weave woollen cloth to supply their own wants and devote their chief attention to the cultivation of their gardens, orchards and vineyards and the rearing of bees. The environs are rich in Roman remains. Taken as a whole El-Kantara has a pop. of about 2000.

EL-KANAR or **MEDINET EL-KANAR** two places, Egypt, Libyan Desert.—1 A. m. W. El Bahari (Western Oasis), 2½ m N. Tihah lat. 25° 42' N. lon. 99° E. It is a tele. fully well built, consists of streets with gates which are kept shut at night, and contains a number of houses of two stories. Near its centre is a sulphurous thermal spring and in its environs is a number of ancient remains, including an Egyptian temple, a small pyramid, and a Roman castle. Pop. 2000.—2 A vil Oasis of W. Bahari (Lesser Oasis) 15 m N.W. Cairo, lat. 28° 2' N. lon. 25° 1' E. It is enclosed in part by walls about 6 ft. high, and constructed of materials obtained from ancient ruins. In its vicinity there is a Roman triumphal arch. Pop. about 800.—3 A short distance east of the other two is the one El Bahari, with 600 inhabitants and the other Bahari surrounded by a wall and possessed of a copious spring.

ELKHART a vil U. States, Indiana, at the confluence of the Elkhart and St. Joseph 150 m. N. Indianapolis, and on the St. Michigan and N. Indiana railway. It carries on an active trade, being the principal entrepôt for the exports of the county. Pop. 1045.

ELKHORN a town U. States, Wisconsin cap. co. Walworth, 45 m. S.E. Madison, at the junction of the Racine and Mississippi and Wisconsin Central railways. It possesses four churches, a large and well-furnished courthouse, county office, and warehouse stores. Pop. 1081.

ELIA a mountain pass Ceylon, Central Province, on the road leading from Badulla northward to the lowlands. In approaching it the view is obstructed by densely wooded hills, and at one time nothing is seen but an apparently impassable glen. But a sudden turn discloses a ravine, through which a torrent has forced its way and over which for more than 60 m. the precipitous extends unbroken by a single eminence, and terminates at last in the waters of the Indian Ocean. Perhaps, says Sir J. E. Tennent, there is not a scene in

the world which combines sublimity and beauty in a more extraordinary degree than that which is presented at the Pass of Elia.

ELLIGHPOOR [add.] a town India, Nizam's Dominions, cap. jaghirs of same name on the Purna, an affluent of the Tapti, 115 m W. by N. Nagpur. It is a strongly fortified being only in part surrounded by a battlemented stone wall 60 ft. high, but not more than 4 ft. thick. A gateway which forms the only entrance is highly ornamented. Some of the houses and harams built of brick, are handsome; but the whole place though large is very indifferently built. Even the palace of the mahab, the most conspicuous of its edifices, possesses little merit. Ellighpoor made some figure in the Mahabata war in which the Duke of Wellington gained his first laurels. It is included in what are called the Nizam's sequestered or ceded districts.

ELLICOTTS MILLS a vil U. States Maryland, on the Patuxent River and on the Baltimore and Ohio railway 10 m N.W. Baltimore. It possesses a college and a large amount of water-power which is turned to account in cotton and other factories. Pop. 1444.

ELLORA a vil Canada West on Wellington, 60 m W. Toronto, on the Grand River with four churches a grammar-school saw and flour mills a brewery and distillery several foundries and a large local trade. Pop. about 1900.

ELLORIE [add.] a town India, presid. Benares, dist. of 35 m N. Masulipatan in a fair open country. It is a large and populous place, intersected by the Tammul which divides it into two distinct portions but is dry the greater part of the year and at all times fordable. The houses of the town are tolerably well built, in streets which are for the most part, deeply shaded by trees. On the right bank of the stream are the remains of an old fort, and also the bazaar which is constructed with considerable regularity the shops having wooden fronts, like those in the W. of India. The barracks and hospital belonging to the detachment of native troops stationed here are also on this side. The officers' houses are on the left bank. A little to the E. of the town is the Lake of Lohar which, during the rains, covers upwards of 100 sq. m.

ELLSWORTH a town and port of entry U. States, Maine cap. co. Hancock, 67 m E. by N. Augusta on both sides of the Cusco, which is here navigable and crossed by four bridges. It is one of the most flourishing places in the state and possesses two churches, a high-school county buildings a tannery a machine shop, a pottery building-yard, two great and nine saw mills. The trade is chiefly in lumber of which about 875 mill one of feet are annually exported. The registered tonnage of the district is 6783, the enrolled and licensed 27,633 tons. Pop. 6608.

ELMIRA a town U. States, New York cap. co. Chemung on the Chemung near the mouth of Newton Creek and on the New York and Erie, the Williamsburg and Elmira, and the Elmira, Canadaigua, and Niagara Falls railways 170 m. W. S. W. Albany. It is a well laid out and rapidly increasing place containing nine churches, a female college capable of accommodating 500 pupils, numerous other academies and schools, twenty buildings, breweries, tanneries, furnaces, machine shops, woollen soap and candle, edge-tool and carriage factories, planning, stone and saw mills. Pop. 8568.

EL-PARRAL, a town Mexico, prov. and 120 m. S. by E. Chihuahua, on a tributary of the Rio Conchos was the centre of an important mining district. The country around is fertile. Pop. about 7000.

ELINEUR [add.] The payment of Sound dues was abolished in virtue of a treaty concluded in 1857 between Denmark, Great Britain, France, Russia, Sweden, and other powers, and a subsequent treaty with the United States, by which in consideration of the sum of \$5,000,000 riddalers (E. 985,000) paid as compensation and apportioned among the contracting powers, Denmark agreed to renounce all claim to any dues on vessels passing the Sound or the Great and Little Belts, the navigation of which for the future was declared to be free and unrestricted.

EL-SUWAYREIYA a town Arabia, on the S. frontiers of the pachalic and 90 m S. by E. from the town of Medina. It is a small place, consisting only of about 100 houses, built upon the side and at the base of a mass of basalt. The lower part is protected by a mud wall, with the usual semicircular

towers and the summit has been converted into a *fortress* by a rough bulwark of stone piled up so as to make a parapet. The narrow streets and mud houses are essentially Arabian, but the bazaar is well supplied with most dates, wheat and barley. The inhabitants, Ben Huseyn Sayide, claim descent from all the Bedouin tribes around and yield it only in name to the governor of Mecca.

FMAMGHUR, a fort, India, Sindh, in the Thar or Great Desert, lying between it and Jaisalmer 100 m N E Hyderabad. The expedition of Sir Charles Napier against this place at the head of a camel corps of 250 European infantry with two 24 lb howitzers and 50 cavalry is one of the most remarkable of his exploits. The Amceers, who had deemed it impregnable, on account both of the difficulty and the great strength of the works were so intimidated when they saw it about to be attacked that no defense was made. The British commander left it a heap of ruins. It was in the form of a square, enclosed by an outer and an inner wall, the former only 15 ft high the latter 40 ft high and surrounded by eight round towers. Some of the chambers were bomb proof.

EMBOUMMA a tn. S Africa, on bank Zaire or Congo about 100 m above its mouth. It stands on a height, possesses a large weekly market, and, being well adapted for trade, contains several Portuguese factories. It was long used as it is to be feared still continues to be, a central depot for slaves. While the French were intent on their emigration scheme, they established large factories here with the view of employing a small steamer to ply between Emboumma and Point Fort, for the purpose of bringing down the so-called emigrants. The country around Emboumma, producing corn, beans and almost every European vegetable in abundance is the granary for the slave factories in the interior and along the coast to the N of the river.

EMILIAN PROVINCES, a name sometimes given to those territories of Central Italy situated on the Emilian Way or Via Emilia, a celebrated highway of ancient times, constructed by the consul Emilius Lepidus between Placentia (Placentia) on the Po and Ariminum (Rimini) on the Adriatic. It includes the dioceses of Parma and Modena, and the former Papal delegations of Bologna, Ravenna, and Forlì, all now part of the kingdom of Italy.

EMMILSBURG a village, U States, Maryland, in the midst of a fertile and populous district 45 m N W Baltimore. It contains several churches, a R Catholic college and theological seminary, an academy, a female orphan asylum, and an institute for girls, under the care of the sisters of charity. Pop 812.

EMOD a tn. Austrian empire Hungary on Borsod 12 m S Miskolcs with a fine castle and gardens and 2180 inhabitants.

ENDERBURY ISLAND a coral isl of the American Polynesia, Pacific Ocean lat 3 6' S. lon 1 14 W. It is 5 m long and 2 1/2 m broad with a dry lagoon, and surrounded by a coral reef of from 80 to 150 ft in breadth and 18 at its greatest altitude.

ENDERBY, an isl S. Pacific, the N E of the Auckland group, S. of New Zealand in lat 50° 23' S lon 166° 15' E. It is 9 or 8 m long covered with a peaty moraine, and capable of sustaining a large number of cattle; it also grows potatoes and most European vegetables and is every where covered with trees from 15 to 70 ft high. It was occupied by a colony of about 70 New Zealanders from Chatham Island who settled in the group, and was granted by the English government to the Messrs. Enderby as a station for the South Sea Whale-factory Company in 1850 which, however was a failure. The group was discovered in 1804.

ENDERBY LAND the name given to a considerable extent of coast in the Antarctic Ocean E. of Madagascar lat. 67° 23' S. lon 50 E. Discovered by Captain Biscoe in 1881.

ENDERES, a in Turkey in Asia, prov. Sivas, beautifully situated in a romantic but well cultivated district, 100 m S W Trabzon. It consists of about 120 houses all built of stone and flat-roofed and is divided into two quarters occupied respectively by Turks and Armenians. The latter have two churches one of them ancient, the other quite modern. Considerable care and skill are shown in

arranging the fields, which in consequence, raise good crops of wheat, barley and flax. Almost all the persons employed in Constantinople in cutting and manipulating tobacco are natives of Enderes.

ENGANO add] an isl. Indian Archipelago, about 60 m off the S.W. coast of Sumatra, lat. (W point) 0° 21' S lon (S point) 102° 7' 15" E. Its area, including some islets near it is supposed at 400 sq. m. It is girdled by a coral reef on which the surf breaks heavily. The surface though sufficiently elevated to be visible at the distance of about 20 m. seems not to be mountainous. The soil is a red clay occupied for the most part by dense forest. The inhabitants of genuine Malay extraction, are in a very rude state. The only clothing is a shawl of prepared bark or dried banana leaf at the waist. Having no knowledge of iron, their weapon is a spear tipped with shell bone.

ENNS add] a tn. Austrian empire Upper Austria, circle Traun on the river Enns and the W railway 85 m W Vienna. It is a very old but well built place, consisting of a town proper and five suburbs. The town surrounded by turreted walls which were built with the ransom shamefully extorted from Richard Coeur de Lion contains 890 houses, arranged partly in streets, and partly in a large public square, and in many cases of handsome appearance. The principal building within the walls is the castle of Ennsberg belonging to Prince Auersperg and containing a collection of Roman antiquities. Among the benevolent institutions are an asylum for children, a town hospital, a lunatic and a poorhouse. The trade of the place is tolerably active, particularly in iron and steel wares. Local a vil in the vicinity is partly on the site of the Roman Lauracum and deserves notice both for a fine old church and several Roman antiquities. It was also the scene of the martyrdom of St. Florian, in the reign of Diocletian. 1 pop. 4000.

ENNECASTLE, a L. or town, Persia, a port, Tasmania, near the S.W. entrance of the channel of same name on the S.E. shore of the island. It is about 600 yds wide at its entrance, but immediately within increases in width to 1200 yds and extends northward for nearly 1 1/2 m with depth of 8 4 and 3 fathoms at a short distance from the shore. The ground rising with a gentle declivity is covered with thick wood and the water is so sheltered that it is scarcely agitated by the most violent winds.

ENILGANIE, a vil, Cochin China, cap. L. Assumption 27 m N E Montreal near the delta of same name. It has considerable trade in flour and lumber and a pop. of about 1500.

ENI AN (St. NICHAN) a tn. Austrian empire Tyrol circle Trium not far from Bozen. It is a large straggling place and has a Capuchin monastery founded in 1583 and an educational institute. Much wine of good quality is grown in the vicinity. Pop 1000.

ENAKOR, a vil Ceylon East Province near the N shore of the lagoon and 9 m N W of the town of Battaramulla. It is a large place, inhabited by Moors who are chiefly engaged in agriculture, though some of them weave cotton cloth some are also drivers of *talassans* or bullock caravans to the interior carrying coconuts, salt, and baggage from the coast and bring it back in return along with deer's horn and wax. The Moors of Enakor were celebrated for their courage and address in the capture of wild elephants while they were in demand for the courts of Indian princes, but of late years this den and has almost ceased. The road from the coast to this village passes through a rich country lined the left way on the right by coconuts and plantations and on the left by carefully cultivated and plentifully irrigated rice fields.

ERAR a small river E Africa, which rising among the hills to the N E. of Harar flows past that city in a S direction, towards the Webbe of Ogaden, sometimes called the Webbe Shebayi or Halmes River. Where Barton crossed it it had a bed about 100 yds. wide and filled the greater part of it with a thin sheet of clear cool and sweet water. What gives interest to the Erar is the fact that it is the only perennial stream which exists between Harar and the coast.

ERD or HAKENBURG a tn. Austrian empire, Hungary on and above 23 m. N E. Szekesfehely near the Danube with a castle, the ruins of a Turkish tower a Roman road distilleries tileworks, and a trade in corn and wine. Charles of Lorraine defeated the Turks here on 23 July 1684 and

according to Hungarian chronicles a great slaughter of the Huns took place in the same locality Pop. 8568

ERDBERG a tn. Austrian empire, Moravia, circle and 9 m. E. Znojmo with a deanery church and 7327 inhabitants.

ERDEK [anc. *Ardes*] a tn. Turkey in Asia, Anatolia, on the W. side of the peninsula of Cyzicus, which protects N into the Sea of Marmora. It was entirely burned down in 1854 but has risen from its ashes, and now contains about 1000 Greek and 200 Turkish houses. A tongue of land which terminates in a hill presenting three steep faces towards the sea is defended on the land side by a wall which was once thought to be Pelagian, but is now understood to be not older than the middle age.

ERDO-BENYE, a tn. Austrian empire, Hungary co. Zemplén 50 m. S. by E. Kaschau; with a trade in excellent wine and fruit, and numerous mineral springs with a bathing establishment. Pop. 2050—half of them belonging to the Reformed church and many of them Jews.

ERDŐZSABA a tn. Austrian empire, Hungary co. and 25 m. S.E. Keszthely on the N. extremity of Transylvania. It has a castle belonging to Count Hunyady and contains 1100 inhabitants.

ERIE [add.] a tn. U. States, Pennsylvania, cap. co. of same name beautifully situated on Presque Isle Bay on the S. shore of Lake Erie. Its site is an elevated bluff, commanding a fine view. Its streets are broad and regularly laid out at right angles, and it has a central park of great extent and beauty. The principal public buildings and institutions are the custom-house and post-office, occupying a handsome marble structure, twelve churches, a public library, an academy and a number of public schools. Among the industrial establishments are two extensive flour-mills, machines shops, several large flour-mills and a variety of factories. Possessing one of the best harbours on the lakes, and also ample means of communication with the interior by the Seneca and Erie railways and the Erie extension of the Pennsylvania canal Erie possesses an extensive and rapidly increasing trade. It has also a valuable fishery a few miles N. of the harbour where large numbers of white fish and trout are caught. Pop. 9419.

ERIFLET a tn. Asia Minor prov. Karaman, S. of the river Euphrates (the ancient Taurus) in lat. 38° 50' N. lon. 35° 13' E. The name is a corruption of the ancient Heraclea. It is a thriving and healthy town with neatly built houses and beautiful gardens. The surrounding country is eminently fertile. Pop. about 6000 souls, of whom the majority are Mohammedans.

ERIKO a tn. Western Africa, prov. Bassa r. bank Benue 60 m. above its confluence with the Kwana. It is surrounded by a double palisade of tall trees, and stands near the ruins of a town of same name, which appears to have been much more important. In the modern Eriko there are no buildings of any pretensions, but in the earlier town which was pillaged and burned down by the Fellatah many years ago, not only were the walls more substantial, and the plans more regular but some attempts at architectural ornament had been made. The huts had been covered both within and without, not in red earth but with red white, and a black-black, laid on evenly and equally tinted all over. The inhabitants are industrious, and are much employed in the manufacture of palm-oil, Eriko being the farthest place up the Benue where it is made, though the oil-palms grow abundantly for many miles higher.

ERZFBODM [add.] a tn. Turkish Armenia, cap. pach. of same name 166 m. N.N.E. Diarbekir lat. 40° 9' N. lon. 41° 6' E. It was totally destroyed by an earthquake on the 2d of June, 1858 compelling its inhabitants to migrate to the neighbouring towns.

ESCHTITZ a tn. Austrian empire, Hungary co. 1 p. near Neutra 23 m. N.N.E. Tyrnau on the Danube with the ruins of a castle, occupied by the Imperial Elisabeth Battery and a trade in corn and wine. Pop. 2050.

ESKI ISHAK MNA or ESKI-JUMA a tn. Turkey in Europe Bulgaria, eyalet and 64 m. S.E. of Silistria, on the S. slope of a lofty ridge. It has an important annual fair and by means of extensive mulberry plantations raises a large quantity of silk.

ESKI-SHIFIR [add.] [anc. *Dorylaeum*] a tn. Turkey in Asia Anatolia, 30 m. S.E. Constantinople. It consists of

two parts—the town proper and the hamlet connected with each other by a stone dike of considerable length. The mosque with their eight minarets, give the place an imposing appearance, but the interior is still and lifeless. The celebrated baths are in the hamlet quarter and there are some interesting Roman sculptures and inscriptions in the vicinity. Eski-Shehr figures in the wars of the Crusaders.

ESMERALDAS [add.] a river and tn. in S. America Ecuador. The river is understood to be formed by several streams from the W. Andes, not far from Cotacachi, flows N.N.W., receiving several affluents, of which the Guallabamba is the most important, and falls into the Pacific about 12 m. below the town of same name. In the upper part of its course its channel is obstructed by rapids, and in the lower there is a bar with a bottom so uneven that 7 fathoms are found alongside 84. Such too, is the velocity of the current, that the water continues fresh for 2 m. from the river's mouth.

—The towns on the bank, 6 m. above the mouth of the river and capital of the prov. of same name, 100 m. N.W. Quito, is of recent origin, having been substituted for an older town which stood on the banks of the river at some distance and is a very pretty place, consisting of wooden houses with a pop. of not more than 800 of whom the majority are mestizos. There are mines of emeralds in the vicinity formerly worked by the Jesuits; but since the expulsion of the order this branch of industry has been neglected.

ESQUIMAUX 4171 a tn. and port, Vancouver Island, at the S. extremity 3 m. S. Victoria the capital of the island. The town is well situated and the harbour offers safe and convenient anchorage. It is also well adapted for an almost impregnable fortified position as well as for a naval station and docks. The harbour of Victoria being unsuitable for shipping Esquimaux has become the port for the island and is likewise the entrepôt for much of the commercial traffic with British Columbia. In 1858 Victoria contained only a fort of the Hudson Bay Company and one or two houses attached to it and at the same period Esquimaux was entirely unoccupied. The discovery of gold in British Columbia produced a sudden influx of settlers, the town of Victoria springing up with great rapidity and the necessities of trade have produced the equally rapid rise of the port of Esquimaux. The town is already of considerable extent and among its earliest buildings were a naval hospital and the residence of the chief justice of the island. It is connected with Victoria by an excellent road. The following figures will show the commercial position the port has already attained for though they represent the trade and traffic of the whole of Vancouver Island they are yet almost entirely applicable to Esquimaux, since which agrees nearly all the exports and imports, and the great majority of the shipping in the latter years.

	1840	1850	1861	1862	1863.
Tonnage of Vessels Entered & Cleared	1,520 204	254 133	174,365	287 663	541 964
Value of Imports & Exports	—	—	416 61	744,3—	797 226
					50 979

From June 14 to Dec 31.

The small amount of exports is accounted for by the fact that the gold which is the only exported produce of British Columbia is usually taken to California by the producers, and there disposed of the want of an adequate export currency preventing its being exchanged within the colony or in Vancouver Island. Thus, though for the most part it passes through Victoria and Esquimaux, yet, being in private hands, it does not appear under the head of exports.

ESQUIMAUX a group of islands British America on the E. coast of Labrador near the W. entrance of the Strait of Belle Isle. They form part of a chain which continues as Salmon Bay and stretches W. along the coast for 14 m. under the different names of Esquimaux, Old Port, and Dog Islands. They are of all shapes, sizes and heights, never however rising higher than 300 ft. and are, with the exception of some near the mainland bare of trees. Whales inhabit the southernmost of the chain, is only 8 m. long, and 3 m. broad. Near it lie the steep, bare granite islands which

from the harbour of Bonne Esperance. The island Esquimaux, which gives name to the group is of larger dimensions, being from 8 to 9 m. in circuit. It lies in the mouth of Esquimaux Bay so near the mainland that only small schooners can pass through the narrow channel.

ESQUIMAUX (POLAR) British America Labrador on the shore of the St. Lawrence, N of Anticosti Island and 500 m. N.E. Quebec. A village has been founded on it by Canadian settlers, who have built some good two-storied houses, and cleared and fenced a considerable extent of land, which they cultivate. The situation of the new settlement is pleasant, and the lowlands of the back country at the foot of the hills which rise in rugged masses a few miles from the shore, are well adapted for the rearing of cattle. About 50 families had arrived here in 1893. Similar colonies are springing up at other spots along the coast, Naticuquan, a short distance eastward, being one of them.

ESTERO-REAL a river Central America rises in the W cordillera of the Andes flows arcuately W forming the boundary between Nicaragua and Honduras, and falls into the head of the Gulf of Fonseca near its E. extremity. It has a good depth of water and was navigated by Sir E. Belcher in the *Starling* for 50 m. from its mouth. But for the prevailing strong winds, which made the passage tedious, he might easily have gone further. According to native accounts there is 10 ft of water in the channel for 80 m. more.

EURUDA or **EURUNA** a tn. India, Nagpore, state and 60 m. S. of Yeopore near 1 bank Boma. It is a well built town of pleasing appearance, enclosed by a ditch and a strong wall and defended by a citadel near its centre.

ETIAWAH [add] a dist. and tn. India N.W. Province. The district between lat. 26° 21' and 2° 9' N. lon. 73° 48' and 79° 49' E. is bounded N. by Mysore and Furuckabad, E. by Mysore, S. by Bundelkhand, W. by Benares, Dehli and W. by Agra, area, 1674 sq. m. The whole dist. lies within the Doab, except a small strip which lies along the W. bank of the Jumna. The soil in the E. and N.E. is generally fertile but becomes indifferent towards the Jumna and still more so beyond it where the surface is rugged, wild and in some parts almost barren. The principal spring crops are wheat, barley, gram, and other kinds of pulses; the autumnal crops opium, sugar-cane, cotton, indigo, rice, jowar and bajra. The fruits include apple, mangoes, plantains, guavas, oranges, apricots, limes, lemons, and remarkably fine melons. Among the wild quadrupeds are jackals, hyenas, wolves, wild dogs, antelopes and porcupines. Birds, including felineous peacocks and the small species in almost endless variety are said to be literally to crowd the trees, guinea fowl and the common gallinaceous poultry run wild in the jungle. The climate is very trying to European constitutions; in no other part of India are the hot winds more frequent and scorching. Pop. 451,224. — The town cap of the above dist. situated about 1 m. E. of the Jumna, on the E. Indian railway 206 m. (by rail) N.W. Allahabad, and 63 m. S.E. Agra, has a striking appearance, many of its houses occupying small isolated summits, separated by deep narrow precipitous ravines. The interior however is very indifferent, and exhibits many symptoms of decay and much appearance of poverty and wretchedness. The fort situated on a high sandhill overlooking the Jumna, is of limited dimensions; the wall is one of the largest in the N.W. Province. The British cantonment which lies on a wide sandy plain, 1 m. N.W. of the town has never been a favourite station and for some time before the late mutiny was occupied only by a wing of native infantry. The sepoy then belonging to it mutinied in the latter end of May 1857. Pop. 17,763.

ETIMADPOOR or **ATAMADPOOR**, a tn. India, N.W. Province, dist. and about 20 m. N.E. Agra. It is an in considerable place, situated in a district much cut up by deep precipitous ravines, is surrounded by a mud wall of no great strength, and possesses a well-supplied bazaar. Within the town is a large tank, surrounded by strong walls of masonry and having in its centre a polygonal building of two stories crowned by a dome.

ETZATLAN a tn. Mexico, state Jalisco 43 m. W. Guadalajara, with 2834 inhabitants, employed in agriculture and mining.

EUFALA a tn. U. States, Alabama, 70 m. S.E. Montgomery beautifully situated on bank Chattahoochee, which is here navigable from November to June. It occupies a height about 500 ft above the water contains several churches, and, in addition to some general trade, used to export annually about 20,000 bales of cotton the produce of the surrounding plantations. Pop. 8900.

EUGENIE an archipelago, mainly in the centre of Victoria Bay on the S.W. coast of New Hebrides in the Sea of Japan. The islands about twenty in number vary much in size the largest having an area of about 20 sq. m., and are hilly and covered with verdure. The trees, mostly oaks of superior quality and beech, are thinly scattered. Some of the islands afford good anchorage for ships of the largest burden. They are inhabited apparently by Chinese and Koreans.

EL PATOIA [add] a tn. Russia, the Orms, 60 m. N. Sebastopol. It is noted as the place of debarkation of the allied armies of England and France, in September 1854 when they effected their first landing in the Orms, and a few days afterwards encountered the Russians in the battle of the Alma.

EVANSVILLE a tn. U. States, Indiana cap. on Vanderburgh on a height above the Ohio at the terminus of the Erie and Wabash canal and on the Evansville and Cincinnati railway 140 m. S.W. Indianapolis. Owing to a remarkable bend which the Ohio makes here Evansville has sometimes been designated the crescent city. It contains twenty-two churches, including almost all denominations, various public schools, three public libraries and a national marine hospital erected by the general government. Coal and iron abounding in the neighbourhood give great facilities to manufactures, and accordingly numerous factories, machine shops and mills have been erected. Pop. 18,600, about 11,454.

EVEREST a mountain Asia, in the N. of Nepal lat. 27° 59' 17" N. lon. 85° 09' 6" E. It is the loftiest summit of the Himalaya having a height of 29,002 ft. while Kanchung, which used to claim that honour and is situated to the E. of it in lat. 27° 42' 9" N. lon. 88° 11' 26" E. is only 28,156 ft. and Dhaulagiri to the W. of it in lat. 28° 41' 48" N. lon. 83° 39' 5" E. is only 26,826. Colonel Waugh, who first measured it, conducting the trigonometrical survey of India, has given it the name of Mount Everest in honour of Colonel Everest, his distinguished predecessor.

EXMOUTH an mt. British America, Arctic regions in the W. entrance of Belcher Channel lat. 77° 15' N. lon. 95° 50' W. When seen from a distance it attracts attention by the richness of its colour produced by the strata of red

EXMOUTH ISLAND—From Belcher's Land of the Arctic Voyages.

sandstone, of which the greater part of it is composed. On the summit which has a height of 567 ft. this sandstone is capped by a fossiliferous limestone. Vegetation is more luxuriant than usual in the same region and game also appears to be abundant, not only geese, ducks, ptarmigan, and hares frequenting it in great numbers, but deer also. Notwithstanding this abundance it is not inhabited, and does not seem even to be visited by natives.

EXUMA [add.] two islands, W. India, Bahamas, partly inundated by the tides of Oceanus.—1. Great Exuma about 35 m. long between N.W. by W and S.E. by E with a varying breadth of 1 to 5 m., low and swampy and skirted by sandbanks and small cays on the S but becoming more firm and elevated on the N attains the height of 60 to 100 ft. Its inhabitants are chiefly employed in raising stock and provisions, which they dispose of to small centers, who carry them to Nassau in New Providence. Along the N shore are several secure harbors, for vessels drawing 14 or 15 ft. Pop. about 2000.—2. Little Exuma, separated from the former by a small shallow channel almost fordable at low water is about 8 m. long from E.S.E. to W.N.W. but is narrow and low and contains only about 160 inhabitants, who find their chief employment in a valuable salt-pond.

EYN NEJM [fontaine de la star] a vil. E. Arabia, kingdom Negd 200 m. E. Radd, at one time famous for a hot sulphurous spring, covered with an open copse, and largely frequented for the cure of cutaneous diseases and paralysis. But the government a few years ago destroyed both well and copse. Yet the people should put their trust in the waters rather than in God.

EYRE, LAKE, a large sheet of water almost worthy of being designated a sea, in S. Australia, lying between lat. 33° 30' and 39° 30' S., and lon. 135° and 140° E. The rivers Frome and Clifton empty themselves into this lake, whose northern boundaries are not as yet defined with any degree of accuracy. The country on the W side is sandy and barren but occasionally relieved by hills that attain a considerable elevation. To the S there are numerous creeks, which produce a rank but fertile vegetation. The district bordering on Lake Eyre and Lake Torrens were thoroughly explored by M. Donald Stuart in 1869-70, who, again examining a part of its shores in 1881 found it edged with a layer of salt, 3 inches thick, upon clay.

EYTAH or **EYA** a tn. India, N.W. Provinces, dist. Mynpooria, 50 m. N.E. Agra, occupies a low site almost completely flooded in the rainy season is surrounded by a mud wall, and has a well-supplied bazaar.

EYKAWOWITZ, a tn. Austrian empire, Moravia, circle and 30 m. N.E. Brunn on the Hain. It has an ancient castle, surrounded by a ditch and flanked with bastions; a Jewish infirmary, and three annual fairs and contains 2000 inhabitants.

F

FACING IRV AND Australia, on the coast of Queensland off Port Curtis, and just below the tropic of Capricorn lat. 23° 45' S. lon. 151° 35' E. is 8½ m. long and 2½ m. at its greatest width and is generally low the most elevated part, Signal Hill, situated at its S. end, reaching only to an altitude of 375 ft. Its shores are sandy and covered with mangroves, which fringe the creeks or cluster upon extensive swamps, while the interior presents no richer vegetation than coarse sedgy grass and small bushes, with the usual monotonous gum-trees. A series of low sand-hills extends along the coast. A kind of rock-ovyer is found here, and the island also furnishes quail, the blue mountain parrot, curlews, gulls, and bustards.

FAIRFIELD two places, U. States.—1. A tn. Connecticut, on Long Island Sound and on the New York and New Haven railway 60 m. S.W. Hartford. It consists principally of one broad street, with spacious hotels in its vicinity for the accommodation of summer visitors. The business of the town is carried on chiefly at the harbor of Southport, situated about 2 m. to the W. at the mouth of Mide River but owing to the rearing of Bridgeport, at the terminus of the New Britain and Haverhill railways, seems not to be increasing. Pop. 4379.—2. A vil. Iowa, cap. Co. Jefferson, on Big Cedar Creek 63 m. S.W. Iowa city. It possesses a branch of the state university and a female seminary and carries on a considerable trade. Pop. 1622.

FAIRHAVEN or **FAIR HAVEN** two places, U. States.—1. A vil. Connecticut, on both sides of the Quinnipiac, which here expands into a bay extending to New Haven harbor and is crossed by two wooden bridges—one for the railway and the other for ordinary traffic. It is a cheerful, well-built place, with many fine villas possesses five churches, four buildings, and a number of vessels, engaged partly in the Mediterranean and partly in the W. India trade, and is famous for its oysters, of which about 750,000 bushels are annually taken. Pop. about 4000.—2. A vil. Massachusetts, on the Atlantic, at its mouth in Buzzard's Bay and on a branch of the Cape Cod and on the Redfish branch of the Boston and Providence railways 50 m. S.E. Boston. It contains eleven churches a high-school, and a savings-bank paper and cotton mills, a brass foundry and soap, candle, and oil factories. An expansion of the river forms a fine harbor and a good head of shipping belonging to the place is engaged in the whale fishery. Pop. 6118.

FAI KENAU a tn. Austrian empire, circle and about 24 m. N.N.E. Lintz with manufactures of cotton goods, glassware, blackberries, glass vases, two mills, and 1800 inhabitants.

FAI TSHI a tn. Turkey in Europe, Moldavia, circle of same name, r. bank Pruth, 55 m. S.E. H. Jassy. The camp in which Peter the Great allowed himself to be completely surrounded, in 1714 and was in consequence compelled to sign the treaty of Hush was in the vicinity.

FAMAKA or **PAMOKA** a vil. Africa, Senegal r. bank Kine Nila, opposite Fatick.

FANKING an isl. N. Pacific belonging to what has been called American Samoa, in lat. 7° 30' N., lon. 158° 30' W. It is about 5 m. in diameter nearly circular and almost covered with coconut palms. It possesses a good harbor is abundantly supplied with excellent fresh water, and promises to become of some importance, having been formally taken possession of by the British crown on the 8th of February 1861.

FAOU (Lé) a small maritime tn. France, dep. Finistère, 17 m. E.S.E. Brest, in a smiling valley on the Fao, where it joins the Broet Rouda. It has some new mills, and trade in eagle, wine, brandy and grain and its harbor though small is well frequented. Pop. 1115.

FARAH a tn. India, N.W. Provinces dist. and 23 m. N.W. Agra about a mile from r. bank Jumna, in an open and well-cultivated country. It is built chiefly within an enclosure of what appears to have been at one time a very large wall is defended by a square and fort, with a bastion on each flank, and has a small but well-supplied bazaar.

FARALLON ISLES a small but lofty isl. S. America, in the Bay of Panama, at the apex of the sheet off the river Buenaventura, 5 m. N.W. Buen. Point, in lat. 8° 50' S., lon. 78° 24' 30' W. It is memorable as the spot where Dampier and his party in 1681, on being prevented by the Spaniards from going by the Santa Maria or Chopo Rivers smelt their ship, and commenced their journey to the Atlantic. They travelled 110 m. occasionally crossing high mountains, but generally proceeding along valleys among deep and dangerous rivers, and in twenty three days reached the Atlantic, near the Cape Cod, 60 m. W. of Golden Island in California Bay in the Caribbean Sea, near the W. entrance of the Gulf of Darien.

FARMINGTON a tn. U. States, Maine, cap. Co. Franklin, on the Sandy River and the terminus of a branch railway 31 m. N.W. Augusta. It contains six churches, an academy, and numerous other schools; and being well supplied with water-power possesses a large number of manufactories. Not a few of the inhabitants are employed in grazing, for which the district is well adapted. Pop. 3106.

FARO, a river Western Africa, the source of which not exactly known is supposed to be near Mount Label, about

lat. 6° 20' N; lon. 10° 40' E. It flows N.W. through Adamawa, and joins I bank Deauve 35 m. E. Yola. Near the point of junction, when Dr Barth crossed it, it had a breadth of about 800 yards, and was running with a rapid current though its average depth was not more than 3 ft. In the rainy season this depth is much increased, and is easily headland at the junction is laid almost entirely under water.

FARSHA a vil N Africa, near the E. frontier of Kordofan, cap. Dar Hamar or the Red Country; lat. about 13° N. lon. 33° 30' E. It consists of several hundred huts erected on the side of a gentle slope, and is the residence of the chief of the Hamar tribe who, though nominally subject to Turkey since the conquest of Kordofan, is virtually independent. The district of Dar Hamar over which his authority extends, consists of extensive plains, such as the Arabs delight to roam over in many parts so destitute of water as to be completely parched and sterile during the hot season, but springing into comparative luxuriance during the rains and in other parts possessed of such a depth of soil and so far favoured by springs, that the characteristics of the desert disappear and the vegetation becomes more luxuriant. The Hamar who have their capital in Farsha, are said to be able to muster 3000 men most of them in mail shirts and helmets. (Petherick).

FATAWEL, a N Western Africa, Adamswa, to the E. of the Wadai range 140 m N.E. Yola, is particularly de serring of notice as the principal mart for ivory in this part of Africa.

FATSHAN or **FATSHAN** a N China, prov and 7 m E.W. Quingong or Canton, on an arm of the Canton R. as it is said that towards the end of the 17th century it did not yield to Canton in wealth or population. Its decline is probably owing in part to a change in the river which has left it with a channel only 4 ft. deep. It has still considerable manufactures of silk, cotton, silk, paper and articles which are sent to Canton for export.

FAVOURITE ISLAND a coral id. of American Polynesia, in the N Pacific lat 3° 50' N lon 176° 40' W. **FAYETTEVILLE** [add] a tn U States, N Carolina, at the head of navigation of Cape Fear River 50 m. S. Raleigh. It is one of the largest and most stirring places in the state, contains several turpentine distilleries, cotton factories, and four mills and carries on an active trade, particularly in lumber tar and turpentine, the materials of which are furnished by the pine forests covering a large part of the adjoining country. Pop. 4790.

FAZOKLO or **FAZOKLO**, a vil Africa, the most S. of Senegal I. bank Blue Nile, at the foot of the mountain of same name lat. 11° 45' N lon 84° 40' E. The tribe which form the village are called by bushing. It is remarkable as being the most S. point of the possessions of the viceroys of Egypt upon the Blue Nile, though his sovereignty here is merely nominal. Mahomet Ali built here two edifices, which he dignified with the name of palaces and to which he said he would retreat in case of need. They are both in a ruinous condition. The mountain Fazoklo is the first of any importance met with when ascending the Blue Nile, and gives its name to the province around it. It stretches to the S. and then to the S.W. the S. boundary not admitting any precise definition.

FAZOKLO or **FAZOKLO**, a prov Africa E. Sudan to the S. of Senegal I. bank Blue Nile, between lat 11° and 13° N, named from the mountain chain which forms its N. boundary is very uninteresting, breeding with abrupt heights, and intersected by deep gorges. Its principal stream is the Tadmata, which comes from the S. and after winding through the

province, falls into the Blue Nile below the village of Fazoklo. A great number of torrents dry part of the year furrow the province in all directions. Shales, granite, cristalline, mica schist, and aluminas are the prevailing rocks, accompanied with fuldepath, on which repose sturffrous alluvium. Gold is

Mount Fazoklo with Fazoklo's Palace and Village of Fazoklo. From Zeyher's, Voyage au Soudan Oriental.

found in the sands everywhere and has a purity of about 88. Vegetation is very vigorous; extensive and almost impenetrable forests cover the country in dry places the enormous prevail, and in moist places may be seen the great *Adansonia digitata*, the tamarind, shony *Cassia fistula*, three species of palms, euphorbia, and the bamboo which forms thickets. The soil likewise produces many liliaceous, esnerbitaceous, and graminaceous plants but no wheat and legumes more especially haricot. The negroes cultivate only a little to rice and maize. The fauna includes the elephant, rhinoceros, hippopotamus, lion, panther and a kind of very ferocious hyena, but few horned animals. The sheep have a short kind of wool resembling hair disposed over the body in patches of various shades of colour. Birds are numerous and include the stork, the tallies eagle, the sacred ibis, the black ibis, and many grain-eating birds with rich plumage. The chief insect is the white ant, which destroys whatever is left within its reach.

There are three seasons in Fazoklo. Summer begins in February when the heat attains to about 112 Fah. May comes in with violent storms and during it there is rain twice or thrice each week, and during the three following months the rains are incessant they diminish in September. Winter commences in October, and ends in January during which time the morning is cold and the afternoon warm. In the twenty four hours the thermometer varies from 50° to 104° Fah.

The inhabitants are negroes and pagans, and go completely naked. They are called Hara, and their country is sometimes named Dar-Berta. The tribes are divided by the mountains or groups of mountains they inhabit and they construct their dwellings—round bamboo-huts covered with straw—in the most inaccessible localities, as a protection against their enemies the Gallas on the south, and the soldiers of the viceroys of Egypt on the north. The chief centres of population are those of the mountains of Cassa, Boud-changouren Boud, Fakaro, and Kamsilla. The nob or king dwells in Cassa. The Berta are quiet, abstemious, and live chiefly on fruits. They make a kind of beer of meal which is both nutritive and intoxicating. They are occupied chiefly in gold-washing, but have also some tanneries for the preparation of hides. The merchants who come to purchase their gold bring them in exchange salt, millet, cloth, and glass-beads. The Berta are courageous. They are armed with skin-shields large daggers, and lances, which they throw with great address and on the appearance of an enemy they give the alarm by lighting fires on the tops of the hills.

Franklin was once an independent state, governed by an elected king, whose conduct was judged each year by a council of notables. During this examination the king remained seated on an ottoman, surrounded by armed men, ready to kill him should he be condemned. This custom was preserved till the reign of Yania, who was murdered in 1836 by order of his judges. Fawle now pays tribute to the viceroy of Egypt, who has the right of appointing and deposing the chiefs of the country.

FEGYVERNÉK, a tn. Austrian empire, Hungary co. Szabolcs. It was once a place of some importance, but lost it in consequence of the invasions of the Turks. Tobacco is largely grown in the vicinity. Pop. 2618.

FEND, a vil. N Arabia, on the E.E. side of the Bolman chain, at the junction of the Erythraean and a Persian pilgrim route to Mecca. It is the oldest village in the province, and is inhabited by about 150 families, who subsist by gathering fodder and laying it up in store against the arrival of the pilgrims, to whom they then sell or exchange it.

FERNETITZ, a tn. Austrian empire, duchy Carinthia, on a stream of same name in the Wobben Valley 30 m. N.W. Lienz. The inhabitants are engaged partly in agriculture and partly in mining coal and iron, and both smelting and manufacturing the latter. Pop. 5000.

FELVINCZ, a tn. Austrian empire, Transylvania, circle and 25 m. S.E.E. Klausenburg on the Maros. The inhabitants are chiefly employed in agriculture and the rearing of cattle. Pop. 1150.

FERGUS, a vil. British America, Canada, West, co. Wellington, on the Grand River 48 m. W. by N. Toronto; with a Free and a Wesleyan church two weekly newspapers, and a large trade in flour and lumber. Pop. about 1000.

FERNANDO (BAR) a tl. Chili prov. Oglehuaga, cap. dep. of same name, nearly equidistant from the W. base of the Cordillera and the banks of the Tinguirica 110 m. S.E. Valparaiso. It occupies a site so injudiciously chosen as to be exposed to the floods, and consists of houses which, though compactly built, have as well as the streets a very poor appearance, the former being low and uncommensurate, and the latter ill paved and tortuous. The two churches are equally wretched, and the three schools are poorly attended. Though exposed to inundation San Fernando is 1410 ft. above sea-level. Pop. including the suburbs, about 12 000.

FERNANDO (BAR) a tn. Mexico state Coahuila in a fertile district, near the Rio Grande, 206 m. N. Saltillo. It stands on the Upper Salado, and was once an important military post, but suffered much during the war between Mexico and the U. States, and has never recovered its former prosperity. It still contains about 3000 inhabitants, whose chief employment is agriculture.

FERNÉZEL (ALBU, KIS-BANYA and FELSO) three nearly contiguous places, Austrian empire, Hungary co. Szabolcs 42 m. S.E.E. Szathmar Nemethi near the N. frontiers of Transylvania. They have mineral springs and mines of silver copper and lead with smelting furnaces and other mining establishments, and an aggregate pop. of 3000.

FEROZABAD (add) a tn. India, N.W. Provinces, dist. and 24 m. S.E. Ayodhya. It is of considerable size, surrounded by a wall and impregnable, both from the beautiful remains of splendour within it, and the numerous moat and stupas ruins outside, that it must once have been a place of great importance. The present inhabitants live chiefly in cottages thatched with straw. The bazaar is well supplied. Pop. 11 792.

FEROZPORE, a tn. India, N.W. Provinces, dist. Georgetown, cap. pergunnah of same name, 74 m. S. Delhi. It is surrounded by a tolerably strong wall flanked with towers, and defended by a mud fort, which is mounted with cannon. Within the fort is the palace which, though not large, is handsomely built and furnished in the English style. Pop. 7989.

FEROZPOOR (add) a dist. and tn. India. The river situated in Sindh, is of very irregular shape, of somewhat indolent limits, in consequence of several changes which took place after the termination of the Sikh war. Its centre seems to be nearly intersected by the parallel of 21 and the meridian of 75°. Neither its area nor its population can be stated. A great part of the marsh is barren or covered with jungle, and but more than one third is alleged to be

under cultivation. Evidence of its having once been in a more prosperous state are furnished by several ruined villages and towns, and fine walls now choked with rubbish. The great thing wanted is irrigation, and this might be furnished at comparatively little expense, by cutting a canal of only a mile long which would convey water from the Sittled to the Sakri, a dry watercourse or nullah which winds through the district. The river cap. of the above is, it is stated about 1 m. from 1 bank Sindh and 50 m. S. by E. Lahor, consists of the town proper and a fort. The town, surrounded by a ditch and a mud wall, had fallen into a state of great decay and general wretchedness, when its occupation by the British completely changed its appearance. For its narrow lanes, in the siltiest state imaginable, and its mean houses huddled together in the most disorderly manner have been substituted wide and handsome streets, with colonnaded rows of shops and long lines of warehouses. The fort, an irregular structure filled with earth to half the height of the walls, and crowded with mean brick and mud hovels has also been remodelled and converted into an important British arsenal. On the breaking out of the mutiny some companies of the 45th N.I. nearly succeeded in taking it, and when frustrated did not deem it till they were permitted by some mismanagement, to commit much havoc in the town. Pop. about 8000.

FERTILE BELT TAN, a strip of country British North America, on the N. boundary of the U. States, or between lat. 40° and 51° N. and lon. 90° and 98° W. The country on either side of this singular district is bleak, barren and unfruitful for the settler, but the Fertile Belt itself is described as a partially wooded region, abounding in lakes and rich pastures. The soil is a rich deep, vegetable mould, occasionally spreading out into open blooming prairie. But, as the winter endures for upwards of seven months, during which period the rivers and lakes are ice-bound and the whole country clothed with snow and in the heat of the summer is usually inclosed, it may be doubted whether the Fertile Belt will ever attract a steady immigration of European settlers. An attempt was made, however as early as 1811 by the Earl of Selkirk to colonise a portion of it, and with many vicissitudes the Red River settlement has struggled on, until now its population including Indian half-breeds, numbers about 5000 souls.

FIERO a tn. Austrian Italy prov. and 12 m. S.W. Rovigo; with several churches, and 2228 inhabitants.

FIFENEES, the extreme E. point of Fifehire, Scotland about 2 m. E. by N. Crail. Its elevation above the sea is very slight, and it presents no features of grandeur or sublimity like other headlands. A reef called the Crail Rocks projects from it into the German Ocean, and has been the occasion of numerous shipwrecks.

FILIYO, a tn. Western Africa, Songhay country 340 m. S.E. Tambuctoo in a beautiful and fertile district. It consists of several detached groups of houses built of clay with elevated tower-like entrances, which give the whole place a castellated appearance. The vicinity has a rich soil, much corn and trees, and the surrounding hills bear heavy crops of corn. The inhabitants, almost all negroes, are nominally subject to the Fello chief of Filio, but have an independent democracy and evidently detest the Felloish yoke.

FILMORE, a tn. U. States Utah of which it is the capital, about 150 m. almost due S. from the Great Salt Lake. It is inhabited by Mormons, and consists of houses made either of adobe or of fire-burned bricks. The only building of any pretension is the capital which is built of rough-hewn red sandstone in the form of a Greek cross, with a cupola of 80 ft. in diameter in its centre. The beautiful and commanding site of Filmore, at the height of 5000 ft. above the sea, and at the foot of the wide Wahatch mts., not seeming to compensate for its distance from the north and more populous district of the territory, the Mormon legislature in 1850 passed an act, removing the seat of government from it to Salt Lake City. In this they exceeded their power, and Filmore is still the recognized capital though as yet it is a very pretty one, its pop. in 1840 being only 713.

FILORIO a tn. Italy on the W. shore of the island of Ischia, at the N.W. entrance of the Bay of Naples. It is the largest town on the island, and, though consisting of narrow streets, is clean and well built, with many handsome houses of two stories. On a rocky promontory jutting into the

was a shrine and monastery covering the site of an old castle of which the crenelated walls still remain. The inhabitants of Lucina are bold and skilful sailors often venturing in their small boats to Genoa and the coast of Africa. Pop 5000.

FISHKILL, two places, U States.—1. A vil. and town ship, New York, opposite Newburg on the Hudson River and the Hudson railway. The vil., situated on Fishkill Creek, contains four or five churches and an academy. Pop. of township, 8546.—2. *Fishkill Landing* a vil. at the mouth of the above-named creek, with several churches, an iron foundry a machine-shop, some factories, and a number of stores. There is a ferry between it and Newburg. P 2844.

FITZROY [add] an isl. near the N E coast of Australia, 5 m. N E Cape Graham is about 5 m. in extent. Its surface is generally high and well wooded with two peaks, one of which is 861 ft. in height. The rock when exposed is granitic. The prickly cactus palm pomegranate, and a kind of yam abound upon it.

FLATTERY a cape, U States, territory Washington on the Pacific, the N W extremity of the land at the entrance of Juan de Fuca Strait. Lat. 48° 24' N; lon. 124° 43' W. About 12 m. S of it are the Flatley rocks which extend some distance onwards, and have a considerable elevation. Upon Tatooch off the cape, is a lighthouse.

FLIESEN a tn. Austrian empire, Bohemia, circle and 12 m. N W Eger on the frontiers of Saxony with a Protestant church, manufactures of hosiery and calico paper cotton and other mills and 1600 inhabitants.

FLINDERS, the name of two isls.—1. An isl. the largest of the Furness group, situated in the E entrance of Bass Strait, between the N.E. of Tasmania and the S.E. of Australia. It is about 86 m. long by 31 m. broad and is traversed by several ridges, one of which high barren and mountainous presents a bold and abrupt front to the W. but slopes gradually on the E down to a low sandy beach. The Strzelecki Peaks forming the culminating points of this ridge, are 2650 ft. above the sea. On the W the island is fringed by several small islands, under the lee of which shelter from westerly winds may be obtained. On the E the shore forms nearly a straight line of sandy beach for about 19 m. and thence becomes diversified by three remarkable peaks called the Patriarcha, which rise from the low sandy shore and are detached by a similar sandy plain from the high barren mountains on the W. Off the E extremity of the island and in the vicinity of the loftiest of these peaks lie the Nobel Isles so named by Captain Flinders from the discordant and various notes of the innumerable birds frequenting them.—2. An isl. off the coast of S. Australia, about lat. 34° S lon. 124° E. It is the largest and most central of the Investigator group, and is nearly in the form of a square, each side measuring from 3 to 5 m. with rocks projecting from the intermediate points. When Flinders visited it it was frequented by hairy seals sooty petrels, and small kangaroos. The only good anchorage is on the N.

FLINT a tn. U States, Michigan cap. on Genesee 48 m. N W Detroit on the line of railway from Port Huron to Grand Haven. It stands in a fertile district, is the seat of the Michigan arylism for the deaf blind, and, possesses abundance of water-power and carries on an active trade. Pop 3550.

FLINT a river U States, rises in the W part of Georgia, near Fayetteville flows S. and at the S W extremity of the state unites with the Chattahoochee in forming the Apalachicola. Its whole course is about 300 m. of which a large portion is navigable.

FLINT an island in the Pacific Ocean S.W. of the Marquesas Islands lat. 11° 36' S. lon. 151° 46' W. is a narrow strip of coral about 1½ m. long surrounded with breakers, which render it almost impossible for a boat to land. It was discovered in 1801.

FLORES, BORDO, or MANGUEVA [add] an isl. Indian Archipelago, forming one of the volcanic group stretching eastward from Java bounded N by the Java Sea, S the Indian Ocean E the Strait of Flores, which separates it from the islands of Adenara and Bolo and W by the Strait of Mangrove or Mangrove, which separates it from the island of Komodo lat. 8° S to 9° 50' S lon. 119° 40' to 123° 1' E. 240 m. long by 20 m. to 40 m. broad area about 4000 sq. m. The N E point is named Cape Flores. On the E shore lies Gus.

and E coast there are good harbours for large vessels. On the E coast are volcanoes; and on the E. side of the island is the peak of Lobetaba, 7117 ft. high, in the vicinity of which dwells a tribe very inimical to Europeans. There are likewise other lofty mountains as Bumbia or Gombora; Koa, also a volcano, 8169 ft. high, Gombora, Koa, 8355 ft., and the peak of Larentooka, 5091 ft. high and others. The interior of the island is not well known. It is mountainous well wooded, and not unfruitful and has warm springs. Among the products are buffaloes oxen, goats, swine, dogs, fowls tortoises and birds nests; sugar and animal wood, maize rice, wild cinnamon, and a small quantity of the best cotton in the archipelago sulphur pumice-stone, copper some gold and iron, and on the coast amber. The inhabitants, estimated to number 250 000 are of Malay extraction, but, unlike other Malays, build their houses on the ground in places of elevating them upon posts. From Celebes vessels arrive annually in February and March laden with gold ivory common earthenware native cloths &c and take back in August and September beads-nuts, cordage and oil. In former times slaves were exported from Mangrove, and were much sought after. The principal places of trade are Mangrove in the W and Udahe in the E coast. Since August 6, 1853 in consequence of a treaty then concluded the whole island belongs to the Dutch though the Portuguese claim some portions of it, and possess a fort on the E coast at Larentooka, where some of the natives are Christians.

FLUBBING a vil. U States, New York, at the head of a bay opening into Long Island Sound. It contains ten churches, and several schools and seminaries, and is surrounded by extensive meadows and gardens, which attract numerous visitors from New York the distance being only 8 m., and the communication constant by steamer or rail.

FOGHA a valley Western Africa, prov. Kabiab about 125 m. S W Sokoto. It is bordered on the E by a hilly chain separating it from another valley in Maurel is partly occupied by a backwater of the Niger so devoid of current that it seems almost stagnant, and where widens has a breadth of about 1000 yards. The sloping banks of the valley are covered with a profusion of dense palm, and the flat below is clothed with rank grass. The ground so strongly impregnated with saline particles, that a good deal of salt is manufactured by the simple process of putting the earth into funnels made of straw and roads pouring water over it boiling the liquid thus obtained and turning the sediment into the shape of a small loaf. The inhabitants, who are of the Fulbe or Follatari race, suffer much from the incessant war here waged against them by the Denli.

FOKSHANI or FOKSHANI [add] a tn. in Turkey in Europe 44 m. W N Y Galata on the Mulkay, an affluent of the Bosphorus which divides it into two parts one of which is in Moldavia and the other in Walachia. The part in Moldavia is the seat of a civil and a criminal court, possesses a normal school, carries on an active trade with Galata particularly in corn and has a pop. of 30 000 while that of the Walachian portion does not exceed 5000.

FOKUTU a tn. Austrian empire Hungary, co. Pesth 80 m. W Kiosowa with a beautiful archiepiscopal summer residence and 5064 inhabitants, who are nearly equally divided between Protestants and R. Catholics.

FOLITICHENI a tn. Turkey in Europe Moldavia, cap. circle Suceava, on the Samooch near the frontiers of Bukovina, 68 m. W N Y Jassy. It is the seat of a civil and criminal court, possesses a normal school has an important annual fair and carries on an active trade, particularly in cattle. Pop 3000.

FOND DU LAC a tn. U States Wisconsin, cap. of one name as the S. and of Lake Winnebago, on the Chicago R. Paul and Fond du Lac, and on the Milwaukee and Fond du Lac railways 60 m. N E Madison. It is pleasantly situated on a wooded slope descending towards the lake, and possesses eight churches a steam woolen factory several large stores and a great number of flour and saw-mills. Pop 6450.

FONTANA FREDDA a tn. Austrian Italy prov. Udine, on the railway 4 m. W Portofonzo. It is memorable for the victory gained by its neighbourhood, on 16th April 1809 by the Archduke John over the vicerey Eugene Bonaparte. Pop 3038.

FOO-CHOW [add] For ten years after this port was open to foreign commerce in 1853, the trade was insignificant compared with what it has become after the second decade of years. At first the native merchants were exceedingly jealous of foreigners, and placed every obstacle in their way to the inland trade. On the occupation of Shanghai by the Taiping rebels in 1853, the tea-men stopped the supply of tea from the Boba country to that port, where it was shipped, and directed their stocks to be carried down the river Min to Foo-chow where the foreign ships followed and took in their cargoes. Not only did this traffic continue during the time Shanghai was held by the rebels, a period of eighteen months, but the route was found to be shorter and hence the trade more profitable, so that it never returned to Shanghai consequently Foo-chow has become the great outlet for the black tea district. Before this period scarcely a chest of tea appeared on the export list, and now it is the second largest port for the shipment of tea in China. In 1853 the exports did not exceed 243,000 and the imports 246,000. As compared with 1864 there was a very perceptible falling off in

1864 in the tonnage of British vessels in the port, as is thus shown:—

ARRIVED.		DEPARTED.		
VESSELS.	TONS.	VESSELS.	TONS.	
1863	225	147,796	227	147,796
1864	225	131,118	225	131,541

The decrease is accounted for by a falling off in the paper and tea trade to Tien-tsin and by the disturbed state of the neighbouring provinces. But both the imports and exports have increased in value.

	Imports.	Exports.
1864	42,071,107	42,568,781
1864	4,207,754	4,200,000

The rebel disturbances, however, have so much interfered with trade, and induced the levying of so exorbitant taxes that commerce is thrown into confusion, and the provisions of the treaty of Tien-tsin have become almost a dead letter in the port. The returns of opium show a decrease, the value of it in 1863 being £1,221,073 and in 1864 £1,086,384. And less tea was exported to Great Britain and Europe in 1864 than previously but there were increasing demands for it for Australia, which is supplied almost entirely from

Foo-chow. The total export of tea in 1864 was valued at £3,711,008, and amounted to 64,967,800 lbs. In 1863 the value was £3,230,455, and 61,000,190 lbs.

At this port the weights used are the same as the English pound weight, the pound being 160 lbs. The tea is bought chiefly with Mexican dollars, or orders from native bankers upon correspondents in the tea districts; and paper currency is used in the city representing metallic value equivalent to two, three, four and five shillings. From the autonomy shown, at the opening of the port, by the inhabitants of Foo-chow to the foreigners admitted to trade with them under the sanction of their own government, and the danger of expatriating them by their presence, which in several cases led to outrageous acts of the foreign traders have taken up their abode within the walls of the city. The only foreigner resident there is the British consul, who deemed it a matter of policy to maintain the prestige of his country at all hazards. All the other foreign residents live in the suburbs. The total foreign population in 1864 was 129 of whom 89 were British. There were 30 mercantile houses, 12 sundries, 3 missionary establishments, 8 consulates and consular agents, 7 pilots, 37 insurance agencies, and a branch of the Imperial maritime customs, with 18 British, 3 French, and 2 German officials. The French, or head members of the city in the superintendent of trade.—(WHITNEY *Chinese Commercial Guide China Directory* 1864. *Chinese Customs Returns*.)

FOO-CHOW or **FOO-CHU**, a bay and in China, in the Gulf of Loo-tung, on the W. coast of the peninsula of the Empire's South; lat. (of town) 39° 40' N; lon. 121° 30' E. The bay which is the next inlet N of Hsin Hsin, is formed on the S.W.

by a promontory which terminates in a projecting reef. This elevated, excellent anchorage is found to the N.E. in 5 fathoms water with an inlet in front, which from its appearance, has received the name of Flat Top. The land on the N side of the bay is of singular formation bearing so strong a resemblance to extensive fortifications, that it is difficult at first sight to believe it to be natural.—The town situated on a river a little above its mouth in the bay is said to command an trade except in coal, which is worked in its vicinity and exported both in its natural state and in the form of manufactured fuel.

FOO-KEE-HIEN in China, a bank Yang-tse-kiang near the N.E. frontier of prov. Szechuen. It is a town of the third rank and possesses considerable literary fame, containing numerous numbers of temples and temples of every grade. Among the most remarkable of its buildings is the Wen-tching-tsun, or temple of literary composition, where the assemblies of the literary corporation are held, and the examinations for degrees take place. Adjoining it is a magnificent garden, in the middle of which rises an octagonal tower of four stories, affording from its summit a view of the various quarters of the town, with its embelished walls the windows of the Yang-tse-kiang, and the surrounding country dotted with villages and farm-houses, and covered with rich and varied vegetation. On one side of the garden a pretty Confucian pagoda stands among large and lofty trees and on the other side is a range of little cells, in which, during the examinations, the students are shut up with nothing but pens, ink, and paper to answer the questions put to them.

FORDHAM a vil U States, New York, on the New York and Hudson railway, 12 m N W New York city. It is the seat of St. John's college and St. Joseph's theological seminary, two prominent R. Catholic institutions. The buildings of the college consist mainly of an old country mansion and outhouses to which from time to time additions have been made. In 1865 it had eighteen professors and tutors, all Jesuits except three, and was attended by 125 students. The seminary which has a church attached to it with a tall spire, is an imposing edifice of grey stone. The village contains two or three other churches, and is a favourite summer residence.

FORDO DI ZOLDO a tn. in Austrian Italy prov. and 14 m. N Belluno. In the vicinity a seam of coal and a mine of argentiferous lead are wrought. Pop. 3252.

FORT DES MOINES, a tn U States, Iowa, cap co Polk 100 m. W Iowa city at the junction of the Des Moines and Racoon, the former of which is being made navigable for steamboats up to the town. It is a flourishing place, having ample water power which drives several saw and flour mills, abundance of timber and a valuable coal field. Pop. 3995.

FORTEAU a bay British America in the Strait of Belle Isle, on the E. coast of Labrador. It is 4 m. wide at its entrance between Points Amour and Forteau and runs N for 1½ m. between high and green table-lands of sandstone. At its head is a considerable and rapid river of the same name, abounding with salmon and on the W side a fine cascade. There is a church, parsonage, and resident clergyman of the Church of England at the settlement. The bay is the best roadstead in the strait, and vessels may anchor anywhere towards its head in 10 to 18 fathoms over sandy bottom. The Jersey merchants have large fishing establishments on its shores. On Amour Point there is a lighthouse in the form of a circular stone tower faced with brick. It is 109 ft. high and 155 ft. above the sea, and is visible in clear weather at the distance of 18 m. During fog signals are made with a fog-whistle.

FORT ELLICE British America, one of the stations of the Hudson's Bay Company, beautifully situated a bank Assiniboine 90 m above its junction with the Red River of the North, lat 50° 24' 32" N., lon 101° 48' W. It was once a post of considerable importance, being the depot of supplies to the Swan River district. In this respect, however Fort Polty has been substituted for it, and it has in consequence become only a secondary station. The buildings are on a strand of wood, and surrounded by a high picket inclosure. The trade, carried on with the Plain Cree and the Ojibways, consists chiefly in pemican and dried meat, obtained from them in exchange for European articles.

FORT GARRY Brit N Amer. See GARRY in Supp. **FORT LEAVENWORTH** a military post U States, Kansas, a bank Missouri, 30 m above the junction of the Kansas River. It was established in 1827 as a general rendezvous for troops proceeding westward, and as a depot for all the furs on the Santa Fé and Oregon routes. For these purposes it is well adapted as nearly all the great military roads of the territories intersect it. It contains barracks and a hospital for the troops, warehouses, and stabling for 8000 horses and 15 000 mules. Several large farms are cultivated in connection with the fort. The town of Leavenworth is only about 2 m. distant.

FORT MADISON a tn. U States, Iowa, cap co Lee on the Mississippi, 12 m. above the lower rapids. It occupies the site of a frontier fort which was erected in 1808 for defence against the Indians and was burned down in 1813 when the garrison was obliged to evacuate it. The present town is well built with a good proportion of brick houses, and possesses a substantial courthouse, half a dozen churches and a state penitentiary. Its manufactures are rapidly increasing in importance and its favourable position as a shipping point for the lumber grain, and pork of the surrounding districts has already given it an extensive trade. Pop. 2886.

FORT RILEY a military post, U States, Kansas, at the junction of the Republican and Smoky Hill forks of Kansas River. It is situated on the great emigrant route to New Mexico and California, about 140 m. from Fort Leavenworth with which it is connected by an excellent military road. Its stone barracks are sufficient for eight companies of

infantry, and large accommodation has also been provided for cavalry.

FORT WAYNE, a tn U States Indiana, cap. co Allen, at the confluence of the St. Mary and St. Joseph, which here form the Maumee, on the Wabash and Canal, 105 m N N E Indianapolis. It stands in a beautiful and well-cultivated district, possesses fifteen churches, one of them a R. Catholic cathedral, and a German female school under the charge of nuns and carries on an active trade. It occupies the site of Twilight, an old village of the Miami Indians, who were removed W of the Mississippi in 1841 and, though the place of comparatively recent origin it contained in 1860 10 888 inhabitants.

FORT WILLIAM British America, a station or settlement of the Hudson's Bay Company on the N or left bank of the Kaministiquia, at its mouth, on the W shore of Lakes Superior. It consists of a small fort sufficiently strong to resist any Indian attack and a garden formed of soil brought from some distance and having an area of about an acre and three-quarters. Opposite to the fort is a large island formed by the middle channel of the Kaministiquia. This island once almost covered with wood, chiefly tamarac, was gradually cleared to a great extent for fuel and where not again covered by a second growth, is partly occupied as the site of an Ojibway village, and partly as pasture ground, grazed by a herd of cows belonging to the company which swim across the river a distance of 400 ft. twice every day when passing to and fro between the island and the ferryway in the vicinity of the fort. (—Hind)

FOTHS a tn. Austrian empire, Hungary on and 12 m N N E Pesth, not far from the railway; with a handsome R. Catholic church, and a beautiful estate with a fine park and 2000 inhabitants, mostly Protestants.

FOTSHA, a tn Turkey in Europe, Herzegovina, at the confluence of the Stribna with the Drin, 22 m S E Bosna Seral. It is beautifully situated contains twelve mosques, and is celebrated for its knives and sword entree which in excellence vie with those of Constantinople. Pop from 10 000 to 12 000.

FOVEAUX, a strait, New Zealand separating the Middle or Munster Island from the South or Stewart Island. It extends for 30 m in a W N W and E S E direction, from the N W end of Stewart Island to the island of Rapaiki which lies in its E. entrance is generally about 15 m. wide, and has a depth of 15 to 25 fathoms over a sandy bottom. The approach from the eastward is rendered somewhat for midable both by the position of Rapaiki and the islands, reefs, and tide gullies which surround it in almost every direction. The danger however from the island is less than it seems as there is a clear channel on each side of it with not less than 12 fathoms water. After the island is passed the N shore presents new dangers as it is studded with islets and reefs, some of them extending 8 m. from the coast, and not always visible. Even here, too the dangers are more apparent than real, as there always remains a clear navigating width of not less than 10 m. The greatest difficulty in navigating Foveaux Strait is the hazardous weather which is almost invariably met with. S.W. but more frequently N.W. gales blow with more or less violence and without regard to seasons throughout the whole year frequently continuing without intermission for many days, and then falling for a few hours only to return with renewed violence. Hono vessels passing westward through the strait are sometimes weeks in getting round the S.W. extremity of the Middle Island. Even when there it may only be to encounter a new difficulty arising from a strong current which should the wind fail or prove unfavourable, may have the effect of driving them back again within the strait. For these reasons the passage of the strait from the E. is not to be recommended to any but steam vessels it is otherwise with the passage from the W as a slant wind, S.W. or N.W. may always be calculated upon.

FRAMPTON a vil. British America, Canada East, on Dorchester 25 m S. by E Quebec with a Protestant and a R. Catholic church, several schools, and an extensive trade in pork, butter and cattle. Pop. 1300.

FRANCE [add.] The material prosperity and progress of the empire have been greatly augmented by wise legislation and by the commercial enterprise which has been aroused within the last few years. Among the domestic economical

\$19,800,000; Chinese, \$5,640,000; occupation of Rome, \$2,000,000. The whole of France, \$1,190,000. Making a total of \$31,840,000. The nominal amount of the public debt of France was, in 1851, \$213,825,494; in 1861, \$421,154,625; in 1869, \$450,938,184; in 1878, \$524,100,878; and in 1895, \$608,843,196. The annual interest payable on the debt was \$36,134,407 in 1895.

Population, etc.—The following figures show the number of the population of France, according to the census of 1861 and the five which preceded it—

Year of Census.	Population.	Increase in Five Years.	Annual Increase per cent.
1866	35,846,910		
1861	34,526,178	669,732	0.41
1856	34,400,488	1,106,690	0.66
1851	35,705,170	359,682	0.22
1846	35,139,364	565,794	0.30
1841	36,717,324	577,960	0.23

But to arrive at the exact amount of the population in 1861 must be added that of the three departments annexed to the empire after the Italian war. These three new departments contained according to the census of 1861—Alpes Maritimes, 194,878; Savoie, 278,089; and Haute Savoie, 367,496, total 787,115, from which must be deducted 88,054 for the district of Grasse, detached from the department of Var and incorporated with Nice to form the new department of Alpes Maritimes. With this in addition the total population of France was 37,586,813. In the eighty-two departments in twenty-one departments the population was numerically less in 1861 than twenty-five years previously. In twenty-three it had gradually increased, and in the remaining forty-two it had fluctuated sometimes rising and sometimes falling, but finally in 1861 being higher than in 1836. The continuous increase took place in those departments which contain the largest or principal manufacturing cities—the rural population being proportionately absorbed by the towns. The urban population of places of above 5000 inhabitants having increased 23 per cent., while the rural has diminished 0.90 per cent. between the years 1846-1861. The 87,510 communes into which the departments are subdivided contained in 1861 7,582,938 houses, classed as follows:—

Houses having only a Ground Floor	4,573,434
a Ground Floor and One Story	2,369,367
Two Stories	669,628
Three Stories	258,668
Four Stories	84,931
more than Four Stories	20,156

Of these houses, 19.45 per cent. were roofed with thatch or shingles but there was some improvement in this respect, the proportion of thatched dwellings in 1856 having been above 30 per cent. In 1861 497,061 foreigners were domiciled in France, viz.—

Belgians	204,189	Swiss	87,742
German	84,258	English	83,711
Italians	76,449	Poles	7,367
Spaniards	54,998	Americans	5,050

The remainder being made up of a number of other nationalities. Of the whole French population there were only 3,268,578 persons not living in the departments in which they were born and the total number of French subjects settled abroad amounted to no more than 316,582. These figures exclude Algeria and other French colonies.

The classification of the people according to their professions and social position is shown in the following table, which embraces the heads of families, with their wives, children, and dependants—

Class of Employment.	Males.	Females.	Total.
Agriculture	9,918,828	9,864,865	19,783,693
Manufactures	4,528,889	4,672,147	9,201,036
Commerce	745,518	705,697	1,451,215
Professions in connection with the above three	78,482	69,736	148,218
Other Employments	77,867	86,406	164,273
Unlabeled Professions	906,601	886,668	1,793,269
Unlabeled Professions	70,891	124,008	194,899
Unlabeled Professions not specified	1,329,796	1,089,130	2,418,926
Total	19,846,778	19,741,637	39,588,415

As nothing contributes more effectively to a true appreciation of the condition of a country than a knowledge of the elements of which its population is composed, particulars are subjoined of the various classes supported by agriculture and manufactures. From them it will be seen that France is an eminently agricultural country more than one-half of its inhabitants deriving subsistence from agricultural pursuits, while in England the proportion does not exceed one-fourth, and on the Continent fluctuates between 30 and 40 per cent. Of those living by agriculture it will be remarked that more than one-half are proprietors, cultivating their own estates and about 900,000 of these live above as of profession not specified should be added to this class, as they have upon the produce of their own lands, which are farmed out.

	Males.	Females.	Total.
Agricultural Population.			
Proprietors living upon and cultivating their own Estates	4,530,478	4,657,384	9,187,862
Proprietors whose Estates are managed by Agents	114,373	104,067	218,440
Farmers paying a weekly Rent	1,008,800	1,046,596	2,055,396
Day-labourers paying part of Produce	747,660	738,548	1,486,208
Tenants and other Labourers	2,800,808	2,748,697	5,549,505
Wood-cutters & Charcoal-burners	111,567	108,869	220,436
Fishermen and Blacksmiths	68,844	66,840	135,684
Miners and Gardeners	30,497	37,497	67,994
Flower Gardeners	14,158	11,767	25,925
Lead-Surveyors	6,168	7,094	13,262
Other Agricultural Employments	90,411	90,167	180,578
Total	9,718,888	9,934,668	19,653,556
Manufacturing Population.			
Employed in—			
Textile Manufactures	874,615	1,073,193	1,947,808
Mining and Quarrying	508,821	250,085	758,906
Working in Metals	745,518	611,939	1,357,457
Working in Metals & in Leather Manufactures	36,696	108,518	145,214
Wood	44,488	46,494	90,982

Total	734,830	1,416,147	2,150,977

FRANCISCO (San) [add] a town in the State of California, cap co of same name on the N.E. corner of a peninsula which has between the bay of same name and the Pacific Ocean in lat. 37° 46' N. lon. 122° 25' W. It stands on the E. slope of some high hills being the bay on a black tract with no trees and little fertile ground within a distance of 20 m. and is built chiefly on an amphitheatre formed by Telegraph Hill (394 ft. high) on the N.E. Beacon Hill (120 ft.) on the S.E. and Russian Hill (360 ft.) on the W. The streets are straight, and intersecting each other at right angles, divide the town into a number of nearly equal square blocks. In addition to the streets are twelve squares reserved for public use, but only one of them, called the Plaza, or Fortissimo Square, can yet be considered ornamental. The busiest streets have a pavement of what are called cobblestones but the others, both in the carriage way and on the side paths are only flanked with tree trunks from 3 to 5 inches thick. The town is lighted with gas made from imported coal. Water is brought by two aqueducts one from the distance of five and the other from the distance of twenty miles. Of the houses, which in 1860 numbered 10,128 8603 were of wood 1461 of brick, 47 of iron, 6 of adobe, and 5 of stone. One of the last was built of granite quarried at Mt. Diablo. The principal public buildings are the custom house, erected at an expense of \$169,000 the city hall, originally built as a theatre and purchased by the municipality for \$50,000 the mint, the marine hospital, three theatres one of them among the largest and handsomest edifices of the kind in the U. States 23 churches, of which the R. Catholic are the

most numerous, and apparently the most flourishing, as the total number of Protestant congregations is only about 1000: 3 Jewish synagogues, about 25 schools, a convent, 2 orphan asylums, and several hospitals. There is a remarkable preponderance in the number of grey shops, which amount to 800, while the groceries are only 373. Horse railroads have been constructed through most of the strata, which have extensive traffic. The city contains (1865) 13 foundries and machine shops, employing more than 2000 hands; glassworks, 3 sugar refineries, 2 flour and 4 saw mills; 2 wool mills, 2 mills for cleaning rice, chemical works for the production of nitric and sulphuric acid, a rope-walk, 4 savings banks, fire insurance offices, bankers agencies for foreign companies, and agencies for foreign life offices. Real property has improved greatly and houses have risen in proportion, dwelling-houses of six to ten rooms letting for \$200 to \$400 per annum. The U. S. States branch mint coined in 1864 \$15,917,640 in gold, and \$565,300 in silver. The export of treasure in 1864 was as follows:—

To New York	45,063,925
England,	6,897,300
Calcutta	1,877,750
Panama,	75,740
Other Countries	137,600
Total,	611,161,486

The exports, other than treasure, amounted in the same year to \$2,644,262. The value of the imports, which consist of a great variety of articles of consumption—batter, candles, soap, boots and shoes, coal, nails, lumber, &c.—cannot be stated. The number of vessels that arrived in the port in 1864 was 2096, of 799,124 tons, and of those that departed, 2166 of 810,589 tons. Of those arrived 81 were British ships, of 49,702 tons. Six ocean steamers, most of them measuring 2000 tons or more, sail regularly between San Francisco and Panama, leaving each port three a month. Other steamers maintain communication with Portland Victoria, Olympia, Manila, and San Pedro. San Francisco, previously known as Yerba Buena, assumed its present name on 20th Jan 1847. A month later, when a census was taken, the population was only 459. In the spring of 1848 gold was discovered and a rush took place, which had raised the pop. in 1852 to 24,670. The first which have occurred in the town have been no frequent and so destructive that between Dec. 24, 1849 and June 22, 1851, five are counted, which costed an aggregate loss of \$3,300,000. The preponderance of wooden houses in the town accounts in part for these conflagrations, but it would seem that they are also attributable in part to mismanagement on the part of the unsuitable authorities; unfortunately not confined to police regulations but extending to all the branches of administration and productive of so much insecurity to life and property that in 1851 and 1856 the citizens took the law into their own hands, and appointed vigilance committees, which proceeded to exercise all the powers of government, apprehending alleged criminals, bringing them to trial and in some cases not only passing sentences of death, but carrying it into execution. The census of 1860 gave a pop. of 58,806, but the actual number is estimated at 70,000 of whom about 40,000 are Americans, 12,000 Irish, 5000 Germans, 4000 British, 3000 French, and 2000 Chinese. Many of the last are professedly R. Catholics, and have a native priest of their own who was educated at Rome. One remarkable feature in the population is the preponderance of males, there being about three adult men to one adult woman.

FRANKENFELS, a N. Austrian empire, Lower Austria, circle Upper Wimmerthal, 50 m. S.W. Vienna. It is an ancient place, supposed to have been founded by Charlemagne, and has castles and four saw-mills.

FRANKLIN two places, U. States.—1. A town and port of entry Louisiana, on the bank of the Bayou Teche, 96 m. W. by N. New Orleans. Being accessible by large steam boats, it has been the shipping point for large quantities of cotton sugar and rice. Pop. 1400.—2. A vil. Indiana, cap. on Johnson on Young's Creek, 30 m. S.E. Indianapolis, and on the Madison and Indianapolis, and the Martinsville railways. It contains county buildings, five or six churches, a Baptist college under the name of the Baptist Manual Labor Institute, and a large secondary. Pop. 2587.

FRASER, or **TACOUCHU-TRAM** [add.] a river British North America, rising in the Rocky Mountains, in lat. 58° 42' N. lon. 119° W. It descends through an immense valley in a N.W. direction for about 180 m. as far as a spur of the Rocky Mountains which turns it abruptly to the S. in about lat. 54° 30' inclining in this sweep or bend the now celebrated gold-fields of Cariboo. The whole area thus inclosed is plentifully intersected by streams, creeks, and rivulets, rising in the gorges of the mountains, and ultimately flowing into considerable tributaries of the Fraser. From Fort St. George the river is navigable by light steamers for 150 m. to Fort Alexandria, in lat. 53° 35' N. Here the surrounding country is beautifully diversified by hill and dale, grove and plain; the soil is prolific, and yields good crops of grain and vegetables. As the Fraser continues its S.W. course it receives some important affluents, the Loon the Chilcothe, and the Quenella, and, in lat. 50° 10' N. effects a junction with a considerable stream named the Thompson. It now approaches the table-land of British Columbia, marked by wide open valleys alternating with low fertile hills, and soon arrives at the Cascade range of mountains, through which the mighty river bursts its waters in a series of magnificent falls and rapids, or cataracts. From Alexandria to Yale, a distance of more than 300 m. the river runs through a remarkable district, the land being formed in terraces, or benches, as they are called perfectly level and parallel. The lowest, where the valley expands, presents a perfectly flat surface, many miles in extent, and 40 or 50 ft. above the river's bank. The second 80 or 70 ft. above the lower one, is generally cut out of the mountain side, and the third, 400 or 500 ft. above the last, runs along the inaccessible face of the bluffs overhanging the river. Similar formations are found on the Thompson and other rivers, and on both sides of the strata. In the course of ages a succession of granite rocks have been hollowed out to the depth of 2000 or 3000 ft. and it is through the chasm thus laboriously formed that the Fraser pours itself—its rapids already excited by a descent of 400 or 500 m. from its mountain source. Fort Yale is next reached, and 18 m. lower Fort Hope, from which point the river is known as the Lower Fraser, presents a broad channel to its mouth, where it empties itself into the Gulf of Georgia. Just above the boundary line of the United States territory its course westward from Fort Hope lies through a pleasant and fertile country. It is navigable 75 m. as far as Fort Hope, and by light steamers 15 m. more, as far as Yale. Above Yale, for a distance of 60 or 60 m. the river passes through mountain gorges in a narrow rushing stream attaining a velocity of 15 to 30 m. an hour—so that, the river being impassable, the only route for travellers is along the perilous trail, which crosses the precipitous mountains of trap and granite, 2000 to 3000 ft. high, overhanging the river almost perpendicularly. Between June and August the melting of the snow causes the river to rise so rapidly that it requires a very powerful steamer to stem the current and at the same time numbers of large uprooted trees are brought down, and, becoming embedded in the shallow places, form dangerous obstructions to the navigation. The stream has a rate of 4 to 7 knots between Hope and Langley; the latter being about 80 m. from the river's mouth, and thence it becomes level, deep, and placid, the influence of the tide being felt, except during the months of the freshets, when it is not perceptible much beyond New Westminster the cap of Columbia. The rise of the river at these times is from 14 to 25 ft. and the banks for 70 m. from its mouth being low in many places, are liable to be flooded in the spring and summer but the land is nevertheless very fertile and produces abundance of fine hay grass. At New Westminster the river banks rise and form an admirable position for the town. The land adjacent to the river is clothed with masses of foliage, with lofty fir and pine, while the wild apricot, the white and black thorn, the vine and soft maple, and deciduous bushes of every variety form the massive undergrowth. The total length of the river is about 860 miles.

FRASERVILLE a vil. British America, Canada East, co. Terrebonne, 7 m. S.E. Lawrence, 100 m. N.E. Quebec; with a Protestant and a R. Catholic church several schools, and a large trade in lumber. Pop. about 3000.

FRAYLE MUERTO a tn. La Plata, Pampas on the Cerearal, 150 m. S.E. Cordova. It is the largest and best

place on the whole line of road between Cordova and Rosario, consists of houses which, though only of mud, have an air of elegance about them, and are built with great regularity; it possesses also a market-place, a church, and an excellent post-house.

FREECK, a tn. Austrian empire, Transylvania, circle and 10 m. S.E. Hermannstadt on a height not far from the Aluta with several fine buildings, a large and beautiful garden, and a postmill. Pop. 2610.

FREDERICKSTADT, a tn. West Indies on a bay on the W. side of the Isl. of Santa Cruz or St. Croix, belonging to the group of the Virgin Islands. It is defended by a fort and has good anchorage in front of it in 5 to 6 fathoms, the bay on which it stands forming a spacious basin of about 5 m. in extent. Pop. 3385.

FREDERICKSBURG [add] a tn. U. States Virginia, cap. co. Spotsylvania, on the r. bank of the Rappahannock River at the head of the tide-water 55 m. by rail and 65 by road N. Richmond. The town is pleasantly situated in a fertile valley and has advantages for commerce and manufactures. The railroad from Washington, via Aquia Creek, passes through it, and as the through trains generally stopped at Fredericksburg station for about an hour on each trip a not inconsiderable chance trade was turned thereby in the immediate locality of the depot. A good canal has been constructed from the town to a point on the Rappahannock River about 40 m. above, by which large quantities of wheat, flour and tobacco were formerly received for exportation. The river affords extensive water-power which however has not been much used. The hills in the neighborhood varying in height from 40 ft. to 100 ft. abound in fine granite and freestone. About thirty years since the prospect of Fredericksburg being a rapidly rising town was very great but it suddenly stopped in its prosperity and after standing still for about twenty years it gradually retrograded in its importance. Before the civil war it contained five churches, an orphan asylum two seminaries, four newspaper offices, and two banks. During the contest it was the scene of three encounters and on Dec. 13 1863 there was fought here one of the great battles of the war in which the Federals were defeated. The result was the reduction of Fredericksburg to ruins and desolation. In 1840 its population numbered nearly 4000 souls and in 1850 ten years after it had only increased 38 persons in 1860 it had risen to 5023.

FREDERICKSHAAR, a Danish port, W. coast Greenland lat. 63° N. lon. 50° W. founded in 1743. Its district bounded S. by that of Julianeuburg, and N. by that of Frederiksborg, is 106 m. long and contains much tallow. The port is rocky and secure has two entrances and 8 to 10 fathoms water.

FREIBERG, a tn. Austrian empire, Moravia, circle and 6 m. N. E. Neutischtein, cap. dist. of same name on the Lubina. It has a Gothic deanery church with a lofty tower a Plarist college, a gymnasium a high-school an asylum for orph. an children, extensive manufactures of cloth, two woollen and four yearly markets. Pop. 4414.

FREISTADT, two tns. Austria empire.—1. Moravia, circle and 20 m. N. E. Hohenb. on a plain bounded by wooded hills. Its inhabitants are chiefly employed in weaving and carrying on a trade in linen. Pop. 1100.—2. Silesia, cap. dist. of same name, on the Odra, about 32 m. E. Troppen with several public offices a town hospital, a beautiful castle belonging to Count Lersbach, manufactures of linen and leather and three yearly markets. Pop. 1200.

FREISTADTL, a tn. Austrian empire, Hungary co. Lower Austria, cap. dist. of same name, 1 bank Wang. here crossed by a long wooden bridge, 89 m. N. E. Freisberg. It is the seat of a district court, and has a Franciscan convent with a Gothic church, a fine seat belonging to Count Erdödy with a collection of coins and natural curiosities, an hospital a trade in wood and woollen articles, and much-frequented cattle markets. Pop. 6098.

FRIEDBERG, a tn. Austria empire, Silesia, prov. and 55 m. N. W. Troppen with a very old castle, some flour-milling, and granite quarries. Vaux is extensively given in the vicinity. Pop. 1000.

FRIESTADT, or **FRIESTADT**, a tn. Austrian empire, Galicia, cap. dist. of same name, circle and 6 m. N. E. Jaslo. It was founded by Casimir the Great, and contains 1650 inhabitants, mostly the descendants of German emigrants.

FU CHU, See **Foo-Choo**.

FUERTE DE ANDALGALA a tn. La Plata, prov. and 75 m. N. W. Cuzco, cap. dep. of same name, on a slope near the S. W. extremity of the Sierra de Aconquija. The inhabitants are chiefly employed in the culture of the vine and the conversion of its produce into wine, brandy and other liquors which have a high name, and are in great demand, not only in the province, but in the surrounding countries. The trade is carried on chiefly with Thomson from which the returns are raw woolen and leather articles, metals, and boxes of barilla. Copper mines, which promise to be productive, have been opened within the department.

FUGA a tn. E. Africa cap. of Usumbarre, near I. bank Pangani, and 37 m. N. W. of the tn. of this name. It stands nearly 4500 ft. above sea-level. It is without walls, and contains about 500 circular huts of the form common to Africa from Harar to Timbuctoo. The inhabitants have a strong mixture of Arab blood, and are estimated at 3000.

FULTON two places U. States.—1. A vil. Ohio on the Ohio River immediately above Cincinnati, of which it is properly a suburb. It possesses several churches, a rolling-mill, a dry-dock, saw-mills, lumber-yards, &c. The chief business is the building of steamboats. Pop. 3324.—2. A vil. Missouri cap. co. Callaway 20 m. N. E. Jefferson. It possesses several churches and academies a state lunatic asylum and an asylum for the deaf and dumb, and is extensively engaged in the manufacture of earthenware. Pop. 500.

FUMBINA, See **ADAKAWA** see **Supp**.
FURD (Trans) a tn. Austrian empire, Hungary co. and 45 m. N. E. Kolozsok, cap. dist. of same name, near the Theiler with a court of justice and several public offices, an infirmary manufactures of excellent Hungarian saddles and a trade in corn and wine. Pop. 5551.

FUREEDABAD a tn. India, N. W. Province cap. Jaggroo of same name called also Bulshah, 24 m. S. Delhi on the route to Mitrar. It stands amid graves of tamarind and other trees, forming a pleasing contrast to the barrenness of the surrounding country; is surrounded by a wall, and possesses a bazaar and a large tank. About half a century ago it was famous for the manufacture of bows and arrows.

FUREEDPOOR a dist. and tn. India, prov. Bengal. The distance between lat. 26° 3' and 24° 6' N. lon. 88° 20' and 90° 15' E. is bounded N. by Mymaning S. Duaka S. Backergunge, and W. Jessore and Pabna area, 2053 sq. m. The whole district is an alluvial tract low and swampy in the S. and N. E. but rather more elevated in the N. and N. W. It is watered in overflowing by the Ganges and its tributaries of which the more important are the Jodda, the Kousa or Jahnu, the Dulacer, and the Barahat or Ghundah. The soil is in general very rich producing rice in the swampy grounds and in those not subject to inundation abundant crops of cereals and pulses, sugar (grown to such an extent as to be probably the most important commercial crop, cotton, indigo and oil-seeds. The manufactures consist chiefly of coarse cottons for home use and the trade exports kharra, and imports, is considerable a number of wealthy merchants taking an active share in it. Pop. 853,000.—The towns cap. of the above dist., situated r. bank Ganges which is here known by the name of the Padma, 113 m. N. E. Calcutta can hardly be said to have the appearance of a town and rather consists of a large number of huts scattered thinly over a large extent of garden orchard and rice ground. The only buildings of note are those in which the different branches of the civil department are accommodated. Fureedpoor was once a noted resort of river pirates.

FUREEDPOOR, a tn. India, Rohilkund, dist. and 13 m. S. E. Bareilly. It stands close to a grove of fine mango trees in a flat, fertile and well-cultivated country in which much cotton is grown; and has a well-supplied bazaar.

FURRUOKABAD [add] a dist. and tn. India, N. W. Province. The distance between lat. 26° 40' and 27° 45' N. lon. 78° 57' and 80° 17' E. is bounded N. by Rodas and Bhujapur, E. Onda, S. Euzrah and Cawnpore, and W. Euzrah and Kynpore area, 1909 sq. m. It consists generally of a large alluvial flat with a gentle slope S. E. as indicated by the chief streams the Ganges, Onda, and Rind. The only exception to the general flatness is in the S. W., where part of the ridge or great occurs which extends along the Deah, and forms part

of the watershed between the Juma and Ganges. The soil varies much in quality, that along the banks of the Ganges consisting of loess or marsh land saturated with moisture, but not in such excess as to interfere with its regular cultivation. On land of this description the principal crop is *ladang*. In other parts of the district the soil is sandy and so little retentive of moisture that in the dry season nothing but constant irrigation can save the crops from withering away. Where this remedy against drought is not or cannot be applied the country looks dismal. Where neither extensive moisture nor sand prevails the soil is well adapted for general cropping, and produces fine wheat, barley, peas, maize, sugar cane tobacco, and cotton the last grown only for home consumption. Pop. 854,799.—The town cap. of the above district, situated nearly 3 m. W. of the Ganges, and 13 m. E.N.E. Agra, is on the whole a handsome town, surrounded by a wall and containing many good streets and squares many of them shaded with trees, and clean to a degree seldom witnessed in India. Within the town, on a commanding eminence, is a large mud fort where the nabob used to reside. The trade is considerable, and many of the wealthiest of the inhabitants have large banking establishments. Much indeed, was the commercial importance of the place at one period, that it had its own mint, which furnished a large proportion of the coin circulated in the surrounding country. This continued to be issued till 1824. The British conquest of Fateghyer in 1818 situated about 3 m. E. of the town on the W. bank of the Ganges. Pop. of Farrukhabad, 56,300.

FÜRSTENSTEIN a vil. Prussia, prov. Silesia, gov. and about 32 m. S.W. Breslau near Frunberg, with a particularly attractive castle belonging to the counts of Heekberg, containing a collection of paintings and engravings, and a library of 40,000 volumes. The castle was founded in 1146 by Boleslaw IV of Poland and belonged to the dukes of Silesia. In 1429-29 it was in the hands of the Hussites who subsequently several times besieged and after being in the possession of various proprietors, it fell (1508) into the hands of its present proprietor. Pop. of vil. 800.

FUSHI or FUSHIYAMA a mountain, Japan, in the S.E. of the island of Kyushu about lat. 35° N. lon. 133° 48' E. It is in the form of a lofty cone, and has a height estimated at about 12,450 ft. Seen from the entrance to the Bay of Sado it presents a very striking appearance, and forms an excellent landmark.

FUTAL (Als.) a tn. Austrian empire, Temeswar Banat, circle and 4 m. S.W. Nemesa, on the Danube with a beautiful castle and a brewery. Pop. 4643.

FUTEHLINGE, two places, India, Rohilund dist. Bareilly.—1 W. Futehling, a tn. 12 m. N.W. Bareilly on the route to Moradabad. It stands in an open, level and well-cultivated country and is a thriving populous place, with a well-supplied bazaar. It takes its name meaning "Victory market," from a victory gained here in 1796 by a British force under Sir Robert Abercrombie over an army of Rohillas. An ahleek, raised in honour of the victory, marks the spot where the battle was fought, and within a stone's throw of it is another monument, in the form of a carved and ornamented tomb erected by the vanquished over the remains of two of their chiefs who fell in the action.—2 E. Futehling, situated about 23 m. E. of the former on the route to Shikhpore, near r. bank Bhagul. It stands close to a noble grove of mango trees, covering from 20 to

30 acres is surrounded by a ruinous mud wall with two handsome brick gateways and possesses a well supplied bazaar but is on the whole a poor and insignificant place. It owes its existence to Shajah-ud-Dowlah nabob of Oude, who erected it to commemorate a victory which was gained in 1774 by the British over the Rohillas, and made him master of nearly the whole of the Rohilla territory in consequence of a shameful compact which he had previously concluded with Warren Hastings.

FUTTEHPOOR, a dist. and tn. British India, N.W. Province. The meridian between lat. 25° 25' and 25° 18' N. lon. 80° 12' and 81° 33' E. is bounded N.E. by the Ganges separating it from Oude. E. Allahabad, S.W. the Juma, and N.W. Cawnpore area, 1683 sq. m. It lies wholly within the Doab, between the Ganges and Juma, which receive the whole of the drainage directly or by their tributaries. The surface consists generally of an alluvial flat little raised above the channel of these rivers and sloping almost imperceptibly towards the S.E. It is cultivated like a garden, and is rich in rural scenery of the most pleasing description. The principal crops are the usual cereals—wheat, sugar-cane, indigo, cotton, and poppy. The chief difficulty with which the cultivator has to contend is frequent and long continued drought. The great trunk road, and the railway following nearly the same line of road from Calcutta to Delhi pass through the district. Pop. 511,132.—The town cap. of the above dist. situated 46 m. S.S.E. Cawnpore, on the great trunk road and the railway from Calcutta is a large and thriving place. It contains some good houses, a small but very elegant mosque, a well-supplied bazaar, a courthouse, and other buildings connected with the civil establishment, and a spacious area, or traveller's lodge, consisting of a large enclosure, with two gateways surrounded by towers not unlike those of a college, and with a cloister or verandah all round. During the sepoy mutiny the rebels gained possession of the town and kept it till driven out by Havelock who, on the 12th June, 1857, here achieved the first of his series of famous victories. The railway from Calcutta was opened to this point on 25th March, 1858. Pop. 20,884.

FYZABAD or Feroza a tn. India, Oude, r. bank Gogra, which has a large and navigable stream 65 m. E. by S Lucknow. It stands in the immediate vicinity of ancient Ayodha or Oude, the ruins of which extend for several miles along the bank of the river and was substituted for it by the first nabob vizier of Oude, Sadat Ali Khan who in 1730 built a palace here and made it the seat of government. It was embellished and extended by his successors, particularly Shajah ud Dowlah who inclosed the fort with a ditch, and strengthened it with a new wall with round towers, and added so many new buildings that the town assumed the appearance of a great capital. Subsequently however when his unprincipled compact with Warren Hastings had given him nearly the whole of Rohilund, he removed the seat of government to Lucknow. This event, which took place in 1775 was a fatal blow to Fyzabad, which began immediately to decline. Its wealthy merchants and bankers quitted it at once to follow the court, and its present population though still estimated at little short of 100,000 amounts almost exclusively of the more indigent classes. The only manufactures of any consequence are cloth, metal ware, and arms. The native troops stationed here, consisting of two regiments of M.L., a troop of cavalry and a detachment of artillery mutilated on 8th June 1857.

G

GABOON TEE [Gabi] a river Africa, W. coast, called by the natives M'ponge, flowing into the Gulf of Guinea, lat. 31° 50' N. lon. 9° 20' 30" E. The territory of the Gaboon (native name Zanguebar) extends along the river about 40 m. and along the coast about 30 m. Its inhabitants are a fine race of negroes, who carry on an active trade with Europeans in ivory, opium, ebony and dye-woods and, sup-

perfluently to slaves. The climate is unhealthy. Near the river spread vast and unwholesome swamps, but inland rise some considerable hills, and these are clothed with dense jungle-like woods, the abode of the gorilla. This region has been made better known by the travels of M. de Chablais and Mr. W. Woodhouse's account of his interesting explorations. A French settlement was established here in 1642 and in the

following year an American mission was founded at Baraka, 8 m. up the river which still continues in operation.

GABRIEL (Rio) a tn Brazil prov Rio Grande do Sul, on a commanding height, 190 m. W. W. Porto Alegre. It is a modern place of pleasing appearance, consisting of white houses roofed with red tile and has two small chapels, large barracks for the accommodation of the park of artillery stationed here, a hospital, a house of correction and a little theatre. The shops are numerous and well supplied the trade is extensive, and the whole place has a lively prosperous appearance. Pop. about 3000.

GABRIEL CHANDEL, S. America. See DAWSON ISL. in Supp.

GABROVA a tn Turkey in Europe, in the E. of Bulgaria, capital and 140 m. S.E. Widin with three churches, a school, and a pop. of 4000.

GADIATSEH a tn Russia, gov and 70 m. S.W. Poltava, cap. circle of same name, at the confluence of the Poles and Dnieper. It has five churches, a circle and a parish school, two charitable institutions and trade in tobacco, which is largely cultivated in the circle. Pop. 4909.

GADRA or **GAIRA** [add.] a tn N. Africa, regency and 176 m. S.S.W. Tunis, on a height surrounded on all sides by lofty mountains. It occupies the site of the ancient bulwark of Jugurtha and consists of wide and clean streets and houses substantially built of stone. The chief object of interest at the elevated remarkable structure, but now in ruins. Two copious thermal springs which discharge into a basin, furnish the inhabitants with the means of fertilizing the surrounding district. The people also manufacture articles in soap, white hosiery, and covers famous for the fineness of their texture; and carry on an extensive trade in dates oil and wool famous for its whiteness. Pop. about 5000.

GAINESVILLE a vil. U. States, Alabama, r bank Tombigbee, 40 m. W. S.W. Tuscaloosa. It is an active place of business, contains several churches and is the principal point for river shipping in the country. Pop. about 1500.

GALAHAT a prov Aghmatia bounded N. by outliers of the Elephants range, E. the Tazacze, and E. and W. the Shumla area about 1300 sq. m. It is far more populous than the neighboring provinces, and has a soil of remarkable fertility yielding in abundance, wherever irrigation is applied the products not only of the temperate but also of the tropical zone. The inhabitants partly Tagar and partly Arab and Fungai employ themselves in agriculture, manufacture, and trade. The agricultural products include besides grain, cotton which is grown as largely as to be an important article of export. The manufactures are limited to cotton stuffs and the turning of a great variety of articles in ivory as small soap bracelets, finger rings, &c. The trade while Galahat existed as an independent state, long before the Turkish invasion of Sudan, was very important, as it had then almost a monopoly of the traffic with the interior of this part of the African continent. Since then commerce has found new channels and the trade of Galahat which in consequence has greatly declined, has little prospect of any extensive revival. Government is administered by a sheikh a Tagar, from Darfur. He calls himself independent but has in fact two masters, the Turks and the Kats of Tigre, to whom he pays an annual tribute of \$300.

GALAMBALVA (GELAR) a tn Austrian empire, Transylvania, circle and 11 m. S.W. Udvorhely 53 m. E.N.E. Hermannstadt with a Protestant and a Greek non united church and 1360 inhabitants.

GALANGUE a territory W. Africa Kimbundu country between lat 15 40 and 14 50 S. and lon 17 and 19 30° E. bounded N. by Sambia E. the Kuanza B. the land of the Nyanze-Gangalla and W. Kaemba area about 15,000 sq. m. It forms one of the loftiest plateaus of S. Africa, having an average height of 5000 ft. Its climate is temperate and healthy. The principal rivers are the Kuanza, which borders it from N.W. to E.E. forming its boundary in that direction, and the Kuanze, which, flowing from N. to S. separates Galangue from Kaemba. The government is in the hands of a prince, who is practically as well as theoretically absolute. Owing to the predatory habits of the people, who frequently take part in the M'banza forays, there is not much agriculture but from the same cause cattle are numerous.

See also GAL.

inasmuch as in addition to those reared within the territory large numbers are introduced into it by slavers. The principal articles of trade are cattle and bees wax, which find a market at Benguela, some ivory also is obtained from the S. in exchange for slaves. Pop. about 250 000.

GALANJE, a tn. S. Africa, kingdom Malwa, at a short distance N. of its capital Kabebe, about lat. 7 30' S., lon 27 E. It is a considerable town but derives most of its importance from being the burying-place of the Mossi-Jawu, or kings of Mohru. Instead of one common mansement, each deceased monarch is buried in a separate grave of great depth and large dimensions. Over it a building with a lofty straw roof is erected, and the walls of the interior are hung with party-coloured mats. Two slaves are left to watch the body and take care of the grave. This is continued during the whole lifetime of his successor but the moment he dies his predecessor's grave is closed and a new one having been prepared the process of watching is resumed. Pop. about 5000.

GALAXIDI, a tn Greece nomarch Phthiotis and Phokis, on the W. shore of the Gulf of Salona or X. arm of the Gulf of Corinth or Lepanto. It has its site on a low peninsula which forms three harbours, and was one of the most important commercial places in Greece previous to the war of independence, during which it was, in 1821 laid in ruins by the Turks. At present it has a civil court, a lamazette, a custom house and a parish school and contains 4000 inhabitants, engaged in shipping and trade.

GALENA [add.] a tn U. States Illinois, cap. co. Jo Daviess, on both sides of the Galena, 3 m. above its junction with the Mississippi and on the Illinois Central railway 150 m. W. N. W. Chicago. It occupies a high and healthy site encircled by cliffs of mountain limestone which give it a very irregular and picturesque appearance and is for the most part substantially built of brick, many both of the private dwellings and public edifices being in a good style of architecture. Among the latter are twelve churches, ten public schools attended by 1500 scholars, a seminary, a U. States marine hospital and a custom-house and post-office built of stone at an expense of \$14 000. The chief industrial establishments are large flour and saw mills driven by steam, two lead furnaces, two iron foundries, a pottery several breweries, lumber yards large leather tanning houses soap and candle works, and various factories of plough waggons carriages, and furniture. The great staple of Galena, however is lead which is extensively worked both in its vicinity and the surrounding districts. The quantity shipped from 1821 to 1856 was 820 632 899 lbs. or 354,304 tons and had an estimated value of about six millions and a half sterling. Besides lead Galena annually exports horses, cattle, grain, flour, potatoes, pork and bacon to the value of about 180 000. Pop. 8196.

GALESBURG a tn U. States Illinois at the junction of the Chicago and Burlington, the Northern Cross, and the Peoria and Okawana railways 105 m. W. S.W. Chicago. It is well built in wide regular streets, contains a university and two colleges, one of them for females, and possesses a number of hotels a large furniture and machine shop, and planing saw and flour mills. Pop. (1860) 4953.

GALLATIN, a vil. U. States, Tennessee, cap. co. Sumner on the railway to Bowling-Green 18 m. N.E. Nash ville contains several churches and schools, and has a pop. of about 1500.

GALLIO a tn Austrian Italy prov and 24 m. N. Vienna, with manufactures of straw hats and two laneries. Tobacco is largely grown in the district. Pop. 2230.

GALLO an isl. S. America, at the N. entrance of a bay on the S.W. coast of New Granada lat. 1 56' N. lon. 75 58 44 W. It is memorable as the spot where Pizarro, when the great body of his followers refused to proceed further drew a line on the sand and called upon those prepared to follow him to maintain their determination by stepping across it. Only thirteen did so, and with these he remained while Almagro returned to Panama for reinforcements. Ultimately however before these arrived he removed to the island of Gorgona as a more secure and equally eligible position. Immediately N. of Gallo is Casapal Point, a bold red cliff, forming a striking contrast to the general flatness of the coast.

GALVESTON [add.] a tn. and port of entry U States, Texas, cap. of Galveston, at the mouth of a bay at the N.E. extremity of Galveston Island, and on the Galveston, Houston, and Henderson railway. It contains ten churches, two of which, the Episcopal and the E. Catholic, are handsome Gothic structures, a E. Catholic university an Ursuline convent, an academy a female seminary many elegant private houses, and large and commodious stores. The harbor, the best in the state, has 12 feet of water in the bar at low tide, and is well provided with wharves, repairing-docks, building-yards, &c. Frequent to the civil war the shipping trade was of considerable extent. The number of vessels entered and cleared for foreign ports in 1868 was 61 carrying 28,378 tons; the coasting trade was still more important. The principal export was cotton, of which above 300,000 bales were shipped in 1858. In December 1862 it was occupied by a small Federal force, which, however was surprised and captured on January 1 1863 by the Confederates. Pop. (1860) 7807 of whom 1778 were slaves.

GAMA a river E. Africa, which rises at the Nguru hills, at a distance of about ten days' march from the coast flows E. draining the mountainous country of the Fungus and the Kagan rivers, and falls into the Indian Ocean near Sandan opposite to the island of Zanzibar. Its bed is never dry but a bifurcation a little above its mouth, forming a small delta, subdivides its volume and thus renders it less fit than it might otherwise have been for navigation.

GAMBIA (Tern) [add.] a British colony W. Co. Africa. In 1803 the native territory of the isl. of St. Mary known as Barotsa Cumbi, was annexed to the colony and has been settled by military pensioners and captured Africans. The tribes in the immediate neighborhood of the colony are chiefly Mandingas, and are divided into two classes—Marr-bosses, or strict observers of the law of Mahomet, and Bunt-tinkers, who are only nominal Muslims; between the two are constant religious feuds. The export of slaves has been a known to the Gambia for many years the prisoners of war being usually retained in slavery by their captors or sold into other parts of the country. In point of unhealthiness the Gambia varies little from the other settlements. There is considerable sickness during and after the rains, but many of the merchants are in the habit of passing the worst months of the year in England. The position of Bathurst, the seat of government is rendered more unhealthy by the vicinity of an offensive and pestilential swamp, which however might easily be drained. About 150 m. up the river the island of McCarthy is occupied as an advanced post for the protection of trade in its neighbourhood, but the climate of it is very unfavorable for Europeans. The trade of the colony consists principally of ground-nuts, hides, and wax ground-nuts being six-sevenths of the whole export. In 1858 the value—which are usually taken to France, and there converted into an all which is sold to coffee oil—amounted to the value of £188,000, but in 1864 the value had fallen to £78,000. Cotton is cultivated to some extent recently Cotton goods, rice, and tobacco are the principal articles received into the colony. In 1863 the imports amounted to £175,956 and the exports to £141,673 and in 1864 the imports were £136,777 and the exports £148,157. The colonial revenue in 1863 amounted to £17,254 derived principally from customs and parliamentary grant; the expenditures was £19,325, chiefly upon civil establishments; and the liabilities of the colony amounted to £26,300 on January 1 1863.

GAMBIA, a vil. U States, Ohio, beautifully situated on a high ridge nearly surrounded by the Vermon. It is the seat of an Episcopal college, and a theological seminary connected with it. The former consists chiefly of an imposing white built of stone, in the Gothic style, and has five professors fifty students, and a library of \$750 vols. Pop. 576

GAMING a tn. Austrian empire, circle Upper Wienerwald cap. dist. of same name, 90 m. S.W. Vienna. It has a castle a ruined church which belonged to a Carthusian monastery manufacturers of leather and waggons-exiles, and numerous saw and other mills. There is a petroleum spring in the vicinity. Pop. 5019

GAMBIA KALEBY a support in Russia Finland, E. coast of Gulf of Bothnia; lat. 65° 48' N.; lon. 25° 15' E. Gambia Kaleby is equivalent to Old Christavara. Pop. in 1856, 1627

GAMANOQUE, a tn. British America, Canada West, Co. Leeds, 1. bank St. Lawrence, in a district surrounded by mountains and lakes 160 m. E.N.E. Toronto. It contains four churches—Church of England Free, Wesleyan, and E. Catholic, a grammar and other schools and being a port of entry carries on a considerable trade. It has also a large extent of water-power which has been made available for mills and manufactures. The view obtained here of the Thousand Isles of the St. Lawrence is very fine. Pop. about 1600.

GANDA a territory S.W. Africa, Kinsbunda country about lat. 15° 40' to 15° 25' S.; and lon. 14° 40' to 15° 30' E. bounded N. by Kinsbunda E. and S. by extensive unhabited forests and W. by the Makungo desert: area about 2100 sq. m. The surface consists mostly of lofty precipitous mountains, including deep valleys which are watered only by mountain streams, of which the only one of sufficient importance is the Omata, which, rising in the wilds on the E. frontier, traverses the territory and joins the Katumbela. The inhabitants, too predatory in their habits to settle down to any regular employment can scarcely be said to have any agriculture. Grazing is almost equally neglected because it is found the easier to steal cattle than to rear them, and hence, when a supply is wanted, the means resorted to is a foray to the far north, where cattle are numerous and their owners seldom have sufficient courage to defend them. The only live stock which from being reared on the spot, can be said to have been honestly gotten by are swine and poultry. Iron, the only mineral yet known to exist among the mountains, is partially worked. Pop. 30,000 who are under the rule of an absolute prince.

GANDAKO a tn. Western Africa, prov. Korofofo, 1. bank River, 100 m. above its confluence with the Kwara. It is a Palo or Fellatah settlement which is said to have been founded by a Palo force, chiefly composed of slaves, who were sent to attack Wukari, and failed. Instead of returning they preferred to remain in the country intermarried with the Djaka, and founded several towns. Among these, and nearly adjacent to Gandako, are Gandars and Ibi. The three together may have an aggregate pop. approaching to 2000. The huts of Gandako are indifferent and too much huddled together. Those of Gandars and Ibi are less crowded and have small plots of garden ground attached to them. on their sides and roofs also pumpkins, gourds, and other commodities are trained.

GANDO a tn. Western Africa, once cap. of an empire of same name, and still the residence of a powerful Palo prince, 50 m. S.W. Sokoto. It stands in a hollow commanded from all sides by chains of hills, but has a pleasant and unimpaired interior adorned with various trees among which the banana is prominent. It is intersected from N. to S. by the broad and shallow bed of a torrent, affording rich pasturage, but it is on the whole, a very flat place, and owing to the treacherous state of the country is harassed by perpetual alarms. The principal manufacture is cotton cloth particularly cotton stripes, of first-rate quality and, though coarsely dyed, in great demand in adjoining countries. The trade, almost entirely transit, is, in a great measure, confined to a coarse kind of coloured silk imported from the north and much used by the natives for adorning their leather-work. Some of the vegetable products are famous, among other the banana, which is grown in considerable quantity and the onion, which is raised at the adjoining districts both in mass and quality.

GANDUTAN a vil. Western Africa, 1. bank Kwara, 280 m. W. W. Sokoto. It is a slave village, the property of a Turki chief and consists of about 200 huts of matting with two leather tents in the centre. The district is much infested by lions.

GANDERPOOR, a tn. India, N.W. Provinces, dist. and 38 m. W. Gorakhpore on the Koyne. It consists of about 200 houses, partly inclosed by an earthen rampart.

GANG a mining town, Austrian empire, Bohemia, circle and 6 m. N.E. Chaslau, with a parish church, and mines of silver and tungsten and 1150 inhabitants.

GANGEE, an ad. Pacific Ocean, in what is called American Polynesia; lat. 10° 50' S. lon. 160° 50' W.

GANGPFORE a petty state India, between lat. 21° 50' and 22° 37' N. lon. 82° 51' and 84° 57' E., and bounded N. by Chota Nagpore, E. native state Buxi S. native state Sambal

and British dist. Bembelpore, and W native state Kyghur and Jambour length, E to W 90 m. breadth 35 m. area, 2468 sq. m.; revenue about £10 000. The soil is naturally rich, but there is little cultivation, and the greater part of the surface is covered with jungle. The capital which is of same name is 250 m. W by S. Calcutta. Pop. 113 000.

GARAKOTA a tn India, territory Sanger and Ner-budda, in the fork formed by the junction of the Sonar and Gudar 35 m. E Sanger. It consists of the town proper which extends from bank to bank between the two rivers, and of a fort, which situated in the apex of the fork, is washed on two sides, and is inclosed by a deep ditch and two walls an outer which is 20 and an inner which is 80 ft. high.

GARANY a tn Austrian empire, Hungary co. Zemplin, 12 m. N.E. Salorsilly-Libely has a strong castle, provided with bulwarks and two towers; and contains 1000 inhabitants.

GARAPPOOK a tn India, Belinda s. Dommoons, 49 m. S.W. Sanger. It is defended by a small fort and contains some ancient structures built of the fine sandstone in the vicinity and elaborately sculptured.

GARDINER [add] a tn U States, Maine on both sides of the Cobscookscot, at its junction with the Kennebec, 12 m. below Augusta, and on the Kennebec and Portland railway. It possesses an academy a high-school, an almshouse and a mechanics institute and is very largely engaged in manufactures, for which the falls on the Cobscookscot furnish great advantages. Among the industrial establishments are a pottery a foundry a woollen factory two machine-shops three tanneries, and two paper two flour and two saw mills. The shipping owned in Gardiner is about 6000 tons of which a half is employed in the southern and foreign trade. Pop. 4487.

GARNAVILLE a vil U States, Iowa, cap. co. Clayton 105 m. N by E Iowa, on the route from Dubuque to Prairie du Chien. It stands on an elevated rolling prairie, and there are vents of lead in its vicinity. Pop. 1380.

GARRY a fort or station, British N. America. Red River Settlement, belonging to the Hudson's Bay Company, is situated a little above the junction of the Assiniboine and Red

down an inclined plane into the cavern habited the Grand Fall. The Rocket Fall is so called, because the water forced through a series of rocky channels, assumes the form of rockets in its descent. The Dams Blanche sends down its water in snowy flakes of a peculiarly graceful appearance.

GARU a tn Western Africa, on an island of same name, in the Kwarra, 210 m. W N W Sokoto. The whole bed of the river which is here from 6 to 8 m. broad, is studded with islands many of which are large, very fertile and well populated. It is a large and important place, with a population roughly estimated at 7000 or 8000.

GARU N-GHABRES, a tn. Western Africa, Bornu 19 m. W Kukawa. It is a middle-sized walled town with a well-cultivated district and is of some historical interest from being identical with Hiram that gabbes the oldest place of the seven original settlements of the Hausa nation.

GASPÉ a bay British America, Canada East, on the W shore of the gulf near the entrance of the river of St. Lawrence. It is formed on the S. by Peter Point, consisting of low sandstone covered with the white houses of fishermen and on the N. by Cape Gaspe, a remarkable E. end of limestone, having on its N.E. side a magnificent range of cliffs which rise to the height of 694 feet.

The entrance measured between these two points is about 9 m. and the bay itself stretching W N W for rather more than 16 m. gradually narrows to the point at its head where it receives the Dartmouth. The only other rivers of any importance which enter it are the York and the St. John, both on the S.W. shore. Gaspe has numerous advantages which may hereafter render it one of the most important maritime stations on the E. coast of British America. It contains an excellent outer roadstead off Douglas Town a harbour at its head capable of holding a numerous fleet in perfect safety and a basin where the largest ships may be hove down and refitted. The N.E. side of the bay for 5 miles within the cape is covered with fishing establishments belonging to Jersey merchants and with the houses of the fishermen on the opposite shore scarcely not deficient in grandeur in presented by a succession of precipitous cliffs of slate and sandstone, rising to the height of 200 feet, while a small island terminates in a mountain range.

GASTON a vil U States, N. Carolina, 1 mi. S. Roanoke 60 m. N.E. Raleigh. It is the terminus of two railways connecting it with Raleigh and Richmond and is a depot for tobacco and wheat.

GASTORF an Austrian emp. a B. house and 10 m. from Leitmeritz, in the O. Oberla, with a parish church an hospital a townhouse, a paper-mill, and a rice in corn and 1100 inhabitants.

GATTENDORF a town Austrian empire, Hungary co. Weizsburg about 5 m. S. Pressburg with a fine mansion in an English park and a trade in corn and silk. Pop. 1870.

GAURION a tn Greece, near Achilides on the N.W. shore of the island and 11 m. W N W the town of Andros. It possesses a large and excellent harbour at sheltered from all winds except the west. Pop. 950.

GAYRING an Austrian empire, Hungary co. and 20 m. N N W Pressburg with 3603 inhabitants, who trade in fish wood and cattle.

GAZAWA a tn Western Africa, 90 m. N by W Kano, cap. of a territory dependent on Maradi. It is inclosed by a strong stockade and a deep ditch and is partly in the form of a regular quadrangle with a gate on each side. These defences are rendered necessary by its position on the frontier where Islamism ends and paganism begins. The fanatical Mahometans are constantly attacking it. Owing to this cause manufactures and cultivation are much neglected and the breeding of sheep and cattle constitutes the chief employment.

GDOW a tn Austrian empire, Galicia, Kreis Bohemia, on the Raba, 12 m. S.E. Cracow with a parish church and an ancient star fort. The Cracow insurgents were defeated here by the Austrians in 1646. Pop. 1800.

GEBY [add] an isl. Indian Archipelago, situated in the Gilolo passage, on the equator between the Molucca Island Gilolo and the Papuan Island Waig. It is long and narrow, stretching about 20 m. from S.E. to N.W. its surface

PORT GARRY AND RIVER SETTLEMENT.—From Kin's Canadian Exploring Expedition.

river, on the N. bank of the former. The fort, the name of which is frequently used for the settlement generally consists of a square inclosure of high stone walls flanked at each angle by round towers. Within this are several substantial wooden buildings the governor's residence, the jail and the storehouses for the Company's furs and goods. It was established in 1811.

GARSEPPA GERSPPA or GARSOPPA an ancient but deserted town, India, presid. Madras dist. N. Canara, 16 m. E.R.E. Honavar is now deserving of notice only on account of the magnificent falls which bear its name, and are formed in its vicinity by the Shervaratty. The river immediately above, dividing into several branches forms four distinct falls, which have received the respective names of the Grand Fall, the Roarer the Rocket Fall and the Dams Blanche. The Grand Fall is a perpendicular plunge of 880 feet, over a ledge of rock cavernous underneath. The Roarer rushes

is generally high but not elevated the highest point not exceeding 500 feet. The cultivated products are rice, cocoa and sugar palms, yams, and bananas. The natives, mostly Fagans, but subject to Malinese settlers, who from the dominant class, are chiefly employed in the fishing of crocodiles and pearl oysters. Between Poley and the left For at its E. W. extremity there is a harbor sheltered from all winds, with sufficient depth and good anchorage for a ship of the line.

GENESEE RIVER, a river in Asia, prev. and 30 m. N. N. W. Kerasan. It owes its name, which means the house of silver to a mine of argentiferous lead which has long been worked in its vicinity. Pop. estimated at 8000.

GENESEE, a river U. States, New York. It rises in Pennsylvania, near the frontier of New York, flows N. W. and N. E. and enters Lake Ontario about 7 m. N. Rochester after a course of nearly 150 m. In the earlier part of its course there are three falls of 50, 90 and 110 ft. high respectively and for above 2 m. it passes between perpendicular rocks nearly 400 ft. high. At Rochester and also near its mouth, there are other falls of about 100 ft. high.

GENESEE FALLS, formerly PORTLAND, a vil. U. States, New York, 10 m. E. S. E. Buffalo, on the Genesee R. or which is here crossed by the New York City railroad on a bridge 334 ft. high and by the Genesee Valley canal. It has several churches and is much visited for its scenery the river here being bordered by precipitous heights, and having several picturesque falls. Pop. 1090.

GENESEE, a vil. U. States, New York, 25 m. S. S. W. Rochester on the Genesee River with several churches, schools, and banks and a large academy. Pop. 1800.

GENEVA (adj.), a vil. U. States, New York, at the N. W. extremity of Lake Geneva, and on the Auburn and Cayuga rivers, 200 m. W. Albany. 16 communes. A fine view of the lake and the surrounding country is well built the principal street stretching along a height above the lake, and containing many handsome residences with fine gardens sloping down towards the shore. The principal buildings are eight churches, one of which the Episcopal, is a fine Gothic stone structure, Robert Jr. College, with six professors and twenty-six students, and a medical college. The manufactures are not important. Pop. 5557.

GEORGE, a river, British America, Colorado, running into the S. E. of Ungava Bay. For 200 m. up it is a considerable stream flowing with a rapid current between rocky banks, and though full of rapids, the water is deep enough for barges. At some distance from its mouth the country is wooded and about 200 m. up the stream there is a lake abounding in fish. The general course of the river is northwards, running parallel to the coast of Labrador about 100 m., or less, distant from it. It was discovered by the Moravian missionaries in 1811.

GEORGE, a small, New Zealand on the S. W. shore of the Middle Island or Munster, lat. (Aurora) Cove, N. shore, 44° 55' 20" S. lon. 167° 46' 50" E. It is nearly a mile wide at its entrance, and preserves this width as far up as the anchorage, a distance of 5 m. During which it stretches N. E. This is its first reach near the head of which there is good anchorage in 15 fathoms, in a cove of the N. shore, with a sandy beach, where a rapid stream, with 2 ft. on its bar at low water discharges itself. About a mile above a second reach winds E. S. E. for 5 m. and then sends off two arms, at the head of one of which, but 200 ft. above its level is an extensive lake with an outlet sending its surplus waters down the western side. George Sound is surrounded by rugged and precipitous mountains. One of these runs over to the W. side to the height of 4775 ft., another near its head to the height of 5000 ft.

GEORGE (fr.) a royal free m. Austrian empire, Hungary on and 9 m. N. E. Pressburg on the Pressburg and Tyranz tramway at the foot of a hill covered with vineyards. It has a magistracy two R. Catholic churches, one Protestant, a synagogue, a Flarist college, an inferior school an endowment for the poor and a well sheltered bath. The wine produced in the vicinity bears a high name and is largely exported. Pop. 3904.

GEORGEN (fr.) a m. Austrian empire, Upper Austria, circle Hausruck, 45 m. S. W. Linz, with a beautiful parish church and 1600 inhabitants.

GEORGEN (fr.), a m. Austrian empire, Hungary on Eszling 5 m. S. W. Buda-Pesth with an old and richly endowed abbey, with a Gothic church and 1500 inhabitants, mostly R. Catholics.

GEORGEN (fr.) a m. Austrian empire, Warasdin and St. Georgen Military Frontier, on the Sarmava in a wide plain, which stretches to the Drava, 58 m. E. N. E. Agras. It has a common school, and contains 4000 inhabitants.

GEORGETOWN (adj.) three places, U. States.—1, A m. and port of entry dist. Columbia, 1 bank Potomac, 3 m. W. Washington and on the Rock Creek, which is crossed by two bridges connecting it with Washington. It is overlooked by heights, crowned with villas, and commanding a magnificent view and is a quiet retired place of somewhat antiquated appearance. Its principal buildings and institutions are eight churches, a Jesuit college a nursery with a school attached attended by about 100 pupils, several private boarding and day schools of high repute a market-house, and a finely laid out cemetery. Being the only port of Columbia district, Georgetown has an important foreign and coasting trade. Pop. 5783.—2, A m. and port of entry R. Carolina, on the W. shore of Winyaw Bay near the confluence of the Great South, Black and Waxhaw Rivers 100 m. S. E. Columbia. It possesses county buildings, six churches, an academy and several turbulent distilleries and saw-mills. Its reputed unhealthiness has checked its prosperity. Pop. 1770.—3, A m. to Kentucky cap. co. Scott on a height above the N. Elk horn River in a fertile district, 17 m. E. Frankfort. It is the seat of a Baptist college with eight professors, 132 students, and a library of 7500 volumes of a female collegiate institute, attended by about 100 pupils, and of a military institute, which unites civil education with military discipline, and possesses several woolen hags, and rope factories. Pop. 1684.

GEORGETOWN a m. Canada West, co. Hants, on the Grand Trunk railway 27 m. W. Toronto with five churches, considerable local trade, and extensive manufactures of paper and cloth. Pop. about 1200.

GEORGETOWN a m. British America, E. coast Prince Edward Island, cap. King's co. situated on the N. shore of a harbor of same name. It is laid out in regular and spacious streets, which as the pop. is only 500 are very handsomely supplied with houses. The principal buildings all of wood are the courthouse, and two churches one with a spire and the other with a steeple. In harbor the entrance to which is indicated by a wooden octagonal lighthouse, painted white and visible at a distance of 14 m. is the best in the S. of the Gulf of St. Lawrence, with the exception of that of Charlottetown, over which however it has this advantage that the sea is later in forming and earlier in breaking up.

GERCEZ, a m. Austrian empire, Hungary on Eszling, 16 m. E. Buda-Pesth with extensive vineyards, a trade in fruit, particularly excellent cherries, and 1000 inhabitants, half of them Lutherans, half R. Catholics.

GERKE a m. Western Africa, on the Haussa and Bornu frontier 60 m. N. E. Kano. It is a large place, and is surrounded by a wall with towers or pinacles and in very good repair. There is very little trade, as the inhabitants have little inclination for industry and are notorious for their thievish propensities. Pop. estimated at 15,000.

GHESIA, a m. Western Africa, Bornu 60 m. W. by S. Bura, once a strong place, and surrounded by a clay wall but now though still well peopled in a state of decay. It consists of conical hills, separated by fences of matting into several quarters.

GERMA, a m. Western Africa, Bornu 185 m. N. E. Kano. Besides a swamp, which forms a natural defense on its N. and E. sides, it is surrounded by a kind of pinnated wall, which, however except on the W. side, is much dilapidated. Close to this place grows the reed, or silk cotton tree, which is entirely wanting in Bornu proper.

GETTYSBURG (adj.) a m. U. States Pennsylvania, cap. co. Adams, on the Wrightsville, York, and Gettysburg railway 118 m. W. W. Philadelphia. It occupies an elevated site in a fertile and well-cultivated district, is on the whole well built, possesses seven churches a college, with seven professors sixty students, and a library of 7000 vols., a Lutheran theological seminary, with two professors, about twenty students, and a library of 7000 vols.; an academy

and other schools a courthouse and jail, and has an extensive manufacture of earthenware. European missions have been opened in the vicinity. On the first three days of July 1858, a desperate battle was fought here between the Federals under General Meade, and the Confederates under General Lee. It was attended with no decisive result, but the Confederate army subsequently retired and recrossed the Potomac. The loss of the Federals was returned at 24,000. Pop 3390.

GEWE, a town in Western Africa, Adamawa, on bank Benue 85 m. N. Yala. It is a large Fulani settlement, governed by a chief who commands 100 horses. A little to the E there is a large mountain called Bawu, which towers above the Benue, and is inhabited by pagan natives of the Fall tribe, who, before the Fulani conquest, had their chief seat at Bawu, about 30 m. N. E. Gewe.

GHADAMIS, a dist. N. Africa, situated on the N. frontier of the Sahara, and forming the S.W. frontier of the regency of Tripoli. It comprises three oases—Ghadamis proper, Darga, and Seneawan, each of which has a capital of its own name, while the whole forms a nearly isosceles triangle, of which the line stretching between Ghadamis in the S.W. and Seneawan in the N.E., a distance of about 95 m. is the base and Darga is the apex. The area of the whole district is estimated at 1200 sq. m. Beyond its limits the whole of the surrounding region is purely desert, consisting of ridges and sandhills, with waterless intervening valleys and in geological structure of horizontal strata of sandstone and limestone. The former rock, blackened on its outer surface by the presence of a little iron, which the air has oxidized, was at one time mislabeled for basalt. The inhabitants are divided into four classes—Harrar or pure blood, Hamran the offspring of pure blood by female slaves, Affara, the offspring of unmixed male slaves and slaves still in bondage. The government is vested in a Moudir Bey subordinate to the governor of the Jebel Mountains, and assisted in his administration by a kadi or judge, his mufti, a sheikh or deputy-governor and a municipal council. Ghadamis proper, owing to the precarious fall of rain draws its supplies of grain from Darga and Seneawan, which are better situated for raising corn, and devotes itself chiefly to trade, which is carried on extensively with Tripoli on the one hand, and Ghat, Kano, Timbuctoo, Tadmor, and other parts of the interior on the other. From the interior are brought ivory, bees wax, hides, goat-skins, dyed red and yellow ostrich feathers, gold in lumps and dust, gum or kola nuts, cottons, etc. from Tripoli come and long cloths, and tangies all of British manufacture; red-dyed raw silk and beads from Venice, woollen cloths and red caps from Tunis paper pipe copper sword-blades, mirrors, and small needles from Germany. The current medium of exchange is the Tunis piastre, equal to sixpence sterling. The aggregate population of the district is computed at 6500, of whom Ghadamis proper contains 4000, Darga 2000 and Seneawan 500 all Malimethana.

GHAT two vills Central Arabia.—1. A vil. prov. Lower Kasem, 16 m. N. W. Berydah situated in an undulating district, thick with vegetation and consisting of a straggling series of houses, gardens, and fields, irrigated by numerous wells, the adjacent hillsides being wooded with acacia trees.—2. A vil. N. Ghad. prov. Sodey: 165 m. N. W. Bad. It stands upon the side of a gorge or valley surrounded with trees. The houses and gardens are prettily placed in shelving rows, one above the other against the mountain side; and in the rainy season the wells overflowing fill a large reservoir from which, on all sides, run rivulets overshadowed by fig-trees, pomegranates, and palm-trees.

GHAT [add.] a town N. Africa, in the Sahara, 125 m. W. W. Murzuk. It stands in a valley well planted with date-trees near the W. slope of the Akahs range, at the foot of a rocky eminence is walled, and consists of about 250 houses, among which a spacious and noble-looking mansion the residence of the governor is conspicuous. The place from its position is of more commercial importance than might be inferred from its population. The chief thing wanting to a great increase of its prosperity is the opening of a direct route to Timbuctoo but this the jealousy of chiefs whose interests might be affected by it, prevents.

GHATUN and Sun-Ghatun, the names of two mountainous ranges of N. Africa, in the Senegambian country. The Sen-Ghatun, or maritime range beginning at Tajurah near the

Strait of Babelmandeb, extend S.E. to Karam, in lon. 48° E., and then break into detached groups. Their distance from the coast varies from 8 to 15 m. and their heights from 2000 to 3000 ft. The surface, denuded of soil by rain, is bare, rocky, and of course barren. The Ghats, which are from 8 to 40 m. distant from the sea, have an average height of 4000 to 6000 ft. are thickly covered with gum-arabic and frankincense trees, the wild fig and the Somali gins, and form the seaward abutment of the great table-land of the interior. Their southern or maritime face is precipitous; their southern face slopes gently from their higher summits. The Sen-Ghatun and lower range consist of sandstone capped with limestone, the higher portion of the Ghats and their plateau consist of primitive rocks of granite gneiss, mica schist, quartz, micaceous gneiss, etc. mixed with sandstone.

GHAZAL BAHR EL.—1. A stream Africa, an affluent of the Bahr of Abid or White Nile which it joins in lat. 8° 59' N. lon. 30° 18' E. flowing from the W. and entering in the form of a broad expanse called Lake No. There is a considerable negro population along its banks, who rear cattle and hunt for ivory. Falcater, on April 25 1868, estimated its volume as equal to about a third that of the White Nile. Speke, who passed the mouth of it in the month of February in the same year says, Instead of finding a large lake as described in our maps at an elbow of the Nile we found only a small pool of water resembling a duck-pond buried in a sea of rushes. In the same month of February 1868 Speke ascended the stream in a boat for above 100 m. to the mouth of the Djor or Jar from which apparently it receives its principal supply of water. He describes it as a rocky marsh with a water way sometimes difficult to trace, but generally with a width varying from 80 to 400 paces, and having in many places a depth of 18 to 20 feet. It is fed by several streams besides the Jar.—2. A dry river bed, Africa, stretching N. E. from the E. end of Lake Tsd.

GHAEFFORF a dist. India N. W. Provinces, between lat. 26° 17' and 28° N. lon. 88° 8' and 84° 40' E. is bounded N. W. and N. by Amnargh N. E. the Ghagra, or Gogra, separating it from Sarun, S. E. Shahabad, Shahabad, Benares, and W. Benares and Jampore length E. is W. 96 m. breadth 40 m. area 2187 sq. m. Its general character is that of an extensive flat nowhere more than 850 ft. above the sea, and little raised above the bed of the Ganges which traverses it in a tortuous course from W. to E. and drains it directly or by its tributaries, chiefly the Ghora, Karanassah, and Tons or Barja. The soil for the most part remarkably fertile yields annually two crops, the earlier or *dhawal* consisting mostly of maize, rice, pulses, indigo, and oil seeds and the later or *rubah* of wheat, barley, gram, sallow, opium, cotton, tobacco, and sugar. The sugar cotton, opium and indigo are largely exported. Pop. 1 059 287.

GHILGO a town Western Africa, Tawarak country in a swampy district, behind a bank water of the Niger which has here the various names of Mayo Balleo, Iza and Egorben. It is 40 m. E. Timbuctoo. It is an ancient place but has changed its site, having been originally erected on a height above the banks of the river and afterwards removed for greater protection to its present semi-marine position. The inhabitants, occupying about 400 huts, grow a good deal of rice and tobacco.

GHILAN [add.] a prov. Persia, S. W. shore of Caspian Sea; bounded N. E. by the latter E. and S. E. by prov. Mas andersan, S. by Irak Ajami, N. by Russia and W. by prov. Azerbaidjan. length, 144 m. breadth 50 m. A lofty range of mountains measuring from 6000 to 9000 ft. above the sea's level forms its inland boundary. The whole province except where cleared for cultivation, and on the mountain summits is covered with woods and the extensive ridges and narrow vegetation under the whole of the level country a dense forest. The climate is consequently unhealthy and in the hot months fatal to Europeans. The language of Ghilan proper is the Ghilanik, a dialect of the Persian. The inhabitants are represented as rude and brutal much addicted to plunder and murder but hardly muscular and active. Keshit is the capital a clean town with extensive houses. Its houses are generally built of baked brick, and tiled. Labjan is the next in importance. The food of the Ghilans is very simple and light, consisting chiefly of rice and fish; but there

is an abundance of fine poultry and wild fruit grows profusely everywhere. The vines climb up the forest trees as in Turkey; the juice of the grapes affords a delicious kind of beverage, called *chavich*, which is eaten with dry boiled rice; wheat and barley are very sparingly cultivated. The oak and birch flourish in the province, but the former does not attain to any noticeable dimensions. In the woods lurk the tiger and panther; the wild boar and the leopard birds are very numerous; and the rocky mountains and islands are tenanted by myriads of wild-fowl. Ruah is the only seaport of Ghilaa, and its harbour is deep enough to admit vessels of 260 tons burden; but the passage is much obstructed by sandbanks. Pop. of Ghilaa about 120 000.

GHIE, or **HAZ AFRICA**, a cape, Africa, on the S.W. coast of Morocco lat. 30° 26' N., lon. 9° 50' W. It projects boldly into the sea, and has a height of about 1700 feet. Immediately behind is a back-ground of more than double that height, clothed with scattered woods, and dotted over with numerous villages.

GHONGEE, a riv. India, which rises in Nepal on the British frontier lat. 27° 50' N.; lon. 83° 20' E., flows S. receiving many small streams on the right and left, and throwing off branches which irrigate and fertilize a great extent of country and joins the Rapias on its left bank after a course of about 100 m.

GHUMAN a fort and dist. N. Africa, regency and 56 m. S. Tripoli, in a mountainous country of which the culminating point Mount Takut, has a height of 2600 ft. It is approached by a very steep ascent, and stands on the spot of a kind of plateau surrounded by olive gardens. Its natural strength is increased by a castle, with a garrison of about 200 men who in consequence of the dissimulation known to prevail in the surrounding country guard it so strictly that Dr Barth and his party were allowed to enter it only man by man after each had been searched for his arms. — The district which is very rugged throughout contains a number of villages—some above ground and some subterranean. The former are generally in a wretched condition, and half deserted; the latter are thought by Dr Barth to have originated principally with the Jews who at a very early period became intimately connected with the Berbers, several of whose tribes embraced Judaism. Among the vegetable products of the district is saffron, which is grown in regular plantations.

GIEBAU a N. Austrian empire, Moravia, circle and 9 m. N. N. E. Olmutz, among the Sudeten-Gebirge with 1700 inhabitants, whose chief employment is in weaving and spinning flax.

GILBERT or **AVAKUMI**, a river Russian empire, Manchuria, which has its mouth in the N.W. angle of Olga or Seymour Bay in the Sea of Japan. It flows through a deep valley consisting mostly of marshy and tarry land, and marked by high mountains. Its mouth is broad and shallow with only 3 ft. water on the bar but within the depth varies from 14 to 20 ft. within a distance of 5 m. The channel, which previously contained several small islands, then divides into numerous creeks. The Chinese settled on its banks could not barley, wheat, hemp, potatoes, and vegetables.

GILLI a river Russian empire, Manchuria, which is formed by several streams from Mount Atyshan flows rapidly through a valley between mountain slopes, which are for the most part covered with moss and joins the Zeya, an affluent of the Amoor on its right bank. For some distance above its mouth, it has a width of about 100 yards.

GINDURA, a river in the S. of Ceylon, which, rising near Mount Hladawa, within the E. frontier of West Province, flows S.E.W. through R. Province, and falls into the sea about 4 m. N.W. of the Point de Galle. It has a course of 50 m., and drains an area of 899 sq. m.

(**TRAFFE**, a navigable river Africa, or more properly an arm which the White Nile throws off in the Bohr country about lat. 7° N. and again re-enters on its right bank about lat. 7° N. Opposite its mouth there is a large island covered with thick bush and a favourite resort of elephants, rhinoceroses, giraffes, buffaloes and various species of antelope.

GIRAJER, a ta. India, Rajpootana, state and about 180 m. N. E. desertion. It consists of about 800 hamlets, is defended by a small fort, and is supplied with superheated brackish water from two deep wells.

GIRI, or **GIRANNA**, a tribe of the Somali country E. Africa, inhabiting the hills which bound the Mare Plains on the W., interspersed between it and the districts of Harar. Despite the commercial persecutions of the Gallas, they gradually migrated westward from Makhar their original seat, number 5000 shields, possess about 180 villages, and are accounted the paramount power in this part of the country. Though friendly with the Haile Awa, they seldom descend into the plains, unless compelled by want of pasture.

GIRREE, a river India, which rises in the hill state of Kothkaze, at the height of 7400 ft. above the sea, to lat. 31° 4' N. lon. 77° 45' E. flows successively S.W. and S.E., and joins the Janas after a course of about 90 m. At the point of confluence, its discharge of water averages 100 cubic ft. per second.

GLACIER LAKE, British America, Rocky Mountains, lat. 51° 53' N. lon. 117° 50' W., is about 8 m. long, by 4 wide, and possesses much more interest than its dimensions indicate, from being situated on the watershed between the Pacific and the Atlantic Oceans—sending part of its waters to the former through the Columbia, and part to the latter through one of the affluents of the N. branch of the Saskatchewan. It is formed by the damming up of a narrow valley between Mount Forbes and Mount Iyall. The upper part of the valley is occupied by glaciers communicating with immense fields of ice which cover the mountains all round and sheltered all their valleys. The foot of the glacier is only 4300 ft. above the sea, but Mount Murchison, a few miles to the E. of it, rises to the height of 15 750 ft. and is considered by the Indians the highest of all the Rocky Mountains. Still nearer Glacier Lake on the S. stands Mount Forbes, with an altitude of 13 400 ft. The great mass of these mountains, and the absence of striking peaks, make it difficult for a mere spectator to appreciate their altitude. — (Parker.)

GLABERHAI a N. Austrian empire, Hungary, co. Arva-Thronos, about 90 m. S. Schenau. The inhabitants are chiefly engaged in growing oats, for which the soil of the district is best adapted, and in rearing cattle. Pop. 1500.

GLASGOW [said] Since the time to which the text refers, the city has continued to thrive and grow in a remarkable manner. Judged of by every available test, the increase of its prosperity has been not only singularly rapid but solid as well. For its unmeted good fortune it is beyond all doubt, indebted to the great variety of important industrial pursuits that are carried on within its boundaries or in its immediate vicinity. The bulk of its population are not dependent on any one leading industry. It stands out as combining in itself the characteristics of the Manchester, the Liverpool, the Birmingham, and the Wolverhampton of Scotland. Thus it has escaped the full effect of many of those fluctuations and reverses in trade which have told disastrously upon towns where the mass of the people are engaged with one leading pursuit.

According to the census of 1851 the population of the city proper was then 408 142. Adding to this number that of the suburbs, the total is raised to 448,995. The increase thus revealed as having taken place during the decennial period 1851-61 is no less than 86,257—an addition larger than that made within the same period to the population of any city in the kingdom, with the single exception of London. There are valid reasons for believing that the process of emigration continues to go forward at an equal, if not at an enhanced rate.

An estimate, formed upon trustworthy data, has been made, that at midsummer 1855, the population of the same area was in excess of 490,000. In principle the estimate errs rather on the side of defect than of exaggeration. The statement may therefore be bandied that Glasgow now (1855) contains half a million souls.

Striking as this progress is, it has been accompanied by commensurate improvements. The appearance of the city has been bettered in many of its aspects. In the W. and N.W. quarters especially numerous handsome streets and crescents have sprung into existence. Very soon all the available building ground within the municipal boundaries on these sides will be fully occupied. Drawings of a superior kind for the accommodation of the working-classes have

also been largely multiplied and there exists every prospect, in connection with a projected scheme of city improvements that speedily many obscure streets in the central districts (such as the alleys leading off the High Street, and those close and wynds which lie between Tronsgate, Bridgegate, and the Balmshieulch—successes of disease, crowded with the homes of a motley population who dwell in all the qualities of pretentious wretchedness) will be cleared away though not without simultaneous provision being made for their inhabitants as tenements more conducive alike to their moral and physical well being. As it is, through the gradual operation of commercial exigencies, the heart of the city is more and more being given up to purely business purposes. Some of the warehouses and offices recently erected are remarkably handsome buildings, and take rank among the architectural ornaments of the city. Of these there may be particularly the warehouses of Messrs. J and W Campbell & Co. in Ingram Street that of Messrs Stewart & Macdonald in Buchanan Street, and a fine pile in West Regent Street, built by Mr A. Orr Ewing. In this connection there may be noticed the large number of handsome churches erected within the last dozen years. In that space of time upwards of thirty new places of worship have been reared. The whole number in the city (including its suburbs) is now 178 affording accommodation to upwards of 100,000 persons, or considerably more than one-third of the entire population. Thirty eight of them belong to the Established Church, forty five to the Free Church, and forty to the United Presbyterian body while there are six Episcopalian, and ten Roman Catholic. It is held within the mark to compute that half a million of money has been expended in church buildings within the past twenty five years. Many of the new buildings are exceedingly meritorious alike in their architectural features and in their internal decorations. Among them may be specified Park and Randolph churches belonging to the Establishment, the College, Kelvin-side and St George's in connection with the Free Church, Landowdown U P church and Trinity Congregationalist. The venerable cathedral has undergone a process of restoration and embellishment which, while bringing out all the beauty of its original design, renders it, in our respect at least, one of the most richly decorated temples in Europe. The windows have been filled with stained glass adorned with a consoling and harmonious scheme. Those in the nave illustrate Old Testament subjects, taken in the order of the biblical chronology; those in the choir are similarly devoted to subjects taken from the teaching of the Saviour. The work was executed at Munich at the cost of donors who presented, or who joined in presenting separate windows, by way of family memorial. The ancient college in the High Street is likely to be soon removed from the site it has so long occupied, which is to be surrendered to the purposes of a railway station. It is proposed to transplant the University buildings to the grounds of Gilmerhall—a commanding and eligible situation in the W end of the city lying between the West-end Park and the suburb of Partick. Plans for the proposed buildings have been obtained from Mr G G Scott, and numerous subscriptions have been made alike by the noblemen and landed proprietors of the neighbourhood and by the leading merchants of the city in order to defray the expense of transference.

The whole extent of thoroughfares within the city excluding mere lanes, alleys &c is now within a fraction of one hundred and twenty miles. The sum annually expended on their maintenance exceeds £30,000. Since the Faving Act of 1856 came into operation about £150,000 has been spent in laying down granite pavements. This, however forms but a small item in the action of the municipal corporation for the behoof of the community. Chief among their achievements in this respect, there stands undoubtedly the accomplishment of the great scheme by which Glasgow is now supplied with water from Loch Katrine—a Highland lake some 80 m distant. This immense undertaking, begun in 1854, under the superintendence of Mr Bateman the engineer was completed in 1859 and the supply of water to the city is now under the administration of the town council. The engineering difficulties in the construction of the works were very considerable. The aqueduct from the lake to the Munglock reservoir is 26 m long—18 of these are tannelled, a conduit of iron pipes carried across valleys, and for the

remainder there are open cuttings and bridges. The cost of the aqueduct proper was on an average, £18 000 per mile. The total cost exceeded a million and a half as thus—

Loch Katrine Water-works,	2,000,000 16 70
Gorbals Water-works,	100 019 7 8
Purposes and Extension of the Old Works (the property of a Joint-Stock Co.), which supplied the city by pumping from the river	405,186 16 8
	£1,505,228 9 11

Large as this expenditure is, it has proved a very good investment. Twenty-five years ago two water companies existed, the joint revenues of which were £25 000. The income of the water commission is now well-nigh £100,000. The Gorbals works above mentioned are those which formerly supplied the south side of the city. They still continue to send in from the Forthness Hills, about 8 m. to the southward, some 8,500 000 gallons per day. The quantity derived from Loch Katrine approaches 26,000 000 gallons daily. The works are so constructed that with a slight expenditure, they could be rendered capable of furnishing double that quantity; to truth, they give access to a permanent and inexhaustible source of supply and nothing to vie with them either in magnitude or success exists in the kingdom. The advantages that have flowed from the carrying out of this great enterprise cannot be more forcibly illustrated than by the increased degree to which water is now used by the population. In 1838 the supply per head per diem was 26 gallons, which was then deemed a very liberal amount. In 1845 it was 30 gallons. In 1852 it had risen to 35 gallons on the north and 38 on the Gorbals side. The latter was thought quite an adequate supply and in the early calculations concerning the Loch Katrine scheme, a maximum of 40 gallons per head was adopted. Yet already the quantity delivered is 45 gallons. That, however includes 45 gallons sold by meter for trade purposes.

Another instance of wise and large liberality on the part of the municipal governors consists in the provision of public parks. Besides the Green (referred to in the text) two other large and beautifully laid out parks now exist. The one on the west comprises the lands of Kelvingrove consisting of 65 acres, whereof 17 acres have been set apart for fencing—the rest being available for park purposes. It was laid out by Sir Joseph Paxton according to a very careful plan in which the difficulties presented by the ground were most skillfully overcome being, in fact, converted into means of additional ornament. The total cost has been about £29 000. The Queen's, or South side Park as its name indicates occupies a different quarter of the city. Trenching upon the parish of Cathcart on the E, it is situated between the village of Strathbungo on the W and the rising suburb of Crosshill on the E, and has an area of 250 000. It extends to 142 acres but a very considerable portion is destined to be disposed of, no doubt very profitably for fencing. Sloping upwards to a considerable height there is commanded from the summit one of the finest views of the city which is spread out like a panorama beneath, while, turning to the other side, one overlooks the scene of the battle of Langside, which was fought, with such disastrous results to her, in the presence of Mary Stuart. The knoll whence the unhappy queen surveyed the battle, and from which, when all was lost, she was hurriedly led away has just outside the park, and will probably be by and by included within it. This historic circumstance was in view when it received the name of the Queen's Park.

As illustrative of the onerous and varied duties that devolve upon the municipal authorities, it may be mentioned that the corporation administers solely or in part, no fewer than twenty distinct trusts, the united annual revenues of which is in excess of £400 000, while the debts affecting them stand at about £3,350 000. Besides these public objects, there are numerous charities, bequests, bursaries, schools and other beneficent institutions, the financial affairs of which are under the control of the corporation as a whole, or certain members thereof.

Any record of the progress of Glasgow must needs assign a prominent place to its great artery the Clyde. The subjoined figures, supplemental to those already given speak for themselves.

CLYDE NAVIGATION.

Year.	Length of Quay.	Area of Harbour.	Revenue.	Properties per Yard.
	Yards.	Acres.	£ s. d.	£ s. d.
1884	3495	12	85,280 8 11	26 15 0
1885	3505	12	75,945 0 1	26 10 0
1886	3525	12	74,065 7 8	26 7 8
1887	3535	12	83,797 10 7	28 9 10
1888	3545	12	74,748 7 4	26 8 3
1889	3555	12	80,519 17 7	31 7 4
1890	3565	12	87,963 18 1	33 3 4
1891	3575	12	105,700 11 0	34 17 11
1892	3585	12	111,000 19 2	36 4 11
1893	3595	12	111,000 19 2	36 4 11
1894	3605	12	121,280 18 0	39 11 5
1895	3615	12	121,280 18 0	39 11 5

Of the harbour dues thus levied, the trustees for the year ending as at 30th June, 1895 expended upon ordinary operations a sum of £41,565 4s. 11d. while the expenditure on new works and improvements amounted to the sum of £108,058, 4s. 8d. It is to be regretted that they have not as yet been able to construct any sufficient dock accommodation. Various obstacles have intervened to defer the accomplishment of this cherished design, but well-contrived arrangements to that end are in progress, and there exists a reasonable prospect that this defect will be speedily supplied.

The subjoined table, applicable to the year ending at the date last specified, shows the number and the scale of tonnage of the vessels arriving in the harbour:—

Vessel Tonnage.	Number of Sailing and Steam Vessels.	Vessel Tonnage.	Number of Sailing and Steam Vessels.
Under 40	4,892	Brought over	15,368
40 to 60	1,897	650 to 450	244
60 to 80	3,204	450 to 600	244
80 to 100	1,616	600 to 800	157
100 to 150	707	800 to 1,000	68
150 to 200	334	1,000 to 1,500	27
200 to 300	159	1,500 to 2,000	16
300 to 500	32	2,000 to 3,000	5
500 to 1,000	7	3,000 & upwards	23
Over	15,312	Total	16,366

Of these 16,356 vessels, 611 were from foreign ports while 15,744 were engaged in the coasting trade—455 of those from abroad were sailing vessels, and only 186 steamers. These proportions were exactly reversed in the trade coastwise in 1894. Of the arrivals were those of steamers, while only 5074 were those of sailing vessels. The tendency is towards a decrease in the number of sailing vessels, but it is accompanied by an equally marked tendency to an augmentation in size and capacity. The gross tonnage of the 16,356 vessels, the arrival of which is recorded was 1,719,068. The figures for the years unmentioned were—

1887	17,274	1,546,605
1888	16,000	1,504,329
1889	15,354	1,538,542
1890	16,373	1,527,779
1891	16,351	1,573,329

It seems here to mention that a large number of the arrivals thus noted are those of steamers specially constructed for passenger traffic on the river. No city in the world can boast the possession of so large and effective a service in this respect—arrived at an early period the like names and temptations for its employment. The fleet of strictly river steamers—their size which do not extend beyond the various waterways—places that dot the shores of the estuary and of the many beautiful lochs that communicate with it—is wholly unparalleled alike for efficiency and accommodation and the patronage they receive during the summer season is enormous. Most of the wealthier residents in the city have coast-houses, which they occupy in summer time, and the family is poor indeed, the numbers of which have not their annual trip down the river.

As further illustrating, in a manner at once striking and accurate, the advance in the shipping trade of the port, the following comparative statement of the number and tonnage of steamers employed in particular trades during the years 1887 and 1895 may be taken:—

	1887	1895
Transatlantic Trade	Ym. 6	Ym. 4,430
France, Spain, and Mediterranean	10	2,000
Transit Steamers which loaded (Passenger)	24	7,082
Transit Steamers which loaded (Cargo)	16	6,486
Baggage Tenders—English, Irish, and Scotch Ports	22	7,169
Steamers Engined	24	5,570
Total	112	26,723

That list, it will be noticed, does not include the steam vessels which came to the harbour to be repaired of which there were a considerable number: nor the river steamers, tugs, screw lighters, and luggage boats; nor the rams that have been built and engaged here.

No department of industrial enterprise has of late years been prosecuted with more zeal and success than that of ship-building. When iron began to be used in the construction of ships, Glasgow was not slow to turn to accept the facilities which she possesses for this branch of employment. The energy and skill evinced in the trade have been such that the fame of Clyde-built vessels has become world-wide. Speed means that they navigate every sea and whether the object be pleasure, commerce, or war they continue to be eagerly sought after. The ship building yards began at the termination of the wharves and quays, and are continued at intervals all down the river. During the year 1895 there were turned out in all 357 vessels, of every size and character giving a tonnage of 151,992 and a horse-power of 28,587. The number for the two previous years were—

1893	370	226,000
1894	348	278,653

The immense increase of tonnage in 1894—the amount of which, it will be noted, owes even that for the preceding year—was due to exceptional causes connected with the American war but that there is little reason to fear the continuance of a sound and profitable business, is evidenced by the fact that at the 1st January 1895 there were in the builders' hands orders for 178 vessels, with a tonnage of 201,770 tons, and a horse-power of 45,607. Of the number the sailing vessels stood to steamers in the proportion of about a third. The great majority were of iron though a considerable number were built upon what is called the composite principle, which is now coming into favour—that is to say with iron ribs and framework, covered with a skin of wood.

As connected with this increase in shipbuilding and in ships that have a Glasgow ownership something may here be noted as to the trade of the port. The subjoined table gives the quantities of goods brought from abroad in 1895:—

Articles.	tons	1895
Sugar	casks	144,000
Molasses	tons	7,721
Coffee	tons	807
Flour	bags	1,016
Tea	tons	6,425 134
Pepper	bags	2,013
Jute	bales	12,842
Cotton	tons	2,859
Bum	bales	1,707
Logwood	tons	2,707
Oil	tons	1,000
Manure	tons and pieces	1,463
Unmanufactured Tobacco	lbs.	8,124,708
Alum	tons	10,028
Flour	bags	67,223
Oil (Whale, Cod, Seal, &c.)	tons	48,819
Olive Oil	tons	5,026
Tallow	tons	5,348
Guano	tons	1,492
Iron	tons	30,323
Wool	tons	56,244
Wool	tons	5,000
Wool of Soda	tons	2,026
Wool	tons	17,717
Wool	tons	14,896
Wool	tons	346

To show more forcibly how trade has grown, three of the chief articles enumerated above may be selected for a com-

pariam with previous years. The amount of tea, sugar and tobacco taken out of bond during each of the last five years has been:

	Tea.	Sugar.	Tobacco.
	lbs.	tons.	lbs.
1907	4 077 774	88,094	1 004,950
1908	4,177 502	106,748	1 774,178
1909	4,634,870	122,044	2,887 594
1910	4,698,908	120,041	2 938,082
1911	5,044,851	120,540	2 017,503

It is almost needless to remark that these figures do more than illustrate the growth of trade. They attest, with an emphasis which is unmistakable, the existence of a growing improvement in the condition of the people.

Another striking instance of growth is afforded in the history of the grain trade. Here is a statement of the imports foreign and British, received by river rail, and canal, for the two years 1864-65—

		1964.	1965.
Wheat	qrs.	600 627	561 185
Flour	260 lbs.	808 216	232 454
Wheat and Flour	qrs.	600 338	732 208
Oatsmeal	260 lbs.	65 519	64 004
Oats	qrs.	100 671	64 281
Barley	"	304 268	301 347
Beers	"	5 828	61 000
Pease	"	28 453	30 22
Malt	"	28 676	101 063

Let them figures be compared with those given in the text, and it will be seen that all the main items are greatly more than doubled while some of them are quadrupled. In explanation of the falling off ducerns ble for the last year it may be remarked that while the Imports for 1884 were unusually high those for the succeeding year were unusually low the stock of ducerns ble at the beginning of the season being greater than ever known. The principal imports for 1884 were from America and the south of Europe. From America 68 053 quarters of wheat and 69 140 barrels of flour were received in 1885 against 757 828 quarters and 3 468 barrels in the preceding year while from the Black Sea store came 345 839 quarters of wheat, against only 61 442 quarters in

Attention has already been made to the advantages which the city derives from its proximity to the great iron fields of the north. At the close of last year there were 136 iron furnaces in blast throughout Scotland, producing upwards of 3800 tons of pig iron daily. The Glasgow Exchange has the mart for the sale of this enormous manufacture and it is the means of its sale place almost exclusively at Clyde ports. The table next given shows the amount of production and of shipments for the last twenty years—

	Production in Tons.	Shipments in Tons.		Production in Tons.	Shipments in Tons.
1846	476,000	194,000	1869	830,000	500,000
1844	560,000	870,000	1867	900,000	532,000
1840	640,000	810,000	1865	950,000	580,000
1838	700,000	904,000	1863	980,000	575,000
1836	922,000	374,451	1860	1,000,000	670,000
1834	820,000	333,658	1861	1,040,000	604,000
1861	774,000	460,000	1862	1,090,000	680,000
1859	780,000	480,000	1868	1,080,000	610,000
1857	790,000	570,000	1864	1,070,000	630,000
1855	800,000	600,000	1866	1,164,000	740,000
1853	790,000	545,000			

At the average of last year's prices (85s 3d. per ton) the value of this year's production exceeded three millions and was £4,000,000. The price, however, was very greatly during the period of the war. It has been as low as an average of 87s. 6d. and as high as 90s. The difference between the amount produced and the amount shipped allowances being made for the stock on hand represents the exports to England by rail and the quantity either converted from the crude to the malleable state or used in the foundries of the city. Enough has been said to indicate that in this manufacture we have one of the chief sources of wealth and wages in this part of the kingdom.

One peculiar branch of trade to which a special reference is made in the text is that of sawed mallee. It was first

introduced upon an extensive scale in Glasgow towards the end of last century by the founder of the ailing firm of Muir & Co. Glasgow and London. For many years the production was confined to the villages and rural cottages of Ayrshire, and even yet this class of goods is known in the London market as Ayrshire needlework. The founders of the new industry soon had many competitors. Early in the present century the high prices paid for embellicating maritime linens by the owners of young women to earn a comfortable living in their own country, increased the demand for the goods, and the spinning-wheel to be laid aside for hand and foot looms of Ayrshire. But till about the year 1818-17 Glasgow had no rival in the trade. About that date a Scotchman, the owner of a retail shop in Dublin began to get work done at Donaghadee, in the north of Ireland. At first he did little more than supply his own shop. In 1834-26 the successor of this gentleman was joined by his nephews, and the firm of Muir & Co. was formed. He died at Donaghadee. Female labour was then plentiful and cheap. The Scotchmen were willing to learn, and anxious to be taught. Schools were established, the best Scotchmen workers were taken over to act as teachers, and such an impetus was given to the trade that by 1860 there was not a town of any importance from Belfast to Waterford on the one side, or from Derry to Galway on the other that did not contain one or more agents employed in the distribution and collection of this kind of work. For some years the Scotchmen were the only agents in the north of Ireland equalled in quality and more than equalled in quantity what was produced in Scotland. But the Glasgow retained as it still retains, the chief place as the seat and mart of the manufacture. Various causes helped to this effect. Not the least is the superior finish which the Glasgow blanchers give to the goods—so superiorly so marked, that the Belfast manufacturers send their goods to be bleached here. Till about 1830 designs were transferred to the muslin by hand from wooden blocks. This process was slow, and the demand and expenditure were important. The change to the steam power of lithography which the first last-mentioned, though not the first to adopt were the first to work out successfully. An increased demand continued to keep pace with the increased power of production till 1857 when it was computed that the sales reached an annual value of £1,500,000. In that year several large firms failed—one of them it is supposed for a larger sum than had hitherto been involved in any trade in Ireland. (Glasgow Herald, 1857.) The result was a general depression of the market, and a seriously low price. A sudden cessation of the trade to about a fourth of its former dimensions ensued and for three years it was difficult for the regular trader to make a profit. But this condition of affairs has passed; for years a gradual improvement has been going on, and at present the value of the annual sales stands at over £700,000 to £800,000.

Attention has been already made to the important position which the trade holds in connection with that great branch of national industry which may be classed under the designation of applied chemistry. The St. Billox works of Messrs G. Fournet & Co. starting from a comparatively small commencement during the latter half of the last century have become the seat of the greatest chemical manufacture of its kind in the world. The foundation of the establishment was laid by the late Charles Thomson Esq. in the preparation of a bleaching agent called chlorure blanc (aque chloriné) which was sold in the form of a solid cake. The demand upon the fact that chlorine gas is a powerful bleaching agent, could be made more available for use when dissolved in water. This method of storing up the gas has, however given place to the plan of associating it with hydrazine or alkali lime, thus forming the well-known bleaching-powder. Besides this powder the manufacturers carried on at St. Billox now include sulphuric acid, soda-salt soda (crystallised) and soap—to which list may be added a voluminous preparation known by a general name of "chemicals." The goods are used in the manufactures are derived from six different countries, and the average annual consumption is

Coal (chiefly from O T & Co.'s pits)	120,000 tons
Limestone, from the North of Ireland	80,000
Balt, from Cheshire	20,000
Manganese, from Spain	5,000 "
Pyrites, from Portugal	10,000
Brickstone, from Italy	2,000
	80

GNILOVSKAYA, a tn. Russia, gov. Don Cossacks, r. bank Don. It is the first mart for all the fish and caviar brought to market by the Cossacks of the Don and the Black Sea, and contains 2902 inhabitants.

GOALPADA, a dist. India, presid. Bengal, between lat. 25° 40' and 26° 31' N. lon. 85° 45' and 91° 5' E., is bounded N by Rhoitan, E. Camroop in Lower Assam, S. the Garo tribes and Myingung, and W. Rangpoor and the native state Cooch Behar. Length N.W. to S.E., 100 m., breadth, 70 m., area, 8500 sq. m. The principal crops are cotton tobacco, sugar and mustard. The capital of same name, situated near l. bank Brahmaputra, was nearly destroyed by fire in 1839. Pop. of dist. 460,000.

GOCSÉNY, a tn. Austrian empire, Hungary, co. Tolna, not far from the Danube, 6 m. S.E. Eszterhad with a fishery a trade in corn and wine and 2113 inhabitants belonging to the Reformed church.

GODING [add.] a tn. Austrian empire, Moravia, circle and 24 m. E.W. Hradisch, on the river March and on the Vienna and Olmütz railway near the frontier of Hungary. It is the seat of several public offices, has a Jesuit church, an imposing castle, a large tobacco factory a potato refinery important horse cattle and wool markets and a mine of lignite. Pop. 5793.

GODIYAN, a salt marsh between the Dead Sea and Red Sea, about 84 m. from Akabah, and 115 ft. above the sea level of the Red Sea, is the watershed of the entire district of the Wady Arabah.

GOGO GAWO or **GHAOG** a tn. Western Africa, once capital of the Songhay empire, l. bank Niger 220 m. N.E. E. Timbukto. It has been completely shorn of all its former greatness, and now consists of about 200 huts, grouped in clusters, and surrounded by heaps of rubbish apparently the debris of the former city. The great mosque, now a ruin, was originally flanked by two towers one of which is in tolerable preservation. It rises in seven terraces gradually descending to the river, from a base measuring 40 or 50 ft. on each side to a summit not measuring more than 16. In its most flourishing state Gogo appears to have had a circuit of about 6 m. but there is nothing in the ruins to indicate a superior style of architecture in the original structures.

GOGURU, a river, India, which rises in the Sah. Himalayan Mountains Nepal, lat. 27° 50' N. lon. 85° 40' E., flows first S.E. for about 70 m. across the Terai then entering the British territory flows successively S.W. and S.E. and joins the Gogoy on its r. bank about 10 m. above its confluence with the Ganges. Its total length is about 235 m.

GORANUH, a tn. India, N.W. Province cap. pergunnah of same name, 50 m. N.W. Delhi. It stands on the Right bank of the Delhi canal and became the scene of a singular disaster produced by an engineering blunder. When the water was first let into the canal it refused to proceed any further. Due allowances had not been made for a rise of level, and the consequence was that the embankment, unable to resist the accumulated pressure, gave way and the great body of water rushed down, completely destroying Lalpore, a considerable town, the remains of which are still seen. Pop. 6668.

GOHUB, a tn. India, Scindia's Dominions, 26 m. N.E. Gwahor. It is surrounded by three walls—an outer one, which is constructed of mud, faced with stone, and incloses a large area, and two others, which intervene at a considerable distance between it and the citadel a lofty structure with massive towers and many gardens and commodious apartments. Outside the outer wall is a ditch which can be filled with water from the Berasia. The town, once the capital of a territory of same name, belonging to a Jat rana, suffered much by war before it passed finally into Scindia's possession by a compromise which exchanged it for the territory of Dholpore, still enjoyed by the rana's descendants. It is now comparatively insignificant, possessing only a few good modern houses.

GOIBERN, a tn. Austrian empire, Upper Austria, circle Hausruck, in a romantic and finely diversified district, on the Traun, about 45 m. S.W. Bayre. It has two churches, one an old E. Catholic and the other a handsome Protestant church a modern and an old feudal castle, and contains 1900 inhabitants.

GOLD COAST [add.] a British possession W. coast Africa. The territory recognized as British consists of a large number of forts and posts many of them abandoned or in ruins, which have fallen into British hands by settlement, capture, or purchase, together with the line of sea-coast contiguous to them. The Dutch also possess many forts and posts on the same line of coast, and whatever portion is not Dutch is recognized by the natives as British territory. That actually occupied consists at present, in addition to the coast, of the Fort of Dispers in the Ashanti country of Cape Coast Castle and Assamfoe Fort in the Fante, Whangah in the Agnash country and of Asom in the dist. of same name. Quinlan Fort, on the river Volta, has not been occupied since 1806. Immediately in rear of the 300 m. of coast along which these posts are situated, and extending to the distance of about 80 m. inland, is a country inhabited by a number of native tribes, the principal of whom are the Wassaw, Denkaras, Akims, Asenis, and Fantes, the whole of whom except a small number contiguous to some of the Dutch posts, are included in what is called the Protectorate. Eastward is the kingdom of Dahomey, northwest that of Ashantee. In 1844 the Gold Coast settlements were placed under the jurisdiction of Sierra Leone; but in 1850 they were formed into a separate government, with executive and legislative councils. There is also a judicial establishment, with a chief justice and necessary officers, besides ecclesiastical educational medical, and military establishments. The slave-trade has been everywhere suppressed but domestic slavery of a mild character exists in the districts of the Protectorate. The climate is unhealthy; dysentery but not fever being extremely common in a very fatal form. Cowries and gold-dust form the chief currency. The principal articles exported in 1862 and 1863 with their value were as follows:—

	1862.	1863.
Gold Dust	57,785	427,909
Gum	829	450
1.ory	1,235	1,547
Monkey Skins	2,500	1,600
Palm Oil	35,910	21,030
Miscellaneous	2,130	915
	\$104,060	\$23,084

The imports and their value in the same years are thus stated:—

	1862.	1863.
Cotton and Silk Goods	489,260	429,660
Gum	3, 00	2,130
Gunpowder	4, 000	2, 000
Hardware	11,800	14,400
Tobacco	7, 400	8, 734
Wine and Spirits	40, 000	13, 772
Miscellaneous	9, 200	4, 540
	\$146,160	\$75,958

The revenue which is principally derived from a parliamentary grant of £4000 a year and a duty of 2 per cent. on imports, amounted in 1863 to £2547 and the expenditure chiefly upon the civil establishments, amounted to £2409. The protection afforded to the adjacent native tribes has involved their defence against the incursions of their hostile neighbours the Ashantees this has burdened the settlements with considerable expense.

GOLDEN CITY, U. States, cap. terr. Colorado at the base of the Rocky Mountains, 12 m. from Denver. It is the seat of government, and contains the government land office, one or two churches, and a flour-mill. Pop. (1853) 1000.

GOLDSBOROUGH, a tn. U. States, N. Carolina, cap. co. Wayne, on the Neuse, which is crossed here by the Wilmington and Weldon railroad, 50 m. S.E. Raleigh. It has been a rising and flourishing place, with good public buildings, and is accessible by steamboats. Pop. 884.

GOLIAD, a tn. U. States Texas cap. co. of same name, on the San Antonio River 125 m. W. & W. Galveston, is possessed by Presbyterians college and a female institute. The raising of stock is the chief employment. Pop. 1212.

GOLOGURY, a tn. Austrian empire, Galicia, circle and 8 m. S.W. Koscov with the ruins of a strong castle, and 2224 inhabitants.

GOLUBATZE, a village in Europe, Serbia, about 100 miles from the Danube, 50 m. S.E. of Belgrade. It contains a church and a school. Its fortifications, which were strong, have been dismantled.

GOLUANGO (Azo) a village and dist. S.W. Africa, Portuguese Settlements, prov. Angola, 120 m. E. Lourenço, lat. 8° 30' S., lon. 15° 3' E. It stands among green hills many of them cultivated to their tops with manioc, coffee, cotton, groundnuts, bananas, pine-apples, guavas, papaws, custard-apples, plantains, and jamboas, fruits brought from America in former days by the missionaries. Water was present, the country with its amphitheatres of high hills and its towering palms, would be an unfit representative in miniature of that of the Bay of Rio de Janeiro. The whole district is equally fertile and beautiful. The chief articles of trade are ivory and bees-wax. According to a recent census it contains 26,000 hearths, or a pop. of at least 105,000.

GOMPOU A (see Gompe-ee-pon) the last of the native capitals of Ceylon stood in its central province on the Mahaweli Ganga. It was built in the fourteenth century and was shortly afterwards ruined by the celebrated traveler Ibn Batuta, who describes its palace as situated near a bend of the river called the gateway of rubies. Nothing now remains to mark the site of the ancient city but the locality has in modern times acquired high interest from being one of the first in Ceylon where the systematic culture of coffee was first attempted. Its soil and situation have proved unfavourable, but there is hardly one of the magnificent hills seen from it which has not been taken possession of by European settlers within a recent period. The locality still continues to be one of the most important in the district, because it is the point of convergence of the great roads which connect the rich districts of Panadura, Dembeola, Kottah, and Ambaganama with Kandy and Colombo. Its *real-house* is consequently one of the most frequented in Ceylon, and to facilitate the traffic which passes through it, a suspension bridge across the river has been substituted for the old, inconvenient, and often dangerous ferry.

GONCZ, a village in Austria, Hungary, co. Abauj Torma, 15 m. S. Kassa, with an ancient castle, a fine mineral spring with baths, an active trade in wine and fruit, and 2653 inhabitants mostly belonging to the Reformed church.

GONDAR, the cap. city of Abyssinia, 21 m. N.E. Lake Tana or Demben lat. 12° 51' N., lon. 37° 23' E. It is built on a lofty volcanic ridge, at an altitude of 7422 ft. above the sea, between two rivers which unite in the deep valley below the town. On the E. side flows the Angereb, on the W. the Gela and the two after effecting a junction 2 m. S. of Gondar empty themselves into Lake Demben. The city has fallen sadly from its pristine magnificence and no longer presents to the traveller a regular and connected whole but a number of scattered groups of houses and ruined edifices, separated by wide and dreary wastes, and occupying an area of little less than 11 m. in circumference. The streets in the inhabited portions are exceedingly narrow crooked and impassable; the only scavengers being the hyenas which accompanied by leopards prowled about at night in search of food. The houses are usually well built, of rough-hewn volcanic stone, and finished with stucco which rises to the shape of a cone or cylinder. They are however small and seldom exceed one story in height. The master houses are constructed of hardened clay. Attached are sheds for the domestic cattle, and the whole is surrounded by a wall or fence to protect them against the nocturnal depredations of bands of prey. The principal quarter has N.W. of the ruined palace of the Abyssinian king, and is named Debra Betula the shrub or hill of light. It occupies the highest ground but the church itself is built on the hill-side. W. of the lofty castle, and close to the wall, begins the quarter Chimbaba Bet, that is, the castle-quarter inhabited by the nobles or magnates of the land, and regarded as a sort of sanctuary or political asylum, though offering little protection against the tyranny of the sovereign. Islam-Bet, at the base of the hill is the name of the district appropriated to the Mohammedan inhabitants. The ruins of ancient Gondar furnish material for the most ardent antiquaries. Among the most interesting relics are the extensive remains of the old palace, built for the Abyssinian kings by the Portuguese. Gondar was then

a royal residence, but it is now entirely in the hands of the Gallas, and from the licentious and brutal character of his inhabitants, there seems no prospect of its recovering its former splendour. The surrounding country is blessed with a salubrious climate and a prolific soil which would well repay the properly directed labours of the agricultural. Upwards of one hundred different kinds of fruit may be seen in the garden; the myrtle the pomegranate, and the citron bloom with rare luxuriance. But the people of Gondar turn these advantages to no account. They chiefly occupy themselves with commercial pursuits, and traffic in coffee, musk, civet, raw hides, butter and rhinoceros horns. The import of powder and shot is forbidden but spices and sundries for encasing the dyed hides, sewing needles, brass tobacco, rice, sugar and cotton are eagerly dealt in. The principal market, held on Saturday is well supplied with provisions. The people are well provided with churches, of which there are no less than forty-four built in a circular form, and surrounded by pillars which support a dome-shaped roof of straw. It is said there are not less than two hundred priests or clergy. The prevailing religions are Christianity, Mohammedanism and Judaism. The Christians are largely in the majority. They are Monophysites, acknowledging for their head a Coptic archbishop or primate, but owing to the extreme ignorance of the clergy have but an imperfect idea of scriptural religion. They practise circumcision, celebrate the Sabbath on Saturday and baptize boys when forty days, and girls when eighty days old. The perusal of the Bible is found among the Jews.

The people have a great desire of performing a pilgrimage to Jerusalem and the favourite idea of king Theodoros is to reconquer the whole of Old Ethiopia, drive all unbelievers out of Egypt, make a conquest of Jerusalem and seat himself there on the throne of David, from whom he thinks himself descended through the Queen of Sheba by Solomon. The Abyssinians believe that they possess the genuine tables of the law and besides the books of the Bible, the book of Enoch and a sixth of Moses, which latter seems to be a kind of extension of and commentary on, Genesis and Exodus. After the clergy the scribes form a strong body in Gondar; they have schools for music and poetry.

The estimates formed by travellers of the population of the city vary greatly. Bruce puts it at 10,000 Abissins, M. d'Abbadie, in 1835, at from 25,000 to 30,000 souls, but Herr Steudner in 1852 asserts that it does not exceed 7000.

GONDOKORO a village in Africa, on the Bahr el Abad or White Nile, lat. 4° 55' N. lon. 22° 14' E. about 1265 ft. above sea-level the seat of an Austrian R. Catholic mission, which was abandoned in 1853. It is a station of the ivory traders, who occupy it for about two months in the year after which time it is deserted when the annual boats return to Khartoum and the remaining expeditions depart for the interior. Gangs of slave-hunters also make this a place of resort. Being beyond the reach of the Egyptian government the greatest lawlessness prevails. A few miserable huts are all that dignify the spot with a name. The country around is a desert, and produces no grain. The climate is unhealthy and hot, the thermometer at noon in the shade marking 90° to 95°. In February 1853 Speke and Grant reached this place on their way home and were there met by Baker who subsequently discovered the Albert Nyanza.

GONKOR a river India, which, formed in Nepal by the junction of the Pouna and the Mul flows S. through the Terai into the British territory and falls into the Ganges near the town of Deatpore. Its whole length is about 135 m.

GONEN (see Pomenassa) a village in Asia, Anatolia, on a flat at some distance from the banks of the Euphrates, 105 m. S.W. Constantinople. It consists of about 800 houses contains four mosques, baths, and a Khan, and possesses thermal springs of which little use seems to be made, though they are said to be very efficacious in cutaneous affections. Over one of them a tannery has been erected and several others are used by the Turkish women for washing their clothes.

GONYE, a village in Africa, Malakole country celebrated for its falls on the Lamphye or Zambezi about 100 m. below Mafaka; lat. 15° 12' S. lon. 25° 55' E. These falls have not been made by wearing back, like those of Niagara, but are of a fissure form. For many miles below the river is

confined in a narrow space, but more than 100 yds wide, and the water from boiling along as it in masses foaming and tumbling over one another. Thus interrupted, the river when in flood, rises from 50 to 80 ft. and inundating the valley to a considerable distance above, has already been fatal to more than one important town built at too low a level. Viewed from the sea, the river which overhangs the falls the scenery is surprisingly beautiful. The villages of Genoye are bound to convey travellers across the river in canoes. This they do both dangerously and obscenely.

GONZALES, an Isl. S. America belonging to the Pearl group in the S. of the Bay of Panama. It is about 12 m. in circuit, and is separated from the Isla del Rey on the E by a deep and broad channel in which numerous islets are interspersed. On its N side are two bays, protected from the N by the islands of Barona and Barrota. These bays have been proposed as depots for steamers; one being re-examined with this view in 1866. Only one of them was found to be tolerably well suited for such a purpose.

GOODERICH, a m. British America, Canada West, cap. on Huron beautifully situated at the mouth of the Manitowish on the E. shore of Lake Huron, and at the W. terminus of the Buffalo and Lake Huron railway 115 m W N W Toronto. It has four churches—Church of England, Church of Scotland United Presbyterian and Wesleyan tanneries and machine works, various other manufactures, important fisheries, and a convenient harbour at which large quantities of wheat, the produce of the adjoining district, are exported. Pop. about 4000.

GOOLBULKAH, a m. India, N. East, Dominions, dist. and 110 m. W by S Hyderabad founded in the 14th century was the capital of the first Mahomedan kingdom in the Deccan and figures much in its early history. Nothing now remains to attest its former importance, except a strong stone fort containing a large unfinished mosque and a number of tombs. One of these, the shrine of a celebrated saint has done more than anything else to preserve it from falling into complete insignificance. The anniversary of the saint's death attracts large numbers of devotees. The surrounding country is a bare uninteresting plain terminating in low hills.

GOOMA, a river India, which rises in the peninsula of Kattywar in Gujarat, flows successively E. and S.E., and falls into the Gulf of Cambay after a course of about 90 m.

GOOMBOOR, a m. India, presid. Madras, dist. and 42 m N W Ganjam cap. of a hilly tract held by a ruler under the British government till he forfeited it by rebellion. Any importance which it formerly possessed has disappeared. The Khoonds its inhabitants were once addicted to human sacrifices, but the practice has been suppressed.

GOOR, a river India, which rising on the E. slope of the W Ghats, in lat. 15° 5' N. lon. 78° 56' E. flows S.E. for 50 m. through dist. Poona, and then for other 50 m. through that of Ahmednagar and joins the Beema, in lat. 18° 50' N. lon. 70° 25' E. after a rapid course of 100 m.

GOORGAON, a dist. and m. India, N. W Provinces. The district between lat. 27° 40' and 28° 30' N. lon. 77° 21' and 77° 55' E. is bounded N. by the jaghirs of Jajpur and dist. Dhalb. E. by the jaghirs of Bulghur and the Jumsa separating it from dist. Bhoondabdur and Ahygur. S. by Matra, Tjerra, and the territory of Bhurpore and W. Tjerra and Jajhur area, 1943 sq m. The surface, generally flat, but occasionally broken by hills, has an average height of about 840 ft. above the sea. Along the right bank of the Jumsa the soil is rather fertile though the neglect of cultivation has allowed large tracts to become covered with jungle. About 8 m. W of the Jumsa the country rises into a kind of rocky table land on which the prevailing formation is quartzite. In a few places green and iron ore crop out. The only minerals of any consequence are iron, which is mined and smelted in the vicinity of Purnepore, and salt, which is obtained from deep wells in the form of brine, and rendered solid by evaporation. Pop. 460,886. —The towns cap. of the above dist., 16 m. S.W. Dhalb, is situated near the W. base of a range of quartzite hills. It formerly belonged to the so-called Begum Burew, who makes some figure in Indian history; it passed to the British government on her death in 1836. The military cantonment formerly existing here has been abandoned and the principal buildings now afford accommodation to the civil establishment.

GOOSE, an Isl. British America, Canada East, in the St. Lawrence, between the Middle and South Rivers, and 43 m. below Quebec. It is 4½ m. long, and is composed partly of flat meadow and partly of rocky hilly ground. The latter forming its E. half is from 150 to 200 ft. high. On the W., where it is flat, a belt of meadows extends from it for 2½ m. to Crane Island the whole thus forming one continuous stretch of 10 m. The Gooses and Crane Islands, with the intervening meadows grazed by large herds of cattle, taken in connection with the mountains of the N. shore, furnish one of the finest views of the St. Lawrence.

GOOTY [add.] a m. India presid. Madras dist. and 50 m. E. Bellary. It consists of a fort and native town enclosed by a cluster of fortified hills the loftiest of which is 2171 ft. above sea-level and 989 ft. above the adjoining plain and of a cantonment and other settlements situated at some distance outside. The hills are connected with each other by a rampart and the only entrance to the town within is through two fortified gateways. One of the hills situated to the N. and consisting of an immense smooth rock is covered with a series of works which render it a separate citadel which is sometimes used as a state prison. The cantonment being no longer required, as the troops now stationed, it is found only of two companies of N. I. in ruins; the petty adjoining it consists of one principal street with some good houses. Sir Thomas Moore, the celebrated Indian statesman died at Pateonda in the vicinity and was at first interred at Gooty though his remains were afterwards removed to Madras. A choultry and tank have been constructed here to the memory of the late Sir Thomas Moore. Estimated pop. 9000 of whom about a fifth are Mahomedans.

GOPUT, a river India, which rises in the native state of Korea on the S.W. frontier of Bengal, flows easterly first N. W. for 70 m. then N. E. for 55 m. and joins the Moni on its right bank at the small town of Baridoss.

GORAGOL or **GHORAGHAT**, a m. India presid. Bengal dist. Boghoss, on the Kuratoss, an effect of the Gesta, 48 m. S.E. Dinapore. When in its most flourishing state it was about 8 m. long and 2 m. broad but appears to have been then a very straggling place. The rampart of its ruined fort extends about a mile along the bank of the river and half a mile behind, but the only remains of any importance are several small mosques. The present inhabitants have some trade but such is the general low state that tigers prowl nightly at the streets. Pop. about 3000.

GORIGONA, an Isl. W. coast S. America about 50 m. off the coast of New Granada lat. (Waterside Bay) 2° 55' 10" N.; lon. 78° 10' 20" W. It is about 5 m. long by 1½ m. broad has three remarkable peaks of which the loftiest situated in the centre, is 1295 ft. high presents a beautiful and finely diversified surface forming a pleasing contrast to the low dense wood of the mainland, is well watered and wherever cultivated has proved productive. This island figures much in the adventures of Pizarro, the discoverer, and the early voyagers to this part of the coast. It was to this island Pizarro and his followers retreated after leaving Gallo Island, and here they remained for five months before they took their final departure for the coast of Peru.

GORI, in Trans-Caucasian Russia, Georgia, 1 bank Kur where the river is narrowed by the confluence of two large affluents 26 m. N. W. Tiflis. The country around it, though less picturesque is more fertile and healthy than that of Tiflis, and hence it has sometimes been suggested that the Russians in selecting the capital did not give it the preference over the latter city. In the neighbourhood of Gori is the troglodyte city of Uplonobos, on the summit of a sandstone rock out of which it has been excavated. Many of the excavations present vaulted roofs and rows of pillars on the sides in some of these chambers the walls and ceilings are beautifully decorated. The only building not excavated is a church occupying the highest summit of the mountain and probably much more recent than the city. Pop. estimated at 2400 of whom the majority are Armenians.

GORLICE, a m. Austrian Empire, Gallia, circle and 64 m. S.E. Cracow on the Rupa, on a steep height. It is a place of some importance with several public offices, and its inhabitants chiefly German immigrants, are engaged in weaving linen and woollen cloth and in carrying on a considerable trade in corn. It had once a strong castle where the Arrians were protected and had an opportunity of prop-

getting their harvest. There is a seam of asphalt in the vicinity. Pop. 2685.

GORONZAGO a mountain range, S.E. Africa, in the Mosambique country about 150 m. S. of the Zambezi, and nearly the same distance W. of the Indian Ocean; lat. 18° 30' S., lon. 34° E. It has an estimated height of 4000 ft., is famed for its clear cold waters and healthiness, and was once a Jesuit station.

GORUCKPORE [add.] a tn. India, N.W. Province, cap. dist. of same name 450 m. N.W. Calcutta. It stands in a marshy district on the left bank of the Raptee, which is here a fine navigable stream, with a channel about 300 yards wide, and contains, with some good houses of brick covered with tile, a far greater number of wretched hovels. Even the better houses have a very unsightly appearance, caused mainly by the hards of monkeys, which by the partiality of the inhabitants, are allowed to infest the place, and one of whose favorite pastimes is to displace the tiles from the roofs and scatter them about. The fort, situated close to the river is a regular square with twelve bastions—one at each corner and two on each face but part of it was demolished in 1822 when the British took possession. The principal buildings of the town are two mosques, the one ruined, and the other though in tolerable preservation a heavy tasteless structure; and the *darwazah*, a palace built by Shikah-ud-Dowlah, spacious and handsome, and capable of protecting a fine effort was it not disfigured by the chaos of filth and misery which surrounds it. The military cantonment, situated on the E. of the town on the highest ground that could be found, contains the usual buildings, though the houses of the Europeans are said to be poorer in appearance and more devoid of ornamental ground, than usual. The celebrated temple of Gorchunkesh is in the vicinity. During the Sepoy mutiny Goruckpore was wrested from the rebels, on 6th Jan. 1856, by the Nepalese auxiliary force. Pop. 45,265.

GOMAL a tn. Austrian empire, Upper Austria, circle Hausruck, on a stream which waters the beautiful valley of the same name about 42 m. S.W. Mier. It has two churches, a Protestant and a R. Catholic. In its vicinity are the two lakes of Gosau remarkable for their wild romantic scenery and an aqueduct which conveys the salt brine of the mine from one mountain to another across a deep valley. Pop. 1500.

GOSHEN [add.] a tn. U. States, New York, on the Erie railway 70 m. N.W. New York city containing county buildings, four churches, an academy a female seminary, tanneries, and tanning flax, and saw mills. It is celebrated for excellent butter made chiefly for the New York market. Pop. 3213.

GÖSSLING a tn. Austrian empire, Lower Austria, circle Upper Wumeral, on the R. with manufactures of iron, gypsum kilns, various saw mills and coal-mines, which are worked to some extent. Pop. 2090.

GOTTHARD (St.) a tn. Austrian empire, Hungary, circle Eisenberg on the Raab, opposite to the mouth of the Lafitz, 23 m. S.W. Steinmanger with a famous Cistercian abbey founded by Bela III. in 1183 and a considerable trade. The Turks were defeated here in 1864. Pop. 818.

GOVASSILA a tn. Austrian empire, Transylvania, circle and about 20 m. S.W. Broom; with one of the most celebrated sawmills in the country.

GOVERDHUN a tn. India, N.W. Province, dist. and 15 m. W. Mirat. It stands on a narrow sandstone ridge, possesses a well-supplied bazaar and is inhabited mostly by Brahmans, who depend chiefly on the endowments attached to the tombs of the Jat rulers of Bhurpur and Deeg who are buried here. One of these tombs, that of Saraj Mal, situated on the N.E. extremity of the ridge, about 2 m. from the town is a handsome structure, tastefully designed and elaborately ornamented in fine white sandstone, little inferior to marble. Many fantastic Hindu legends are connected with this place.

GOWK, a tn. Persia, prov. and 60 m. S.E. Kerman, in a valley. It is a large struggling place, extending with its gardens and houses for nearly 3 m., possesses two mud forts, one at each extremity and contains about 1500 families. There is little field cultivation, but great quantities of grapes are grown in the gardens and partly dried for exportation.

GOYA, a tn. La Plata, prov. and 100 m. S. Corrientes. L. Frank Pagan, on a low flat site of indifferent fertility. It

serves as a considerable trade in hides and tallow. Pop. about 1000.

GOKEANAHO, a tn. Western Africa, territory and a few miles E. Timbu. It stands in a fertile district, pastured by nomadic herds of cattle, and is of considerable size, consisting of a town isolated by a high, or close stockade of thick stems of trees, and an open suburb. The houses all circular are made entirely of stalks and reeds. The fields to the W. of the place are well cultivated, and have many tall fan-palms and other trees interspersed with them.

GRABOWKA a tn. Austrian empire, Galicia, circle and a little N. of Turnow with 2459 inhabitants, who weave fine goods and have several tanneries of red leather.

GRACIAS or **GRACIAS A DIO**, a tn. Central America, Honduras, cap. N.W. dep. of the state on a plateau at the foot of a steep escarpment of the mountains of Balagua. It was founded in 1536, and owing to the richness of its mines soon rose to importance both political and commercial. At one time all the trade with Guatemala from Puerto Cabezas passed through it. In its church it still presents indications of its former splendor. Immediately in front of the town a mountain stream plunges by two successive leaps to a depth of 1200 ft. Pop. about 5000.

GRADISHTEH a tn. Turkey in Europe, Servia, circle Pocharaevitz, at the confluence of the Pak with the Danube, 41 m. E. Belgrade. It is the seat of a civil and criminal court, and has a church and a school and in the vicinity the remains of a Roman bridge. Pop. 1800.

GRAFENDORF (Urfeld) a tn. Austrian empire, Lower Austria, on the Pielach 36 m. W. S.W. Vienna, with a paper-mill and five saw-mills. Freilicht almost immediately adjoining has ironworks and a cotton mill. Pop. 2080.

GHAKAM'S TOWN [add.] a tn. S. Africa, cap. dist. Albany in the E. prov. of Cape Colony 35 m. N. from the coast. lat. 32° 40' S. lon. 25° 23' E. It is pleasantly situated on an eminence surrounded by others of greater elevation and consists of wide and airy streets and houses provided for the most part with well watered gardens abundantly stocked with fruit trees. Among the public buildings are various handsome churches, two of them Episcopalian one R. Catholic, and others of different denominations a grammar-school a library and large barracks. The shops are decidedly better than in any other part of the colony and the market is large well supplied and a well frequented. In addition to the more ordinary articles exposed for sale are ivory ostrich feathers, wild beasts skins, antelope horns, and other products of the interior. The town has its annual algal conch and two banks assist in developing the resources of the district. It is also a bishop's see. Pop. about 5000 of whom 1000 are coloured.

GRAN CHACO or **HUANCHACO**, a small tn. on the coast of Peru, about 5 m. N.W. Truxillo of which it may be considered as the port. lat. 3° 20' S. lon. 78° 40' W. It stands on an extensive sandy flat, presenting an appearance by no means attractive but possesses a handsome church with a conspicuous tower and is indebted to Truxillo for some trade. The shore however is so very flat that no vessel of any size can approach it. In the vicinity on the road to Truxillo, are ruins extending over an immense area, and supposed to be those of an ancient Peruvian town.

GRAND BAY a tn. British America, Canada East, co. Chatham, at the head of the bay of same name, in the Saguenay about 50 m. above its mouth, 114 m. N. by E. Quebec. The bay which is about a mile wide, and 100 fathoms deep, forms an excellent harbour at which large quantities of lumber are shipped. Pop. about 750.

GRAND HAVEN a tn. U. States, Michigan cap. co. Ottawa, near the mouth of Grand River in Lake Michigan and at the terminus of the Detroit and Milwaukee railway. It possesses three churches, a tannery a planing-mill, and several saw-mills and carries on an extensive trade, in which the principal articles of export are timber shaves, shingles, fish, leather, gypsum, stone, lime, and coal. The value of the exports here in some years exceeded \$200,000. Pop. 5000.

GRAND RAPID, British America, the name given to a rapid of the Saskatchewan, which occurs shortly after it issues from the W. side of Great Lake and is about to pour its waters into Lake Winnipeg. After some minor interruptions the banks of the river, previously low and flat, rise

thickly timbered begin to rise, and have only attained the height of 20 ft. when the W extremity of the Grand Rapids is reached. It is said to be unpermeable as a rapid in magnificence and extent, as well as in volume of water. Its total length is 2½ m. and its total descent 45½ ft. Its breadth at its upper extremity where it commences is 450 yds., but at its lower extremity where it terminates is only about 140 yds. the depth of water as no soundings have been taken can hardly be conjectured. Throughout almost its entire length the Grand Rapids is confined between perpendicular escarpments of rock, composed of brittle but coloured limestone, in horizontal strata. Above the limestone is a bed of light coloured clay 25 feet in thickness, with pebbles and boulders embedded in it, and above all about 8 inches of vegetable mould clothed by a forest of balsam spruce, tamarack and poplar.

This ascent of the Grand Rapids is a task of no ordinary labour and difficulty but in point of danger cannot be compared with the descent, which is thus described by Mr. Hind. In attempting according to his directions (those of John Spence an old experienced voyager) to cross from the north to the south side of the rapid in order to get into what was reported to be the best channel for a small canoe, such was the fierceness of the current and the turbulence of the great surges and breakers in the middle that we were nearly engulfed and although a cry saved us was strained, we were swept down with impetuous velocity and did not get near the other side till we were about 2 m. below our starting-point. We were then impelled with astonishing swiftness along the south side of the torrent often in dangerous proximity to the rugged wall of rocks bounding the channel and now and then whizzing past—almost grazing—sharp rocky points jutting out from the river against which the churning waters seethed and foamed in their fury. During the descent the voyagers exerted themselves to the utmost of their strength and evinced an admirable degree of coolness and dexterity.

GRAND RAPIDS, a tn. U States, Michigan, cap. co Kent on the rapids of Grand River and on the Detroit and Milwaukee railway 63 m. W N W Lansing. It stands on both sides of the river which is here about 800 yards wide possesses county buildings, several churches, an Episcopalian college, and in respect both of manufactures and trade is one of the most thriving places in the state. Salt, gypsum, hematite and pine timber abound in the vicinity. Pop. (1860) 3035.

GRAND RIVER, a tn. British America, Canada East, co Gaspé near the mouth of the river of same name on the W shore of the Gulf of St. Lawrence. It contains about 1450 inhabitants, chiefly employed in fishing in which a large business is done.

GRATZ, a tn. Austrian empire, Silesia, dist. and 4 m. S Troppau with a parish church a castle belonging to the Prince of Lobkowitz situated in a fine park and containing a picture gallery, an hospital, a paper-mill, a trade in wood, three yearly markets and 1800 inhabitants.

GRAVE CREEK, a vil. U States Virginia, cap. co Marshall, L. bank, Ohio between the Big and the Little Grave Creeks. It derives its chief claim to notice from a remarkable ancient mound in its vicinity 820 feet in circuit at its base 190 feet in diameter at its summit and 70 feet high. By means of a shaft sunk from its apex, several interesting antiquities, including two sepulchral chambers, several skeletons and a small stone with a sculptured alphabetical inscription, have been found. Pop. 1200.

GREAT BARRIER, or **OTEA** [add] an isl. New Zealand, on the N E side of Ulster or Middle Island and on the E. side of the Hauraki Gulf to which it affords great protection from seaward. It is 21 m. long from N W W to S S E and 10 m. across where it is widest near its centre. Its E. shore on which there is generally a heavy swell has no safe anchorage but on its W shore are several bays and harbours, which though open for the most part to W and S.W. give excellent shelter from east winds. The interior is traversed throughout its whole length by a mountain range the culminating point of which rises to the height of 1150 feet, and is clothed with forest to its summit. Other parts are thickly wooded. Among the trees the *hoari* tree flourishes in great abundance, but all of these within convenient reach have been cut down and either exported or used for ship-building purposes on the

island itself particularly at Port Abercrombie where small vessels are built and repaired, and where in 1846 one of 400 tons was built, equipped, and loaded with a cargo of copper ore which was then worked near the north end of the island. The valleys and slopes of the hills afford good pasturage, and on the east side of the mountains are some plains of considerable extent.

GREAT BARRINGTON a tn. U States, Massachusetts on the Housatonic River and railway 118 m. W Boston. It is beautifully situated among surrounding hills and possesses six churches, an academy a large woollen factory turning out annually 500 000 yards of cassimere an almost equally large cotton-mill, a tannery a distillery a rope-walk two flour-mills and a manufactory of India-rubber goods. There are beds of iron ore, and quarries of variegated marble in the vicinity. Pop. 3371.

GREAT DOG LAKE British America, situated about 22 m. N W of Thunder Bay on the W side of Lake Superior. It is of very irregular shape, with a maximum length of 20 m. a breadth of 7 m. a depth found at two different soundings to be 12 and 15 fathoms and an estimated area of 200 sq. m. It is bounded by bold primary rocks, and studded by innumerable islands and is 710 feet above the level of Lake Superior. Its principal feeder is the Great Dog River which enters it from the W. Its outlet Little Dog River which issuing from its S.W. extremity and thenceforward as passing into Little Dog Lake, is properly only a prolongation of the Kaministiquia. The country around Great Dog Lake is hilly and covered with forests chiefly of white spruce, interspersed with groves of aspens, and occasionally dotted with Weymouth and Baikalian pines; white and yellow birch some of them of large dimensions also abound.—(Hind).

GREAT SALT LAKE U States in the V. K. of Utah about lat. 41° N. lon. 118° W. It lies in a valley or basin of the Rocky Mountains and is of very irregular shape, projecting in its area, into numerous indentations and projections, and stretches about 75 m. from N.W. to S.E. with an average breadth of about 80 m. Its height above the sea is 4200 ft. As its name implies, the water though clear and transparent, is excessively salt, 22 per cent., or rather more than one-fifth of its whole volume consisting of chloride of sodium, with a slight mixture of other salts. Owing to the great specific gravity thus produced, the water is so buoyant that a man may assume a sitting posture in it with his head and shoulders raised above the surface. Swimming however is difficult, from the tendency of the limbs to rise at each stroke out of the water and there is moreover the additional danger of having the eyes stung by particles of brine and the throat and stomach scorched by accidentally swallowing any part of it. Of its several feeders the most important issues from Lake Utah which is situated 65 m. to the S. and not only contains fresh water but abounds in fish. The Great Salt Lake on the contrary maintains no living stock, though its shores and islands are frequented by immense flocks of gulls wild ducks, geese and swans. It has no outlet and therefore all the surplus water which it receives must be discharged by evaporation. Appearances indicate that it once was of much larger extent, and formed an inland sea.

GREECE [add] The area of the kingdom is estimated at 48 426 000 stremmata, or 28,571 600 acres. No complete survey of the country has yet been made only the vineyards, olive-groves, current plantations, &c. having been measured and valued to some extent. About one-third of the surface consists of mountains and rocks one-fifth is covered with forests; and perhaps one-half is available for cultivation, but of this barely half has been turned to account. It is difficult to ascertain the amount of the produce of the soil or its capabilities for maintaining the population. But the following figures represent the productions of the years 1857 and 1858. By kilos being equivalent to a Winchester quarter and the oks to 45 ox acornsports—

	1857	1858
Wheat	0 m.	0 m.
Barley	64 200	64 244
Flax	18 200	18 244
Rice	4 200	716
	45 000	88 000
Total	119 000	122 500

	1886	1888
Corn	4,710,528	4,665,650
Barley	2,733,570	2,464,750
Wheat	1,862,840	977,100
Rye	265,120	62,000
Oats	261,370	145,510
Indian Corn	2,770,380	1,827,820
Black wheat	260,700	126,710
Pulse	190,440	190,000
Vegetables	4,410	1,020
Total	12,709,817	6,420,070

The year 1888 was one of great dearth but 1887 was an average one. Notwithstanding the excessive dryness of the climate and the torrid heat of summer the soil when properly worked up, is generally found to be most fertile and even beneath the desolate stony wastes of Attica it is asserted that there lies a virgin soil of rich brown loam, which is never reached by the rude plough of the time of Hesiod which is the chief implement of agriculture. The cultivation of the current plant is said to be rapidly increasing in the Morea in 1888 the plantations covered 135,056 stremas in 1883 about 200,000. The crop amounted in 1888 to 23,408 tons and in 1881 to 23,680 tons. Of the crop of 1888, 55,908 tons were exported—80,906 of them to Great Britain. The duty raised upon cereals in 1888 was about 1,000,000 drachmas. Cotton also has become an important crop upwards of 30,000 acres being sown in 1884 and tobacco is much grown the best quality being produced in the plains of Larissa, Calamata, and Argos. Vellones, the tops of the acorn of the Lerrantine or Vellones oak, is one of the chief and most valuable productions and is exported for tanning purposes.

The value of the imports and exports in the year 1882 was 49,109,666 drachmas (£1,555,917) and 52,323,726 drachmas (£1,754,419) respectively the principal articles were as follows:—

Imports.	Exports.
	Drachmas.
Tinuous (chiefly Oak- um and Wool)	5,527,500
Milk and Hides	3,814,400
Cereals	3,812,100
Fiber	1,250,600
Sugar	1,054,320
Wool	2,140,250
Lard	2,800,110
Iron	1,230,400
Coffee	1,004,810
Mineral Products	1,340,920
Total	24,003,790

The number of vessels entering Greek ports from foreign countries in 1882 was 10,464, of 1,078,597 tons, and of those departing for foreign destinations 11,209, of 1,082,111 tons. The coast navigation of the same year represented a tonnage of 1,564,293 entered and 1,189,814 cleared. The mercantile marine of the country consisted of 4255 vessels, of 257,818 tons. The Ionian Islands are not included in the foregoing statistics.

The average revenue of the kingdom in the five years 1860 to 1864 was slightly superior to the expenditure—

Average of Revenue,	8204,960
Expenditure,	825,100

The revenue, according to the budget of 1864 was estimated thus:—

Direct Taxes	Drachmas
Land Tax and Customs	7,021,000
Tax on Rum	90,000
Postage	180,000
Octroi	1,000,000
License	400,000
Rent	200,000
Indirect Taxes	15,695,000
Customs	5,000,000
Stamp	2,100,000
Excise	250,000
Total	17,046,000

being £219,457 less than the actual revenue of 1860.

The land tax is a tax upon the produce of the soil of 8 per cent. upon cereals and special rates upon other kinds. The effect of the tax is very detrimental to agriculture. The usufruct is a tax or rent of 15 per cent. upon the produce of national lands rented by private persons. The *apostrophe* according to the budget of the same year, 1864, was as follows:—

Public	237,600
Foreign	25,100
Internal	84,450
Funerals	414,610
Public Service	
Ministry for Foreign Affairs	250,540
Ministry of Justice	50,550
Interior	100,100
Religion and Education	48,250
War	191,961
Marine	68,570
Finance	34,000
Administrative Expenses	259,200
Total	670,490

Besides this amount there are the king's civil list, the salaries of the members of the legislature, and other expenses. But it is difficult to ascertain the actual amount of the expenditure. The public debt at the end of 1862 was estimated to be £14,324,000.

The whole of Greece is divided into ten nomarchies or prefectures. These ten nomarchies represent thirty five eparchies or sub-prefectures and these eparchies are made up of demes or communes, to one of which every member of the state must belong for himself and family. These communes are distributed into three classes:—

Class I. containing a population of 10,000 and upwards	
II. 2,000 to 10,000	
III. less than 2,000	

Every town or village numbering 800 or more inhabitants can claim to be constituted a distinct commune or demos. Towns or villages with less than this number belong to the commune nearest to them. The number of demos of the first class, 7 of the second, 217 and of the third 561 altogether 784. Each of the demos of the first class has a communal council of 18 members; of the second, 13 members and of the third, 6 members. Every demos is presided over by a demarch or mayor and, if of the first class, has 6 aldermen (*synagoroi*) if of the second, 4 aldermen and if of the third 1 alderman. The duties of the commune are to support elementary schools, defray the expenses of elections, the repairs and maintenance of public buildings, roads, bridges &c. and to levy local taxes. Yet the demarch is responsible to the ministry of the interior and the consequence is that local interests are sacrificed to political influences and what appears to be an efficient municipal system becomes the mere instrument of the dominant party. As one result it is stated that there are not a dozen roads in Greece the total mileage being 180 to 200 miles at the most. Although the country abounds in splendid forests of excellent timber the want of roads renders it practically useless, and large quantities have to be imported and it is a common custom for the shepherds to burn down vast tracts in order to provide more pasture for their flocks.

In the provinces of the kingdom brigandage has revived and is said to be increasing, many members of the better classes hatching themselves to it from vindictive or lawless opposition to the anarchy of the ruling power. It is asserted that there are few of the leading bandits who have not a friend, or relative, or political patron in high quarters, and that hence many cultivated Greeks regard brigandage with an otherwise unaccountable toleration. Little effort is uniformly made to suppress it. Education, however, has been making progress. When the monarchy was established there was no educational institution in existence, except an orphan asylum at Egina. In 1864 there were:—

The University of Athens	Professors or Lecturers	1,000
8 Gymnasiums, or Royal Colleges	50	1,200
80 National Schools	143	6,943
1 Normal School	2	43
Commercial Schools	500	10,000
Private Commercial	43	2,000
800 Elementary	—	10,000

The nationality of the inhabitants is mixed. The Al-
bionian zone occupies the whole of Athens and Magura
(except the capital Athens and Magura), Sootia, parts of
Loric, Rhodus, Andros, and Eginis, the whole of Salamis,
and, in Peloponnesus, Corinthia, Argolis, parts of Arcadia
and Achaja, Laconia, &c. The Albanians are prominent in
activity and furnish the greater number of the cultivators of
the soil and the most enterprising of the maritime popu-
lation. The Hellenic race is not just energetic, and under-
favourable circumstances displays much intellectual and
commercial talent. But the insecurity of property and labour
prevents any material prosperity or progress. By the census
of 1861 the population was found to number 1,066,810.

GREEN an isl. British An. Arica, Canada East, in the
St. Lawrence, about a mile from its bank, in co. Temple-
cous, and nearly opposite to the mouth of the Saguenay on
its N. bank. It forms a narrow belt 8 m. long from N. E. to
S. E. W. is wooded, and is mostly composed of granitic
and slate rocks the highest of which is 250 ft. above the sea.
From its S. W. point, which is low and bare, a dangerous reef
extends westward, and then curves out northward beyond its
general line on its N. point there is a lighthouse in the
form of a square stone tower visible in clear weather at the
distance of 12 m.

GREEN BAY a town in U. States, Wisconsin at the head
of the lake which gives it its name and which branches off in
a south westerly direction from the N. W. of Lake Michigan
113 m. N. E. Madison. It lies at the mouth of Fox River
which having been connected by a canal with the Wisconsin,
gives a communication with the Mississippi, and carries on
a large trade, particularly in fish and lumber. Within the
town are 8 and in the vicinity 24 saw-mills, driven mostly
by steam. Pop. 7215.

GREENCASTLE, a vil. U. States, Indiana, esp. on
Patterson on high table land at the intersection of the Terre
Haute and Bloomington with the New Albany and Salem rail-
way 41 m. W. Indianapolis. It is situated in a rich agricul-
tural district, and contains two churches a Methodist
university two academies, and a courthouse and jail. Pop.
2096.

GREENFIELD [old] a town in U. States Massachusetts
esp. on Franklin v. bank Connecticut, at the junction of the
Vermont and the Connecticut with the Connecticut River rail-
way 65 m. W. N. W. Boston. It contains 6 churches and is
largely engaged in the manufacture of cutlery and machine
tools, casement, castings, carriages, leather harness, furni-
ture, and tin-ware. The first manufactory of table cutlery in
the U. States was established here in 1824. Some remark-
able fossil footprints have been discovered in the vicinity.
Pop. 8193.

GREENPORT a vil. U. States, New York, on the E.
side of the N. E. point of Long Island 95 m. E. N. E. New
York city. It possesses six churches, and an excellent har-
bour which admits the largest vessels, and is seldom ob-
structed by ice. Many vessels are fitted out in its build-
yards, and not a few of the inhabitants are interested in the
whaling trade.

GREENSBORO a vil. U. States, Alabama, on the
Gadsden railway 60 m. W. Columbus. It possesses three
churches, a female college, several academies and schools, a
courthouse and jail, and standing in the midst of large cotton
plantations has a flourishing trade. Pop. about 3500.

GREENVILLE, a town in U. States S. Carolina, esp. dist.
of same name, on the frontiers of N. Carolina, and at the
terminus of the Greenville and Columbia railway 83 m.
N. W. Columbia. It contains several churches and academies,
and has become a favourite summer resort in consequence of
its beautiful and romantic scenery. Pop. 1018.

GREENWICH a town in U. States, Connecticut, on Long
Island Sound and on the New York and New Ha. an railway
39 m. N. E. New York. It contains three churches, an iron
foundry, a tool and a wire factory and since the completion
of the railway has become a favourite place of residence for
New York merchants. Pop. 6522.

GREIFENDORF a town in Austrian empire, Moravia, circle
and 37 m. N. Brunn in the valley of the Zvitava, and on the
Vienna and Prague railway with 1199 inhabitants.

GREY or **MAWATA**, a river New Zealand, in the N. W.
of Middle Island or Manakau. It is formed by two branches
one of which, rising near the centre of the island, flows directly
S. S. W. while the other, issuing from Lake Brunner
flows nearly due W. through an extensive valley for about
12 m. and falls into the sea on the W. coast, in lat. 43° 38'
80° S.; lon. 171° 11' 15° E.

GRIZES, a town in Austrian empire, Tyrol, circle Brizeu, to
the W. of Bozzen with a Benedictine priory a beautiful
church armed with some of the finest paintings of Martin
Knoller and 1700 inhabitants.

GRIFFIN a town in U. States, Georgia, esp. Spalding,
on the Mason and Western railway 63 m. N. E. Columbus.
It is a healthy and prosperous place, built chiefly of brick
and containing three churches, three colleges, one of them homeo-
pathic, and two female and various other schools. Nearly
50 000 bales of cotton used to be annually sent off from the
railway station here. Pop. 2280.

GRIMBY a town in British America, Canada West co.
Lunenburg on the Great Western railway 94 m. S. by W.
Toronto. It has Church of England and Wesleyan churches,
a tannery a foundry a distillery and some general trade.
Pop. about 1000.

GRINKELL LAND Arctic Regions, the name given
by Dr. Kane, while commanding an American expedition in
search of the *Fretta Franklin*, to an extensive tract, separated
from the W. or opposite coast of Greenland partly by an
immense glacier and partly by an open sea, the entrance to
which is by Sir Thomas Smith's Bay at N. arm of Duffin's
Bay. It extends, in continuation of Ellesmere Land and the
Victoria and Albert Mountains from lat. 60° 17' to 87° 30'
N. this being the highest point seen though not visited by a
party engaged in the expedition. The name of Mount Sir
Edward Perry was given to this point. Much of the tract is
very lofty the culminating peaks sometimes rising to the
height of 2500 ft. In this region, where the thermometer
seldom reaches so high as 56° and where the ground is al-
most always frozen and covered with snow Dr. Hayes found
fifty-two different species of phanerogams and sixty-eight
species of cryptogamous plants.

GRONDINES a town in British America, Canada East on
Portneuf, 1 bank St. Lawrence 43 m. W. S. W. Quebec with
a N. Catholic chapel, a trade in lumber and boat-building
yards. Pop. about 1400.

GROVINGEN or **GROENINGEN** an isl. in the American
Polynesian, about 85 m. S. of Fanning Island lat. 10° 8'
lon. 156° 44' W.

GROSSE ISLE, British America, Canada East, one of
the islands of the St. Lawrence, 80 m. N. E. Quebec. It is
about 2½ m. long by 1 m. wide, and is extremely devoted to
quarantine purposes. The establishment is very complete,
and all emigrant ships arriving in Canada are obliged to call
at it and stop till a clear bill of health has been obtained.
No persons but those belonging to the establishment are allowed
to reside on the isl. or even to visit it without a pass from
the emigrant agent at Quebec.

GROTSKA, or **KROVKA** a town in Europe, Servia
circle and 16 m. S. E. Belgrade v. bank Danube. It is the
seat of a court of justice, and has a church and a school.
The Imperialists were signally defeated here by the Turks
in 1799. Pop. 1000.

GRUMBURG a town in Austrian empire, Moravia, circle
and 86 m. N. W. Olmütz with manufactures of homery
leather, and wooden ware, and 1400 inhabitants.

GRUNAU a town in Austrian empire, Upper Austria, circle
Hausruck, on the Alben a tributary of the Traun 25 m.
S. W. Steyer in a very mountainous district. It has a parish
church, an hospital manufactures of sashes and various other
industrial establishments and contains 3000 inhabitants.

GRUNBERG a town in Austrian empire, Upper Austria,
circle Traun, 1 bank Steyer and 80 m. W. S. W. Vienna.
It has a benevolent female institute, extensive manufactures
of sashes, and other industrial establishments. About 2 m.
above Grilaberg, on the same side of the Steyer is the village
of Loosstein with an old townsome fortress. Pop. 3000.

GRUNWALD a town in Austrian empire, Bohemia, circle
Bauden, near Glatz with numerous looms a cotton-mill
glass-works, and 2313 inhabitants.

GREYMALOW a town in Austrian empire, Galicia, circle
and 34 m. S. E. Tarnopol, esp. dist. of same name; with a
RI

barrelled masts, a best roof sugar factory and 2697 inhabitants.

GUADALCÁZAR, a town in Mexico, state and 26 m. N. N. E. San Luis Potosí, in a valley at the height of 5069 ft. above the sea. Its miles, which were very productive, and raised it to a high degree of prosperity are in great measure abandoned, but the soil is still enough to some extent, and there is a mine of quicksilver which is considered the most valuable within the limits of the Confederation.

GUADALUPE HIDALGO a town, Mexican Confederation, state and 3 m. N. of Mexico, which communicates with it by two parallel streets planted with rows of silver poplars. It contains a large and beautiful church in connection with a monastery which stands at the foot of Mount Tapayan, was founded in 1709, and is one of the richest in the country. Among its treasures is an image of the Holy Virgin of Guadalupe, whose wonder-working powers are in such repute that immense numbers of pilgrims visit it. The town itself is an unimportant place, and only remarkable for the treaty of peace concluded at it between Mexico and the U. States in 1848, after the troops of the former headed by Santa Anna, had been signally defeated.

GUAJINQUIL a town, or ECARINQUILLA a town in Mexico state and 120 m. S. E. Chihuahua, on the Florida in a well-cultivated district. It is a busy and apparently prosperous place, containing from 5000 to 7000 inhabitants, who are chiefly employed in raising cotton.

GUALAGUAYCHU a town, La Plata, prov. Entre Ríos, situated on a river of same name, about 9 m. above its junction with the river Uruguay. Its property is owed to its position in the centre of a rich grazing state, and its being the entrepôt for a very important inland and foreign trade. Its exports consist of hides, tallow, jerked beef and hams, mutton, brought down in large sail-boats and small-doeked craft to Frey Benito, the anchorage at the mouth of the river. Signs of prosperity are everywhere visible in the handsome and substantial buildings, public and private, and the frequency of new streets and squares. It nearly doubled its pop. in seven years. In 1847 it had 7000 inhabitants and in 1856 14 000.

GUALEGUAY a river, La Plata, which, rising in the interior of Entre Ríos, flows S. along the foot of a mountain range past a town of same name, and, meeting with the Pabón, joins the bank Paraná. It is said to be navigable by vessels of 5 ft. draught to the port of Gualeguay 25 m. above its mouth.

GUALEGUAY a town, La Plata, prov. Entre Ríos, 1 bank river of same name, 120 m. N. W. Buenos Ayres. It carries on an active trade in hides, wool, tallow and firewood, and has an estimated pop. of 6000.

GUAM, or **GUANAN** [said] the southernmost and largest of the Mariana or Ladrones group in the N. Pacific is 29 m. long between N. E. by N. and S. W. by S. and near its centre where it is narrowest, only 3 m. broad. It is bordered nearly throughout by a chain of rocks, which are at times uncovered. At a distance it appears dark and even but, on a nearer approach, to have the E. side lined with steep cliffs, on which the sea dashes with great violence and in which there is no opening fit for anchorage. The W. coast is rather low and full of small sandy bays separated from each other by rocky points. On this side are Lomita Bay which is 1 m. deep, and at its entrance 3 m. wide, and is well sheltered except from W. winds, which prevail from June to September and send in a very heavy swell and Port San Luis d'Apra, a deep indentation, which is nearly in the form of the letter V, its mouth nearly closed by a long narrow island, and which though much encumbered with banks, rocks, and islets, forms a safe and extensive harbour. The principal produce is coconuts, the trees of which grow on the W. side in large groves 3 or 4 m. long and 1 or 2 m. broad. The other produce consists chiefly of rice, pine-apples, water-melons, oranges, limes, and bread-fruit. The island is inhabited, and in 1858 contained a population of about 4500, congregated chiefly in Yareban on the S. side, Apra on the W., and Umata, which stands on the N. shore of the bay of same name, at the foot of hills which rise behind it in an amphitheatre and contain a church.

GUANAY a town, S. America, Bolivia, prov. and about 80 m. N. La Paz, on a stream which a mile below mingles

with the Yampuri and La Paz, and along with them empties into the Maphra. Most of the inhabitants are Indians, whose chief occupation is in navigating the rivers in balsas or rafts, constructed of an exceedingly buoyant sort of cork-wood. On these large quantities of produce are brought to Guany from Mijon and Mijon.

GUANO, a town, S. America Ecuador esp. cant. of same name, about 80 m. S. Quito. It contains a number of good houses, including a large and handsome church and has manufactures of woollen goods, blankets, carpets, furs, and sulphuric acid. Pop. about 9000.

GUARANDA, a town, S. America, Ecuador esp. cant. of same name, on a plain in a black and barren district, near the slopes of Chimborazo, 30 m. S. by W. Quito. It consists of winding streets and adobe houses with tiled roofs and contains a parish church occupying one side of the public square. Many of the inhabitants are mulattoes. Pop. 3000.

GUARDIA or **GUARDIA DE LA ESQUINA**, a town, La Plata, Pampas, 40 m. S. W. Rosario, in the W. of the bank Uruguay. It lies in a deep basin in front of the plateau, is of considerable area, and regularly built in the form of a square, with houses which have well-stocked gardens attached to them and with a market-place and a church. As a central point, where the roads from Rosario and Buenos Ayres to Cordoba and Mendoza meet, it is a place of some importance.

GUAYACUIL [said] a town, S. America, Ecuador esp. cant. Guayaquil on the W. or S. bank of the river of same name, 103 m. S. S. W. Quito, lat. 2° 12' S. lon. 79° 50' W. It occupies a low site little raised above the level of the sea, and consists of two parts, an ancient and a modern the former on the S. and the latter on the N. The streets are for the most part irregularly formed; but some of them, more especially the Molecan which flows the river and stretches along its banks from S. to N. for the whole length of the new town forming the principal thoroughfare, are straight and spacious. The houses, almost all constructed of wood and roofed with tile, are usually provided with porticoes, which extend round so as to embrace the small gardens attached to them, form in some of the streets long lines of shady piazzas. The principal buildings are the churches, which, however are all of wood with the exception of that of St. Dominic which is the most ancient, and is built of stone the governor's house and government offices, the appeal court, the treasury the master-house, the barracks, two colleges and several primary schools, two hospitals, and two markets. The growth and general prosperity of the town have been greatly impeded by destructive fires, which from time to time have laid great part of it in ashes. Another serious drawback is the prevalence of yellow fever which has repeatedly raged like a pestilence, and occasioned dreadful ravages. The only defence of the town is a fort situated near its N. extremity on the banks of the river. There is no proper harbour but a fine quay built of stone, and about 60 ft. broad, lines the bank in front of the town and affords good accommodation for vessels. In 1858 218 vessels, of 85,548 tons, entered the port, bringing cargoes valued at £238 018 and 232 vessels of 67 910 tons left it, with cargoes valued at £230,151. Pop. about 22 000.

GUAYACUIL a river, S. America Ecuador which formed by a number of small streams which descend from the W. slopes of the Andes, flows S. S. W. and falls into the Gulf of same name on the Pacific, in lat. 3° 27' S. In the upper part of its course it takes the successive names of Caracol and Dabahaya. It is navigable for about 110 m. but is encumbered by a bar and shifting banks of sand.

GUAYMAS, [said] a port in Mexico, dep. Sonora on a bay in the Gulf of California, near the mouth of the Yaqui, lat. 27° 54' N., lon. 110° 52' W. It lies in a hollow enclosed by bare hills, which, excluding ventilation make the summer heat almost stifling. The houses are mostly built of sun-dried bricks, and having no windows receive their whole light by the doors. There is only one spacious and regular street—all the others are more narrow lanes. None of the public buildings are deserving of notice. The harbour being large and well-sheltered, is much frequented particularly by ships engaged in the guano trade. The chief exports are flour, wheat, and hides. The fishery, which is carried on chiefly by Indians, is very productive. Pop. about 4500.

GUAYTECAS, a group of islands, S. America, off the coast of Chili, between the island of Chilo in the N. and

the Chonos Archipelago on the S. Grayson Grande, one of the largest of the islands, has a peak 1100 ft. high, and on its S. side an excellent harbour. Port Low on its N. side, is much frequented by ether-bunting and sealing parties from Chiloé.

GURBEE a tn N. Arabia, in the sandy desert of Nufud, lat. 28° 10' N. lon. 41° 40' E. It stands on an extensive open plain of hard stony soil, between the two peaks of Mt. Imman and Alghazat, which are about 10 m. asunder. It consists of five oases or divisions, four of them extending in a row from E to W while the fifth lies southwards. The houses, built of sun-burned bricks, are tolerably large and comfortable. The better class have a front somewhat resembling the propylæa of the old Egyptian temples and all of them have orchards attached to them. These are well laid out and carefully irrigated with water raised from wells. The inhabitants are of the Aneel tribe, which ranks at one of the greatest of the Shannar race, and possess large herds of camels.

GUDABIERI or **GUDANBAR** a Bedouin tribe E. Africa bounding on the N. with the Easa, with whom they claim affinity though the other Somali refuse to acknowledge the relationship, and unhesitatingly designate them as a bastard and ignominious race. They own the rough and rolling ground diversified with thorny tall and grassy plain, which lies above the maritime range of the Sub-Ghazal and have by conquest extended their territory in the direction of Harar so that they are now bounded by the Marar Prairie. In their features they are decidedly superior to the Easa, and they are not so bloodthirsty but they are equally turbulent, and, if possible, more regardless of truth. Their wealth consists in flocks and herds, peltries, hides, gums, and ghee. The hides and peltries are usually sent to Harar and conveyed thence to Aden. The principal articles imported into the country are coarse cotton cloth, Surat tobacco beads and undyed dyed stuffs for women's cloths.

GLUDADA a river India, which rises in Dhotan, on the S. slope of the snowy range of the Himalayas in lat. 27° 52' N. lon. 89° 8' E. flows S. into the British d. st. Gualpara, and joins the Brahmaputra on its E. bank after a course of 100 m.

GUELBA, or **PI GUELBA** a tn N. Africa, Sahara, lat. 31° 58' N. lon. 0° 20' W. It stands on a rocky mountain of a conical shape surrounded by a lofty and thick wall of solidly built of large stones and encircled, as entered from the W. by a single gate, which seems to have belonged to an ancient city and consists of about 200 houses, occupied by individuals of the tribe of Cham-betel Mahdi, while many of the same tribe live outside in tents. They are rich in sheep goats and camels; but the chiefs also have horses. A large well of great depth within the town supplies the inhabitants with abundance of water and oozes the walls at the foot of the mountain there is a perennial spring so copious that it fills an entire cistern basin in which twenty camels can drink abreast. The environs are covered with gardens, orchards, and date plantations. Standing on the caravan route to the S.W. and N.E. Guelba shares largely in the intermediate transit trade. — (*Dumas Le Grand Desert*)

GUELMA, R. in N. Africa, Algeria prov. and 64 m. E. N. P. Constantine, on the site of the ancient Calama, part of whose walls are still standing. It is a stirring place, with two important weekly markets at which the principal articles sold are cattle, wool, oil, grain and leather. The olive, the mulberry and the tobacco and cotton plants thrive well in the vicinity. There is a government nursery here. P. 8592

GUERNAVACA a tn, Mexican Confederation, state and 30 m. S. Mexico, in a beautiful and fertile valley of same name, where almost all the fruits both of the temperate and the torrid zones attain perfection. It occupies the site of the ancient Guana-huaca, and has two churches, one of them built by Cortes and the other surrounded by gardens in the old Aztec Spanish style. Its principal industrial establishments are distilleries. In the vicinity is the native village of Ampanzingo inhabited by descendants of the Aztecs who, though professing Christianity retain their old customs and use an Aztec dialect.

GUERREBO a state, Mexican Confederation, formed in 1849 out of states Puebla and Mexico and named after Guerrero, a former president of the Confederation is bounded N. by Mexico, N.E. Puebla, E. Oaxaca S. and S.W. the

Pacific Ocean, and N.W. Michoacan areas, 18,240 sq. m. It belongs to the lower and gradually descending portion of the great Mexican plateau and has a surface finely diversified by mountains and valleys and partly covered by native forests. The N. portion is covered by cullers of the Sierra Madre, and though elevated has a temperate and healthy climate. The most important rivers are the Rio de las Balas, which in the lower part of its course forms the boundary between Guerrero and Michoacan, and the Rio de Papagallo or Tlacala, which though usually a small stream, becomes so swollen by the rains as to inundate a large tract of country, and interrupt the communication between the capital and Acapulco. The productions of the state are many and valuable, but agriculture is in a very imperfect condition and the only tract which can be considered densely peopled is that which lies along the road leading from Acapulco to Mexico. The places particularly of gold were long famous, but now yield poor returns. The trade also is unimportant. Pop. 270,000 mostly Indians.

GUGGLER a river India, which rises in the native state Puteala, beyond the N.E. frontier of British, about lat. 30° 52' N. lon. 77° 7' E. enters British after forming part of its boundary flows S.W. receives the Merikanda and Surooty traverses the districts Hurreana and Buttsana, crosses the Bomber of Nkaner, and shortly afterwards, having lost the greater part of the water by evaporation absorption, and evaporation disappears in the sands, about lat. 29° 10' N. Tradition and the remains of villages scattered over a tract now desolate concur in proving that it must once have flowed to some distance beyond its present termination.

GLIFF FOUNT a vil. U. States, Connecticut, on the New Haven and New London railway near Long Island Sound 8 m. S. F. New Haven. It is an antiquated place with a public square in its centre, and contains four churches and a public school. The manufactures are unimportant. The inhabitants being chiefly engaged in agriculture and maritime pursuits. Point, about a mile S. of the village is a favourite watering place. Pop. 3524.

GUMBARA, an Indian Arakhuvalgo belonging to the Philipines and lying in the channel between Pinaric and Negros. It has a computed area of 910 sq. m. a mountainous surface covered with forests of fine timber and intersected by fertile and well watered valleys. On the W. there is a town consisting of about 994 Indian huts, the inhabitants of which manufacture coarse and fine cloth, and also engage in both agriculture and fishing. The total pop. is 204.

GULUMBE a tn Western Africa. Kansa States, prov. Kabi 66 m. S.W. Sokoto. It is situated close to the S. side of a fertile valley where yams and cotton are extensively cultivated. The fine grove of banana-trees approaching close to the walls on one side, and is both large and densely peopled. The state of the country however keeping the inhabitants in perpetual alarm, is unfavorable to the prosecution of any branch of industry. The greatest pests of Gulumbé are the mosquitoes, which are so numerous and tormenting that a kind of raised hut accessible only by ladder and so constructed as to exclude the mosquitoes is regarded as the most essential part of even the poorest dwelling in the province of Kabi.

GUMMEL a tn Western Africa. Bornou nap. dist. of same name, 60 m. N. Kano. It is a place of considerable importance, and at the time of Dr. Barth's first visit was a flourishing and populous place, with an intricate labyrinth of narrow streets. Among the public buildings was a palace with some pretensions to splendour and then the residence of a celebrated governor of the name of Dan-Tanoma. When Dr. Barth returned Dan-Tanoma had been for some time dead, and a succession for the governorship had given rise to a civil war during which Gummel had been rendered almost desolate. The palace had been pillaged and burned, and the successful competitor for the governorship was residing in the midst of his lowering rivals, and the whole place presented an appearance of wretchedness. The market of Gummel is held outside the walls, and in its more prosperous days was remarkable for its size and activity. The extensive trade in cotton, carried on between Kano and Mampoy on the one side, and Nupé or Kyli on the other, has its centre here.

GUNDAM a tn. Western Africa, cap. prov. Anson, 40 m. S.W. Timbuktoo. It is a place of considerable size, and consists partly of a walled town, inhabited by Songhay Kusa, and Fula and two suburbs, one inhabited by Toli and the other by Fiheli. It communicates with the Kura by means of a large bark coming from Dore.

GUNDICOTT a tn. and fort, India, presid. Madras, dist. and 4 m. S.E. Bellary. It stands on the edge of a precipice forming the S. wall of a fissure, which presents a range of sandstone hills from top to bottom, and makes way for the passage of the Pennar into the plains of Cuddapah. The town, though once important, is now insignificant, and contains only 1500 inhabitants. Considerable interest still attaches to the fort, which contains a handsome minaret and mosque, and the remains of a temple, which according to Fakhrie, was usually visited by 100,000 Hindus, and surrounded by their offerings. The principal parts still existing are a handsome gateway tower of carved sandstone, and some inner buildings, containing among other sculptures a curious bas-relief which is so placed as to show only one-half of the sculpture at a time, and exhibits the figure of a cow or of an elephant according to the position of the spectator.

GUNDIACAMA or **GOONDACAMA**, two rivers, India, the one rising in the Nizam's Dominions, about 16 m. N. of Anangabad, flows E., and joins the Doodah, an affluent of the Godavari. In the rainy season it flows with a strong current in a deep channel about 100 yards broad, but in summer becomes a very paltry stream. The other river rises in the Eastern Ghats, near the N.W. frontier of dist. Cuddapah, flows very circuitously first E., and then S.E., and after a course of about 150 m. falls into the Bay of Bengal 8 m. N.E. Ongole.

GUNGAWATA a tn. India, Nizam's Dominions, on the S.E. flank of the granite range of Anangudi, 6 m. N. of the Tombadree, and about 36 m. N.W. Bellary. It consists of a small fort and a town surrounded by a wall, and is the residence of a deputy of the Nizam, entrusted with the charge of the whole of that part of the frontier which is contiguous to the coast district.

GUNGAPPI one of the Banda mts. (which see)

GUNGOUK a tn. India, N.W. Province, 36 m. N. Delhi. It presents a picturesque appearance when approached, is surrounded by a walled wall and possesses a large and handsome caravanserai, the whitened wall and towers of which, reflected on the surface of a beautifully clear tank, have a fine effect.

GUNTOOR (ed.) a tn. India, presid. and 220 m. N. by E. Madras, cap. dist. of same name, in a country which lies open and flat towards the Bay of Bengal from which it is about 40 m. distant. It is a place of considerable size, well shaded with trees, and having been much extended and improved of late years is divided into an old and a new town. The most conspicuous edifice is the jail, which stands on an open, dry and slightly rising ground consists of several buildings in separate areas as to sit to admit a proper classification, and is large enough to receive 600 prisoners. The soil of the vicinity is black or red, and produces luxuriant crops of gram or wheat, cotton, and cotton.

GURZA, a tn. S.W. Africa, Kambundu country territory, Bamba, on the N. or E. bank of the Bamba, near its mouth in the Atlantic, 60 m. N. Benguela. It is fortified by a strong palisade, is thickly shaded by banana trees, and watered by the windings of the Bamba; by the residence of an independent chief and has an estimated pop. of 2000.

GURAGALBIA, a tn. Senegal, gov. Kaolack, circle and not far from Bauder, with a parish church and 2035 inhabitants.

GURAM, a tn. Western Africa, on an arm of the Niger near the S.E. shore of Lake Debo, 300 m. S.W. Timbuktoo. It is a considerable place, seated on a large rocky eminence, which, rising from an alluvial flat, is a very conspicuous object, and is visible at Timbuktoo 20 m. distant. The town consists of three distinct groups, occupied respectively by Fula, Songhay, and Tswana. Across the river opposite to Guram, stands Bawwa on another rocky eminence.

GURU, a tn. Western Africa, Borno, on the Turkish frontier 140 m. N.W. Bahr. It occupies the lower slope and southern foot of a rocky eminence overlooking an extensive plain, and is separated by the irregularities of the ground

into several detached portions, and is enclosed by a stockade. At one time it was much more populous than it is now, but the original area which it covered has been contracted for greater security part of it having been included within a labyrinth of fences and converted into cotton ground and kitchen gardens. In the event of a hostile attack, against which Guram is still insufficiently protected, the inhabitants if driven to extremity have a refuge in the rocky crevices which rise over their heads, and from which with ordinary courage a few defenders could easily repel any number of assailants. Pop. estimated at 8000.

GURBASOVATZ, a tn. Turkey in Europe, in the S.E. of Servia, cap. circle of same name, in a fertile valley on the Tuzak, 110 m. S.E. Belgrade. It is the seat of a court of justice and other public offices, and has a church, a school, and a much-frequented yearly market. Pop. 3700.

GURH a tn. W. Africa, cap. Fula, on the route from Kassarab to the French settlement of Bakel or Ba-Jour lat. 15° 40' N. lon. 10° W. It is a large place, built of clay houses, and containing, according to an exaggerated statement of native informants, no less than sixty places of worship. The inhabitants are Awaken of a particular stock.

GURMA a hilly country Western Africa, forming the N.E. portion of a large triangle intersected between the Niger on the N. and the Eastern Mandingoes or Wangarwa on the S. It is of indifferent fertility and under the government of a chief of Mamma or Mella, who after being driven by civil war from his native country situated at some distance to the N.W. obtained it by grant from the chief of Gurma, and formed a new colony composed of his partisans. These colonists have faithfully preserved their native manners and institutions, and thus form a community bearing no resemblance to the people around them, consisting partly of Songhay, partly of Fula, and partly of a native race driven to the original possession of the country, and still headed by chiefs who maintain a rude independence.

GURMUNTERAR, or **GURMUNTERAR**, a tn. India, dist. and 31 m. S.E. Meerut, r. bank Ganges. It may be regarded as the port of Meerut and the adjoining parts of the Doab, as there is a much-frequented ferry above the town on which 15 boats are kept constantly plying and there is an important inland navigation from the sea up to this ferry and in a low degree to Bulandshahr 60 m. higher up. Even in the dry season, when the larger craft cannot ascend beyond Furruckabad, Gurmuntar 150 m. above it, can be reached by boats of nearly 20 tons burden.

GURUWA a tn. Western Africa, prov. Hamarwa, r. bank Baniwa, 800 m. above its confluence with the Kura. It is a small place, surrounded by dense bush and forest, so thick as to be impenetrable, and leave no means of access to the place except by water and consists of neat, well-kept circular huts, each with a small garden attached, in which okra and pumpkins are grown. There is not much trade.

GURRAH or **GUORA**, a river India, which rises in Kumaon at the N. base of the Sub-Himalaya, lat. 29° 5' N. lon. 79° 45' E., flows E. past the towns of Filkhait and Shajampur into Oude, and there joins the W. Ramganga on its left bank, after a course of 340 m. It is for the most part shallow and is sometimes forded within 40 m. of its mouth.

GURSCHDORF a tn. Austrian empire, Silesia, dist. Weidenau, about 38 m. N.W. Troppau, with granite quarries, and 2011 inhabitants.

GUTENSTEIN (ed.) a tn. Austrian empire, Lower Austria, cap. circle of same name, in the upper valley of the Flatsch, 35 m. S.W. Vienna. It contains a modern ducal palace in the midst of a fine park; an old castle, where several of the Hapsburg family resided, and Frederick the Yhr died in 1390; a Servite monastery, a chapel to which numerous pilgrimages are made; copper iron and numerous saw mills; and a large trade in flax and timber.

GUT OF CARSO (ed.) a strait, British America, connecting Cape Merton from Nova Scotia, and forming the S. entrance of the Gulf of St. Lawrence, is a most important navigable thoroughfare, thousands of vessels annually passing through it. Its length from the lighthouse on its N. to that on its S. entrance is 14½ m. Its least breadth is 300 yards.

and its depth seldom less than 15 fathoms, muscels were deep-sea to 33 fathoms. The shore is generally high on both sides, the land rising from it more or less abruptly to a considerable elevation. Cape Porospeia on the W shore is a precipitous headland 840 ft. above the sea, and has in its vicinity much beautiful scenery. The rocks belonging to the lower members of the coal formation consist of slates,

conglomerates, sandstones, gypsens, *gyphiferous* marls, and occasionally carboniferous limestone.

GUTTA a tn. Austrian empire, Hungary co. and 10 m N W Komora, opposite to the mouth of the Waag in the Danube, with the ruins of an old castle. The inhabitants are partly employed in agriculture, for which the soil is well adapted, and partly in fishing. Pop. 4704.

H

HABENDORF (Atr) a tn. Austrian empire, Bohemia, circle Brunkau, with a church manufactory of woollen cloth and embroidery a yarn spinning mill a linen bleachfield and 1300 inhabitants.

HACZOW a tn. Austrian empire, Galizia circle and about 19 m S W Bosnak with 3558 inhabitants, the descendants of Swedish prisoners who settled here in the 17th century.

HADAD a tn. Austrian empire Transylvania, circle and about 14 m N Szilagy Komlyo with an old castle belonging to the Vassaloy family a salt spring and 1160 inhabitants.

HADJIKOMI a tn. Turkey in Asia, prov. Sivas 90 m N W Amasia. It stands in a beautiful valley surrounded by well-cultivated fields, and consists of about 290 houses of comfortable appearance occupied almost entirely by Turks, the number of Armenian families not exceeding 30. The principal public building is a mosque.

HAILU, or HAYER a tn. Arabian, Nejed exp. prov. Jebel Shomar situated in a low flat valley at the foot of Mount Rasmia Hill belonging to the Aja clan lat. 42° 40' N; lon. 37° 25' E. Though one of the latest founded places in the land it is a thriving and populous. The town is surrounded with fortifications about 20 ft. high with round and square towers, and large fiding gates at intervals. The area is closed is sufficient for a population of 800 000 or more but the many large gardens, open spaces, and plantations within the outer walls, together with the palace and its pleasure grounds, occupying at least one-tenth of the city materially reduce the space available for buildings. The plan all around the town is studded with isolated houses and gardens, the property of wealthy citizens. The palace in the N W part of the city is constructed of earth walls enormously thick, and about 30 ft. in height, pierced near the top with loopholes for windows, and running 400 to 500 ft. in length. The principal gate of it is placed in a receding angle of the wall and flanked with high square towers, and semicircular bastions project all along the front. Immediately under the wall runs a long bench of baked earth and stone, and about the centre of it is a throne or raised seat occupied by the monarch when giving public audience. On the opposite side of the open area stands a long range of warehouses and apartments, in which is stored the government merchandise and strangers are lodged. Near it are a large mosque and houses of some of the chief officials. A turning leads into the market square, which is well supplied, and a lofty gate at the S end of the area opens at right angles into the principal street, which traverses the whole extent of the town from E to W and is intersected by others in various directions. Most of the houses built of sun-dried bricks and flat-roofed consist of two stories, with large rooms, which might be called commodious and comfortable, were it not that light is admitted only through the door and some small openings in the walls immediately below the ceiling. No house is thought complete without a coffee-room, which stands apart from the other buildings, facing the courtyard or in the centre of it. The streets though unpaved are broad and in one of them is a kind of bazaar kept chiefly by wandering tradersmen. The town has received many improvements at the hands of Tejal, the present ruler of Jebel Shomar who has opened streets, dug wells, laid out extensive gardens, besides strengthening the old fortifications and adding new ones. He also built the market and mosque before named. The palace was begun by

his father Abd-Allah-ah-Ismael who had been appointed governor of the province by Fayrat king of Agad, and who to consolidate his authority added a new quarter to the town and laid the foundations of the palace about 1848. His son Tejal succeeded him about 1845 and his first cares were to adorn and civilize the capital and the palace was soon completed. His politic rule has greatly raised the importance of the city and among the measures for enhancing its wealth he has been partially successful in drawing the annual current of pilgrims from Persia to Mecca through his territory and the capital. The pop. which is increasing is estimated at 100 000 (Telugue, &c.).

HAIMUN a walled tn. China, prov. Chahking r. bank Talokan, near its mouth is the N Pacific. The bar across the bay to the entrance of the river has only 8 ft. at low water but within the depth is 4½ and 5 fathoms. About 4 m above Haimun the Tauchaz separates into two branches, one of which takes a N W and the other a N W direction. There is another Haimun on the E of prov. Quanton on the S bank of a river of same name which has 10 ft. on its bar at low water. Immediately to the N of it is Hope Bay formed by Haimun Point on the S and the Cape of Good Hope on the N. This bay affords secure anchorage in the N E. monsoon.

HAINEFELD a tn. Austrian empire Lower Austria circle Upper Wienerwald, exp. circle of same name, 89 m S W Vienna. It has a church so built as to be capable of defence against an enemy manufacture of steel and iron ware numerous saw-mills, various other industrial establishments, and a field of coal which is worked to a considerable extent. Pop. 2520.

HAITAN an isl. China, off the E coast of prov. Fokien between lat. 25° 24' and 25° 40' N. It is of irregular shape and diversified appearance, elevated in the N, where a peak of the Kiangshan Hills rises to the height of 1410 ft. and low and deeply indented by sandy bays on the E and W while the S. extremity consists of a rugged sandy headland interspersed with large boulders. The strait of same name separating it from the mainland is encumbered by numerous islands and rocks, but though thus rendered very intricate is invariably used by the Chinese junks. The largest bay situated on the E shore between Hai Island and Tan Point is 7 m. across.

HAJOS, a tn. Austrian empire, Hungary co. Pesth Belt, about 43 m. S W Kanakemet. The only building of any note is a beautiful architectural summer residence, with a staid and a park. Pop. 2344.

HAKO or OAKO a territory S W Africa Kimberia country between lat. 9° and 10° 25' S, and lon. 15° and 16° 20' E. bounded N by the Coanza, separating it from the Portuguese settlements, W Libello S. the Longa, and E. Bellando; area, about 3000 sq. m. It is ruled by a prince, whose power though nominally absolute is much restricted by minor chiefs. The surface, though generally mountainous, occasionally spreads out into extensive plains. The climate is moderate and healthy. One of the most important products is wax, which is abundant and of the best quality and forms the staple of an active trade with Pango Andango on the N bank of the Coanza. Pop. about 30,000.

HAKODADI a tn. Japan on the W shore of a small peninsula on the S W coast of the island of Yezo, lat. 41° 49' 22" N; lon. 140° 47' 45" E. The appearance on entering the harbor is striking and picturesque. The town

stretching for 3 m. along the base of a lofty promontory with three principal peaks rising to the height of 600 to 1000 ft. These peaks are either bare or covered with snow but the lower slopes are covered with a rich profusion of verdure, encompassing and partly concealing the buildings which nestle below. The houses, about 1000 in number and mostly of one story with attics of varying heights, are arranged in one

junks lying at anchor in its harbor which, if the whole bay is included, and not merely the R.E. arm to which the name of harbor more properly belongs, is the accessibility and safety one of the finest in the world. It is also of ample capacity being 4 m. long and 2 m. deep. Hakodadi is one of the five ports thrown open to British commerce, by the treaty concluded with the Japanese, 26th Aug 1858. Formerly it was a fishing-village of small importance belonging to a Japanese daimio, who sold it to the tycoon in 1854, for the purpose of making it a port of refuge for foreign vessels to water provision and refit. The Russians freely availed themselves of the port, where their men-of-war found good anchorage and occasionally British and French squadrons visited the place. On the 9th October 1855, a convention was ratified between the British and Japanese granting certain privileges the convention was extended into a treaty by Lord Elgin in 1858, and a consulate established in the following year. Here also are Russian French and American consulates, and a few foreign traders numbering in all about 40 individuals, with a native population and Chinese of 45 000 approximate. Beyond the refitting and provisioning of vessels there is but little trade among foreigners; the external commerce being chiefly in the hands of the Chinese, who ship the produce to China. The export trade, amounting to 414,848 dollars in 1884 consists principally of bulky articles of small value, such as camellia or sea-weed timber of various kinds, dried fish, deer skins and horse potatoes, and charcoal.

main street which runs along the sea-side, and in two or three parallel streets hanging along the slope in its rear. These streets are regularly formed and have a width of 30 to 40 ft with open gutters on each side to carry off the drainage into well-constructed sewers which convey it to the sea. Wooden plank fences with gates cross the streets at intervals, and though kept open during the day are closed at night converting each street for the time into a separate community superintended by a special officer called *otono*, who is held responsible for the conduct of all its residents. The houses consist of a framework of timber to which a double row of pine boards is fastened lengthwise. A few of the better sort are neatly rooled with brown earthen tiles, but the great majority are covered with thatch which often seedling (with a new growth from the number of seeds lodged within it, presents a very untidy appearance. The principal public buildings are four Buddhist temples. One of these, called the Zengen-shi, or the Country's Protector built about 80 years ago, and in excellent repair is a good specimen of Japanese architecture and having a tiled roof which overhangs all the other houses, is one of the most conspicuous objects seen on entering the harbor. Another temple, called the Kono-shi or High Dragon, has on its front a large figure of that fabulous animal carved on the front in tablature, stands within an inclosure beautifully shaded with gigantic willows and fir and though somewhat dilapidated must have been a more splendid and costly structure than the Zengen-shi, which seems to have been substituted for it. The shops generally contain only such goods as meet the wants of a poor population. The principal articles are coarse cottons and silks, common earthen and China ware, lacquered bowls cups, stoves, and chopsticks, cheap cutlery and ready made clothing. The provision shops are well supplied with rice, wheat, barley flour pulses, salt, sugar sweet potatoes, charcoal, &c. The general quiet of the streets, and the absence of many of the ordinary signs of busy activity impress a stranger at first sight with an idea that the trade and general business must be of very limited extent. This impression, however, is soon removed, by the occasional droves of Indian pack-horses which are seen entering the town or passing slowly along its streets, and still more by the hundreds of

The other articles are fish-oil tobacco, and a little silk. Recently a trade in salt has sprung up, which is exported to Northern Russia in government transporters. The imports in the year 1884 amounted in value to 90 797 dollars. The chief drawback to foreign trade at this port are the want of accommodation in the inner harbor the faulty and indolence of the native officials, the inadequate administration of justice, the high duties, and the exorbitant exchange

STREET IN HAKODADI - From Noto's Japan.

demanded for native metallic currency. — (Consular Reports: *Hakodadi: A Guide to Japan.*)
HALLEREN a m. Austrian empire Hungary co. Wienburg, on the Little Danube, 4 m. E Altenberg. The inhabitants are chiefly employed in fishing and have several sailing-mills on the river. Pop. 1340
HALIFAX COUNTHOUSE, or BANISTER, a vill. U States, Virginia on the Richmond and Danville railway and r bank Banister River 100 m. S W Richmond. It is high and pleasantly situated, and a place of active trade. The river is navigable for 10 m. above it, and there is a rich soil of phosphate 8 m. distant. Pop. 1600
HALLS, a m. Austrian empire Upper Austria, about Traun, on a height above the Ritzbach 86 m. W by S

Vinana. It contains a palace belonging to Prince Tran-
namdour, a barmhouse, an hospital for children, a poorhouse,
and a celebrated mineral spring. In the vicinity are a ruined
and a fine modern castle. Pop. 1900.

HALLIWELL, a township, England, co. Lancaster
2 sq. N. W. B. B. contains two extensive bleaching works,
and several considerable cotton-mills. There are two churches.
—St. Peter's, built in 1840, and St. Paul's in 1848—which
large schools attached. The Dissenters have two chapels.
Pop. in 1861 6858.

HAMARUWA a ta. W. Africa, cap. prov. of same
name, on the S.E. frontier of the Namu States to which
it belongs, 15 m N of the Banawa, and 100 m W S W
Yola. It stands on a ridge about 800 feet high, which is
continued along the base of the Muri Mountains, and over-
looks a marshy plain which stretches southward to the banks
of the Benue. The area, occupied by it is fully 2 m long,
and 1½ m broad. Immediately outside the town are fine
corn fields, and beyond them on the mountain slopes scrub
pasture on which goats and cattle are grazed. Ivory is
the chief article of trade. The population is estimated at not
less than 8000 almost all Fellatah.

HAMBO a territory S. W. Africa Benguela, between
lat. 17° and 18° S. and lon 16 and 17 E. Its boundaries
are on the N. and E. Bealundo S. Kambia and Kiangala, and
W. Kiala. The S. part of the surface is very mountainous
but the N. stretches out into extensive marshy plains. The
only river of any consequence is the Kave. The inhabitants
belong to the Kikumbia family resembling it both in
their language and customs but to their dialects differing
from it in an important respect. The Kumbunda abhor the
Hambo practice cannibalism. The Hambo are in person
tall and handsome but are of a cruel and rapacious disposition,
following war and plunder as the great business of their lives,
and sometimes extending their forays for hundreds of miles
to the S. to prey upon their unoffending and more peaceful
neighbours. Hambo is believed to contain gold, though no
positive evidence of its existence has yet been given. Pop.
about 120 000.

HAMILTON two places, U. States.—1. A port town
slip, New York, on the Chenango 25 m S W Utica. It
contains 10 churches, the Baptist University of Madison,
with 9 professors 145 students and a library of 7500 vols.
is a theological seminary connected with the university and
a grammar school. The manufactures consist chiefly of leather
chairs, coaches and waggon and tin and sheet iron. Pop.
2256.—2. A ta. Ohio cap. on Butler on both sides of the
Miami, on the Ohio canal and on the Cincinnati, Hamilton
and Dayton and the Cincinnati, Eaton and Richmond rail
ways, 22 m N Cincinnati. It possesses 10 churches, a
planing-mill 3 paper 4 flour and several saw mills 2 cotton
and 2 woolen factories all supplied with water power by
means of a hydraulic canal which gives a fall of 28 feet.
Pop. 2228.

HAMILTON or ARKWARD a river Labrador running
into Esquimaux Bay or Hamilton Inlet, on the E. side of the
peninsula. It is about 1½ m wide at its entrance and
gradually decreases in breadth for about 25 m. when it
becomes from 250 to 500 yards wide, and from this it never
varies very much as far up as it has been followed. Two
hundred miles from its mouth it forces itself through a range
of mountains that seem to render the table-land of the interior
in a succession of tremendous falls and rapids for nearly 30 m.
Above these falls the river flows with a very smooth and
even current; it has been followed for 100 m. further where
a post called Fort Kasapee has been established. Between
the falls and the post it passes through a succession of very
large lakes, communicating with each other by very short
straits. These lakes appear to cover a very considerable
part of the table-land but they have not yet been explored,
and consequently their dimensions are not known. The
Indians report that the river above Fort Kasapee comes
from a long distance to the westward, and runs with a deep
and gentle current, unobstructed by falls or rapids. From
Fort Kasapee the course of the river is to the southward of
E. to the place where it forces itself through the mountains;
it then turns to the E. and finally to the N.E., till it falls into
Esquimaux Bay.

HAMILTON, or Esquimaux, an inlet, Labrador, on the

E. side of the peninsula. The face of the country near it,
towards the N. and W., is extremely rugged and hilly; it is
composed of round-backed hills, traversing the country in all
directions, the intervals being filled with lakes and marshes.
The greater part of this district was once wooded, but fires
have laid bare the rock, and burned away the mossy soil.
To the S. of Hamilton Inlet the country is more level and
more clothed with trees. The head of the inlet is said to
be the garden of the Atlantic coast of Labrador. Several
rivers run into it, the principal being the Kananan from the
S. and the Hamilton or Arkward from the W.

HAMILTON [add] a ta. British America, Canada
West, cap. co. Westworth beautifully situated on the S. W.
extremity of Burlington Bay at the head of Lake Ontario,
and on the Great Western railway 28 m S W Toronto.
It stands in the very centre of one of the finest corn countries
in America, and possesses so many other advantages that it
has nearly tripled its population within ten years. The
streets are laid out with great regularity, part running back
from the bay nearly from N. to S. and part intersecting these
at right angles. The buildings chiefly of stone and brick,
include many imposing structures—churches, government
and municipal buildings, banks, hotels &c. In the environs,
on a height called the *Moussons* are many elegant villas,
with ornamental grounds and productive gardens. Among
the churches 27 in number are 6 Church of England,
5 Wesleyan 2 Episcopal Methodist 8 Baptist (one of these
coloured) 2 Methodist Episcopal (one coloured) 3 Presby-
terian, a Church of Scotland a Free, a United Presbyterian,
a Congregational a New Connection Methodist, a Primitive
Methodist, and a R. Catholic. The educational literary and
benevolent institutions include classical grammar and other
schools a mechanics institute a mercantile library associa-
tion a typographical society a deposit and savings bank a
city hospital and an orphan asylum. Magnificent water
works bring an ample supply of water from the lake. Hamil-
ton has some of the most extensive manufacturing establish-
ments in the province—foundries machine works, locomotive
works &c.—and carries on an important trade. It sends a
member to the legislative assembly. In 1841 it contained
3446 inhabitants and in 1850 10 412. At present the esti-
mated number is 29 000.

HAMMADA an extensive story and almost sterile plain,
N. Africa in the Sahara, on the route from Tripoli to
Marak between lat. 28° 30' and 30° 30' N. Near El
Hammah, the name given to its most desolate tract, it obtains
an absolute height of 1506 ft. Notwithstanding the general
character of this fearful burning plain as it is called it has
one or two small green patches of herbage which give great
relief to the camel. On the S. descent, where the geological
formation of the Hammada is fully displayed, the lowest rock
seen is sandstone, so blackened on the outer surface both
of the cliffs and the immense blocks detached from them that
it might easily be mistaken for basalt. Above this is a
layer of marble. The upper crust is composed of limestone
and slates.

HAMOR (also and *Franco*), two contiguous places, Aus-
trian empire, Hungary co. Baroda, about 5 m N. Miskolc,
with a blast-furnace and other important ironworks, and a
colliery. Pop. 3100.

HANDLOVA a ta. Austrian empire, Hungary co.
Lower Austria, about 80 m N. W. Bohemia. It is a long
straggling place, containing 5675 R. Catholic inhabitants, the
most of whom make frames for saddles and stirrups of wooden
ware.

HANG-CHOW [add] This populous and wealthy city
was captured by the Taming rebels in 1861 and deserted
by all its rich or respectable inhabitants. For three years
during the rebels occupation the place was impoverished, so
that very little produce or merchandise of any value was left
in it; while the unfortunate people who remained were plun-
dered and made to work as slaves for their task-masters,
unless they took arms in their cause. On the suppression of
that rebellion a disciplined force of Chinese, under the com-
mand of French officers, united with the Imperialist troops,
recaptured the city on the 31st March 1864. Since then
the place has partly recovered itself and the inhabitants are
restarting, but it will be long before it again assumes its
former prosperity.

HANKOW (*Month of the Han*) a tn. and river port, Hubei, prov. Hoopeh, at the junction of the Han with the Yangtze Kiang, 804 m. (500 m. by the steamer) above the mouth of the latter, and 884 m. above Hankow; lat. 30° 33' 53" N., lon. 114° 30' E. It is situated at the junction of the river nearly at right angles, and extends about 24 miles along the left bank of the Yangtze (about 12 m. wide) and 13 m. along the left bank of the Han. The native town is long and narrow down to the river bank on one side, and hemmed in by marsh land on the other which is flooded during the autumn when the Yangtze rises to its highest level, being 25 to 40 ft. above its lowest in the spring. For a Chinese town of inferior grade the main streets are unusually wide and the shops display as valuable assortments of merchandise as may be seen in provincial cities; such as that of Wuchang. It has neither walls nor any other semblance of fortification, and consists mainly of two principal parallel streets crossed by a number of curved streets nearly equidistant from each other. The streets themselves are described by Mr. Gilchrist as superior to any he had seen in any other city of the empire. They were well paved and rooted over with manure as they are in Fuzhou or Egyptian cities but still broad enough to be bright and cheerful. The shops were well stocked and upon a much grander and handsomer scale than those at Canton, or any other of the open ports. In addition to that within the town, there is a large floating population, the Han being as densely crowded with junk as it was possible to pack them for about half a mile above its mouth, while in the Yangtze very few are permanently moored. The most anxious care is now required to select a fitting anchorage, which in the summer months is no easy matter: the strength of the current and the above-mentioned water render a safe berth, where cargo may be landed and shipped very difficult to find. The anchorage opposite Hankow appears to be the best. There the bank is more gradual and the water more shallow. Hankow is on the right bank of the Han river: a narrow stream of about 120 yds. in width, and is preferred by some of the residents as being more healthy than Hankow. The land is higher: the air purer not having to pass over a dense Chinese town during the summer months and, above all, the mosquitoes are fewer. In 1857 it fell into the hands of the rebels, who so completely demolished the shops and houses, after razing them of their contents, that they scarcely left one brick standing upon another. Indeed, full evidence of the wholesale destruction inflicted by them is still seen in the walled city of Hanwang, where these fearful depredators found a compact, handsome town about 3 m. in extent, and left a heap of ruins. Wuchang, the capital of the prov. situated on the opposite bank of the Yangtze, did not escape notwithstanding the strength of its fortifications. Immediately upon its being vacated by the rebels, Hankow was begun to be rebuilt, and soon recovered some of its former appearance and activity. The native trade of Hankow is very considerable, as the crowds which throng the shops comprise a great number of small traders from towns and villages further inland who frequent this market. Not only is it a trading emporium but it is famous for its manufactures in metal; and may be considered the Birmingham of central China. In certain quarters the hammering is incessant all day long, where brasiers are at work making cooking utensils, and the large brass pipes so much prized by the Chinese. There are also iron-foundries, where from time immemorial they have cast boilers and gun-pieces which have not been equalled for lightness and strength by the best institutions imported from Britain. Among the manufactures are cottons similar to those of Manchester: dyed blue with indigo which is largely grown; and green by two kinds of bark obtained in the neighbourhood; a species of native cotton velvet, and candies partly composed of an insect wax called *peled*. Among the articles of trade are cloths and other tissues of British manufacture, first obtained partly from the frontiers of Tibet, coal, charcoal, oil, hemp, bones, rice and grain, prepared from Rome in wuchang for export, which appears to be the chief state of Hoopeh; tea of fine quality, also the product of this province; and tin, lead, copper, and iron, chiefly from the mineral districts of Szechuen. The interior trade in these and similar manufactures is entirely in the hands of the natives, as foreigners cannot compete with them.

In the river Han the number of junks loading and discharging cargo at all times is very considerable, indicating a thriving condition in the commerce of the place that makes a great impression on a stranger. Still it is not of the gigantic kind that Mr. Hsu described, where Hankow and the adjacent cities of Hanwang and Wuchang were little known, and which he would have had no belief collectively contained 6,000,000 inhabitants, whereas at a fair estimate they do not contain 1,000,000. Of the whole population but a very small proportion are foreigners, as business is chiefly conducted through native agents and employes. There are 55 firms or branches of Shanghai houses, chiefly British and 5 consulates—British, French, and American. Here is a branch of the Chinese maritime customs, under foreign superintendence, conducted by 1 British and 15 British subjects. There are 3 missionary establishments, 8 doctors, and 1 bank. Altogether the resident foreign population does not exceed 140.

The port was opened to foreign trade by the treaty of Tientsin, ratified in 1860; and of all the ports added at that date it has realized the best expectations of traders. According to the Chinese system of geography it ranks no higher than a town of the fifth order and was considered a suburb only of the walled city of Hanwang. Now it has become the chief emporium of trade for the great tea districts in the central provinces, which formerly sent their produce for export to Canton. On the opening of the port the wealthy native merchants left that city and located themselves at Hankow together with crowds of traders of all kinds who have flocked to this inland foreign entrepôt.

At first the resident residents built warehouses, and rented Chinese residences in the native town but as Lord Elgin had negotiated for a concession of land apart from Chinese jurisdiction, they have moved to a spot below it, which has been laid out in streets like an English town. Foreigners of other nationalities, however have their residences and places of business in Hankow. The British concession at Hankow covers an area of about 90 a. The allotments have the advantage of being held by titles direct from the British government. A large piece of land has been presented by the British government for a church. Although not more than four years have elapsed since the opening of the port, the foreign trade has become one of the most important in China. The aggregate of exports and imports for 1883 was £27,518,627 of which £3,248,493 were the value of tea figures on the list for £2,621,724 tobacco £288,660 oil £274,845 silkworm, £112,108 and rice, £87,843. Of the imports, shirtings figure for £391,876 long oils and Spanish stripes, £331,032 and £196,547 respectively and opium £248,675. But these commodities and others are not sufficient to pay for one-third of the produce purchased, so the remainder is met in treasure and native copper coin, the latter amounting to £284,207, which is absorbed in the tea districts along with Spanish and Mandchurian dollars, which are preferred to open silver. The whole of this trade passed through Shanghai excepting one shipment of tea, which sailed for London direct and with the exception of about 30,000 tons of junk and launches employed, the aggregate of 405,230 tons, upwards and outwards, was American river steamers, several of them 2500 tons burden, and necessarily of great power to stem the strong current. The British concession and its residents are favored into a wonderfully with a council on powers to tax land, houses, and merchandise discharged or loaded at the wharves, for the construction of public works. With this fund a quay has been built along the river front, and the streets laid out, so that in time it will have the aspect of an English town. Pop. (junks and agents) about 450,000.—(*Gilchrist's China and Japan, Captain Bower, Moorman, MS Notes, Chinese and Foreign Customs Returns*.)

HANNIBAL a tn. U. States, Missouri, 7 bank Mississippi, at the terminus of the Hannibal and St. Joseph railway 35 m. N.W. St. Jefferson. It contains 11 churches a city hall, and a market-house; and has several large tobacco factories, hemp presses, machine shops, foundries, pork packing establishments, and saw and flour mills. Pop. (1880) 6508.

HANSEL, a tn. India, N.W. Province, dist. Harpoot, on a branch of the Delhi canal 50 m. N.W. Delhi. It is an ancient place which had risen of importance as early as 1083,

which though deemed impracticable by the Hindus, it was taken by a son of the renowned Mahomed of Ghazna, who found in it lanceless warriors. After experiencing various vicissitudes and becoming almost deserted, the adventurer George Thomas, in 1798, rebuilt its walls, repaired its fuel stations, and made it his capital. At first, he says, I found difficulty in procuring inhabitants but by degrees and gentle treatment I selected between five and six thousand persons, to whom I allowed every lawful indulgence. I established a mint and coined my own rupees, which I made current in my army and country cast my own artillery commenced making muskets, matchlocks, and powder. Thomas attacked in 1801 by an overpowering Marhatta force was obliged to take refuge within the British territories. Some sepooy atrocities were perpetrated here in 1807. The present pop. of Hansi is about 9113.

HANSOUTEE a river India, which rises in the native state of Janghur a few miles S Karnol, in lat. 27° 58' N. lon. 76° 2' E. flows N E and falls into the Delhi canal, a few miles N Delhi, after a course of about 92 m.

HANYANG a tsu and river-port China, prov. Houpeh, at the junction of the river Han with the Yang tsu Kiang 695 m (699 m by the stream) above the mouth of the latter and 880 m. above Nanking lat. 30° 33' N. lon. 114° 19' E. It is situated in the fork formed by the junction of the rivers nearly at right angles and extends about a mile along the left bank of the Yang tsu (here $\frac{1}{2}$ m. wide) and $\frac{1}{2}$ m. along the right bank of the Han. It is a walled city of the third order (a k'ia) the walls coming to a point at the tongue of land between the rivers and thus giving the whole place a triangular form. Within the walls is a rocky mount about 400 ft high surrounded by a fort and crenellated wall which were partially destroyed by the Taiping rebels in 1857. At the same time they demolished the greater part of the walls along the Yang tsu with the adjacent houses, leaving most of the streets a heap of deserted ruins which the inhabitants have not yet removed. From Hanyang Hill a most extensive prospect is obtained of the surrounding country with the great commercial port of Hankow to the eastward on the left bank of the Han here about 120 yds. wide and Woo cheng the capital of the province to the south seen across the wide bosom of the Yang tsu a picturesque and imposing fortified city. Hanyang is not a place of any commercial repute but there are large shipbuilding yards along the Yang tsu river bank, which furnish employment for its industrious population. Here resides the *tao tai*, or chief magistrate of the district, who has jurisdiction over the more populous town of Hankow. Outside the east wall on the right bank of the Han a trading suburb has grown up recently in connection with the shipping in that river which forms the anchorage for native craft in preference to the Yang tsu. A suspension-bridge to connect the two towns has been proposed but not yet begun. Population in city and suburbs about 50,000. (Mossman, M.R. Notes)

HANAR See HUNARE.

HARD a tsu, Austrian empire, Vorarlberg, north Tyrol, on the Bodensee or Lake of Constance. It contains 1800 inhabitants who are chiefly employed in spinning yarn, and in weaving and dyeing cloth.

HARO an archipelago Western N. America, lying between Vancouver Island and the mainland, and between the Rosario Channel on the E and the Haro Channel on the W. The group, which covers a space of about 50 m. in each direction, consists of the three large islands Orca, San Juan and Lopez and about 80 smaller ones. Orca, the northern and largest contains the finest harbours it is mountainous, thickly wooded, with much land in the valleys available for farming; and deer abound in it. Mount Constance, on the E side rises nearly 5000 ft and is conspicuous over the Gulf of Georgia. San Juan in the S W., the best-known and most important of the group, is the second in size, and has abundance of pasture and farming land, occupied by the Hudson Bay Company. Lopez Island is lower and more swampy than the others 8 m long by 8 m in breadth, and forms the S E end of the group. The rest are more sterile, or masses of rock covered with pines. The archipelago has received importance as a possession in disputes between the English and U. States governments the latter alleging that under the indefinite terms of the treaty of 1844 the boundary line passed through the Haro Channel, thus giving the group of islands, and therewith the command of both the channels and the approaches to the British island of Vancouver to the Americans; the English government, on the other hand, claimed the group upon the ground that the boundary line passed along the Rosario Channel the only one known at the time of the treaty which was sufficiently wide not to be commanded by any part of the islands, and therefore not endangered for the Americans, whereas the Haro Channel was so narrow as to be easily covered from San

of 1844 the boundary line passed through the Haro Channel, thus giving the group of islands, and therewith the command of both the channels and the approaches to the British island of Vancouver to the Americans; the English government, on the other hand, claimed the group upon the ground that the boundary line passed along the Rosario Channel the only one known at the time of the treaty which was sufficiently wide not to be commanded by any part of the islands, and therefore not endangered for the Americans, whereas the Haro Channel was so narrow as to be easily covered from San

Juan and therefore liable to be closed against the English. The dispute was at one time seriously complicated by Gen. Harvey with some American troops taking armed possession of San Juan Island during the negotiations in 1859. The solution appears to be the defining the boundary to pass through the Middle and Douglas Channels between the islands of San Juan and Waldron on the W and the rest of the islands on the E, giving the latter to the Americans and the former to the English. San Juan Island being useful to the latter only for defensive purposes, and to the former only for offensive. This boundary line would then coincide with the continental one of lat. 49° dividing the British and American territories.

HARPERS FERRY a tsu U. States Virginia, on the Potomac, where on its junction with the Shenandoah, it forces its passage through the Blue Ridge, and on the Baltimore and Ohio and the Winchester and Potomac railways, 50 m. N.W. Washington. It is picturesque built at the base of a hill with a fine bridge in front which connects it with the opposite bank of the river and contains four churches, an academy two marble halls, a United States arsenal, and an armory. On the night of the 15th October 1862 Harper's Ferry was suddenly seized by a band of men headed by a person of the name of John Brown, who had distinguished himself as an abolitionist leader during the civil war which raged in Kansas. Something like a regular conspiracy for the purpose of obtaining an ascendancy for abolitionist views by violent means had been formed, but the arrangements were futile and the conspirators were easily put down. Brown was afterwards tried and executed. Still more recently Harper's Ferry became the scene of many important

ministry operations in the soil were between the northern and southern coast. Pop. (1890) 1899.

HARBONHULLY, a tn. India, presid. Madras, dist. and 64 m. S.W. Bellary. It was once the capital of a large talook, and still contains about 3000 houses, inhabited chiefly by Hindoos, with a considerable mixture of Mahomedans and a few Jains, native painters and sculptors.

HARRISON River and lake, British Columbia, Western North America, running into a bank Fraser River about 60 m. from its mouth. The Harrison flows through a series of lakes in a generally S. E. direction, and is used with the lakes as the best route to the gold fields in the interior avoiding the dangerous passage along the Fraser above Yale. The Harrison River and Lake are traversed in steamers, a distance of 45 m. to Douglas, whence a broad wagon road or portage has been cut for 23 m. to Port Lillooet at the S. end of Lillooet Lake along the connecting river which is also used in conveying material from one water to the other. The route then lies up the Lillooet Lake as far as Pemberton from which another portage of 23 m. brings to the S. W. end of Lake Anderson, which is closely connected with Lake Sutton; from the upper end of the latter to Cayoosh or Lillooet on the Fraser is an easy passage of only 3 or 4 m. The lakes and portages are surrounded by lofty hills from 1000 to 2000 ft. high, generally very steep with interesting valleys, and vegetation covering the level spots. The scenery on the Harrison Lake is much finer than that on the upper coast, and the lake is larger, being 45 m. long, and 4 or 5 m. broad. There are several islands in it, and long and apparently fertile valleys running down to it, in some of which silver has been found.

HARTFORD [add] a tn. U States Connecticut and alternately with Newhaven the seat of government of this state, on the Connecticut River which is here crossed by a bridge 1000 ft. long, while within the town the Little River which traverses it is crossed by 6 other bridges, 88 m. S.W. Boston, lat. 41° 45' 59" N. and lon. 72° 43' 45" W. Besides the communication by the river, which is kept up chiefly by three lines of daily steamboats and three lines of express packets, two lines of railway—the Hartford, Newhaven and Springfield, and the Providence, Hartford, and Fieldville—give every means of access, the one to the N. and S., and the other to the E. and W. The town extends about 3 m. N. and S. along the bank of the river and more than a mile westward from it. It consists of 163 streets and avenues, for the most part regularly formed and crossing in the direction of the cardinal points. The main street, which is broad and nearly straight, is the great thoroughfare and seat of the principal retail trade, and throughout its whole length, which is more than a mile from N. to S., presents an almost unbroken range of brick and stone edifices, many of them elegant. The buildings and institutions most worthy of notice are the state-house, a handsome Doric structure; the city-hall on the Grecian and the Waterworth Athenaeum in the Gothic style; 32 churches, many of them of imposing appearance with lofty spires; Trinity college, belonging to the Protestant Episcopal church, with 16 yards, a library of 21,000 vols.; a high school, a black-school, a grammar school, two large female seminaries, a E. Catholic school with 600 pupils, an annual, insane and deaf and dumb asylum, an orphan asylum, an hospital, and a convalescent. The manufactures are very extensive, and include mill goods, carpets, linen cloth and thread, millable iron and castings, silver-plated ware, rifles, revolvers, and other arms. The estimated value of manufactures in 1859 was above a million sterling. The banking business is large and profitable, and the revenue derived from this source is greater in proportion than in other places of the United States. The publishing or printing trade is also carried on to a considerable extent. Hartford possesses a central park of 46 ac. it also possesses a public library a benevolent individual having bequeathed £20,000 for its establishment. Estimated pop. (1860) 29,165.

HASHAABA a vil N Africa, on the E. frontier of Kordofan, about 150 m. N.E. Omd. It is a large straggling place consisting entirely of round conical huts called *shuk*, made of a slender framework of palm split together with strips of bark covered with mud. In front of most of them is a flat-roofed shed about 18 ft. square, which in the dry season is the usual sitting-room, and at night is the sleeping apart-

ment of the older children. Each group of huts, forming the *domilia* of a family, is surrounded by a strong fence of dry thorns enclosing a convenient space. In the centre of the village is a school which boys only are permitted to attend, and where nothing but the Koran is taught. Pop. about 1000. —(Fetherick.)

HATRAB, a tn. India, N.W. Provinces, dist. Aligarh, 25 m. N. Agra forms a square of about 500 yards enclosed by a mud wall and a very deep dry ditch. The old fort, which stands half a mile E. of the town, and was once deemed invulnerable, is now in ruins. War and Marhatta oppression had nearly destroyed the prosperity of *Hatrab*; but since it came into British possession in 1817 there has been a considerable revival the surrounding districts having again made it the chief entrepot for their cotton. Pop. 22,903.

HAUPUR, a tn. India, N.W. Provinces, dist. and 30 m. S. Muttra. It is a place of considerable size with a pop. of 18,908. The stand which government has established here has obtained some celebrity. Pop. 15,908.

HAUZAN a tract of country Syria, to the E. of the river Jordan, extending from the neighbourhood of Damascus southward as far as the Jabbel, is now and from ancient times has been divided into three provinces—En Nuhr, the Plain El Lejah, a rocky plain lying N.W. of the Haizan proper and El-Jebel, a mountainous district between En Nuhr and the eastern district. The Plain is very rich and fertile, sometimes slightly undulating, but mostly level, save where relieved by low rounded hills, which form admirable landmarks. It is covered in every direction with Roman towns, built of black basalt, some of them mere heaps of rubbish, others still almost perfect, the Arab villagers dwelling under the same stone roofs as the old Romans. Almost every village has its tank and bridge, both of stone, and both possessing the characteristic durability of Roman handiwork. But other towns are discovered which exhibit a far more ancient style of architecture, not dissimilar to that which is found in the ruins of Palmyra. Such are Un or Ramen El Doh, and Unzel Jemal. The province of El Lejah is inhabited by a wild and lawless class of Bedouin who continually issue from their rocky fastnesses to ravage the surrounding country. Hence most of the towns and villages have been deserted by the terrified Arabs. The third province, El-Jebel the Mountains has recently engaged the attention of travellers, who describe it as rocky and barren, but with fertile spots interspersed, and landscapes of the most picturesque character and romance beauty presenting here the general features of the volcanic formation. Among the principal mountain-peaks may be named—Ahd Turabi, the highest point, Gharra, El-Gurrah and El-Khat. The Druses are the only inhabitants of the Haizan mountains. The Haizan is usually considered to be identical with the Land of Bashan of the Old Testament.

HAYRHILL, a vil U States, Massachusetts at the head of navigation of the Merrimack, and on the Boston and Maine railway 30 m. N. Boston. The village, situated on an alluvial with a background of hills, and finely shaded with green hills, presents a very attractive appearance. The principal buildings within the town are 16 schools, a high school and a savings-bank. The manufactures consist chiefly of boots and shoes, annually made to the value of about half a million sterling; silver ware, soap and candles, hats and caps, common and patent and enamelled leather wares, tin-ware, and cutlery. Pop. 9995.

HAWKES BAY a prov New Zealand New Ulster bounded N. by Auckland, W. and S. Wellington and E. the coast is about 100 m. long, by 60 m. broad, and has an area of 8,000,000 ac. It is at a compact form, and has in general a soil of great natural fertility well suited for agricultural and pastoral purposes. Its climate is free from the extremes both of heat and of cold. Its capital Port Napier situated on its N.E. shore, contains about 500 inhabitants, and possesses a harbour which admits steamers and coasters. The war with the natives has somewhat impeded its progress. Pop. about 6100 of whom 3600 are natives.

HAWKEBURY a tn. British America Canada West, 200 m. from S. bank Ottawa, about 60 m. W. N.W. Kingston. It has three churches, manufactures of woollens and linens and some trade in flour and lumber.

HAWLEY, a vil U States, Pennsylvania on the rail-

way of the Pennsylvania Coal Company which have mines with the Delaware and Hudson canal. It has grown up very rapidly and owes all its prosperity to its position on the route by which coal is transported. Pop. about 2000

HAZAREEBAGH a tn India, cap. dist. of same name, called also Haseeth, 169 m S E Bampur. It consists of houses which though built of mud, are not infrequently two stories high and possesses a regularly-constructed bazaar, a church, which was built when the idea, now abandoned, was entertained of establishing a permanent military cantonment in the vicinity and a jail for civil and criminal prisoners. The site is on an extensive and elevated plateau now overgrown with forest and jungle, but having in many places the remains of mango groves, and other regular plantations, indicating that the country was once much better peopled and cultivated.

HEIDFARFICHSTEIN a tn Austrian empire Lower Austria, circle Upper Marchaburg 70 m N W Vienna, with a palace belonging to Prince Palffy a cloth and five saw mills, and a pop. of 1880

HEILIGENKREUZ, a tn Austrian empire Lower Austria, on the Sattelbach has one of the oldest Cistercian abbeys in Austria with a fine Gothic church, beautiful painted glass, auto-pictures, numerous monuments, and a library of 20 000 vols. Pop. 820

HEINERSDORF a tn Austrian empire Bohemia, circle and 40 m N N E Banzlau on the Prussian frontier, with a parish church 2 miles and 1000 inhabitants.

HELANIYAH an island Indian Ocean, in a bay about 25 m off the E coast of Arabia. It is the largest of the Kuria Kuria group having a length of $\frac{7}{8}$ a breadth of $\frac{1}{4}$ and a circuit of about 25 m. It is remarkable for the ruggedness of its outline and its sterility. Though the only one of the group which is inhabited its whole pop. does not much exceed a score of souls. In the centre of the island a number of sharp peaks rise up one of them to the height of 1510 ft. from these peaks spurs and ridges branch off in all directions, lesser hills filling up the interval. On the E. extremity the contour of the hills suddenly alters, and a bold and precipitous headland, 1645 ft. high, projects into the sea. This headland is composed of a massive limestone stratum bounding in fossils, and thus differs remarkably in geological structure from the rest of the island, which consists of granite horn blende rock, and porphyry. The flora is restricted to stunted bushes of camel thorn some scabrous shrubs, and a few mangroves within tide mark and the more sheltered little coves. The only animals in profusion are rats said to have come from a wreck and centipedes. A few straggling goats probably once domesticated but now wild are found among the hills. The inhabitants subsist chiefly on fish.

HELPA, a tn Austrian empire Hungary co Gmünd on the Gran in the midst of extensive forests with 1600 inhabitants who rear sheep and horned cattle, but are chiefly employed in felling and sawing timber.

HELSDORF a tn Austrian empire, Transylvania, circle and about 12 m S W Kronstadt with a Protestant church an old strong castle, and 2043 inhabitants.

HEINSDORF a tn Austrian empire Bohemia, circle and about 28 m N E Eger with mines of tin and silver and 1500 inhabitants.

HENNAUTTY a river India, which rises on the E declivity of the N Ghats near the W border of Mysore flows successively S E, tortuously E, and again S E and joins the Conary on its left bank near Katsnagapoor after a course of 130 m.

HERAT [sdd] The town and district of Herat, being claimed by Persia as falling under her dominion has more than once been the occasion of serious hostilities. The last of these was in 1866, when in violation of the compact entered into in 1858 between the Persian and British governments, the shah sent an army to besiege Herat, and actually obtained possession of the place in October of that year. This was followed on 1st November by a declaration of war by the Indian governor-general against Persia, resulting in a British expedition to the Persian Gulf and subsequent hostilities there. By the treaty of Paris of 4th March, 1857, which terminated the war Persia agreed among other stipulations, to withdraw all her troops from the city and territory of Herat and relinquish all claims

to its sovereignty. After having been thus alternately subject for a long period to Persia and Afghanistan Herat now enjoys the rank of an independent state.

HERMOBILLO a tn Mexico, dep. Sonora, on a river of that name, not far from the place where it is lost in the sea, in the Gulf of California, opposite to the island of Tharoon. Up to 1800 it was merely a military station, but in consequence of the discovery of gold mines in the north of the state and the number of miners who flocked to them it became the centre of an important trade. The revolutions which have since taken place have greatly affected its prosperity but it is still the largest town in the department. Its chief attractions are the fine gardens of the environs, and a beautiful park or alameda. The only public buildings of note are two churches, and the mint with its assay office. The trade is chiefly in wheat which is grown extensively in the surrounding districts, and in flour in grinding of which a number of mills are constantly employed. Pop. 14 000

HEERLITZ (GASAR) a tn Austrian empire, Silesia, dist. Bieleh, about 11 m N W Troppau with a castle situated in a park, and 1800 inhabitants.

HERNDORF a tn Austrian empire, Bohemia, circle Prague with a parish church and an ancient structure situated between two ponds, and accessible only by two stone bridges. Coal is worked, and hops are extensively grown in the vicinity. Pop. 1000

HETENY a tn Austrian empire Hungary co and 4 m N E Komorn. A battle was fought here between the Austrians and the Hungarians on 20th July 1849. It has 1200 inhabitants belonging to the Reformed church.

HEYLA, a tn Austrian empire, Transylvania, circle and N W Kronstadt with copious warm springs, and a bathing establishment. Pop. 1900

HIDGELEE, a dist. and tn India, pres. Bengal. The river lies between lat. 21° 35' and 22° 23' N lon. 87° 22' and 88° 12' E and is bounded N E by the Hooghly B E by the Hooghly and the Bay of Bengal and W by the Balasore division of Cuttack and dist. Midnapore; area, 1014 sq m. It has a considerable extent of coast, being washed by the Bay of Bengal for 30 m and stretching for many miles along the eastern shore of the Hooghly. The interior is in general low and flat covered with swamps, and intersected by numerous streams, which during the periodical rains become the means of alligations. Many parts are covered with a coarse reedy grass or overgrown with jungle, which harbours tigers, leopards, wild buffaloes and other animals. The most important manufacture is salt. The fisheries on the coast are remarkably productive, and yield in particular large quantities of torus, oysters, and crabs. The most important crop is rice which has a very large grain but is considered inferior in quality. The climate is very unhealthy even to the natives, who suffer much from elephantiasis, dysentery, ague and fever. Pop. 153 265. — The town which forms the nominal capital of the dist. is situated on the W shore of one of the entrances of the Hooghly called the Inner Channel where a small stream falls into it. It does not seem to possess a single attraction and has recently been deprived of the only thing which gave it any importance by the removal of the civil establishment to Cuttack.

HIGLERITAB, a tn S. America, Banda Oriental del Uruguay near l. bank, a little above the mouth of the Uruguay 50 m N Buenos Ayres. It stands about $\frac{1}{2}$ m. inland on a ridge sloping toward the river and has a port completely sheltered. In the vicinity are granite quarries, with inexhaustible supplies of fine building stone.

HINDIA or **HINDRA** a tn India, Sindhia's Damanika, l. bank Nerbuda, have 1000 yards wide, 95 m S E Ogda. It is a considerable place, defended by a fort which commands the passage on the river and possessed of a large and well supplied bazaar.

HINDON a river India, which rises at the base of the Sewalik Hills, lat. 30° 15' N lon. 77° 58' E, flows E, only separated from the Jumna by a slight elevation along which the Doab extends and joins that river on the l. after a course of about 160 m. At a bridge over the river on the route from Meerut to Delhi, the Delhi maulanas sustained their first defeat.

HINDOOR, or **HANAGANT**, a hill state, India, on the S W declivity of the Himalaya, having its centre nearly

interested by the parallel of 31 N and the meridian of 77 E. and bounded N by Khyber E. Rhagat and Mahlog and S. and W. by the Indus, 235 m. m. revenue, 23000. It is traversed by a steep range, which, rising over the 1 bank of the Beil and attaining to Chumburath, the height of 4400 ft., becomes linked with the Sub-Himalaya near Subatho. It is drained by the Beil and some small tributaries, and has on the low grounds along their banks some tracts of fertile soil, on which the usual cereals, and cotton opium, ginger turmeric, oil seeds, and tobacco, are grown. The scenery throughout is very picturesque. Pop. 30,000.

RINDOWN a tn. India, Rajpootana, dist. Jaipur, 71 m. S. W. Agra. It was a large and important place till its property was destroyed by Maratha devastation. Its rampart and many of its buildings are in ruins, but it still contains a considerable population, and possesses a good bazaar.

RINGLAJGURH or **RINGLAJGURH** a hill fort, India, Holkar's Dominion, 130 m. N. Indore. It stands on an isolated rock which rises precipitously from a ravine 250 ft. wide and 200 ft. deep and is accessible only by three causeways constructed across the ravine, each closed by a gate. The natives deemed it impregnable till a British detachment under Major Scobell stormed it in 1804.

RIOGO or **RIOGO**, a to Japan Nippon in the N. W. of the bay and 10 m. from the town of Obozuka, is said to be as large as Yagasaki and is one of the ports which by Lord Elgin a treaty with the Japanese were thrown open to commerce in Jan. 1863. Its anchorage which was once exposed and dangerous, has been rendered safe by the erection of a breakwater which cost not only immense sums of money but the lives of great numbers of workmen. This improved Riogo has become the port both of Obozuka and Misao. When a steamer visited it there were 800 junks in the harbour.

RIRLAU a tn. Turkey in Europe, Moldavia, circle Bolshakof, on an affluent of the Pruth 41 m. N. W. Jassy. It was formerly the residence of the prince of Moldavia.

RIRRIHAL, a tn. India, presid. Madras, dist. 11 m. S. by W. Bellary in a plain at the termination of a small pass. It is enclosed by a wall with a dry ditch and glass and consists of about 1200 houses, occupied chiefly by Hindus of the Lingayat sect.

RIRRIHLENTAND a to Austrian empire, Bohemia, circle and 26 m. N. Eger in a bleak and infertile district among the Erzgebirge with 1250 inhabitants, of whom more than a half are employed in making lace.

RIRSOVA, a to Turkey in Europe, Bulgaria, circle and 52 m. N. E. Silistria, at the mouth of a ravine opening on the bank Danube. It is defended by a castle, and contains 2000 inhabitants.

RIRSAI, a tn. India, N. W. Province, dist. Meerut, on a branch of the Delhi canal 100 m. N. W. Delhi. It was once defended by two forts neither of which now exists but it still possesses a well-supplied bazaar. Some atrocities were perpetrated here during the Sepoy mutiny. The acid dist. around covered with jungle infested by lions, tigers and other wild animals, was a favourite hunting-ground of the emperor Faruk Shah.

RIRBOCZER (RIRBOCZER) a to Austrian empire, Galicia, circle and about 12 m. N. W. Ternopol with manufactures of rope and sherry and 1240 inhabitants.

RIRUF a to Austrian empire, Moravia, circle Hradisch, near Ostrava, with an old castle, a mineral spring and 2100 inhabitants.

RIRUBEN a to U. States, New Jersey on the Hudson opposite to New York city with which it is in constant communication by steamboats. It contains several churches, possesses extensive building-yards, and is much resorted to for pleasure or residence by New York citizens. Its pleasure-garden, situated in the N. of the town and an eminence called Castle Point command fine views of the river and harbour. Pop. 9952.

RIRUCHTADT a to Austrian empire, Bohemia, circle and 4 m. S. Olitzschin with a parish church a townhouse, a ruined castle, a spinning and several other mills, and a trade in yarn. Pop. 1700.

RIRWHISEN a to Austrian empire Hungary, circle, 7 m. N. W. Z. of Sopron, with a mine of argentiferous lead, and 2269 inhabitants.

RIRHOOF a to E. Arabia, prov. Haas 200 m. E. N. E.

RIRHOOF It is divided into three quarters or districts the Kot, or fortress, in which the Wahabite governor resides with his retinue and adherents; the Rirfeyyeh, inhabited by the army and soldier families; and the Naathar, the largest extent, and comprising a mixed body of townsmen, rich and poor merchants and artisans. The general form of the town is that of a large oval. The public square an oblong space 300 yds. long by 75 in breadth occupies the meeting-place of the three quarters, the Kot lying N. E., the Rirfeyyeh N. W. and W., and the Naathar on the E. and S. The Kot is a vast citadel, surrounded by a deep trench with walls and towers of unusual height and thickness, built of earth and an occasional intermixture of stone, the work of the old Ottoman rulers; it is nearly square being about $\frac{1}{2}$ m. in length and $\frac{1}{4}$ m. in breadth; on the N. side of it is a small but strong square fortress, forming a sort of keep. Within dwells the Najedan governor and a population numbering between two and three thousand. This quarter is divided by streets cutting each other at right angles, and running from gates to gates, and from side to side. The Rirfeyyeh or noble quarter covers a considerable extent and is chiefly composed of tolerable, in some places of handsome, dwellings. The comparative superiority of the architecture of Rirhoof is due to the use of the arch and the walls whether of earth or stone, or of both mixed, are very generally covered with white plaster and the door-ways and arched windows are sometimes ornamented. The streets are wide and very clean and the quarter standing on slightly rising ground, is very healthy. The Naathar quarter forms a moiety of the town and contains every description of dwelling from a palace to a hovel. In the part of it near the Kot is built the great mosque, with arched porticoes, plaster and mat-spread floor. Small inclosed gardens are attached to many of the houses, and here and there fig and citron trees overhang the streets. The fortifications of the town were once high and strong but are now little better than a heap of ruins and broken towers. Outside the walls lie the gardens and plantations, stretching as far as the eye can reach on the N. and E. on the S. and W. they form a narrow ring. A short distance from the S. gate stands a small isolated fort of recent construction, but now neglected. The population of Rirhoof was 100,000 in the last generation 80,000 but has since decreased to 25,000 or 24,000. — (Paganini.)

RIRHONBERG a tn. Austrian empire Lower Austria, circle Upper Wienerwald, in a deep valley not far from the Styrian frontiers 89 m. S. W. Vienna. It has an old castle in ruins, a manor-house with fine wood carvings ironworks a gymnasium and a number of saw mills. Pop. 1220.

RIRHENZOLLEN [184] By a compact concluded on 7th December 1849 the reigning prince of Hohenzollern-Sigmaringen ceded in perpetuity all their rights of sovereignty over these two principalities to Frederick William IV. of Prussia and his successors. The principalities are now accordingly included in the kingdom of Prussia. By the same treaty a yearly pension of 10,000 crowns was guaranteed to the first of these princes, and in the event of his having offspring by a marriage corresponding to his rank, an annuity of 6000 crowns was further secured to his heir, whilst to the prince of Hohenzollern-Sigmaringen Prussia agreed to make an annual payment of 25,000 crowns. All the principalities lands lying within the ceded territories, with the exceptional rights and customs produce of mines and forests, and other revenues, were to remain in the free and undisturbed possession of the two princely houses, which were also to enjoy under the Prussian sovereignty the same rank and precedence to which they had hitherto been entitled.

RIRKILANGA a river New Zealand which rises in the N. W. peninsula, forming the extreme end of North Island or Ulva, flows S. W. for 30 m. between the wooded ranges of Waikato and Pungahau, which send down numerous streams, and falls into the sea on the N. W. coast, in lat. 55° 33' 45" S. lon. 173° 23' 55" E. It has a depth in its channel varying from 4 to 26 fathoms, and presenting few obstructions, is navigable for 15 m. from the head. The water is salt to its source.

RIRKOTIKA or **OKOTIKA** a to New Zealand Middle Island, west coast prov. Canterbury, at the mouth of the river of same name. It stretches about 13 m. along the beach, and is composed chiefly of weather-boarded houses

wash gravelled from reefs. In its principal street, Royal Street, are shops on steps of every kind. The town was established in 1864, and is the chief place in the gold-mining district, which stretches along the coast from some distance north of Gray River to the boundary between the provinces of Nelson and Canterbury to the south of the Hokitika River and as far inland as has been examined. For the most part the diggings are not carried on more than 10 m from the shore, while in some localities the beach itself is worked with a remunerative result. The river, which is now fed, coming down in summer with a current of 10 to 12 m an hour, securing a channel for itself out to sea, but in winter it is small, and not being sufficiently strong to keep its channel clear the sandbanks extend and form at its entrance bars which are frequently impassable.

HOLLABRUN (Uffez) a town in Austrian empire Lower Austria, circle Lower Marchtberg cap. dist. of same name, 27 m N W Vienna. It is the seat of several public offices, and has a savings-bank, a porcelain manufactory, factories, and a trade in wine and fruit. Pop. 31,000.

HOLLENSTEIN a town in Austrian empire, circle Upper Wimmerwald, in a mountainous district on the Ipa, near the N frontiers of Styria, 78 m S W Vienna. It is an industrial place containing numerous saw mills and other mills. Coal is extensively worked in the vicinity. Pop. 21,400.

HOLLIDAYSBURG [add.] a post borough in U States, near the centre of Pennsylvania, cap. co. Blair on Beaver Dam Creek, at the terminus of the main line of the Pennsylvania canal and of the Allegheny Portage railway which here crosses the mountains, 180 m W W Philadelphia. It lies at the mountain foot contains 9 churches, a number of schools, and several foundries machine shops, and four mills and is the centre of a large trade by rail and canal most of the produce of a rich agricultural and mineral country passing through it. Pop. 34,800.

HOLONDONIO a town in S.W. Africa Kaffraria country territory Bequa, nearly equidistant from the Kikomo as the Kikomo about 56 m N.E. Benguela. It stands in a fertile district, which is at once well watered and well cultivated, is the residence of a chief who claims to be entirely independent and contains about 1600 inhabitants who in addition to agriculture and the gathering of copal make much use of Dongo sheeps or locusts, as to form no important article of trade.

HOMBORI (Tun) a range of mountains in Western Africa, about 180 m N.E. of Timbuktu lat. 10° 30' N lon.

MOUNTAINS OF HOMBORI—From Barth's Travels in Africa.

140° E are remarkable for the picturesque character of their cones which start up at various points like the towers of a feudal castle often presenting an almost perfect illusion of the square and massive Norman keep. Dr. Barth describes one of these castellated peaks as rising on a sloping ground of boulders and rubble a wall of steep cliffs like an artificial fortification forming as it seemed, a spacious terrace on the

top, inhabited by a spirited race of natives, who in their rocky fastness defy the assaults of the neighbouring tribes. Another mound he describes as rising from the plain like an isolated cone and with its steep, narrow and ragged crest, resembling the ruin of a stronghold of the middle ages. This castellated range extends from N.W. to N.E. for several miles seldom reaching a greater altitude than 800 ft broken up by numerous pleasant valleys, and sheltering at their base, among the dense brushwood the native villages.

HOMEL or Gourt, a town in Russia, gov. Maglar with a church, and a clinic and parish school. At the village of Phlogon, in the vicinity there is an important yearly market. Pop. 3884.

HOMEROD-ALMAS, a town in Austrian empire, Transylvania, circle and E.M. Udvarhely with a remarkable cavern, near which the Barga river passes right through a hill. Pop. 1700.

HONESDALE [add.] a town in U States, Pennsylvania, cap. co. Wayne in the N.E. of the state, at the confluence of the Lackawanna and Dywideo on the Delaware and Hudson canal and on a railway which connects it with Carbondale and Scranton 110 m N.E. Harrisburg. It is nearly built contains 9 churches, an academy a foundry tanneries glass-works, and several flour-mills and is the centre of a valuable coal field which is extensively worked. Pop. (1860) 25,444.

HONG-KONG [add.] The progress of this British colony in China is satisfactory: and its jurisdiction increased from the island to the mainland by a further cession of territory to the queen of England by the emperor of China under the treaty of Tientsin at Kowloon on the northern shore of Victoria Harbour. This tract of land is about 5 sq m in extent, and was for several years temporarily occupied by British troops as a sanatorium. In September 1864 a portion of the ground was sold in marine and island lots at a premium on the charge of a fixed annual rental and purchased by the colonists for villa residences to be built thereon. In like manner numerous villas have been erected on picturesque sites round the western coast of Hong Kong where the S.W. monsoon tempers the extreme heat felt in Victoria town from being situated under the Peak, and facing the N.E. The general salubrity of the island however is now acknowledged and will compare favourably with any of the treaty ports for the residence of Europeans. This arises from the abundant supply of spring water that flows at all seasons from the mountain streams, and the natural drainage caused by the steep rocky shore, where the storm waves rush along impetuously and sweep away the sewage which is the chief cause of malaria and disease in Chinese cities, and which renders the country one of the most unhealthy in the world especially for foreign residents. Notwithstanding this comparative salubrity the records of Hong-Kong show that it is not free from deadly malaria, especially in its effects upon the English troops sent to garrison the colony. During the summer of 1865 a regiment arrived from the Cape in perfect health and in three months it was decimated by the mortality among the troops women and children. This malaria is accounted for by Montgomery Martin as arising from the decomposed rocks being baked by a powerful sun during the day and evolving deleterious gases at night. Be that as it may the Government intend garrisoning the settlement with Indian troops who are less susceptible than Europeans to the dangers of a tropical climate.

According to the census taken by the government in 1868 the entire population of the colony was 134,850 on land with a boat population amounting to 30,607 making a total of 165,457 exclusive of the military and navy on the station. The nationalities of the inhabitants are divided as follows:—Europeans, chiefly English 1644; Portuguese, Indians and mixed blood 1336; aliens or temporary residents 100 Chinese, 152,307 of which the settled boat population on board 4019 boats number 16,328 men, 6529 women 4901 male children, and 2894 female children. The great diversity between the foreign inhabitants as 1 in 50 of all or 1 in 100

According to the census taken by the government in 1868 the entire population of the colony was 134,850 on land with a boat population amounting to 30,607 making a total of 165,457 exclusive of the military and navy on the station. The nationalities of the inhabitants are divided as follows:—Europeans, chiefly English 1644; Portuguese, Indians and mixed blood 1336; aliens or temporary residents 100 Chinese, 152,307 of which the settled boat population on board 4019 boats number 16,328 men, 6529 women 4901 male children, and 2894 female children. The great diversity between the foreign inhabitants as 1 in 50 of all or 1 in 100

of Europeans against the natives, will show that the prosperity of the colony is chiefly owing to the Chinese who resort to this part for the purposes of trade, and only a few of whom become permanently British subjects, although all are amenable to British law. The criminal returns for 1866 show a considerable number of offences having been committed in that year of which 211 were cases in higher courts, chiefly burglary robbery and piracy; and 5015 police cases, principally unlawful possession of property breach of the peace, theft, assault, &c. It will be observed that the Portuguese are not classed with Europeans, which they would be if they were natives of Portugal. These people are natives of Macao, the oldest foreign settlement in China, where the Portuguese blood has a large admixture of Chinese, the result being a phynque which in many cases is scarcely distinguishable from that of the Mongol race. Generally they are of sluggish intellect, but patient scholars, so that nearly all the Macaoese in Hong-Kong read, write, and speak English well. All subordinate posts under government and in mercantile offices with credit, and are good competitors in printing-offices. Next to these are the Parsees, forming the class designated Indians. These people are chiefly engaged in the opium trade, and form a wealthy portion of the community, but without much influence or position, although they claim to be loyal British subjects. Under the head Europeans, there are a number of American citizens, some of whom are the representatives of large mercantile firms; but as far as the commerce of Hong-Kong is concerned and its relations with the treaty ports of China, the English merchants far exceed all others in the gigantic nature of their business. But this colony does not exhibit any trade returns, neither does it contain any of the natural resources for export commerce. The island is a granite rock with scarcely sufficient soil to grow vegetables for its inhabitants, and not an article for export is produced on it. Consequently the port and harbour of Victoria is only a depot for the trade of the adjacent ports, and the head-quarters of the British military and naval forces in China and Japan. There are no port charges or dues levied on goods or ships entering the harbour so that vessels may discharge, load or tranship without any outlays other than those of a harbourmaster, who takes account of arrivals and departures, any aggregate of which would be an enormous impingement of the inward trade of the colony. The revenue for the maintenance of the government is derived from the land rents, houses to sell opium spirits, &c. taxes, postage, fines, fees of office, &c. which amounted in 1865 to £114,366. The expenditure for the government establishments and public works in the same year was £293,478 showing a surplus of £20,896. Besides the local expenditure there are large disbursements on account of the military and naval departments, with docks, hospitals, barracks, &c. There are consulates for America, France, Spain, Prussia, Netherlands, Denmark, Oldenburg, Hanover, Austria, Portugal, Russia, and Belgium. There are also ten banking establishments, one French, one local and the others English. The press is represented by a weekly Government Gazette, 2 daily journals, 1 twice a week; 1 fortnightly—all English, 1 Portuguese weekly and 1 in Chinese every second day. The city of Victoria has an efficient system of water-works for the supply of dwellings and the shipping; and the streets are now lighted with gas. A vigilant police of Indian spears guard the streets at night. These are shrouged with the native population from sunrise till eight at night, when they are not allowed to go abroad without a pass, but the English and foreign community are free to move about at all hours. Altogether Hong-Kong is now one of the best regulated British colonies in the East, with a loyal volunteer corps formed of various European subjects. For Richard Macdonald succeeded Sir Hercules Robinson as governor in 1865, and found that there was room for improvement in the various Government departments, especially those connected with revenue and expenditure. Under his stringent rule defects have been remedied, and the revenue carefully economized. In June, 1866, a mint was established, and issued a dollar having Chinese characters on its obverse and determining its value and place of coinage, with Queen Victoria's head on the reverse.—(*Eclog-Hong Kong Gov. Gen. W. Montgomery Martin's China Annual Messenger, 1873. Notes*)

HONGKONG a vil. Japan, on the peninsula of Ido in the R.E. of the island of Nippon. It stands on the banks of the Inoda-gawa, which is here navigable for flat-bottomed boats and falls into Inoda harbour a few miles below. The inhabitants about 300 in number have succeeded, by damming up the river in obtaining water power, or five water-mills employed in cleaning rice, and sawing on a considerable trade in charcoal, grain, stone, and other products. The country around is finely diversified and highly cultivated, every hill being only a succession of terraces which rise one above another from the base to the summit, and produce rich crops of rice, barley, wheat, and other grain.

HONIGSBURG a town in Austria, Transylvania, circles and about 7 m. N. N. E. Kronstadt; lies near its centre the remains of a castle with a wet ditch a double wall, and seven towers. Pop. 3048.

HOOGHLY [adj.] a dist. and in India, presid. Bengal The dist. between lat. 22° 13' and 23° 13' N. lon. 87° 34' and 88° 30' E., is bounded N. by Bardwan E. the Hooghly S. the Ropnarman and W. Midnapore and Bardwan, length E to W 72 m., breadth 52 area, 1030 sq m. The surface is low and level in the E. but somewhat hilly towards the W and N. W. The principal streams are the Hooghly with its tributaries, Ropnarman, Damoodah, and Dalkhita. The low grounds are naturally fertile and being nearly irrigated produce large crops of rice, but in the S. the soil is in some places much impregnated with common salt. Next to rice, the most important crops are sugar-cane, indigo, hemp, cotton, and the mulberry for rearing silk-worms. A considerable quantity of spirits is distilled from molasses, and from the sap of the date and palmyra palms. The weaving of cotton, once the most important branch of industry has been almost entirely destroyed by British competition, and the only manufacture of any importance now existing is hemp, made into ropes, mackings and coarse canvas. Within the limits of this district are the settlements of Chanderagore, Chinsurah, and Serampore, the first still belonging to the French and the other two formerly Dutch and Danish but now British possessions. Pop. 1,520,840.—The town cap of the above dist. r. bank river of same name, an offset of the Ganges 22 m. N. by Calcutta, is said to have been founded by the Portuguese in 1587 and was wrested from the Moguls in 1633. It contained 1000 mule and 4400 mule packers and the destruction of 84 large and 354 smaller vessels. The British factory was established in 1676 and sustained no serious disaster till 1756, when it was captured by Suraj a Dowah during the raid in which the atrocity of the Black Hole of Calcutta was perpetrated. It long continued to be an important place, but gradually declined with the rise of Calcutta. The principal buildings are 1 fine church, built by the Jesuits during the Portuguese ascendancy and still appearing in as good condition as if recently erected; a college, supported chiefly by the endowment of a wealthy Mahomedan and having in connection with it several religious schools; and the courts and other offices of the civil establishment, accommodated in a range of buildings of pretensions exterior in the Grecian style, but very flimsy and unsubstantial being merely overlaid with chunam or stucco. It now contains only 15 000 inhabitants.

HOONBOOR, a station, India presid. Madras, dist. Mysore, about 100 m. S. W. Bangalore, on the Coimbatore Terr., which is here crossed by a handsome bridge. It contains a very large and complete government establishment, including extensive workshops for the manufacture of brass and iron fittings, a training place for bullocks a depot for camels and elephants, and the tannery from which the army is supplied with boots, shoes and leather necessaries of all sorts.

HOPE a tn. British Columbia, L. bank Fraser River 60 m. S. N. E. New Westminster. It is posted on a steamer one behind its Ogive Peak rises to a height of 5000 ft. to the right stretches the valley of the Que-que-sha, through which lies the road to the gold districts of the Similkameen while in front flows the river its channel divided by a pretty small green island and the hills upon the opposite bank rising to a considerable height, and forming a good back ground to the prospect. Altogether its site is said to be the most beautiful in British Columbia. A wooded level just in front an amphitheatre of lofty mountains. Before the discovery

of the Caribon mines, it was a place of considerable importance, but since that it has greatly declined.

HOPKINSVILLE a *tn* U States Kentucky, cap. co. Christian, on Little River and on the Edgeland and Kentucky railway 165 m. S W Frankfort. It is a regularly formed and well-built place, with eight churches, an academy three female seminaries, a large state insane asylum capable of receiving 800 patients, and a botanic garden. The manufactures consist chiefly of tobacco and carriages. Pop 3289

HORCAITAS (RAE MIORE) a *tn* Mexico, state Sonora, on a height in the middle and well-cultivated valley and near the left bank of the river of San Ignacio, about 70 m. N W Ures. It contains about 2500 inhabitants, who are engaged partly in mining, but chiefly in cultivating wheat, vegetables, and fruit.

HORNSTEIN a *tn* Austrian empire, Hungary co and 12 m. N W Odenburg with a castle, a trade in wine and wood, and 1800 inhabitants.

HORRA BORA a tank or lake, Ceylon Central Province, dist. Battaramulla, about 65 m. E Kandy. A stream flowing between two hills about 8 or 4 m. apart, has been intercepted by an embankment drawn across the valley where, from the approximation of the hills, it is narrowest. The water thus confined forms a lake 8 to 10 m. long by 3 to 4 m. wide exclusive of narrow branches running behind spurs of the hills. The embankment has a width at the base of about 200 ft. and is 70 ft. high. In forming it, advantage has been taken of two vast masses of rock which, standing in or near its line have been included in it. In this way not only has great additional strength been given to the whole, but two spill waters on which neither time nor the grinding action of the flood can make much impression have been obtained through by a most difficult and laborious process. This consisted in cutting two passages, one in each mass of rock, 60 ft. deep, and widening gradually from 4 ft. at the bottom to 15 or 20 ft. at the top, and furnishing them with sluices for regulating the quantity of water allowed to escape. The tank is now comparatively neglected and the embankment has only been preserved from entire destruction by the above precaution used in constructing it. The water in the tank swarms with crocodiles.

HOSCEZULU a *tn* Austrian empire Transylvania circle and 8 m. E S S Krasnodar, cap. of same name, on the Drava, in a mountainous district near the Alutina Pass, with 7246 inhabitants whose rice cattle and trade largely with Wallachia.

HOSUNGABAD a dist. and *tn* India, N W Province, Bangor and Nerbuda territory. The pur has an area of 1916 sq. m., and is in general so fertile and well cultivated that it is familiarly spoken of as the garden of Central India. Coal of excellent quality has been discovered within its limits, but hitherto the great distance from the coast and imperfect means of transport have been insurmountable obstacles to the working of it. Pop. 342 641.—The town cap. of the above dist. stands on the left bank of the Nerbuda here 200 yards wide 105 m. S W Bangor is built in a very irregular and straggling manner and is defended by a quadrangular fort with lofty walls.

HOTZENDORF a *tn* Austrian empire, Moravia circle and a little S. of Mendelsdorf with a Protestant and R. Catholic church, and 1100 inhabitants, mostly Protestant.

HUBBARDTON a river U States which rises in Berkshire, Massachusetts, flows S. into Connecticut, and, after a winding course of about 160 m., falls into Long Island Sound. Its banks present much picturesque scenery and its stream furnishes water-power for a number of large mills.

HOLSTON a *tn* U States, Texas, cap. co. Harris, at the head of a narrow navigation on Buffalo bayou, on the Houston and Texas Central railway 48 m. N W Galveston. It stands in an excellent grazing district, and contains six churches a number of schools iron-foundry, cotton presses, machine-shops, and other industrial establishments. Its easy communication with Galveston by steam makes it the shipping point for several adjoining counties. Pop (1880) 4945.

HOW-CHOW FOO a *tn* China, in the N W of prov Cheking and cap. of the Chinese silk country 120 m. W S W Shanghai. It is surrounded by a wall apparently

not more than 4 m. in circuit, but declared by the Chinese to be 6 m. and to contain about 100 000 families. There is besides a large dam on which, with a canal leading through it in the direction of the Tai-hi Lake. Another canal having all the appearance of a fine broad stream, crosses the place from S to N and forms the chief highway for the boat traffic. It is crowded with boats of all sizes—some discharging goods and passengers at the jetties on its banks, and others hurrying onward deeply laden. Near the S gate the town consisting of houses nearly all of the same height, only overtopped occasionally by a pagoda or watch tower has a rather poor appearance, but towards the centre and particularly towards the N it becomes rich and densely peopled. Many of the shops are crowded with articles of great value and beauty among others manufactured crapes and silks and gorgeous furs. A other principal articles are embroidered shoes hats, umbrellas tobacco-pipes made of bamboo and nicely painted porcelain of all kinds, and indeed everything in common demand. The simple trade in raw silk which, sorted and made up into parcels is sent for sale to Shanghai. It has been estimated that four-fifths of the silk produced in the district is exported to Europe and America.—(Fortune's Residence among the Chinese, 1833—1806)

HOWIESKI a *tn* Austrian empire Moravia circle Kraschowitz with a castle, a Reformed and R Catholic church, and 3173 inhabitants.

HOWLAND an *sl* Pacific Ocean, lat. 51 N., lon. 176 52 W 40 m. N W Baker's Island. It is 1½ m. long by ¼ m. wide has an area of 400 ac above the crown of the beach and contains deposits of American guano but no fresh water.

HOWRA a *tn* India, presid. Bengal d. Twenty four Parganahs, by bank Hooghly opposite to Calcutta, of which it may be considered a suburb. It is a considerable place inhabited chiefly by shopkeepers, and containing a number of handsome villas. New importance has been given to it by its selection as the terminus of the Grand Trunk railway to the north-west.

HRABIN a *tn* Austrian empire, Silesia, dist. and near Troppen, with a pilgrim church a statue of the prince of Liechtenstein, and 1800 inhabitants.

HRADEK (N. W.) a *tn* Austrian empire Bohemia circle and 15 m. N N E Károggrätz with a parish church, a ruined castle, three mills, and 1300 inhabitants.

HLAGNAPAN a *tn* Mexico state and 60 m. N W Oaxaca, cap. dep. of same name. It is a considerable place regularly built, and containing many handsome houses.

HLAHUACHIN, an old Indian *tn* Mexico, dep. and 87 m. S W Chihuahua, in a mountainous district near the source of the Fuerte. It is situated in the centre of a valley and by its appearance indicates at once the industry and comfort of its inhabitants. Cattle and poultry around the gardens are well stocked with peach and apple trees and every available part of the valley is under cultivation. Pop. 406

HUATULCO (SANTA CRUZ DE) a *tn* Mexico, state and 90 m. S S E Oaxaca, near the mouth of a small stream in the Pacific. It was substituted for another town of same name which stood farther up the stream, was opened to trade in 1804 and promises to become important.

HUATUSCO a *tn* Mexico, dep. and 55 m. W S W Vera Cruz at the height of about 4000 ft. above the sea. It consists of a number of houses substantially built of stone and possesses two churches, a well-supplied market, and a considerable trade. The cultivation of maize and tobacco, and trade, form the chief occupations of the inhabitants, who amount to about 6000.

HUGRY a river India, presid. Madras which rises in Mysore, flows westerly N E and N passing into dist. Bellary and joins the Tungabhadra on its right bank after a course of about 220 m.

HUISTAN a *tn* Mexico state Chiapas about 16 m. E S Christoval with 2000 inhabitants.

HUIZO or GUANAGOTILAN a *tn* Mexico state and 27 m. N W Oaxaca, on the Attoyac, at the foot of a mountain chain. It has the remains of a Dominican monastery which was once richly endowed and the church of which is now that of the parish. Its gardens now a mere waste were famous for its European fruits. Pop. 5000

RULHULLY vil India, presid. Madras, dist. and about 80 m. N.W. Bellary on the post road from Madras to Bombay and on the r. bank of the Toombudra, over which there is here a much-frequented harbour. It is isolated by water and contains two pagodas. The inhabitants are engaged in agriculture.

RULIA ANDRA, a tn. India, Nizam's Dominions, about 50 m. N.W. Bellary. It is isolated by a wall with a dry ditch and garrison, and contains about 200 houses.

RULLEIN a tn. Austrian empire Moravia, circle and 13 m. N. Hradec on the Emaava, and on the Vienna and (Merberg railway with four yearly markets, and 2117 h. inhabitants.

RULLUP or **ULUP** a in Western Africa. Bornu prov. Kokoche about 75 m. S. from Lake Tchad. It is enclosed by a high clay wall and almost hidden by wide-spreading fig-trees. The inhabitants are said to practice witchcraft and sorcery and have thereby given themselves so bad a name that natives in travelling along the road are unwilling to make it their place of encampment even during the heat of the day.

RUMAGUAGA a tn. Le Flats, prov. and 110 m. N. by K. Saka, beautifully situated in the midst of luxuriant gardens and cultivated fields. It is a clean rural place with neatly whitewashed houses, and a conspicuous church with a steeple. The water-melon and a kind of peach grow in abundance. To the E. and S. of the town are plains of prairie grass so tall that a man on horseback might be concealed in it.

RUMERPOOR a dist. and tn. India, N.W. Provinces.—The river here between lat. 25° 7' and 26° 28' N. lon. 79° 20' and 80° 25' E. and is bounded N.E. by the Jamma, N. and S.E. by the S. the native states Chakrawa and Chattrapour, and W. Jamma and Jalauri area. 3240 sq. m. It consists generally of a plain rising gently southward as it recedes from the Jamma, till it reaches the Bendahaj and Panna ranges. It is drained by the Jamma and its tributaries, chiefly the Betwa and Gase. The soil is for the most part a rich friable mould formed of disintegrated volcanic rocks and alluvial deposits. It is, of course, remarkably rich, and yields heavy crops of cereals and pulses, together with sugarcane, cotton, and indigo. The chief exception to the general fertility is in the localities where lankar or calcareous tufts prevail, and forms a soil which yields little more than a scanty herbage and stunted shrubs. The cotton, which is usually an abundant crop of excellent quality is largely exported being first conveyed to Calcutta and other places on the Jamma, and thence transported to the lower provinces. The climate is trying to European constitutions, as intermittent fevers are very prevalent. Pop. 461,091.—The town cap. of the dist. stands in the fork formed by the confluence of the Betwa with the Jamma, 39 m. S. by W. Caspura.

RUMPHREY an island, Pacific Ocean in the American Polynesia; lat. 10° 30' S. lon. 161° 2' W. It was discovered by Captain Patterson in 1832.

RUN-CHUN or **HWA-CHUN-CHUN**, a tn. Chinese empire, Katchow, on a river of same name, at its junction with the Tumen which here forms part of the boundary between Russia and China, lat. 45° 45' N. lon. 130° 20' E. Though the only recognized place of trade between Korea and China its permanent residents consist only of about 100 Tartar families, with a number of the second class and about 800 soldiers to maintain order. The main cause of this insignificance is the absurd arrangement of the Chinese government, which permits some mandarins by special privilege to trade annually for not more than five days, and restricts all other traders to half a day and that only every second year. On this occasion, the Chinese, who repair either from Mingpang by a slow and laborious journey in clumsy waggons, supply the Koreans with dogs, cats, pipes, leather shoes, horses, copper boxes, knives, and some, and receive in return clothing, bakelite, kitchen utensils, rice, corn, swine, paper, mats, ome, furs, and ponies.

RUNSBOEF (HARPAU) a tn. Austrian empire Hungary on Elpe on the Poprad with several fine manor-houses, manufactures of linen and a trade in flax. Roman and Hunnish antiquities are found in the vicinity. Pop. 1800, mostly Lutherans.

HUNTER, a group of islands, Tasmania off the N.W.

coast at the W. entrance of Bass Strait. It consists of three principal and of several smaller islands all rounded conspicuous by their elevated surfaces.—Albatross, the northernmost, is lat. 40° 22' S. lon. 144° 04' E., is 126 ft. high, and presents a coastline of precipitous cliffs, rocky and abutting with a skirt of breakers.—Step island another of the group, 11 m. from Albatross is 250 ft. higher and justifies its name by the steepness of its lofty margin.—Hunter, which, as the largest, gives name to the whole group, and is 6 m. nearly due E. of Albatross is about 16 m. long from N. to S. and not more than 4 m. broad in the N. It exhibits a striking picture of sterility and desolation; but its S. coast is formed by hills of moderate elevation and well wooded.—Three Hammock island in some respects the most remarkable of the Hunter group is 2 m. E. from Hunter island from which it is separated by Peron Channel. It is about 6 m. in length and nearly the same in breadth and derives its name from three hills on its E.E. side, which rise gradually till the northernmost is 500 ft. above the sea, and becomes visible in clear weather at the distance of 27 m. The southernmost of the three hammocks named by Flinders from its conical shape, Sugar Loaf Hill attains the still greater height of 790 ft. and is visible at the distance of 30 m. The best anchorage afforded by the group is in Peron Channel sheltered by Hunter island on the W. and Three Hammock island on the E.

HUNTSVILLE, two places U. States.—1 A tn. Ala. bama, cap. co. Madison, on the Memphis and Charleston railway 120 m. N.N.E. Tuscaloosa. It is a well built place, with a handsome court-house 7 churches a female seminary and a market house. Pop. (1860) 5694.—2 A tn. in the E. part of Texas, cap. co. Walker 110 m. N.W. Galveston. It is pleasantly situated on high ground is well built, and contains a Presbyterian college. Methodist female institute, and a large state penitentiary. The surrounding country is covered with cotton plantations. Pop. (1860), 929.

HURREENANAH a dist. India, N.W. Provinces, between lat. 28° 33' and 29° 49' N. lon. 75° 20' and 76° 22' E. is bounded N.W. and N.E. by Sirhind K. Rohituk and Dadra S. Dadra and Lohoreo, and W. state Dikmeer and dist. Bhitunasa, area, 3300 sq. m. The soil is fertile for the most part of alluvial matter derived from the lower ranges of the Himalayas by the Lohoreo Chitang and other streams and is admirably adapted both for agriculture and grazing yielding large crops of rice, wheat, barley millet, pulse, &c. and rich luxuriant grass not surpassed as pasturage in any part of India. The great drawback is long-continued drought during which vegetation withers and dies. The jungles of Hurreenamah were favourite hunting-grounds of the emperor Feroz Shah and still harbour some lions and a great number of tigers and other wild animals. Pop. 225,086.

HURRUR HARAR, or HORRUR [add.] a city E. Africa, the ancient capital of Hadiyah lat. 9° 20' N. lon. 48° 17' E. It stands on a gently declining slope about the height of 5500 ft. above the sea having on its E. side cultivated fields, on the W. a terraced ridge laid out in orchards on the N. a detached eminence covered with tombs, and on the S. a low valley traversed by a mountain torrent. Its area, enclosed by an irregular wall pierced with five large gates and flanked by oval towers is about a mile long and half a mile broad. The buildings of every kind are composed of rough stones cemented, like the ancient Galla cities, with clay and the streets, which follow the irregularity of the ground, are narrow winding lanes nearly choked up in many places with heaps of rubbish. Most of the dwelling-houses are of two stories with flat roofs and bays high up in their sides for windows, on which occasionally some wretched decorations of wood-work have been attempted and stand at the end of large courtyards to which access is given through gates of heavy timber. In addition to these houses there are numerous *gumbies*, or bell-shaped thatched cottages for the poorest classes. The principal buildings are mosques. With these the city abounds, but not one of them is deserving of a passing notice except the *jamé* or cathedral. Even it, though built by Turkish architects from Mecca and Hadramaut, is devoid of merit and with its broken-down gates and two minaret-shaped like truncated cones, has a poverty-stricken appearance. The inhabitants are a distinct race, and speak a

different which is found nowhere else within its walls. Their exterior is very unimpressive. Among the men, says Burton, I did not see a handsome face; their features are coarse and debased; many of them squint, others have lost an eye by smallpox, and they are disfigured by scrofula and other diseases. The bad expression of their countenances justifies the expression, "Hard as the heart of Harar." He gives a more startling account of the women, and says that they appear beautiful by contrast with their lords. High and low indulge freely in intoxicating drinks. Harar is governed as an independent sovereignty by an emir who rules despotically and seeks to hide his Galla or pagan extraction by claiming descent from Caliph Abubakar. The trade of the place is extensive. As of old it is still the great half-way house for slaves from Zangara, Garagus and the Galla tribes Alo and others. The principal exports are slaves, ivory, coffee, tobacco, seeds (of flower or bastard cotton), skins and woven cottons, milks, honey, wheat, barum (a kind of bread used by travellers), gum, honey gum (chiefly manila and myrrh) and tallow of all sorts the imports, American sheeting and other cottons white and dyed, muslins, red shawls, silks, brass, sheet copper, cutlery Birmingham trinkets, beads and corals, dates, rice, loaf sugar, gunpowder and paper. Among the above exports, special notice is due to the tobacco as a branch of native industry for which Harar is celebrated. The hard worn robes and meshes of Harar, says Burton, are considered equal to the celebrated cloths of Shoa. On the windward coast one of these garments is considered a handsome present for a chief. The Harar robe consists of a double length of eleven coils by two in breadth, with a border of bright scales, and the average value of a good article even in the city is eight dollars. They are made of the fine long-stapled cotton which grows plentifully upon the hills, and are soft as silk, while their warmth adapts them for winter wear. The thread is spun by women with two wooden spindles the loom is worked by both sexes. Three caravans leave Harar every year for Berberah. The principal one, conveying slaves, mules, etc., numbers about 8000 souls and is commanded by one of the emir's principal officers. Pop. estimated at 8000.

HURUNCI a river New Zealand which rises in the Tekoa Mountains in the N. of Middle Island or Munster in the province of Nelson, flows rapidly E. for about 30 m. and falls into the sea about 55 m. N. of Banks Peninsula. It is navigable only by boats.

HURH a town Turkey in Europe, Moldavia, cap. circle Paltal near bank Pruth, 42 m. S.E. Jassy. It is the seat of a civil and a criminal court, has a normal school, and carries on a considerable trade in tobacco, which is considered the best in Moldavia. In 1714 Peter the Great was shut up in the vicinity with his army which must have surrendered at discretion had not the dastardly of the emperor Catherine and the stupidity of the Turkish generals enabled him to escape. Pop. about 4900.

HURHIN DRY a vil. N. Africa, Algeria, prov. and about 4 m. from Algiers, beautifully situated at the foot of the slopes of the Kabal. The palace of the bey from whom it takes its name, is still standing and it also contains a number of handsome villas. The inhabitants are chiefly employed in rearing cattle, for which the district is well adapted and number 1243.

HURHATYIN, a town, Austria, empire, Galizia, circle and 19 m. E. by N. Chortkoff on the Podolice and the Russian frontier, with a beautiful baronial castle, an ordinary soil 2644 inhabitants.

HUSTOPETSCH a town, Austria, empire, Moravia, circle and about 7 m. W. N. W. Neustadt, in a beautiful valley and far from Bratsova, with a castle, a walk-mill, and 1000 inhabitants.

HUTSOD a river, India, which rises in the petty native State of Kora, on the S.W. frontier of Bengal flows S. into Nagpore and, after a course of about 160 m. joins the Mahanady at lat. 21° 50' N.; lon. 82° 40' E.

HUTT a river New Zealand, which rises in the Remutaka Mountains on the S. of North Island or Ulster, flows S. W. through the beautiful and fertile valley of the name, and falls into the head of Port Nicholson in Cook's Strait. It is navigable the nearly 3 m. by large cargo-boats.

HYDERABAD [old] a town, India, cap. Nizam's Dominions, stands upon the r. or S. bank of the Mireel, at an elevation of 1075 ft. above the sea in the midst of a highly picturesque country overgrown with granite hills and forested rocks of various forms. Its palaces and mosques, seen in combination with the buildings of the British residency give it an appearance of much grandeur but it contains a mixture of stately houses with low and dirty hovels in narrow

STREET IN THE KURNA HYDERABAD.—From Taylor's Sketches in the Deccan.

irregular streets, some of which are paved. It is surrounded by a weak stone wall forming an irregular quadrangle, about 24 m. long upon the river and 2 m. broad. A handsome bridge erected in 1831 by Major Oliphant, connects the city with a crowded suburb on the l. bank of the river in which stands the residency. The bridge is built of granite on eight elliptical arches, each 56 feet span, besides a land arch of 75 ft. span. Its total length is about 606 ft. and breadth 24 ft. The river when full is between 400 and 500 ft. wide. The residency is walled and approached through two gate ways. It is a handsome building on the plan of the government house at Calcutta, with wings rising on an arched basement to which there is an ascent by a noble flight of twenty-two steps. Its principal front, which turns away from the city has a richly ornamented Corinthian portico, much too large for the house. The columns are of polished chunam, and are flanked by two colossal sphinxes all resting on a pavement of black and white marble. The palace of the Nizam is of great extent but in the usual style of native buildings. The Chattri or Mausoleum of Nizam, the most complete monument of antiquity in Hyderabad, was built by the founder of the city about 1690. It stands at the junction of the four principal streets of the town which pass through the great square on which the building is supported and has a very striking appearance. It was erected for a Mughal cemetery or college, but is now used for warehouses. There are many fine gardens and pavilions belonging to rich natives in the environs of the city. The country west of the Nizam's prime minister's bungalow within high walls, and containing galleries, terraces, fountains, etc., and otherwise richly adorned, being amongst the most beautiful. In 1861 a treaty was concluded with the Nizam, providing in reward of his loyalty during the mutiny, for the restoration of certain territory and cancelling a debt of £200,000 due to the British government. Pop. about 200,000 chiefly Mahomedans.

HWANG-CHOW a tn. China, prov' Hwang, 1 bank Yang-tze-kiang, 30 m. S.E. Woo-chang. It was a large and flourishing city till it fell into the hands of the rebels, who, on being obliged to evacuate it, completed the work of destruction. Its pagoda, however, which boasts to be the finest on the river, escaped, and is in excellent preservation. The navigation of the river near this town becomes extremely intricate and even dangerous.

HWANG-SHI KANG a tn. China, prov' Hwang on the Yang-tze-kiang, 85 m. S.E. Woo-chang. A handsome river wall of sandstone, surmounted by a balustrade, gives the place,

when approached by water a most imposing appearance. Its streets are remarkable for their cleanliness; the shops are generally superior to those seen in other Chinese towns further down the river; and the number of junks at anchor indicates a high degree of commercial activity while the whole town has an air of prosperity and opulence. Much of this is doubtless owing to the immunity which it has enjoyed from rebel violence. A considerable trade is carried on in grain and large quantities of cotton and indigo are grown, but neither tobacco silk appears to be produced. Coal is worked about 6 m. distant.

I

IBARRA a tn. S. America Ecuador esp. prov' Imbabura. In a beautiful plain to the N of Quito. It consists of straight and spacious streets, and houses built of adobe and covered with tile, some of them of two stories; and contains a parish church, occupying one side of the public square; a college in which Latin, Spanish and philosophy are taught, several convents appropriated for the use of the public schools, a governor's house, an hospital, and a beautiful park. The manufactures are hats, jewelry and lacework, medicines, cotton goods, and salt. Pop. about 15,000.

ICHANG a tn. China, prov' Hwang, 1 bank Yang-tze-kiang, 1100 m. (by river) W Shanghai in lat 30° 41' 5" N lon 111° 5' E. Most of the trading junks from Szechuan prefer stopping here, though some proceed to Shian, and a few even as far as Hankow. Ichang is an important haven for the trade of W China, and a great number of boats lie at anchor before it. Opposite to the town, and a mile below it, the breadth of the river is in May and June about 500 yards, and the depth of the channel is in March nowhere less than 34 fathoms. Abundance of coal is found in the vicinity but the quality is apparently indifferent.

IGBTIMAN a tn. European Turkey Turkish Servia, on the Wld, 23 m. S.E. Sophia. It has several mosques, and contains 5000 inhabitants, partly Bulgarian, partly Turk.

ICOLLO-RENGO a tn. S.W. Africa, Portuguese settlement, prov' Angola, r bank Bengo, 35 m. E. Lourenço. It takes its name from having once been the residence of a native king and as a place of some importance. One of its industrial establishments is a large sugar manufactory the flat alluvial banks of the Bengo being well adapted for sugarcane. It contains a pop. of 6530 blacks, 173 mulattoes, and 11 whites.

IDIAHO a territory U States, organized in 1863; area, 526,874 sq m. It is formed of the eastern halves of old Washington and Oregon territories, the western half of Nebraska, and a small section of northern Utah. It lies immediately E of Utah and Colorado, and extends in a northerly direction to the British possessions. The territory owes its rise and importance to the rich gold fields of the Salmon river previous to the discovery of which a few years ago it was inhabited only by Indians. The scenery along the Salmon river in the vicinity of the gold mines is very grand, the stream in some places flowing between perpendicular walls of rock from 200 to 2000 ft. high. Coal, copper ore, and salt are also found in many localities. Plutonia has been gathered in small quantities in the streams by the Indians and it is thought that extensive deposits of this valuable metal exist. The higher mountain ranges of the territory are black and barren, but the lower hills are generally well wooded, and the soil of the valleys is productive.

IGALIKO Greenland. See JULIANNAAB in Supp.

IGBOER a tn. Western Africa, advantageously situated nearly opposite the rim of the once famous market town of Olokoba, at the confluence of the Benue and Kwara, 340 m. above their mouth in the Gulf of Guinea. It stands on a slope at the base of a range of hills, with large fields of maize in the back-ground, and a great number of bush-trees, the trunk and thick foliage of which are very striking. The market is well supplied. Among the articles exposed for sale are

palm-oil, shea-butter cotton and cotton cloths, mats, bags, mahabehn, corn pepper yams, tomatoes, papaya, plantains, and bananas. Pop. about 4000.

IGBIRA a dist. Western Africa, which lies in the fork formed by the confluence of the Benue with the Kwara, and stretches E for about 50 m. along the r bank of the former. The inhabitants are highly civilized friendly civil and most industrious, and are the medium of an important trade with Europeans. The inhabitants, with few exceptions, are pagans, but have comparatively few barbarous rites.

IGBO a territory Western Africa, extending E and W from the Old Kalabar river to the Kwara, and also to a small extent across and beyond it so as to bound with Abo on the E. It comprehends part of the Kwara delta. The inhabitants, belonging to different races have a mixture of dialects, but are all pagans, and practise numerous superstitious rites and customs, including sacrifices of fowls, sheep, goats, and bullocks. Their most celebrated shrine is at Aro or Aro, where their deity called Tchukol though regarded as omnipotent and unapproachable, is believed to have his special residence.

ILA a tn. Western Africa, Yoruba, cap. dist. Igboema, about 130 m. W of the Kwara, lat 8° N lon 4° 55' E. It is a large but poorly built place, the only house within it deserving of notice being that of the chief, which is large, well kept, and substantial with a portico in front. Cotton is extensively grown in the district, and promises to become an important article of trade.

ILANGA a tn. Austrian empire, Serbian Banat Military Frontier 30 m. N.E. Balgrade with two Greek churches and 2340 inhabitants.

ILARIONE (SAN GIOVANNI) a tn. Austrian Italy prov' and 17 m. W by S. Vicenza with coal-mines and 8290 inhabitants.

ILESHIA a tn. Western Africa, prov' Yoruba, cap. dist. Ilesha. It is a large and important place, surrounded by walls and encircled by towers. The streets ascend the name being many yards bounded by grass 10 or 15 feet high but the houses are remarkable both for their size and the intricacy of their construction. That of the chief occupies nearly a half mile square, and is enclosed by a wall upwards of 30 feet high. Imposing both by its height and size, and regularly built, it really looks, as Mr May expresses it "a palace in Africa. The people have a wider aspect than is common to the Yorubas. This is probably owing to an increased amount of negro blood, and the practice of wearing kilichashes for head-dressings. The women wear a cone-shaped belt with its stem inserted in a hole in the left nostril.

ILLAPEL a tn. Chile, prov' Coquimbo, cap. dist. of same name, on the river Illapel, about 11 m. above its confluence with the Choapa. It possesses three churches, two higher and four primary schools, and has a pop. of 3430.

ILLAVA a tn. Austrian empire, Hungary co. and 19 m. N.W. Temeswar, on the Waag with a district court, a court, a brewery and a very large central house of execution for Hungary, the Banat, the Temeswar Banat, Croatia, and Slavonia. Pop. 1700.

ILOCOS [464] two provinces in the island of Luzon,

Philippine Isles, Indian Archipelago:—1 *Illoco-Norte*, or *Illoco-Norte*, bounded N and W by the ocean, E by the *Illoco-Sur* and S *Illoco-Sur* area, 1598 sq. m. Its surface is generally rugged and mountainous, two chains of considerable elevation running through it. The mountains are covered with dense forests, in which open and other dry-woods abound and there is much valuable timber. The principal agricultural products are rice, wheat, sugarcane, coffee, cacao and cotton. Horses are raised in great numbers. The climate is moist and cloudy and in winter colder than might be expected from the latitude. Hill storms are not uncommon. The prov. has however the advantage of being sheltered from the N.E. monsoon by the Cordillera of Caraballo. Pop. 187 568.—2 *Illoco-Sur* bounded N by *Illoco-Norte*, E. by the Caraballo range, separating it from Abra, and W by the ocean area, 678 sq. m. On its coast are several harbours, of which the best and safest are Balanacan and Cuzurmes both of them with sufficient depth for large vessels. The climate though much broken by spurs from the Caraballo and covered to a great extent with dense forests contains much fertile soil that the province justly ranks as one of the most fertile and best peopled in the Philippines. Its climate is temperate, less moist than that of *Illoco Norte*, and has like it the advantage of being sheltered from the N.E. monsoon. A considerable quantity of gold is washed from the sands of its rivers. Pop. 198 373.

13 MIA a river Russian empire Manchuria, said to be formed in a mountainous district by two streams, flows W. S.W. and joins the Ussuri, of which it is the principal tributary on the right. It is navigated only by the small canoes of the Orochi, Goidi, and Chinese, but is probably navigable by larger boats. Opposite to its mouth on the Chinese side of the Ussuri is the Manchou village of Juma, perched on a prominent point of some hills composed of red sand. Glomang is cultivated in the vicinity.

14 INAGUA two isls. West India, belonging to the Bahamas and near or off Cape on the S.W. and S. S. Domingos on the S.E.—1 *Great Inagua* is of very irregular shape, stretching about 45 m. between its N.E. and S.W. points, but diminishing in breadth from 18 m. near its centre to a narrow strip of land which for 10 m. in the direction of its N. extremity is not more than 4 m. wide. Its loftiest summit does not exceed 132 ft. above the sea, while the average height does not exceed 30 ft. On its E. side it is skirted by a dangerous reef. Its best anchorage is in Matthew Road 2 m. N. of its S.W. point where Matthew Town is situated in front of extensive salt-ponds, and is defended by a fort.—2 *Little Inagua*, somewhat of a quadrangular shape, is 8 m. long from E. to W. by about 5 m. broad, presents a bold and rocky shore on its N.E. and S.W. sides, and on the S.E. is skirted by a dangerous reef on which the sea breaks heavily. It is not inhabited but there are said to be wild hags upon it and water.

15 INCARIANO (San Marino) an. Austrian empire Italy prov. and 8 m. N.W. of Ancona, with a court of justice, a parish church and palaces built by Palladio. Pop. 2106.

16 INDEPENDENCE a U. S. State, Missouri cap. Jackson, near the W. frontier of the state, and about 5 m. S. of the Missouri. It possesses several churches and hotels, and carries on an active trade, its position making it an entrepot between New Mexico and Utah and the eastern states. The Mormons, who settled here in 1857 were violently expelled by the inhabitants. Pop. 5154.

17 INDIA (as India) In 1858 the government of British India was transferred by the English legislature from the East India Company to the Queen. By the terms of the act of parliament, all the powers of the company are exercised by her majesty and all revenues and tributes are received and disposed of in her name for the purposes of the government of India alone. The executive is invested in a secretary of state for India, and a council of state consisting of 15 members, seven of whom are elected by the directors of the East India Company from their own body and eight are nominated by the crown vacancies among the nominated members being filled up by the queen, and other vacancies by election by the rest of the council. But the major part of the council must be of persons who have resided ten years in India and have not left it more than ten years previous to the date of their

appointment. Each member has a salary of £1200 a year payable, as well as that of the secretary of state, out of the revenues of India. In India the government is administered by the governor-general and a supreme council of 11 to 16 members at Calcutta, subject to the direction of the secretary of state for India. The sovereign of Great Britain is empowered to appoint from time to time an auditor of the accounts, with power to inspect all books and examine all officers, and his report is to be laid before parliament. The account of Indian revenue and expenditure must also be laid before parliament annually. Under the new form of government the affairs of the country have been improved in every particular. The situation has been promoted among the natives railways have been constructed electric telegraph lines opened, roads improved and new ones made; and trade and commerce generally increased.

In 1858 there were 10,586 miles of government telegraph line in the country worked by 3973 persons employed.

In 1856 there were in India ten railway companies guaranteed by government, and one not guaranteed. The latter designed to connect Calcutta with Oude and Rohilkund, had a line open between Lucknow and Cawnpore. Of the guaranteed lines the first in importance is the East India, open from the mouth of the Hooghly to the N.W. Provinces affording direct communication between Calcutta and Delhi: a distance of 1146 m. at Allahabad a vast iron bridge over the Jumna, with 16 spans of 200 ft. each, or 8000 ft. in all has been opened, and by it Calcutta will be connected with Central India and eventually with Bombay. The branch from Allahabad to Jubbulpore will join the Great Indian Peninsula railway that has its terminus at Bombay: this line had about 600 m. open in 1855. A section of it only 10 m. long but of vast importance has been finished. It takes the line over the Thull Ghat, and in the short distance rises 1000 ft. pierces 13 tunnels and crosses viaducts one of them 200 ft. in height and 220 yards long. The 10 miles cost about half a million sterling. The Bombay and Baroda line had in 1855 300 m. open for traffic. The Madras railway with its branches, crossing the Peninsula and connecting Madras with Baysore on the western coast, had 271 m. in work. The Madras line affords railway communication with Bangalore and the healthy country of Mysore, and will eventually pass through the cotton fields of the Nizam. In the N.W. of India are three lines the Sindh railway runs from the port of Karachi to Kotli on the Indus, where the service is continued by the Indus Sotli to the Punjab railway is open from Multan to Unisur passing Lahore, and has still to be connected with Delhi and Meerut by the Delhi railway: when this line, which is in active progress, is completed there will be railway communication from the Hooghly to the Indus. There still remains the line through the valley of the Indus. In addition to all these lines others are designed and especially one from Bombay through several native states to the N.W. Provinces. The estimated cost of the lines under construction is 277 500 000 of which 437 500 000 had been expended up to May 1855 the total length being something under 6000 m.

The material progress of the country will be gathered from the subjoined statistics, which display the rapid rise in the revenue, without any corresponding increase of expenditure since the empire came under the control of the queen's government. Instead of a vast excess in the expenditure over the revenue, the financial measures of the executive have produced a revenue exceeding the expenditure. The resources and expenses from 1858 to 1864 appear thus:—

Years ending April 30.	In India.		More Charge.
	Revenue.	Expenditure.	
	£	£	£
1858	31 700 770	35 076 028	3 165 058
1859	33,000,700	37,500,700	7 400,100
1860	39,700,275	44,251,300	7 289,453
1861	43,000,294	47,220 973	3,804,048
1862	43,650 411	47 511 000	3 860 589
1863	61,168 753	56,500,000	6,518,023
1864	64,613 081	59,067 723	6,445,918

Adding together the expenditure in India and the home charges, the finances of the year 1863-4 stood thus:—

INDIA

130

INDIA

Total Revenue, Expenditure, Surplus.		Branches of Expenditure.		Amount.
Total Revenue.	£44,814,661	Allowances, salaries, and drawbacks.		£228,088

The total value of the imports and exports (including treasure) of the several provinces of British India, and of the whole empire, in each of the years ending 30th April, 1860, 1861, 1862, is thus stated:—

Year	BOMBAY		MADRAS		BENGAL		PUNJAB	
	Imports	Exports	Imports	Exports	Imports	Exports	Imports	Exports
1860	26,771,000	12,000,770	9,800,566	5,466,136	15,900,630	13,000,204	40,663,360	22,000,519
1861	18,550,177	12,660,500	2,303,007	2,807,267	15,513,419	17,804,881	24,170,790	24,090,184
1862	14,807,340	12,110,000	3,473,810	2,418,004	10,004,500	19,000,000	87,373,417	67,000,000

In these totals are included £538,700 of imports, and £1,481,871 of exports, of British Borneo, which had previously been comprised under Bengal.

The exports from India to the United Kingdom in the years 1863 and 1864 are stated to have been £48,484,640 and £52,287,888 respectively and the imports of Home Produce from the United Kingdom £20,009,341 and £19,595,145 in the same years respectively.

The number and tonnage of European and other vessels

not native, and of native vessels, entered and cleared at the ports of British India in the years 1860, 1861 and 1862 are shown in the following table. Of the former class it may be stated that in the respective years the British vessels numbered 6434, of 2,918,001 tons; 6610, of 2,804,123 tons and 7700 of 3,391,978 tons.

Years ended April 30.	EUROPEAN AND OTHER VESSELS NOT NATIVE.					
	Entered.		Cleared.		Total.

The actual strength of her majesty's forces in India on April 30, 1862, is thus given:—

Presidency.	Europeans.	Natives.	Total.
Bombay (including S. P. Provinces and Punjab).	4,913	20,210	25,123
Madras.	15,421	65,787	81,208
Bombay.	12,641	21,016	33,657
Total.	23,975	107,013	130,988

History.—By the act of 1833 the East India Company held under the superintendence of the Board of Control the government of British India until April 30, 1858. Their charter was then temporarily renewed the number of the directors being reduced from 24 to 18, and the crown nominating 6 of them. In the latter part of 1856 dissatisfaction became apparent among the native soldiers the force of garrisoned outposts to them by the government being made the pretext for mutinies proceedings in the early part of 1857. Chhatrapati, or small states, were distributed by the natives throughout the country as a signal it is supposed, for rebellion, and the first outbreak occurred in February in the open country of the 19th native infantry. The rebellion rapidly spread throughout the Bengal presidency. In Oude, at Delhi, Lucknow, Jhansi, Cawnpore, and other places, the mutineers rose upon the Europeans and perpetrated the most horrible atrocities, murdering all whom they overpowered under circumstances of the utmost cruelty and ferocity. The tragedy of Cawnpore on June 27 was perhaps the most notorious episode; but the massacres at Jhansi, Delhi, and elsewhere, were scarcely behind that at Cawnpore in bloodshed. Immediate and heroic efforts were made to

check and suppress the mutiny. Unfortunately the European force in the country was small compared with the numbers of the rebellious troops, but indomitable energy and valour made up for deficiency of numbers. The small force under Sir H. Lawrence defended themselves in Lucknow with admirable heroism until Sir H. Havelock with a mere handful of men, captured Cawnpore, and fought his way to their relief, which he effected in conjunction with Sir James Outram, though the siege was not raised. Sir Colin Campbell afterwards Lord Clyde, being appointed commander-in-chief, arrived at Cawnpore and in November advanced against Lucknow stormed and captured the approaches, and opened a communication with Sir James Outram the beleaguered and exhausted garrison, with many women and children were then liberated and removed to Cawnpore. But the good and gallant Sir H. Havelock died on the 25th of the same month, November. Delhi was stormed and captured in September, and the King being taken prisoner was tried for treason, and hanged to Ranjore for life. Sir Colin Campbell then marched his plans for effectually overpowering and suppressing the rest of the rebellious forces, and early in the following year 1858, by a series of successful operations captured, dispersed, and reduced to submission the whole of the rebels in the disturbed districts the rest of the Gwalior mutineers, the final capture of Lucknow and the storming of the fort of Gwalior and restoration of the Maharajah who had remained faithful to the British power being among the most prominent operations. The fixed writings of divided authority being now apparent, in 1858 the English parliament altered the rule of the East India Company altogether, and the supreme sovereignty of India became vested in the queen, the executive being placed in the hands of a secretary of state and council in London, and a governor-general and

counsed in Jolietta, as before stated. The general administration of the country has been revised and improved, and its material progress and prosperity enhanced by the change. After long negotiations active measures were taken against the Rheotians in 1866, to repress and punish their strandering propensities. As a consequence a part of Rheotian has been annexed to British territory and the rulers reduced to submission.

INDIANAPOLIS [add.] a to U States, cap. of Indiana, situated in the centre of the state, on the W fork of White River, and at the terminus of no fewer than 8 railways, 108 m N W Cincinnati. It stands in a fertile plain, and consists partly of streets which are parallel or cross at right angles and partly of four long avenues, which traverse the place diagonally. These avenues radiate from a central square, in the middle of which there is a mound surrounded by a circular street, and planted with shady trees. Among the public buildings are 26 churches, a handsome state-house with a colonnade and a dome, a governor's residence, a court-house and county jail, a Christian university accommodated in a handsome Gothic building and open to both sexes; two female colleges, an hospital, an orphan asylum, and state-asylums for the deaf and dumb, the blind and the insane. The principal industrial establishments are brass and iron foundries, machine-shops, candle-works, woollen factories, factories for boilers, iron rolling, and ploughs and a number of planing flour and saw mills. The river which is navigable up to the town at high water is here crossed by a handsome bridge. Pop (1860) 18 611

INDUSTRY VILLAGE, a to British America, Canada East, cap. so Jolietta on the L. Ironmontion, and on the Industry and Rawdon railway 87 m N E Montreal with a R. Catholic church and college, a convent, unlimited water-power and a large trade in flour and timber. Pop about 3000

INGAL a to Western Africa, 85 m S S W Agades, lat. 15° 55' N lon. 7° 16' E. It is inhabited by the tribe of the Igghales who speak a dialect of the Songhay and possess much cattle, with which they supply the market of Agades. Some salt of good quality is obtained in the vicinity—(North)

INGERSOLL L, a to British America, Canada West, co Oxford on the Thames and on the Great Western railway, 60 m S W Toronto. It possesses eight churches—two Wesleyan two Baptist a Church of England a Free and a United Presbyterian and a R. Catholic—a grammar and other schools foundries and machine-works, and a large trade in wheat, flour and sawn lumber. Pop. about 2800

INKAN or **INKANEZ**, a to Russian empire Manchoura, on the Siliun, an affluent of the Zeyer lat. 53° N lon. 125° E. Its name as a place of trade is spread far and wide among the Tungusians and even Daurians, the mountainous other produce for necessaries supplied by Yakut traders who come either direct from Yakutsk or by way of Udek

INNACONDIAH a to India, presid Madras, dist and 50 m W S W Guntur. Its inhabitants carry on a considerable export trade in saltpetre, tobacco, glass, cloths, and oilskins. Earthquakes have been felt in the vicinity. Pop 4361

INSALAH or **ATF SALAH** a to N Africa, Sahara, east of Tust, cap dist Yillah, lat. 28° 45' N lon. 0° 45' E. It consists of 100 or 200 houses, and, though not surrounded by a wall is defended by a cunila. Within the town there is a copious spring and towards the S. the sloping heights which overlook it are covered with orchards and date plantations, but on all other sides its existence is threatened by the sand, which, carried by the wind, is gathering in heaps up to the very walls of the houses. Almost all the houses belong to the Arab tribe of Ouled Moklar most of whom however, prefer living outside in tents. A considerable trade is carried on by the inhabitants, particularly at the times when the pilgrims to or from Mecca pass through the place.

INVERCARGILL, a to, and port, New Zealand Middle Is., cap prov Southland, L bank of mouth of New River, upon a level site, 2 m above the entrance. The port is capable of receiving steamers and vessels of moderate size larger ships frequenting the great harbour of the Bluff, with which

It has railway communication, about 16 m distant. The entrance of New River is somewhat difficult of passage, owing to the exposed and shifting nature of the bar and the channel within, as well as the rapid tides; so that vessels require a pilot. But the adjacent country is fertile, and

hence the colony is a progressing one. Sixty-seven vessels, of 25 233 tons, entered the port in 1882 the imports being valued at £239,371 and the exports at £20 007. Two or three houses marked the commencement of Invercargill in 1867 and in 1884 it was said to contain with its suburbs, 8000 inhabitants

INWALD a to Austrian empire Galicia, ukraine Wodwin 27 m S W Cracow with 1800 inhabitants who weave excellent drills.

IOWA [add.] a to U States, Iowa, cap. co. Johnson, 1 bank Iowa River 80 m above its mouth, and on the Chicago and Rock Island railway, 190 m W Chicago. It is pleasantly built on a succession of terraces rising from the banks of the river. The first terrace is laid out as a promenade the third is covered by a Dutch edifice built of a finely variegated stone called bird-eye marble. This edifice was originally intended to be the capital of the state, but, on the seat of government being transferred to Des Moines, it was appropriated to the state university founded in 1855. The other principal buildings are the court house, the county offices, eight churches, a female collegiate institution, and asylums for the blind, and for the deaf and dumb. The principal industrial establishments are flour-mills. Pop. 3214

IOWA, a riv U States, which rises in the state of its name towards the S. frontier of Minnesota, flows easterly N E. receiving numerous unimportant affluents, and after a course of about 900 m joins the Mississippi on the right bank, 80 m above Burlington. It is navigable by small steamers to the town of Iowa, 80 m. from its mouth.

IPEK, a to Turkey in Europe, in the N of Adrianople, capital Rum-ili, on the Electric or White Dnie, 60 m N E Serrant. It was formerly the residence of the Greek patriarch, and has a very pleasing appearance, most of the houses

having in front of them orchards and plantations of mulberry trees. Pop. 8000.

IRAPUATO a tn. Mexico, state and 15 m. S. Guanajuato. It contains amongst its public buildings a handsome university and a Franciscan monastery. Attached to the latter is a richly-endowed Latin school. The inhabitants had once important manufactures, but now confine themselves almost entirely to agriculture. Pop. 18,000.

IRIMQUILLAN, or **IRIMQUILLAN**, a tn. Mexico, state and 72 m. N. by Mexico r. bank Tula. It is a beautiful but fertile mountain district at the height of 5400 ft. above the sea. Its inhabitants are chiefly employed in raising grain, vegetables, and fruit, the climate bringing to perfection almost all the products of the temperate zone. Pop. nearly 10,000.

IRIQUOUIA, a tn. British America, Canada West, co. Dundas at the mouth of the Iroquois canal in the St. Lawrence, 90 m. S.W. Montreal with a Wesleyan and an Episcopal Methodist church, and a grammar-school. It is a port of entry is visited daily by steamers plying between Montreal, Kingston and Hamilton and carries on a considerable trade in flour. Pop. about 900.

IRAYE, or **IRAYE**, a Western Africa, prov. Dala, 170 m. S.E. Timbuktu. It is a place of some importance, and commands like most of the places in the district, a nucleus of clay houses provided with a kind of square towers for granaries, and a suburb of cottages of thatched work of great variety of shapes. The inhabitants are partly Songhay partly Fellata. The former are in poor circumstances; the latter the dominant race, possess large herds of cattle and numerous flocks. The castellated mountains of Houshori form a prominent object in the landscape of Iraye.

ISCHIA [add.], a tn. Italy, on the N.E. shore of the island of same name, near the N.W. entrance of the Gulf of Naples. It is an ancient place without walls, but defended by a castle, which is entered across a narrow causeway and a bridge, and commands chiefly of a long street, with a handsome market place in its centre. It is the see of a bishop, whose palace is the only building worthy of any note. It has a small harbour which is tolerably well sheltered, and is visited by steamers of light draught. The castle has acquired notoriety as the prison in whose dungeons theacking of Naples used to confine his victims, and subject them to the barbarous treatment which was effectually exposed a few years ago.

ISGE, or **ISGE**, a Western Africa, country of the Marghi, at the W. foot of the Wandala Mountains, not far from the S. frontier of Bornu, to which it is nominally subject, 150 m. S.E. Bahr. It consists of two large clusters of hills. The L. cluster spreads to some extent over the plain which yields much corn and rich pasturage; the W. quarter where the Bornu deputy resides, has in its vicinity a sacred grove of considerable circuit formed by magnificent trees, mostly of the *Acacia* tribe and surrounded with an earthen wall. It is much visited by the Marghi for the performance of pagan rites.

ISLA DEL REY an Isl. America, the largest of the Pearl group, situated on the E. side of the Bay of Panama, is about 15 m. long by 7 m. broad, and, though not very lofty, rises into several peaks, one of which is 600 ft. high. On its N. side stands San Miguel, the principal town of the Pearl group. It is badly situated, having no proper landing-place, but possesses a conspicuous church. The S. end of the island consists of a remarkable promontory which juts out into the sea, and is about 4 m. long by 1 m. wide. Immediately to the E. of the promontory and sheltered by it, is the bay of St. Kimo, with convenient anchorage in all parts, and a fine stream of water falling into it.

ISLANGURH, or **ISLANGURH**, a fort, India, on the S. frontier of Bhawalpur, 65 m. N. Jaipur. It is a very ancient structure of small bricks, with ramparts varying in height from 20 to 50 ft. and including an area of about 80 acres square. It is flanked by numerous bastions on its N. and E. sides, and has at its N.E. angle a high gateway covered by an outwork. Several sandhils, only a quarter of a mile apart, completely surround it.

ISLAMABAD, **ISLAMABAD**, or **ISLAMABAD**, a tn. India, territory and 5 m. N. Meerut. It is situated in the left stream by the confluence of the Ravi and the Potoi, which

separately enter to a ditch built across the bank from the one bank to the other. The town and a station within it are thus surrounded by water and completely isolated.

ISLE VERTE, a tn. British America, Canada East, co. Terrebonne, r. bank St. Lawrence, 105 m. N.E. Quebec with a R. Catholic church a model school and a large trade in flour and lumber. Pop. about 2000.

ISMAIL [add.], a tn. Turkey in Europe, on the N. arm of the Danube, 25 m. E. Galatz. Before it was stormed and laid in ruins by Saurau in 1759, it contained 50,000 inhabitants and was one of the handsomest towns on the Danube. After it was ceded to Russia by the peace of Bakhareth in 1812 it began gradually to rise from its ruins, and had acquired importance as a fortress, a naval station, and a centre of trade when it returned to Turkey by the peace of Paris in 1866 being included in that portion of Bessarabia which to the extent of 2250 sq. m., with a pop. of about 180,000, was withdrawn from Russia, and given back to Moldavia. It has important manufactures of leather and carries on a very extensive trade in corn, wool, tallow and hides. Along with the newly created town of Tschikone, immediately to the E. of it, it contains 26,000 inhabitants.

ISNIK [add.] better known as **NICIA**, or **NICA** where the celebrated council of that name was held in A.D. 325. Turkey Anatolia, 60 m. S.E. Constantinople. It lies in a marshy plain surrounded by mulberry plantations, and a fine old wall flanked by towers in a variety of styles, sometimes round sometimes square or angular according to the taste of the different Byzantine emperors who erected them. Embedded in the walls are numerous marble-blocks and other ancient fragments, some of them with interesting inscriptions. The inhabitants of the town and surrounding district find a ready market for their produce in Constantinople, but there is little appearance of activity within the place, except at the post station which is situated in a small square adorned with a fountain and constantly crowded with waggons and other conveyances preparing to pass along the great thoroughfare to or from the capital.

ISPLAN or **ISPLAN**, a tn. Mexico, state and 40 m. N. Oajaca, in a mountainous district with a considerable population of Creoles, a spacious market-place, and a number of excellent private and public buildings. Among the latter is a handsome church.

ITALY [add.] Through the Austro-Italian war of 1859 and the revolutionary actions in the minor Italian states, a United Kingdom of Italy was formed, with the king of Sardinia at its head, comprising the Sardinian States Austrian Lombardy excepting a small part in the S.E. contingent to the R. bank of the Po, the kingdom of Naples the greater part of the States of the Church and all the Duchies, Nis, and Savoy however being severed and ceded to France. Until 1865 Turin was the capital of the kingdom, but in that year the seat of government was transferred to Florence, which thus obtained an accession of 20,000 inhabitants.

The fifty-nine provinces or departments into which the kingdom is divided are enumerated in the annexed table, together with the superficies and population. It will be seen that the population amounting to 21,708,710 inhabitants, is very unequally distributed.—

Provinces and Prefectures.	Superficies in square miles.	Population.	Population per square mile.
1. Alessandria	4,809.96	607,030	125.19
2. Ancona	1,544.18	307,123	204.78
3. Arezzo	1,544.44	228,426	154.37

51. Reggio (Cal.)	6,038.21	329,545	54.58
52. Reggio (Em.)	2,716.94	220,345	108.00
53. Salerno	5,555.90	377,589	86.47
54. Sassari	14,729.27	90,903	14.58
55. Siena	9,229.25	123,085	13.32
56. Sondrio	3,180.27	135,928	42.61
57. Terni	8,847.96	245,643	27.76
58. Torino	3,780.92	324,289	108.14
59. Trapani	2,569.45	225,555	97.07
Total	225,617.20	21,68,719	84.30

The Lombard provinces contain the largest percentage, and those of the island of Sicily the smallest.

The whole superficies of the 59 departments contains 25 561 729 hectares of which 3 909 379 are composed of mountains, rivers, roads and cities.

The 21,592 450 hectares are divided as follows:—

Old Provinces	8 823 545	Romagna	983 174
Lombardy	1,080,248	Marche	234,575
Modena	492,160	Umbria	6,155,280
Parma	226,180	Sicily	9,402,608
Tuscany	3,675,559		

And the number of proprietors is 4 153 645. About 6 hectares of land, therefore, may be apportioned to each.

The distribution of the proprietors and the population in the kingdom is as follows:—

Region.	Population.	Proprietors.
Old Provinces	4 979 678	1,908,000
Lombardy	4,037 918	521,500
Modena	645,827	84,000
Parma	406,556	58,000
Tuscany	1,792,343	138,500
Romagna	1,014,853	87,127
Marche	99,519	13,000
Umbria	299,430	84,000
Sicily	7 061 903	1,400,000
Sicily	9,231 744	900,000

It appears, therefore, that the number of proprietors in Piedmont and Sicily is a little less than a fourth of the population in Lombardy, Umbria, Parma, and Modena about a sixth part, in Tuscany and the Romagna three-fifths, in the Marche a ninth, and in Naples between a fourth and a fifth. Property, therefore, is most broken up in Piedmont, Sicily and Naples; not so much so in Lombardy, the Emilia, and Umbria, and is very much concentrated in Tuscany and the Romagna.

The net income derived from the 21,572 450 hectares is calculated at 1 008,000,000 francs, which gives an average value of 51 francs 81 centimes per hectare.

The following is the value of land in the different parts of the kingdom.

See List G.

Old Provinces	Net Revenue, per hectare.	Net Revenue, per hectare.
Lombardy	Fr. 61	Fr. 61
Modena	50 48	45 86
Parma	43 47	36 43
Tuscany	40 36	31 08

Landed property pays taxes and imports to the amount of 170 716,578 francs. Each hectare is therefore burdened with a tax of 7 francs 90 centimes. This sum is, however an average, property in the different provinces paying according to the following rates:—

	Per hectare.		Per hectare.
Piedmont	Fr. 61	Romagna	Fr. 41
Lombardy	51 01	Marche	45 86
Modena	11 4	Umbria	3 47
Parma	10 84	Sicily	4 63
Tuscany	7 0	Sicily	4 06

The misgovernment and degradation of many parts of the country previous to the revolution render the amelioration of the total state of the people a work necessarily slow and laborious. Education has been promoted, and is extensively increasing. At the end of the year 1863 there were in the Old Provinces Lombardy the Emilia Umbria, and the Marche 15 813 elementary schools—9,881 for boys and 5,932 for girls besides 1003 evening schools and 519 lyceums. Some provinces as for instance Sicily have doubled the number of their schools others, as the Romagna have tripled them. Yet 209 communes remain without boys schools, and 1444 without schools for girls. The total number of scholars in 1864 exceeded 1 000,000 there having been an increase of 300 000 in one year. But still much remains to be done for public education. According to the census of 1864 there were 2 638,555 men and 1 260,640 women who could read and write 398 588 men and women who could read only, and 7,889 338 men and 9 110,453 women, together 18,999 701 who could neither read nor write. Piedmont and the Basilicata occupied respectively the first and last places in education. The greatest ignorance is said to be manifested for instruction among the lower orders and especially among the adult part of the population who are uneducated.

In 1861 there was extended to the whole of the kingdom the law which had in the German states, since 1850 suppressed ecclesiastical jurisdiction and the privileges of the clergy and under which a royal decree had in 1865 confiscated 2099 clerical establishments with 7871 monks, nuns, and clergy and an annual income of 2145 640. In 1865 there were still in the kingdom 2383 religious houses, of which 1506 were for men and 876 for women. The number of religious persons was 14,807 men and 14,184 women together 28 991. Of these the Mendicant order numbered 3219. A project of law for the suppression of all religious houses throughout the kingdom was rejected by the Chamber of Deputies in 1865. A great part of the property previously confiscated from the monastic establishments has been devoted to the cause of public education for which an additional sum of £600 000 annually is voted by the parliament.

In order to meet the large annual deficits in the public revenues the Italian government has had recourse to loans of considerable amount. With the same object the state railways were sold in 1864 for £8 000 000. The sale of other state property including what were formerly ecclesiastical domains, valued at £18 920 000 is also proceeding gradually.

The material progress of the kingdom is manifested in the extension of the railway system. When the war of 1859 broke out there were only 1472 kilometres of railroad working; viz. in Piedmont, 807 kil. Lombardy 200 kil. Emilia, 83 kil. Tuscany 308 kil. and Naples, 124 kil. During the year 1860 and 1861 753 kil. were opened and at the beginning of 1864 about 3200 kil. were at work, and additional lines under construction. The position and configuration of the kingdom give advantages to the principal trunk lines for traffic from the east, and these lines will continue greatly to the development of the internal resources of the country at the same time. Carriage roads also in connection with the main lines of railway have been constructed either at the expense of government or by the concession of companies for the purpose.

Commerce, &c.—The imports of the years 1861 and 1862 are specified in the following table:—

ITALY

Common Copper		1,377,559	2,331,420	1,977,700

The exports from Italy to the United Kingdom in the years 1861-1864 were as follows —

1961	25 781,000
1962	5,108,800
1963	5,977,000
1964	5,475,000

In 1963 the special commerce amounted to:

Imports	\$31,000,000
Exports	17,007,000
Transit	5,775,700
Total	\$53,782,700

being an increase of £2 958 400 over the previous year 1882

The shipping trade has greatly increased, as the following statistics of the number and tonnage of sailing and steam vessels entered and cleared at ports in Italy from and to various countries (including Italian ports) in each of the years 1861 1863 and 1863, will show —

VERBENA **VERBENA**

The number of merchant vessels belonging to the kingdom at the beginning of 1864 was 10,864 of 690,623 tons.

The national debt of the kingdom, which has been consolidated by the mortgaging of the public debts of the different Italian states, amounts to £167,699,000 bearing interest to the annual amount of £7,896,690. The terms of the budgets of 1864 and 1865 are given thus—

Revenue	1864.	1865.
Land Tax	112,800,610	124,696,000
Tax on Movable Property	13,590,567	8,200,000
— Transfers	80,350,750	70,500,000
Onwards, &c.	68,300,000	60,710,000

Total Extraordinary	124,106,987	106,410,267
Grand Total	894,415,435	585,219,015
Deficit	284,341,720	308,116,517

Reduced to pounds sterling the two budgets stand thus—

	1864.	1865.
Estimated Revenue	£28,944,740	£28,096,101
— Expenditure	£31,714,437	£31,107,701
Deficit	£2,809,696	£3,121,600

The actual revenues and expenditure for the two years 1863 and 1864 are as follows—

	1862.	1863.
Revenue	£28,096,076	£28,096,466
Expenditure	£6,023,704	£6,019,738
Deficit	£18,908,897	£18,958,213

Army and Navy.—By a new organization of the army in 1865 it was to be composed of 189,541 men, and 10,027 horses on a peace footing and of 285,870 men, and 27,069 horses on a war footing. The navy of the kingdom comprised in 1865, 58 steamers, of 50,780 horse-power and 2100 guns, and 17 sailing vessels, with 279 guns altogether 116 men-of-war with 2439 guns. Among them were 5 iron clad frigates, and 8 more iron-clad vessels were under construction. The navy was manned in 1865 by 10,937 sailors and 5880 marines.

Government and History.—The present constitution of Italy is an expansion of that of the former kingdom of Sardinia, which was promulgated in 1848, and is founded upon the model of England. According to the charter the executive power is exercised by the sovereign through responsible ministers. The legislative authority is vested in the king and parliament conjointly the latter consisting of two chambers, an upper one—the Senate—composed of the princes of the royal house who are of age, and an unlimited number of members above the age of 40 years nominated by the king and a lower one—the Chamber of Deputies—the members of which must be 30 years of age, and are elected by the citizens who are upwards of 21 years old, and pay 40 lire, £1 12s, in taxes annually. The duration of the parliament is five years, but the king has the power to dissolve it any time but is bound to order a fresh election and convolve the new parliament within four months. The ministers have the right to attend the debates of both houses, but have no vote unless they are members. The meetings of both chambers are public and no sitting is valid unless an absolute majority of the members is present. The Chamber of Deputies had 448 members in 1862.

Austrian oppression in Lombardy-Venetia, the tyranny of the kings of Naples and the misgovernment of the Papal States and of the Duchies, abetted by Austria, led to the eruption of 1859 when France, aiding with Sardinia, drove the Austrians out of Lombardy and the people of the Duchies rising against their tyrants expelled them and by popular vote annexed themselves to Sardinia. The question of Venetia, on July 11 1860 after the battle of Solferino, besides the cession of Lombardy stipulated for the restoration of the dual government and the establishment of an Italian confederation of which the Pope was to be the head. But the people would it otherwise. The victorious career of Garibaldi dethroned the king of Naples, detached a large part of the States of the Church, and Sardinia in 1860 intervening to complete the revolution, the whole of Italy and Sicily except the city of Rome and its vicinity was combined in a united realm, which in 1861 was proclaimed as the kingdom of Italy with Victor Emmanuel as its sovereign; the temporal power of the Pope being secured by French troops stationed in Rome. In the war which broke out in the spring of 1866 between Prussia and Italy combined and Austria, the Italian invasion of Venetia was repulsed in the battle of Custozza, but the Austrians suffering heavy reverses from the Prussians, Venetia was ceded to the emperor of France, by whom its destiny was put to the vote of its inhabitants. That vote was unanimously in favour of union with

Italy with which the province has accordingly been incorporated.

ITAQUI a tn. Brazil prov Rio Grande do Sul, on the Uruguay. It is a thriving little place, and carries on an active retail and general trade. The shops number about 50, and are well supplied, particularly with costly articles of female attire imported from Europe. At the little harbour in the Uruguay the principal article of export is mated, or Paraguay tea. Pop. 2000.

ITASCA [add.] a lake, U. States, Minnesota, lat. 47° 10' N. lon. 95° 54' W. It is a small but beautiful sheet of water surrounded by hills and bordered by pines and firs at the height of 1575 ft. above the sea, near the watershed between the Red River of the North and the streams which belong to the basin of the Mississippi. It was at one time supposed to be the true source of this mighty river but recent explorations prove that it shares this honour with a number of other lakes situated in the same locality and nearly on the same level. The principal feeder of the Itasca, and in some sense the remotest source of the Mississippi is a small rivulet which rises among some hills a little to the

south, its outlet is a stream, which, as it quits it at its N. extremity, is about 10 ft. wide, and 12 to 18 inches deep.

ITURBIDE a tn. Mexico state Yucatan, 86 m S. Merida. It is the southernmost of the civilized settlements in the country and consists for the most part of houses built out of the remains of old Indian structures, many of which are still found in the district. Inhabitants chiefly Indians.

IVANOVO a tn. Russia, gov and 60 m N. K. R. Vladimir, strais Shuya. It is a well-built place, with straight and spacious streets; has seven churches, of which six are of stone; an industrial and two other schools, a cotton mill, numerous cotton printfields, chemical works and a machine factory and contains 8000 regular inhabitants besides a large floating population.

IZZABAD a vil. Persia prov and 15 m NW Yazd. Like other places in the same plain it is threatened with destruction from sand-drifts. On its S. side the gardens and houses have been buried for a space of 100 yards in breadth and to the height of 15 to 20 ft. Houses having their roofs covered on one side with sand, are still occupied on the other side but their doom is evidently sealed.

Joint Author of *The New Testament*,
with *Notes*, Grammatical, and
Exegetical.

WEIR, Rev DUNCAN H. D.D.
Professor of *Hebrew*, University of
Glasgow.

WILSON, Rev EDWARD, M.A.
Author of *The People of South*
Country of Scripture.

We can speak of this Dictionary in the highest terms. It is erudite and scholarly without being too profound for the general reader. —*The Post*.

This most valuable Bible Dictionary is without a rival in the English language. —*Weekly Review*.

The manner in which the highest order of the latest progress most beautiful and the illustrations equal to anything of the sort that has yet appeared. —*British Standard*.

"After spending a long time in looking through the volume, we feel sure that it may be relied upon as a thoroughly trustworthy guide; not indeed answering every party objection, or entering into minute criticism; but setting forth in a popular form all that need be known with regard to the general history, authenticity, natural history, and doctrine contained in the Scriptures." —*Christian Advocate and Review*.

For the student who is anxious to possess a dictionary of the Bible, character and by simple though not obtrusive learning and by a direct and a varied and useful and to a singular level. Dr. Fairbairn's work is the foremost of its kind. It is a treasury not only of biblical information but also of the whole science of divinity. —*Our Own People*.

Just Published, medium 8vo 30 pp. cloth extra, 7s

THE SAILOR'S WORD-BOOK

AN ALPHABETICAL DIGEST OF NAUTICAL TERMS including archaisms of early voyagers &c
By the late ADMIRAL W H SMYTH R.N., D.C.L. &c Revised for the Press by VICE-ADMIRAL SIR E
BROOKES R.N. &c

This Word-Book contains 17,000 sea terms and phrases of past and present times many of them not previously explained in print Besides sparsen and yachtsmen it will be found useful by shipowners lawyers journalists, and all others in any way interested in seafaring matters

This Word-Book may remain the standard authority as to all matters touched upon in it. —*Landed Service Magazine*.
The Admiral has thrown himself heart and soul into a work in which he was to have been assisted by Basil Hall, and which even without that assistance he had achieved successfully. —*Advertiser*.

It is a most excellent book for the young cadet a companion for the midshipman, either on board Her Majesty's ships or those of our great commercial marine It should be placed in the hands of all youths who have a love for the sea, or a purpose to take service on shipboard. —*Advertiser*.

It gives evidence of erudite industry and of all the hearty zeal which an English man looks for from a tried and trustworthy sailor Besides the strict technicalities of naval nomenclature, the gallant Admiral has not neglected the social side of sea life, and we think he has done well to include in his Dictionary some slang terms peculiar to the cabin and the saloon. —*Advertiser*.

Complete, including SUPPLEMENT in 30 parts, 2s. 6d. each; or a large vol. 2878 pages, Imperial 8vo, cloth, 2s.

The Imperial Dictionary,

ENGLISH, TECHNOLOGICAL, AND SCIENTIFIC,

On the basis of Webster's English Dictionary with the addition of many Thousand Words and Phrases, including the most generally used Technical and Scientific Terms, together with their Etymology and their Pronunciation. Also, a SUPPLEMENT containing an extensive collection of Words, Terms and Phrases, not included in previous English Dictionaries. By JOHN GAILLIE, M.D. The whole illustrated by above 2800 Engravings on Wood. The SUPPLEMENT separately 1 vol. cloth, 15s. or in 6 Parts, 2s. 6d. each.

This Work furnishes a much more extensive vocabulary than any Dictionary that has hitherto appeared.

Dr. Gaillie has not only produced the best English Dictionary that exists, but, so far as the actual state of knowledge permitted, has made some approach towards perfection. — *British Quarterly Review*

Copies beyond all precedent in the staple of ordinary language, it is enriched with a mass of terse and comprehensive information under the heads of technical and scientific words—information which has become absolutely necessary for the general reader in an age when the facts and language of Science are invading the sphere of common life at all points. An immense abundance of exquisite little cuts are introduced, scarcely any occasion being allowed to escape, where the definition can be made to appeal to the eye as well as to the intellect. These volumes have, indeed so many attractions, that, after having enjoyed their use for some time, we begin to look upon them as a positive necessity. — *Manchester Examiner and Times*

Complete in 30 parts, Imperial 4to, 3s. 6d. each or strongly bound in half-morocco, gilt edges, 4s. 1s.

The Imperial Atlas

OF MODERN GEOGRAPHY,

A Series of ONE HUNDRED carefully coloured Maps embracing the most recent Discoveries, and the latest Political Divisions of Territory in all parts of the World. Compiled from the most authentic sources under the supervision of W. G. BLACKIE, F.R.S., F.R.G.S., Editor of the *Imperial Gazetteer*. With an INDEX, containing references to nearly 120,000 Places.

In richness and accuracy of information, largeness of scale and clearness of engraving, this Atlas will compare favourably with the most costly works of the kind extant. It is portable, and can be consulted with ease, being an Imperial 4to measuring when closed 11 inches by 11 inches. The Maps are printed on paper measuring 22 inches by 16, and carefully coloured. The Series extends to Seventy-eight Maps, comprising about One Hundred different Maps.

After a careful perusal of the whole work, we can safely say that we know of no Atlas, published at the same low price, which is so copious and accurate in detail, so clearly printed and so well engraved, that no map has been hitherto constructed on scales so carefully adapted to the relative importance of countries, as viewed from the stand-point of English merchants and general readers. — *Lancet Review*

Re-issues with Supplement in 30 parts, Imperial 8vo 3s. 6d. each also in divisions 7s. 6d. each.

The Imperial Gazetteer,

A GENERAL DICTIONARY OF GEOGRAPHY,

PHYSICAL, POLITICAL, STATISTICAL, and DESCRIPTIVE containing comprehensive Accounts of the Countries, Cities, Towns, Villages Seas, Lakes Rivers, Islands Mountains Valleys &c. in the World. Edited by W. G. BLACKIE, F.R.S., F.R.G.S. With a Supplement, bringing the Geographical information down to the latest dates. Illustrated by above 800 Engravings, printed in the text—comprising Views, Costume Maps, Plans, &c.

This excellent book of reference. All the articles we have examined, whether long or short, exhibit a greater degree of correctness in minute detail than we should have thought practicable in so comprehensive a work. — *Athenaeum*

The value of the work is very much increased by the introduction of a large number of good woodcuts, including many maps of towns, harbours and districts; sketches of remarkable places, figures illustrative of customs, races, &c. — *Examiner*

Complete in 30 parts, Imperial 8vo, 3s. 6d. each also in divisions 7s. 6d. each

The Imperial Family Bible,

Containing the OLD and NEW TESTAMENTS, according to the most Correct Copies of the Authorized Version With many Thousand Original, Explanatory and Practical Notes also References, Readings, Chronological Tables, and Indexes. Illustrated by a choice series of Historical Designs, and Authentic Views of important Bible Localities, engraved in the most finished manner and extending in all to Seventy-four Plates. One large vol. Imperial 4to best morocco flexible plain, 2s. 15s., ditto, richly gilt 37 7s.

The Notes, amounting to many thousands in number are either original, or selected from the great Commentators and Illustrations of the Scriptures. Their size is so being cut, as far as possible, the first size and number of the text, and though the space they occupy is apparently small, they would if printed in the usual form exhibit an amount of matter and variety of information, much greater than what is usually given in Family Commentaries.

The Improved Illustrations, 75 in number, consist of a Series of Historical Designs, selected from the Works of the ancient and modern Masters, and a series of Views of important Bible Localities, from Authentic Drawings, the whole engraved in the most finished manner.

New and Revised Edition, in 62 parts, 2s. each or 14 divisions, super-royal 8vo, cloth, 10s. each.

The Popular Encyclopedia, OR, CONVERSATIONS LEXICON

Being a general Dictionary of Arts, Sciences, Literature, Biography, History and Politics; with Preliminary Dissertations by distinguished Writers. Numerous Illustrative Engravings. New and Revised Edition.

The **POPULAR ENCYCLOPEDIA** has been before the public for many years past, and has met with a large measure of acceptance. The alterations and corrections made for the present edition upon a vast number of the articles, and the additional articles inserted, render the Work a satisfactory exponent of the state of knowledge in the present day. The articles on Botany, Chemistry and Geology have been wholly re-written, and the scientific articles generally have been carefully revised while those on Geography, Topography, History, Theology, and Biography have been subjected to a rigid examination. An entirely new **Supplement** has been added containing additional biographies, notices of localities newly discovered, or that have risen recently into importance—of substances and processes new in science and the arts—of the great events of the world during the last twenty years—and other subjects of general interest.

The Illustrations extend to 164 pages of Steel Engravings, and 14 Coloured Maps, besides many Engravings on Wood.

The **SUPPLEMENT** alone, in 7 parts, 2s. each or 1 vol. cloth, 16s.

Complete in 96 parts, 2s. each or 4 vols. super-royal 8vo, cloth, 44s.

The Comprehensive History of England,

CIVIL and MILITARY, RELIGIOUS, INTELLECTUAL and SOCIAL from the Earliest Period to the Suppression of the Peepers' Revolt. By CHARLES MAURFARLANE and the Rev THOMAS THOMSON. Illustrated by above Eleven Hundred Engravings on Wood and Steel—Views, Costume, Portraits, Maps, Plans, &c. &c.

By far the most beautiful, cheap, and really comprehensive history of the nation which has ever yet appeared. —*John Bull*.

"This ought emphatically to be entitled the Family History of England." —*Morning Herald*.

An admirable record, not only of military and political events, but of moral and intellectual progress thus coexisting, in fact, a real History of England. —*Civil Service Gazette*.

This will be regarded by many—and with reason—as the best existing History of England. —*The Daily*.

Complete in 24 parts, 2s. each or 3 vols. super-royal 8vo, cloth, 42s. 6d.

A Comprehensive History of India,

CIVIL, MILITARY and SOCIAL, from the first landing of the English to the Suppression of the Peepers' Revolt, including an Outline of the Early History of Hindoostan. By HENRY REYNOLDS, Esq. Advocate. Illustrated by above Five Hundred Engravings on Wood and Steel.

This elaborate and able work is indeed more comprehensive than its title would imply for it gives us with philosophical discrimination the ancient, mediæval, and modern history of a most singular people, who were well fed and well clad who had written language and composed metaphysical treatises, when the forefathers of the men that now have strayed over two hundred millions of them were still wandering in the woods of Britain and Germany all of these things, and some perhaps carnivals.

The numerous engravings on wood and steel, remarkable for their beauty and fidelity contribute greatly to the interest and even to the instructive power of the work. —*Illustrator*.

Complete in 14 parts super-royal 8vo, 2s. each or 1 large vol. cloth, 36s.

The Comprehensive English Dictionary,

EXPLANATORY PRONOUNCING and ETYMOLOGICAL. By JOHN OULVIE, LL.D., Editor of the *Imperial Dictionary*. The Pronunciation adapted to the best modern usage, by RICHARD CULL, F.R.S. Illustrated by above Eight Hundred Engravings on Wood, and a series of Engraved Plates.

Without the series of Engraved Plates, cloth, 25s.

This Dictionary contains all English words in present use, numerous phrases, many foreign words used by English writers, and the most important Technical and Scientific Terms. It is based on Webster's *Imperial Dictionary* and other authorities.

It only remains for us to say without any reserve, that this is unquestionably the best Dictionary of the English language of its size and scope, that has yet appeared, and thoroughly deserves to become the standard family and school-room book throughout the kingdom and the ever-ready companion of the desk and library table. —*Illustrator*.

Imperial 16mo 800 pages, half-morocco, 12s. cloth, 10s. 6d.

The Student's English Dictionary,

ETYMOLOGICAL PRONOUNCING and EXPLANATORY in which the Words are traced to their ultimate Sources, the Root or Primary Meaning inserted, and the other Meanings given fully according to the best usage. By JOHN OULVIE, LL.D. Editor of the *Imperial* and of the *Comprehensive Dictionaries*. Illustrated by about 300 Engravings on Wood.

"This work before us is a marvel, whether for the quantity and quality of its matter or for the low price at which it is offered. He who will doubtless be as large as its merits. To teachers we commend it as the best and cheapest dictionary in the language—it is indeed destined by far anything of the kind before published." —*Papers for the Schoolmaster*.

It would be absurd to pretend that we have read the *Student's Dictionary* through conscientiously; but we have tested so much of it, and so impartially that we feel qualified to pronounce it emphatically an honest and thorough work, and a well-ought in able acquisition to the student's library. —*Weekly Review*.

Complete in 22 parts, royal 4to, 2s. each also in divisions, 6s. each.

Matthew Henry's Commentary

AN EXPOSITION OF ALL THE BOOKS OF THE OLD AND NEW TESTAMENT, with Practical Remarks and Observations By MATTHEW HENRY

This Edition presents a complete and accurate reprint of Henry's admirable work; characterized by elegance and clearness of typography accuracy of text, compactness of form, and moderation of price.

Considerable obscurity having hitherto been occasioned by defective typographical marking of the divisions and sub-divisions, and by loose and inaccurate punctuation, great care has been taken to rectify these defects, and thereby render the Author's method of arrangement and general meaning more perceptible.

The Work forms three handsome vols. royal 4to with a finely engraved Portrait of the Author Vol. I Geneva to 5th price 20s. Vol. II Job to Malachi price 25s. Vol. III New Testament price 25s.

To be completed in 50 parts, imperial 4to, 4s. 6d. each.

Villa and Cottage Architecture

SELECT EXAMPLES OF COUNTRY AND SUBURBAN RESIDENCES erected from the Designs of Banks & Barry John Baurd, Evan Christian, H. A. Darbishire, Hine & Evans, H. E. Kendall, Jr. E. B. Lamb, J. T. Rothead A. & G. Thomson, G. Treadwell, E. Walters, and other eminent Architects. With a full Descriptive Notice of each Building.

This Work is intended to supply a selected series of Plans of houses which have been erected of late years from designs by Architects of acknowledged position and ability. The Buildings illustrated are selected for a great variety of localities and are varied in style arrangement, and materials. They have been selected for their excellence in Design Convenience of Arrangement, and Reasonableness of Cost. A description of the site materials, and manner of construction, accompanies each set of plans with a statement of the actual cost of the house in most every instance.

The Illustrations consist of hand executed Engravings of Plans, Elevations, and Sections, carefully reduced to scale from the working Drawings. Perspective Views, and Enlarged Drawings of the Ornamental and Constructive details are added as occasion requires.

The Christian in Complete Armour A Treatise of the Saints' War against the Devil. By WILLIAM GURNALL, M.A. Accurately printed from the Author's own Edition. With a BIOGRAPHICAL INTRODUCTION by the Rev J. C. BULL, M.A. Oxon author of *Living or Dead, Home Truths* &c. In 20 parts 1s each or 2 vols. imperial 8vo cloth, 22s.

One grand point of all the Christian's in Complete Armour is the soundness and scriptural propriety of its doctrinal statements. There is nothing airy, vague, and over-stated in Gurnall's exhibition of any point, either in faith or theology. Nothing is dogmatically asserted, nothing is completely thrown into the shade. In its respect it is eminently like *Bury's Plumes*—a work so beautifully proportioned, doctrine that is laid out and given in Christian and these ten are. It is to be agreed in admitting it—*From Bury's Plumes* by Rev J. C. Bull, M.A. Oxon.

Family Worship A Series of Devotional Services for every Morning and Evening throughout the Year adapted to the purposes of Domestic Worship. Prayers for particular occasions and Prayers suitable for children &c. By above TWO HUNDRED EVANGELICAL MINISTERS. With Five Hundred Selected Hymns. Illustrated by Twenty-two fine Engravings on Steel. New and improved Edition in 20 parts royal 4to 1s each or cloth 27s 6d.

The elegance of the illustrations and the clearness and beauty of the typography place the mechanical department of this edition in the very first class of its kind while the names of many of its best theologians and authors of the age, a sufficient guarantee for its mental department is secured to no work on the subject of Family Worship.—*Journal of Literature*.

The Family Hymn Book A Selection of Five Hundred of the choicest Hymns and Spiritual Songs for Social and Domestic Worship. Cloth, 2s. This is the Selection which accompanies the New Edition of Family Worship.

Family Worship A Series of Prayers, with Doctrinal and Practical Remarks on Passages of Sacred Scripture, for every Morning and Evening throughout the Year. By One Hundred and Eighty Clergymen of the Church of Scotland. The original edition re-printed on larger paper 15 parts, imperial 8vo, 1s each cloth, 17s.

The Book of Ecclesiastes ITS MEANING AND ITS LESSONS EXPLAINED AND ILLUSTRATED By the Rev ROBERT BRIDGES, D.D. Square 8vo, cloth 7s 6d.

For learned as well as unlearned readers the most perceptible contribution yet made to our language the enabling them intelligently to read the meaning and profit by the lessons of Ecclesiastes.—*Scottish Guardian*.
